3460	Robin Dickens	5/18/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, it needs to be rerouted to the north of McKinney. We don't need another freeway through the heart of town.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 Virginia Pkwy, ElDarado, Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Re-route around Mckinney	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3461	Robin Lucero	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I most frequently travel between DNT east to 75. My biggest frustration is between Lake Forest east to 75	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: east/west directional roads north and south of 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: complete expansion between Preston and DNT	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no, if I understand alignment correctly, I am fully against any freeway building which will negatively impact property values	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too congested in McKinney and Princeton. No problems in Farmersville.	Comment noted.

3462	Robin Roose	5/1/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: In McKinney, I take the airiport rd to McDonald to by pass 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Divided highway or by pass.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Yellow, None	Comment noted.
3463	Robin Semadeni	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Insufficiently sized to accommodate the growth and current/future traffic from west McKinney to I35E.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Rock Hill Road if I am going east. Going west there are no acceptable alternative routes. The traffic from Prosper to Denton is so bad, I just avoid going west at all.	Comment noted.
3464	Robin Ward	5/8/2018	Electronic	Q: What solutions would you suggest in the US 380 Corridor? A: Slower controlled growth and faster expansion of 380 although neither options are probably possible.	Comment noted.

3464	Robin Ward	5/8/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3465	Robin Weissflog	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, with all of the construction of businesses and new homes, the traffic is horrible!	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3466	Robyn MacAllister	5/2/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: There is somewhat traffic. I don't experience much when I go to work or home.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: The yellow route proposals makes the most SENSE. It alleviates the traffic and is an actual alterative route to another highway. It also impacts the least amount of people. The blue and red bypass proposals would go through people's homes and ruins families around it!!! From what I saw, it would take people off 380 for a bit and throw them back on. Make no sense. Again, the yellow proposal actually is an ALTERNATE ROUTE that can alleviate this "congestion".	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No, especially blue or red proposals. Might I add that would butt up against my backyard! Meaning I could walk and see the damn bypass! NO. I will never support a freeway regardless of alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3468	Rod VanHoose	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident, Wasting tax dollars	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Far too many access points, cross streets and resultant traffic lights. Since the widening and 'improvements' it now takes 50% more time to get from McKinney to Denton.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Show me one!!	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Restrict access and eliminate half of the 35 traffic lights between Denton and Hwy 75.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: NO!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

3484	Ron Leeper	5/17/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Bloomdale to Wilmer road	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Enlarge current hwy or a raised second level. If no other choice bypass should be away from current neighborhoods Or do nothing and speed up expansion of Frontier road from Preston to Bloomdale.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No - not regardless of alignment	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue	Comment noted.
3485	Ron Ryan	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, to get to US75 from Lake Forest in the morning or evening timeframe is already bad and can't imagine what it will be like in a few more years.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I usually take the back roads north of hwy380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Stop the city of McKinney from issuing more building permits along hwy380 and make plans to widen the current road.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I do not favor a bypass around the current 380 route.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
3486	Ron Tabor	5/8/2018	Electronic	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, to much traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy or El Dorado.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: BUILD THE BYPASS!	Comment noted.

3486	Ron Faber	5/5/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3487	Ron Wagner	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: to crowded	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: new by pass	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3488	Ronald Jordan	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. We have lived in McKinney for 10 years and the amount of traffic has increased significantly and continues to increase. Many new signal lights have been added between McKinney and Denton during that time. With all of the new development and increase in population, the increased traffic causes gridlock along 380 more and more often.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There is not a good east/west alternative route between McKinney and Denton that is direct and with shorter travel time.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: New construction on a bypass route might be cheaper and less disruptive than trying to make the existing 380 alignment an expressway by adding a lot of overpasses and underpasses.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, definitely.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.

3493	Rony Peterson	5/9/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Rush hour and safety at all hours. With people slowing to turn and people going so fast there have been many accidents. Also, the lights allowing a turn on yellow seems to cause issues.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: I cut through whatever side street is closest. Most lead out of a neighborhood to a major road. There are a few that don't but my gps doesn't take me through those.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I like the freeway concept. Creating side roads for those needing to get off and keeping the main 380 moving.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3495	Rosey Jha		Paper Survey	Q: If US 380 is congested, what alternative routes do you take? A: Hardin Blvd then US 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Green or Pink	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Green/Pink	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
3496	Ross Edman	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: After living in Dallas I think 380 is one of the better roads I've travelled in the metroplex. The places I notice the most problems are by 75 and CCCC. Those lights back to back are necessary but it gets so congested even in off hours. In the last 6 months I have also noticed the commute time has almost doubled just because of traffic on 380 and tollway. I am concerned over the next 3 years that could become even worse.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Just sit in traffic. No alternative routed unless I take Custer or Coit but those are slow.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Right now, I don't have many. I didn't know what to expect from this survey.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Worried it would be too close to my house and drive property value down but I also see the value in it. I'm torn about supporting it. I do not support a toll road. Toll roads are outrageous in DFW with no public transportation alternatives existing.	Any future improvement projects would include assessment of the potential impact on the human and natural environments. Tolling is not being considered for the proposed project.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3497	Ross Gillispie	5/16/2018	Electronic	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, too many lights, and too many stops and entry/exit from the road way in heavy traffic. Often times this is on the wrong side of a hill.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Should be utilized as a highway similar to 75. No need to reroute, just put in on/off ramps at major intersections.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3497	Ross Gillispie	5/10/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes, but not regardless of alignment. It should closely resemble the current 380 alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3498	Roxanna	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many accidents on 380. Speed is too high for the close proximity of residential homes.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Reduce speed limit, add turn lanes into residential neighborhoods with entrances on 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3499	Roxanne Ledbetter	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Timing of traffic lights	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado Parkway or Hwy 121 tollway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand Hwy 380 to six lanes between Custer and the DNT.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: no, i think 380 is fine as is. yes it is busy around 5 pm just like any other big road is. i have not had any trouble driving on 380 and i use it so often.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: there are many different alternative roads, i usually use virginia or i cut through erwin park.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: increase the speed limit. i don't think we need to make 380 any bigger than it already is because mckinney is already going through construction everywhere and i really don't think it needs to be bigger.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no not at all. mckinney uses the pharase "unique by nature" but there's no nature left anywhere. if a interstate gets built right in the middle of mckinney it's not going to feel like home anymore , it's just going to feel like another huge city with lots of cars and commotion.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
3508	Russellann Wilson	5/14/2018	Electronic	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I hate 380 and avoid using it, particularly between Hardin and 75. The 75/380 quadrant is extremely congested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I live off Eldorado so I always try to take Eldorado to 75 and then go North to 380. If I am going west, then I take Lake Forest to 380 and turn left.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would love to see it become a freeway that connects to 75 easily, with good frontage roads and an access point for Stonebridge (maybe Lake Forest or Ridge). This gives easy access to the heart of Mckinney while keeping the integrity of the area.	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3511	Ruth Gibbs	5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Slow drivers cause traffic to stack up. Drivers are using the existing left turn lane as a third lane causing a very dangerous situation. Too many big trucks going to dump and locations between Princeton and McKinney.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: New Hope cut off to the North or around McKinney Airport on the south.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make the existing left turn lane a raised median. Post signs that slow drivers stay to the right. Make a two lane left turn lane going west at 380 & Airport Rd.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Depends on alignment. An outer loop would be desirable and making existing 380 a Business 380 for Princeton and Farmersville. 380 gets a lot of traffic from much further east of Farmersville.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3512	Ruth Wolf	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The speed of traffic with the traffic lights that have been put in since I moved here plus the extra people, which isn't great.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Toll Road like 121 vs the other proposed ideas. I live right off of Stonebridge Drive and Virginia Parkway in Mckinney	Comment noted. Tolling is not being considered for this project.
				Q: Do you support the building of a freeway regardless of alignment? A: If you mean make 380 a toll road like 121, I think so.	Comment noted. Tolling is not being considered for this project.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

3522	Ryan Lynn	5/1/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: My main concern is safety. People drive recklessly because of being preoccupied with their phones and also being in a hurry due to the amount of traffic on this route. I don't know the data, but anecdotally speaking, this roadway feels unsafe due to the middle "suicide" lane.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't have any alternative routes to my house.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Overpass intersections would be helpful. Any way to eliminate the need for stoplights on a main throughway would reduce the number of accidents.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Mostly yes, but I would still want to consider which alignment is proposed.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3523	Ryan Mullins	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion and too many traffic signals	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: County Road 123/Bloomdale, as it is next to my neighborhood. C.R. 164, C.R. 943 and Wilmeth road.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Move the bypass further North away from the Bloomdale/CR123 route. If built on Bloomdale/CR 123, McKinney will lose very valuable commercial property opportunities that could develop on both sides of the bypass.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I think it should only be built further north into the ETJ of McKinney. Thus providing more land to be developed for commercial purposes. You build a freeway, lots of businesses will flock to it, especially with the growth projections of Collin County.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.

				Q: If US 380 is congested, what alternative routes do you take? A: Virginia to 75 and Go down on Independence/Coit/Custer to Main to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: make a proper highway with no traffic lights	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3532	Saenz	4/30/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest, Harden	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: If any, double decker ramp on parts of 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I do not support building out 123 as a bipass. I don't see that helping as much as adding ramps to the existing 380. We've lived here for 10 years & managed the traffic just fine. People will find a way or start leaving earlier to accommodate!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
3542	Samuel Oh	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: As new developments are being built, there needs to be more control of the traffic as some of the cross sections do not have signal lights and can be very dangerous streets. I see auto accidents very frequently on 380.	Any future improvements will be designed to enhance safety. Traffic light coordination noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I do not take alternative routes.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I do not know.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3543	Samuel Rodriguez	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. Congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Hardin to White to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I am against all current proposed alignment options. If a freeway is built on existing 380 it must be depressed in front of Tucker Hill. If a bypass is done it must be west of future stonebridge.	Comment noted. Alignment options and roadway configurations are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I am against all current proposed alignment options. If a freeway is built on existing 380 it must be depressed in front of Tucker Hill. If a bypass is done it must be west of future stonebridge.	Comment noted. Alignment options and roadway configurations are still being evaluated.

				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3544	Samuel wilson	4/29/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 380 and 75 intersection is horrible. Need more bridges and less lights on 380	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More bridges on 380. Make 380 better and don't waste money on bypass.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: 380 yes. Bypass no.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3550	Sandra Edinger	5/14/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Usually side roads, which are also becoming more congested.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: The intersection of 380 and 75 is a complete mess. This needs to somehow be reworked. 380 should also be expanded.	Comment noted. TxDOT is currently developing a project to widen US 380 from Airport Road in McKinney to 4th Street in Princeton from 4 lanes to 6 lanes.
				Q: Do you support the building of a freeway regardless of alignment? A: I am in support of building a freeway, but alignment needs to be taken into consideration.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Red, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3553	Sandra Rios	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many people speeding and running red lights. Also too many right turns must be made from the far right lane instead of having a sort of exit ramp type of turn out of the main lanes of traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I skip it using 121 on my way home and I use other city streets for in town travel. Many others do this as well and we have found that speeding in our neighborhood (right off of 380) is exacerbated because of this.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Convert it to a standard freeway with flyovers like 75 or 121 but keep it along the current 380 path.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3554	Sandra Rojas Chang	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much congestion and too many traffic lights	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turn it into a limited access/controlled access highway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3555	Sandra Simon	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 380 is a dangerous highway to travel with the center turn lane and vehicles stopping to turn left or right into business. The highway is not properly marked in some areas for turning.	Any future improvements will be designed to enhance safety. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: I use whatever google tells me.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Highways around Princeton and Farmersville.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I would not like to see 380 expanded with construction for years. A loop around would be better. There are already to many deadly wrecks on this road and wilding it would only make matters worst.	Comment noted. alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3556	Sandra White	5/6/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None really, maybe Virginia but since it's under expansion- no	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Unsure	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3557	Sandy Dickey	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed is too high and too many people speed over 70 miles an hour. There are too many left turns that are not at a light which is very dangerous and backs up traffic on both sides.	Any future improvements will be designed to enhance safety. Speed suggested noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There are none.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Construct an alternate route to the north of McKinney away from the current 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Expanding the current 380 by adding lanes and eliminating businesses will only increase congestion and rip the city apart.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3558	santiago	5/3/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: traffic is horrible, current road design is not sufficient with future construction and growth	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: county road and fm roads, try not to use at peak hours	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: in the mckinney area it needs to be built as a second floor, double decker, on top of the existing 380. express lanes	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.

3559	Sara	5/7/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes! They are building huge apartment complexes and massive neighborhoods where residents must use 380 and it is not being widened.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 428	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: PLEASE make all of 380 overpasses!!!! Also widen 380 by Savannah and Providence Village.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: YES!!!!!!!!!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.

3563	Sara Gray	5/14/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: I'm not sure.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3564	Sara Lewis	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Hardin south	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Outer loop needs to be developed to divert all northern commuters heading south west and 380 needs to be widened.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
3565	Sara Macha	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion and inpatient drivers are major factors with 380.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado then cut through at Lake Forest, or Hardin.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Plan an outer loop further north than 380 where residential impact would be less.	Comment noted. alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No, alignment is of concern.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3566	Sara Marie Reed	5/6/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I live in the Creekview neighborhood and the entrances and exits into our neighborhood are very dangerous.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I usually just wait in traffic. If 380 is shut down, I will take FM 546.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I like the idea of a freeway with service roads, but I'm concerned about how the alignment will affect my home and property value.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: I support a freeway but the alignment is important to me.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.

3571	Sarah Chastain	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Many. Poorly timed lights, too much congestion, far too many accidents (probably due to the above).	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Highway 5 and residential streets, mainly White.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Toll road on or near the existing highway. The intersection of 75 and 380 is the worst part about living in McKinney. I will go South to businesses in Allen to avoid 380 during certain parts of the day.	Comment noted. Tolling is not being considered for this project.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, provided it aligned well enough that citizens could use it get from Princeton to Prosper and bypass McKinney.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter	Comment noted.

				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3574	Sarah East	5/19/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 289 south over to Dallas North Tollway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Move the highway north off of the existing 380 corridor. If 380 goes north at Custer Road, far fewer businesses will be affected. Anywhere east of Stonebridge will have a huge negative impact on residential areas. Contrarily, the area west of Stonebridge Drive on 380 is mostly commercial and has far more vacant land. Custer is also a much better route for people to cut through on their way north.	Comment noted. Alignment options are still being evaluated.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Do you support the building of a freeway regardless of alignment? A: Not regardless of alignment. If the freeway is placed east of Stonebridge and moves north, I would be very supportive.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3580	Sarah Mcanally	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No, it is nice now. Although, there are lots of red lights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I just stick it out. There isn't usually too much traffic except at custer during rush hour.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I don't know.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Sure. Anything to reduce the red lights.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3581	Sarah Schwartz	5/4/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't. 380 is the most direct route.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: needs frontage road type lanes for turning	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Only if it is built on existing 380	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3582	Sarah Tucker	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More turn lanes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes and no. There needs to be a freeway, but I am 100% against the pink and green proposals due to the many neighborhoods and businesses going in on 380 that will help drive the sales tax numbers up for McKinney. Why would we spend millions of dollars bringing Costco and other large corporations into McKinney only to demolish their business a year later?	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

3596	Scott Machalicek	5/15/2018	Paper Survey	Q: If US 380 is congested, what alternative routes do you take? A: Back roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Elevated freeway - the third option.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes!!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3597	Scott McGowan	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Past the Dallas North Toll there is just too much traffic. From 289 to Community everything flows well and then bottlenecks. Adding a lane in both directions and having some overflow routes through prosper would help.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Rockhill Road	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Add more lanes and a couple of new roads to bypass some of the traffic. A straight loop with few exits would help.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes. Do it now and do it right the first time. Don't build it and then rip it up to add another lane. Build as many roads as you can. Regardless it won't be enough, we know that. You might as well plan on building it to OK because it will be solid development within the next 30 years.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Parallel roads such as Virginia Parkway, White etc	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
3598	Scott Millman	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: NO. I do not want to see Erwin Park or any other area where outdoor enthusiasts get to enjoy nature and be with friends and family. I run and bike Erwin several times a week and encounter model plane flyers, hikers, scouts, campers, families etc and don't want to lose that. Its one of the few places to escape the noise of the city.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3599	Scott Oberle	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 1. The volume of traffic is too great due to what appears to be through traffic, specifically trucks, as opposed to local traffic. 2. Traffic moves too fast because many vehicles exceed the 55 MPH speed limit. 3. There are many accidents and it seems speed is a factor because speeding vehicles cannot stop or opt not to stop before traffic lights turn red. I can see the US 380 and Tremont Blvd. intersection from my home office and witness many accidents at that location. 4. The noise level increases dramatically when the traffic volume increases. The increasing number of trucks in particular generate a great deal of noise which greatly detracts from an otherwise peaceful planned community, Tucker Hill. 5. There are no sidewalks or bicycle paths along US 380 which isolates Tucker Hill from other neighboring planned communities such as Stonebridge Ranch. This makes it outrageously unsafe to walk or ride our bicycles to the nearby retail area at Virginia Parkway and Stonebridge Drive where many restaurants, 3 banks, a grocery store, a dry cleaners and the West McKinney Post Office are located.	Comment noted. Any future improvements will be designed to enhance safety. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared.Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. Bicycle and pedestrian accommodations would be considered for any future projects.
				Q: If US 380 is congested, what alternative routes do you take? A: If US 380 is at a standstill due to an accident, we have no alternate routes, as this is the only way into and out of Tucker Hill and we are stuck. Our only alternative would be to walk down the shoulder of the highway. If we are able to actually get onto US 380, we go south on either Custer Road or Ridge Road to Virginia Parkway where we can go east or west.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: The best solution would be to build a bypass to the north where there is still a significant amount of open land. In studying the map, that would be a route through the southeast quadrant of Prosper and the northwest corner of McKinney, running from US 380 in a northeasterly direction towards US 75. My home and the entire Tucker Hill community would be adversely affected by the proposed blue, red, green or pink alignments and I am therefore strongly opposed to any of these alignments.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I do not support the building of a freeway unless the alignment takes into consideration the many newer homes, planned communities and businesses that have been built within the past 15 years on both sides of US 380 between US 75 and Custer Road in McKinney. US 380 runs through the heart of McKinney and turning it into a freeway would basically destroy a growing business community that is vital to the northwest part of McKinney.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

		5/17/2018	Email	Hello Mr. Endres, You and I spoke on the phone a few weeks ago. To refresh your memory, my wife and I are new homeowners in the Tucker Hill community in McKinney. After owning a home in Stonebridge Ranch since 2002, we decided to downsize last year and move to this charming community with a small town feel, plus extremely nice amenities and common areas. As you know, the community center and community pool are located very near the heavily landscaped and manicured entrance to Tucker Hill at 380 and Tremont Blvd. My home is also on Tremont, just the third home from the entrance on the right side. We have more invested in this home than our previous home in Stonebridge, despite downsizing. If fact much of our life savings is in the equity of our home. My wife and I both plan to retire within the next few years and I feel our financial security may be in serious jeopardy if our home value is reduced by the US 380 realignment. The options to expand 380 in front of Tucker Hill would make our home very difficult to sell and would devalue it by more than $100,000, in my opinion and in the opinion of our real estate agent. Worse, we would not want to live here in retirement with a freeway across the street from our front porch and our master bedroom. I was told by TxDOT at the public meeting in Prosper that a 400' ROW would require complete removal of the existing treed and beautifully landscaped entrance to Tucker Hill, as well as razing the homes directly across the street from our home and an access road would be placed there. After working for more than 50 years, we would end up moving into a significant "step-down home" in a "step-down community" in order to have peace and tranquility in retirement, due to the significant loss of equity in our home. TxDOT should not put us in such a position and should not allow this to happen to any McKinney residents when there are better alternatives. A bypass on either side of Tucker Hill would impact many additional Tucker Hill homeowners in a similar way. The consensus of the Tucker Hill community is that Expansion of 380 in front of or on either side of Tucker Hill is not acceptable, so NONE of the proposed 380 realignments are acceptabel. In my opinion, the best solution is an east-west freeway separate from 380 and further north where so many existing homes and businesses would not be impacted. If a 380 bypass is inevitable, I believe it should follow the route of Custer Road, north from 380. A freeway is a natural boundary between communities. Consider SH 121 / Sam Rayburn as it divides McKinney and Allen, as well as Frisco and Plano. I don't believe anyone in McKinney wants our community divided into northern and southern sectors, and that is what would very likely happen. Custer Road is already a natural boundary between McKinney and Prosper, so neither community would be divided by expanding Custer ino a 380 bypass. This would certainly take some cooperation and cities have met to jointly discuss this issue. If not, I would ask that TxDOT facilitate a discussion between the cities of McKinney and Prosper and immediately initiate that dialogue.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				I have one additional observation regarding traffic flow. Commuters and frequent travelers take the fastest route and the path of least resistance. Bigger freeways and highways with higher speed limits attract a significantly higher volume of traffic. If you build it, they will come! Fewer lanes and lower speed limits tend to attract mostly local traffic and much less through-traffic. That is acceptable and preferable for McKinney residents for accessing local neighborhoods, shopping, schools, churches, parks, etc., along 380 in McKinney. It is absolutely not in the best interest of McKinney or Tucker Hill residents for 380 to be converted into a freeway or what would become the preferred truck route between I-35 and Highway 75. Mr. Endres, I would welcom additional conversations between Tucker Hill residents and TxDOT. I'm sure you already know our community leaders. As a public servant paid by our tax dollars, we are counting on you to act in our best interests and to not allow the pristine community of Tucker Hill to be negatively impacted in any way. Please feel free to call me personally to further discuss this issue as well. Most Sincerely, Scott Oberle Tucker Hill Resident 2016 Tremont Blvd. 469-223-4226	Comment noted.
3600	Scott Olson	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Weekly user of Erwin Park	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Love the convenience of the existing road, just don't want it to get much bigger, and encroach on Erwin Park. Also, don't want to see it turned onto a toll road.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable. Tolling is not being considered as an option for funding.
				Q: If US 380 is congested, what alternative routes do you take? A: Depends on congestion and location.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I do not have enough data to offer an effective solution.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: It appears to be a necessity, but location will have a significant affect on my support. At this point, routing through Erwin Park will severely sour any support.	Comment noted. None of the proposed alignments directly impact Erwin Park.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3601	Scott Rhodes	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, I drive from McKinney to Denton daily. Very congested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado, around thru Prosper, Sam Rayburn, lots of different routes. Most end back on 380 at some point	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: a bypass, maybe something like 288 that Denton has	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3602	scott robinson	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: El Dorado, 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: need to be able to aupport more traffic	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: perhaps	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.

3605	Scott Setliff	5/16/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Yes - traffic noise; fast traffic, heavy congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: n/a	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
		NA	Comment Form	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. 3607	Scott Zanetell	5/14/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Yes, proposed routes impacting environment, open space and Erwin Park.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer Road North through Westin or Prosper.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen existing route all the way to I-75.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely not.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
3608	Sean Bates	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic congestion is increasing	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I usually just stay on 380. Even congested it is quicker alternative to destinations between McKinney and Denton than trying another route.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Look for solutions that would limit red lights along 380 with minimal impact on neighboring homes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Regardless of alignment, no. It is CRITICAL that any solution have minimal negative impact on homeowners neighboring 380. As a homeowner in Stonebridge Ranch with a home close to Stonebridge Dr and 380, I am among those strongly concerned about the negative impact on my home value and quality of life in my neighborhood a wrong expansion decision could create for us.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Many. The stretch of 380 from Airport Road in McKinney to Princeton has become particularly dangerous. Speeds in excess of 80 mph are common. Traffic accidents are frequent. Now, with construction and material landfills along this stretch of 380, dump trucks, gravel trucks, and cement mixers make driving 380 quite aggravating and dangerous.	Any future improvements will be designed to enhance safety. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
		4/26/2018	Comment Form	While it is fully understood that any improvements would affect people, from what was presented the most logical fix for 380 would be the freeway option for existing 380. This would affect the least amount of homeowners, not split any exisitng land areas, and would have better asthetics than any other option. Model the design of North Dallas Tollway and this will contribute to the least traffic noise of any option. This option would leave land in west McKinney for future taxable development in way of houses and/or business, which would generate more funds for the city.	Comment noted.
3613	Sean Smith	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

		NA	Comment Form	The red and yellow path go right through the middle of our property. It would put a major highway less than 100ft from our home. We have 6 children who run cross country in those fields, play, hunt & explore nature in the creek & woods that would be destroyed by this path. This path is drawn over a creek that feeds into Honey Creek. this area has birds, fish, ducks, beavers, and so many other creatures living here, not to mention the beautiful trees. The value of our property would be ruined. The city is trying to put a sewage pipe line through our land & our mortgage loan said this could cause our loan to be in default because of property value loss. A highway would be even more damaging. We would not be able to access the other portion of our property. The noise polution would be a major issue having a highway in our backyard. This was not on any plans when we purchased our property 2 years ago. Poor city planning should not allow the government to come & steal peoples private property. 380 should remain on 380. Businesses located on 380 knew this was a highway. Home owners & homesteads did not know that a potential highway was possible when they purchased. Keep 380 on 380.	Comment noted.Any future improvement projects would include assessment of the potential impact on the human and natural environments.
3633	Shannon Burkett	5/11/2018	Paper Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not enough Pedestrian-friendly features (Pedestrian bridges, hike-bike trails, etc....	Comment noted. Any future improvements would consider incorporating bicycle and pedestrian accommodations.
				Q: If US 380 is congested, what alternative routes do you take? A: White Rd., Wilmeth, El Dorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Invest in a robust Public transportation system! The problem w/ building a freeway or re-aligning/widening 380 is that it is a temporary fix, like pinching a severed artery. It might do you good for a time, but eventually you'll have to come up w/ a more permanent/useful solution. Building a new road/roads encourages development. This, in turn, brings new people/cars to the region & strains Roadways during peak travel times. It's a positive feedback loop. Training your citizens to use/depend on pub. trans. reduces the need for cars. You need busses! lots of 'em, not those shitty little shuttles.	Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project.
				Q: Do you support the building of a freeway regardless of alignment? A: You can't reduce a problem of this scale to a simple "yes" or "no" answer, therefore I refuse to respond. If you're going to do it, you're going to do it.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.

				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado or Virginia for east west travel.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3641	Shannon Miles	5/15/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: I take 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen 380 on 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I do no support tearing down established family homes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3642	Shannon Murphy	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion, dangerous to cross coming out of my neighborhood.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 982 to Branch to Allen Bridge farmer to McKinney	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Add red lights to assist getting out of neighborhoods. Widen the highway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3643	Shannon Raines	4/27/2018	Electronic	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Very dangerous and crowded	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I would take 380 until I hit community road and take the back way	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: An over pass, right over 380.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3643	Shannon Raines	4/27/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: No I do not support	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3644	Shannon Ratliff	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident, My kids drive to high school at North daily	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: High school expects our kids to drive on a busy, fast road. Would like alternate route to McKinney North high school.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White ave, lake Forrest to wilmeth	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Please run a bridge over hwy 75 at 380	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not sure, I don't want highway noise affecting our home life	Comment noted. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3645	Shannon Supplee	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Outdoor enthusiast	Comment noted.
				Q: How often do you drive on the existing US 380? A: Never	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: N/a	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Unknown	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No should not go through parks	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments, including parks. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3651	Sharon Eaves	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The speed limit varies too much and traffic gets very congested at a few locations. The traffic lights also seem designed to slow everything down.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There are not alternate routes unless an accident has shut down 380 and then I take small side roads to get around the accident.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: There needs to be 2turning lanes at airline. One of the existing straight lanes could be turned into turn left or go straight. 60 is too fast for most of the road between Princeton and McKinney, especially when there are so many businesses.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, this traffic problem is going to continue to worsen unless a freeway is built soon.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.

3652	Sharon Harty	5/5/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Yes. Traffic and stoplights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 75, 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: If 380 was like 121, with a highway plus service road, that would be awesome.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Makes the most sense to me to improve the existing 380. The other options would level some people's homes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3653	Sharon Hix	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Use weekly to McKinney	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed limits	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None. Where do you go to get to McKinney without getting on 380???	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bridges instead of red lights..traffic moved better when there where less stops for red light and big rigs should always stay to the right...please everyone Slow Down...	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes,,Something needs to be done. I don't feel save driving and everyone needs to Slow down.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.

3659	Sharron Edwards	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: From Farmersville, TX to Denton, TX Hwy. 380 is extremely congested. New housing developments are being built west of Hwy. 75 all along Hwy. 380 to Denton, TX. This will only add to the congested area. Hwy 380 needs to be at least 6 lanes in both directions as a major thoroughfare.	Comment noted. TxDOT is currently developing a project to widen US 380 from Airport Road in McKinney to 4th Street in Princeton from 4 lanes to 6 lanes.
				Q: If US 380 is congested, what alternative routes do you take? A: There are no better alternative routes say from McKinney to Farmersville or from McKinney to Denton.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I believe Hwy 380 needs to be expanded to 6 lines in either direction.	Comment noted. TxDOT is currently developing a project to widen US 380 from Airport Road in McKinney to 4th Street in Princeton from 4 lanes to 6 lanes.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I never take alternative routes. It hasn't been much of a problem for me.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3669	Shay & Melissa Sanders	NA	Comment Form	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I live in Farmersville, 16 miles from work, and sometimes it takes me an hour to get to the office. The middle turn lane is dangerous. The speed limit is too fast and there are too many points of entry/people stopping to turn off the highway.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: 1377, 461 and Monte Carlo.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3670	Sheila Foster	5/11/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Construct an elevated highway over the current 380 for people who are not stopping in Princeton. You could have an on-ramp and exit ramp in Farmersville at 78, on-ramp and exit ramp in Princeton off of 982, on-ramp and exit at Bridgefarmer, on-ramp and exit at 75. Kind of like in Austin, how the upper level of 35 is designed.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.

3683	Sherri Nilson	NA	Comment Form	I would like to make the comment that if 380 does indeed need to be upgraded in order to accommodate more and/or better traffic flow, rather than doing a loop around the City of McKinney, why can't a new roadway be stacked on top of the existing roadway with a single entrance/exit at Highway 75 and another at Custer Road? Something similar to what was done along 635 in Dallas. I know it will be costly, but the City of McKinney and Collin County can surely both share in that cost. The other option that I wish your department would look at is to use the Collin County Outer Loop that is already in the planning stages. Lastly the worst option as far as I am concerned is the RED Option. We would end up with a 6 lane road in front of our house and a freeway behind. : (	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: yes, speed and lack of lights and major intersections	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Haven't lived here long enough to figure out all the routes. Moved here from Bedford.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Use the existing pathway and widen it where necessary. In McKinney, this wouldn't be any more difficult than what I have seen the City of Colleyville doing with their widening of highway 26.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I do not. There is enough noise from I-75 already to add 380 bisecting it in a different manner and causing more noise disruption to more residential areas.	Comment noted. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

3695	Sid MacAllister	5/2/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Bridge Farmer road to FM 546 into McKinney	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bypass Princeton to the south	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: My concern, IS the alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
3696	Sieglinde Schupp	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: 121	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.

3698	Sigrun Clariot	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too congested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: If you want the byway it would have to go from Preston Rd and further north were there are not residential homes alrighty built . Like Laury Crossing and meet 75 around were Melissa starts .	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Or go north onCuster rd to past frontier parkway and to 75 in Melissa or if going east go into New Hope and Princeton there rutes have less buildings and homes just enter that into the planing so it showed " there will be a highway built here "	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3699	Silvia Escamilla		Paper Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It is very congested at any time of the day	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: the back roads through the neighbor hoods but Hwy 5 is also congested	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: No freeway through McKinney especially between Hwy 5 and US 75	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Only if it's the Red Line because on the East side of town we do not have very many restaurants & grocery stores so I am against a freeway from 75 to Hwy 5	Comment noted.

3719	Stacie	5/7/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: I take 380 regardless if it congested or not	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: A over pass at the 75 & 380 intersection	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No!!!!!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3720	Stacie Spiker	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Dangerous	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Don't build over Erwin park. Its so busy here we need spots where we can appreciate nature, take our children, where wild life can live. In a Republican but I still feel we need these great spots.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

3736	Stefani Lear	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many trucks.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: Not with current alignments.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

				Q: Do you have any concerns with the existing US 380? A: Yes.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White, Virginia, Bloomdale	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen where possible & build the outer loop. Stay east of private lake in Walnut Grove. Green, Red & pink are preferable but blue & yellow are fine as long as they stay away from Walnut Grove subdivision.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, as long as it's one of the 5 that were presented or a combination, and as long as it stays out of Walnut Grove subdivision.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3741	Stephan Ware	5/2/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Congested at busy times. Slow for long distances	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Prosper Trail / El Dorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: STRAIGHT LINE FREEWAY. Alignments Green or Pink ONLY	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: NO.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
		5/10/2018	Email	Stephen/Tony, 1) Based on your Travel Time Estimater, the "Draft of Comparison Options" page seems misleading a. If your own numbers show that grade Separated Intersections are 30% slower than a freeway (19/27), how does that translate to rating differences on page 20 like i. **image** vs **image** And even ii. **image** vs **image** Those graphics make it appear as if freeways are 50 or 75% BETTER, when your time model numbers below only show 30% lower throughput	The ratings were a qualitative comparison. Travel times were not the only criteria considered.
				2) Based on your Travel Time Estimater, Are you actually saying a limited access 70MPH highway with frontage roads in 2045 is going to be 3 minutes *slower* than the exact route is today with something like 15 stoplights?	The Travel Time Estimator provides an estimate of what the differences n average speed would be. The 2018 times were based on Google Maps. The 2045 times were based on the North Central Texas Council of Governments (NCTCOG) Mobility 2045 traffic demand model (TDM).
				3) If a freeway costs "$$$$$" (page 20) or around $1.5B in construction only (Stephen's presentation to the city 4/30) and grade Separation costs "$$", how do I get a more real number for "$$"? a. Has any work been done on what could be accomplished with "$$$" of non-construction options? ("$$$$$" - "$$") i. Is the entire set of "non-construction" options TXDot knows of ["regional public transit"] or are there others?	The $1.5 B is just a very simple cost per mile construction cost estimate. It also did not account for any right of way and utilities relocation. It was not a detailed estimate. A typical grade separation can cost around $25 M. We will be creating more detailed costs estimates in next phase of our study. Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project.
				4) Projections can be tough, and over time periods, a 3% growth rate that tapers to perhaps 2.5% or even 2% for one reason or another can make a huge impact. Also if say 10% more of the workforce is able to work from home and 25% work flexible hours in 2025, that can really mess up "rush hour" traffic models - to say nothing of 2045 models. a. How did you account for variability, high potential distributions of reasonable outcomes? b. What are your base demographic assumptions?	Projections based on available data help give us an idea of what may happen, but it is uncertain how future technology will actually affect transportation in the future. There are a number of possible scenarios that can affect future trips. For example, people working from home may decrease the number of trips, but autonomous vehicles may increase the number of trips.The Mobility 2045 website is at https://www.nctcog.org/trans/mtp/2045/ which is the North Texas Countil of Governments' regional transportation planning document. Different sources have varying population forecasts for the future of Collin County. Our slides referenced the “2014 Texas Population Projections by Migration Scenario Data” Texas State Demographer, WEB. 23 April 2018. NCTCOG inputs their demographic data into their traffic model. The model does not consider different growth scenarios. https://www.nctcog.org/trans/mtp/2045/documents/3.0SocialConsiderations.pdf

	Commenter Name	Date Received	Source	Comment Topic	Response
				5) Back to the Travel Estimator below: Are you really saying that travel from 75 to the Tollway will be 3 minutes SLOWER in 2045 with a limited access freeway in place than it is today on a 30-60Mph road with the 15 or so stoplights? a. If you stand behind these numbers, how do I get the underlying numbers (volumes, speeds, bottlenecks) to understand how that makes any sense? https://transportation.onetouchpm.com/TxDOT/US380/TimeMap/ STeve Ware Campanella, Inc. 214 522 4122 x101 steve@campanella.net I live in North McKinney: TxDot is looking at critical 380 expansion options and unnecessary "bypass" alignments put a 400-foot-wide 70-MPH freeway 300 feet from my (for now) "country" home. That's an LBJ 635, George Bush 190, or Sam Rayburn 121 sized freeway. If you live in Texas, you'll be paying for it! BEFORE MAY 18 please take the One Minute TxDot survey supporting a "straight line freeway" (PINK or GREEN) ONLY. Even if you don't drive 380, "the shortest [cheapest, fastest] distance between 2 points is a straight line."	The Travel Time Estimator provides an estimate of what the differences n average speed would be. The 2018 times were based on Google Maps. The 2045 times were based on the North Central Texas Council of Governments (NCTCOG) Mobility 2045 traffic demand model (TDM). We do want to emphasize that the intent of the scope of traffic modeling for our 1st set of public meetings was to compare the alternatives qualitatively. It is important to note that the corridor options presented are preliminary and subject to change. After the project team narrows down the alternatives, the traffic engineering team will begin to fine tune alignments, interchanges, speeds, congestion factors., etc. in order to compare and analyze the alternatives using more quantitative means.
		05/17/2018	Email	This is in reference to the feasibility study https://urldefense.proofpoint.com/v2/url?u=http-3A__www.keepitmovingdallas.com_sites_default_files_docs_TxDOT-2520380-2520Presentation-2520FINAL-2520v3.pdf&d=DwIFAg&c=pgTKN5yjcEYSPUPpeP-zuA&r=Do0hs007mNVABlxnQFgFRZAuXXi2aQYL-ZYagjMaLV0&m=6wWcesH8pS_b5ddsyUpmyeuwneeLK2uJJ02ia9KfVRA&s=ZePVrqQdOYM2FJ92qOlbO0a5L_UyMspd1TykbXzxql8&e= I am unconvinced by rating given on page 18 and the comparisons given on page 20. Page 21 lists "key factors we have examined". I am requesting a full copy of all the source data used in evaluating the proposed scenarios across each of those factors, as the structure and application process for all the specific calculations used in all the models or algorithms that contributed to the rating of each scenario along each of those factors, any intermediate results generated, all weightings applied, and all of the numbers that let to generation of the final "ratings". I am a database analyst with experience building complex models. I am comfortable working with a large variety of data types and system designs and can work with the appropriate people to establish the most efficient way to transfer this data and systems documentation.	TxDOT will provide all information as requested that is open record. Our study was qualitative in nature. There was not a quantative calculation to come to our conclusions.
				This is in reference to the "Time Travel Estimator" at https://transportation.onetouchpm.com/TxDOT/US380/TimeMap/ . I find the results unconvincing. I am requesting a full copy of all data that went into feeding this system, a description of where that data came from (establishing it's veracity) and all of the calculations and intermediate steps that were used in generating these numbers.	The Travel Time Estimator provides an estimate of what the differences in average speed would be. The 2018 times were based on Google Maps. The 2045 times were based on the North Central Texas Council of Governments (NCTCOG) Mobility 2045 traffic demand model.
3742	Stephanie Barnes	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Hardin to 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Would like to understand all options	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3743	Stephanie Diener	5/13/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: The only time I have a problem is when they have a traffic delay due to the current construction between Preston and the Tollway. I will take Custer to 380 instead of the tollway or Preston.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: I don't support anything being built that would have a negative impact on Tucker Hill. It is an incredibly unique community and I would hate to see anything taken away from this development.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3744	Stephanie Edwards	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic backup between Princeton and McKinney	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 380 to Bridgefarmer to 546	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: maybe an overpass to bypass stoplights to relieve some of the backup. And bypasses around the town centers of Princeton and farmersville	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Not a true freeway, maybe an overpass to bypass stoplights to relieve some of the backup?	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.

				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3748	Stephanie Johnson	4/26/2018	Comment Form	I live in Tucker Hill in McKinney. My husband and I recently purchased our home and moved here because we fell in love with the beauty and small-town feel of our front-porch neighborhood. Any widening of 380 that cuts into Tucker Hill will destroy this lovely community that is an asset to the entire city. An alignment such as the "blue alignment" is the only viable choice.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		4/26/2018	Electronic Survey	Q: What is your interest in this study? A: Other (please specify), property owner and nearby resident (Tucker Hill)	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. The road is too fast, noisy, and busy passing by the entrance to our community, Tucker Hill. Many accidents are occurring at this intersection.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: We have no alternatives into our neighborhood.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: The blue, or possibly the yellow if it does not cut into Tucker Hill, alignment option would work. If this alignment were to be done, the speed limit along the existing 380 corridor from Custer through town could be lowered, and restrictions such as no through-trucking could be added. This would reduce traffic congestion, noise, and accident danger. What must NOT happen is to widen 380 as it passes in front of Tucker Hill, destroying part of this lovely neighborhood and shops.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: NO. Only the blue, or possibly the yellow if it does not cut into Tucker Hill, alignment proposals are acceptable. Anything else would destroy one of the most beautiful neighborhoods in the city, Tucker Hill. My husband and I recently purchased our home here with the intention of living out our retirement in this wonderful place. Cutting into our neighborhood is not acceptable.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3749	Stephanie Ketcham	5/15/2018	Electronic	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion nearing 75. The lack of appropriate signal light timing during peak traffic hours.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Any cross street heading south. I usually am headed south, then make my way west to 75 or east to the tollway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Proper signal light timing. Adding another lane. Building the 380 freeway as far north as possible. Growth will continue north...build it where it will be most needed in the long term future. Don't "compete" with the use of nearby 121.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3749	Stephanie Ketcham	5/10/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes. It will be necessary with the growth further north.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3750	Stephanie L Davis	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: In Creekview Community, I personally seen people trying to turn into 7-11 on the exit (Not the Entrance) side of the road. I have also seen people cutting straight across from Walmart to enter into Creekview for 7-11 and Starbucks. This is just too congested for the entire Creekview Community!	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There are no alternative routes!	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Move the exit from Walmart from directly across from the Creekview Community to further down the Walmart Parking lot!	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, Too congested as it is and the freeway will make it much worse for Creekview residents!!!!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3751	Stephanie Lewey	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.

				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3752	Stephanie N Johnson	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment and suggestion for flashing light noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, the intersection of 380 and Tremont is currently unsafe. This could be improved by the installation of a flashing yellow light ahead of the existing light that would warn oncoming traffic of the need to slow down and stop.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I do not experience congestion when using 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Note: Having had time for further in-depth review of all options, I am hereby amending my previous survey vote. My position, consistent with Tucker Hill's position, is NO to all alignments due to the potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. While I support neither the expansion of 380 nor the addition of a bypass, I do recommend improving 380 by means such as grade-separated intersections, adaptive traffic signal control systems, increased and enhanced turn bays, improved on-site traffic circulation, and an upgraded US-75 interchange that could include roundabouts. Safety would also be improved at 380 and Tremont by installing a warning flashing yellow light ahead of the stoplight to alert travelers to the need to come to an upcoming stop (rather than speeding up through the intersection). Notwithstanding my recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and landscaped sound barriers. Adverse impacts on existing homes and home values are not acceptable. Ingress/egress off of Stonebridge would be required first. Also, notwithstanding my recommendation, if any bypass occurs, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; and neither on nor bordering Tucker Hill.	Comment and suggestions noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety.
				Q: Do you support the building of a freeway regardless of alignment? A: No. NONE of the existing proposed alignments is acceptable. The only freeway option that would work is a bypass in the immediate vicinity of Custer Road.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
3753	Stephanie Riddell	5/3/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Safety in the sections that do not have divided medians and still have a center turn lane, lack of deceleration turn lanes, 18 wheelers that frequently run red lights, and the mess that is the 75/380 exchange.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Wilmeth to county roads or Virginia Parkway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would like to see the current footprint of 380 converted to a limited access roadway. The quickest route between two places is a straight line.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: NO, I do not support a freeway that would include a bypass in NW McKinney. I would rather see 380 become our version of NW Highway and have the Outer Loop expedited than see a bypass that was planned at least a decade to late to be effective.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response

3760	Stephen	5/16/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Yes. Needs a bypass to get past the lights. The lights are what create and slow traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: El Dorado, or Northern FM roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Creating a bypass from the loop in Denton East to 75, that would allow commuters to miss the stop lights.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No, green spaces and other public areas will need to be taken into consideration.	Any future improvement projects would include assessment of the potential impact on the human and natural environments. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

		5/3/2018	Comment Form	The alignments for blue, red, green and pink all unfairly encroach on Tucker Hill neighborhood in McKinney between Stonebridge & Ridge. The alignment should push further west to not distrupt as many homeowners and also to not impede on the greenspaces and add/dump congestion into a prime residential development.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		5/10/2018	Letter	Dear Mr. Endres; I wanted to take a moment to provide a formal written and mailed correspondence in response to the request for public comments related to the proposed expansion of US-380 through McKinney. I attended the public meeting last week, and I completed the online survey, but I wanted to be sure my comments were made on record and not just part of an online poll. I believe, as do most of my neighbors, that a conversion of US-380 into a limited access freeway is unfeasible for the community, our homes, our neighborhood amenities and our neighboring businesses and other communities like Stonebridge Ranch (directly across 380). Such an expansion to of 380 would limit our access to our own community, limiting our ingress/egress to and from our neighborhood, reducing times for first responders and access to nearby hospitals and support services. I/we also believe that the blue/red/yellow proposed routes bypassing 380 to the North and dumping into 380 on the near East or West side of our neighborhood would be catastrophic to our home values, quality of life (noise and air pollution) and not aid in traffic plight. Our community and city provided feedback in late 2016 showing that the 380 connection should not occur closer to Custer road, even if on the McKinney side, and not the shared side with Prosper. This reroute would negatively impact significantly fewer homes and businesses. The city, county and TxDOT should focus on continuing to improve arterial traffic on N/S and E/W arteries, and expand the Collin County loop just a few miles north of 380. By providing the community and businesses with simple, non-highway methods for navigating town to get to 75, 121, 380 or the tollway and not opening up another freeway and inviting more through traffic. We can also improve the bypass and county loops, connecting to 377 and the tollway to 75 to reduce the impact of intra-county commercial traffic along 380 (construction vehicles, gravel/dirt haulers, cement trucks, etc. that currently plague 380). Our community has spoken, but we want to be sure we are being heard. Thank you for taking the timeto review my comments. If you would like to discuss any of these options with me, please do not hesitate to contact me directly. Sincerely, Stephen "Steve" Remington [redacted]	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
3769	Steve Bouldin	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, much of the congestion could be relieved on a short term basis by calibrating the traffic signals. it takes so long to get from Lake Forest to I-75 because traffic has to stop at every light in between	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: I believe TX Dot should step up the completion date of the Collin County Outer Loop and force traffic that is going to Greenville on the Loop and maintain a traffic flow on 380 at a slower speed limit. Also, revamp 380 to be a freeway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes as long as it does not displace any homeowners of their houses or property. The red, blue and yellow plans seem to do that. Again, the solution is dual - revamp 380 as much as possible and step up on the completion of the Collin County Outer Loop forcing much of the through traffic around McKinney.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

3777	Steve Jarosz	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too crazy, too crowded	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer south bound to an alternate East-west road to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bypass north	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3778	Steve Kerby	4/29/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes - too much traffic. Businesses built too close to road...too many direct entrances into businesses from the hwy.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia and White	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build the outer loop. Improve 380. Build out all N/S/E/W streets to their full 6 lane CITY street plan. (Lake Forest, Stonebridge, Custer, Hardin, Wilmeth, Bloomdale.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: NO. especially dislike any thought of a 380 freeway "bypass" that cuts close to existing homes/subdivisions.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.

3782	Steve Palomino	5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: None between Custer and Community that I drive everyday. I think the overpass at Preston is ridiculously complicated and expensive. The traffic going west toward Denton is crazy.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make a bypass north, from DNT to 75. Land should have been purchased for this long ago, but now it's going to have to be a bit further north than what's best. Something going from 380 and DNT diagonally up to 75, through Irwin Park would work, but I think you were to slow in buying land.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No. It should go through part of Prosper.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I have concerns about the safety of 380. Speed limits are not enforced, and traffic signals are routinely ignored.	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
				Q: If US 380 is congested, what alternative routes do you take? A: 380 is the only route in and out of my neighborhood.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Improve the safety of 380 by more turn lanes, an overpass or flyover at 380 and 75. Decrease the speed limit and enforce it, red light cameras.	Any future improvements will be designed to enhance safety. Suggestion for turn lanes, overpass, speed limit, and red light cameras noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3788	Steven Hitt	4/30/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Any concerns would be eliminated if east and west roads like Bloomdale, Laud Howell, Wilmeth were completed from Preston or Custer to the east past US75 and roads like Custer, Stonebridge, Ridge and Lake Forest were extended north to 1461 (Laud Howell). These 4 lane roads would relieve traffic on 380 tremendously and are already in the city's 20/40 plan. Much like is being done from Preston to Custer, 380 could also widened and raised at points and prevent unnecessary destruction of residential property values. It appears to me that not enough out of the box thinking is being used as the TXDOT options simply appear to mimic the city's unimaginative thinking. There are much better, lower cost, less destructive options out there and already in the 20/40 plan.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: CR123, FM1461, Bloomdale from Lake Forest to Wilmeth to 75.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: See my comments above. The city council of McKinney and its planning department have sat on their butts for too many years while driving growth and have not been constructing/extending many roads that would greatly relieve 380 traffic. The residential property should not be punished for their failures.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely Not!!!! Alignment is everything and other viable options exist. 90% of 380 traffic is not pass through traffic so this bypass will not solve the issue. Only real solution is widening and raising 380 with two lane service roads when needed.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic. I live 0.25 miles south of the existing Hwy 380, so taking another east west roadway is out of the way for me. Another east west highway would ease congestion on the existing HWY and make it more accessible for all of the people that live directly off the road.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build another east west freeway, north of the existing HWY 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3801	Sudarshan Nagaraj	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Extremely dangerous to drive on this road	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Ridge road	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Upgrade existing alignment to freeway, elevated expressway or other innovative approach to retain the alignment in McKinney section	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I only support freeway in the current alignment or an alignment that doesn't go right next to the existing neighborhood which will destroy the quality life for families	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3802	Sue Cauley	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed limit too fast in congested areas	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3826	Susan Warmack	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It is my least favorite route due to congestion, traffic entering from side streets, too low speed limits which are ignored, and high volume of wrecks	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: ANY nearby Parkway is better than 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Allow entry at fewer intersections. Remove stoplights at most junctions and/or set timing for better flow. Change speed limit to a more reasonable and consistent point.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I don't support any change which is "regardless". Changes must be made; but should be made with MUCH regard for the impact on nearby citizens, neighborhoods, and traffic flow. Please be diligent as you decide for us what our quality of life will be.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

3837	Swamynathan Ganesh	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. It is very congested during peak hour morning traffic. So I take the parallel Virginia Pkwy even though it has construction on going.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia pkwy.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would like to see 380 expanded as freeway in its current alignment or at least have underpass/over bridge at select junctions.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No - I would like it to expanded as freeway only in its current alignment. Like how 380 is expanded between Prosper/Frisco. I do not support the freeway destroying the Erwin park. The beauty of McKinney is in its greenery and we don't want it to go away.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much building going on contributing to problems	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Limit the businesses built to support traffic and keep Mckinney “unique by Nature”. We don’t have to have every store and multiples of them including restaurants. Each part of the city can have its own smaller shopping areas. McKinney doesn’t have to look like Plano, Frisco etc with just Store after store. Bigger lots for homes and trees and room to breathe creates community of balance and safety.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.

3848	T Potter	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, concerned citizen/taxpayer	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 1) Safety - to much speed vs access points and visibility. Not to mention the trucks that barrel through. Regardless of the future plans, speed limits should be reduced to 45'ish asap. 2) It is a barrier to north-south movement. 3) Excessive number of access/exit points. Flow is disrupted and dangerous due to vehicles entering exiting from an almost infinite number of places.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: I usually work through it... go arounds usually take longer and add to the problem when re-entering. Always use Airport road to work around McKinney to/from the south but it gets jammed up at highway 5 - would use the new go around but not open yet. Sometimes the county and FM roads to the north of the highway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Controlled access highway - main lanes and frontage roads (should have been that the last times that it was widened - pushed the problems down the road to today). Logic holds that the highway needs to stay in its current alignment:: 1) Any alternate would include some shared segments and would have to include interchanges onto and off of the common sections - so there is no getting around expansion of the existing corridor anyway. 2) There will be property and development impacts with any plan - adding mileage of impacts via bypasses must by definition increase the impact. Those that are along the current corridor have by their presence chosen to be there. 3) Flow is the need - traffic in relatively higher volumes needs to move through without disruption. Any intersections or interchanges between bypasses and the main corridor will disrupt that flow. All of the work around routes will only make things worse because each will require an intersection/exchange with inherent disruptions and safety issues. 4) Connect something from the south (like the new airport road) with the new hope road corridor. Or using the bridgefarmer road corridor from as far south as plano. 5) "Bypass" equals a go around - not a close quarters, intermingles alternate route. To be a "bypass" the one continuous route would need to be much more to the north (future looking instead of current, where 121 crosses 75 maybe) One real bypass, further north, connecting ne place west of McKinney and one place east of Princeton. (eventually north south connections would be made between the two as development expands, some are already shown on current Collin county road development maps).	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely Not! I would not support a conglomeration of bottlenecks exacerbated by interchanges and transitions... I will only support expansion in the existing alignment with at max one bypass that is far enough north to actually accomplish something with max of one interchange west of McKinney and one east of Princeton. (essentially a thru traffic go around)	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

3863	Tamira Shallenberger	NA	Comment Form	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
3864	Tamlynn Clyde	4/26/2018	Comment Form	Please keep 380 on 380. I suggest prioritizing the Outer loop to take congestion off 380, then develop 380 as needed, building to freeway size when necessary, but keep it on the current footprint as much as possible.	Comment noted.
			Paper Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes - businesses are being built too close to it.	Comment noted.

3866	Tammy Biggio	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: While 380 is often busy, it never creates undue delay unless there is a wreck. However, I appreciate the growth around the area will put a strain on 380 traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I generally stay on the congested 380. However, I often take the Wilmeth exit during high traffic times and cut over to Hardin then back to 380. This avoids the worst part of 380 which is at 75. If Wilmeth was more than a winding 2 lane road I would probably take it all the way to Custer.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would suggest that the outer loop be completed and McKinney consider limiting development north of 380 to 1 acre plus lots in more areas like fairview.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I would support the freeway at the current 380 or possibly the red alignment as it seems to be further away from existing developments. Not blue or yellow!!	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

3869	Tani Pratt	5/2/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: 1461 (Frontier)	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Move the bypass to the Outer Loop. Trying to use Bloomd is not a wise decision. There are several homes and neighborhoods that would be effected. Another is there is an elementary school in one neighborhood and these children walk and ride their bikes home. Also with buses coming in to pick up kids to take them to middle and high school. Then you have your high school drivers that use that rode to the high school. This bypass or freeway alignment endangers the well being of our neighborhood and more importantly the safety of our children that will be living near it.	Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: No as stated in the above question.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Comment Form	Most of options on layouts feed back into the existing 380 either at Stonebridge or between Stonebridge and Ridge Road. With the heavy existing traffic (including many trucks & semis) it seems to be even more dangerous optoin than current roadway. It would seem to me to run new bypass continuing north of present 380, to west of Custer Road before rejoining existing 380 roadway. More un-developed land affected this way, and diverts heavy traffic past (west) of Custer Road.	Comment noted.

3884	Teresa Dempsey	NA	Paper Survey	Q: What solutions would you suggest in the US 380 Corridor? A: The road needs to go north of the current 380. It needs to go north of the Collin County Courthouse. Going south of the courthouse is too close to Scott Johnson Middle School. Get DART to come to McKinney. Give us another route for rock haulers & 18 wheelers.	Comment noted. Alignment options are still being evaluated. The region is evaluating northern extensions of existing and future rail corridors, but transit trips only serve a portion of trips that drivers are making.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
		NA	Comment Form	I do not want 380 as it is now increased in size from Custer through McKinney. The road needs to be north of the current 380. It needs to go north of the Collin County Courthouse. Going south of the courthouse is too close to Scott Johnson Middle School. I drive SW 380 everyday the traffic is too much & I see wrecks at 380 & Lake Forest all the time. We live on 380 - homes and businesses are located there. This is the heart of McKinney. Move this traffic North. Give us another route for the rock haulers & 18 wheelers. Get DART to come to McKinney!	Comment and suggestion to divert truck traffic noted. The region is evaluating northern extensions of existing and future rail corridors, but transit trips only serve a portion of trips that drivers are making.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: I do not think any of the options proposed are feasible nor the best options. All of them would terribly disrupt the foundation of this town and it will only be a temporary fix in the end. I think the new highway should be a completely loop around Princeton instead of straight through or zigzagging in and out as proposed. It should be a loop that goes either further north or south where it is more country that would disrupt less people's businesses as well as homes. There are far better options than the one proposed!	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: I do not support any of the options proposed.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.

				Q: What solutions would you suggest in the US 380 Corridor? A: elevated bypass over existing highway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: very crowded at times and hard to get out of shopping centers	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I take White rd from Hardin to 75	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3897	Terri Silver	5/7/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: raise 380 like they are doing at Preston at Custer, lake Forest and 75 to ease congestion and add access roads to local businesses	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no, there needs to be better options	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
		5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Just time the lights better to control traffic	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: We live right off bloomdale so we take it to Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I honestly don't understand the logic of building a bypass to alleviate the "thru" traffic from 380, but then dumping it all back out long before the overpass that was just built at Preston. Common sense tells you that it will only back up again unless it connects to another highway (I.e. what the outer loop is supposed to do)	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No no no no no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
		4/26/2018	Comment Form	To create a 70 mile an hour bypass after building brand new homes is unethical - McKinney unique by nature is a falsehood 380 should be exapanded & not a bypass so close to houses & schools!!! McKinney never should have given building permits when the knew where the road would be built.	Comment noted. Alignment options and roadway configurations are still being evaluated.
3898	Terrie Smead	5/6/2018	Electronic	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many lights	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Super road with cross streets tunneled under	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
[illegible]	[illegible]	[illegible]	Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3899	Terry Bachran	5/15/2018	Paper Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Back roads thru Melisa to 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3900	Terry Butler	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: back roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: widen existing, overpasses at major intersections	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: no regardless of alignment	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3901	Terry Copeland	5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: A couple times a year	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No, it is working as designed	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There are many alternate routes that can be taken	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3902	Terry Hockenbrough	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Needs better traffic control on the lights to avoid accidents.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Take the bypass out and away from the residential and business already there. The years of building would create a nightmare!!, accidents, and lost business. Also the students going to college would be adversely affected.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Only if it is out and away from existing homes and businesses.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, I Do Not Support Building a Freeway	Comment noted.
3903	Terry Nicholas	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The traffic lights are a hassle when you hit all of them.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: SH 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Not necessarily. My primary concern would be saving Erwin Park.	TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
3904	Terry peacock	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Many. Too many trucks that don't drive on the right side allowing cars to move. Dangerous intersection at Braswell high school. Many stoplights that are not alway coordinated.	Any future improvements will be designed to enhance safety. Suggestion for synchronized traffic lights has been noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Fish trap if possible also will cut through the Hollyhock community and go to 423 then panther creek to the tollway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I think we need four lanes to accommodate future growth. Overhead lanes at the high school	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely. A freeway is desperately needed.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A:	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
3905	Terry Reishus	5/11/2018	Paper Survey	Q: How often do you drive on the existing US 380? A:	No answer provided.
				Q: Do you have any concerns with the existing US 380? A: Crowded & Dangerous What are you doing to align with Denton County	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There is none east west	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Take it farther north for freeway Land Howell? You need another major route east west between Denton and McKinney	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
		5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	No answer provided.
				Q: How often do you drive on the existing US 380? A: Daily	No answer provided.
				Q: Do you have any concerns with the existing US 380? A: Crowded and dangerous	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Freeway but not below Laud howell	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: You need to put farther north than proposals. By the time, maybe 10 years, that will all be developed. You need to have at least 2 east west traffic movers thru Collin and Denton counties. They should be coordinated for long term growth and not just a Collin county band aid.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Use existing 380 for freeway. Moving a bi-pass just a little north on Bloomdale makes absolutely no sense to me as it is only a band aid and it will not alleviate traffic by the time the bi-pass is built.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3906	Terry Sanon	4/26/2018	Comment Form	Make all of the turn lanes longer. They back up then take up one lane of traffic at 380/1827 and 380/Airport.	Comment and suggestion for longer tunrn lanes noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3907	Terry Stewart	5/16/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Very congested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forrest and Hardin	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen 380 and make it another loop.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I do not want Erwin Park affected. It is a fabulous resource.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
3908	Terry Worthy	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None. The congestion is only bad during rush hour just like it is on 121, NDT, 75 and all other roads.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No/maybe	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red, None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: With increasing business and new residents the current 380 will not be able to provide appropriate transportation in the next coming years	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest, Custer road, DNT Depends on where I'm going.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3909	Theresa Geisler	5/1/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: I believe widening the exsisting 380 will allow adequate flow of traffic and continue to allow the new businesses to have a steady flow of customers	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I live off the main road all of these studies are looking at developing (Bloomdale,123) I moved out here because mckinney slogan is unique by nature and I wanted the serene beauty it has to offer up north. Please think about the ability to widen 380....the quickest way from point A to B is a straight line!	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3910	Theresa M Dunn	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Denny's in McKinney	Comment noted.
				Q: How often do you drive on the existing US 380? A: A couple times a year	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Consider trains/lightrails	Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project.
				Q: Do you support the building of a freeway regardless of alignment? A: I might depending on how it impacts my property and Denny's business	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3911	Theresa Mendenhall	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Better since lights were added. This slows people down.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia parkway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: carpool lanes, longer turn lanes, widen with sound barriers.	Comment noted. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared.Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Do you support the building of a freeway regardless of alignment? A: Not sure on this. Seems like the most congestion is between Custer and 75. Past the tollway is less congested.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3912	Theresa Mills	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It's a death trap	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: There aren't any alternatives in the area	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Stop building houses. The infrastructure isn't there to support additional residents.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.

3913	Thomas & Patricia Laney	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia to 75. Custer to 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: As I am on 380 2 - 3 times every day the traffic pattern that I have noticed Custer 380 to the east McKinney city limits is . Heavy traffic is a issue from 6 am - 11am & 4pm to 7pm. Moderate traffic 11am - 3pm & 7pm - 11:30 Light to virtual non existent much of the remaining hours.. The existing road setup will within 5 years become virtual stop and go traffic	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia, White	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen existing road by 2 lanes each way without rerouting & add flyovers for existing intersections	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No - your projected realignment may help 380 initially but my feeling is that within a few years you will be revisiting the 380 main road expanded usage issue. Fixing by rerouting seems to be throwing good money away that could be be better invested.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3917	thomas P patterson	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: it's congested now plus there is no straight quick direct path to Rockwall/Rowlett area or Hwy 30.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 tollway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Improve the flow of 380 by completing current construction that's underway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support it being a freeway only in it's current alignment	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

3918	Thomas W. Potter	N/A	Comment Form	1) BLUE/RED/YELLOW don't make sense to me. The remaining merge areas would make congestion worse. Besides - more lenght of road. IF you have to do a lot of the green/pink anyway then you may as well stay in existing corridor. Blue/red/yellow are not far enough out (where will growth be at time of construction? - still behind the curve?) - NEEDS to be ONE continuous go around from Prosper to farmersville and further north. (border of McKinney/Mellissa) Speed limit reduction on current road (before rebuild) would increase safety - to many on/offs for 60+ mph traffic. Controlled access highway in existing corridor AND one go around - further north. NO TOLLS or HOV!	Comment and alignment suggestion noted. Tolling is not being considered as an option for funding.
3919	Thomas Reyes	5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident, Avid Mountain Biker at Erwin Park	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic congestion in some locations	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Hwy 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Adding an additional lane or two?	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: NO. If a freeway is not aligned with the current location, I am against it.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3920	Thomas Russell	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 75s	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: No clue	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3921	Thomas Titus	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The existing 380 is over crowded and not policed adequately to deter fast, dangerous driving.	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: There should be a North loop that connects 75 and Preston Road &/or the North Dallas Parkway. This would leave the existing 380 from 75 to Preston Road alone and what is there would be adequate.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: As long as that freeway doesn't bother 380 from 75 to Preston Road.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3922	Thomas Wiesle	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The amount of red lights slows traffic tremendously.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: CR123	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses at the red light intersections	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

3930	Tiffany Cartwright	4/26/2018	Comment Form	A bypass route is clearly needed. There is already too much development along US380 to simply expand it in place. It's hard to imagine that it could be any less developed in 10-20 years when construction might actually begin. The "red" plan seemed to impact the most homes of all the bypass options. The other bypass options seem more popular, and they might help out more with future known development plans in McKinney. I would also like to see other east-west roads developed as alternatives to 380. Wilmeth would be great for us if it were connected east-west - we'd almost never drive on 380 if that option existed. Thank you for your time. We appreciate it.	Comment noted.
3931	Tiffany cassidy	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Turning left on 547 from WB 380 is so dangerous. There needs to be a designated turn land, not the center lane	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.

3936	Tiffany Jourdonais	5/1/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: My only concern is the distracted drivers. They are the reason for the number of accidents. I believe the speed and the road itself are fine. It does get quite congested around 7:30 am and 5 pm... I generally just try to avoid it at those times	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: It depends on where I am going.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I think the road itself is fine the way it is. Although I think a traffic light at the high school (student parking lot) would be a great addition.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: It would depend on the design plans. I'm not sure a freeway is necessary and may cause more issues	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3937	Tiffany Laine	5/6/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: None really. Less Ted lights would make it move faster, but I don't really have a problem with 380 traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: If it's congested I take the north/south running roads to a quicker path.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Creating a highway on 380. NOT as a bypass north or 380	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
3938	Tiffany moore	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Extremely congested going through mckinney and Princeton. Also dangerous!	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I take white to Tennessee to bypass the 380/75 intersection.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: Do you have any concerns with the existing US 380? A: To much traffic and way to many wrecks	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Fm 546 or new hope road	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3939	Tiffany Turpen	5/15/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Needs to be wider and maybe even speed limit lowered. Which may not matter on lowering speed limit people are always going way over. So maybe more police.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3940	Tim Biggio	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: While 380 is often busy, it never creates undue delay unless there is a wreck. However, I appreciate the growth around the area will put a strain on 380 traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I generally stay on the congested 380. In my experience that is just as fast as going north or south to a parallel path. However, if Wilmeth or Bloomdale or other nearby east-west roads were 4 lanes I would likely take them instead of 380 during high traffic times. Wilmeth in particular is now a winding 2 lane road so not much benefit from staying on 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I realize that this is a difficult issue and no matter which route is selected, someones home or business is impacted. I believe that most residents expect existing roads to increase in size over time rather than have areas taken over and changed to a freeway. For these reasons I believe that existing 380 should be expanded. Some additional points to consider (go below grade, express lanes, save businesses, smarter City planning): --At "pinch points" like in front of Tucker Hills, 380 could be lowered down below ground level (like 75 near Mockingbird/or the new 635). This is likely more expensive but balances traffic needs with residential esthetics and noise reduction. It also uses existing right of way. I am not a Tucker Hills resident but since 3 of the 5 routes go in front of their entrance, this should be considered. --Having even 4 lanes below grade with minimal exists as express lanes would allow through traffic to speed along from Custer to 75. This is similar to how Austin, TX takes traffic up and over, but using the more visually appealing underground construction for express lanes. Consider a partnership with The Boring Company (Musk) to reduce cost. --I believe that bypassing 380 will also mean a significant reduction in the customer traffic for all of the businesses along existing 380. When the 121 business was bypassed by the expansion of 121 freeway, all that is left are empty buildings and low end car dealerships. All the former businesses customers now drive around. This impact associated with the yellow, blue and red routes should be considered. --McKinney could stop granting building permits right up along 380. By continuing to allow building so close to existing 380, the City is increasing the likelihood of a bypass ultimately moving business customers away. It seems short term property tax receipts are more important than sound long term City planning. --McKinney should change its minimum residential lot size north of 380 to at least 1 acre. This is similar to Fairview, TX and would dramatically reduce the expected growth in cars being added to roads and infrastructure.	Comment and suggestions noted. Alignment options and roadway configurations are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: I only support the building of a freeway to improve traffic on 380 AFTER (a) some of the other east-west roads have been upgraded to 4 lanes (taking a lot of people living north of 380 to the DNT and 75 without 380), (b) McKinney changes its residential minimum lot sizes in the feasibility area to be at least 1 acre lots (like Fairview) thereby significantly reducing growth in number of cars, and (c) new traffic studies are done to show the improvement that making these other two changes have made.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.

3941	Tim Anders	4/26/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: needs improvement to allow for better traffic flow	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia, white	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Limited access highway, no bypass	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: only down the existing footprint	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3942	Tim Best	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Use Erwin Park for recreation	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Smaller roads like Coit to approach 380. I also use 121/SRT.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Better timed stop lights. It seems that the lights favor the intersecting roads during rush hour.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes we need center barriers to reduce the suicide lanes thus reducing chances for collisions.	TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.

3943	Tim Cotton	5/1/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Bridgefarmer Road, 2nd Street out of Princeton or Hwy 78	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Overpass or some type of freeway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Support freeway but not regardless of the alignment. There should be some considerations for landowners and businesses where possible	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3944	Tim Hawkins	4/26/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: There are too many stoplights on a major highway. You could save yourself the need for a bypass by incorporating more overpasses like the one being built at 380/Preston (I believe).	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia or a way around	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: You could save yourself the need for a bypass by incorporating more overpasses like the one being built at 380/Preston (I believe).	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: No - several of the proposed freeways run right on top of a very desirable McKinney neighborhood.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3945	Tim Karamas	5/4/2018	Electronic	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: A couple times a year	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make a no growth or slow growth amendment and preserve the quality of life for residents who have been here for years	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3946	Tim Kihm	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congested at rush hour and on weekends at stoplights between 75 and DNT.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Rock Hill east from DNT, to Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build stoplight overpasses at existing stoplights for through traffic, similar to what exists in Frisco/Plano on Preston and at the 121intersection.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, a full fledged freeway on 380 is not needed. Just overpasses for through traffic to avoid stoplights.	Comment noted. Alignment options are still being evaluated. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3947	Tim Payne	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion and safety	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Occasionally, I will take the variety County roads that dog legs around the Wilmeth Rd route from Lake Forest to 75. Often times, I drive from to Virginia, El Dorado, or 121 down Lake Forest. To go into Propser I take Bloomdale or 1461 instead of 380. I would take Wilmeth to Prosper or 75 if the road was completed all the way.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Extend 121 to 380 just west of Princeton. This helps move traffic from the east away from McKinney, Prosper, and Frisco. It will also eeds to stay on the current route. It will affect more people and businesses than the bypasses will, but there was always an expectation that it will be expanded. A freeway needs 400 feet of ROW. 380 already has 180 feet of ROW. Building a bypass will take an additional 180 feet of land from property owners for the ROW for 10 or 12 miles than if the current route was expanded. That is less tax revenue. There will be a lot of retail and commercial businesses that will be lost from the tax roles but that will move to other areas and create new construction and have higher appraisals than before and ultimately increase tax revenue. Complete the Ridge Rd., and the Wilmeth, Bloomdale, and Laud Howell routes from Preston to 75.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.

				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
		NA	Comment Form	Red light is needed for US380 and CypressBend. With all the homes that were added in this development, entering and exiting this development has become very dangerous. Community safety should be of the highest priority. The accident rate at this location is too high. This red light should have been considered and installed a long time ago. Even at 6:00 a.m. when it's dark, there are quite a few cars and with the fact that it's dark and you're trying to pull out into the center lane, it's terribly hard to see where you are. A light would alleviate that worry and tension. It's very hard to get out going left out of Cypress Bend or left into Cypress Bend coming from the east.	Comment and suggestion for a traffic signal at US 380 and Cypress Bend noted.
3953	Timothy Glassett	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Numerous safety concerns...not enough turnings lanes into perpendicular roads or community and business entrances. Speed limit is also to high and bad visibility of traffic lights.	Any future improvements will be designed to enhance safety. Speed limit and light visibility noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I avoid 380 whenever possible...I'd rather take slower back roads.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More turning lanes...lower speed limit. Or an alternate route all together	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3954	TIMOTHY LEETH	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3955	Timothy Skauge	NA	Comment Form	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
3956	Timothy Smolen	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.

3963	Todd Brown	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, too much traffic. Particularly large commercial vehicles. Slow traffic and far too many accidents.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: yes, Virginia Parkway, White or Eldorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: A McKinney or N. Collin County by-pass	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Way too congested at 75. Should be more of a city parkway than a highway for truck traffic or loop traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3964	Todd Christie	5/15/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Build a loop north of Mckinney	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3965	Todd Dudley	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Many of the lights keep vehicles who need to turn stopped for extended periods with no oncoming traffic. If a flashing yellow turn signal can't be implemented, then a more rapidly reacting sensor should be put in place. I've sat at some red turn signals for close to 2 minutes without a vehicle coming the other direction.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Stonebridge, Custer, Lake Forest, Hardin, then Preston and DNT	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Better timing on lights. Close to Hwy 75 there are too many lights combined with too many entry/exit points. That's the only part that really gets backed up, but can back up almost to Lake Forest.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Many structures along 380, and some neighborhoods, are either currently undergoing construction or very recently completed construction. There's no reason to have that construction take place only to risk tearing it down because of poor communication/planning. Making 380 a freeway will turn several "safe" neighborhoods into a risk, which not only impacts quality of life but also seriously impacts the financial future of the residents whose neighborhoods would be impacted.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3966	Todd Eades	5/8/2018	Electronic	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: unsafe and too much traffic	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway or Eldorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: A bypass north of McKinney	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3966	Todd Eades	5/8/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: YES	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue	Comment noted.
3967	Todd Finney	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No. Sycronize the lights better and you could address volume and flow	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Not bad enough to go to that extent	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: address north of 380 where there are less residents impacted	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3968	Todd Huffman	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not opposed to the by-pass with any of the current proposed alignments. •Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is congested, what alternative routes do you take? A: Heading east: 1st Street from Custer to Tollway or Virginia from Custer to Preston to Tollway. Heading west: Custer to Virginia to 75 or Prosper Trail to Weylmouth to 75	Comment noted. Alignment options are still being evaluated.
				Q: What solutions would you suggest in the US 380 Corridor? A: Request consideration of the impact of the proposed by pass on First Street, Prosper Trail and Frontier Parkway in Prosper due to possible "cut through" traffic to connect with proposed by pass versus expanding the current alignment of 380	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: We want a freeway, just don't want it to go through our neighborhood.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3969	Todd Huthmaker	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3970	Todd Keil	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, overcrowded, way too many access points and intersections, which create traffic problems, hazards and recurring accidents.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Rebuild existing 380 route, with some variations as necessary, into a Freeway structure with limited access points.Ye	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, 100% !!	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3971	Todd Kyser	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No good ways to cross 380 biking or walking.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: It has only been really bad while there is construction going on, and lots of slow moving construction vehicles and trucks make it much worse. Otherwise it is similar to 75 in/out of dallas - busy during the peak hour. so I rarely take another route.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Outer loop similar to what Denton has done. Get the slow moving trucks out of the way, maybe even lane restrictions.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I also don't understand why this isn't an issue out near prosper, etc. I support something nearer the collin county outer loop. That is the growth area, this project is supposed to be for the future and by the time it is completed where much of the project will need to be.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3972	Todd Little	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident, Recreational user of Erwin Park	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.

3973	todd rolen	5/15/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: not a big fan of speed through town. like to see it stay on course it is just be wider as if it moves to south i am afraid our downtown will fade as businesses will run to hwy.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: i like the county roads as everyone is always in a hurry to go nowhere....	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: bridges and overpasses are costly but keep the traffic moving and that would help as red lights are awful on hwys. i really dont want to see a road just open up to the hwy would rather see on ramp to keep people from trying to cross the traffic...	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: it is a need not a want	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
3974	Todd Schoel	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, traffic congestion and construction	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: No options in my situation. I commute to Greenville TX and back 5 days a week.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: First of all there must be a moratorium or strict limitations on all city of McKinney building permits. City of McKinney continues compound this situation. Designated tractor trailer lanes. Intelligent traffic management systems. Eventually widen and modernize US 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congested	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3975	Todd Strouse	5/2/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Airport Blvd	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: McKinney Bypass	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.

3977	Tom and Jane Lovell	NA	Paper Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, too conjested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I just go 380 & fight the conjestion	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: We would prefer you follow the existing route. If you go south, our town center will die. If you go the first south route it would go through the middle of our property and next to our house. This land has been in the Lovell family 5 generations (over 100 years) with our grandchildren. We would prefer you take off land closest to Hwy 380 or the south end. NOT through the middle of our most valuable land. We have already sold some of our property to Collin College. Thanks.	Comment noted. Alignment options are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.

				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3981	Tom Laney	4/26/2018	Comment Form	An immediate concern is the intersection of 380 and Tremont Blvd., the entrance/exit to the Tucker Hill development. There have been about an accident a month at that intersection due to excessive speed and aggressive driving on 380. There is a signal light near the top of the hill at the intersection but due to lighting (atmospheric) and some terrain obstruction (the hill), it is not highly visible. Also, the other road (Grasemere) is right turn only on to 380 and not the significant road as noted on the table maps at the meeting. Tremont Blvd. is the main road.	Comment noted.
3982	Tom Patrick	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. It cannot effectively handle today's and the immediate future's traffic which is inundated with trucks and traffic lights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Residential roads both east and west. Going East to Highway 5 and West to the DNT.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: A direct freeway similar to SRT i.e 121. I understand the disruption while construction is in progress but a direct line for traffic once completed will be the best approach.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, freeway traffic is the best alternative.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: 1) Blue/Red/Yellow don't make sense to me. The remaining green/pink would still have to be expanded & the added merge areas would make congestion worse. Besides more length of road almost certainly mean more impact to people and nature. If you have to do a lot of the green/pink anyway then you may as well stay in the existing corridor. Blue/red/yellow are not far enough out (where will growth be at time of construction? - still behind the curve!) - NEEDS to be ONE continuous go around from Prosper to Farmersville and further north (border w/ McKinney/Mellisse) Speed limit reduction on current road (before rebuild) would increase safety - to many on/offs for 60+ mph traffic. Controlled access highway in existing corridor and one go around - further north. NO TOLLS OR HOV!	Comment noted. Alignment options are still being evaluated. Tolling is not being considered for this project.

3986	Tom Timmermann	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed limit is high and isn't enforced.	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
				Q: If US 380 is congested, what alternative routes do you take? A: It's never congested for me but if it was I would use Virginia.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Try to identify a route that moves more to the north so as not to affect current subdivisions and businesses. It looks like the Custer and 380 interchange would be a logical area to consider taking a northly route especially since Custer needs improvement north of 380 anyway.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3987	Tom Wenzel	5/15/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I know that it is extremely busy and with more business coming in like Costco it will become even more dangerous for the consumers to get where they want to go. There are times that I go south into Allen or Plano to do shopping than go north into McKinney and giving tax money to them.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Back streets into residential areas	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Go north well before Baylor Hospital and come back in east of McKinney somewhere, I am not familiar with the east area on McKinney.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
3988	Tommi Wilson	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident, bike rider	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: yes	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: build limited access road	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No, it will be more congested with the business growth, but leave earlier or take alternate route.	Comment noted.

3989	Tommy	5/3/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Lake forest Ridge Harden	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Double decker over the existing 380	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
3990	Tommy Apligian	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Business Owner, Property Owner, Realtor	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic lights. It needs to be a non stop highway. Accidents are bad on this road as well, going from 65/70+mph to a dead stop at lights. People run them all the time, creating a major risk.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Any of the north/south feeder streets.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make it a non stop continuous highway. If that means you have to build up like 35 in Austin then do that. Or grab more real estate so you can have a true feeder access road then do that.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I don't know honestly. I don't speak in absolutes without proper knowledge.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
3991	Tommy Lorell	5/8/2018	Electronic	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 380 should stay on 380 going through Farmersville and no diverted around the city which will have a negative impact on the downtown area.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
3991	Tommy Lorell	5/5/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

3993	Tommy Vawter	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion and all the stops. It has an enormous number or stop lights for what is suppose to be a freeway.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There isn't another choice initially. I may turn off on 720 going west or 423/DNT if I am going into Frisco or other southern destinations.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I know they take time and a lot of construction but overpasses at the current intersections would help.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
3996	Tonia Tindell	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Need traffic light at the entrance/exit of our neighborhood as well as an alternative way out of the neighborhood. Only one in/out and it's extremely dangerous.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 982 to 546	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Traffic lights in city limits of Princeton, medians, increased police presence.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.

4000	Tony Gray	5/10/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: It will get worse before it gets better.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Not many options from Farmersville to McKinney	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Loop around.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4001	Tony Keefer	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, This survey supercedes what was previously submitted.	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Accidents	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4002	Tony Musick	5/11/2018	Paper Survey	Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand 380, as wide as possible. Everyone is already used to the highway in its current location and its normal for any highway to expand as the communities around it grows. The current homes that would be impacted by this would not take as much of a hit because its always been there versus homeowners that have bought a home in other communities such as Heatherwood who bought in their community because of the location away from 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4003	Tony Rulli	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. The over crowding from all the new construction between Lake Forest and 75 is a big concern.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia, Eldorado, Wilmeth, Rockhill (west)	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expedite the Collin County Outer Loop. At a minimum go from DNT Extension to east of Farmersville. Reduce speed on 380 from Custer to Harden to 50mph. That would remove a lot of commercial and through traffic.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: There should not be a Freeway between Custer and Highway 5, under no circumstances. Too many existing homeowners and business would be disrupted.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4004	Tony Shipman	5/16/2018	Electronic	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The intersection at 380 & Airport. It only has one turn lane. This often backs 380 up into Princeton. Either a flyover or complete redesign of this intersection would fix it. No need to do a bypass	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Woodlawn/Throckmorton	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Fix the intersection at 380 and airport. Adding another turn lane alone would fix half the congestion.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4004	Tony Shipman	5/16/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: If 380 was turned into a free way, Yes. I do not support a bypass.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4005	TONY YUNT	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic continues to increase, traveling both East and West, and many traffic lights create delays.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: No good alternative routes provide a quicker way due to the number of traffic lights on existing roads like Virginia Pkwy.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turn US 380 into a freeway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, alignment is important based on potential negative impact to existing property owners and their investment in their respective property.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4006	Tonya Mercer	5/11/2018	Electronic Survey	Q: What is your interest in this study? A: Business Owner, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, while it is beautiful, it is very dangerous and deadly.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Back county roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I'm not fully in the know of all solutions but somewhere between Princeton and Farmersville would be acceptable.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Mixed emotions on a freeway. Maybe an alternate FM road but freeway seems a little excessive.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
4009	Torrie and James Levins	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed limit in places seems too high and some lights are poorly timed and dangerous. Some places don't have deceleration lanes for people turning.	Any future improvements will be designed to enhance safety. Suggestion for synchronized traffic lights has been noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 or Custer or tollway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
4010	Torrie Levins	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Many wrecks at the light on 380 and Tucker Hill entrance	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 via Custer or Preston	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: 1) Make the bypass by Princeton 2) make another east west route further north but before 82 3) Expand 75 and 121	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment, None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4012	Traci Phillips	NA	Paper Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't take an alternate route	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would suggest widening the existing 380 to have additional lanes. Building a freeway through the other routes would disrupt the neighborhoods, resivoir and animals. If your are worried about cost - make 380 a tollway to recoup expense. I didn't move out here to have a freeway right next to my house!	Any future improvement projects would include assessment of the potential impact on the human and natural environments. Tolling is not being considered for the proposed project.
				Q: Do you support the building of a freeway regardless of alignment? A: As long as you use pink or green alignment. I do NOT support other routes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

4016	Tracy Barber	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Drive time from Farmersville to McKinney has almost doubled in the last decade. I've started shopping more in towns east and south of Farmersville to avoid driving west on 380. The center turn lane is a suicide lane. The number of wrecks will continue to increase as the population grows. We need a safer alternative. Turning left to the grocery store should not be a life threatening experience.	Any future improvements will be designed to enhance safety. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: Highway 78 south to Wylie or Rockwall Highway 380 east to Greenville	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: We need an interstate type road sooner rather than later.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
4017	Tracy Burnett	5/17/2018	Electronic	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. Unsafe for the high school kids due to the big trucks	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Lower the speed limit	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4022	Tracy Nuttall	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer or Preston to 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Wouldn't the proposed outer loop reduce volume of traffic on 380?	Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: Depends on where the new bypass is located	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4023	Tracy Orchowski	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No. Leave it alone. We don't want a freeway impacting our homes and property with noise or ruining our nature.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: If a bypass is necessary, build it where there aren't existing homes near the DNT entrance. Don't disrupt homeowners land and property by putting a noisy freeway in a residential area. Property values will go down.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Any future improvements will be designed to enhance safety.

	Commenter Name	Date Received	Source	Comment Topic	Response
4024	Tracy Penton	5/9/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Weekly	Any future improvements will be designed to enhance safety.
				Q: Do you have any concerns with the existing US 380? A: It is extremely dangerous.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado or Virginia to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Unfortunately, i think we need to add more stop lights to add some safety. We drive 380 east and west of McKinney.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I don't want to see Erwin park to be tampered with. I feel we need to preserve that as part of our community and what we have to offer our residents.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4025	Tracy Prince	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway, Eldorado Parkway, 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen Road maybe another lane or two on each side only do a half a mile at a time don't close the entire road down at one time don't make it under construction for miles and miles and miles do a little open that section do a little more open that section do a little more open that section and definitely no more toll roads	Comment noted. Any improvements to the existing US 380 would likely be accomplished in phases/sections. Tolling is not being considered as an option for funding.
				Q: Do you support the building of a freeway regardless of alignment? A: Not necessarily because they'll try to turn it into a toll road and we have enough damn toll roads around here	Comment noted. Tolling is not being considered as an option for funding.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4026	Tracy Tesauro	5/15/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Idk	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4027	Tracy Thomas	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, it needs to be fixed. A bypass will not solve the problem. 380 will bottleneck when it hits McKinney due to the expansion of 380 in Prosper and it will stop short of any potential bypass. Businesses don't want to be bypassed. We need to be looking at long term accessibility. It's too late to deal with a temporary solution. And my neighbors should not have to lose their homes due to any lack of poor planning.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia or El Dorado to get to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Making 380 a limited access roadway. In the long term businesses will appreciate it and will thrive more due to accessibility. In the meantime, many businesses along 380 are in buildings that they lease, so with ample time they would be able to relocate if need be.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many accidents, not a lot of sidewalks or lights protecting pedestrians if they have to go across 380. 380 before First Monday needs turn in lanes, more turn in lanes and lights.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights and sidewalks noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest to 121, Lake Forest to Eldorado, Lake Forest to Virginia, 380 to Hardin to White to 75	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4028	Tram Yeany	5/8/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: 4-5 Lanes plus turning lanes and more lights, lower the speed limit. North of Bloomdale	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.

4035	Trevor Sontz	5/4/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Heavy traffic congestion.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 or other local roads north/south of 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bridges/tunnels at intersections to keep continuous traffic flow.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes if it can be pushed further north or come up with an expansion of 380 that does not affect current property owners.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
4036	Trey Raybourn	5/2/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too congested. Too high of speed through residential and business access areas.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: No alternate route available.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: If no improvements are made, the speed limit needs to be lowered and widen it to 6 lanes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4037	Tricia Scruggs	5/18/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Lots of traffic lights (mostly between Lake Forest and US 75) make for a great deal of traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Create a bypass from Preston or the DNT north around to Princeton.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: If it's the only option	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4038	Tricia Weir	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: A couple times a year	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Works well though I would like to see bike lanes even on this road as I sometimes ride on it.	Comment noted. Any future improvments would consider inclusion of bicycle accommodations.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Preferred not. Like the rural nature of the area and would like to keep that.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.

4039	Tricia Wilson	5/17/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4040	Trish Stineman	5/19/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many big rigs (Trucks), traffic jams. Unsafe driving.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia parkway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Reroute a loop north of the city to alleviate some of the through traffic so that people who live in the city do not have to suffer the congestion, especially as our city is only half done growing.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: I'm not sure but it's probably a better solution than what we have now.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
4041	Trisha Dowell	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I think it's fine right now.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: It's not usually terribly congested unless there has been an accident. Rush hour congestion is not great, but I think that has more to do with red-light timing creating the problem.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would suggest enlarging the current road to be 6 lanes instead of 4. I realize that is not a perfect solution, but it is a solution that has the least amount of impact on the cities, business and residential property owners.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I do not think it is necessary to build a giant limited access freeway along the 380 corridor. It will decimate the towns, businesses and property owners that it will go through.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. Way too congested and too many lights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia; El Dorado; 121; 82	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen it to a freeway...OR make a REAL loop that bypasses the entire current 380 from McKinney to Denton. Do NOT make a half-way by-pass and shoot it back onto 380 at Stonebridge or Ridge - what's the point of that? Connect a REAL by-pass from Princeton to the West side of Denton North by-pass! Think long-term and real please!!!	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.

4045	Troy Stephan	5/1/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed Limits are too fast between hwy 75 and DNT. Should be 50 mph max.	Any future improvements will be designed to enhance safety. Suggestion for lower speed limit noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Its only congested during rush hour in sections. Otherwise its fine outside of those windows. All roads in DFW are congested during those times.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Leave it alone and build the wider loop around Collin county. We have 121 just to the south as a current high speed East West route. Disturbing homes and business to create another 121 in the form of the proposed 380 expansion is crazy and a waste of tax $$. This is further compounded by the close proximity of the two.	Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely Not. We have a freeway. Its HWY 121. You need to be thinking of broader growth occurring to the north and focus on the Collin Cty Loop. You are chasing your tail with this proposed 380 expansion.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I am just wondering, since they already have so many accidents, how many more will occur as a result from all the new building/developing plans? Also, I do not want to see more toll roads.	Any future improvements will be designed to enhance safety. Tolling is not being considered for this project.
				Q: If US 380 is congested, what alternative routes do you take? A: I am not sure. I guess I will just need to avoid 380 during the developmental phase of your planned project(s).	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More lanes, better signs, set speeds, and more lights.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: If it will help reduce accidents, then yes. However, I do not want to see yet another toll road.	Comment noted. Tolling is not being considered for this project.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily, Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I always have. 380 has always been dangerous but this is probably due to careless drivers	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: back roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: - double deck through traffic from Hunt Co to Denton on top - finish the Outer Loop first - You need to think farther ahead in the future. By the time you begin any of these proposed projects they will be obsolete - taking traffic off of the main/existing 380 & feeding it back on farther down the highway will only cause congestion where the intersections converge - focus on the people who currently live here - not on those who may move here in the future	Comment noted. Alignment options and roadway configurations are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I am agaist any and all bypasses. These impact neighborhoods that have been established, some for decades. Think about the people who already live here.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4054	Valerie Fitzau	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Current US380 alignment is capable of accommodating the volume of traffic with some improvements.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: My primary alternate route is via El Dorado.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Focus on building out the outer loop and improving currently existing east-west connectors. ie ...improving traffic flow on US 380.Do not allow approving any more traffic lights. Reduce existing congestion via overpasses at key intersections. Add in more lanes or access routes to existing US 380.	Comment noted. Alignment options are still being evaluated. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: No I do not support building a freeway for any of the proposed alignment options except for enhancements to the current US 380.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

4059	Valinda Bruce	5/7/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many traffic lights!	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Back roads/country routes	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: It should be a controlled access freeway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I would prefer using the existing route & creating the highway right where it currently is, maybe even duplicating something like they have on I-35 through Austin with a raised second level highway that could work as a bypass/expressway with limited exits. The only other alignment I liked is the Blue Alignment Route which seems to encroach the least for homeowners.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4060	Vanessa Blanco	5/1/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: As a daily commuter, the road and drivers perform as expected in a growing city. The congestion occurs at the junction of US380 and 75.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Public Transportation.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. With the proposed loop around Mckinney, wouldn't that relive potential conjestion? McKinney and the surrounding cities need to provide a system of public transportation that would be a model for other similar cities.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

4083	Vincent Gunn	5/6/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Traffic volume, ingress/egress, noise, safety.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest or Hardin south to 121 or 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Need a freeway loop between 75 and 289 that bypasses East and West McKinney to the north. Ideally loop would extend to Dallas North Tollway and 35 another loop for the Dallas metroplex. This model would allow 380 to be left "as is".	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: I would conditionally support a freeway solution if the plan accomodates a east/west freeway to the north of McKinney that bypasses 380 and northern McKinney and which intersects with the 75, 289, Dallas North Tollway, and 35 freeways. This solution would can be built out over a period of years and adds another loop to the Dallas Metroplex to accomodate future growth north while preserving 380 in it's current state for intra-city traffic and growth.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

				Q: Do you have any concerns with the existing US 380? A: Congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Outer loop from DNT through prosper-mellisa	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Adjusting 380 is not enough, there needs to be a route north developed NOW to move traffic outside the area that is passing through from Denton and to handle the McKinney Growth. We need to plan ahead now, not band-aid 380 only.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	No answer provided.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia/Rockhill	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Having the bypass go north of Frontier Parkway makes the most sense as most of the growth is going north to Celina at this point.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: 380 is not really congested enough to support a freeway in my opinion. More emphasis should be put on expanding the DNT northwards. The fewer impact you have to existing homeowners, the better.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
4093	Wade J Darbonne	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White or Virginia Parkway into McKinney. 121 into Denton.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Improve the light layout and traffic flow at 75/380, but otherwise leave as is.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4094	Wade Ledbetter	5/8/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Too many stop lights from Hardin to 75 going east-bound. Traffic backs up east bound past Community because the entrance from 380 to Towne Crossing was poorly planned and there isn't enough time for east-west bound traffic to go through the intersection.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White, Virginia, Eldorado, Taylor Burk, Wilmeth	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Close Raytheon entrance on US 380 and remove that traffic light on US 380. Remove the stop light at RaceTrac and put in a permanent median to prevent left turns. Move the stop light further eastward to the other entrances to Towne Crossing/Cameron Crossing. Provide two left turn lanes at the new eastbound entrance into Towne Crossing. Provide a protected right-turn lane from NB75 service road to EB380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not particularly. I think the problem is more due to poor traffic flow in and out of Towne Crossing and Cameron Crossing and not enough time on the east-west lights going under 75.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4095	Wahed Mohammed	5/1/2018	Comment Form	I would like US 380 Collin County to be a full-fledged FREEWAY	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic lights	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Would like it to be a full-fledged highway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: YES.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4096	Walter Chen	4/28/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: I do not. The only concern is left hand turn from 380 into Tucker Hill. The number of drivers who do not know the left hand turn light is dynamic and changes in duration based on time of day and day of week and traffic conditions. Maybe include a timer to show how much longer until next dynamic light change will minimize people taking illegal turns.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I take Hardin or Lake Forest or Custer to go south and take Virginia or El Dorado or 121 to get to 75.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Use the money and build the Collin County loop instead of widening 380. Connect Custer, Lake Forest, and Hardin to the loop. Force all 18-wheelers coming from the east to take North Texas Tollway and connect to the loop. The solution already exists.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment? A: No - I do not support the building of a freeway.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

4101	Wendell and Nancy Gilbert	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It's a dangerous road. Construction trucks dominate the road and exceed the speed limits. They often hog the inter two lanes and drop debris all over the roadways. They should be limited to a max speed of 50 mph and can only operate on the outer lane.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia pkwy	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Limit construction trucks to 50mph and limit to the outside lanes. Also, the traffic must be slowed down. It's a very dangerous road. One only need to look at all the skid marks at stop lights.	Any future improvements will be designed to enhance safety.
				Q: Do you support the building of a freeway regardless of alignment? A: This question is too open ended. I do support a major solution. Something has to be done soon.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4102	Wendell Samuel	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Intersection of 75 & 380 is terrible. Cross streets that intersect 380 are dangerous.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: White Street, Virginia, Rockhill Rd.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses at intersections and a barrier divide of east/west bound lanes	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4103	Wendi Warren	5/17/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Exiting road is congested with too many traffic stops. So many neighborhoods border the existing 380.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121 to 35 or 121 to Dallas North Tollway.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: If a freeway is added, it should be built further north that the existing 380 and connect at Custer, Hardin, Lake Forest. It should not connect at Stonebridge Drive or Ridge Roads. Support the blue or red routes but move the connection west across Custer road to connect with 380 west of Walmart.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Support a freeway, but not on the existing 380 path. Too many neighborhood entrances face the corridor and neighborhoods would be negatively impacted by the increased thoroughfare.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4104	Wendy Foster	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
4112	Wesley Murdock	5/16/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, I see that it is starting to get more congested. More specifically at Custer and 380, Hardin and 75. With the adding of new businesses and new home along 380 in McKinney, I can easily see this double in the near future. Starting to become very dangerous.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Stonebridge.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Do not allow left turns from the side roads or businesses. Better left turn lanes to turn off 380. Right turn lanes to turn into businesses or residential areas. By-Pass from Custer north to 75 and around.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not regardless of alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4113	Wesley Sundarsingh	5/9/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
4114	Weston Smith	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
4115	Whitney	4/30/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Reduce speed limit. Once construction is completed towards the West in Prosper/ Frisco I think 380 will be much better!	Suggestion for reduced speed limit has been noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Keep as is.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Keep as is and increase addition of turn lanes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: There is lots of color construction. Traffic can be horrible at DNT.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 1st Ave in Prosper	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Create and execute a long term plan knowing there is retail coming & residential living just north of 380 in Prosper.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: My support will depend on the alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
4127	Willenea peterson	5/3/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: congested at major intersections. It is also very dark in some places and need better lighting.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia parkway and Wilmeth RD	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Traffic signals synchronized to keep traffic moving	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support freeway, but only certain alignments	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4128	William & Suzanne Gates	4/27/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: too busy and too high speed limits too many 18 wheelers	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: have to start out on 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: how to bypass big trucks	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4129	William Sano	NA	Comment Form	As a resident of Tucker Hill, my position is No to all proposed alignments due to the potential loss of homes and adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right of way and noise pollution by means a cantilevered access lanes, a depressed throughway and sound barriers. If any bypass option is chosen it must be located as far west of Tucker Hill as possible; west of Stonebridge and not bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
4130	William A. Starnes	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much traffic, especially at 75. People drove too fast for the amount of traffic.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make it like 121, exit and entrance ramps with feeder road.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support a treaty style, Not regardless of alignment.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4131	William Bainum	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: getting to be too many stoplights along 380. Travel time is getting longer	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Rockhill road and FM423	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: include provisions for light rail in the ROW for any future alignments.	Comment noted. Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4133	William Byrnes	NA	Comment Form	The green, pink, and red plans will destry the front half of my neighborhood, Tucker Hill. Close to a dozen homes will be destroyed and at least another two dozen will be up against a barrier wall next to a freeway. At the very least you need to not have access roads running along the freeway between Custer and ridge and sound walls would need to be up against the freeway itself. I vote do not build a freeway more roads aren't the only answer.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Stop development east of Coit rd	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
4134	William Elliott	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic has become very congested at times.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White Ave is alternate route to go east on 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: The suggestion that are on the books look feasible. It want be up to me, but the engineers will be the final word.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, the congestion at 75 and 380 has become worse daily.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hil	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

4137	William Parr	5/17/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: Congestion is bad now and will only get worse	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand the current path	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
4138	William Powell	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The current approach is not adequate and is unsafe. I avoid 380 if possible due to excessive traffic, too many lights, and too much uncontrolled access directly onto 380 which allows cars to pull out of businesses at slow speeds into quickly moving traffic.	Comment and suggestion for more fewer lights has been noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Frontier Parkway or Prosper Trail if heading west and/or north. 164/943/Wilmeth Rd. if going out to 75. Custer or Lake Forest south to the Sam Rayburn tollroad. I am now in the habit of taking any back route I can find to stay off of 380 if possible.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: There really needs to be a northern parallel route that goes from the Prosper/Celina area all the way over to 75. Either Prosper Trail or Frontier Parkway make a lot of sense to me. With the new Prosper High School going in on Prosper Trail/Bloomdale/123, that stretch of 123 will need to be developed anyway. That could be widened and extended all the way to 75.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Absolutely. It is essential to the future of the area. Some argue it will encourage growth and ruin the area, but the growth is here regardless and is not going to go away just because the freeway does not get built. Safety, convenience, etc all suggest that the freeway is the best option. I would add that provided good bike/pedestrian routes, as well as drastically expanding public transportation (possible metro rail, etc) are very important to included in any planned expenditures.	Comment noted. Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project. Any future improvements would include consideration of bicycle and pedestrian accommodations.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: yes, safety due to traffic congestion.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4139	William Shelt	5/15/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: route 428 between McKinney and Denton	Comment noted.

				Q: Do you have any concerns with the existing US 380? A: congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: side streets	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: bypass	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: depends	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4141	William Stadelman	5/18/2018	Electronic	Q: What is your interest in this study? A: Park user	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not really. It seems to work fine since it has been widened.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: None, I just slow down and enjoy the drive.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Stop letting more people move into the area.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4141	William Stadelman	5/10/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: NO.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
4142	William Yackinous	5/15/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: At peak work travel times (morning and late afternoon), alternative parallel roads are often more congested than US 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: For heavy trucks transiting through and across local areas, bypass alternatives that avoid the the densely populated areas would benefit both the truckers and the local populations.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. US 380 passes right through many existing communities and existing residential areas. Given the improvements made to US 380 over the last few years (with some improvements still in progress), we already have a six-lane highway. Further broadening or re-routing of US 380 will negatively impact many surrounding residents.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
4143	Wm Scott Withrow	5/10/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much traffic and not managed well. Need to have left lane for passing or something similar.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: cr 982 on west side of Princeton. Whatever gets me thru north of 380 between Princeton and Farmersville	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More lanes and turn lanes. Slower traffic use right lane or a complete new road with limited on/off to get thru traffic moving	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes if it relieves congestion and handles projected growth	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
4144	Wyatt Riggs	5/18/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed limitation is under what would be understandable for the amount of traffic. The overall trip experience towards the downtown of mckinney could be greatly improved with fewer bumps past hardin and greater speeds.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia, though it too is a mess when there is traffic. The term congested is grossly used here (pun intended)	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, as long as proof of public roads upkeep is provided and there is a thorough EPA study conducted. Also tree planting, not grass (weeds and useless water wasting)	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
4145	Wyndi Marston	4/29/2018	Electronic Survey	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
4146	Wyndi Veigel	5/14/2018	Paper Survey	Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A:	No answer provided.
				Q: Do you have any concerns with the existing US 380? A: Yes. Traffic after 4 p.m. going east bound from McKinney is crazy. Too many wrecks.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I often take Airport Road from McKinney & meander through the country.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More lanes on 380 divided with a median that cannot be easily crossed. Need sound edging on shoulder so people cannot drive off of the road as easily when intoxicated or sleepy. Ready for 380 to stop killing people.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, we need it for growth.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment; I really think whatever the least expensive route is, that is what should be done	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No. A high priority must be placed on preventing disturbance to current residents of prospective routes.	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
4156	Yvonne A Thomsen	5/1/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: extremely dangerous to turn off of, or onto	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: 942 (think thats the #) to Allen/Lucas	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: make it a real freeway with exits (on/off ramps) etc.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I moved north of 380 to be out in the country. If 380 or any other freeway were moved up near me, I would most likely sell and move away. I came out here for peace and quiet, not noisy roads.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
4157	yvonne engel lambeth	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Resident, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: lights are poorly timed which creates congested traffic flow.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 121/Custer. Ridge/Virginia or Eldorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: If a freeway has to be created. The blue plan with the link at Custer is the most logical. NOT Stonebridge drive where the bulk of your tax money comes from.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Frisco/Plano has way more business along Preston road and they have not created a freeway to negatively impact the value of the residential properties. McKinney unique by nature will need to be changed if we are boxed in by 121/75 and 380 freeways.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, None, I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, None, I Do Not Support Building a Freeway	Comment noted.
4158	Yvonne Lerma	5/12/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Accidents	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Avoid	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Median barrier with concrete divider minimum.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: Nor if it impacts homes. It needs to keep the same footprint but needs to be like 121.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
4159	Yvonne Moore	5/13/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes. The medium isn't safe. The Walmart and McDonald's are two examples of how the lack of a good medium causes issues for the traffic flow.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: 982 is the only alternative for us.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: 1. Control the growth in the area. Limits that would support the current roads. 2. Define alternatives above and below 380.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Based on how I read this question. Taking away peoples property is wrong. You need to work with what is available.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4160	Zach Jackson	5/8/2018	Electronic Survey	Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It's too small for the amount of traffic and the traffic lights are not configured for optimal traffic thru put.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There are none :(I live off of 380	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turn it into a highway and remove the stop lights.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
4161	Zach Smith	5/14/2018	Electronic Survey	Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Very congested from about Trade Days to Highway 75, and still plenty of traffic around 380 and tollway due to construction.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: If need to head East or South, might take Virginia or Eldorado, but those streets are slowly becoming more congested as well.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Realistically? Not an expert, but probably need to widen it to a degree. Not sure if a bypass would serve the current problems on 380, but would help development to the Northern cities.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: For the good of McKinney I would, but selfishly I do NOT - I live in Tucker Hill, towards the front of the neighborhood, and my house and property would be negatively impacted if 380 were to be built into a freeway in that area. Either our property would have to be bought out or the freeway would be VERY close to our house, depending on how wide it goes. If the city of McKinney and/or the builder would somehow assist in the process so that I am fairly compensated I would better understand the freeway option and be for it...but as is, since it adversely impacts me I cannot be in favor for any changes to 380 to take place, at least around the Tucker Hill area.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
4162	Zachary Hope	5/14/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The poorly timed lights are a major concern. Main thoroughfares would flow much better with some signal coordination.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway or Rockhill Road	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: The blue or red routes through McKinney are fine, but the connection back to US 380 should be done at Custer Road, NOT Stonebridge or Ridge. Custer already needs improvements, why not kill two birds with one stone? Also, this defines the city limits of two cities. (Yes, Prosper can make concessions, too!) Makes more sense to make the highway cut in there rather than connect it to a small neighborhood road (Stonebridge Drive). Plus, the development of US 380 west of Custer Road is less than that of US 380 east of Custer Road so you disturb less population.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, no, no, and no. McKinney is a nice community and does not need to bare the sacrifice of our property values declining for commuters headed to the Dallas North Tollway or Highway 121. Prosper and Celina need to make concessions as well.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: 380 and 75 intersection needs a new access from 380 east to 75 South	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

NOTICE OF PUBLIC MEETINGS

Proposed Improvements to US 380 from Denton County Line to Hunt County Line
Collin County, Texas
CSJs: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

The Texas Department of Transportation (TxDOT) is conducting a feasibility study for improvements to US 380 through Collin County, a distance of approximately 32 miles. **TxDOT will conduct three public meetings to discuss and receive public comments on the proposed project. All three meetings will present the same information and will be held in an open house format with no formal presentation.** Representatives from TxDOT and project consultants will be available to answer questions about the proposed project improvements. The meeting dates, times, and locations are listed below.

Thursday, April 26, 2018	**Tuesday, May 1, 2018**	**Thursday, May 3, 2018**
6:00 p.m. to 8:00 p.m.	**6:00 p.m. to 8:00 p.m.**	**6:00 p.m. to 8:00 p.m.**
Sheraton McKinney	**Princeton High School**	**Rogers Middle School**
1900 Gateway Boulevard	**1000 E. Princeton Drive**	**1001 Coit Road**
McKinney, Texas 75070	**Princeton, TX 75407**	**Prosper, TX 75078**

The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or utilizing new alignments. Alignment options could require additional right-of-way to accommodate the project.

Study data and maps showing roadway alignments options will be available for viewing at the public meetings. This information will also be available for public inspection Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. at the TxDOT Dallas District. Meeting information will also be available online at www.Drive380.com.

All interested persons are invited to attend any of these public meetings. Written or electronic comments from the public are requested and will be accepted for a period of 15 calendar days. Written comments may be submitted either in person at the public meeting, online, or by mail to: Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, or by email addressed to Stephen.Endres@txdot.gov. **Written comments must be postmarked on or before Friday, May 18, 2018 to be included in the documentation of the public meeting.**

The public meeting will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as the need for an interpreter, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the public meeting. TxDOT will make every reasonable effort to accommodate these needs. If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager, Mr. Stephen Endres, P.E. by phone at (214) 320-4469 or by email at Stephen.Endres@txdot.gov.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

AVISO DE REUNIONES PÚBLICAS

Propuestas para mejorar la US 380 desde el Límite del Condado de Denton hasta el Límite del Condado de Hunt
Condado de Collin, Texas
CSJ: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

El Departamento de Transporte de Texas (TxDOT) está llevando a cabo un estudio de factibilidad para mejorar la US 380 a lo largo del Condado de Collin, en una distancia de aproximadamente 32 millas. **El TxDOT llevará a cabo tres reuniones públicas para discutir y recibir comentarios públicos sobre el proyecto propuesto. En las tres reuniones, se presentará la misma información y serán realizadas en formato de asamblea abierta sin presentación formal.** Representantes del TxDOT y los consultores del proyecto estarán disponibles para contestar preguntas sobre el proyecto. Las fechas, horas y lugares de las reuniones seran:

Jueves, 26 de abril de 2018	**Martes, 1 de mayo de 2018**	**Jueves, 3 de mayo de 2018**
6:00 p.m. a 8:00 p.m.	**6:00 p.m. a 8:00 p.m.**	**6:00 p.m. a 8:00 p.m.**
Sheraton McKinney	**Princeton High School**	**Rogers Middle School**
1900 Gateway Boulevard	**1000 E. Princeton Drive**	**1001 Coit Road**
McKinney, Texas 75070	**Princeton, TX 75407**	**Prosper, TX 75078**

El propósito del estudio es analizar opciones de carreteras potenciales para la US 380, incluyendo mejorarndo la alineación existente o utilizando nuevas alienaciones. Las opciones de alineación pudieran requerir derechos de vía adicionales para acomodar el proyecto.

Los datos y mapas del estudio que muestran las opciones de alineación de las carreteras estarán disponibles para su visualización en las reuniones públicas. Esta información también estará disponible para inspección pública de lunes a viernes entre las 8:00 a.m. y las 5:00 p.m. en el TxDOT, Distrito Dallas. La información de la reunión también estará disponible en línea www.Drive380.com.

Todas las personas interesadas están invitadas para asistir a cualquiera de estas reuniones públicas. Se solicitarán y aceptarán los comentarios por escrito o electrónicos del público por un periodo de 15 días calendario después de la reunión pública del 3 de mayo. Los comentarios por escrito pueden ser entregados personalmente en las reunión públicas, en línea, o por correo a: Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, o por correo electrónico a la dirección Stephen.Endres@txdot.gov. **Los comentarios escritos, deben enviarse por correo antes del viernes, 18 de may del 2018 para ser incluidos en la documentación de la reunión pública.**

Las reunións públicas será realizada en inglés. Las personas interesadas en asistir a las reuniones que tienen necesidades de comunicación o de alojamiento, como la necesidad de un intérprete, se les sujiere que contacten al TxDOT, Distrito Dallas, Oficina de Información Pública al (214) 320-4480. Las solicitudes deben realizarse por lo menos dos días antes de cada reunión pública. El TxDOT hará todos los esfuerzos razonables para adaptar esas necesidades. Si usted tiene preguntas o preocupaciones generales en relación con el proyecto propuesto, puede contactar al gerente de proyecto del TxDOT, Sr.

Stephen Endres, P.E. por teléfono al (214) 320-4469 o por correo electrónico a Stephen.Endres@txdot.gov.

La revisión ambiental, consulta y otras acciones requeridas por las leyes ambientales federales aplicables para este proyecto están siendo o han sido, llevado a cabo por TxDOT – en virtud de 23 USC 327 y el Memorando de Entendimiento del 16 de diciembre de 2014, y ejecutado por la FHWA y el TxDOT.

a news website for writing about his past troubles has been convicted of computer crimes by a federal jury in Dallas.

Andrew Rakhshan, 38, was found guilty on Thursday of knowingly causing the transmission of a command to a protected computer after a three-day trial. He'll be sentenced in June to up to 10 years in prison.

Prosecutors said he asked various news sites to take down stories and blog posts about his fraud conviction in Canada. But if they refused, he threatened to crash their website using a "distributed denial of service attack," in which multiple computers flood a targeted website's servers with traffic.

That's exactly what he did to a Washington, D.C., legal news website, Leagle.com, which had servers in Dallas, according to the indictment. Leagle had linked to a court opinion about his past troubles.

Rakshan's attorney could not immediately be reached for com-

ing the link, the indictment says.

Prosecutors say Leagle was not his only victim, which could result in a harsher sentence for him. They say at least eight other media companies had similar run-ins with Rakhshan, including theCanadian Broadcasting Corp. The government says that when his demands were not met, Rakhshan also threatened to bomb their offices, and harass and murder their employees.

The defendant was born Kamyar Jahanrakhshan in Iran and came to the U.S. in 1991, according to federal court records.

He says he chose to "Americanize" his name when he obtained U.S. citizenship in 1999. Rakhshan moved to British Columbia and obtained permanent residency status in Canada, records say.

Rakhshan was convicted in Canada in 2011 of fraud and obstruction and served 18 months in prison, court records say. Rakhshan made counterfeit credit cards from foreign banks that he

After serving his sentence Rakhshan was deported from Canada in 2014, records show.

Rakhshan, a self-describe "sophisticated internationa fraudster," emailed someon from Leagle in late 2014 an wrote that the link about his cas was "capable of tarnishing his reputation," which he claime violated his privacy.

The link contained a court opinion about a "criminal matter for which he was found guilty, though he denied his guilt," court records said.

A federal arrest warrant was issued for Rakhshan in July 2016 in Dallas for the Leagle cyberattack. The FBI tracked him down and arrested him outside of Seattle a year later, court records show. Rakhshan was indicted in August 2017. He's been fired from his job as a Boeing Co. information technology subcontractor in Seattle and has been in custody since his arrest, court records show.

NOTICE OF PUBLIC MEETINGS

Proposed Improvements to US 380 from Denton County Line to Hunt County Line
Collin County, Texas
CSJs: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

The Texas Department of Transportation (TxDOT) is conducting a feasibility study for improvements to US 380 through Collin County, a distance of approximately 32 miles. TxDOT will conduct three public meetings to discuss and receive public comments on the proposed project. All three meetings will present the same information and will be held in an open house format with no formal presentation. Representatives from TxDOT and project consultants will be available to answer questions about the proposed project improvements.

The meeting dates, times, and locations are listed below.

Sheraton McKinney Conference Center Ballroom
1900 Gateway Boulevard, McKinney, TX 75070
Thursday, May 24, 2018 (5:00 p.m. - 8:00 p.m.)

Princeton High School
1000 E. Princeton Drive, Princeton, TX 75407
Tuesday, May 29, 2018 (5:00 p.m. - 8:00 p.m.)

Rogers Middle School
1001 Coit Road, Prosper, TX 75078
Thursday, May 31, 2018 (5:00 p.m. - 8:00 p.m.)

The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or building new alignments. Minimum anticipated right-of-way to accommodate the project. Study area and maps showing roadway alignments options will be available for viewing at the public meetings. This information will be made available for public inspection Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. at the TxDOT Dallas District Meeting information will also be available soon at www.Drive380.com.

All interested persons are invited to attend any of these public meetings. Written or electronic comments from the public are requested and will be accepted for a period of 10 calendar days. Written comments may be submitted either in person at the public meeting, mailed or emailed to Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, or by email addressed to Stephen.Endres@txdot.gov. Written comments must be postmarked on or before Friday, May 18, 2018 to be included in the documentation of the public meeting. The public meeting will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as deaf or hard of hearing, disabled, or other auxiliary aid or service, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the public meeting. TxDOT will make every reasonable effort to accommodate these needs.

The environmental issues, alternatives, and other factors considered by applicable federal environmental laws for this project are being or have been addressed by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager: TxDOT, Stephen Endres, P.E., Stephen.Endres@txdot.gov, (214) 320-4469.

AVISO DE REUNIONES PÚBLICAS

Propuestas para mejorar la US 380 desde el Límite del Condado de Denton hasta el Límite del Condado de Hunt Condado de Collin, Texas
CSJ: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

El Departamento de Transporte de Texas (TxDOT) está llevando a cabo un estudio de factibilidad para mejorar la US 380 a lo largo del Condado de Collin, en una distancia de aproximadamente 32 millas. El TxDOT llevará a cabo tres reuniones públicas para discutir y recibir comentarios públicos sobre el proyecto propuesto. En las tres reuniones, se presentará la misma información y serán realizadas en formato de asamblea abierta sin presentación formal. Representantes del TxDOT y los consultores del proyecto estarán disponibles para contestar preguntas sobre el proyecto.

Las fechas, horas y lugares de las reuniones serán:

Jueves, 26 de abril de 2018
6:00 p.m. a 8:00 p.m.
Sheraton McKinney
1900 Gateway Boulevard
McKinney, Texas 75070

Martes, 1 de mayo de 2018
6:00 p.m. a 8:00 p.m.
Princeton High School
1000 E. Princeton Drive
Princeton, TX 75407

Jueves, 3 de mayo de 2018
6:00 p.m. a 8:00 p.m.
Rogers Middle School
1001 Colt Road
Prosper, TX 75078

El propósito del estudio es analizar opciones de carreteras potenciales para la US 380, incluyendo mejorando la alineación existente o utilizando nuevas alienaciones. Las opciones de alineación pudieran requerir derechos de vía adicionales para acomodar el proyecto. Los datos y mapas del estudio que muestran las opciones de alineación de las carreteras estarán disponibles para su visualización en las reuniones públicas. Esta información también estará disponible para inspección pública de lunes a viernes entre las 8:00 a.m. y las 5:00 p.m. en el TxDOT, Distrito Dallas. La información de la reunión también estará disponible en línea www.drive380.com.

Todas las personas interesadas están invitadas para asistir a cualquiera de estas reuniones públicas. Se solicitarán y aceptarán los comentarios por escrito o electrónicos del público por un periodo de 15 días calendario después de la reunión pública del 3 de mayo. Los comentarios por escrito pueden ser entregados personalmente en las reunión públicas, en línea, o por correo a: Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, o por correo electrónico a la dirección Stephen.Endres@txdot.gov. Los comentarios escritos, deben enviarse por correo antes del viernes, 18 de may del 2018 para ser incluidos en la documentación de la reunión pública.

Las reuniónes públicas será realizada en Inglés. Las personas interesadas en asistir a las reuniones que tienen necesidades de comunicación o de alojamiento, como la necesidad de un intérprete, se les sujiere que contacten al TxDOT, Distrito Dallas, Oficina de Información Pública al (214) 320-4480. Las solicitudes deben realizarse por lo menos dos días antes de cada reunión pública. El TxDOT hará todos los esfuerzos razonables para adaptar esas necesidades.

La revisión ambiental, consulta y otras acciones requeridas por las leyes ambientales federales aplicables para este proyecto están siendo o han sido, llevado a cabo por TxDOT – en virtud de 23 USC 327 y el Memorando de Entendimiento del 16 de diciembre de 2014, y ejecutado por la FHWA y el TxDOT.

Si usted tiene preguntas o preocupaciones generales en relación con el proyecto propuesto, puede contactar al gerente de proyecto del TxDOT, Sr. Stephen Endres, P.E., por teléfono al (214) 320-4469 o por correo electrónico a Stephen.Endres@txdot.gov.

NOTICE OF PUBLIC MEETINGS

The Texas Department of Transportation (TxDOT) is conducting a feasibility study for improvements to US 380 through Collin County, a distance of approximately 22 miles. TxDOT will conduct three public meetings to discuss and receive public comments on the proposed project. At these meetings, will present the same information and will be held in an open house format with no formal presentation. Representatives from TxDOT and project consultants will be available to answer questions about the proposed project improvements.

The meeting dates, times, and locations are listed below.

Thursday, April 26, 2018
5:00 p.m. to 8:00 p.m.
Sheraton McKinney
1900 Gateway Boulevard
McKinney, Texas 75070

Tuesday, May 1, 2018
5:00 p.m. to 8:00 p.m.
Princeton High School
1000 E. Princeton Drive
Princeton, TX 75407

Thursday, May 3, 2018
5:00 p.m. to 8:00 p.m.
Rogers Middle School
3001 Old Road
Prosper, TX 75078

The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or utilizing new alignments. Alignment criteria could require additional right-of-way to accommodate the project. Study data and maps showing roadway alignment options will be available for viewing at the public meetings. This information will also be available for public inspection Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. at the TxDOT Dallas District. Meeting information will also be accessible online at www.DriveTexas.org.

All interested persons are invited to attend any of these public meetings. Written or electronic comments from the public are requested and will be accepted for a period of 15 calendar days. Written comments may be submitted either in person at the public meeting, online, or by mail to Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, or by email addressed to Stephen.Endres@txdot.gov. Written comments must be postmarked on or before Friday, May 18, 2018 to be included in the documentation of the public meeting. The public meeting will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as the need for an interpreter, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the public meeting. TxDOT will make every reasonable effort to accommodate these needs.

If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager
TxDOT, Stephen Endres, P.E., Stephen.Endres@txdot.gov, (214) 320-6609

Obituaries, In Memoriam, Services

BOIRER

Courtney Doty Boirer of Frisco went to be with our Lord on March 24, 2018. She died at the age of 41 as a result of cardiac arrest.

Courtney was born to Sharon Bowers Doty and Ereal V. Doty, Jr. on November 28, 1976 in Irving, TX. Courtney grew up in Colleyville and graduated from Grapevine High School in 1995. She graduated Cum Laude from Texas Tech University with a double major in marketing and management. She was a Chi Omega Sorority sister. Courtney was of the Methodist faith. Her sons were the loves of her life.

Courtney is survived by sons, Jack Douglas Boirer and Charles Zane Boirer; mother, Sharon Parkman (Tommie); sister, Vanessa Russ (Rodney); step-mother, Julie Ritcher (Larry); nephew, Andrew Doty; niece, Ellie Russ, and numerous aunts, uncles, and cousins. She is preceded in death by her father, Ereal; step-father, Ted Colen; grandparents, Ereal V. and Elaine Doty and Jim and Cynelle Bowers.

A memorial service will be held Friday, March 30, 2018 at 11:30 AM in the Founders Chapel of First United Methodist Church Grapevine, 422 Church Street, Grapevine, TX with Ving Alday officiating.

The Star in Frisco

From PAGE ONE

Sunday service from Preston-wood Baptist Church.

With a backdrop of Huddle by artist Tom Friedman, Dallas Cowboys owner Jerry Jones and Frisco Mayor Jeff Cheney were joined by members of the Jones family to cut the ribbon on the Entertainment District.

"The reason that the Dallas Cowboys chose Frisco is because we had all the tools in place," Cheney said.

He said the opening of The Star is the start of realizing the vision to bring destination dining to Frisco and creating the unique gathering place for everyone in the family.

"The new term in Frisco has become, when people are calling their friends saying we're going to meet for dinner, it's 'let's meet at The Star,'" he said. "That's what all this was about."

The "voice of the Cowboys" Brad Sham, who introduced Jones and Cheney, said the Jones family were committed to attracting the complex to Frisco, and Stephen Jones, Charlotte Jones Anderson and Jerry Jones Jr. are credited with convincing their father and mother, Gene, of the idea to create The Star.

Jones ...

"If you want customers to feel good, spend some serious money on the establishment and they'll know you care about them, and they will reward you," Jones said.

about it.

"When I first heard about this project, I was actually kind of pleased when I started hearing the rumors, but then when I saw the 70-foot (building height proposal) ... I totally object," said resident David Sutton.

His neighbor, Gary Anderson, said, "I know he said it's equal to a two-story building, which would be your neighbor's house, but it's not a neighbor's house, it's probably a big, brick, five-story building."

He also said the lead time was a factor and that given more time, he believes more residents would speak up. A common thread among the speakers was the time period they were given to learn more about the project.

Robinson said the city's 10-day requirement was observed in notifying residents, and signs were posted on the property according to the seven-day requirement. Roeder said he met with officers from the Mallard Lakes homeowners association on March 8, and said the president told him he sent notification to the residents after the meeting. It was unclear what correspondence they received.

"We have tried to be proactive in terms of getting in front of at least the officers of Mallard Lakes," he said.

Joy Palenzuela expressed her concern for flooding near her home as well as the wildlife in the wetlands.

"I'm concerned for the owls, the bald eagles, the coyotes, the birds, the bobcats, the beavers, the herons, the hawks – this is a huge piece of land that we see wildlife all the time and I love wildlife, but the thought of all of those wildlife in my backyard two doors down, I just think that you're completely taking all of

Roeder said the concept plan shows much of the property will remain open space with some cleanup-type improvements.

The commissioners were impressed by the efforts of the developers to address re-

you have here to preserve the open space," said Commissioner Pamela Smith. "I think it's very positive compared to what we could have seen happen already."

RECIPE OF THE WEEK

CREATIVE BREAKFAST

Ham and Blueberry Toast

INGREDIENTS:

- 3/4 cup cream cheese
- 1 cup blueberries, divided
- 4 slices sourdough bread
- 1 cup Smithfield Anytime Favorites Hickory Smoked 8-ounce Boneless Ham Steak, cooked and cut into cubes
- 1/4 cup pistachios
- 1/2 cup microgreens

DIRECTIONS:

In food processor, blend cream cheese and 1/2 cup blueberries until smooth.

Toast bread until brown. Spread with blueberry cream cheese mixture. Top with ham steak cubes, remaining blueberries, pistachios and microgreens.

Submit your recipes to be featured in "Recipe Corner." Email recipes@starlocalmedia.com.

Lee Roy Hinkle passed away on March 26, 2018 at the age of 85. He was born on September 19, 1932 to Lee Hinkle and Beulah (Green) Hinkle in Alamogordo, New Mexico. Lee Roy married Pearl (Richardson) Hinkle on August 30, 1953 in Waycross, Georgia. He served his country proudly in the United States Navy for 4 years in which he served during the Korean War on the USS Randolph. Lee Roy was a Railroad Engineer for over 44 years with Southern Pacific Railroad. He and Pearl moved to McKinney, Texas in 1965. Lee Roy enjoyed reading and going to the mountains in New Mexico. He

Hinkle of McKinney, Texas; daughters, Cherie Sanders and husband, David of Plano, Texas, and Pam Jones and husband, Keith of Plano, Texas; son, Dan Hinkle of Saginaw, Texas; grandchildren, Kelsey Knowles and husband, Brett of Houston, Texas, Dillon Jones and wife, Sarah also of Houston, Texas, and Austin Hinkle and wife, Elizabeth of Boyd, Texas; great-granddaughter, Leslie Hinkle; and numerous other loving family members and friends.

He was preceded in death by his parents, Lee and Beulah Hinkle.

A graveside service was held on Thursday, March 29, 2018 at Ridgeview Memorial Park in Allen, Texas.

Texas Department of Transportation

NOTICE OF PUBLIC MEETINGS

Proposed Improvements to US 380 from Denton County Line to Hunt County Line
Collin County, Texas
CSJs: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

The Texas Department of Transportation (TxDOT) is conducting a feasibility study for improvements to US 380 through Collin County, a distance of approximately 32 miles. TxDOT will conduct three public meetings to discuss and receive public comments on the proposed project. All three meetings will present the same information and will be held in an open house format with no formal presentation. Representatives from TxDOT and project consultants will be available to answer questions about the proposed project improvements.

The meeting dates, times, and locations are listed below.

Thursday, April 26, 2018	Tuesday, May 1, 2018	Thursday, May 3, 2018
6:00 p.m. to 8:00 p.m.	6:00 p.m. to 8:00 p.m.	6:00 p.m. to 8:00 p.m.
Sheraton McKinney	Princeton High School	Rogers Middle School
1900 Gateway Boulevard	1000 E. Princeton Drive	1001 Cok Road
McKinney, Texas 75070	Princeton, TX 75407	Prosper, TX 75078

The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or utilizing new alignments. Alignment options could require additional right-of-way to accommodate the project. Study data and maps showing roadway alignments options will be available for viewing at the public meetings. This information will also be available for public inspection Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. at the TxDOT Dallas District. Meeting information will also be available online at www.Drive380.com.

All interested persons are invited to attend any of these public meetings. Written or electronic comments from the public are requested and will be accepted for a period of 15 calendar days. Written comments may be submitted either in person at the public meeting, online, or by mail to: Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, or by email addressed to Stephen.Endres@txdot.gov. Written comments must be postmarked on or before Friday, May 18, 2018 to be included in the documentation of the public meeting. The public meeting will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as the need for an interpreter, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the public meeting. TxDOT will make every reasonable effort to accommodate these needs.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager:
TxDOT, Stephen Endres, P.E., Stephen.Endres@txdot.gov, (214) 320-4469

Meet the candidates

Two Frisco City Council seats and one Frisco ISD board of trustees seat are contested in this year's municipal election. The contested candidates are below with a brief description of their priorities.

COMPILED BY **LINDSEY JUAREZ** AND **NICOLE LUNA**

Frisco City Council, Place 1

*INCUMBENT

John Keating*

Occupation/experience: Frisco City Council member, former U.S. Army senior counterintelligence agent, entrepreneur, community volunteer

Top priorities: My personal priorities include providing [for] our first responders ... reducing the burden on the hard-working Frisco taxpayer ... continue to bring transparency and efficiency to our budgeting process and encourage participation from our community.

www.keatingforfrisco.com

Jason Money

Occupation/experience: biomedical executive and entrepreneur, Frisco Community Development Corp. board member, Leadership Frisco Class XIII graduate

Top priorities: I want local control and strong partnerships between Frisco's civic, business and education community to return to City Council's focus, while supporting staff to retain our efficient operations and smart planning.

www.facebook.com/moneyfrisco

K.D. Warach

Occupation/experience: civil engineer, licensed professional engineer, Frisco Board of Adjustments member

Top priorities: My priorities include managing our city's growth intelligently, solve Frisco's transportation problems, and to have a fair and balanced tax structure that lowers the tax burden for Frisco residents.

www.warachforfrisco.com

Frisco City Council, Place 3

*INCUMBENT

Dave Bowsher

Occupation/experience: director of inside sales for Williamson-Dickies Mfg. Co., multi-decade sales executive

Top priorities: 1. Managing the continued growth of Frisco
2. Lower the tax rate for Frisco's residents
3. Increase voter registration and voter turnout by condensing the election schedule
4. Make Frisco's city government more inclusive

www.daveforfrisco.com

Will Sowell*

Occupation/experience: Frisco City Council member, president and chief operating officer of Ingo Money, former chief operating officer of Green Dot

Top priorities: 1. No additional multifamily zoned unless part of a mixed-use development along a major thoroughfare
2. Keep a low tax rate
3. Continue to push solutions to traffic in Frisco

www.willsowell.com

Frisco ISD board of trustees, Place 7

René Archambault

Occupation/experience: deputy director at Southern Methodist University-Guildhall, FISD long-range planning committee, Frisco Education Foundation board advisory board

Top priorities: If elected, my top priorities will include expanding student opportunity both academically and in extra-curricular offerings across all campuses, increasing investment into our teachers and classrooms, and growing community engagement and transparency with taxpayers.

www.reneforfisd.com

Linda McConnell

Occupation/experience: Realtor, former Riddle Elementary School PTA president, Collin College Junior League member, former City House chairperson

Top priorities: We must safeguard our schools. Start providing true teacher support as they define it. Earn the trust of the community through transparency and fiscal responsibility.

www.votemcconnell.com

NOTE: JOHN CLASSE IS RUNNING UNOPPOSED FOR FRISCO ISD BOARD OF TRUSTEES, PLACE 6.

Written comments must be postmarked on or before Friday, May 18, 2018 to be included in the documentation of the public meeting. The public meeting will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as the need for an interpreter, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the public meeting. TxDOT will make every reasonable effort to accommodate these needs.

[illegible] for this project are being or have been coordinated by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager:
TxDOT, Stephen Endres, P.E., Stephen.Endres@txdot.gov, (214) 320-4480

Proposed Improvements to US 380 from Denton County Line to Hunt County Line - Public Meeting

Thursday, April 26, 2018

CSJs: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

The Texas Department of Transportation (TxDOT) is conducting a feasibility study for improvements to US 380 through Collin County, a distance of approximately 32 miles. TxDOT will conduct three public meetings to discuss and receive public comments on the proposed project. All three meetings will present the same information and will be held in an open house format with a formal presentation. Representatives from TxDOT and project consultants will be available to answer questions about the proposed project improvements.

The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or utilizing new alignments. Alignment options could require additional right-of-way to accommodate the project.

Study data and maps showing roadway alignments options will be available for viewing at the public meetings. This information will also be available for public inspection Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. at the TxDOT Dallas District. Meeting information will also be available online at www.Drive380.com.

Open house: 6:00 p.m.

Formal presentation: 7:00 p.m.

US 380 Feasibility Studies

US 380 Collin County Feasibility Study

Project Map

What is the purpose of the study?

Analyze potential roadway alternatives, including the existing alignment and new alignments, for US 380 through Collin County from the Denton County line to the Hunt County line.

What is a feasibility study?

A feasibility study is one planning tool that TxDOT uses when a project is in the very early stages of development. It helps determine if the project should move on to more advanced phases of project development such as more in-depth environmental analysis, public involvement, schematic design and right-of-way mapping.

- US 377 Widening from S of FM 1171 to Crawford Road
- US 380 Feasibility Studies
- US 380 from Loop 288 to West of CR 26
- US 380 from West of CR 26 to FM 2478
- US 380 From FM 2478 to Bois D'Arc Road
- SM Wright Project

determine if the project should move on to more advanced phases of project development such as more in-depth environmental analysis, public involvement, schematic design and right-of-way mapping.

The reason this type of study is done is to identify high level or critical elements of engineering, impacts to stakeholders and the public, and the economic feasibility of potential new roadways or improvements to existing roadways.

Feasibility studies are not intended to result in detailed design, environmental analysis, or cost estimates.

What will be evaluated in this feasibility study?

The study team will consider projected regional traffic, existing and planned developments, stakeholder input and the impact on the economy and environment.

What are expected project milestones?

Summer 2017 – Study begins

Spring 2018 and Late Summer 2018 – Public open house meetings will be held to discuss the project and gather feedback from the public

Fall 2018 – Project implementation plan finalized that would include a recommended alignment(s)

*Please note that the project schedule is subject to change.

Why is the study being conducted?

The County is growing…

The population of Collin County is projected to grow from just under 800,000 people (2010 Census) to over 3.8 million people in 2050, according to the Texas Demographic Center.*

*Assume the 2000-2010 Migration scenario for 2014 Texas Population Projections

More and more land in the County is being preserved for developments.

The study team is working with Collin County and cities in the study area to identify land which has been purchased and right of way that is preserved for existing or future planned residential or commercial development. As the County's population grows, the options to build a new roadway or expand the existing US 380 become more limited and potential impacts to residential and commercial developments increase. The feasibility study will identify a roadway alignment or alignments to serve as a blueprint for City staff to begin preserving land now.

When will construction begin?

There are many steps that must be completed after this project before construction could begin such as a more in-depth environmental analysis and public involvement, schematic design, right-of-way mapping and detailed roadway design.

Your input is important in shaping the future of US 380 and Collin County. Click here to receive project updates and notifications of public meetings/hearings.

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- ❑ I am employed by TxDOT
- ❑ I do business with TxDOT
- ❑ I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Subject: US 380 Feasibility study question

Hello Stephen – I have a question regarding the new corridor alignment options being proposed and out for public comment. More specifically, I want to ask if there are currently any changes proposed at the intersection of US 380 and Coit Rd. in Prosper?

In reviewing the 5 different alignment options, it appears there aren't any changes proposed to that intersection at this time, but not sure if existing Right of Ways will be widened or if there is a potential alter the interchange there.

Thank you.

SHOP cos. OLV.

Subject: Drive 380 Survey -- Questions

Good morning,

I have been reviewing the various materials posted on the Keep It Moving Dallas site related to the US 380 feasibility studies/Collin County.

Before I complete the survey, I have a few questions:

Blue and Yellow Route Options

1. Would these proposed options connect with existing US 380 at Stonebridge Drive?
2. If so, would the traffic light remain in place at the intersection?
3. What is the expected impact on the traffic count on Stonebridge Drive?
4. What noise abatement techniques will be used to minimize the traffic noise in the three LaCima neighborhood communities?
5. What techniques will be used to reduce and/or eliminate light pollution impacting the Villages at LaCima and the night sky along the updated US 380?
6. How would such a connection impact the entrance to Stonebridge Ranch and the environment in/around Lake LaCima?
7. Would there be any changes to Stonebridge Drive within the Stonebridge Ranch community?

Red Route Option

1. What is the expected impact on the traffic count on Ridge Road?
2. What noise abatement techniques will be used to minimize the traffic noise along Ridge Road and the surrounding neighborhood communities?
3. What techniques will be used to reduce and/or eliminate light pollution impacting the neighborhoods along Ridge and the night sky along the updated US 380?
4. Would there be any changes to Ridge Road within the Stonebridge Ranch community?

ROW Preservation/Acquisition

1. Would the land use planning and purchase process include use of eminent domain?
2. With new alignment of existing US 380, how will expansions impact environmentally sensitive areas and those controlled by the Corps of Engineers?

Thank you for your pending responses and for including community feedback in the planning process.

Amanda D. Batson, Ph.D.

After reviewing the 5 available plans, the only one that I didn't like was the "Red" plan. The Red plan appears to ~~affe~~ impact more homes negatively than the other bypass options. I am also in support of a bypass option over a construction project along 380 as the disruption to an already terrible traffic situation would be compounded by construction, a growing population, and current business development.

I have been involved in 3 major traffic collisions on 380, one of which required me to take an ambulance to the E.R. In each collision, I was stopped at an intersection and waiting for the light to change. Please choose byway option "Blue" or "Yellow" and start building sooner rather than later.

Please Print SINCE 1981, MY FAMILY HAS OWNED AND FARMED A PIECE OF LAND THAT WOULD BE CUT IN HALF BY THE RED ALTERNATIVE AND WITHIN A QUARTER MILE OF THE YELLOW ONE. THE LITTLE FARM IS OVER 350 ACRES WITH THREE HOUSES. IT WAS THE FIRST CERTIFIED ORGANIC FARM IN COLLIN COUNTY AND IN THE FIRST CLASS OF CERTIFIED ORGANIC FARMS IN TEXAS. WE HAVE RAISED ORGANIC CATTLE, PIGS, SHEEP, CHICKENS AND TURKEYS, THERE IS AN ORCHARD AND 100 YEAR OLD PECAN TREES. IT WOULD BE IMPOSSIBLE TO CONTINUE TO FARM WITH A HIGHWAY DEVIDING IT IN TWO. TWO OF THE HOUSES AND THE PECAN GROVE ARE IN THE DIRECT PATH. WE STRONGLY FEEL THAT THE RED AND YELLOW PROPOSED IMPROVEMENTS TO US 380 WOULD DESTROY WHAT OUR FAMILY HAS WORKED FOR OVER 35 YEARS TO CREATE. THANK YOU FOR CONSIDERING THESE COMMENTS IN YOUR DECISION.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

I live at 1984 CR 338 McKinney. My husband and I have been there 30 years. Our property is special - there is lot of wildlife, a historical graveyard, the Old Bonham Trail runs north to south through our property. We intend to live there another 30 years.

Please - We don't want the yellow alignment - it runs along the entire south side of our property - it would destroy our peace and quiet and the value of our land. Also we don't like the red alignment - it would destroy the neighbourhood.

Please Print For 35 years our family (now 3 generations) has farmed 350 acres northeast of McKinney using strict organic methods, reclaiming land that had fallen fallow from years of cotton. When my mother established The Little Farm in 1981, she was well ahead of her time, certifying the farm as organic, first of its kind in Collin County and among the first in Texas. Over the years, she has raised organic chicken, cattle, pigs, bees, sheep, turkey and pecans. Her gardens and orchard produces a wide variety of organic vegetables and fruit. The land, barns and 3 houses represent a remarkable place that we hope to preserve.
The red option of the proposed 380 expansion would divide the property and destroy the farm as it now exists. The yellow option brings the highway very close to one of the houses (currently occupied). I strongly oppose these alternatives and hope you will seriously consider the impact of the red and yellow plans when weighing the feasibility of all the alternatives proposed to accomodate the incredible growth of the area.
Thank you.

Please Print I'm a resident of Tucker Hill — My position is NO to all alignments due to potential loss of homes & devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding my recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible, west of future Stonebridge, not on or bordering Tucker Hill.

PUBLIC COMMENTS

MR. BARRY SANGAN: My name is Barry Sangan, and my address is [redacted]

My opinion regarding the alignment of US 380 is the blue route on the map that I can see, which it goes from the Custer Road to Bloomdale and it goes past the 75 and it comes down before New Hope, that's the best route that I can think of.

If you want to contact me, my number is [redacted]

Please Print I am currently the owner of approximately 1 mile of frontage on US Hwy 380 between Coit & Preston Roads. It is my opinion that the Right-of-Way should be acquired as soon as possible before the City of Frisco requires only a 65' reservation strip when properties are being proposed for development. Should these projects be constructed, it will cost more money to buyout businesses, leases and demolish structures for any future road improvement. I am also currently in the process of having Hillcrest designed but am concerned that any infrastructure at the intersection of La Cima (Prosper) / Hillcrest (Frisco) and Highway 380 will be torn out, subsequently wasting existing infrastructure & money. Keep in mind there are no alternative routes proposed for this section of Highway 380.

Please Print My concern is there is no coordination between this plan or project and other infrastructure improvements in the area (ie. widening Custer / 1ST Street Prosper / Princeton Trails) - all I was told is they are separate projects as is the "Outer loop". I know each must play out one its own but what the consumer needs to know is the big picture. And that when one is done the next one doesn't require redoing - more inconvenience and $$.
If pressed I would be in favor of the Red plan but really need more info.

Please Print

I WOULD WELCOME THE PINK & GREEN ALIGNMENT AS THE OTHER ALIGNMENTS GO RIGHT NEXT TO MY HOUSE IN HEATHERWOOD. THE OTHER ALIGNMENTS ARE GOING TO DEVALUE PEOPLES HOMES AND CAUSE NOISE POLLUTION. IF THE CITY KNEW THIS BACK IN 2009 WHY ALLOW HEATHERWOOD TO EXPAND UP TO BLOOMDALE RD.. THIS IS A TRAGESTY FOR THOSE PEOPLE THAT LIVE IN ALLENS NORTH OF 380. NOT ONE SOLUTION TALKS OF USING THE OUTER LOOP WHICH WOULD BE THE BEST OPTION.

I am a resident of the Timberridge Neighborhood. I am AGAINST both Red & Blue Plans.
Both plans put us within a very close proximity to 380, both endanger the children of Prosper's future Highschool. They also do little to aid in traffic relief west of Custer on 380, which is extremely busy and congested. The "curve" of both the red and blue plans that connect the road to the current 380 seems premature.

Please Print Any alignment that deviates from the basic route of the current 380 is very unwise and likely to lead corruption in the purchase of right-of-way and land around those deviations. Stick to fixing the lanes and leading some cows pockets

Access roads need to be built on both sides of any proposal. It is much harder to retro-fit service roads after the fact. Review the Redbud expansion with retro-fitting attempts on US Hwy 280 in Birmingham, Alabama for a very similar situation as you have w/ Hwy 380.

NAME: Sheartha Parker

ADDRESS: [redacted]

CITY: [redacted]

From: Bridgette [redacted]
Sent: Wednesday, May 02, 2018 7:44 PM
To: Stephen Endres
Subject: 380 Questions

Mr. Endres,
I was at the Sheraton presentation and I saw your presentation (I think it was you) at the McKinney City Council Work Session. I have a few questions for you that I hope you or someone else can answer for me.

McKinney only:
Is there a map that shows the ROW you've got now through the whole McKinney section of 380? If so, can I get it? If not, you must have some sort of list somewhere that would tell us this?

Can you then tell us the ROW you'd need to stay on 380 for either of the the freeway options (I think pink and green)?

At the CC work session on Monday, many points were made about there being no issues of ROW on the west of McKinney, just on the east? I'd like the above information to check on the accuracy of those statements and to find out exactly where the issues on the 380 would be.

Since McKinney CC made it appear they were fine with an elevated option, is that something you'd consider at this point?

Lastly, we have real safety issues on the 380 right now, what can be done in the short term to help that situation since it looks like any of these changes will be about 10 years away?

Thank you for your time,
Bridgette Wallis
McKinney resident

Please Print THE DISAPPOINTMENT I FEEL IN THIS SITUATION IS BEYOND DESCRIPTION. IN 2017, MCKINNEY REVISED THE SAME ALIGNMENTS ALONG CR 123, WHERE I RECENTLY BUILT MY FAMILIES FOREVER HOME. AT THE TIME, MCKINNEY TABLED THE "BYPASS" OPTION, LEAVING, THE DECISION TO TXDOT IN THE PROPOSALS TODAY (04/26/18), IT IS CLEAR THAT TXDOT IS MERELY PICKING UP THE BYPASS OPTION (3 OUT OF 5 PLANS) AND LEADING THE WAY WITH IT. THIS DECISION IS APPARENT! THE LACK OF CONCERN BY BOTH MCKINNEY ENGINEERS & TXDOT ENGINEERS IS APPALLING. I GUESS IF IT ISN'T IN YOUR BACKYARD, THEN IT DOESN'T MATTER! I WOULD APPRECIATE ANY CONSIDERATION FOR ALIGNMENTS THAT DON'T AFFECT RESIDENCES. THE BYPASS ONLY BENEFITS BIG BUSINESS!

The Texas Department of Transportation is seeking your comments on the proposed project. All written comments are welcome. **All written comments must be postmarked by May 18, 2018.**

Please Print Living in the 380 corridor for 11 years I have seen its evolution over time. I have also seen congestion increase exponentially as the development has just recently started to really arrive in this area. While a blue route alternative seems the least disruptive to current development along 380, my concern is that it will not do enough to alleviate traffic from roughly Stonebridge Dr. to 75. The majority of traffic now turns south at 75 with backups onto 75 (coming from the opposite direction) several hours per day. Thousands of homes and businesses are still left to be built in this area that a bypass route would not help. While much of the future development north of the bypass would benefit, it seems the traffic along this section would still be way beyond its current capacity. I support a blue route alignment along with additional enhancements along this part of 380 especially around the intersection of 75 and 380.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- ☐ I am employed by TxDOT
- ☐ I do business with TxDOT
- ☐ I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Please consider "NOT" making All options as a Freeway Right in front of Princeton Lakes on 380 Right before Lake Lavon - This is a high priced luxury neighborhood w/ Private Ski Lakes & it will drastically reduce our home values & quaint neighborhood -

If you do - We will need access to cross 380 to go West as We Cannot Cross today -

As a resident in rural north Princeton / Northeast McKinney, the proposed yellow route seems to be ideal for the area. It appears to impact existing residential areas the least, using more agriculture land than the other routes. It would also provide better access to the metroplex for rural northern Collin County residents.

Please take online survey at:
www.SURVEYMONKEY.com/DRIVE380

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

NAME: Dana Hagedorn

ADDRESS: [redacted]

CITY:

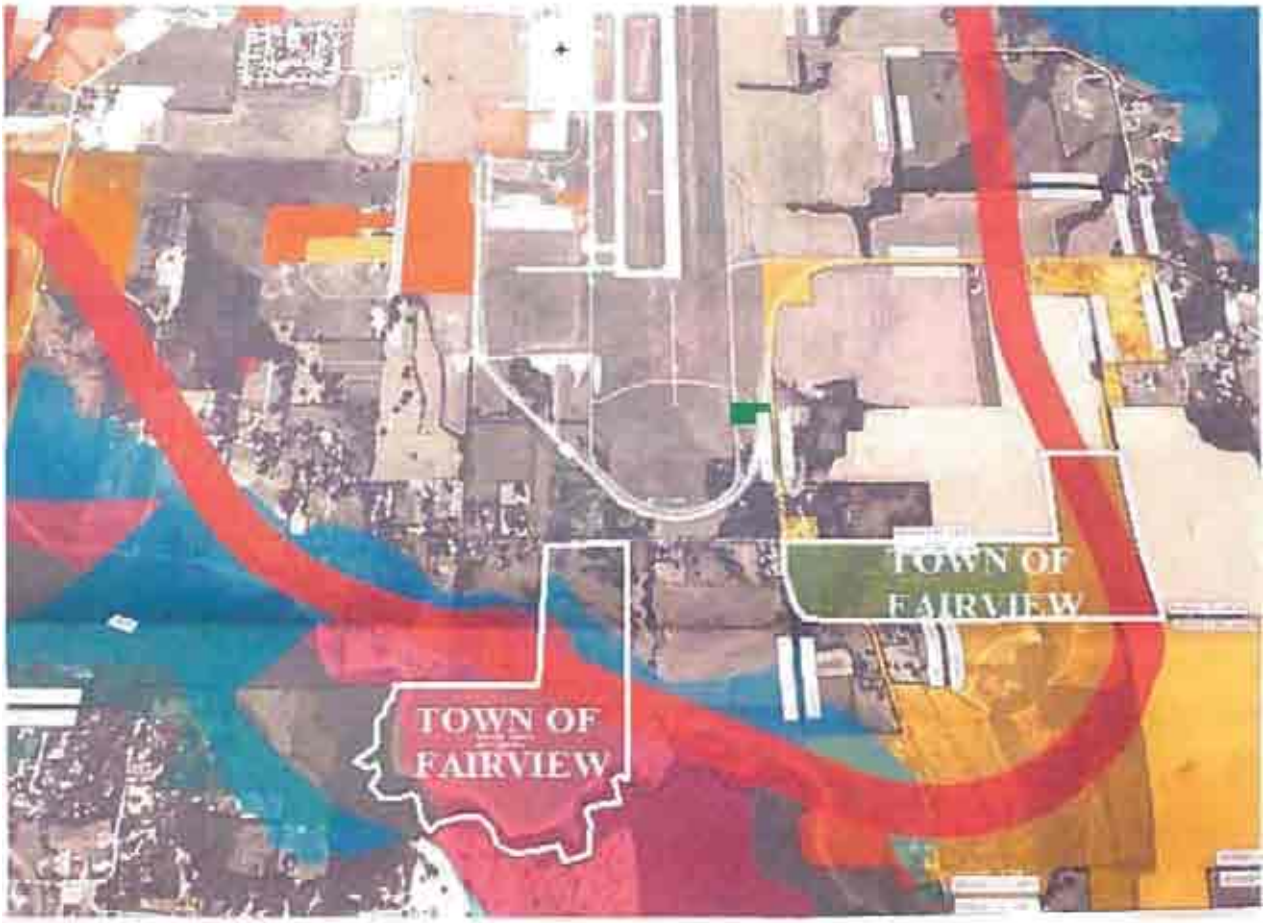

372 Town Place • Fairview, TX 75069 • Town Hall 972-562-0522

May 18, 2018

Stephen Endres, PE
CSJ 0135-11-022, US 380
4777 E. U.S. Hwy 80
Mesquite, TX. 75150-6643

Dear Mr. Endres,

This letter serves as an official letter of opposition to the red route to Spur 399 East and South of the McKinney airport by the Town Council of the Town of Fairview, as acted upon at the May 1st, 2018 Town Council meeting. A unanimous vote was cast to oppose this portion of the red route for the following reasons:

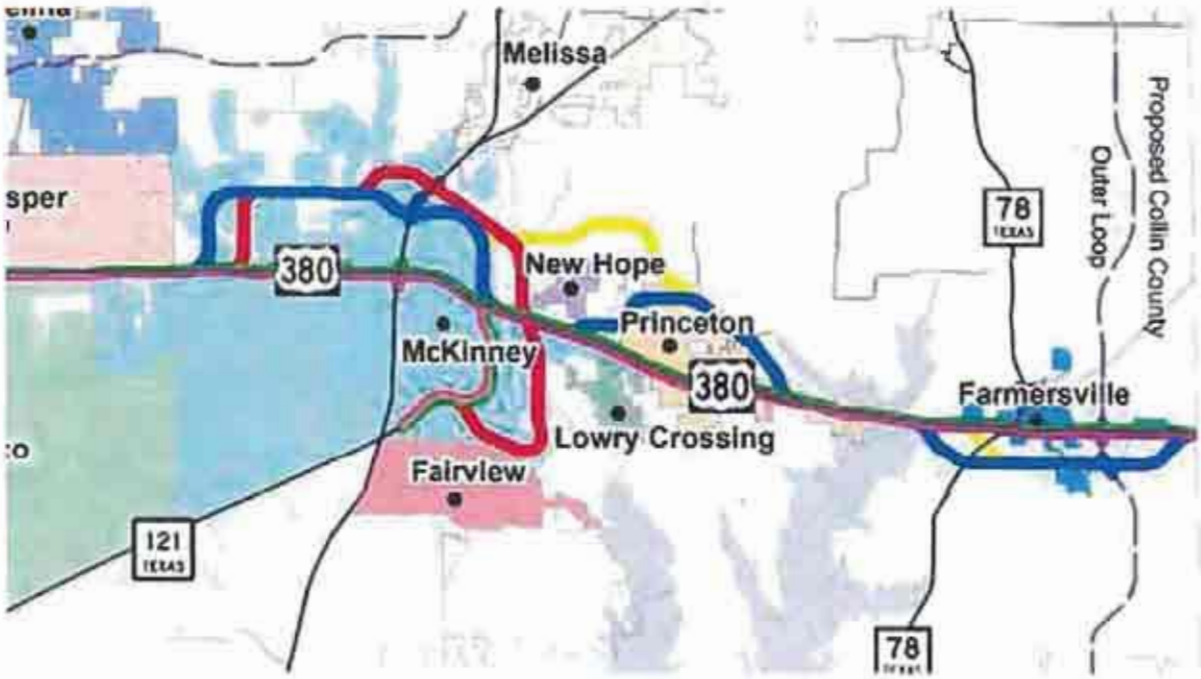

This route potentially impacts two tracts of land owned by the Town highlighted in white, an 83-acre tract that is currently designated as a nature preserve in the town's master plan, and a 76-acre tract that is master planned for a soccer complex. Trails are planned on the 83-acre parcel and phase 1 of the soccer complex exists on a portion of the 76-acre tract.

Additionally, since this route is proposed within the Wilson Creek floodplain, the proposed roadway would require elevation. An elevated roadway would contribute noise pollution that currently does not exist to our residents on the south side of Wilson Creek. While we trust that the necessary environmental studies will be conducted, the impacts to the environment are also of concern.

We are opposed to any portions of the red route North of the existing US 380 if they contribute to the necessity of this route south of the airport.

It's apparent that the need of Westbound US 380 traffic to connect to Spur 399, SH121 and US 75 are not contingent upon this southern red route, as demonstrated on all 4 of the other proposed routes. The red route around the airport to the east would add significant length and cost to the road that would not be incurred with the other 4 alternatives.

Neighboring towns, such as Fairview, should not be forced to bear the brunt of a lack of previous planning for the US 380 corridor. It appears that the airport is driving some of the routing decisions. A new elevated roadway south of the airport, in conjunction with the airport, would simply add to more quality of life issues for our residents.

Thank you for your consideration of our concerns.

Sincerely,

Darion Culbertson, Mayor
Town of Fairview

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- ☐ I am employed by TxDOT
- ☐ I do business with TxDOT
- ☐ I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

We just bought a new home in Tucker Hill. Any alignment that widens the existing 380 and cuts into the Tucker Hill neighborhood is completely unacceptable. An option such as the "blue alignment" that does not disturb Tucker Hill is the only viable choice. Tucker Hill is the crown jewel of McKinney and it must be protected.

Please Print I feel that anything but biting the bullet now and widening 380 will be a temporary fix. The impact of not doing so will be disasterous. It could provide some relief but in the end I think even 380 do business owners would agree that diverting traffic around the area would only hurt Mckinney. Moreover, the northern alignments would completely change and destroy the only country living left in the great city of Mckinney.

1. To what priority does TxDOT place the number of people disadvantaged by the various alternatives or is it based upon only right of way costs?

2. Bypass alternatives appear to be the least disruptive to the character of McKinney, i.e converting 380 to a freeway would completely change the character of McKinney.

3. If the purpose is to make traffic around or thru McKinney, the bypass alternatives seem to accomplish that at the least cost & less right-of-way acquisitions & fewer people are disrupted.

NAME: ELLEN LANDEL

ADDRESS: [redacted]

CITY:

I live in Tucker Hill and would be directly affected by all 5 alignments as presented. We moved into this neighborhood in November, 2016 and two months later started to hear rumblings about 380 being turned into a Limited Access Freeway. My husband and I were shocked and very dismayed as we chose this neighborhood because it is truly unique to all of north Texas. If you have never been to Tucker Hill you should visit it and realize its one-of-a-kind nature. Every home has a very prominent front porch which allows us to sit and "meet and greet" our neighbors as they walk by. There is a true sense of community which I have not felt in any of my previous neighborhoods. Our home is close enough to 380 that if a freeway were constructed we would end up with a sound barrier so close to our driveway I would have to be careful not to run into it as I backed out of my driveway. That is not at all what we want for this neighborhood or for the value of my home which I love. Tucker Hill's position is to say NO to all alignments as currently presented due to loss of homes and home valuations and the adverse effect to overall quality of life. There are ways to improve 380 from Preston Road to 75 other than a freeway (widen where necessary utilizing the current grassy median and at major intersections use grade separation flyover lanes, build right turn lanes at all turnoffs, etc.). Improvements on 380 and the build out of Wilmeth and Bloomdale to six lane arterials as well as widening all of the north/south routes north of 380 would go a long way to help the flow of traffic. It is up to Collin County planners to begin the transformation of these highways BEFORE they allow the rate of growth as predicted.

Thank you for your consideration: Ellen and Richard Lande[redacted]

Subject: 380 Project - Alignment Options

Stephen and Tony, hope you had a great weekend. I'm a Tucker Hill resident and last week I spoke to each of you on the phone and also at the Prosper meeting.

As you know we as a neighborhood have been conducting many neighborhood meetings and discussions and one alignment we have been discussing in detail is the pink option (which I believe favors our neighborhood more than the green alignment) along the current 380 path.

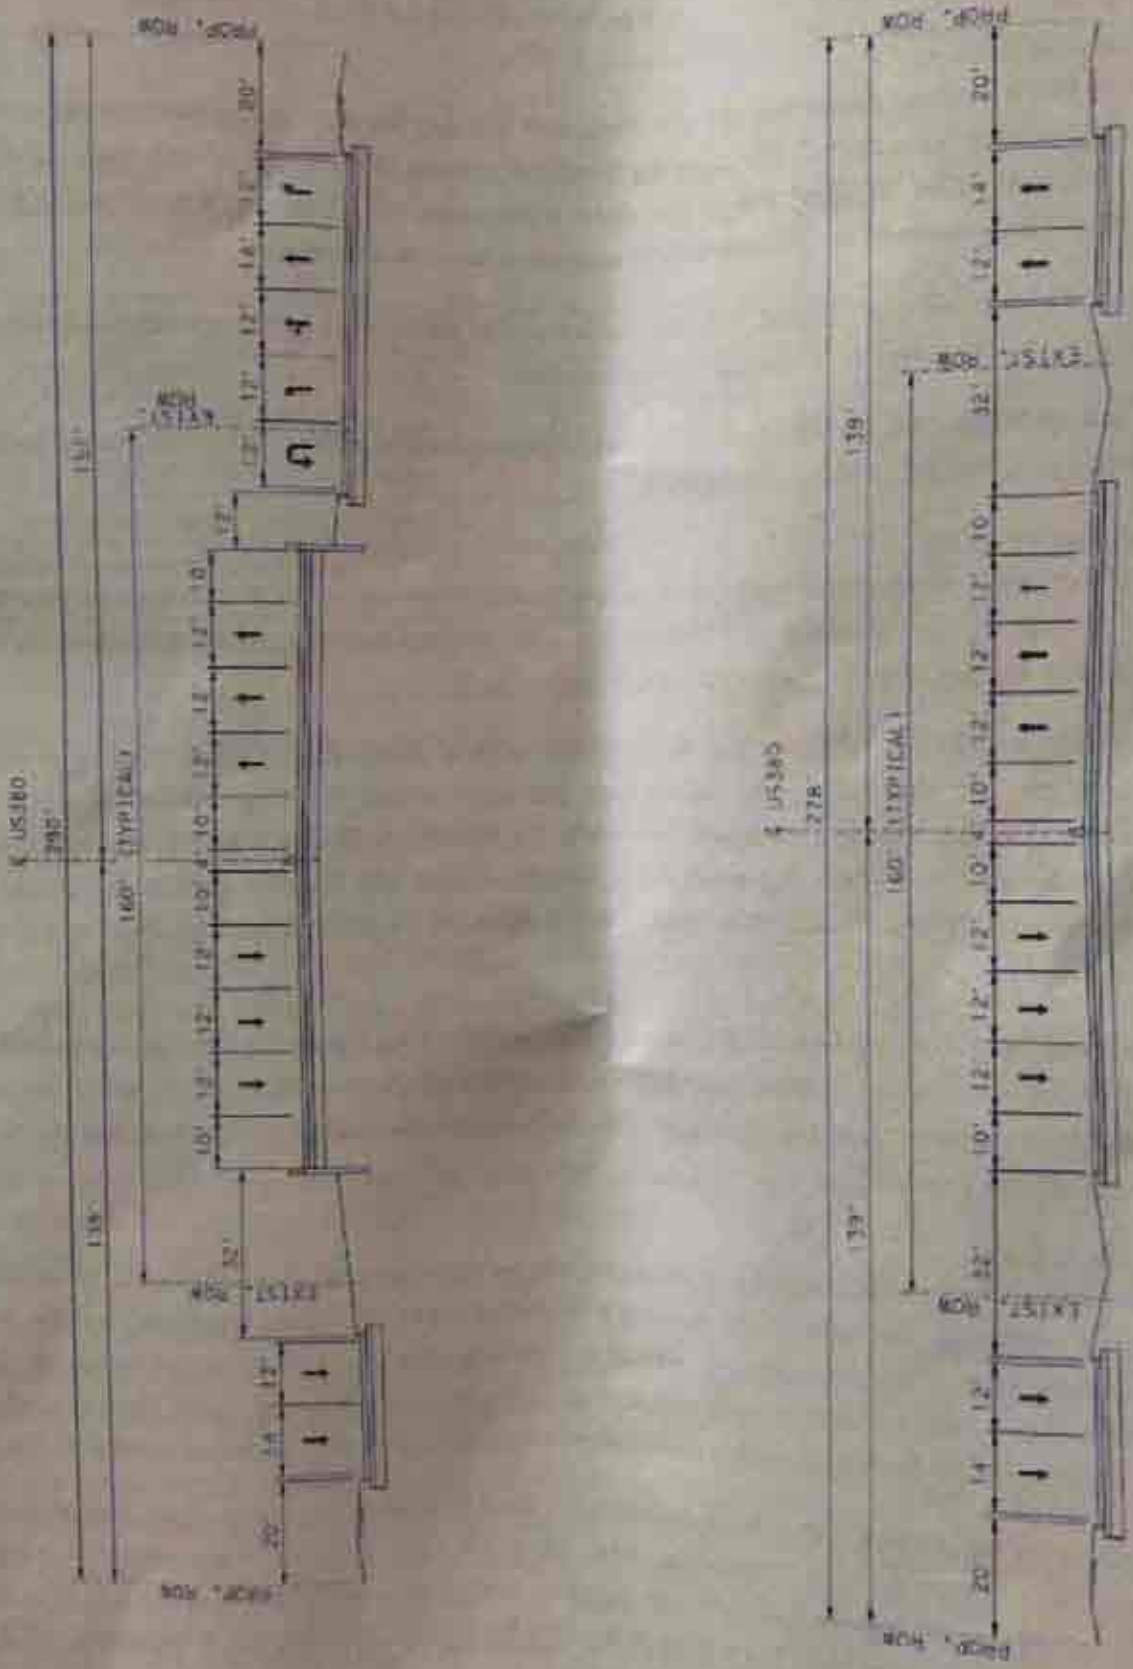

With that said, Tony one thing you and I discussed was options around a depressed, elevated or grade level highway in certain areas along 380's current path. We as a neighborhood have been discussing the possibility to have 380 depressed along Tucker Hill. Is this an option? If so, what is the minimum footprint in that option and is there a way to get a high level sketch of what that might look like.
Another question I have is regarding the feasibility study that was done in August of 2016. In that study there were a couple of things that stood out.

1. The projected traffic growth numbers along 380 didn't change much at all in the long term plan through 2040. So we are curious what changed in the last couple of years to now project the dramatic growth along 380?
2. There is a schematic (see attached) in that presentation that showed the 6 line divided highway with service roads and in that drawing it appeared to be 290ft in width. I know the lines current depicted in the 5 proposed alignment represents 400ft. What changed there?

Thanks,

Eric Sellinger

We live in Walnut Grove (Coster & 380). We are living in our "forever home." We are in our late 60's and early 70's. We are too old to start over. Ever since the bypass has come up, we feel like we have a cloud over our head. There are homes for sale in our neighborhood for the first time in years that haven't sold. Our property values have decreased. It is not fair.

My wife and I live at 1984 CR 338 + have a home and llama rescue farm there. We have lived there 30 yrs and hope to build our dream home and spend the rest of our lives there. Both our parents lived there with us before they passed away - it is like heaven there. High on a hill overlooking the creek and pecan grove.

We cannot accept either the yellow or the red alignments because they would destroy the peace and quiet of our neighborhood + affect the local flavor of our area - the graveyard, creek, reservoir, horse farms + such. Please - we've lived there + want to die peacefully there.

I prefer the Blue or Yellow plan. We need to direct traffic North and East from the current 380.

I believe that widening the current 380 would be a disaster.

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

Subject: meeting comments: 380 bypass options

Dear Mr. Endres,

I believe you are the gentleman with whom we spoke at the meeting in Prosper last Thursday, 3 May. I wanted to submit my comments, as you suggested. First of all, thank you for your time. I now understand why you were so knowledgeable about the entire project!

We strongly favor keeping the construction within the current 380 corridor, and not extending it north or south of 380.

We live in Phase 4 (the newest, most northern and western section) of Heatherwood, McKinney, which is directly adjacent to CR 123 (Bloomdale), included in three of the 380 bypass proposals. We moved to McKinney in January of 2016, to what we planned would be our retirement home, after a two year search of the DFW metroplex. We chose this location specifically because it was 1.5 miles north of 380, avoiding traffic noise and urban development. These are NEW (two years old) homes at a high cost per square foot. I specifically asked my Highland builder's representative when we looked in this area what, if anything, was planned for CR123. She stated it was privately owned farmland, with no plans for further development.

County Road 123 (Bloomdale) currently provides a "country feel" and atmosphere. An entire new area, "Bloomridge," is currently under construction directly west of Phase 4 of Heatherwood, just beyond the greenbelt. Bloomridge will likewise be directly affected negatively by the blue, yellow, and red proposals. This effect will be not only traffic noise, but property value. Many people who live here "retired" here for the nice environment this area of McKinney offers.

PLEASE don't decimate our home value and really pleasant country atmosphere here off Lake Forest/Bloomdale.

Sincerely,

Grace (and James) Rooney

Oppose the blue alignment as will be too close to a neighborhood, over a pond that is suppose to be zoned for wetlands. A Park that the city has spoken about per planning and zoning meeting. Lake at Community of Bloomdale could be damaged as dam has breach issues.

I am against all options that move 380 outside its current corridor, I bought property 2 miles North of 380 because I knew 380 might be widened Some day and I didn't want to be effect by it, its noise or its pollution. My 5 AC. farm would be completely destroyed by all loop + bypass options.
Please do Not move 380 from its current routing. My vote is to do Nothing other than improve the current corridor (Pink + green).

Subject: US 380 Freeway

Stephen,

At the Monday, May 14th Collin County Commissioners Court meeting, Judge Self requested that TxDOT include the attached alignment (Another Option, May, 2018.pdf) in TxDOT's study. On April 20, 2016, Judge Self sent the attached letter (1-Letter from Collin County.PDF) to the Mayor of Prosper. In the letter was a map depicting the US 380 corridor along the current alignment. In response to the letter, the Town Council of the Town of Prosper approved the attached Resolution (..... – RES 17-29 – 4_11_2017.pdf), supporting the LAR's through the Town of Prosper from FM 1385 to Custer Road, in its current alignment. The Town Council does not support any alignment that would deviate from the current alignment of US 380 within the Town's corporate limits. I believe you have heard this before in previous meetings with the Town, but I wanted to provide you with documentation to reiterate this point in response to the request made at the May 14th Collin County Commissioners Court meeting.

If you have any questions, comments, or concerns, please let me know.

Thanks,

Hulon T. Webb, Jr., P.E.

Ms. Raglon,

My name is Isaac Neal and I live in Princeton. I was unable to attend the community meetings regarding the alignment of the 380 project. Were there any close up maps that would show how far the green and pink alignments would extend throughout the city? I live in the Cypress Bend community and just wanted to know how close 380 could possibly be moved toward my house.

Thanks,
Isaac Neal

Please Print My wife and I have lived at our current home since 2003. We are in our 70's and I am a Veteran. We've experienced the growth and seen 380 expanded to 6 lanes. During that expansion TxDOT put sound barriers behind our neighborhood. Now the sound barrier and our quality of life are being threatened. We live on a section of 380 that is heavily populated with homes and apartments. We don't have a unified voice like some of the vocal groups and land owners – but I think TxDOT needs to consider how many families will be affected in our area.

Please consider us and if this expansion must happen – choose a by-pass that will take 380 west of Stonebridge Dr. Like the blue or yellow.

Subject: Texas Clear Lanes - Thursday, May 3, 2018 - 10:02:23 AM

Name: James Petrey

Email: [redacted]

Message: Please fasttrack the widening of US380 between Denton and Mickinney with the overpasses that are listed in the current project. This should have been started several years ago as the population growth has exploded on US380.

Also the center turn lanes thoughout the state should be abolished and never used again as they are unmanageble by law enforencement and due to misuse and disregard to traffic laws are a constant source of injury or death almost daily.

QC # 85

Tucker Hill's position is NO to all alignments due to:

1) potential loss of homes
3) devaluation of our neighborhood as a whole
2) adverse environmental and health implications

Notwithstanding our NO recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway, sound barriers, and extensive landscaping for aesthetics.

NO bypass option is acceptable!

TxDoT must incorporate the City of McKinney's overall plan into their analyses and building timeline before further decisions are made. The 380 project appears to be an independent project from the outer loop and expansion/widening of other East-West roads (e.g., Wilmeth, Bloomdale, Frontier). Without a comprehensive plan in close coordination with McKinney the current 380 options are shortsighted and may even worsen the problem.

TxDOT should keep 380 in the same footprint. Keep the freeway where it was originally designed to be.

Bypass options should be off the table. People bought homes based on the McKinney published plan and a bypass was not on the plan.

POSITION PAPER

TXDOT Collin County US 380 Feasibility Study

Background

The Texas Department of Transportation (TxDOT) is conditioning a feasibility study for improvements to US 380 through Collin County. The study will analyze potential roadway alternatives, including the existing alignments and new alignments for US 380. This paper will focus on and discuss the five (5) preliminary alignments proposed through the City of McKinney which were presented in public forums and the McKinney City Council.

Preliminary Alignments

Pink and Green Preliminary Alignments

A combination of the Pink and Green Preliminary Alignments should be adopted as the preferred alignment and move on to more advanced phases of project development.

Key Factors supporting adoption of US 380's current alignment as the preferred option for a limited access highway or freeway are:

- Engineering Analysis - US 380's current alignment would likely receive a higher Engineering Service Level Rating than the other preliminary alignments. One major consideration is the freeway corridor would extend from Custer Road on the west to Airport Road on the east without a major curve or bend. The project's engineering design may have what some would describe as significant issues, but the issues are not insurmountable.
- Traffic Analysis - Traffic will be able to flow freely through McKinney at freeway speed, and, at the same time, adjoining communities will make McKinney's commercial corridor a destination. Traffic will also be reduced on service roads as local traffic travels from one end of the commercial corridor to the other using the freeway. A prime example where local traffic can travel on US 75 from US 380 to Eldorado Parkway, and points in between, to shop in McKinney bypassing the service roads and major intersections.
- Safety and Crash Data - A freeway corridor will provide significant safety improvements with no signalized intersections. Service road traffic safety will also

benefit for no left turns or u-turns to reach commercial businesses along University Drive (US 380).

- Right-of-way requirements - The existing US 380 right-of-way is between 130 to 180 feet. The preliminary requirements for a freeway with two lane service roads is between 350 to 400 feet. The additional right-of-way is estimated to be 220 feet. The right-of-way requirement can be drawn from the north or south side of the current alignment, and should take into consideration the adjacent property's current use and condition. For example, east of US 75 the majority of the acquired right-of-way could come for the north side of the highway where fewer residential properties would be impacted.
- Residential and Commercial Developments - Residential properties adjacent to the new alignment east of US 75 may enjoy higher prices as those properties turn commercial and provide a buffer for the residential neighborhood to the south.
- Social and Community Impacts - The social and community impacts will be significant during construction. However, the long term impacts are significant with improved mobility, commercial development along the corridor and its related tax base benefiting the City of McKinney and its residents.
- Environmental Impacts - Properties adjacent to US 380 will experience a reduction in traffic noise and pollution with a limited access highway. Vehicles will no longer be starting and stopping at traffic signals. There may be an incremental increase in traffic noise that can be mitigated with noise reduction strategies similar to the sound wall on the south side of US 380 east of Stonebridge Drive. The majority of the property adjoining US 380 is commercial or under development as commercial property where noise has minimal impacts.
- Cost and Economic Impact - The cost to build the Pink and Green preliminary alignment is significant. However, the significant accompanying benefits deliver the best investment for addressing McKinney's safety and mobility issues along with the long term needs of the community.

<u>Blue, Red and Yellow Preliminary Bypass Alignments</u>

The Blue, Red and Yellow Proposed Bypass Alignments should all be rejected as a preferred alignment.

Key Factors supporting the rejection of the three proposed bypass alignments for a limited access highway or freeway are:

- Engineering Analysis - ***Negative Impact*** - The Blue, Red and Yellow Proposed Bypass alignments through the City of McKinney would likely be assigned a lower

Engineering Service Level Rating than Green and Pink alignments. A lower service rating for the bypass alignments will require lower speed limits to levels closely matching University Drive (US 380).

- Traffic Analysis - ***Negative Impact*** - Traffic will be able to flow freely through McKinney, but less than freeway speed (See comments in Engineering Analysis). During heavy traffic period slowing to negotiate bypass curves, traffic may jump on the service roads to move more quickly. The bypass alignment may also impose additional traffic on Prosper Trail and Frontier Parkway as drivers discover the short cuts from Preston Road to the bypass at Bloomdale west of Custer Road and continue on to US 75. The short cut will avoid the signaled intersection at Preston Road and US 380.
- Safety and Crash Data - ***Negative Impact*** - A freeway corridor will provide significant safety improvements with no signalized intersections. However, a lower Engineering Service Level Rating will be required to reflect the risk crashes related to the Bypass design. The increased traffic imposed on Prosper Trail and Frontier Parkway may also increase safety risk to the Town of Prosper residents between Preston Road and the proposed bypass (see Traffic Analysis). Finally, the bypass proposals do nothing to address the negative traffic safety and crash impacts related to left turns and, in limited cases, u-turns as drivers attempt to ingress and egress commercial establishments along University Drive.
- Right-of-way requirements - ***Negative Impact*** - The preliminary requirements for a freeway with two lane service roads is between 350 to 400 feet. Unlike the incremental impacts associated with the Pink and Green preliminary alignment, the bypass proposals negative impacts are transformative (see Residential and Commercial Developments).
- Residential and Commercial Developments - ***Negative Impact*** - Existing neighborhoods will be transformed by the negative impacts imposed on the peaceful and tranquil family homes. These properties experience highway noise that never anticipated when they acquired their property. It will also transform the plans for the development of residential properties with high density projects adjacent to the proposed bypass right-of-way. Commercial development may occur along the development, but at the expense of commercial properties and business along University Drive.
- Social and Community Impacts - ***Negative Impact*** - The social and community negative impacts will be significant. Again, unlike the incremental changes imposed by the Pink and Green preliminary alignment, the changes along the bypass right-of-way will be transformative. In addition to the transformation of the properties adjacent

to the proposed bypass right-of-way, neighborhoods will also experience a transformation. In some cases the social fabric of the community is forever changed.

- Environmental Impacts - ***Negative Impact*** - The negative effects traffic noise and pollution generated by a limited access highway are obvious. The imposed negative impacts are unnecessary when a more reasonable alternative exists with the Pink and Green preliminary alignment.
- Cost and Economic Impact - ***Negative Impact*** - Comparatively, the cost to build one of the bypass alignments is significantly less than the pink and green proposed alignment. However, the proposed bypass alignments do not fully address the City of McKinney's safety and mobility issues for University Drive, or the longterm expectations and needs of the community.

Position Statement

"A combination of the Pink and Green Preliminary Alignments should be adopted as the preferred alignment and move on to more advanced phases of project development, and The Blue, Red and Yellow Proposed Bypass Alignments should all be rejected."

Hope input received well too. No easy answers. Median helps head on crashes at least that are frequent in areas without one. The signal light at the base of 1827 hill could use a bridged ramp top of 380 hill down over the intersection with acceleration lanes from 1827. Probably a lot deaths there in future as red light runners are frequent off that hill. Jeff Schmidt. Mckinney Tx

I live in the Timberridge Community (Unincorporated McKinney) as it is now 380 runs South of me. I can hear the 380 traffic from my house. I Absolutely do Not Want the blue plan. It will create 380 traffic in close proximity to my North, my West and to the South. I would be Surrounded by 380 traffic noise on 3 Sides. The red plan is also bad as I would have traffic noise on two sides of me. Both of those Plans would also have Students taking the Freeway to get to the Highschool opening 2023. I believe the green plan is the best option

ADDRESS: [redacted]

CITY:

Dear Mr. Endres,
We would like to let you know our family and neighbors on the southern part of CR 338 in Collin County prefer the blue alignment.

The pink and green alignments using the current 380 seem non-feasable (though a better option for us) because as your study emphasizes, they do nothing to minimize future congestion expected from growth .

The yellow alignment (from your small map) appears to go through or next door to the new planned water resource recovery(sewage) facility. https://www.ntmwd.com/projects/new-regional-water-resource-recovery-facility/ This could possibly be unpleasant for drivers on the new freeway.

Please keep us informed as progress continues as this will greatly affect our current rural way of life.

In Christ,

Joe and Mary
Borchard

Please Print Given the proposed growth of Collin Co, I agree that improvements to US 380 are needed and I support the project. I do NOT support to Pink & Green alignments along the existing corridor. There has been so much development along both sides of University in McKinney and more being started every day. It would seem that ROW acquisition alone would be cost prohibitive and would do nothing but increase congestion through town.

I do support a bypass to the North. The ROW should be less expensive due to less development and gives thru traffic an opportunity to avoid the local traffic. Given me druthers, I prefer the Blue or Yellow alignments. I'm not particularly thrilled with where the Red alignment ties back into the existing corridor. It seems too soon.

I Do Not Support the freeway option. I realize Collin County needs more thoroughfares.

Proposed option #1: Create MORE loops to the North of 380. Additional East-West routes will allow businesses to populate these routes, and avoid ~~the~~ the possibility of blighted areas immediately surrounding a 350 - 400' wide highway system. Look at the blighted areas of downtown Dallas to see the effects of multiple high-rise highway systems

Proposed option #2: put it all underground, much like the "big dig" in Boston. I realize this is even more expensive, but blight has largely been removed from areas that were once full of raised & wide highways.

I am a resident of Tucker Hill in McKinney. All of the current alignments through McKinney directly impact the current or planned residential community. I fail to understand why no alignments presented include consideration of a route beginning immediately to the west of Custer and continuing north. There are no current developments in this area. This needs to be strongly considered as opposed to building a highway within 100 feet of existing residential homes. This also would be less expensive as the environmental impact is lower AND less cost for Right of Way

Please Print We are against all current alignment proposals that have been recently proposed. There would be the probable loss of homes and devaluation of our neighborhood as a whole. There would surely be health and adverse environmental implications as well. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose MINIMAL right of way and noise pollution by means of cantilevered access lanes a depressed throughway/part and SOUND BARRIERS. In addition, if any bypass option is chosen, it must be located AS ~~FAR~~ WEST OF TUCKER HILL AS POSSIBLE WEST OF FUTURE STONEBRIDGE ROAD, not on or bordering Tucker Hill. Please submit my comments into the record

TxDoT US380 Plan vs. NCTCOG Collin County Plan

The latest TxDoT Study Plan for US380 through Collin County is shown below. This drawing does not include roadways currently being planned by NCTCOG.

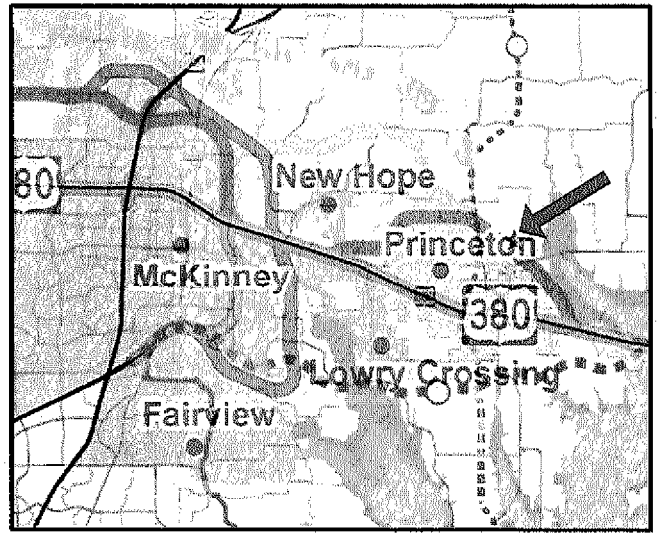

The additional roadways under study by NCTCOG *will* have a significant effect on the traffic flow for US380.

- It appears (to me) that NCTCOG is trying to resolve the traffic congestion problems on US380 east of McKinney without touching US380. (See map and discussions on the next page.)

Is there a lack of coordination and/or communication problem between the two groups? Wouldn't it be more efficient if TxDoT and NCTCOG (analyzed and) communicated about the *same* roadways

I laid the (*scaled*) TxDoT plan over the latest NCTCOG plan in the drawing below. Note the complexity of options under consideration in the area shown.

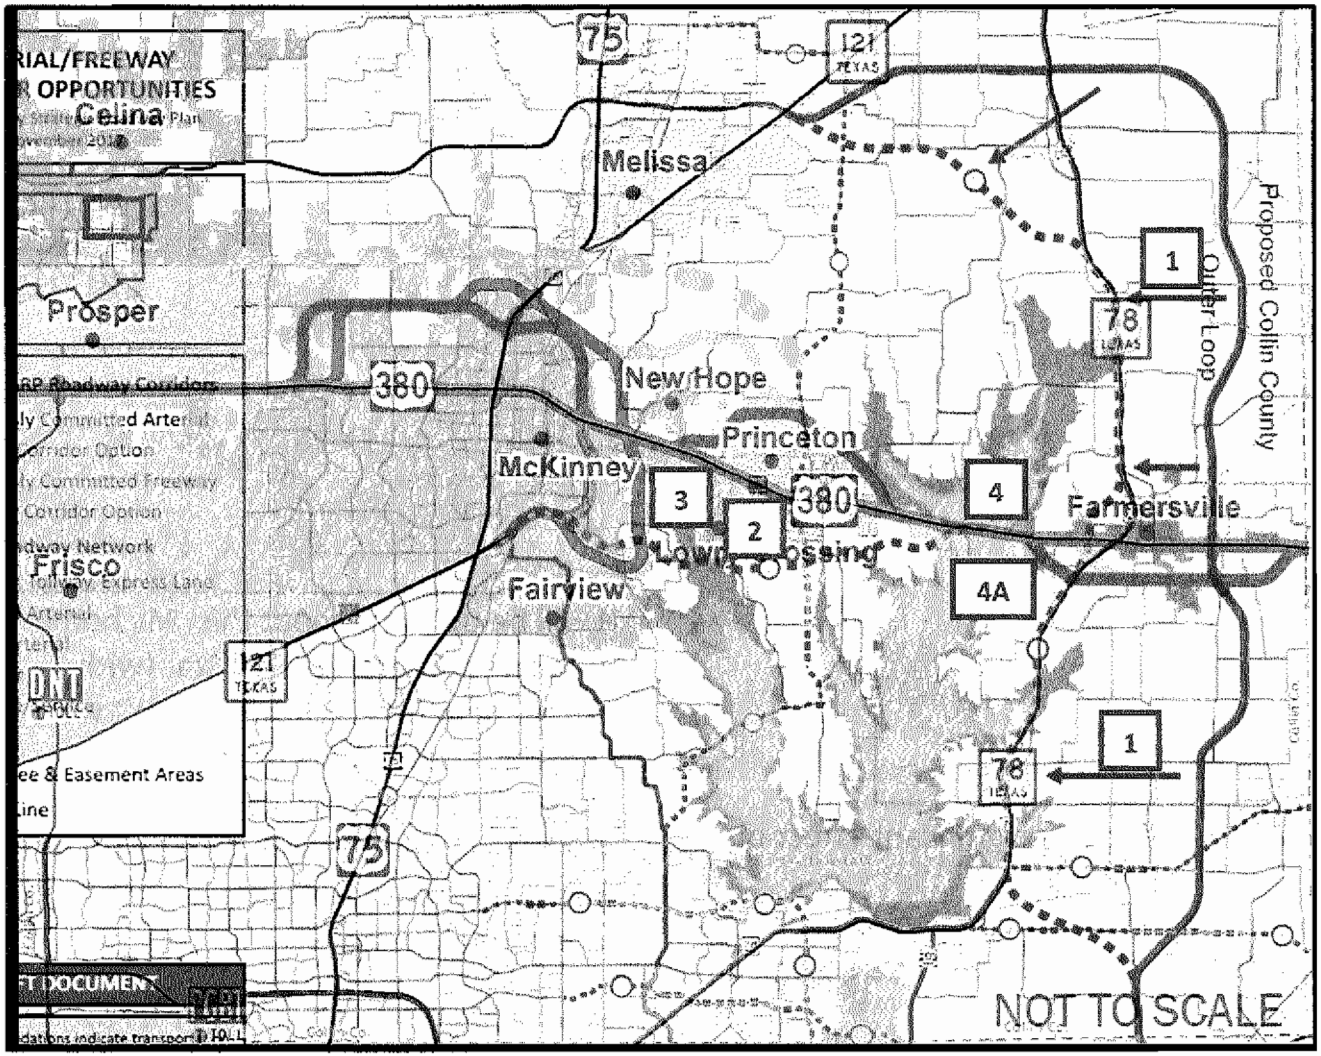

- I will be up front about this: My home is located where the Red Star (with Arrow pointing) is shown. I don't want a major freeway, major thoroughfare, or even a minor thoroughfare to go through my living room, front yard or pasture, or back yard or pasture! And I don't want to move!

It appears that several major factors that could affect traffic flow rates and patterns might not have been considered due to TxDoT and NCTCOG doing their analyses independent of each other.

TxDoT US380 Plan vs. NCTCOG Collin County Plan

The drawing below is an expanded version of the TxDoT and NCTCOG plans overlaid. It might be a little congested, so I also added numbers to identify the location of the issues I have enumerated.

A couple of routes that might not be well known to TxDoT:
Orange dashed – NCTCOG idea for US380 McKinney Bypass
Red dashed – NCTCOG ideas for Thoroughfares, planned new and/or improved

1 The latest NCTCOG plan has moved the eastern part of the Outer Loop west, to follow the SH78 ROW.

2 The NCTCOG plan includes the Spur 399 Extension (blue dashes). This roadway will absorb the massive traffic flow that uses US380 to Airport Road to FM546 to SH5/SH121/US75.

- The Spur 399 Extension might take enough of a load off US380 between Airport Road and Princeton to reduce the need to widen US380.

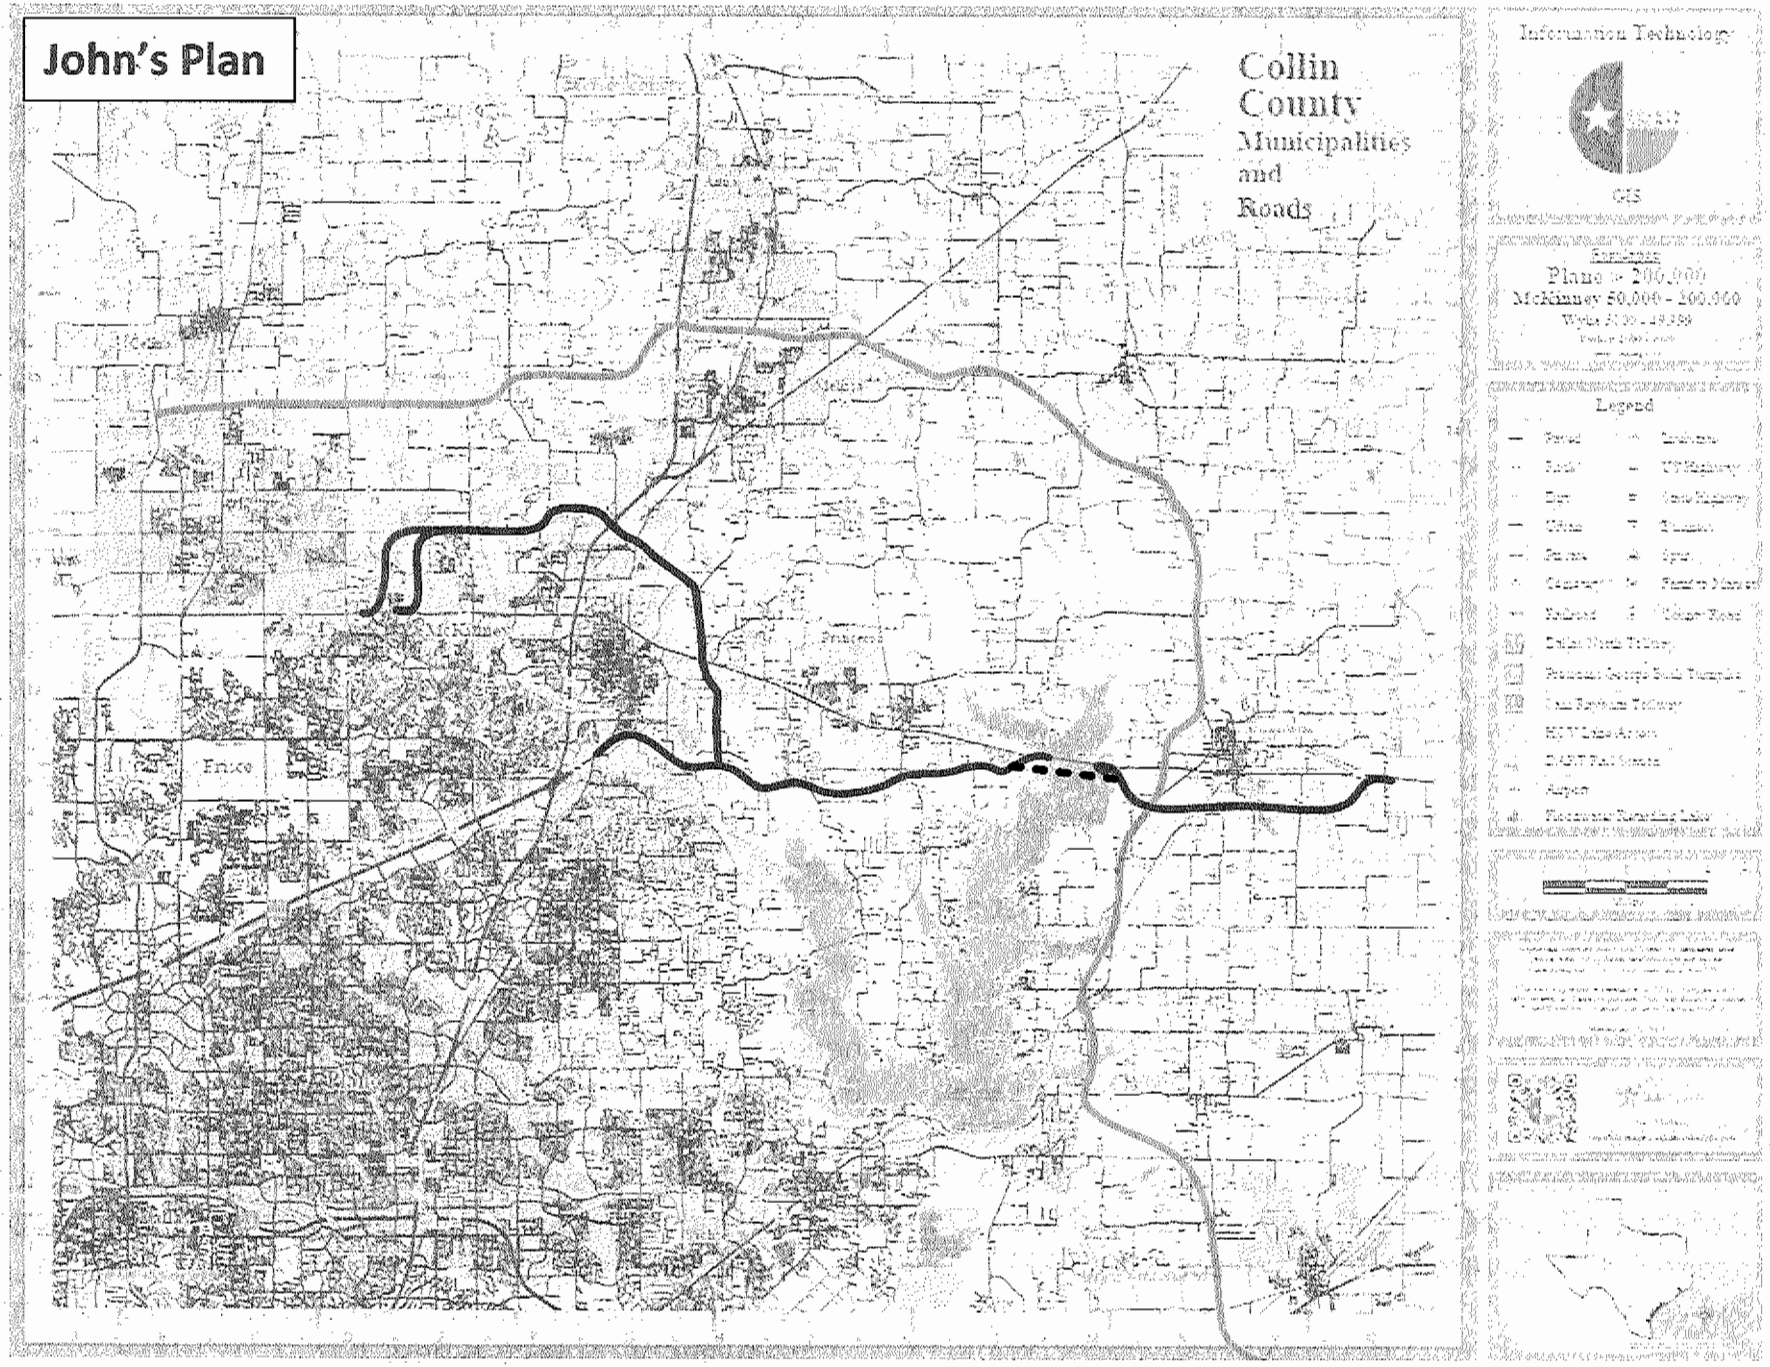

3 The NCTCOG plan dropped their Western Corridor Thoroughfare – which corresponds with the N-S Red roadway east of McKinney.

- This N-S Connection from the US380 McKinney Bypass to Spur 399 might take enough of a load off US380 between Airport Road and Princeton to reduce or eliminate the need to build the various Princeton bypasses shown.

4 That's a lot of lanes merging together on each end of the 4-lane bridge across Lake Lavon.

4A Perhaps a wider bridge across Lake Lavon, south of the existing bridge, for a new US380 route (using the Spur 399 Extension and the Farmersville Bypass) should be considered. Existing US380 would become Business US380.

TxDoT US380 Plan vs. NCTCOG Collin County Plan

TxDoT US380 Plan vs. NCTCOG Collin County Plan

The Outer Loop

The E-W section of the Outer Loop (shown in orange) is 3 miles north of the proposed US380 McKinney Bypass (shown in red and blue), which is already 2 miles north of original US380. I don't believe that this western section of the Outer Loop will absorb much (non-commercial) traffic from (either) US380.

I would believe that the Outer Loop from US75 to the DNT might absorb some of the commercial traffic going from US75 to DNT. Similarly the Outer Loop from US75 to I-30 in Rockwall County would absorb commercial traffic to bypass the Dallas Metroplex traffic. I do not know what percentage of the US380 traffic flow this would be.

US380 McKinney Bypass

I believe the US380 McKinney Bypass (shown in red and blue) should a Limited Access Roadway without continuous Access Roads. While it is tempting for developers to have Access Road frontage for Malls and Shopping Centers, the associated traffic congestion would eliminate the reason for drivers interested in getting through town from taking the Bypass. Either way, interchanges should be at least 2 miles apart.

Continuing the US380 McKinney Bypass N-S on the east end allows the possibility of a US75 Bypass, particularly if it continues south of the Spur 399 Extension, perhaps to meet the Western Corridor Thoroughfare (FM1378). However, I should note that the NCTCOG dropped this roadway option.

Spur 399 Extension

The Spur 399 Extension (shown in purple) should absorb almost all of the traffic that currently uses SH121 and the US75 interchange to FM546 to Airport Road and east on US380 through Princeton.

If the US380 McKinney Bypass continues N-S on the east end to reach the Spur 399 Extension as a Limited Access Roadway LAR), I would expect much of the US380 traffic from western McKinney would also take the Spur 399 Extension (if it is also a LAR).

The western end of the Spur 399 Extension, through the field south of the cemetery toward SH121/SH5, merits some additional consideration. The FM546 Realignment (construction in process) already puts 6 traffic lanes through this lowland field. I would really not like to see 6 more freeway lanes and 4 more access lanes to be built through this sensitive area where no traffic lanes existed before.

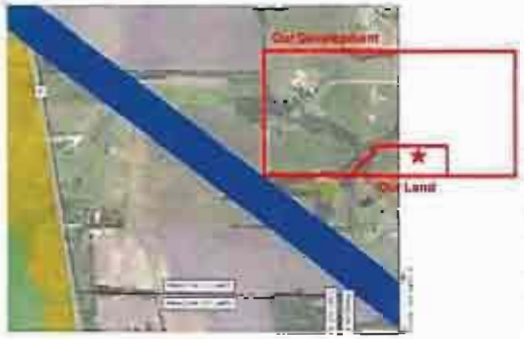

- Most of the traffic through this corridor will come from SH121/US75 and will continue east.
- Some of the traffic will use FM546 and continue southeast.
- Most of the traffic on the N-S section of the US380 McKinney Bypass will continue east on the Spur 399 Extension, and not use this section of roadway. However, a few will be using the N-S section to bypass US75 and use this section of roadway.

US380 East of McKinney

With the Spur 399 Extension taking some of the load off this section of US380, adding one lane each direction should be sufficient, and a Princeton Bypass (north of town) should not be needed. With the Spur 399 Extension serving as a Princeton Bypass, the city council will probably oppose another Bypass.

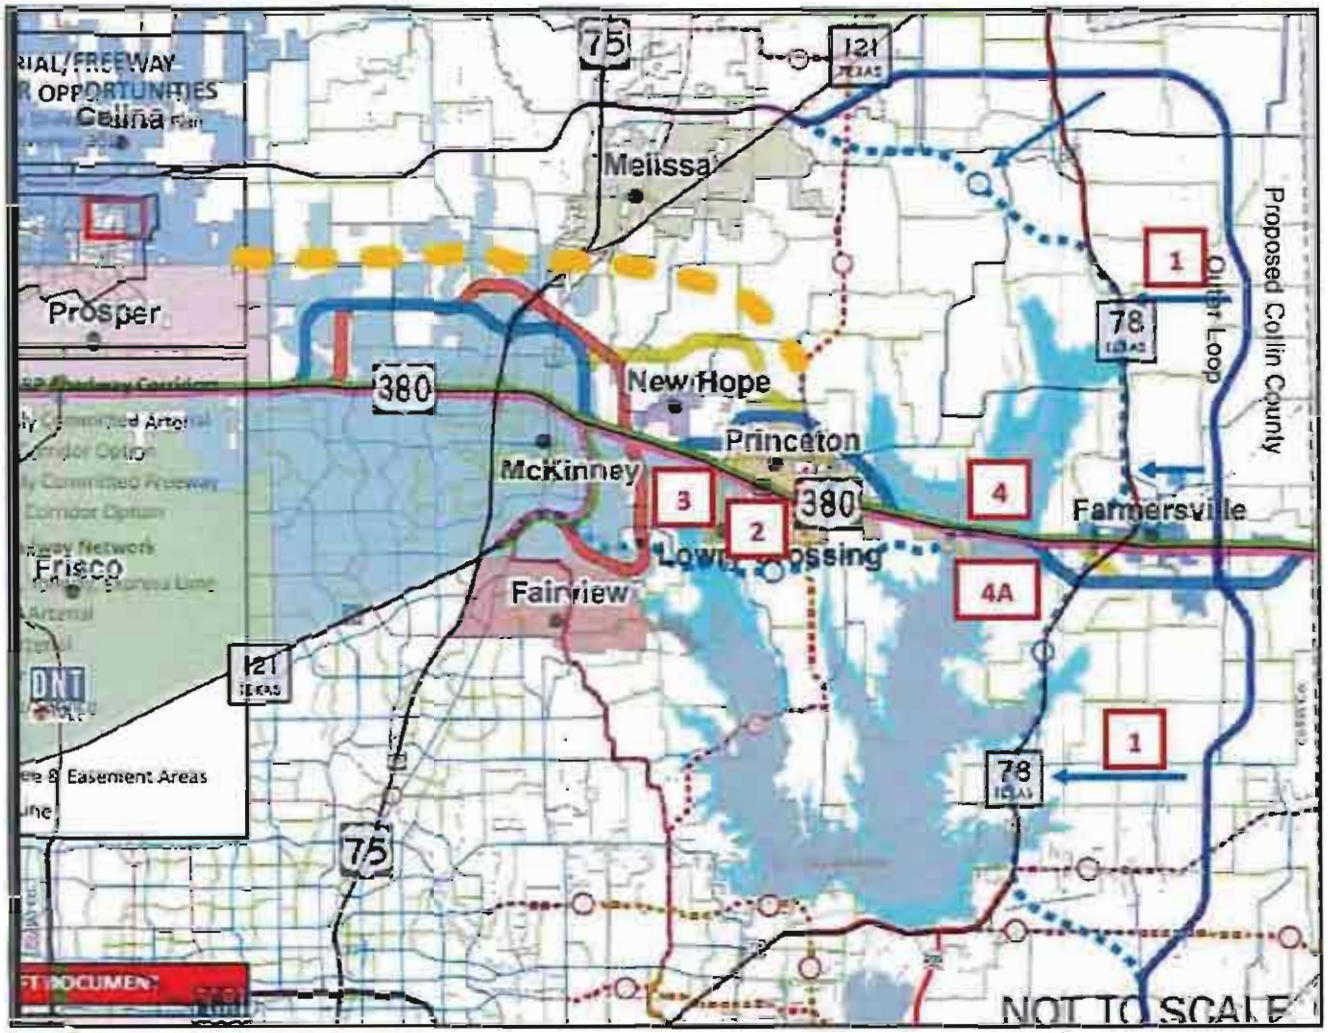

- Is it easier to widen the existing bridge or to combine the Spur 399 Extension with the Farmersville Bypass and build a new bridge (black dashed) south of the existing bridge?
- This would make Spur 399, the new bridge, and the Farmersville Bypass into a new US380 and the existing roadways becomes Business 380.

John Worley's Plan for Collin County Roads

I will be up front about this: I marked my home over the TxDoT plan. My home is located where the Red Star is shown. I will be directly affected!

The drawing below is an expanded version of the TxDoT and NCTCOG plans overlaid. It might be a little congested, so I also added numbers to identify the location of the issues I enumerated.

1 The latest NCTCOG plan has moved the eastern part of the Outer Loop west, to follow the SH78 ROW.

2 The NCTCOG plan includes the Spur 399 Extension (blue dashes). This roadway will absorb the massive traffic flow that uses US380 to Airport Road to FM546 to SH5/SH121/US75.

- The Spur 399 Extension might take enough of a load off US380 between Airport Road and Princeton to reduce the need to widen US380.

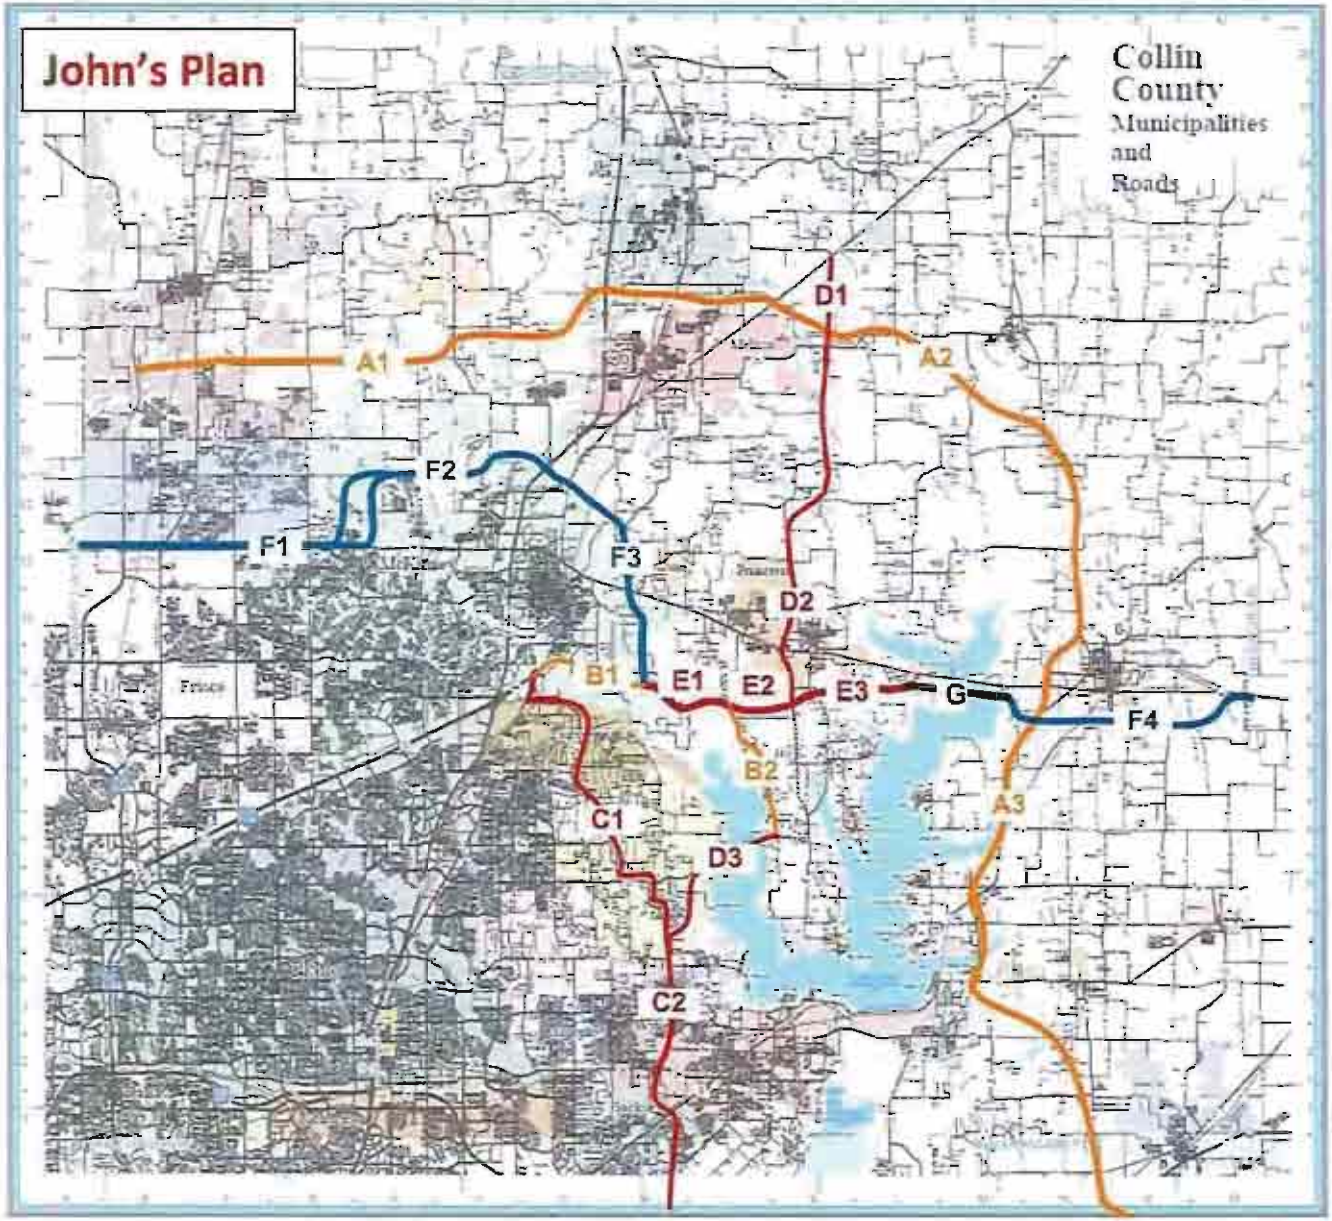

3 The NCTCOG plan dropped the original Western Corridor Thoroughfare – which corresponds with the N-S Red roadway east of McKinney.

- This N-S Connection from the US380 McKinney Bypass to Spur 399 might take enough of a load off US380 between Airport Road and Princeton to reduce or eliminate the need to build the various Princeton bypasses shown.

4 That's a lot of lanes merging together on each end of the 4-lane bridge across Lake Lavon.

4A Perhaps a wider bridge across Lake Lavon, south of the existing bridge, for a new US380 route (using the Spur 399 Extension and the Farmersville Bypass) should be considered. Existing US380 would become Business US380.

John Worley's Plan for Collin County Roads

My plan for roads in the northern half of Collin County Road centers on implementation of the following major roadways. These agencies have additional roads in planning, primarily improvements to E-W traffic flow in the southern half of the county that are not shown here.

Planned by Collin County

A Collin County Outer Loop.
B FM546 Realignment.

Planned by NCTCOG

C Western Corridor Thoroughfare.
D Lake Corridor Thoroughfare.
E Spur 399 Extension.

Planned by TXDOT

F US380 Realignment.

Added by John Worley

G New US380 Bridge.

The New Roadways

The new US380 consists of the sections of **F**, **E**, and **G** shown, all L.A.R. The existing sections of US380 become Business 380.

The Lake Corridor Thoroughfare consists of the sections of **D**, **B**, and part of **C** (all 4-6 lane surface streets) and part of **E** (L.A.R.).

TxDoT US380 Plan vs. NCTCOG Collin County Plan

The Outer Loop – A

The A1 section of the Outer Loop is 3 miles north of the proposed US380 McKinney Bypass, which is 2 miles north of original US380. I don't believe that this section of the Outer Loop will absorb much (non-commercial) traffic from US380.

I believe that the A1 section of the Outer Loop might absorb some of the commercial traffic going from US75 to DNT. Similarly the A2-A3 sections of the Outer Loop would absorb commercial traffic trying to bypass the Dallas metroplex traffic.

The A1 section of the Outer Loop will absorb most of the traffic from Celina and Weston, along with some of the traffic from Anna and Melissa. The A2 section of the Outer Loop will absorb most of the traffic from Altoga and Blue Ridge. The A3 section of the Outer Loop will absorb most of the traffic from and Nevada and Josephine, along with some of the traffic from Farmersville and Lavon.

The New US380 – E, F, and G

I believe the **F2** section of US380 should a L.A.R. without continuous Access Roads. While it is tempting for developers to have Access Road frontage for Malls and Shopping Centers, the associated traffic congestion would eliminate the reason for drivers interested in getting through town from taking the Bypass. Interchanges should be at least 2 miles apart.

Continuing the **F3** section of US380 connection to the **E1-3** sections of the Spur 399 Extension for continued travel E-W. I would expect much of the US380 traffic from western McKinney would also take the Spur 399 Extension (if it is also a LAR) rather than the existing US380.

Is it easy to widen the existing US380 bridge across Lake Lavon or will a new bridge need to be constructed (and the old bridge be taken out)? How do the costs compare?

- It makes sense to combine the **E1-3** sections of the Spur 399 Extension with the **F4** section of US380and build a new bridge – **G** – south of the existing bridge

This would make this new route into part of the new US380 and the existing roadway becomes Business 380. Much of traffic using existing US380, Airport Road, and existing FM546 to reach US75/SH121 will take the **E1-3** section and **B1** section of FM546 Realignment, reducing congestion on Business 380. An additional lane each direction between Airport Road an-d Princeton should reduce congestion in the area. No additional Princeton Bypass (north of US380) should be required.

FM546 Realignment – B

The western end of the Spur 399 Extension, through the field south of the cemetery toward SH121/SH5, merits some additional consideration. The **B1** section of the FM546 Realignment (construction in process) already puts 6 traffic lanes through this lowland field. I would really not like to see 6 more freeway lanes and 4 more access lanes to be built through this sensitive area where no traffic lanes existed before.

- Most of the traffic through this corridor will come from SH121/US75 and will continue east. Some of the traffic will use the **B2** section of FM546 and continue southeast.
- Most of the traffic on the **F3** section of US380 will continue east on the new US380, not using this **B1** section of roadway.

I believe that this western end of the Spur 399 Extension be combined with the FM546 Realignment to the point they meet the N-S connector of the New US380. The central and eastern end of the Spur 399 Extension becomes part of the new US380.

Lake Corridor Thoroughfare – D

The **D1-3** sections f the Lake Corridor Thoroughfare are 4-6 lane surface street. The **E2** section the new US380 would connect the **D2** section to the **B2** section of FM546. Some traffic will take the new US380 and Spur 399 Extension to reach US75/SH121. Using the **B2** section of FM546 to reach the **D3** section prevents carving up the middle of the Peninsula with new roads. Continuing to the **C2** section of the Western Corridor Thoroughfare allows traffic to continue south. This roadway will absorb much of the traffic from north and south of Princeton.

QC # 56

Texas Department of Transportation

I would prefer that U.S. 380 remain in the same location between Lake Lavon and the Hunt County line, especially in the Farmersville area. However I definitely do not want it to be re-located to the south of the current location because it could possibly take land that has been in my family for 75 to 100 years. It could also possibly take a family bussiness that has been in the family for 60 years. This bussiness is making my sister and I a living. I am also totally opposed to all limited access roadways regardless of the location. I feel that every citizen should have convenient access to all public roadways.

Sincerely
Johnny Clyde Teague

Subject: 380 Alignment impact on Tucker Hill?

Stephen:
I am under contract on a home in the Tucker Hill community located on 380 just east of Custer Road. I have recently seen the proposed alignments. The alignments that improve 380 in its current path seem to show that the Southern portion of the neighborhood would be within the right of way. Is this accurate? Do all but the "blue" alignment impact the Southern entrance to Tucker Hill?

Also, once alignment is selected, what is the anticipated timing of the actual improvement project?

Thank you,

Jon Bolen

I AM WRITING IN REFERENCE TO THE PROPOSED EXPANSION OF 380 IN COLLIN COUNTY. I OWN A FARM THAT SITS DIRECTLY ON THE PATH OF THE RED ALTERNATIVE, AND WITHIN A QUARTER MILE OF THE YELLOW OPTION. I AM AN ORGANIC FARMER RAISING FOOD FOR MY FAMILY AND OTHER CUSTOMERS SINCE 1981. I WAS AMONG THE FIRST CLASS OF CERTIFIED ORGANIC FARMERS IN TEXAS AND THE FIRST CERTIFIED ORGANIC FARM IN COLLIN COUNTY. THE RED AND YELLOW OPTIONS FOR EXPANSION OF 380 WOULD PLACE AN UNDO BURDEN ON MY PROPERTY IN THE NAME OF GROWTH. PLEASE CONSIDER MY SITUATION AS YOU MAKE PLANS FOR THE FUTURE OF TEXAS.

Mesquite, Texas 75150-6643

Dear Mr. Endres:

Thank you for the opportunity to express our concerns regarding the proposed improvements to US 380 from Denton County Line to Hunt County Line in Collin County. My family appreciates the time and effort that you and others are putting into researching the best option to solve the congestion and build to accommodate future growth while considering the least impact on land owners.

For 35 years, I have owned and farmed 350 acres northeast of McKinney. Our farm specializes in strict organic methods reclaiming land that had fallen fallow from years of cotton. When I established The Little Farm in 1981, it was well before the interest and demand for organic foods came around. From the very beginning I had the farm officially certified as organic which was the first of its kind in Collin County and among the first in Texas. Over the years, I have raised organic chicken, cattle, pigs, bees, sheep, turkey, and pecans. Additionally, my gardens and orchard produce a wide variety of organic vegetables and fruit. Our farm not only provides food for our family, but it also provides for other families and customers as well.

The Red Option being considered for the US 380 expansion would divide the property and destroy the farm as it exists, leaving it impossible to farm. Currently situated on the farm are several barns and three houses all of which would be negatively impacted. We know of at least one of those houses that would be completely taken out.

Likewise, the Yellow Option would bring the new construction very close to one of the houses which is currently occupied. This, too, would have a negative impact on farming the land as we have done for so many decades.

This farm has been in our family for three generations and I have worked hard to build the organic farm into what it is today. We would like to meet with you and any other TxDOT officials to visit in more detail about our concerns. We would be very interested in looking at the maps together and discussing other alternatives or combinations of the various options that you may be considering.

Thank you for considering our request. We look forward to meeting with you in the near future.

Very truly yours,

Judy Glazer

Tucker Hill's position & my position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and Noise pollution by means of ~~cantilever~~ cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any by pass is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge drive; Not on or bordering Tucker Hill.

Subject: US 380 Comment

Dear Mr. Endres:

I missed the public comment period, but I wanted to go ahead and express my opinion to the committee that after studying the options, I feel it would be best to keep 380 to the existing footprint and make expansions as needed right there. I know this will force some changes to existing businesses but I feel the overall impact to residents and communities would be minimized this way over time.

Thank you,

Kara Schofield, Prosper Resident

Please Print Please don't mess with Tucker Hill. All your proposals for 380 relief would destroy this rare neighborhood that truly optimizes McKinney as "unique by nature". We joyfully open our community to the entire city with Porch Fest, Brunch Fest, Pumpkinville etc and these events will be hurt. If a by-pass or 380 major Freeway turns our neighborhood into an enclosed po encased by concrete walls! Emotion aside, spending millions to widen 380 when the major growth will be north makes no sense. I believe funds would be more wisely used to expand and impro existing roads - Custer, Ridge, Lake Forest, Hardin and build Stonebridge Dr - to Connect to the fast thinking Outer Loop. Improve 380 safety by 1) lowering Speed limit to 45; 2) better time traffic lig 3) add more turn lanes at major intersections, especially Hardin east; and 4) remove truck traffic or. least limit it to one lane on 380. If you totally disregard our pleas then at the very least: 1) if 380 mu be widened then depress it infront of Tucker Hill and complete Stonebridge Drive so we have a be exit. It is less than ideal to have school buses and emergency vehicles entering a major highwa 2) If a by-pass is the chosen option then please it as far west of Tucker Hill as possible. The current planned path would completely halt further development of our neighborhood an create noise, pollution and unsightly views for many existing homes.

Subject: "Out of the Box" Compromise proposal for the 380 Bypass in McKinney

Good Morning!

I am a resident of the Heatherwood subdivision in McKinney. I've been watching the debate over the proposed 380 bypass/380 improvement. While I'm on the record stating that I don't like a bypass - in actuality I don't like the PROPOSED bypass as it appears to be designed (i.e. with service roads and high speeds).

Hence, my suggestion.

Our city motto is "**Unique by Nature**" - so let's look at something "**Unique**", full of "Nature", and beatuiful!

Our goal is:
-Lighten the burden of traffic on US 380 by creating a "throughway" bypass.
-Minimize impact on existing homes and land
-Maintain the beauty of the Northwest sector of McKinney with it's natural environment as much as possible.

Observation of the current "freeway" proposal
-Lightens the load of traffic on 380
-Highly impacts (negatively) existing homes and land (high speeds and noise and reduced home values)
-Destroys natural aesthetics by carving out multiple lanes and frontage roads with wide ROWs

I PROPOSE: Design a PARKWAY!!

I have a lot of experience admiring and using Parkways. Throughout the world Parkways are utilized as bypasses that also become a thing of beauty in and of themselves. Some that immediately come to mind are the GW Parkway in Northern Virginia, the Colonial Parkway in Williamsburg, and others scattered throughout this country, as well as in other countries.

WHAT IS UNIQUE about at Parkway?

A parkway MINIMIZES the amount of land required.
The access to a parkway is very very limited.
Interchanges are efficient and aesthetically nice.
Landscaping maintains the "park-like" beauty that makes this a VERY **UNIQUE** option
There are no frontage roads. I repeat - there are no frontage roads.!!!
Speeds can be capped at 50mph

WHAT ABOUT INTERCHANGES

Here's where it gets interesting.
I know in Texas we're all about huge overpasses and major interchanges. However, I propose considering ***alternatives***.

I've attached photos of two different type of interchanges - both of which I've experienced and seen firsthand the IMPROVEMENT it has made in previously congested areas.

The first is a ***ROTARY interchange.*** I like this one most because it maintains a complete thoroughfare on the "Parkway", while allowing the access via an elevated roundabout.

(a Note on roundabouts: I come from an area where we made the conversion from regular traffic signal controlled intersections (with huge traffic back-ups and accidents) to Roundabout replacements. The difference is ASTONISHING. The backup at rush hour almost completely disappeared! Traffic moved slower at the intersections but generally keep moving. The only issue we observed was the number of crashes, instead of being the major T-bone wreck, were more low impact crashes with folks driving too fast around the curves (the curves DO make you slow down!). A gentler design of the curves may mitigate that.

By having the Roundabout OVER the main thoroughfare - the "bypass" traffic keeps moving.

The second is a ***"Diverging Diamond Interchange***".
This exists at the intersection of I 66 and US Rt. 15 in Prince William County Virginia. It has taken a while to get used to - and it does mess with your head a bit. I've seen still SOME back up at rush hour - but it is far less than it was before. I like this option less because it's not very aesthetic - just looks like a scrambled overpass.

So - to summarize...

THINK OUT OF THE BOX - if you're going to create a bypass (which it increasingly looks like you will) - gather some design proposals from engineers for the option of building a **UNIQUE** Parkway. The interchanges could be at the Bloomdale Road intersection (north of Tucker Hill), at Lake Forest and at Hardin (and of course US 75) Building out Lake Forest, Wilmeth, Hardin and Stonebridge and Custer to their maximum lanes would allow for the movement of traffic within the neighborhoods and feed up to the Parkway that way.

The main parkway could still be designed to be 6 lanes (utilize the landscaped median until it needed to be expanded)

No frontage roads !!! (which require more land and beg for commercial development)

Landscape design it to make it beautiful and quiet (install tree and hedge covered berms between the road and the subdivisions to control noise and pollution and eye-sores)

Make it LOOK like a park - MAKE IT UNIQUE BY NATURE!!!

I think you can "sell" this idea much easier that what's on the table now.

Please let me know what you think.

Sincerely,

Karin Kerby

[redacted]

ps- maybe this would be cheaper and have $$ left to IMPROVE 380 as well! :)

PARKWAY IDEAS

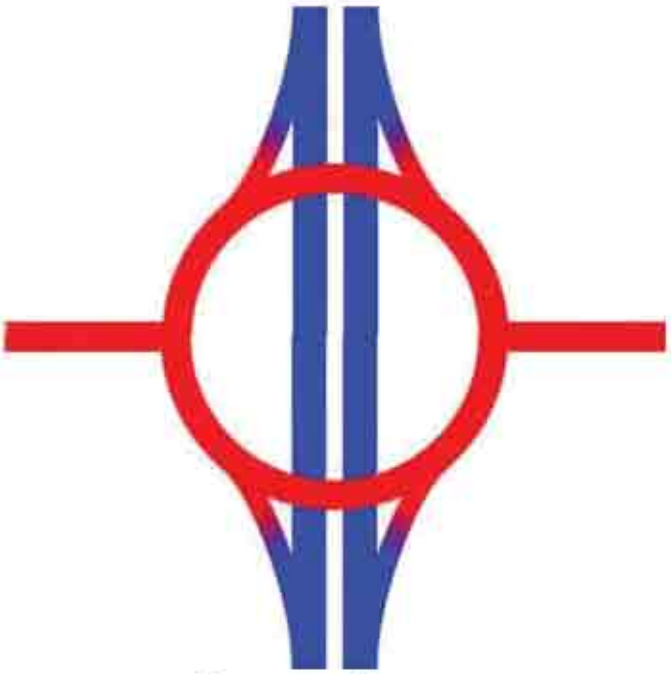

George Washington Pkwy
(Virginia)

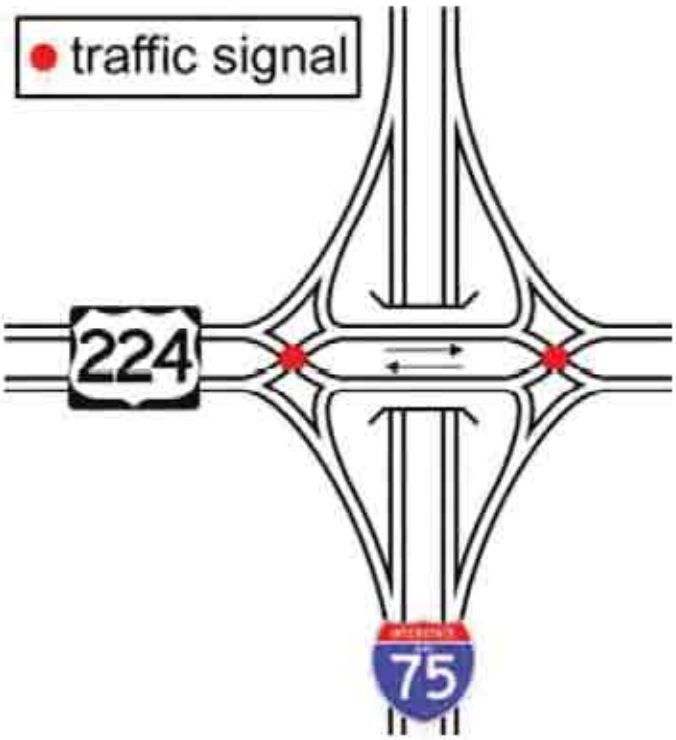

(wouldn't do the 2 lanes – but like the idea of added bicycle lane and walking path)

Interchanges:

Rotary interchange

I like this because it is Very easy and keeps traffic on main Parkway moving without traffic signals.

Diverging Diamond Interchanage

**Very confusing at first – but it actually DOES work. There's one on Interstate 66 and US Rt. 15 in Northern Virginia – traffic moves fairly quickly through it, although with the traffic lights it slows it down a little.

I am very concerned about the lack of improvement proposed for the intersection at FM 1385 and Hwy. 380.

Between this whole project this ~~inter~~ intersection is the one that backs up traffic the most substantially during morning rush hour going East and afternoon rush hour going west.

There are 5-6 large subdivisions North of 380 that use that intersection. These neighbors are mostly new and growing quickly

1.) I like the idea of a US Hwy 380 Freeway with access roads to reach businesses along the 380 corridor.
2.) If a By Pass is built "red" in McKinney is preferred and "blue" in Princeton.
3.) No By Pass route should go through Prosper which only has 27 square miles. Prosper's 380 corridor needs to be developed into a commercial TAX base
4.) No By-Pass should cut through the PISD property for a future High School that will be east of Custer Road and north of Prosper Trail in the Rhea's Mill area.

Please Print I support the Red alignment in general. With the Blue options to by pass Farmersville & Princeton.

Green alignment through center of McKinney would be a disaster, very opposed.

Very concerned about the intersection at RT 5 / Stewart Rd. Sound protection, lights, etc. Elevation of freeway.

Presentors were clear and understandable. Materials were easy to understand. Use of google earth was a plus.

ADDRESS: [redacted]

CITY: [redacted]

QC # 349 MR. VOIGT: Good evening. My name is Kevin Voigt, V-o-i-g-t, 6290 County Road 123, McKinney, 75071.

My comments would have to do with, 380 is the problem and so the solution should be focused on 380.

The pink and green options would require a temporary disturbance of business owners. Business owners would get to go home every night, and studies have shown that this type of infrastructure and improvement ultimately benefits those same business owners. So a temporary disturbance and inconvenience ultimately delivers a net benefit to those business owners.

Conversely, and like myself, I fall under three of the five alignment options. We would lose our home, as would hundreds of others. The impact to families and communities from three of five suggested alignments are permanent outcomes.

And so I would advocate, and I believe many would, including the County and the City, to focus on the pink and green alignments, understanding those business owners would have a temporary inconvenience and net benefit at completion; whereas, homeowners like myself would permanently be displaced.

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

Tucker Hill's position is NO to all alignments due to:

1) potential loss of homes
3) devaluation of our neighborhood as a whole
2) adverse environmental and health implications

Notwithstanding our NO recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway, sound barriers, and extensive landscaping for aesthetics.

NO bypass option is acceptable!

TxDOT must incorporate the City of McKinney's overall plan into their analyses and building timeline before further decisions are made. The 380 project appears to be an independent project from the outer loop and expansion/widening of other East-West roads (e.g., Wilmeth, Bloomdale, Frontier). Without a comprehensive plan in close coordination with McKinney the current 380 options are shortsighted and may even worsen the problem.

As a business leader (President of 3510 McKinney) on 380, my preference would be for a bypass solution although I'm not encumbered with any of the proposed bypass alignments and had hoped one possible alignment would drop further west, closer to Custer. That bias is primarily tied to my residence (I live in Tuckerhill). I do think turning 380, as is, into a LAR creates major problems given the number of businesses now along that corridor. From the hospital's perspective, the worst alignment is the "Green" one that expands existing 380 to the North.

The Texas Department of Transportation is seeking your comments on the proposed project. All written comments are welcome. **All written comments must be postmarked by May 18, 2018.**

I have 2 distinct concerns about the US 380 expansion project:

1. I would rather not hear any noise from traffic on 380. I'm sure many people share this concern with me. Of course my biggest issue is with noise at my house (8009 Saint Clair DR, McKinney, TX 75071). I don't know if there are plans to elevate the roadway or if any are near my home, but I would expect noise to carry further anywhere the road is elevated. Perhaps opportunities could be taken to lower the roadway instead of raising it to reduce the noise propagated from it. I would support any sound reducing measures taken (especially near my home).
2. I am a member of the Sky high RC (remote control) Club along with approximately 60 other local members and our flying field borders on the Red, Blue, and Yellow routes. The address of the field is: 300 County Rd 1006, McKinney, TX 75071, @33.254825,-96.655964. It is part of Erwin park and the entrance to the field is on CR 1006. There are 2 potential issues with the proximity of our field and the highway. a) AMA regulations & safety concerns. Our field is currently sanctioned by the AMA (http://www.modelaircraft.org), the governing organization for remote control flight hobbyists in the US. I don't know if the highway threatens our status as a sanctioned field or not. However, if it does, then the highway represents an existential threat to our club. I do know that the AMA recommends a 250' minimum buffer between fields and major roadways to reduce safety risks. So, if the road was moved at least 250' south where it passes our field, that would probably ensure that we would not be impacted. That is speculation on my part and would need to be confirmed. b) Noise. It's a beautiful, peaceful spot right now and that could be shattered by noisy traffic. Perhaps noise control measures would help reduce that impact.

Subject: Comments/concerns regarding the US 380 expansion proposals

Hello,

I am going to send these comments in via a mailed comment form, but wanted to also send them directly to you.

Thank you for your consideration of my concerns.

I have 2 distinct issues with the US 380 expansion project.

1) I would rather not hear any noise from traffic on 380. I'm sure many people share this concern with me. Of course my biggest issue is with noise at my house (8009 Saint Clair DR, McKinney, TX 75071). I don't know if there are plans to elevate the roadway or if any are near my home, but I would expect noise to carry further anywhere the road is elevated. Perhaps opportunities could be taken to lower the roadway instead of raising it to reduce the noise propagated from it. I would support any sound reducing measures taken (especially near my home).

2) I am a member of the Sky high RC (remote control) Club along with approximately 60 other local members and our flying field borders on the Red, Blue, and Yellow routes. The address of the field is: 300 County Rd 1006, McKinney, TX 75071, @33.254825,-96.655964. It is part of Erwin park and the entrance to the field is on CR 1006. There are 2 potential issues with the proximity of our field and the highway. A) AMA regulations & safety concerns. Our field is currently sanctioned by the AMA (http://www.modelaircraft.org), the governing organization for remote control flight hobbyists in the US. I don't know if the highway threatens our status as a sanctioned field or not. However, if it does, then the highway represents an existential threat to our club. I do know that the AMA recommends a 250' minimum buffer between fields and major roadways to reduce safety risks. So, if the road was moved at least 250' south where it passes our field, that would probably ensure that we would not be impacted. That is speculation on my part and would need to be confirmed. B) Noise. It's a beautiful, peaceful spot right now and that could be shattered by noisy traffic. Perhaps noise control measures would help reduce that impact.

Thank you,

Larry Truesdale

Princeton:

1). Add traffic lights at High School + FM 490

2) Add a raised medium with turns rather than what is current. Very dangerous!

3) Hwy 380 alternatives Above and/or below it.

We are adamantly AGAINST all current alignments that have been proposed. There would be loss of homes & devaluation of our neighborhood as a whole not to mention adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes a DEPRESSED throughway and sound BARRIERS. Also, if any bypass is chosen, it MUST be located as FAR West of Tucker Hill as possible, west of future Stonebridge, not ON or bordering Tucker Hill.

Mesquite, Texas 75150-6643

Re: Comments and Objections of North Texas Municipal Water District or Payment routes on C530135-11-002 ETC., US 380

Dear Mr. Endres:

Our firm represents the North Texas Municipal Water District and submits the following comments and objections to possible routes proposed by TxDot on the above project.

North Texas Municipal Water District ("NTMWD") is a water conservation and reclamation district created under Article XVI, Section 59 of the Texas Constitution pursuant to Chapter 62, Acts of the 52nd Legislature, 1951. As such, NTMWD is a political subdivision of the State of Texas. NTMWD provides water, wastewater treatment and solid waste disposal services to approximately 1.7 million residents of north Texas.

NTMWD has purchased 1,047 acres in the vicinity of the proposed US380 Realignment in order to construct a facility primarily to serve the needs of the northern portion of its service area. NTMWD is in the process of developing site plans and obtaining permitting for this public works facility.

NTMWD objects to the currently-proposed Yellow route. The NTMWD master plan for this public works facility requires the use of all NTMWD acreage lying to the south of an east-west line running from the intersection of FM 1827 and CR 988 and running west to FM 2933. Any realignment of US 380 to lie north of this east-west line could be feasible, but it is of paramount importance to the NTMWD and its public works project that no such alignment of US 380 cross south of that line, as doing so would fatally impair NTMWD's ability to effectively utilize its previously-purchased real property for its intended purpose.

In addition to the conflict with above-referenced 1,047 acres, please be advised that NTMWD is the permit owner responsible for the 30-year post-closure care of the closed McKinney Landfill. Post-closure care began June 18, 2014 and will continue until at least 2044.

Each of the five US 380 realignments (Red, Blue, Green, Pink, and Yellow) proposed by TXDOT include takings which would be within the permit boundary of the closed McKinney Landfill. Please be advised that any alignment of US 380 or its access roads within the permit boundary would violate the permit, TCEQ regulations and environmental laws of the State of Texas. It is of paramount importance that TXDOT take no actions which would violate the existing permits for the McKinney Landfill.

Sincerely,

Lewis L. Issacks

Subject: 380 Expansion

Dear Mr. Endres;

I wanted to take a moment to provide a formal written and mailed correspondence in response to the request for public comments related to the proposed expansion of US-380 through McKinney. I attended the public meeting last week, and I completed the online survey, but I wanted to be sure my comments were made on record and not just part of an online poll.

I believe, as do most of my neighbors, that a conversion of US-380 into a limited access freeway is unfeasible for the community, our homes, our neighborhood amenities and our neighboring businesses and other communities like Stonebridge Ranch (directly across 380). Such an expansion of 380 would limit our access to our own community, limiting our ingress/egress to and from our neighborhood, reducing times for first responders and access to nearby hospitals and support services.

I/we also believe that the blue/red/yellow proposed routes bypassing 380 to the North and dumping into 380 on the near East or West side of our neighborhood would be catastrophic to our home values, quality of life (noise and air pollution) and not aid in the traffic plight. Our community and city provided feedback in late 2016 showing that the 380 connection should occur closer to Custer road, even if on the McKinney side, and not the shared side with Prosper. This reroute would negatively impact significantly fewer homes and businesses.

The city, county and TXDOT should focus on continuing to improve arterial traffic on N/S and E/W arteries, and expand the Collin County loop just a few miles north of 380. By providing the community and businesses with simple, non-highway methods for navigating town to get to 75, 121, 380 or the tollway and not opening up another freeway and inviting more through traffic. We can also improve the bypass and county loops, connecting to 377 and the tollway to 75 to reduce the impact of intra-county commercial traffic along 380 (construction vehicles, gravel/dirt haulers, cement trucks, etc. that currently plague 380).

Our community has spoken, but we want to be sure we are being heard.

Thank you for taking the time to review my comments. If you would like to discuss any of these options with me, please do not hesitate to contact me directly.

Sincerely,

Mary Remington

Very Concerned Citizen/Homeowner

- As a homeowner on the northside of McKinney, with ½ mile or less to 380, I am very concerned about the potential impact of a enlarged or re-routed 380 "Freeway". The current noise of 380 is already effecting our lives and a change to 380 would only make it worse!
- 380 can be busy, but only during peak commuting times
- I will fight/protest any change that will have an adverse impact on our lives and property values.
- I think another option should be considered which moves the "re-configured road" even further North and West.
- The Blue Plan is the closest to an option, but still not acceptable.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

We are residents of Tucker Hill in McKinney, Tx. We oppose the construction of 380 as a limited access freeway, or a bypass, around the award winning development of Tucker Hill. We recommend the completion of primary and secondary roads, the widening of 380 to six lanes, the reduction of signalized intersections, overpasses at Key intersections and completion of the outer loop, all of which will meet the needs of future growth. We strongly oppose further consideration of a freeway or bypass on the east, west or south sides of Tucker Hill.

Please Print The current US380 from McKinney to Farmerville needs NOW work No matter what happens with the long term project. The alignments that go north of Princeton are ~~about~~ less than 1000 ft from my home. It is fine with me ~~if~~ If any improvements need to happed ASAP. Too many people are being killed and too much time wasted on 380.

Please Print ① All options need a sound barrier wall Beside US 380 AND the new proposed By-Pass
② Prefer in this order: ①Green ②Pink ③Red
③ Where is the option To Expand FM1461 AND run it straight thru to Preston providing a Northern East/West Route? No need then FOR southern down turn before Custer Rd
④ with Custer Rd EXPANSION - Need an OVERpass Similar To Preston Rd before traffic Gets WORST Also Need Sound barriers ALONG Custer Rd with its 50 mph Speed Limited.

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

The blue plan and the red plan would both not work. These plans put too many neighborhoods in the Sound zone of the bypass. The traffic from 380 is already loud enough. The traffic noise would be to loud for the people surronded by the bypass I believe that the green plan would be the best option because there is going to need a freeway in the future. Why not just make 380 a freeway. Increasing the speed limit and making 380 would be the best option Don't make a bypass or another freeway, just turn 380 into a free way. It would save time and money, fixing the problem faster. Don't we want the problem fixed fast and for cheap? That is why the green plan would be the best

NAME: PAM SARDO

ADDRESS: [redacted]

CITY: [redacted]

QC # 347 PASTOR CHARLES FAULTRY: My name is Pastor Charles Faultry. I'm the pastor of the Galloway Memorial Church of God and Christ that's on the pathway with the -- I think it's the pink line and the green line. It will -- basically that route would eliminate and abolish our church.

Our church was the first black church in Farmersville, Texas, built in 1914. It's been identified as a historical preservation item for the City of Farmersville -- I think they did that about a year and a half ago -- and embracing that portion for us.

That would impact that area. I know how people are concerned and TxDOT is concerned about historical preservation. For us, that would have a major impact.

The cost to relocate would be too costly for us because to build a church in today's economic -- it's not $120,000. They basically start at a half million to over a million.

The congregation, it's a fixed income and a few others; and that's one of the major concerns, is that we have low income. That would bring up the next concern, is involvement with justice. In that stretch, you also have some environmental justice issues because there are some trailer homes, there are some minorities in those

areas that would be displaced.

And those individuals cannot afford to move to other areas as -- in the north portion of the DFW area, the housing is much higher. It would create a burden on the individuals that have paid their money to pay off their houses. They cannot get a house today in today's market at that price, especially in the north side.

Those are the major concerns that we have. Preferably, I wish they would just go around and not deal with Farmersville because that stretch that they're doing, if you do the ride through the Farmersville area, the commercial buildings that they just built to improve the city is in that route; and it will impact the new buildings that they built, it would impact potentially Collins -- the Collins {sic} College that's going to be coming through. A lot of improvement that the City is trying to bring in, that will impact that.

Again, that's -- those are my comments, but I just wanted to make sure that we got that down. I put them in the box, but I also wanted to make sure that it's on record.

Thank you.

The GREEN AND Pink Alignment will impact the GALLOWAY MEMORIAL Church of God In Christ, which is the first BLACK Church in the City of FARMERVILLE. Approximately 1½ to 2 YEARS AGO. the City of FARMERVILLE included it on the HISTORICAL PRESERVATION List. The Church was built in 1914 AND is Approximately 104 YEARS OLD. The MAJORITY of the MEMBERS still LIVE in FARMERVILLE. The cost to REBUILD A Church at TODAY's cost will be too much for the Church to handle.

Please Print SAFETY CONCERN

WE HAVE AN IMMEDIATE ~~SAFE~~ SAFETY concern at the entrance to the Tucker Hill Development : 380 and Tremont Blvd. intersection.

THERE ARE TURN LANES from the EAST and WEST on 380, but there continues to be WRECKS WEEKLY. The speed limit of 50 is not being observed by cars or the many trucks using 380. Sitting in the left turn lane (from the west), waiting long times for the left arrow is threatening as vehicles speed by, seemingly inches from us. Slower speed limits would be safer, as well as a wider or protected left turn lane -- with a curb for protection.

NAME: Renee Smith

ADDRESS: [redacted]

CITY: [redacted]

We, as a neighborhood development, have been expected to digest and respond to what I consider an attack on our way of life, our properties and the reason we chose to live in McKinney Texas.

All proposed by pass routes and US 380 expansions encroach on our development. There is not one other community, in this plan, that faces such a threat.

Two years ago, a by pass was discussed that was the result of studies that determined the "best route" for future growth in Collin County and now we discover that the data used was somehow faulty. Now, it seems, new data has been accumulated and has produced different and more aggressive routes and they ALL target Tucker Hill.

So, what makes you think this current analysis is going to stand the test of time?

I personally feel (because I have studied and discussed) if you want to address the explosive growth that is expected in Collin County then you need to expand and improve the road system in that precise location. Most of the developments south of US 380 are nearly complete. There are intersections that are under retail development at this time which will understandably require modifications to traffic flow on US 380 (other efficiency/safety enhancements would be welcome to this highway). Please keep in mind that once the construction is largely complete along US 380 the traffic will diminish with the absence of trucks and similar work vehicles.

My neighbors and I vehemently oppose your current plans. We all know this is, as all projects are, a cost driven decision. I get it. But to totally ignore the personality, motto and life style of McKinney Texas is reprehensible and irresponsible. Rethink your solution and factor in the intangible aspect that has built McKinney Texas into the attractive and most desirable city it t is today. We have a chance to do the right thing. Set an example to other communities on how to preserve valuable qualities and still deal with growth.

I'm sorry this problem was not addressed sooner. It's a shame.

Richard Karch

Please Print I DO NOT SUPPORT ANY OF PROPOSED ALLIGNMENTS DUE TO POTENTIAL LOSS OF HOMES AND DEVALUATION OF OUR TUCKER HILL NEIGHBORHOOD AS A WHOLE AS WELL AS ADVERSE ENVIRONMENTAL AND HEALTH IMPLICATIONS. IF ANY FREEWAY CONSTRUCTION OCCURS ON THE EXISTING 380 FOOTPRINT ADJACENT TO TUCKER HILL, IT MUST IMPOSE MINIMAL RIGHT-OF-WAY AND NOISE POLLUTION BY MEANS OF CANTILEVERED ACCESS LANES, A DEPRESSED THROUGHWAY AND SOUND BARRIERS. ALSO IF ANY BYPASS OPTION IS CHOOSEN, IT MUST BE LOCATED AS FAR WEST OF TUCKER HILL AS POSSIBLE, WEST OF FUTURE STONEBRIDGE, NOT ON OR BORDERING TUCKER HILL.

We need hwy 380 Widened, and with service roads. That would keep traffic moving and avoid being run over or rear ended by people not having attention on the road, because it's constantly stop and go, especially in the evenings. With concentrating on 380, the rest of the country roads can be left alone, and this won't affect the entire county. It will solve the entire problem with traffic. They are building alot of New businesses, and having the service roads will allow thru traffic to keep moving.

Subject: TXDOT 380 Feasibility Study Open House Notice NTMWD additional comments

Mr. Endres,

In addition to the comments that were provided on behalf of North Texas Municipal Water District by Saunders, Walsh and Beard (17 May) to the 380 feasibility study , we have additional comments on existing key water and wastewater lines that may be impacted.

The least impact to the NTMWD is the option of only widening of the existing alignment of US 380. We have pipelines along US 380 but are insignificant cost wise to relocate compared to relocation costs of pipelines, lift stations and other facilities required by the other alignment options. Major impact areas for the NTMWD are the McKinney Landfill, Airport Drive & East Trinity Creek Corridor, US 75 and Bloomdale. The McKinney #4 Delivery Site, Pump Station & Ground Storage, Water Recovery Facility, the Wilson Creek Lift Station, the Upper North McKinney Lift Station, wastewater interceptors & force mains, and water transmission pipelines.

We can provide maps of these facilities and pipeline if you would like.

Thank you for the opportunity to comment of the different alignments.

Respectfully,

RJ Muraski

Flyovers at DNT and 380 is a significant waste of tax payers money and it causes accidents with freezing weather and raises safety issues. The DNT has north & south existing access roads at ground level and people would simply exit for the 380 Hwy and come to the light to either go east or west.

Subject: US 380 Realignment
Importance: High

Hello Mr. Endres,

You and I spoke on the phone a few weeks ago. To refresh your memory, my wife and I are new homeowners in the Tucker Hill community in McKinney. After owning a home in Stonebridge Ranch since 2002, we decided to downsize last year and move to this charming community with a small town feel, plus extremely nice amenities and common areas. As you know, the community center and community pool are located very near the heavily landscaped and manicured entrance to Tucker Hill at 380 and Tremont Blvd. My home is also on Tremont, just the third home from the entrance on the right side. We have more invested in this home than our previous home in Stonebridge, despite downsizing. If fact much of our life savings is in the equity of our home. My wife and I both plan to retire within the next few years and I feel our financial security may be in serious jeopardy if our home value is reduced by the US 380 realignment. The options to expand 380 in front of Tucker Hill would make our home very difficult to sell and would devalue it by more than $100,000, in my opinion and in the opinion of our real estate agent. Worse, we would not want to live here in retirement with a freeway across the street from our front porch and our master bedroom. I was told by TxDOT at the public meeting in Prosper that a 400' ROW would require complete removal of the existing treed and beautifully landscaped entrance to Tucker Hill, as well as razing the homes directly across the street from our home and an access road would be placed there. After working for more than 50 years, we would end up moving into a significant "step-down home" in a "step-down community" in order to have peace and tranquility in retirement, due to the significant loss of equity in our home. TxDOT should not put us in such a position and should not allow this to happen to any McKinney residents when there are better alternatives.

A bypass on either side of Tucker Hill would impact many additional Tucker Hill homeowners in a similar way. **The consensus of the Tucker Hill community is that Expansion of 380 in front of or on either side of Tucker Hill is not acceptable, so NONE of the proposed 380 realignments are acceptable.** In my opinion, the best solution is an east-west freeway separate from 380 and further north where so many existing homes and businesses would not be impacted. If a 380 bypass is inevitable, I believe it should follow the route of Custer Road, north from 380. A freeway is a natural boundary between communities. Consider SH 121 / Sam Rayburn as it divides McKinney and Allen, as well as Frisco and Plano. I don't believe anyone in McKinney wants our community divided into northern and southern sectors, and that is what would very likely happen. Custer Road is already a natural boundary between McKinney and Prosper, so neither community would be divided by expanding Custer into a 380 bypass. This would certainly take some cooperation and teamwork between the neighboring cities of McKinney and Prosper. I would be interested to know if anyone from these cities have met to jointly discuss this issue. If not, I would ask that TxDOT facilitate a discussion between the cities of McKinney and Prosper and immediately initiate that dialogue.

I have one additional observation regarding traffic flow. Commuters and frequent travelers take the fastest route and the path of least resistance. Bigger freeways and highways with higher speed limits attract a significantly higher volume of traffic. If you build it, they will come! Fewer lanes and lower speed limits tend to attract mostly local traffic and much less through-traffic. That is acceptable and preferable for McKinney residents for accessing local neighborhoods, shopping, schools, churches, parks, etc., along 380 in McKinney. It is absolutely not in the best interest of McKinney or Tucker Hill residents for 380 to be converted into a freeway or what would become the preferred truck route between I-35 and Highway 75.

Mr. Endres, I would welcome additional conversations between Tucker Hill residents and TxDOT. I'm sure you already know our community leaders. As a public servant paid by our tax dollars, we are counting on you to act in our best interests and to not allow the pristine community of Tucker Hill to be negatively impacted in any way. Please feel free to call me personally to further discuss this issue as well.

Most Sincerely,

Scott Oberle

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

While it is fully understood that any improvements would affect people, from what was presented the most logical fix for 380 would be the freeway option for existing 380. This would affect the least amount of homeowners, not split any existing land areas, and would have better asthetics than any other option. Model the design of North Dallas Tollway and this will contribute to the least traffic noise of any option. This option would leave land in west mckinney for future taxable development in way of houses and/or business, which would generate more funds for the city.

Please Print The red and yellow path go right through the middle of our property. It would put a major highway less than 100 ft from our home. We have 6 children who run cross county in those fields, play, hunt & explore nature in the creek & woods that would be destroyed by this path. This path is drawn over a creek that feeds into Honey Creek. This area has birds, fish, ducks, beavers, and so many other creatures living here, not to mention the beautiful trees. The value of our property would be ruined. The city is trying to put a sewage pipe line through our land & our mortgague loan said this could cause our loan to be in default because of property value loss. A highway would be even more damaging. We would not be able to access the other portion of our property.

The noise polution would be a major issue having a highway in our backyard. This was not on any plans when we purchased our property 2 years ago. Poor city planning should not allow the government to come & steal peoples private property. 380 Should remain on 380. Businesses located on 380 Knew this was a highway. Home owners & homesteads did not know that a potential highway was possible when they purchased. Keep 380 on 380.

I would like to make the comment that if 380 does indeed need to be upgraded in order to accommodate more and/or better traffic flow, rather than doing a loop around the City of McKinney, why can't a new roadway be stacked on top of the existing roadway with a single entrance/exit at Highway 75 and another at Custer Road?
Something similar to what was done along 635 in Dallas. I know it will be costly, but the City of McKinney and Collin County can surely both share in that cost.

The other option that I wish your department would look at is to use the Collin County Outer Loop that is already in the planning stages.

Lastly the worst option as far as I am concerned is the RED Option. We would end up with a 6 lane road in front of our house and a freeway behind. :(

To: Stephen Endres; tkimmey@burnsmcd.com
Cc: Stephanie Weyenberg
Subject: 380 Grade Improvements vs. Freeway

Stephen/Tony,

1) Based on your Travel Time Estimater, the "Draft of Comparison Options" page seems misleading
   a. If your own numbers show that grade Separated Intersections are 30% slower than a freeway (19/27), how does that translate to rating differences on page 20 like

      I.  vs

      And even

      II.  vs

      Those graphics make it appear as if freeways are 50 or 75% BETTER, when your time model numbers below only show 30% lower throughput

2) Based on your Travel Time Estimater, Are you actually saying a limited access 70MPH highway with frontage roads in 2045 is going to be 3 minutes **"slower"** than the same exact route is today with something like 15 stoplights?

3) If a freeway costs "$$$$$" (page 20) or around $1.5B in construction only (Stephen's presentation to the city 4/30) and grade Separation costs "$$", how do I get a more real number for "$$"?

   a. Has any work been done on what could be accomplished with "$$$" of non-construction options? ("$$$$$" – "$$")

      I. Is the entire set of "non-construction" options TXDot knows of ["regional public transit"] or are there others?

4) Projections can be tough, and over long time periods, a 3% growth rate that tapers to perhaps 2.5% or even 2% for one reason or another can make a huge impact. Also if say 10% more of the workforce is able to work from home and 25% work flexible hours in 2025, that can really mess up "rush hour" traffic models – to say nothing of 2045 models.
   a. How did you account for variability, high potential distributions of reasonable outcomes?
   b. What are your base demographic assumptions?

5) **Back to the Travel Estimator below: Are you really saying that travel from 75 to the Tollway will be 3 minutes SLOWER in 2045 with a limited access freeway in place than it is today on a 30-60Mph road with the 15 or so stoplights?**
   a. **If you stand behind these numbers, how do I get the underlying numbers (volumes, speeds, bottlenecks) to understand how that makes any sense?**

https://transportation.onetouchpm.com/TxDOT/US380/TimeMap/

	2018	20
Scenario	(All time in mi	
No New Improvements	16	
Select Grade Separated Intersections	N/A	
Construct Freeway	N/A	

STeve Ware
Campanella, Inc.

[redacted]

I live in North McKinney: TxDot is looking at critical 380 expansion options and unnecessary "bypass" alignments put a 400-foot-wide 70-MPH freeway 300 feet from my (for now) "country" home. That's an LBJ 635, George Bush 190, or Sam Rayburn 121 sized freeway. If you live in Texas, you'll be paying for it! BEFORE MAY 18 please take the One Minute TxDot survey supporting a "straight line freeway" (PINK or GREEN) ONLY. Even if you don't drive 380, "the shortest [**cheapest, fastest**] distance between 2 points is a straight line."

I am unconvinced by rating given on page 18 and the comparisons given on page 20. Page 21 lists "key factors we have examined". I am requesting a full copy of all the source data used in evaluating the proposed scenarios across each of those factors, as the structure and application process for all the specific calculations used in all the models or algorithms that contributed to the rating of each scenario along each of those factors, any intermediate results generated, all weightings applied, and all of the numbers that let to generation of the final "ratings". I am a database analyst with experience building complex models. I am comfortable working with a large variety of data types and system designs and can work with the appropriate people to establish the most efficient way to transfer this data and systems documentation.

I live in Tucker Hill in McKinney. My husband and I recently purchased our home and moved here because we fell in love with the beauty and small-town feel of our front-porch neighborhood. Any widening of 380 that cuts into Tucker Hill will destroy this lovely community that is an asset to the entire city. An alignment such as the "blue alignment" is the only viable choice.

The alignments for blue, red, green and pink all unfairly encroach on Tucker Hill neighborhood in McKinney between Stonebridge & Ridge. The alignment should push further west to not disrupt as many homeowners and also to not impede on the greenspace and add/dump congestion into a prime residential development.

(Per Texas Transportation Code, §201 811(a)(5)): check each of the following boxes that apply to you.

Mesquite, TX 75150-6643

Subject: US-380 expansion though McKinney, TX directly affecting Tucker Hill

Dear Mr. Endres;

I wanted to take a moment to provide a formal written and mailed correspondence in response to the request for public comments related to the proposed expansion of US-380 through McKinney. I attended the public meeting last week, and I completed the online survey, but I wanted to be sure my comments were made on record and not just part of an online poll.

I believe, as do most of my neighbors, that a conversion of US-380 into a limited access freeway is unfeasible for the community, our homes, our neighborhood amenities and our neighboring businesses and other communities like Stonebridge Ranch (directly across 380). Such an expansion of 380 would limit our access to our own community, limiting our ingress/egress to and from our neighborhood, reducing times for first responders and access to nearby hospitals and support services.

I/we also believe that the blue/red/yellow proposed routes bypassing 380 to the North and dumping into 380 on the near East or West side of our neighborhood would be catastrophic to our home values, quality of life (noise and air pollution) and not aid in the traffic plight. Our community and city provided feedback in late 2016 showing that the 380 connection should occur closer to Custer road, even if on the McKinney side, and not the shared side with Prosper. This reroute would negatively impact significantly fewer homes and businesses.

The city, county and TXDOT should focus on continuing to improve arterial traffic on N/S and E/W arteries, and expand the Collin County loop just a few miles north of 380. By providing the community and businesses with simple, non-highway methods for navigating town to get to 75, 121, 380 or the tollway and not opening up another freeway and inviting more through traffic. We can also improve the bypass and county loops, connecting to 377 and the tollway to 75 to reduce the impact of intra-county commercial traffic along 380 (construction vehicles, gravel/dirt haulers, cement trucks, etc. that currently plague 380).

Our community has spoken, but we want to be sure we are being heard.

Thank you for taking the time to review my comments. If you would like to discuss any of these options with me, please do not hesitate to contact me directly.

Sincerely,

Stephen "Steve" Remington

I strongly oppose all alignments north of current location. It will displace or decrease quality of life and property value for many residents of the northwest sector of McKinney & its ETJ.

Please keep 380 on 380. I suggest prioritizing the Outer Loop to take congestion off 380, then develop 380 as needed, building to freeway size when necessary, but keep it on the current footprint as much as possible.

Most of Options on layouts Feed BACK into the existing 380 either at STONEBRIDGE OR BETWEEN STONEBRIDGE AND Ridge ROAD. WITH The Heavy existing TRAFFIC (Including Many Trucks + SEMIS) IT SEEMS to BE EVEN MORE DANGEROUS option than Current Roadway. It would SEEM to ME to RUN NEW BYPASS Continuing NORTH of PRESENT 380, to WEST of Custer ROAD BEFORE Rejoining existing 380 Roadway. More UN-developed LAND Affected this WAY, and DIVERTS Heavy Traffic PAST (WEST) of Custer Road

Please Print I do not want 380 as it is now increased in size from Custer through McKinney.

The road needs to be north of the current 380. It needs to go North of the Collin County Courthouse. Going South of the courthouse is too close to Scott Johnson Middle School.

I drive on 380 everyday the traffic is too much & I see wrecks at 380 & Lake Forest all the time. We live on 380 - homes and businesses are located there. This is the heart of McKinney. Move the traffic north. Give us another route for the rock haulers & 18 wheelers. Get Dart to come to McKinney!!

To create a 70 mile an hour By Pass after building brand new homes is unethical - McKinney Unique by nature is a falsehood to 380 should be expanded + not a by pass so close to houses + schools ! ! !

McKinney never should have given building permits when the knew where the road would be built.

Please Print — 1) BLUE/RED/YELLOW don't make sense to me. The remaining green/pink would still have to be expanded & the added merge areas would make congestion worse. Besides - more length of road almost certainly means more impact to people and nature.

IF you have to do a lot of the green/pink anyway then you may as well stay in existing corridor.

BLUE/red/yellows are not far enough out (where will growth be at time of construction? - still behind the curve!) - NEEDS to be ONE continuous go around from Prosper to Farmersville and further north. (border of McKinney/Melissa)

Speed limit reduction on current road (before rebuild) would increase safety - too many on/offs for 60+ mph traffic.

Controlled access highway in existing corridor AND one go around - further north. NO TOLLS or HOV!

A bypass route is clearly needed. There is already too much development along US 380 to simply expand it in place. It's hard to imagine that it would be any less developed in 10-20 years when construction might actually begin. The "red" plan seemed to impact the most homes of all the bypass options. The other bypass options seem more popular, and they might help assist more with future known development plans in McKinney.
I would also like to see other East-West roads developed as alternatives to 380. Wilmeth would be great focus if it were connected East-West - we'd almost never drive on 380 if that option existed.
Thank you for your time. We appreciate it

Red light is needed for US380 and CypressBend. With all the homes that were added in this development, entering and exiting this development has become very dangerous. Community safety should be of the highest priority. The accident rate at this location is too high. This red light should have been considered and installed long ago. Even at 6:00 a.m. when it's dark, there are quite a few cars and with the fact that it's dark and you're trying to pull out into the center lane, it's terribly hard to see where you are. A light would alleviate that worry and tension. It's very hard to get out going left out of Cypress Bend or left into Cypress Bend coming from the east.

Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

AN immediate concern is the intersection of 380 and Tremont Blvd., the entrance/exit to the Tucker Hill development. There have been about an accident a month at that intersection due to excessive speed and agressive driving on 380. There is a signal light near the top of the hill at the intersection but due to lighting (atmosphere) and some terrain obstruction (the hill), it is not highly visible.

Also, the other road (Carasemere) is right turn only on to 380 and not the significant road as noted on the table maps at the meeting, Tremont Blvd. is the main road.

THE GREEN, PINK, AND RED PLANS WILL DESTROY THE FRONT HALF OF MY NEIGHBORHOOD, TUCKER HILL. CLOSE TO A DOZEN HOMES WILL BE DESTROYED AND AT LEAST ANOTHER TWO DOZEN WILL BE UP AGAINST A BARRIER WALL NEXT TO A FREEWAY.

AT THE VERY LEAST YOU NEED TO NOT HAVE ACCESS ROADS RUNNING ALONG THE FREEWAY BETWEEN COSTER AND RIDGE AND THE SOUND WALLS WOULD NEED TO BE UP AGAINST THE FREEWAY ITSELF

10 - JUST DO NOT BUILD A FREEWAY MORE ROADS AREN'T THE ONLY ANSWER -

Please Print As a resident of Tucker Hill, my position is No to all proposed alignments due to the potential loss of homes and the devaluation of our neighborhood as a whole, as well as, the adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right of way and noise pollution by means a cantilevered access lanes, a depressed throughway and sound barriers, if any bypass option is chosen it must be located as far west of Tucker Hill as possible; West of Stonebridge and not bordering Tucker Hill.

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Peggy Loar	If it is congested, I agree but any major construction on 380 would create exponential congestion for years to come during construction!
Charles Loar	Yes, it is congested, however, construction on 380 through McKinney would be a nightmare for years to come.
Patty Brazelton	Congested, heavy use rush hour, frequent accidents, getting rear ended turning into housing addition, Road noise
Timothy & Julie Ready	Red light needed at US380 and Cypress Bend
Alicia Denman	Yes, it's congested but any construction only makes it worse for years!
Amanda	
Amanda hanley	
Miguel-Angel Maldonado	Yes.
Miguel-Angel Maldonado	None so far.
	Too congested, unsafe speed limit
Nathan	No
Doug Hagedorn	Traffic.
Swathi	
Zachary Taylor	
	Lights and congestion, particularly construction vehicles
Maria Snyder	no
John Snyder	Just hear that there are many accidents on that road. Otherwise, no.
Christy Meaney	Yes, card are running the new red light put in.
Bonnie Neal	no
Kathryn Anderson	
	YES!!! Congestion. Lower property values. Safety
Travis Wendte	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Peggy Loar	Taylor-Burke to 75 Service Road to Wilmeth across to the other side of town /Hwy5
Charles Loar	Taylor Burke to 75 Service Road or Wilmeth to Hwy 5
Patty Brazelton	Custer and/or Stonebridge to Virginia for South bound trips. Any trips north - its Custer to FM roads
Timothy & Julie Ready	Mostly wait it out.
Alicia Denman	Taylor Burke to 75 Service Road or Wilmith to McDonald
Amanda	
Amanda hanley	
Miguel-Angel Maldonado	Virginia Pkwy
Miguel-Angel Maldonado	Virginia PKWY.
	Virginia, El Dorado
Nathan	I go the back roads
Doug Hagedorn	Tollway. Lake Forest. Ridge
Swathi	
Zachary Taylor	Custer
	121
Maria Snyder	Virginia
John Snyder	Virginia or Eldorado, or go up Custer to Celina.
Christy Meaney	
Bonnie Neal	NA
Kathryn Anderson	
	Custer Virginia Eldorado
Travis Wendte	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Peggy Loar	Loop around McKinney to reduce through traffic of large vehicles.
Charles Loar	Building the loop around McKinney to get some of the thru traffic off of 380
Patty Brazelton	Widen 380 where possible with over passes at major intersections, add turn lanes, widen and extend out all East and West bound roads to take some traffic off 380. Loops and ByPasses seem only temporary fixes - they all seem to eventually turn into stop and go traffic as lights are added, ext. Beltline used to be a loop - now it is a mess. I don't believe the blue, red or yellow alignments will be any different over the course of time. Consentrate on 380, stop the building of businesses until a design plan is achieved and can be executed. I believe continuing to build along 380 just adds fuel to the fire
Timothy & Julie Ready	Red light at US380 and Cypress Bend. More police doing radar. Reduce speed limits at intersections with no red lights.
Alicia Denman	Loop around McKinney. The people in the new homes North of town knew when they bought out there that there might be a loop built. This has been discussed for years, so they shouldn't be trying to stop it now!
Amanda	
Amanda hanley	Make it a highway on the existing alignment. Or make a new loop north through celina
Miguel-Angel Maldonado	
Miguel-Angel Maldonado	None so far.
	A bypass looping to 75
Nathan	
Doug Hagedorn	None of the 5 solutions proposed. A new freeway should go north of Tucker Hill and west of Custer, away from current neighborhoods.
Swathi	
Zachary Taylor	380 and 75 intersection needs a new access from 380 east to 75 South
	Freeway without lights
Maria Snyder	I am ok with it but hope there will be a service road. There is a lot of commercial zones and they will continue to be increased
John Snyder	Not fully aware of the problem.
Christy Meaney	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Bonnie Neal	Widen existing route
Kathryn Anderson	
Travis Wendte	Build a loop further out that effects fewer existing communities.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Peggy Loar	Not on 380! Only as a loop around McKinney
Charles Loar	Not on 380 - By the time it is finished it would already be outdated.
Patty Brazelton	No
Timothy & Julie Ready	No only blue
Alicia Denman	Only a loop around McKinney
Amanda	
Amanda hanley	
Miguel-Angel Maldonado	Yes.
Miguel-Angel Maldonado	No.
	Yes
Nathan	No
Doug Hagedorn	No. It should be far north of 380
Swathi	
Zachary Taylor	Yes
	Yes
Maria Snyder	Unfortunately 380 has become a major access road with the increase of population in the area. There is a lot of truck traffic therefore I see the need for a highway there. .
John Snyder	Not opposed unless my tax dollars are paying for it. Then, yes, I oppose and do NOT support.
Christy Meaney	No
Bonnie Neal	Yes
Kathryn Anderson	
	No
Travis Wendte	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Daniel P Kovarik	
Melba	Speed is high between Custer and I-75
Trish Stineman	Too many big rigs (Trucks), traffic jams. Unsafe driving.
Jack T Powell	
LaBron Sharp	Heavy traffic
Doug Ashby	Congested fast and dangerous
sarah mazdra	Congestion and road work
Mark Quillan	No it’s perfectly fine the way it is
Nataly Ruan	
Natalie McCall	Yes - mostly that semis drive too fast to stop for lights.
JD Eubank	Regardless of the alignment chosen, the exit ramp from US-75 N to US-380 needs to be expanded to 2 lanes. Traffic backs up on US-75 N causing commuters to have to slow from 70 MPH to STOPPED. Also, the service road between the exit ramp and US-380 should have the westbound turn lanes extended south to where the exit ramp enters the service road to ease traffic merging.
Justin Monte	Congested, slow moving traffic through mckinney, too many accidents happening
Justin monte	Too many lights. Congested traffic
Sarah East	No.
Alexander Harper	380 can become a bit congested around the intersection with State Highway 75 but clears up considerably farther West.
Lakshmi Kuve	
Raquel Fisher	Always accidents, or people speeding
Sydney Berry	No
Scott Bovaird	It does get congested at points, and may get worse with continued growth.
Jan Chapman	There seems to be a lot of traffic accidents.
Bonnie Bovaird	It will become more crowded over time
Glenn Goodwin	Not really. I wish the traffic was a little lighter, but it's not that bad.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Daniel P Kovarik	Virginia to Hardin
Melba	Virginia or White
Trish Stineman	Virginia parkway
Jack T Powell	none, Virginia is slower now
LaBron Sharp	County roads
Doug Ashby	None available for my neighborhood
sarah mazdra	Virginia Parkway, Custer Road
Mark Quillan	Industrial and air port road
Nataly Ruan	
Natalie McCall	None anymore because all the alternate routes are just as bad due to construction.
JD Eubank	
Justin Monte	Virginia, Hardin, Eldorado, White
Justin monte	Virginia, Hardin, Eldorado,
Sarah East	289 south over to Dallas North Tollway
Alexander Harper	If I am going out towards Denton sometimes I'll take State Highway 121 to the Dallas North Tollway.
Lakshmi Kuve	Virginia Pkwy, eldorado Pkwy
Raquel Fisher	Virginia
Sydney Berry	Go down 75 to Virginia
Scott Bovaird	Virginia, Eldorado.
Jan Chapman	Virginia Parkway
Bonnie Bovaird	Not many options. Sometimes Virginia, but it is a mess from construction right now.
Glenn Goodwin	I take Custer to Sam Raybourn.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Daniel P Kovarik	
Melba	Upper deck for those traveling to Denton perhaps. Similar to I-35 in Austin.
Trish Stineman	Reroute a loop north of the city to alleviate some of the through traffic so that people who live in the city do not have to suffer the congestion, especially as our city is only half done growing.
Jack T Powell	
LaBron Sharp	Till road
Doug Ashby	A loop similar to Denton North 288, but freeway
sarah mazdra	Do not build alignments
Mark Quillan	Nothing
Nataly Ruan	
Natalie McCall	Bypasses over major arteries How can you ever get rid of all the local traffic?? The congestion is not people going all the way from Princeton to Denton and vice verse
JD Eubank	An elevated level roadway (long bridges) similar to that of I-35 through Austin, TX. This would allow for traffic to bypass downtown areas via an elevated limited access roadway and avoids having to completely redefine downtown areas via a ground-level, width expanded roadway. An elevated roadway along the existing alignment would also avoid displacing residents living to the north of US-380 that do not want a new highway running though their property. From the currently provided alignment options, I believe a combination of the BLUE and YELLOW alignments for the McKinney area is the best option, described as follows: Follow the BLUE alignment from the split to the north off existing US-380 @ Airport Dr. At SH-5 follow the YELLOW alignment to cross US-75 @ FM-543. Finally, follow the YELLOW/BLUE alignment until it rejoins with existing US-380.
Justin Monte	Less traffic lights, more lanes
Justin monte	More lanes, less lights
Sarah East	Move the highway north off of the existing 380 corridor. If 380 goes north at Custer Road, far fewer businesses will be affected. Anywhere east of Stonebridge will have a huge negative impact on residential areas. Contrarily, the area west of Stonebridge Drive on 380 is mostly commercial and has far more vacant land. Custer is also a much better route for people to cut through on their way north.
Alexander Harper	Adding lanes through more congested areas would certainly help.
Lakshmi Kuve	Ensure the highway expansion does not place the road close to residences and schools
Raquel Fisher	Traffics cameras
Sydney Berry	More lanes
Scott Bovaird	I think I'd prefer widening the existing road if possible.
Jan Chapman	
Bonnie Bovaird	I would propose a northern route connecting 75 with what will be the eventual extension of the Dallas North Tollway. I am not in favor of any route that turns north so close to Stonebridge Drive.
Glenn Goodwin	If a freeway or bypass is needed, the most forward-thinking solution would be to continue the DNT farther north and then northeast to connect to I-75 around Sherman or Melissa. By the time a bypass is actually completed, the entire area that would be inside such a bypass will need it anyway. An alternative would be to widen Preston north of 380 and then build a connector to 75. The current proposals of widening 380 and/or creating a bypass that connects to 380 east of Stonebridge are too little too late; they would only serve to displace hundreds of residents and business owners for no appreciable gain because all the growth in the next 10-15 years will be west and north of the proposed bypass routes and 380.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Daniel P Kovarik	yes
Melba	needed.
Trish Stineman	I'm not sure but it's probably a better solution than what we have now.
Jack T Powell	No
LaBron Sharp	Yes
Doug Ashby	Depends on alignment
sarah mazdra	No i am against it
Mark Quillan	No
Nataly Ruan	
Natalie McCall	No
JD Eubank	I believe a limited access roadway would definitely be beneficial for traffic flow. However, the alignment selected would still need to make sense for the community and local residents whose property would be impacted by the roadway.
Justin Monte	No
Justin monte	No
Sarah East	Not regardless of alignment. If the freeway is placed east of Stonebridge and moves north, I would be very supportive.
Alexander Harper	Not sure
Lakshmi Kuve	No
Raquel Fisher	For the amount of traffic that goes through there something needs to be done.
Sydney Berry	No
	No
Scott Bovaird	The building of a freeway so close to existing residential bothers me. Perhaps looping north further west say at Custer, and following more established routes would be better.
Jan Chapman	
Bonnie Bovaird	No
Glenn Goodwin	I do not support the widening of 380 into a limited access freeway; that will only increase traffic, not alleviate it (just like building bigger and wider freeways in Houston has had the opposite of the intended effect, which could have been predicted by looking at existing studies on the subject -- adding lanes only increases usage and traffic). I can support the building of a bypass if it runs from the DNT north and then northeast to 75. This will have the least detrimental impact to existing homeowners and businesses and will have the greatest benefit to all stakeholders in the long-term.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Matthew Weyenberg	It does get congested, and it seems accident prone.
Brendan Heselton	no
Aaron Holle	No
Wes Pippin	
Teri upchurch	
Mirnes	Should be more lanes added to the US380 so much traffic and only 2 lanes are going in one direction so many accidents.
Jacob Munoz	
Chris	No, its perfectly fine.
Christine Lindsay	No
J Staton	Slow traffic
Steven savary	Too fast of a road too close to residential
Sue Vanness	Safety and congestion as population increases
Marilee evans	We need to finish other roads and build the outer loop sooner
David Abramo	
Erick	
Scot Henderson	
R. Paquette	I appreciate the improvements. McKinney to Denton is much better than the past. But it will be very congested with the population growth.
J Kuehler	More and more congestion on 380.
Dianna Ducharme	Is very busy and too many accidents.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Matthew Weyenberg	The county roads. I think it is CR 943.
Brendan Heselton	121
Aaron Holle	None it's never that bad
Wes Pippin	Virginia to Custer
Teri upchurch	
Mirnes	None waiting for traffic to clear off I don't have any other way to get home then stay in traffic and wait should be more alternative roads or more lines added to the US 380 when the US380 is congested it can be traffic for miles and 30-45+min waiting.
Jacob Munoz	
Chris	I never take alternative routes.
Christine Lindsay	None.
J Staton	
Steven savary	Virginia
Sue Vanness	none
Marilee evans	None. We need to finish other roads north of 380
David Abramo	
Erick	
Scot Henderson	
R. Paquette	Virginia - Rock Hill, or SRT to 35 E north.
J Kuehler	Virginia or Ridge
Dianna Ducharme	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Matthew Weyenberg	Fix 380 on 380. Build the outer loop to a full freeway.
Brendan Heselton	Widen the damn road
Aaron Holle	Remove stoplights or make overpasses
Wes Pippin	
Teri upchurch	I do not think any of the options proposed are feasible nor the best options. All of them would terribly disrupt the foundation of this town and it will only be a temporary fix in the end. I think the new highway should be a completely loop around Princeton instead of straight through or zigzagging in and out as proposed. It should be a loop that goes either further north or south where it is more country that would disrupt less people's businesses as well as homes. There are far better options than the one proposed!
Mirnes	Add more alternative roads or expend US380 with more lanes.
Jacob Munoz	
Chris	None.
Christine Lindsay	Widen 380 by 1 lane each side
J Staton	Widen
Steven savary	Expand north not south
Sue Vanness	True bypass similar to purple dotted line
Marilee evans	Overpasses. Fixing 380 at 75. A bypass would not relieve enough traffic The fastest way from point a to b is a straight line. Not driving miles out of the way.
David Abramo	
Erick	
Scot Henderson	
R. Paquette	I support a new route north of 380. That's where the population growth needs a road.
J Kuehler	
Dianna Ducharme	No 380 Freeway.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Matthew Weyenberg	No. I only support fixing it in its current footprint.
Brendan Heselton	NO
Aaron Holle	No
Wes Pippin	Not if it is near elementary schools.
Teri upchurch	I do not support any of the options proposed.
Mirnes	Buildings and surrounding is not the issue it's the US 380 that's always traffic and getting congested very often and lots of accidents due to 2 lanes 1 way.
Jacob Munoz	No.
Chris	No I do not.
Christine Lindsay	No
J Staton	No
Steven savary	No
Sue Vanness	no - REGARDLESS is the operative word
Marilee evans	No. We need to finish the other roads so we have other options so all the traffic is not on 380
David Abramo	
Erick	
Scot Henderson	
R. Paquette	No. This survey won't let me pick it, but my first choice is the purple dotted line, the outer loop. My second choice is the pink or green.
J Kuehler	Yes- not sure what other option would work since you cannot add lanes.
Dianna Ducharme	No.

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
	Of course.
S Vanness	Congestion will increase and safety will suffer as population grows
Elizabeth Spilman	No
Stephen	
Luke Lauterbach	
Jackson Douglas	Not particularly.
Eric Wilson	My biggest concern with 380 is the lack of median guards to prevent crossover accidents.
Natalia Perez	Leave Erwin park alone!!!!!!!!
Kammy Jungjohan	no
Ashley Patton	
Dawn Ventre	Accidents

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
	From Hwy 380 turn on CR 337, then CR 407 through Monte Carlo Blvd. continue on CR 461 and FM 1377 to CR 496, then CR 561 and onto CR 559 at the bridge on Hwy 380. This route bypasses Hwy 380 east of FM 1827 all the way to the bridge at Lake Lavon.
S Vanness	
Elizabeth Spilman	Hardin to Virginia or Eldorado
Stephen	
Luke Lauterbach	
Jackson Douglas	Side streets like Hardin & Lake Forest, or 75 & then another exit.
Eric Wilson	Eldorado
Natalia Perez	Leave Erwin alone please
Kammy Jungjohan	custer
Ashley Patton	
Dawn Ventre	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
	I would suggest another option, a better option. I am a resident and business owner in the City of Princeton. Unfortunately, any of the five alignment proposals will either get my homestead and acreage or my business. [redacted] [redacted] I have owned my business since 1987. My father purchased the property in the 1960's, and set up a father and sons' business. I inherited it from him, and started my business. I have considered it a means to help with my retirement. With the massive amount of ROW needed for the project, it would consume the acre lot and displace my business. For a small business owner like myself that would be financially devastating. In addition, if the freeway does comes down main street (Hwy 380) through town not only will it take the whole acre lot I work from and shut me down, but it will take business/commercial buildings and/or their patrons' parking area all the way up and down 380. Many businesses would be forced to close or be displaced. Also, the business property lots on Hwy 380 through Princeton are not very deep. Behind them are homeowners and apartment complexes. If business properties are taken up by the large amount of ROW, it will affect and possibly displace those residents as well. And for businesses to reestablish on Hwy 380, they would have to buy the residential properties and those properties would have to be rezoned for commercial use. Just that would be a significant impact for our community in and of itself not to mention the economic impact. Plus just the construction would create a living nightmare. Hwy 380 is already crowded and congested. It is the main roadway to get from McKinney to Greenville. Construction would totally paralyze the flow of traffic for years. It would increase drive hours and congestion hours. The impact of the freeway coming through main street Princeton is too great and too costly. Now as for the freeway loops around the cities. These loops avoid traveling through the main street of these cities, but it directs the traffic back on the Hwy 380. Hwy 380 is just as congested in between cities as it is through cities. And according to your growth numbers, it doesn't address the problem of Hwy 380 being inadequate to accommodate the amount of vehicles in the future. These proposed loops are a temporary fix. We are all too familiar with completed roadways being reconstructed soon thereafter because they were inadequate to accommodate the traffic. One thing we know now is that the traffic will only increase dramatically. I believe the only solution that makes any sense is a brand new major freeway. This would be a route north of Hwy 380 that would run from east county line to west county line. This route is predominately in a rural sector of Collin County which goes through open, undeveloped areas. Due to the fact that it is undeveloped, it would be less disruptive and catastrophic to the public as a whole, with much less displacement of homeowners and business owners. The construction of a major freeway in this rural section would obviously allow for faster completion of the project with less public disruptions and inconveniences. The freeway would handle more traffic, offer a smoother flow of traffic, decrease hours of travel and hours of congestion delay. And it would of course alleviate the congestion of Hwy 380 which is the main concern and goal. A major freeway that goes from east county line to west county line would surely be adequate, sufficient, and relieve other county roadways as well. It would certainly meet the future transportation needs of Collin County as a whole. It would definitely have less significant impact than the proposed improvement plan.
S Vanness	Bypass
Elizabeth Spilman	
Stephen	
Luke Lauterbach	
Jackson Douglas	
Eric Wilson	Add grade level changes (ex flyovers) to the major intersections to limit congestion.
Natalia Perez	
Kammy Jungjohan	leave her alone
Ashley Patton	
Dawn Ventre	Fix it without distroying our community

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
	NO, not reconstructing Hwy 380 or loops. I do support an alternate route as stated above.
S Vanness	No
Elizabeth Spilman	
Stephen	No
Luke Lauterbach	
Jackson Douglas	No.
Eric Wilson	No
Natalia Perez	No
Kammy Jungjohan	no
Ashley Patton	
Dawn Ventre	Only when it doesn't hurt the homeowners and our neighborhood

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Rahul Pupala	Accidents daily because of speed and people failing to stop at red lights
Mark Hitchcock	The number of accidents at 380 and Airport Rd
Jeff Whanger	Sync the lights better between dnt and 75 so traffic doesn't have to stop. Also, traffic backs up real bad on 380 westbound at dnt turning left (south) onto dnt, can you build a ramp into dnt or overpass? Also, traffic backs up real bad on 380 eastbound at 75 turning right (south).
C D Crossley	It is the most dangerous roadway I have lived near. The subdivision I live in is directly off of 380. Two more phases of building have increased the number of homes and we have only one way in and out of the subdivision. We lost a mother and son in a horrific accident last year on 380 at the entrance to our subdivision.
Holly Tripp	my concern is with the number of auto accidents that seem to occur so frequently
Sue Cauley	Speed limit too fast in congested areas
PAUL AND PATSY DIMAURO	yes too congested...
Jason Steed	congestion
Jenny Ahlemeyer	
Lauren Swanson	It's perfectly fine and is one of the few roads that don't need updating. Few times of traffic and enough lanes.
Corin Thomlinson	Lots of traffic. High speeds with multiple intersections, which is dangerous.
Jennifer Segui	Major roadway through the heart of residential areas with major trucks and congestion
Kristin Welsh	People go through red lights constantly, there's poor visibility around turns, it is too narrow by the 75 corridor, and there are too many traffic lights.
Todd Finney	No. Sycronize the lights better and you could address volume and flow
Sara Thomas	
Wyatt Riggs	Speed limitation is under what would be understandable for the amount of traffic. The overall trip experience towards the downtown of mckinney could be greatly improved with fewer bumps past hardin and greater speeds.
Heather Thome	We' ve only been here two years and it continues to be getting more crowded.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Rahul Pupala	Virginia
Mark Hitchcock	There was a 380 shutdown near Princeton where we took side and back roads that were north of 380 to get around.
Jeff Whanger	El Dorado or main.
C D Crossley	I have no choice but to use 380 to get out of or return to my subdivision. Since cars are traveling at 60 mph whenever I need to go anywhere I have started going right (east) even when my final destination requires me to go west. I then turn right at Beauchamp Blvd (near the Wal-Mart) and make a u-turn so I can have a protected left turn onto 380. But despite doing that I have had several close calls returning home as I have had others who do not have the right of way make left turns in front of me. Also have encountered cars coming head on toward me in the Center Turn Lane as I am stopped in the left turn lane for turning into my subdivision. There are no alternative routes that will get me home.
Holly Tripp	Virginia Parkway
Sue Cauley	121
PAUL AND PATSY DIMAURO	6 lanes but the center turning lanes need to stay there.
Jason Steed	Custer maybe
Jenny Ahlemeyer	
Lauren Swanson	I don't take an alternate route
Corin Thomlinson	Virginia Rd, El Dorado Rd, or 121
Jennifer Segui	Stonebridge, Custer, Virginia
Kristin Welsh	Virginia Parkway
Todd Finney	Not bad enough to go to that extent
Sara Thomas	Virginia
Wyatt Riggs	Virginia, though it too is a mess when there is traffic. The term congested is grossly used here (pun intended)
Heather Thome	Not really any to take.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Rahul Pupala	Fix the entire problem, slow people down and add more lights and create a freeway further north that goes from 75 to 35 for the trucks
Mark Hitchcock	Accident analysis to determine greatest areas of consistent traffic challenges and then insure that there are detours to deal with them. In terms of road development, understanding where the greatest number of residents could be negatively impacted and weighing against the benefits. Right now we can't tell which option would provide the greatest benefit and the least negative impact.
Jeff Whanger	Build the outter loop instead. This will put through traffic on that freeway instead of 380. Also maybe sync traffic lights. Keep it as is, build out dnt to the north and connect it to 75 with a new freeway. Don't impose on existing neighborhoods and businesses. Take the through traffic elsewhere.
C D Crossley	I know the plans are years away but something needs to be done now. Speed limit is 60 mph hour on the stretch of 380 where the entrance/exit to my subdivision is located. I think a stoplight is needed and the speed needs to be reduced to 45 mph. This is in the city limits of Princeton. As of today there have been 9 wrecks in Princeton and surrounding area on 380 so far in the month of May and the month is not over. Something needs to be done now or there will be more lives lost. I know the big improvements are probably ten years away but something has to be done now.
Holly Tripp	a bypass to the north, but it would need to connect to 380 west of Custer, not at Stonebridge Dr or Ridge. too close to residences and schools. it should connect at the Dallas Tollway.
Sue Cauley	
PAUL AND PATSY DIMAURO	Widen
Jason Steed	widen it
Jenny Ahlemeyer	
Lauren Swanson	
Corin Thomlinson	I think the red option seems reasonable, but maybe the drop into 380 could be a little further east of the proposal. Right now, the drop in is very close to a major subdivision. A little further east will ensure that only a less property elimination occurs.
Jennifer Segui	From NT Toll, start the bypass BEFORE Custer and have it run over Commercial areas and AWAY from residential areas...
Kristin Welsh	A loop around the core of McKinney that will take traffic outside of the existing 380.
Todd Finney	address north of 380 where there are less residents impacted
Sara Thomas	
Wyatt Riggs	
Heather Thome	
	Why build it

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Rahul Pupala	Not if it disturbs OuR neighborhood
Mark Hitchcock	We appreciate that you are evaluating this prior to it becoming a crisis and where open land is still available. We agree it needs to be addressed if growth happens at forecasted rates, however we are concerned with the level of growth that seems to be happening for the sake of growth. We moved to McKinney in 2015 because it had been ranked the #1 city. The writers confirmed that the optimum size for a happy city/town was 75-150K. We don't understand why McKinney or other surrounding cities want to become 400K+ cities which will make them as miserable as LA, the area we moved from where it is giant parking lot that offers no distinction between cities.
Jeff Whanger	No.
C D Crossley	Yes. It appears city leaders have not planned ahead as they keep allowing more businesses to locate along 380 in Princeton which probably makes the building of a freeway more difficult. As it is now I am grateful every time I reach my destination when I leave my community and relieved when I once again return home. But I am always aware of the dangers in anytime I have to go or return to my abode. Safety should be the deciding factor. And, I fear many residents or those using this stretch of 380 do not understand how to use the Center Turn Lane. I know there is no easy solution. I just want to live.
Holly Tripp	not sure
Sue Cauley	No
PAUL AND PATSY DIMAURO	Not as it is laid out now. Every alignment affects us the same. We lose almost half of our property. Feel it is unfair for all the right of way come off of north side of road. The land across the highway is no more important than ours just because it has a berm and new houses. We would not be able to sell our land or build on it with the way it is now....It is only fair that the amount of right of way be split in half...Had anyone thought of what this does to a piece of property that you planned to be your retirement....Please look at this again.
Jason Steed	
Jenny Ahlemeyer	I do NOT support a freeway along the pink or green routes. As a resident on the north side of Wren Creek neighborhood, the current US 380 is just behind our house. The sound barriers and current easement are much appreciated. A freeway built along the pink or green routes would be obnoxious for sight and sound and lower our property value. We recently moved here and paid a premium to live in this great neighborhood and the very desirable master planned community of Sonebridge. If a freeway is built, I strongly request the BLUE or YELLOW route to expand away from current residents. Thank you for requesting community input!
Lauren Swanson	No
Corin Thomlinson	I support the building of a freeway, but not regardless of alignment.
Jennifer Segui	No
Kristin Welsh	Yes
Todd Finney	No
Sara Thomas	
Wyatt Riggs	Yes, as long as proof of public roads upkeep is provided and there is a thorough EPA study conducted. Also tree planting, not grass (weeds and useless water wasting)
Heather Thome	No
	Don't make it a thing, mckinney is " unique by nature."

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Garrick Whitnah	No
Jarret thornton	
Garrick Whitnah	No
Nancy Lawrence	Yes! It is too crowded and too many accidents
Bill McMillan	Congestion
Richard Briscoe	Coming East from Denton on 380 in afternoon rush hour, it takes very little to cause major backup congestion, i.e. automobile accident. Access at the DNT off ramp is a huge choke point.
Amanda Gilbert	Yes - traffic volume is high making the road dangerous. Too many commercial vehicles speeding.
Melissa Leps	Congestion. Too many trucks hauling rock.
Ron Carpenter	Eliminate trucks and limited speed to 50 MPH
Susan Smith Carpenter	Yes! Extreme speed and large trucks and speed
Gerald & Leslie Gantzer	Busy Traffic.
David Babin	
Ron Carpenter	Eliminate the Large Trucks, make speed limit 50 MPH
Penny Savage	Needs concrete divider.
Christine	Yes
Jason Blake	Too many stoplights
michelle gamble	congestion
Robin Lucero	I most frequently travel between DNT east to 75. My biggest frustration is between Lake Forest east to 75
Patrick Piejak	Towards 75 there is a fair amount traffic congestion.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Garrick Whitnah	none
Jarret thornton	Virginia
Garrick Whitnah	none
Nancy Lawrence	Virginia Pkwy
Bill McMillan	Virginia
Richard Briscoe	Westbound and Eastbound, Stacey/Main,Eldorado, and Virginia Pkwy. Also would take Custer, Alma and Ridge from the South to my residence.
Amanda Gilbert	Virginia or Eldorado
Melissa Leps	Virginia
Ron Carpenter	Surface streets
Susan Smith Carpenter	Surface streets
Gerald & Leslie Gantzer	White/Hardin/Community.
David Babin	Virginia
Ron Carpenter	Surface Streets
Penny Savage	
Christine	Eldorado or virginia
Jason Blake	Hwy 121
michelle gamble	White Ave or Virginia
Robin Lucero	east/west directional roads north and south of 380
Patrick Piejak	I'll take drive on down to White to get to 75 or Virgina.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Garrick Whitnah	
Jarret thornton	Not to build such a dumb road
Garrick Whitnah	
Nancy Lawrence	Do not expand Stonebridge Dr and Ridge to 6 lanes! We have elementary schools on those roads
Bill McMillan	Not going through stonbridge
Richard Briscoe	Improve electronic signage notification of traffic congestion, accidents similar to that of the DNT and other major freeways. Possibly even dedicated radio frequency for notification purposes.
Amanda Gilbert	I would like to see some type of bypass. However something that starts west of Custer and goes past east McKinney so that it does not impact current residential areas. Also something that bypasses Erwin Park and does not cut through the middle.
Melissa Leps	
Ron Carpenter	No freeway
Susan Smith Carpenter	Lower speed Eliminate trucks
Gerald & Leslie Gantzer	Enlarge As Planned. Blue Option return to 380 further west (e.g. Custer).
David Babin	
Ron Carpenter	Rerouting alternate routes
Penny Savage	
Christine	
Jason Blake	The best solution would be to create a Bypass using the Outer Loop. It isn't really that far north of 380 and most of the right away is already determined. I do not think that the route should follow the Red or Yellow Line. In particular the red and yellow line portion just west of Hwy 75 goes right across a large portion of Honey Creek. This area is a huge animal habitat for Deer, Wood ducks, woodpeckers, birds of all kinds, and so much other wildlife. Building a Freeway or overpass there would absolutely upset the ecosystem there and will cause un-repairable damage. The construction alone will drive away the wildlife and no amount of efficient or modern engineering can build through that area without permanently damaging the ecosystem. The car fumes and noise will chase the animal life away and they will not return. There are definitely more options like leaving it at Hwy 380 or using the Blue Line. Damaging more wet areas takes away from what makes McKinney unique. Pick a route around 75 that does not take away and damage the valuable greenbelt and wet areas.
michelle gamble	
Robin Lucero	complete expansion between Preston and DNT
Patrick Piejak	The 380 corridor is going to disrupt life no matter where you put it. Instead of disrupting the surrounding neighborhoods and country, I would lean towards making 380 a tollway/freeway. I know buying up the businesses and relocating them will be difficult. But you would be keeping McKinney's and Collin County residents in mind and not disrupting their personal lives with the additional traffic and business that an outer loop would bring out to the country. I would also suggest that you use the Collin County outer loop and tie that into the DNT for a northern loop

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Garrick Whitnah	No
Jarret thornton	Absolutely not, worst freaking idea I've ever heard of.
Garrick Whitnah	No
Nancy Lawrence	No.
Bill McMillan	No
Richard Briscoe	No
Amanda Gilbert	No
Melissa Leps	It’s necessary.
Ron Carpenter	NO
Susan Smith Carpenter	NO!!
Gerald & Leslie Gantzer	NO.
David Babin	
Ron Carpenter	NO
Penny Savage	No
Christine	No
Jason Blake	Yes. I think you need to expand Hwy 380 right where it is. Just because various cities were short sighted or possibly more interested in real estate tax and sales tax dollars and they didn't enforce larger setbacks, does not mean that the rest of the community has to be burdened with their mistakes. The local Cities need to take on some of the blame and make it right by losing some of their right away and tax dollar income along Hwy 380.
michelle gamble	no
Robin Lucero	no, if I understand alignment correctly, I am fully against any freeway building which will negatively impact property values
Patrick Piejak	The only alignments that look the best at this point are the ones that involve modifying/additional lanes to 380.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Emily Wing	No
AMY LIMAS	yes. congestion near hwy 75
Shannon Goldman	Too many center turns that allow/encourage drivers to cut across too many lanes to get to center. Trucks need lowered speed.
Gerald Brence	No
Gerald Brence	
DEBBIE COPELAND	Certainly. And TxDot is already proposing to widen Hwy 380 from FM 1827 to CR 985.
Joyce Sakai	No
Yongling Ji	
Kirby Jones	Yes. As McKinney and surrounding cities grow the congestion gets worse. A viable option needs to be found for the economic and useful benefit of the Communities impacted
eric louis	I'd like a turning lane from both directions into our neighborhood. People drive way too fast and having to stop to almost 5 mph to turn is very dangerous, especially coming down a hill.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Emily Wing	Hardin
AMY LIMAS	Hardin to White
Shannon Goldman	Eldorado or 121 depending on destination
Gerald Brence	I don't find US 380 congested enough to take alternative routes.
Gerald Brence	
DEBBIE COPELAND	The locals have taken this route for years and the police department detours traffic this way when there is an accident on Hwy 380. From Hwy 380 turn on CR 337, then CR 407 through Monte Carlo Blvd. continue on CR 461 and FM 1377 to CR 496, then CR 561 and onto CR 559 at the bridge on Hwy 380. This route bypasses Hwy 380 east of FM 1827 all the way to the bridge at Lake Lavon.
Joyce Sakai	I don’t. I use it to get to where I need to go at 380/75.
Yongling Ji	
Kirby Jones	Depending on where I am going I take 121 or country roads typically headed west
eric louis	Custer Rd

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Emily Wing	Widen
AMY LIMAS	This is a revised response from a prior survey before realizing the implications. My position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding my recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, notwithstanding my recommendation, if any bypass option occurs, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Shannon Goldman	Semis should have a reduced speed limit. Center turn lanes should not allow cross entry. They should have medians to direct as turn only. Light timing should be carefully studied as well.
Gerald Brence	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Gerald Brence	
DEBBIE COPELAND	I would suggest a completely different route. A major freeway that runs from the east county line to the west county line. It would be more than sufficient to handle the outrageous population growth in our County. It would address the issue of our crowded roadways now and certainly be adequate to support future transportation needs. We are all too familiar with completing roadways to only begin reconstructing them again soon thereafter because they were inadequate to accommodate the traffic. I believe this improvement plan is just a quick fix for now. Soon it will not be able to accommodate the growth coming to our area if the numbers predicted are anywhere close. However, a new major freeway north of Hwy 380 will definitely meet our growing transportation needs. It would be easier to access the county, traffic flow would be smoother, travel time and congestion delays would be less, displaced homeowners, business owners and stakeholders would be less because it is mostly a rural undeveloped, open area. There are definitely more advantages to construct a new freeway than reconstruct the existing roadway to a freeway with bypass loops. Just the shear impact to the residents, business owners, travelers, displaced homeowners, closed businesses, and the economic impact would be a living nightmare. In my opinion, a new major freeway north of Hwy 380 running from east county line to west county line in a predominately rural section of Collin County would have significantly less impact to our area than the proposed plan. It just makes sense.
Joyce Sakai	Leave it as it is
Yongling Ji	
Kirby Jones	Of the options provided my suggestion would be to maintain it on the existing 380, which is the green/pink alignment. In the event this option is not viable my recommendation is to build the bypass along future Laud Howell Parkway. This option is further out and farther ahead of the development cycle. The blue, yellow, or red options negatively impact property that is in the current building cycle and has a negative impact on property owners and home owners. The Laud Howell option provides much needed infrastructure and accelerates those properties to becoming viable development options.
eric louis	Slower speed limit, more turning lanes, longer green lights.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Emily Wing	No, do not ruin Erwin Park
AMY LIMAS	NO.
Shannon Goldman	No. Some of the routes are so out of the way, drivers would still congest existing areas.
Gerald Brence	NO
Gerald Brence	
DEBBIE COPELAND	I do not support a freeway regardless of alignment with this proposed plan. I would support a new major freeway north of Hwy 380 in the predominately rural section of Collin County which goes through open, undeveloped areas. Due to the fact that it is undeveloped, it would be less disruptive and catastrophic to the public as a whole, with much less displacement of homeowners and business owners. Because it would have significantly less impact than the proposed improvement plan, I would definitely be supportive of that.
	No
Joyce Sakai	No
Yongling Ji	No
	NO
Kirby Jones	I am adamantly opposed to the yellow, red and blue options. I support staying on existing 380 and an option on future Laud Howell Parkway. I am not sure why that plan did not make it as one of the final five options.
eric louis	yes

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Andrew Rosbury	Get it done as soon as possible.
Phillip Wright	
Leah Vince	Very dangerous, too many people speeding, too many cars for the road
Kari burkhardt	Don't want it widened
ane casady	too fast
Amber Guthery	
Derek Faught	No
Chris Devany	Yes, traffic and stop lights
Navette Davis	
Bonnie Kluempke	speed limit to fast with so many cars
Regina	Congestion, accidents, only major road
Ann Radcliffe	Congestion in key areas many hours of the day. Intersections most affected are DNT, Preston, Custer, all intersections one mile east and west of 75. Much of this congestion is a direct result of allowing large shopping centers being allowed to be built without fixing the infrastructure.
Emily Baker	It is currently not able to efficiently accommodate the large number of vehicles that use the road. It is creating a safety issue for citizens.
Laurie Sweet	It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.
Billy Cook	
Melissa Hardy	N/A
Leslie Hardy	Yes! Too many people speeding.
Theresa M Dunn	No
Martha Castleberry	There are many semi's and some of them drive as though they were in a car.
Tiffany	
Jennifer McLaughlin	High speeds resulting in fatality accidents Traffic backup at US75 Construction and 18 wheeler traffic

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Andrew Rosbury	I take either Eldorado or Virginia to I-75.
Phillip Wright	
Leah Vince	Virginia
Kari burkhardt	Coit or Preston to rock hill to tollway
ane casady	none
Amber Guthery	Custer to 121
Derek Faught	
Chris Devany	Virginia
Navette Davis	First street Coit Preston
Bonnie Kluempke	Virgina to 75, Eldorado to 75 or Ridge to stacy
Regina	Frontier dr
Ann Radcliffe	I do not travel 380 near 75 intersection. I will take White or Wilmeth to avoid this cluster F***.
Emily Baker	Eldorado, Custer, Virginia
Laurie Sweet	Multiple side roads to get to 75 or the tollway from Custer Road area.
Billy Cook	Preston to Main,
Melissa Hardy	Custer or virginia
Leslie Hardy	Custer or Virginia
Theresa M Dunn	
Martha Castleberry	I don't.
Tiffany	
Jennifer McLaughlin	Virginia Pkwy or Eldorado

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Andrew Rosbury	
Phillip Wright	
Leah Vince	
Kari burkhardt	The least noisy and congested as possible to address concerns.
ane casady	get more input from the citizens the speaker at Rodgers elem was horrible and we did not need her to read to us; very poor
Amber Guthery	
Derek Faught	Any solution but the red solution in the proposals.
Chris Devany	Less lights; better timed lights; make it a freeway.
Navette Davis	
Bonnie Kluempke	do not make Ridge a feeder with 6 lanes. Has an elementary and middle school on Road
Regina	More roads, Highway instead of road with lights.
Ann Radcliffe	First, this project is at minimum 10 years too late in developing a plan. Take action now and put a moratorium on all development adjacent to 380. Bypasses, similar to the one in Denton, have to be built because of irresponsible planning by cities/Textdot. But these bypasses only work if limited development occurs. Lessons still haven't been learned as Denton ISD was allowed to build Ray Braswell High School and Stadium on the corner of Navo Road and 380. What!!!??? Horrible decision that will result in horrible traffic and unsafe conditions for all--students, parents, commuters. The new proposed bypasses would potentially help with the irresponsible development that resulted in outrageous congestion but at a cost to other's homesteads, parks or businesses. This is a sad situation that the surrounding cities and Texdot FAILED their citizens. I would support a bypass only if those properties are compensated above market value. YOU (cities/TexDOT) caused the problem with inadequate, incompetent planning, YOU should pay those directly affected. If you don't build a bypass, any improvement to 380 near the 75 intersection is a band-aid.
Emily Baker	An alternate that would run parallel, north of 380, even if just to accommodate 18 wheelers.
Laurie Sweet	Limited access freeway with 3 lanes in each direction so as not to disrupt and homeowners and business owners.
Billy Cook	Make it pedestrian friendly to cross over.
Melissa Hardy	N/A
Leslie Hardy	More police presence.
Theresa M Dunn	Consider trains/lightrails
Martha Castleberry	I imagine a lot of the excessive semi traffic will reduce over time as the development builds out since that what help increase to begin with. Have semi's drive at a speed that takes their loads into account.
Tiffany	
Jennifer McLaughlin	Greater enforcement of speed limit and traffic lights.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Andrew Rosbury	I do.
Phillip Wright	No I do not supposed it
Leah Vince	Yes
Kari burkhardt	No
ane casady	want to know other suggestions
Amber Guthery	No
Derek Faught	No.
Chris Devany	Yes
Navette Davis	
Bonnie Kluempke	no
Regina	Yes
Ann Radcliffe	It doesn't have to be a freeway, just a higher speed/volume roadway with limited development. AND it better not be a &%$* toll road!!! A freeway has the word FREE in it and we are tired of being taxed/tolled everywhere we go. Texas is now the known as Taxes!! The plan is to build the Collin County Outer Loop just north of this project sometime in the future (again, waiting too long to build this!!). That outer loop should be the freeway while 380 should be a higher speed roadway with limited developments adjacent to it.
Emily Baker	No
Laurie Sweet	100% against the by-pass options. Limited access on existing 380 foot print with minimal impact on Tucker Hill since it is the narrowest part. Sunken freeway with cantilevered access roads.
Billy Cook	yes
Melissa Hardy	No
Leslie Hardy	No
Theresa M Dunn	I might depending on how it impacts my property and Denny's business
Martha Castleberry	The solution that is actually needed would be to connect the Dallas North Tollway with the 75 freeway on a separate freeway north of the 380. Otherwise leave it alone. Putting access in what are actual neighborhood streets like Stonebridge Ranch and Ridge would not only cost a lot of money without fixing the real problem but would help decrease revenue to the county by driving down property values. It would also unnecessarily inconvenience anyone trying to get through the area while under construction.
Tiffany	
Jennifer McLaughlin	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Bruce Saltzer	
Maryanne Herrill	yes but hinestly it is no different than other growing cities.
	No
Carla Everett	380 & Hwy 75 is a mess- get's backed up. I avoid it if I can
Ryleigh Fish	just traffic during rush hour, mainly down by Chick Fil A on highway 75
Cheryl Cherilus	
Adriane Gilbreath	No
Emily Couvillion	With all the new development it is harder to make the turns off of 380.
Lindsey Cole	I worry about construction further impacting my drive.
Shannon goheen	
Sharon Nicholson	high speeds
Tricia Scruggs	Lots of traffic lights (mostly between Lake Forest and US 75) make for a great deal of traffic.
Keleigh Kawamoto	The speed limit is too high.
Carolyn Denise McMillan	
Grace P	
Sean Nance	Safety is very poor, commute times are high with traffic
Laura Gordon	Congestion near 75
meiqing	
Christine Mollenkopf	
Kara Wade	
Robert Murto	Traffic, accidents, large trucks, stupid turn lights that are red with no incoming traffic (Stonebridge and 380, Ridge and 380 should both have flashing yellow arrows; Community and 380 is dangerous due to sight lines and should not have the existing flashing yellow arrow).
Stacy Solomon	Heavy traffic
Jacob Heathman	No
JS De Mattei	It needs to be improved along the existing alignment.
KELLY ROBINSON	Yes. There are too many big trucks driving too fast on this road. And there are many new residential neighborhoods now, and the speed limit is too high.
P Copeland	Too much development will only increase congestion.
Miranda mulyana	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Bruce Saltzer	various
Maryanne Herrill	multiple
Carla Everett	Community Dr,
Ryleigh Fish	throught neighborhoods/smaller roads
Cheryl Cherilus	
Adriane Gilbreath	nearby streets
Emily Couvillion	Eldorado
Lindsey Cole	El Dorado
Shannon goheen	Virginia
Sharon Nicholson	none
Tricia Scruggs	Virginia Parkway
Keleigh Kawamoto	Virginia
Carolyn Denise McMillan	Custer Road and Hardin Road, Virginia Parkway, One of the roads in Prosper - a VERY UNDEVELOPED CITY
Grace P	
Sean Nance	Virginia, Sometimes use Hardin to avoid the intersection at 380 and I-75
Laura Gordon	Virgina and Eldorado
meiqing	
Christine Mollenkopf	
Kara Wade	
Robert Murto	Virginia Parkway
Stacy Solomon	Custer to 121
Jacob Heathman	Don’t ever find it to be congested to where I need an alternative route
JS De Mattei	121 Frontage
KELLY ROBINSON	I take Wilmeth when I can, but I drive to Princeton every day and there are not any good alternate routes.
P Copeland	Wilmeth Rd, Hardin Virginia
Miranda mulyana	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Bruce Saltzer	What about somethingother than automobiles....like trains
Maryanne Herrill	Lightrail
	Make prosper or other cities be affected not McKinney.
Carla Everett	
Ryleigh Fish	
Cheryl Cherilus	
Adriane Gilbreath	I personally do not have a problem with the current state of 380 and believe there must be several other options that would not involve cutting through existing neighborhoods and parks.
Emily Couvillion	
Lindsey Cole	
Shannon goheen	Do not go through Stonebridge or ridge
Sharon Nicholson	Expand 380 adding in stop lights were appropriate
Tricia Scruggs	Create a bypass from Preston or the DNT north around to Princeton.
Keleigh Kawamoto	Unfortunately I dont know
Carolyn Denise McMillan	Widen it NORTH of existing (Green Line) Drop the Freeway at RIDGE (Red Line) or LAKE FOREST which are not built up or complete - or CUSTER. Please do not drop a highway at Stonebridge Ranch and ruin the completed and established greenspace park and residential area.
Grace P	
Sean Nance	Clearly must be expanded
Laura Gordon	Freeway
meiqing	
Christine Mollenkopf	
Kara Wade	
Robert Murto	Correct the turn lights. Add highways to route trucks and through traffic.
Stacy Solomon	Widen 380 with fewer lights
Jacob Heathman	Not bringing it south into the stonebridge community
JS De Mattei	Widening it w/ frontage road.
KELLY ROBINSON	I would like to at least see a bypass for the big trucks, and widening of the existing 380 between 75 and the Hunt County line.
P Copeland	Expand 380 itself to additional lanes.
Miranda mulyana	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Bruce Saltzer	No
Maryanne Herrill	No
	No
Carla Everett	Yes
Ryleigh Fish	
Cheryl Cherilus	
Adriane Gilbreath	No
Emily Couvillion	yes
Lindsey Cole	Yes
Shannon goheen	No
Sharon Nicholson	
Tricia Scruggs	If it's the only option
Keleigh Kawamoto	NO we live directly off the 380. This would severely effect our lives and property.
Carolyn Denise McMillan	Not if it is positioned adjacent to Stonebridge Ranch Parkway, a completed and established park and residential area.
Grace P	
Sean Nance	Yes, unfortunately
Laura Gordon	No
meiqing	
Christine Mollenkopf	
Kara Wade	
Robert Murto	Yes
Stacy Solomon	NO
Jacob Heathman	No
JS De Mattei	No, it needs the same alignment.
KELLY ROBINSON	No. I do not think a freeway should go through the middle of the city of McKinney.
P Copeland	No
Miranda mulyana	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Ciara Wilson	No
Michael Angrisano	
Yu	No
Sarah kerr	
Joy Townsend	Too many stop lights; too many shopping centers, especially at Hwy 75 intersection, with ridiculous traffic flow
Siyuan	No
Earamichia Brown	Yes, as the population increases exiting my development will be even more difficult because we don't have a traffic light or turning signals at our entrance.
Alexandra Robbins	
Lisa	Yes, very congested and the predicted growth of McKinney and surrounding areas will make it unusable.
Marcus Freeze	Very dangerous turning into or out of my neighborhood, Auburn Hills.
Laurie Sweet	
Smita Corley	too many new businesses and residential areas, increasing traffic coupled with continued speeding of 18-wheelers and construction vehicles
Morgan Donovan	
Jon DeShazo	I live on US 380, and am concerned about how future loads will affect area traffic.
Angela	No it gets me to anywhere I need to go
Paul	
Jihye Oh	
Jason M Wagner	Affecting existing parks, residents, and businesses.
Jeremy Sandusky	Yes!
Sydney Scott	Too much building going on contributing to problems
Jeanne Cummings	Many accidents. People drive like it's a freeway but there's lots of local traffic. Very bad and dangerous combination.
T. Farrell	Too many cars for this type of road.
Marcia Palmer	Heavy truck traffic and noise by my house.
Danielle Villela	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Ciara Wilson	I don't
Michael Angrisano	I live in Robinson Ridge (near Lake Forest and Wilmeth). If I need to go East, I have no alternatives north of 380. South of 380, I'll use Virginia or Eldorado. Heading West, I'll often take Lake Forest all the way to 121 to avoid the congestion on 380.
Yu	121/Custer, Virginia
Sarah kerr	
Joy Townsend	Eldorado, Virginia
Siyuan	Eldorado
Earamichia Brown	I am new to the area and have not found any alternative routes as yet, since my main entrance is off OD 380.
	Custer (2478) NB and SB and Virginia and Eldorado for EB/WB
Alexandra Robbins	
Lisa	none
Marcus Freeze	Go south to Virginia using LakeForest
Laurie Sweet	
Smita Corley	ridge through stonebridge to stacy to sam rayburn/121
Morgan Donovan	
Jon DeShazo	I live on US 380, and there is no direct alternative. When there are accidents, I route to Virginia or up into Prosper
Angela	I will usually just wait in traffic and continue to use 380
Paul	
Jihye Oh	
Jason M Wagner	I generally do not travel on 380.
Jeremy Sandusky	There aren't many alternative routes. Fish Trap road, 1461, etc.
Sydney Scott	Virginia
Jeanne Cummings	I avoid 380 at all costs, always because it's dangerous.
T. Farrell	I stay on 380
Marcia Palmer	Virginia
Danielle Villela	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Ciara Wilson	
Michael Angrisano	Fix 380 on 380. Build out Wilmeth and Bloomdale to 4-lane roads so there are options north of 380.
Yu	Build a major road or highway parallel to 380 to the north
Sarah kerr	
Joy Townsend	side access roads; make large shopping centers fund proper traffic flow access into them
Siyuan	Build a major road or highway parallel to 380 to the north.
Earamichia Brown	I am not versed in the area enough to say. I know that there needs to be speed limits near the entrances of the residential developments that are opening and/or exists along 380.
	Elevate the main lanes thru McKinney with minimal exit/entrance ramps and use existing lanes as service roads.
Alexandra Robbins	
Lisa	bypass mckinney
Marcus Freeze	Definitely need a stop light at auburn hills.
Laurie Sweet	
Smita Corley	
Morgan Donovan	
Jon DeShazo	Bypass at least two miles north of the current 380. Changing 380 itself east of Custer would severely damage countless businesses and neighborhoods such as Tucker Hill, which has been an example of how to build traditional neighborhoods in Dallas suburbs.
Angela	Not Erwin
Paul	
Jihye Oh	
Jason M Wagner	Keep 380 on 380.
Jeremy Sandusky	Overhead lanes running east/west
Sydney Scott	Limit the businesses built to support traffic and keep Mckinney “unique by Nature”. We don’t have to have every store and multiples of them including restaurants. Each part of the city can have its own smaller shopping areas. McKinney doesn’t have to look like Plano, Frisco etc with just Store after store. Bigger lots for homes and trees and room to breathe creates community of balance and safety.
Jeanne Cummings	Re route a freeway north, reduce speed limits on 380 so that it’s safer for local traffic. More businesses are being built along the road and there will be more and more local, stop and go traffic. It’s not the place for high speed through traffic. The combination of cross traffic and speed is so dangerous!!!!!!
T. Farrell	Not sure at this time.
Marcia Palmer	Bypass north of McKinney to feed commercial traffic from 75 to 35.
Danielle Villela	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Ciara Wilson	
Michael Angrisano	Yes, but only on 380.When I moved to McKinney 10 years ago, I assumed 380 would one day be a freeway. I've been stunned that they've allowed business and residential construction so close to what was obviously going to have to be a freeway.
Yu	No! Turn 380 into freeway will greatly damage the property value of communities along 380. Leave 380 alone and build another one in rural area.
Sarah kerr	
Joy Townsend	yes
Siyuan	No way! Build a freeway totally damages our suburban, remember McKinney's "Unique by nature" slogan?
Earamichia Brown	I am not versed enough in the overall issues to say.
	No
Alexandra Robbins	No. I don’t believe that 380 should go through Erwin Park. It is a place everyone loves and likes to spend their time at. It shouldn’t be taken away to build roads.
Lisa	yes
Marcus Freeze	To me, it depends on how far the highway moves into my neighborhood.
Laurie Sweet	
Smita Corley	yes
Morgan Donovan	
Jon DeShazo	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Damaging Tucker Hill damages the concept of neighborhoods. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Angela	Erwin is used by many mckinney and frisco residents as a way to enjoy the outdoors. We have enough roads, we need more trees. Keep these ones up. There are animals that will no longer have homes and be forced to burrow in yards and people homes.
Paul	
Jihye Oh	
Jason M Wagner	Not necessarily.
Jeremy Sandusky	Yes
Sydney Scott	No
Jeanne Cummings	No. Freeway should not go through current location. Bad idea.
T. Farrell	Maybe
Marcia Palmer	No
Danielle Villela	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Audrey Evans	
Christina F	Yes, the higher speed limit with multiple stop lights makes it dangerous. We live in Auburn Hills and often can't get across traffic to go toward 75.
Debbie snyder	
John Solomon	Heavy traffic
	limited transition lanes turning onto streets or businesses forcing vehicles to rear end each other
Lisa Rodgers	No
Rrita Vraniqi	no, i think 380 is fine as is. yes it is busy around 5 pm just like any other big road is. i have not had any trouble driving on 380 and i use it so often.
Aleyx Steffens	
Maren Moore	
Michele Barker Steed	The increase in traffic.
michelle campbell	
Beth Verser	It will ruin the beautiful entryway into Tucker Hill!
Steve Zeigler	Too many 18 wheelers
Emma	
Lenora Vaughan	I'm concerned about the safety of the existing US 380 as it crosses in front of Tucker Hill. I don't understand why so many accidents occur at the Tremont intersection at 380 at the neighborhood entrance.
Dominic Brown	Increased traffic through my neighborhood due to drivers seeking short cuts during peak traffic hours. This will increase the chance of accidents, injuries to children playing in our (currently) safe streets and dramatically reduce our property values.
Jennifer Rodriguez	
Lenora Vaughan	
Gerald Sikes	
Monica Cascio	It's a very dangerous highway. But because of poor planning going back decades and still happening at this very moment (new construction that would be destroyed because of ROW needed for widening) it its not feasible. There are too many businesses and residences that would be destroyed with changing it to a freeway.
Patrick Morocco	
Jo Dell'Antonia	The stop light at Stonebridge Drive doesn't allow a turn on a flashing yellow light. Many times I could make a left turn with no traffic coming but there is only a turn light.
Thomas Titus	The existing 380 is over crowded and not policed adequately to deter fast, dangerous driving.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Audrey Evans	
Christina F	Lake Forest to Eldorado
Debbie snyder	Virginia
John Solomon	Custer to 121
	Hardin, lake forest, custer... Back of Lowes and Home depot by the 75
Lisa Rodgers	Virginia, 75/121
Rrita Vraniqi	there are many different alternative roads, i usually use virginia or i cut through erwin park.
Aleyx Steffens	
Maren Moore	
Michele Barker Steed	
michelle campbell	
Beth Verser	Custer Rd
Steve Zeigler	Rockhill Road
Emma	Against Red blue and Yellow alignments
Lenora Vaughan	Cut through Stonebridge Ranch via Stonebridge Rd or Ridge Rd
Dominic Brown	Virginia Parkway with side streets that include: South Stonebridge Drive, Ridge Road, Lake Forrest Drive & Hardin Blvd
Jennifer Rodriguez	
Lenora Vaughan	
Gerald Sikes	
Monica Cascio	To head ast I take an alternate route north on Custer to Wilmeth/Bloomdale which can take me all the way to Interstate 75. For west I already avoid the construction head south on Custer to west on Virginia/Rockhill Road. This takes me to DNT. I rarely have to west of DNT.
Patrick Morocco	
Jo Dell'Antonia	Virginia or White
Thomas Titus	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Audrey Evans	
Christina F	
Debbie snyder	
John Solomon	Widen current road
	Not to run anything behind Erwin Farms. We moved there because there was no freeway or tollway for noise reasons. I lived somewhere where a toll road was installed in same fashion then we had road noise all the time. NOT WHY we moved here
Lisa Rodgers	I would rather see 380 turn into a freeway then to re-route it! Please don't make an alternative route through our existing neighborhoods and acreage!! Just please turn 380 into a freeeay.
Rrita Vraniqi	increase the speed limit. i don't think we need to make 380 any bigger than it already is because mckinney is already going through construction everywhere and i really don't think it needs to be bigger.
Aleyx Steffens	
Maren Moore	
Michele Barker Steed	Widen 380
michelle campbell	
Beth Verser	If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers.
Steve Zeigler	Highway needs to be built further north
Emma	For pink and green alignments
Lenora Vaughan	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Dominic Brown	Widen Virginia Parkway & Eldorado Parkway To add conduits to both streets via South Stonebridge Drive, Ridge Road, Lake Forrest Drive & Hardin Blvd should be increased between them as those routes currently high traffic areas. Thus minimizing the reduction of their property values.
Jennifer Rodriguez	
Lenora Vaughan	
Gerald Sikes	
Monica Cascio	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Patrick Morocco	
Jo Dell'Antonia	Put in a new road farther north that would connect with existing 380 around Preston or the tollway.
Thomas Titus	There should be a North loop that connects 75 and Preston Road &/or the North Dallas Parkway. This would leave the existing 380 from 75 to Preston Road alone and what is there would be adequate.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Audrey Evans	No
Christina F	
Debbie snyder	
John Solomon	No
	no
Lisa Rodgers	Yes - a freeway over the existing 380 highway
Rrita Vraniqi	no not at all. mckinney uses the pharase “unique by nature” but there’s no nature left anywhere. if a interstate gets built right in the middle of mckinney it’s not going to feel like home anymore , it’s just going to feel like another huge city with lots of cars and commotion.
Aleyx Steffens	
Maren Moore	
Michele Barker Steed	
michelle campbell	
Beth Verser	No!
Steve Zeigler	yes
Emma	No
Lenora Vaughan	NO
Dominic Brown	No
Jennifer Rodriguez	
Lenora Vaughan	
Gerald Sikes	Yes
Monica Cascio	NO
Patrick Morocco	Not at the loss of Erwin Park
Jo Dell'Antonia	No! I could support a new freeway north of 380 but not where 380 exists today.
Thomas Titus	As long as that freeway doesn't bother 380 from 75 to Preston Road.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Matthew Wilson	Truck traffic
Cathey Atchison	Yes car accidents behind my home
Louise Bewley	Elementary school on Ridge Rd. just off 380 would be undafe. Stonebridge is main neighborhood thoroughfare and which has a city playground & elementary school. Custer Rd. is already a busy road with businesses and gas stations.
Thomas & Patricia Laney	No
dusty tripp	no
Kristin Zaldana	No
Syd Sherley	No
john salat	lights and congestion
Jerome	N/A
Dawn polce	Yes! The traffic moves entirely too fast so close to our residential areas and speed is never enforced enough. As a homeowner, I am concerned my property values will decrease with the continued growth.
Macy silvertooth	
Spandana Kocherlakota	Yes
	No
Betty Andrzejewski	Yes - lack of right-lane turning lanes into subdivisions.
Michael Liverance	
Julie Williams	Traffic
Mike	Congested
Rosalnd	
Chris Scherer	High traffic intersections (380/Custer, 380/Lake Forrest, etc)
Anthony James	Too narrow
Sean Bates	Traffic congestion is increasing
Cynthia Baldazo	No
steven sellberg	none

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Matthew Wilson	Virginia
Cathey Atchison	Virginia Rd
Louise Bewley	Extensive money already invested in widening Virginia Pkwy. which is a good alternative.
Thomas & Patricia Laney	Virginia to 75. Custer to 121
dusty tripp	virginia
Kristin Zaldana	Virginia
Syd Sherley	Virginia
john salat	
Jerome	El Dorado or Virginia
Dawn polce	Virginia pkwy, stonebridge,
Macy silvertooth	
Spandana Kocherlakota	Virginia Pkwy
	121
Betty Andrzejewski	
Michael Liverance	
Julie Williams	Wilmeth or Virginia
Mike	
Rosalnd	
Chris Scherer	Other secondary roads
Anthony James	Eldorado Pkwy
Sean Bates	I usually just stay on 380. Even congested it is quicker alternative to destinations between McKinney and Denton than trying another route.
Cynthia Baldazo	None I wait like everyone else
steven sellberg	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Matthew Wilson	Collin outer loop
Cathey Atchison	Bypass North of Bloomdale in Mckinney and Frontier Pkwy in prosper
Louise Bewley	
Thomas & Patricia Laney	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
dusty tripp	Less lights
Kristin Zaldana	none
Syd Sherley	Blue route
john salat	more lanes, controlled access/less lights
Jerome	N/A
Dawn polce	Pleas move the traffic north! Our small town feel has disappeared.
Macy silvertooth	
Spandana Kocherlakota	US 380 freeway further north of present location.
Betty Andrzejewski	If the high-density housing construction was increased to low-density, the population would decrease. Widening the existing 380 is not an option due to existing residential and hospital sites.
Michael Liverance	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Julie Williams	Overpass or bypass more intersections
Mike	
Rosalnd	
Chris Scherer	More bypass ramps similar to the one being constructed at 380/Preston
Anthony James	4th lane each direction, improved intersections
Sean Bates	Look for solutions that would limit red lights along 380 with minimal impact on neighboring homes.
Cynthia Baldazo	
steven sellberg	add a new road north of us 380 running east -west

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Matthew Wilson	Yes
Cathey Atchison	No
Louise Bewley	
Thomas & Patricia Laney	NO
dusty tripp	NO
Kristin Zaldana	no
Syd Sherley	No
john salat	yes
Jerome	I don't support building a freeway that goes through Erwin park. It's on it the last remaining natural things that makes Mckinney unique.
Dawn polce	I support a highway but only further NORTH!
Macy silvertooth	
Spandana Kocherlakota	We do not want to support the stonebridge dr and Ridge expanding to 3 lane.
Betty Andrzejewski	
Michael Liverance	I do not support the building of a freeway regardless of alignment.
Julie Williams	Yes
Mike	Yes
Rosalnd	
Chris Scherer	Yes
Anthony James	Yes
Sean Bates	Regardless of alignment, no. It is CRITICAL that any solution have minimal negative impact on homeowners neighboring 380. As a homeowner in Stonebridge Ranch with a home close to Stonebridge Dr and 380, I am among those strongly concerned about the negative impact on my home value and quality of life in my neighborhood a wrong expansion decision could create for us.
Cynthia Baldazo	Nopee
steven sellberg	no it would lower our property value

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Mary Hickox	
Andrea Rudd	the congestion, amount of lights
Angela Esail	Unsafe for residential mixed with heavy traffic and semis as only north Texas east/west access
Autumn Heathman	No
Deena Still	Too many trucks that cause accidents
Lisa	Yes.
Alyssa Alvarez	too busy
Daniel Collins	too close to schools, including McClure and Cockrill
Mary	People drive too fast
Molly Stephenson.	
Joe Huffman	No, just too congested, but you plan for that.
Delaina Hancock	
Robin Dickens	Yes, it needs to be rerouted to the north of McKinney. We don't need another freeway through the heart of town.
Delaina Hancock	
Jaime Erickson	Traffic closer to 75, turning onto 380 can be difficult with the high speeds if not at a traffic light.
Cynthia Flores	Just too many lights not really.
Alisha	Yes, do not expand Ridge or Stonebridge. To many families exercise and travel these roads. It will kill the peacefulness and beauty that we have in our city.
Lisa O'Hare	No
	Traffic on the existing US 380 continues to increase and is congested to the point that travel from Custer Rd to Denton takes significantly longer than necessary. From my perspective, the existence of stop lights contributes to congestion.
Kelly Schmit	unsafe with no center median and the speeds people travel on this road. Easy accidents.
Roderick Buchen	Traffic & speed!
Wendell and Nancy Gilbert	It's a dangerous road. Construction trucks dominate the road and exceed the speed limits. They often hog the inter two lanes and drop debris all over the roadways. They should be limited to a max speed of 50 mph and can only operate on the outer lane.
Chris Rovik	
Don Weiland	Congested and slow
Gail Weiland	Intersections very congested.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Mary Hickox	Virginia Pkwy
Andrea Rudd	Hwy 121 but that is pretty congested too
Angela Esail	Parallel Side streets-Virginia, White, El Dorado
Autumn Heathman	None, it is never congested to the point that it affects my time that much
Deena Still	Virginia
Lisa	Custer to Virginia or ElDorado.
Alyssa Alvarez	75
Daniel Collins	Virgina Parkway
Mary	I take the back roads
Molly Stephenson.	
Joe Huffman	
Delaina Hancock	Virginia
Robin Dickens	121 Virginia Pkwy, ElDarado, Custer
Delaina Hancock	Virginia
Jaime Erickson	Virginia Parkway, which I usually about do to existing construction. Hardin to White to get on 75.
Cynthia Flores	Only during traffic hours
Alisha	We have patience and wait
Lisa O'Hare	Virginia
	It depends on whether or not I am trying to get to Denton or use 380 to go North on I-35. If I am headed to Denton, I will use 121/SRT. If I am heading North, I will take
Kelly Schmit	Frontier, 1st street to coit,
Roderick Buchen	121
Wendell and Nancy Gilbert	Virginia pkwy
Chris Rovik	
Don Weiland	Virginia/Eldorado
Gail Weiland	Virginia/White

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Mary Hickox	
Andrea Rudd	Make it an actual highway without lights
Angela Esail	Go north where there is more room for a real highway going east/west; less residential and more farmland that wouldn't be impacted as much by increased traffic and congestion with higher speeds
Autumn Heathman	Expanding north, rather than into existing communities. Especially those in which children's schools are right near the roads. Safety of pedestrians HAS to be taken into consideration and we live in this community for a reason including safety and easy accessibility to said schools. There are children who walk and bike to school.
Deena Still	Build a bypass to get the trucks off of a road with many stoplights
Lisa	Bypass for trucks, trailers, trucks pulling large trailers.
Alyssa Alvarez	
Daniel Collins	push it further north
Mary	Extend from Custer road
Molly Stephenson.	
Joe Huffman	Create a freeway 2-5 miles north of 380, just north of Denton to Princeton, and keep 380 as is, except add a lane on both sides where feasible.
Delaina Hancock	
Robin Dickens	Re-route around Mckinney
Delaina Hancock	
Jaime Erickson	Alternate route for large trucks/semis. More lights out of busy neighborhoods.
Cynthia Flores	
Alisha	Blue but not through erwin park.
Lisa O'Hare	Create a bypass North of 380. Connect DNT to 75
	I would suggest the development of 380 into a highway with access roads, or an alternative which would eliminate the stop lights... such as cloverleafs/bridges that allow turns on & off of 380 without slowing traffic.
Kelly Schmit	More lanes and a center median
Roderick Buchen	Connect & Woden at Hardin
Wendell and Nancy Gilbert	Limit construction trucks to 50mph and limit to the outside lanes. Also, the traffic must be slowed down. It's a very dangerous road. One only need to look at all the skid marks at stop lights.
Chris Rovik	
Don Weiland	Bypass north but connect west of the Walmart on Custer, not atCuster or Stonebridge.
Gail Weiland	Bypass north of 380

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Mary Hickox	No
Andrea Rudd	yes
Angela Esail	No, would impact my home value and lifestyle. 380 already has multiple serious accidents DAILY.
Autumn Heathman	No
Deena Still	NO. Converting small roads to highways is not ideal
Lisa	It would depend on where it is located.
Alyssa Alvarez	
Daniel Collins	no
Mary	No
Molly Stephenson.	Absolutely Not.
Joe Huffman	Yes, but 2-5 miles north of 380
Delaina Hancock	Yes but going around neighborhoods, schools, parks, and businesses, not directly impacting and next to them.
Robin Dickens	no
Delaina Hancock	No
Jaime Erickson	
Cynthia Flores	NO!
Alisha	not really
Lisa O'Hare	No
	Yes.
Kelly Schmit	no
Roderick Buchen	No
Wendell and Nancy Gilbert	This question is too open ended. I do support a major solution. Something has to be done soon.
Chris Rovik	Yes
Don Weiland	No, it must be approved by citizens
Gail Weiland	NO !

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Sandi Murray	Dangerous. High rates of speed and erratic drivers at times. I'm afraid for new drivers to use 380 for that reason. Too many accidents.
Jennifer	Yes many accidents and speed limit high. Also need a traffic light in front of mckinney Baylor.
Kirsten huber	
Shelly Kraal	congestion around between Community and 75 is particularly bad
John Cancel	It needs fixing in some areas.
Daniel Rude	Usually too congested, always a mess near Denton
Michelle Lovland	The numerous stop lights create a "beat the light" situations. The speed is high considering the number of lights and vehicles turning.
Amy Rude	No
Michael Tritthart	Lack of Safety barriers
Judy Miller	
Holt	Too much traffic currently.
Robert Gredig	Congestion. Lack of barriers between east west traffic in many sections.
Cristina Semle	
Deborah Papatonis	I don't want my property value to be destroyed by having loud highway noise near our home. 380 is a very dangerous road as it is!
Beth Ray	Traffic and speeding
Shannon Humphrey	It seems congested and too many drivers speeding.
Dina Perez	Traffic and 18 wheelers
Lisa Lazar	It is very dangerous and the speed is too high. Maybe lower it to 40 mph?
Tracy Montierth	Yes, it's too congested
Jennifer Schell	Yes. The speed is high through heavily populated areas.
Darla I Hopson	Speeders
Tonnia` Hawkins	No.
Matt Hamm9nd	Too many lights. It needs to be upgraded, but not at the expense of private property. Do what you will with public lands.
Melissa	
Kiran Morum	
Nikki Ovens	Will this impact business on 380?
Madelyn Hawkins	Congestion

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Sandi Murray	121 (tollway)
Jennifer	
Kirsten huber	
Shelly Kraal	Virginia to travel east/west, Hardin to travel north
John Cancel	I rake a chill pile and relax. Traffic will move and stop being in a rush.
Daniel Rude	Virginia Pkwy/Rockhill Rd
Michelle Lovland	Usually we just wait it out. If there is an accident that we know about, we will consider Virginia with Coit and Custer.
Amy Rude	Virginia
Michael Tritthart	Virginia
Judy Miller	
Holt	I do not take alternative routes.
Robert Gredig	Parallel local roads.
Cristina Semle	
Deborah Papatonis	Virginia Parkway to Preston Road.
Beth Ray	121, street routes
Shannon Humphrey	Virginia Parkway.
Dina Perez	Virginia parkway
Lisa Lazar	Virginia to 75
Tracy Montierth	Eldorado
Jennifer Schell	Virginia/Custer
Darla I Hopson	Eldorado
Tonnia` Hawkins	White.
Matt Hamm9nd	
Melissa	
Kiran Morum	Virginia and 75 or Custer and 121
Nikki Ovens	El Dorado, Virginia
Madelyn Hawkins	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Sandi Murray	Keep it SAFE for all the adjacent neighborhoods and their families.
Jennifer	
Kirsten huber	
Shelly Kraal	
John Cancel	Slower traffic needs to say in the right lane and move over to let others pass. People need remember that the roads do not belong to them only. They need to share it and respect others.
Daniel Rude	Build the 380 freeway in the existing location of US 380
Michelle Lovland	The 121 design seems to work well except at the major highway interchanges (at DNT is pretty bad). There is a lot of local traffic that travel 380 - if you could keep this traffic on the frontage roads and treat 380 as through traffic, I things would flow more smoothly.
Amy Rude	Do not go anywhere near Erwin park with it
Michael Tritthart	Blue route
Judy Miller	
Holt	The blue roads as proposed.
Robert Gredig	A bypass around McKinney that ends at Custer road or even further west, away from the elementary schools on Ridge and Stonebridge. Exits off the bypass could allow access to local roads along the way and It could begin east of McKinney somewhere.
Cristina Semle	
Deborah Papatonis	Don’t expand 380. Please expand Bloomdale.
Beth Ray	There won't be a great solution to fix this...should have thought 40 yrs ahead when allowing build out
Shannon Humphrey	I would suggest not putting a six lane thoroughfare at streets where children are walking to and from elementary school - Stonebridge and Ridge. I think Custer is a better road to utilize.
Dina Perez	Do not expand to a major highway amd limit 18 wheeler use. It is extremely dangerous.
Lisa Lazar	
Tracy Montierth	Widen it. Require all future businesses to have setbacks.
Jennifer Schell	Blue route using Custer. The businesses along Custer are more suitable for a freeway.
Darla I Hopson	Widen and build overpasses at lighted intersections for through way traffic pls
Tonnia` Hawkins	None.
Matt Hamm9nd	Don't even utter the words "eminent domain". This is Texas - that doesn't fly here.
Melissa	
Kiran Morum	Adding more traffic lights. Reducing the speed limits at certain sections.
Nikki Ovens	Make a better map
Madelyn Hawkins	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Sandi Murray	Unsure
Jennifer	No
Kirsten huber	
Shelly Kraal	no
John Cancel	No, not it it's destroying the Erwin Park!
Daniel Rude	No
Michelle Lovland	No. There are a couple of alignments that don't seem like they would help reduce traffic on 380 because they seem more like a detour rather than a quicker path.
Amy Rude	No
Michael Tritthart	Yes
Judy Miller	
Holt	No.
Robert Gredig	No
Cristina Semle	
Deborah Papatonis	No.
Beth Ray	Only if it's not a toll road too many now
Shannon Humphrey	No.
Dina Perez	No
Lisa Lazar	No. My childrens school is off of Ridge Rd. Elementary age chidren walk daily down Ridge Rd to get to school. Please do not make Ridge Rd a 6 lane highway right by an elementary school. The safety of parents and children are at stake. There is not enough parking at McClure Elementary. At all events, cars need to park on Ridge Rd. This would be very dangeous on a 6 lane hwy.
Tracy Montierth	Yes
Jennifer Schell	I support the best option. You have too many schools and neighborhoods on the other proposed routes.
Darla I Hopson	No
Tonnia` Hawkins	No!!!!
Matt Hamm9nd	Yes, but see previous answers for clarification.
Melissa	
Kiran Morum	No
Nikki Ovens	yes, more people are moving up here.
Madelyn Hawkins	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Kim	It's always busy and there doesn't seem like enough turn arounda
Jerry Chuman	380 and 75 should have on and off ramps. So should North Dallas Tollway
Alberto Velez	
Robert Bowland	Other than the complete lack of foresight and planning? No.
Katie Johnston	No
Erin	It is big enough
	Too congested, not enough lanes, too many accidents, speed limit too high in some places
Velvet Yeghoian	It's congested during peak hours.
Elizabeth donihoo	US 380 does not rise any concerns for me. I enjoy taking 380, for I feel safe and the road is smooth. I wish, however, that the trees aligning this highway would not be demolished.
Tia Fields	Yes, the route being built
Claudia Harrison	
Monica Clift	No
Doug Hansen	Yes
William Stadelman	Not really. It seems to work fine since it has been widened.
Liz Brence	No
Douglas Husemann	
Will Webb	Speeders, dangerous intersections.
Paulette Andrews	Yes...my back yard butts up to 380 now so I do not want 380 to be widen past Stonebridge.
Amanda McElrath	Yes, what it will look like if it becomes too congested before traffic/population gets here. Would like to see us be proactive and work ahead of it.
Patricia Heatter	Yes could be widened but no extension.
Emily Liddell	No
James Krogh	Terrible congestion with few turn out and acceleration/deceleration lanes.
Laura Heinrichs	Over congested and too many signal lights.
Edith Estrella	Yes, because they are propossing to build a freeway right behind our home.
Amanda Tomasulo	Frequent accidents

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Kim	Custer, ridge, hardin
Jerry Chuman	Hardin
Alberto Velez	I normally take 380 cause any other route expand my commute
Robert Bowland	Country roads north and east/west
Katie Johnston	121
Erin	Virginia
	Back roads
Velvet Yeghoian	I takw Virginia/ Rockhill
Elizabeth donihoo	Sometimes I choose to take Virginia, but I am never forced to choose one or the other due to congestion. Usually, 380 is a faster route.
Tia Fields	121
Claudia Harrison	
Monica Clift	121, Main Street
Doug Hansen	Frontier parkway
William Stadelman	None, I just slow down and enjoy the drive.
Liz Brence	I don't find US 380 to be that congested. I drive on it every day without taking any alternative routes.
Douglas Husemann	
Will Webb	75 to Eldorado or 121
Paulette Andrews	Stonebridge to Virginia
Amanda McElrath	Other parallel roads but there's not a direct route
Patricia Heatter	Virgina or Elderado
Emily Liddell	I avoid 380 if it is congested.
James Krogh	Wilmeth. Monte Carlo Blvd.
Laura Heinrichs	Hwy 121
Edith Estrella	Is usually not congested.
Amanda Tomasulo	380 is never congested enough for me to consider an alternative route.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Kim	
Jerry Chuman	More lanes
Alberto Velez	Expand 380 on 380
Robert Bowland	Go back in time and plan...barring that make the current 380 a 121/SRT type road
Katie Johnston	
Erin	Use what's already there
	Widen existing 380 by adding more lanes, lower the speed limit in some places, especially between McKinney and Princeton
Velvet Yeghoian	
Elizabeth donihoo	I suggest the planting of more trees or greenery on the sides and in the medians of US 380. I feel as if US 380 has taken away a lot of what makes McKinney unique: nature.
Tia Fields	Less traffic lights
Claudia Harrison	
Monica Clift	
Doug Hansen	
William Stadelman	Stop letting more people move into the area.
Liz Brence	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Douglas Husemann	
Will Webb	Grid, not additional loops or bypasses.
Paulette Andrews	
Amanda McElrath	
Patricia Heatter	Leave it aline
Emily Liddell	N/A
James Krogh	Freeway with overpasses where signaled intersections are. Slower speed service roads to access side streets with turn off lanes.
Laura Heinrichs	380 needs to be expanded to "fly over" busy intersections to keep traffic moving.
Edith Estrella	Expand 380 by adding a lane on each side.
Amanda Tomasulo	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Kim	
Jerry Chuman	Yes
Alberto Velez	Only on 380
Robert Bowland	NO
Katie Johnston	No
Erin	No
	No
	No! We live in the country and we don't need a freeway going through our property nor do we want to live next to a freeway!
Velvet Yeghoian	Yes
Elizabeth donihoo	No.
Tia Fields	NO, NOT GOING THROUGH NATURE PARKS THAT HAVE BEEN IN MCKINNEY FOR YEARS. WE NEED NATURE PARKS STOP TRYING TO RUIN EVERYTHING.
Claudia Harrison	
Monica Clift	No
Doug Hansen	No, depends on alignment.
William Stadelman	NO.
Liz Brence	No
Douglas Husemann	
Will Webb	No.
Paulette Andrews	Don't know
Amanda McElrath	Yes
Patricia Heatter	No
Emily Liddell	Not sure but probably- as long as it doesn't cut through wildlife/parks/recreational/farmland areas.
James Krogh	Yes. Preferably furthest away from existing homes. Any new would be aware of the roadway when purchasing.
Laura Heinrichs	No, I am concerned about the alignment.
Edith Estrella	No I don't support building of a freeway specially behind my backyard.
Amanda Tomasulo	No!! Keep a freeway far from Stonebridge Ranch. Traffic on 380 needs to slow down, not speed up!

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Husband Fawaz	Too busy and dangerous. There is too much noise for us living at homes near 380.
Cecilia Larsen	I understand that we need alternate routes for the growing traffic in these areas that are exploding with new population - obviously 380 is already existing, but needs to keep up with traffic growth.
Dustin James	How many red lights do we need on one road? There is no steady flow of traffic.
Jessica Seekamp	High speed traffic with only a yellow line in the middle of the road.
Dylan Howard	Congestion, lack of a solid divider. High speeds with lots of stops.
Michelle McDaniel	I feel like current 380 is accident prone because there are a lot of trucks moving quickly and there are also a lot of stoplights that could be a problem for speeding vehicles and distracted drivers
Kira	
Tracy Burnett	Yes. Unsafe for the high school kids due to the big trucks
Amanda Wisdom	Yes. Volume of traffic steadily increasing . Especially the amount of 18 wheelers and work trucks.
Susan Norman	
Lori Hatch	Yes, any proposal for a bypass should not include connection to Ridge or Stonebridge. So many kids and schools in this area.
Ashley Hadwick	No
Melanie Baxter	No
Amy Bishop	Too many accidents. Needs to be a toll road.
Ashlie Brewer	
Tino Madrid	
Judy Berteotti	Yes, heavy traffic
Michell Madrid	
Chris Hynes	too many vehicles and development in a condensed area, traffic, accidents and affect property values
Joyce Storer	Traffic getting so dangerous.
Kelli Ash	Safety with all the red lights and big trucks not being able to stop quickly when light turns red.
Kristin Fawaz	It needs more stoplights to help slow things down and prevent accidents. There's too much noise from the road impacting homes that back up to 380.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Husband Fawaz	North on Custer and cut over
Cecilia Larsen	Depending on where I am going - I may sometimes go all the way to Sherman and take 82.
Dustin James	Highway 78 north if I am going north and highway 78 south if I am going into Dallas.
Jessica Seekamp	
Dylan Howard	Eldorado, Virginia, 121
Michelle McDaniel	I have no good alternative route. Unless using Virginia is an option, but that is a adding a couple miles each direction
Kira	
Tracy Burnett	Virginia
Amanda Wisdom	Virginia parkway
Susan Norman	
Lori Hatch	Virginia pkwy
Ashley Hadwick	Tollway
Melanie Baxter	Custer to 121
Amy Bishop	Any other alternative route available. Most often 121.
Ashlie Brewer	
Tino Madrid	
Judy Berteotti	Stonebridge Dr, Lake Forest, or Hardin to White, Virginia Pkwy, or Eldorado
Michell Madrid	
Chris Hynes	Virginia
Joyce Storer	I drive the smaller streets thru mckinney
Kelli Ash	Side roads over to Virginia
Kristin Fawaz	Custer going north then cut over going east. I'll take Virginia or Eldorado occasionally too. Sometimes I'll cut through neighborhoods the back way.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Husband Fawaz	More stop lights and dont want a fwy going through 3 different school zones and chil
Cecilia Larsen	I wish I had some solutions - there are just so many people moving in and all the new and growing business in the Frisco area.
Dustin James	Wouldn't it be best to have a train follow 380? So what you get 380 bigger and more lanes/ loops. Where are all those people going to go when they get on 75, Dallas North Tollway, 121, 635? Are you going to expend all of those too?
Jessica Seekamp	
Dylan Howard	Slow it down
Michelle McDaniel	I can't speak to that because I am sure there are many factors I am unaware of
Kira	
Tracy Burnett	Lower the speed limit
Amanda Wisdom	
Susan Norman	
Lori Hatch	Any bypass should be considered north of 380 in lesser developed areas.
Ashley Hadwick	Timing the traffic lights so they change at the same time to improve traffic flow.
Melanie Baxter	
Amy Bishop	Make a toll road.
Ashlie Brewer	
Tino Madrid	
Judy Berteotti	The Blue or Yellow lines connecting with 380 at Custer
Michell Madrid	
Chris Hynes	Go out farther
Joyce Storer	Police to slow traffic. They are out at slow times and not when the danger is present
Kelli Ash	
Kristin Fawaz	The by pass needs to connect at Custer. This will help avoid putting major thoroughfares near schools and parks. It will also protect the home values and businesses that are currently in 380.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Husband Fawaz	NO. NO. Hell no!
Cecilia Larsen	I would like to understand more about the alignment in my area...Heritage Ranch in Fairview. I already have a gazillion planes and jets taking off above my head every day and into the night....I am very concerned about the noise of the airport and then a major freeway on top of that sending my property values down the drain.
Dustin James	No! Too many tax dollars! Eminent Domain is something no one wants any part of!! Too much growth, equals public transportation. 121 went from 2 lanes to 6 lanes and it is bumper to bumper at peak times. It will be out grown by the time it's built!
Jessica Seekamp	
Dylan Howard	No
Michelle McDaniel	I would hope that residents don't have their properties infringed upon, or their property values decreased with whatever solution is agreed upon
Kira	
Tracy Burnett	Yes
Amanda Wisdom	No- it depends
Susan Norman	
Lori Hatch	No
Ashley Hadwick	No
Melanie Baxter	No
Amy Bishop	No
Ashlie Brewer	No
Tino Madrid	
Judy Berteotti	Probably
Michell Madrid	
Chris Hynes	no
Joyce Storer	No
Kelli Ash	No
Kristin Fawaz	No. I do not support putting a freeway near school zones or expanding 380.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jean-Maria Higginbotham	Dangerous with volume of vehicles and large trucks.
Katherine Remus	Accidents
Keelia Curtis	
Stefanie summers	Traffic. Always traffic.
Walter Howard	
Chris Ponder	Yes - it's dangerous. The high rate of speed for all the lights. So many terrible wrecks.
Roger Ireland	
Amy Gerwinf	Too many businesses being built
Reynolds	Safety/increasingly more congestion and accidents occurring
James Swandol	Yes
Josh	Traffic
Jimmy	Needs to be a HWY
	Dangerous road; lots of stop lights that do not coordinate (ie. stop at every light)
Michelle Rodgers-Babin	Congestion
Kathryn Ryan	Congestion
Rita Davis	Some congestion during morning work hours.
Rheagan Mullins	
DAVID COPELAND	Yes of course. And TxDot is already proposing to widen Hwy 380 from FM 1827 to CR 985.
Kathryn Ryan	Congestion
DAVID COPELAND	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jean-Maria Higginbotham	121 / Sam Rayburn
Katherine Remus	Custer, Virginia
Keelia Curtis	
Stefanie summers	Typically take 1461 towards Mckinney, tollway south, avoid little elm and west frisco at all costs. Never go towards Denton unless absolutely necessary. Wouldn't even consider working in that direction.
Walter Howard	
Chris Ponder	Virginia parkway
Roger Ireland	
Amy Gerwinf	I stay home
Reynolds	Virginia
James Swandol	FM1461
Josh	121
Jimmy	Eldorado, panther creek, rockhill
	Virginia Pkwy
Michelle Rodgers-Babin	121
Kathryn Ryan	El Dorado to 75
Rita Davis	Eldorado, Virginia
Rheagan Mullins	
DAVID COPELAND	The locals have taken this route for years and the police department detours traffic this way when there is an accident on Hwy 380. From Hwy 380 turn on CR 337, then CR 407 through Monte Carlo Blvd. continue on CR 461 and FM 1377 to CR 496, then CR 561 and onto CR 559 at the bridge on Hwy 380.
Kathryn Ryan	El Dorado
DAVID COPELAND	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jean-Maria Higginbotham	380 probably needs to become limited access freeway
Katherine Remus	
Keelia Curtis	
Stefanie summers	Widening. No lights. Overpasses.
Walter Howard	
Chris Ponder	Make 380 into an highway that is not a toll road!!
Roger Ireland	
Amy Gerwinf	Blinking yelllow lights to warn that upcoming stop light is about to change
Reynolds	Placing a highway further North of 380. Didn't want a highway impeding on current neighbors.
James Swandol	
Josh	
Jimmy	Turn 380 into HWY with frontage roads
	widen current area; least impact on established neighborhoods and businesses
Michelle Rodgers-Babin	Overpasses and fewer intersections
Kathryn Ryan	The blue route, but it should feed back into 380 west of Custer Road or farther west toward Prosper
Rita Davis	Smartly utilizing current footprint.
Rheagan Mullins	
DAVID COPELAND	I would suggest another route outside the 380 corridor. There is an alternate route just north of all the cities involved in this study that could run from east county line to west county line. This route is predominately a rural sector of Collin County which goes through open, undeveloped areas. Due to the fact that it is undeveloped, it would be less disruptive and catastrophic to the public as a whole, with much less displacement of homeowners and business owners. It would definitely have less significant impact than the proposed improvement plan. The construction of a major freeway in this rural section north of Hwy 380 would obviously allow for faster completion of the project with less public disruptions and inconveniences. The freeway could handle more traffic, offer a smoother flow of traffic, decrease hours of travel and hours of congestion delay. And it would of course alleviate the congestion of Hwy 380 which is the main concern and goal. Trying to reconstruct and widen a roadway into a major freeway in already highly populated, developed areas with just one very congested roadway to travel from McKinney to Farmersville is in my mind ludicrous. We know the area is exploding with growth and our roadways are congested, crowded and insufficient. These proposed improvements offered by TxDot are at best lacking and do not address the broader future vision. A major freeway that goes from east county line to west county line would surely be adequate, sufficient, and relieve other roadways as well. It would certainly meet the future transportation needs of Collin County as a whole.
Kathryn Ryan	Alternative route
DAVID COPELAND	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jean-Maria Higginbotham	Depends
Katherine Remus	No
Keelia Curtis	
Stefanie summers	Yes
Walter Howard	
Chris Ponder	No - alignment is very important
Roger Ireland	
Amy Gerwinf	No
	No
Reynolds	Not on existing corridor
James Swandol	No
Josh	No
Jimmy	Yes
	no
Michelle Rodgers-Babin	No
Kathryn Ryan	Yes
Rita Davis	No.
Rheagan Mullins	
DAVID COPELAND	I do not support a major freeway in the 380 Corridor regardless of alignment. There is a better alternative. One that has less significant impact and will better meet the future transportation needs of Collin County as a whole.
Kathryn Ryan	yes
DAVID COPELAND	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jeff Hoffmeister	The number of accidents and fatality of a neighbor about 4 years ago at 380and lake forest
Gracie	
Nicholas Parra	No
Steve Buchanan	It's not wide enough and businesses have been built to close to the right of way in places like Little Elm.
john girdzus	Yes. Noise level. This generated by speeding high performance vehicles w/loud exhaust systems, motorcyclists thinking they are on a motor cross, and/or truckers using jake brakes.
Karen Mann	Poor planning
Alissa Dare	The traffic is getting bad and will only be more of an issue as the area grows. My personal concern is safety as I use the road every day and my kids will eventually drive it as well.
Gerald Waltman	Too many traffic signals slowing down through traffic. Need grade separations or full freeway constructed.
Austin	
Pat Wykoff	Congested due to truck traffic using all lanes.
Nicole Howard	The speed should be reduced and lights timed better.
Steve Jarosz	Too crazy, too crowded
Elissa Shier	
Cheryl Russell	
Sam Castleberry	Too many commercial trucks use 380.
Morgan Buchek	I feel like it is a dangerous road because it feels like a highway, but then there are suddenly stoplights.
	Princeton traffic lights, congestion in McKinney, esp. rush hours both directions
John Solan	Congested at certain hours of the weekday.
Jeremy Rowdon	
Melody Nicholson	Traffic is too heavy for residential drivers (including young drivers)
Wendy Schreher	
Kimberley frank	Nope
DEBORAH M MUCKELROY	No
Ann Collins	Yes, it is very dangerous for our new and young driviers driving to McKinney north high school. The speed limit should be dropped to 45 to reduce accident risk with so many people turning off and stopping at lights.
Tom Timmermann	Speed limit is high and isn't enforced.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jeff Hoffmeister	Virginia
Gracie	
Nicholas Parra	
Steve Buchanan	82 or 121
john girdzus	Have NOT experienced congestion that would justify spending $100's of millions on HWY 380 modifications.
Karen Mann	Outer loop...that's what the loop was supposed to be for
Alissa Dare	I usually take Virginia (to the south) or Lake Forest (to the north).
Gerald Waltman	
Austin	
Pat Wykoff	Virginia and/or El Dorado
Nicole Howard	White Avenue
Steve Jarosz	Custer south bound to an alternate East-west road to 75
Elissa Shier	Virginia, El Dorado, 121
Cheryl Russell	
Sam Castleberry	It is not that congested.
Morgan Buchek	121
John Solan	121
Jeremy Rowdon	
Melody Nicholson	Virginia Parkway
Wendy Schreher	
Kimberley frank	Virginia
DEBORAH M MUCKELROY	I stay on 380
Ann Collins	121
Tom Timmermann	It's never congested for me but if it was I would use Virginia.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jeff Hoffmeister	A litmited access road further to the north
Gracie	
Nicholas Parra	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Steve Buchanan	Expand Prosper Trail to a highway, and make many throughs on existing 380.
john girdzus	Not a traffic engineer. But, would recommend leaving HWY 380 AS IS. Would focus on developing an outer loop/HWY/Bypass north of 380 connecting north Dallas Tollway eastward to HWY 75 and slightly east, then southeast with the purpose of connecting to HWY 121. DEFINITELY would NOT have the connection point at the junction of Stonebridge DR. That junction needs to further west for many many reasons.
Karen Mann	Use the outer loop
Alissa Dare	I would like to see 380 stay on 380 and the focus move to buildingthe Outer Loop sooner to alleviate some of the traffic. I recently saw that one of the options goes through or very close to Erwin Park. I would like to see Erwin Park preserved.
Gerald Waltman	Use existing alignment.
Austin	
Pat Wykoff	Limit trucks to the right lane.
Nicole Howard	Elevated highway or loop around McKinney.
Steve Jarosz	Bypass north
Elissa Shier	Do not ruin beautiful Stonebridge streets that make up the character of the neighborhoods. If you do this hoas should be lowered as Stonebridge character will be damaged.
Cheryl Russell	
Sam Castleberry	It seems fine to me. 13 miles in 36 minutes doesn't seem too bad for rush hour. I moved here from Los Angeles and it took 45 minutes to drive the 5.5 miles to work.
Morgan Buchek	Build right next to it?
	Additional high volume road that skirts current population, re-connects east of Farmersville
John Solan	HOV lane(s)
Jeremy Rowdon	
Melody Nicholson	A loop further North
Wendy Schreher	
Kimberley frank	Creating it to be just like 121
DEBORAH M MUCKELROY	Stay out of Fairview
Ann Collins	Make a larger arterial Junction at Custer. Preserve the 4 lanes of Stonebridge ranch and Ridge road. There are 2 WALKING elementary schools and a middle school on those roads. It is crazy to add 6 lanes to roads with walking schools on them- That is not unique or keeping in nature.
Tom Timmermann	Try to identify a route that moves more to the north so as not to affect current subdivisions and businesses. It looks like the Custer and 380 interchange would be a logical area to consider taking a northly route especially since Custer needs improvement north of 380 anyway.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jeff Hoffmeister	I th8n' it's too late to turn 380 into a illiteracy access freeway, this should have been addressed 5+ years ago. The best solution now would be a limited access road further to the north.
Gracie	
Nicholas Parra	No
Steve Buchanan	Yes.
john girdzus	NO!!!!!
Karen Mann	No
Alissa Dare	Yes, I think it is unavoidable with the local growth.
Gerald Waltman	Yes
Austin	
Pat Wykoff	No
Nicole Howard	Freeway--depends on where it is.
Steve Jarosz	Yes
Elissa Shier	With limitations, not regardless of alignment.
Cheryl Russell	
Sam Castleberry	NO
Morgan Buchek	The alignment needs to make sense in safety, practicality, and minimal effect on beneficial land areas to the county.
	Yes
John Solan	Yes.
Jeremy Rowdon	
Melody Nicholson	No
Wendy Schreher	
Kimberley frank	Don't like the added large roadways going through SBR
DEBORAH M MUCKELROY	No
Ann Collins	No, it all depends on the alignment.
Tom Timmermann	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

				Nearby resident		A couple times a year

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Ford Clark	
Ron Leeper	Too crowded, high truck traffic and ripe for accidents
Gretchen Clark	
DAVID COPELAND	
Todd Kyser	No good ways to cross 380 biking or walking.
Tricia Wilson	
Leslie Allcorn	Yes - too much traffic and wrecks already. Expanding would be the worst possible thing to do.
Arlene Pearson	High speed with stoplights. Dangerous for cars entering or crossing the highway. Trucks. Notorious for accidents.
Michael Allcorn	Yes - too much traffic that is "pass thru" traffic. 380 is our only route in and out of our neighborhood. There are several wrecks every week. We do NOT need more 380 lanes!
Jill Alcantara	Very dangerous and too much traffic. Needs to be rebuilt as limited access thoroughfare with out service roads.
Tami	It is awful scary at times with all the traffic!! Too many accidents on that road.
Brady McCain	
Lindsay Halliburton	I am concerned with the proposal to expand Ridge and Stonebridge. These streets go by schools and in order to have more lanes, the medians than give so much charm to those streets would be lost. I am also concerned with the safety especially considering so many neighborhoods are right off of these roads
John	
Alan Willoughby	It seems pretty nice since it JUST got completed.... I wish you had made it into a thoroughfare....fewer lights....make over passes instead
	It sucks. I try to avoid it as much as possible.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Ford Clark	No alternate routes
Ron Leeper	Bloomdale to Wilmer road
Gretchen Clark	There are no alternate routes from my neighborhood.
DAVID COPELAND	
Todd Kyser	It has only been really bad while there is construction going on, and lots of slow moving construction vehicles and trucks make it much worse. Otherwise it is similar to 75 in/out of dallas - busy during the peak hour. so I rarely take another route.
Tricia Wilson	
Leslie Allcorn	NONE. We only have one way in and out of our neighborhood.
Arlene Pearson	Virginia, 121
Michael Allcorn	We do not have any alternative routes. Expanding 380 would be devastating.
Jill Alcantara	There are none but Eldorado. Virginia is under construction.
Tami	
Brady McCain	
Lindsay Halliburton	I take 380 typically
John	Eldorado.
Alan Willoughby	I gave taken 289 to the hi way between Gainesville and Sherman...but that has speed traps on it over by Gainesville

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Ford Clark	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Ron Leeper	Enlarge current hwy or a raised second level. If no other choice bypass should be away from current neighborhoods Or do nothing and speed up expansion of Frontier road from Preston to Bloomdale.
Gretchen Clark	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
DAVID COPELAND	
Todd Kyser	Outer loop similar to what Denton has done. Get the slow moving trucks out of the way, maybe even lane restrictions.
Tricia Wilson	
Leslie Allcorn	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Arlene Pearson	Overpasses at intersections. Or Elevated highway.
Michael Allcorn	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jill Alcantara	Build the outer loop as a free way and start sooner.
Tami	Do not increase it to 6 lanes!!!
Brady McCain	
Lindsay Halliburton	
John	Build a parallel road to the north of it where there is more room for wider lanes. Expanding existing 2 lane roads with medians would only be sad and decrease the quality of life
Alan Willoughby	It would be nice if it was like 121..without the tolls of course

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Ford Clark	no
Ron Leeper	No - not regardless of alignment
Gretchen Clark	
DAVID COPELAND	
Todd Kyser	No. I also don't understand why this isn't an issue out near prosper, etc. I support something nearer the collin county outer loop. That is the growth area, this project is supposed to be for the future and by the time it is completed where much of the project will need to be.
Tricia Wilson	
Leslie Allcorn	NO!
Arlene Pearson	Freeway yes, but not to the hatmnof neighborhoods or parks.
Michael Allcorn	NO!
Jill Alcantara	NO
Tami	NO
Brady McCain	
Lindsay Halliburton	
John	Not regardless. Only if it is to the north. I would also supports a freeway being built in the exact area if at all possible.
Alan Willoughby	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
David Koegl	Noise in back yard semi trucks coming through our fence
Kevin Lindell	Traffic congestion when I need to go to and from Denton
Travis Wendte	
Shawn sharkey	
Jeff Knowlton	Safety is a big concern eastbound from 75 through Princeton
John Koltes	To many stop lights not enough overpasses.
Lea Anne McCormick	Please do not reroute the highway or interstate through Erwin Park! We have such a small part of nature left. McKinney is “Unique By Nature”. Please leave this park alone.
Douglas Deaton	Yes. It is completely congested from Hardin to Highway 5. It is becoming congested near Custer.
Daniel Haley	No.
Bill Strohmeyer	Yes, rush hour is terrible.
Sammi Hicks	No
Greg Haughey	No divide between opposing lanes
Susara Nero	
Brock Stull	
Amy Wilkins	I think the location is good. Better timing on lights would help!
Jennifer	Safety concerns
Nikki orsborn	No, I have concerns with a road going through the park which so many people use and camp at.
Alison Whittington	Of course! Traffic is hideous
Janet Kennedy	It is a very dangerous road with a lot of accidents and fatalities.
Robert Mooney	
Amy Farrel	
Barry Bourassa	
Anna Brooks	No
Mary Yon	Becoming more & more congested
Nancy Shalaby	Yes, it often very contesting and becoming worse
Hany Hassan	Yes, it is often very congested and it is getting worse
Shay Sanders	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
David Koegl	White, Ridge, El dorado, Virginia
Kevin Lindell	FM 426 to FM 455
Travis Wendte	
Shawn sharkey	
Jeff Knowlton	Virginia,wilmeth or white
John Koltes	None. There aren't any options.
Lea Anne McCormick	Virginia Parkway
Douglas Deaton	Hardin south to White. Wilmeth east from 75.
Daniel Haley	I deal with it.
Bill Strohmeyer	
Sammi Hicks	Virginia
Greg Haughey	
Susara Nero	
Brock Stull	
Amy Wilkins	The area just East of 75 has terribly timed light and usually make me use back roads like White street.
Jennifer	Virginia Rd
Nikki orsborn	You could build above the 380 currently like the 121 Sam Rayburn
Alison Whittington	Virginia pkway
Janet Kennedy	There aren't really any good alternate routes to take to get to and from Princeton
Robert Mooney	
Amy Farrel	
Barry Bourassa	
Anna Brooks	
Mary Yon	Virginia Parkway
Nancy Shalaby	Eldorado or Vergina
Hany Hassan	Virginia Parkway or Eldorado
Shay Sanders	I never take alternative routes. It hasn't been much of a problem for me.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
David Koegl	Freeway, where we live in Kensington our backyard is on 380 and we dont even have a turn in lane there are wrecks 2 to 3 times a day something has got to be done
Kevin Lindell	Do not make it another Toll Road
Travis Wendte	
Shawn sharkey	
Jeff Knowlton	Fixed turn lanes for center median and bypass for through traffic in the most congested areas
John Koltes	Bridges
Lea Anne McCormick	
Douglas Deaton	Accelerate the timeline on building the outer loop. Add an extra lane on both sides above the number planned. Widen Frontier Pkwy (1461) considerably. Make the widened portion run from the Dallas North Tollway all the way to US-75.
Daniel Haley	Variable speed limits to keep traffic flowing at all times of day.
Bill Strohmeyer	Betterbsignal control and coordination.
Sammi Hicks	
Greg Haughey	Limited access freeway
Susara Nero	
Brock Stull	
Amy Wilkins	I don’t know.
Jennifer	Medians for safety
Nikki orsborn	
Alison Whittington	Send everyone back to California. Don’t let anymore people move here.
Janet Kennedy	A loop around Princeton, New Hope and McKinney.
Robert Mooney	
Amy Farrel	
Barry Bourassa	
Anna Brooks	
Mary Yon	By-pass, please!
Nancy Shalaby	
Hany Hassan	Move the road up north
Shay Sanders	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
David Koegl	Yes
Kevin Lindell	Yes
Travis Wendte	
Shawn sharkey	
Jeff Knowlton	Yes
John Koltes	Yes
Lea Anne McCormick	No
Douglas Deaton	No.
Daniel Haley	No. There are better solutions.
Bill Strohmeyer	Not sure.
Sammi Hicks	No
Greg Haughey	Yes
Susara Nero	
Brock Stull	
Amy Wilkins	No
Jennifer	Not Regardless of alignment
Nikki orsborn	I do not support the freeway going through the park.
Alison Whittington	Yes build a freeway but alignment definitely matters
Janet Kennedy	I'm not sure if I would support a freeway if it runs along the current alignment. I would have to have specific details about that before deciding, specifically about noise abatement, traffic signals, service roads and access.
Robert Mooney	No
Amy Farrel	
Barry Bourassa	Yes
Anna Brooks	No
Mary Yon	No, I do not.
Nancy Shalaby	
Hany Hassan	Yes
Shay Sanders	No.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Amie Voigt	None.
Amie Voigt	
Jayme Schmalzried	congestion
Kyle Voigt	No concerns with US 380.
Ernest Schmalzried	lack of lighting; lack of land dividers
Melissa Sanders	No
Lynn Hathaway	No
Heather Morse	Yes, the speed limit is too high causing very dangerous crashes.
Brad Thompson	Lights are not synced. There are inadequate turning lanes. Driveways for businesses near 75 create gridlock during peak times (Chick Fil A, etc) and should be rerouted
Mark Simon	Head on collisions
Mark Simon	Head on collisions
Michael C Yon	congestion
Scott Olson	Love the convenience of the existing road, just don't want it to get much bigger, and encroach on Erwin Park. Also, don't want to see it turned onto a toll road.
Mark Simon	Head on collisions
William Parr	Congestion is bad now and will only get worse
Pamela Slater	Yes, with all the growth and construction in our area this roadway is becoming extremely conjested.
Teri Danstrom	
Rick Moon	No
Kit	That it isnt big enough to handle the growth ir that it is going to turn into another toll road.
Giselle Allen	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Amie Voigt	Most of my daily driving is going North/South and not East/West.
Amie Voigt	
Jayme Schmalzried	none
Kyle Voigt	Most of my driving in North/South and not East/West.
Ernest Schmalzried	Coit and Preston Southbound
Melissa Sanders	I never have an issue with 380. The only time I may use a different route is Harden to White Ave when going downtown McKinney.
Lynn Hathaway	
Heather Morse	Virginia
Brad Thompson	Various routes (Custer, Lake Forest, etc)
Mark Simon	TX-78, Monte Carlo Blvd
Mark Simon	TX-78, Monte Carlo Blvd
Michael C Yon	Virginia
Scott Olson	Depends on congestion and location.
Mark Simon	TX-78, Monte Carlo Blvd
William Parr	
Pamela Slater	Harden, Custer, Prosper Trail, I would take Wilmeth but it is very round about at the moment.
Teri Danstrom	
Rick Moon	Custer
Kit	Custer to 121 or 75
Giselle Allen	Virginia Pkwy

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Amie Voigt	Keep it as is. The position of our neighborhood, Tucker Hill, is NO to all alignments due to potential loss of homes and devaluation of our neighborhood along with adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing Hwy 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; and not on or bordering existing or future neighborhoods of Tucker Hill.
Amie Voigt	
Jayme Schmalzried	widen lanes
Kyle Voigt	Keep it as is. The position of our neighborhood, Tucker Hill, is NO to all alignments due to potential loss of homes and devaluation of our neighborhood along with adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing Hwy 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; and not on or bordering existing or future neighborhoods of Tucker Hill.
Ernest Schmalzried	widening more lanes and overpasses at major intersections
Melissa Sanders	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Lynn Hathaway	
Heather Morse	Implementing large overpasses like is being done over Preston but I am not in favor of making 380 a highway like 121.
Brad Thompson	Possibly 1 additional lane in each direction. Increasing/Lengthening the number of turning lanes to allow through traffic to move. Sync the traffic lights to allow for better flow
Mark Simon	Freeway with limited access
Mark Simon	Freeway with limited access
Michael C Yon	by pass
Scott Olson	I do not have enough data to offer an effective solution.
Mark Simon	Freeway with limited access
William Parr	Expand the current path
Pamela Slater	Open up Wilmeth, Harden and Prosper Trail
Teri Danstrom	
Rick Moon	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Kit	Not a toll road...
Giselle Allen	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Amie Voigt	No, I feel that Hwy 380 is no different than Northwest Hwy. in Dallas and think the future growth of Collin County would be better served by another route running North/South as opposed to East/West since the outer loop will be built.
Amie Voigt	
Jayme Schmalzried	no, must see alignment
Kyle Voigt	No, I feel that Hwy 380 is no different than Northwest Hwy. in Dallas and think the future growth of Collin County would be better served by another route running North/South as opposed to East/West since the outer loop will be built.
Ernest Schmalzried	no. must see alignment
Melissa Sanders	No
Lynn Hathaway	Widen lanes
Heather Morse	No
Brad Thompson	No.
Mark Simon	yes
Mark Simon	yes
Michael C Yon	no
Scott Olson	It appears to be a necessity, but location will have a significant affect on my support. At this point, routing through Erwin Park will severely sour any support.
Mark Simon	Yes
William Parr	No
Pamela Slater	I would need to know where but probably yes.
Teri Danstrom	
Rick Moon	No
Kit	No, alignment that effects my property ir property value I wouldnt support.
Giselle Allen	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Sandra Simon	380 is a dangerous highway to travel with the center turn lane and vehicles stopping to turn left or right into business. The highway is not properly marked in some areas for turning.
Clayton Walvoord	
Vicente Torres	
Chris Marz	Too many accidents
A van Rooyen	No
Jared Galloway	Increased traffic and dangerous road for my kids to get to school
Michelle	Too much traffic. It needs to be a highway with no lights.
Chad Waller	Large truck traffic. Trucks traveling toward 75 from 35.
Norm Gebhard	Conjested
Clayton Derricott	
Amie	
Rob Walker	None, however I feel traffic congestion concerns are increasing.
Amy	
Sheryl Louis	No adequate turning lanes
Nick Reiter	Not really. Just wondering why the city continues to allow businesses to build right up to the road when there's a possibility of road expansion.
Nancy Hough	Too many travelers at high rate of speed.
AL HEWITT	very congested
Jennie Mosley	My main concern is traffic and I can only imagine how much worse it will be by the time Costco, movie theater, and the various retail stores open up.
Cliff Shaw	Need more lanes. Need a northern bypass route. 380 from Mckinney to Princeton needs to be eight lanes
Stephanie Tomes	It gets congested
Nicole Herring	
Amanda Tomasulo	
Swamy Ganesh	Yes
Stephanie Heilig	My biggest concerns are the congestion and the amount of 18 wheelers on the road. Depending on if there is a wreck it can take up to 30 minutes to get from my house (Ridge/380) to 75.
Douglas Batson	Dangerous when traffic is heavy.
Rob Spring	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Sandra Simon	I use whatever google tells me.
Clayton Walvoord	
Vicente Torres	Side roads
Chris Marz	Virginia
A van Rooyen	Custer
Jared Galloway	
Michelle	455 to Aubrey
Chad Waller	Virginia.
Norm Gebhard	Virginia
Clayton Derricott	
Amie	
Rob Walker	Virginia Parkway or Eldorado
Amy	
Sheryl Louis	Ridge to Virginia or Eldorado or vice versa
Nick Reiter	I don't typically take alternate routes.
Nancy Hough	Eldorado Pkwy; 455
AL HEWITT	Virginia Pkwy/El Dorado
Jennie Mosley	I only take 380.
Cliff Shaw	I take white ave to I think it's tennesse. If going to Princeton I'll sometimes take the back road around the south side of the airport.
Stephanie Tomes	75
Nicole Herring	At certain hours
Amanda Tomasulo	
Swamy Ganesh	Virginia Pkwy
Stephanie Heilig	I typically use 380 to get to 75 so I usually take Virginia.
Douglas Batson	Virginia, Bristol, Custer
Rob Spring	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Sandra Simon	Highways around Princeton and Farmersville.
Clayton Walvoord	
Vicente Torres	
Chris Marz	A by pass far north of current 380
A van Rooyen	Make current 380 wider, only a few places towards 75 need to be moved, the toad should go east. Moving it solve none of the problems, only cause more
Jared Galloway	
Michelle	
Chad Waller	Bypass. West of Coit.
Norm Gebhard	I would extend the return to 380 to west of Custer.
Clayton Derricott	
Amie	
Rob Walker	Complete current road projects before starting new ones, a great deal of repetitive construction is being undertaken adding to congestion.
Amy	
Sheryl Louis	Adequate lanes for turning
Nick Reiter	Build a freeway where the existing highway is or at least limit the number of stop lights on the highway.
Nancy Hough	Widen road
AL HEWITT	less lights with more ramp bypasses over streets with existing lights
Jennie Mosley	Widen 380.
Cliff Shaw	
Stephanie Tomes	
Nicole Herring	
Amanda Tomasulo	
Swamy Ganesh	US 380 freeway north of its present location.
Stephanie Heilig	Bypass 380
Douglas Batson	A loop to the north needs to begin at Custer, not Stonebridge or Ridge. Stonebridge and Ridge were built as Boulevards not major traffic thoroughfares like Custer. Further, and very important, if Stonebridge becomes the connector to 380 and a loop to the north, the number of people that cut through the LaCima Village neighborhoods via Custer / Bristol / Watch Hill and Stonebridge will rise dramatically. It is already a dangerous neighborhood problem.
Rob Spring	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Sandra Simon	I would not like to see 380 expanded with construction for years. A loop around would be better. There are already to many deadly wrecks on this road and wilding it would only make matters worst.
Clayton Walvoord	
Vicente Torres	No
Chris Marz	No
A van Rooyen	Yes, but not regardless of alignment
Jared Galloway	
Michelle	No
Chad Waller	No
Norm Gebhard	Only if west of custer
Clayton Derricott	
Amie	
Rob Walker	No, I'm concerned that too many roads are under construction and incomplete.
Amy	No
Sheryl Louis	Yes, to better improve
Nick Reiter	Yes. Just not close to my house.
Nancy Hough	A freeway would be great.
AL HEWITT	not if it causes major problems for existing neighborhoods
Jennie Mosley	No.
Cliff Shaw	East west corridor yes. North south (bridge over Lavon) no
Stephanie Tomes	No
Nicole Herring	No
Amanda Tomasulo	
Swamy Ganesh	No.
Stephanie Heilig	No
Douglas Batson	No
Rob Spring	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jon Dell'Antonia	
Holly Choate	No/few turn lanes thus slowing traffic & making dangerous Rush hour back up is bad for this small a population
Rex Evans	Traffic congestion is obviously a concern; I tend to avoid using 380 whenever possible, especially during 'rush hours'. It is terrible at the 380-75 interchange.
Felicia Guerra	Congested and too many stoplights.
Jon Dell'Antonia	
Mark Davis	Yes. To many traffic lights for the volume of traffic.
Brenda Chadwick	Yes, too many construction trucks, wrecks, congestion.
Ryan Eatmon	
Brooke Mott	There seem to be a lot of wrecks on 380. There is congestion in Princeton, but it seems to be at limited times of the day.
paul kawamoto	No
Bruce Borovicka	
	Too fast
Clara Bahner	Too congested
Renee Hays	Honestly, I think there are too many lights on it. I was on it yesterday around noon, and it doesn't seem to flow well. I know many are opposed to a freeway, but I think with the expected growth it needs to be converted to a freeway.
Joanna Prentice	Yes, in the past 2 months my husband has had 2 accidents near 380 and Harden by motorist rear ending him.
Wendi Warren	Exiting road is congested with too many traffic stops. So many neighborhoods border the existing 380.
Jennifer Dido	Congestion
Art Reyes	
Jeff Knowlton	Safety east of 75 over to Princeton
Jena Georgopulos	No
Andrew Young	
Alaina	
Charmaine Cook	Traffic congestion
Jimmy Kaytovich	
TONY YUNT	Traffic continues to increase, traveling both East and West, and many traffic lights create delays.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jon Dell'Antonia	Virginia Pkwy or White avenue
Holly Choate	982 or Myrick/Simpson
Rex Evans	Generally I will try to go down to Eldorado Parkway, or across Prosper Trail and First Street/Fishtrap Road till I am at least somewhere west of the DNT. I generally try to use the side streets around my house to get around locally.
Felicia Guerra	Virginia or other residential streets
Jon Dell'Antonia	Virginia Pkwy
Mark Davis	Fishtrap Rd,
Brenda Chadwick	Side roads. Virginia, Hardin, White, etc. Anyway to get around.
Ryan Eatmon	
Brooke Mott	
paul kawamoto	Virginia
Bruce Borovicka	Depends on where I'm going. I usually bypass 380 and go down Wilmeth to Hardin.
	Virginia
Clara Bahner	
Renee Hays	It depends on where I am going. Normally, I would say Virginia, but it is currently under construction as well. I don't get on 75 often.
Joanna Prentice	My husband comes home 75 everyday and has changed driving to Virginia where there's construction but doesn't have the traffic flow 380 does.
Wendi Warren	121 to 35 or 121 to Dallas North Tollway.
Jennifer Dido	Highway 121
Art Reyes	
Jeff Knowlton	Virginia or White ave westbound
Jena Georgopulos	Highway 75 or roads such as Virginia or eldorado
Andrew Young	
Alaina	
Charmaine Cook	Eldorado, Virginia, 121
Jimmy Kaytovich	
TONY YUNT	No good alternative routes provide a quicker way due to the number of traffic lights on existing roads like Virginia Pkwy.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jon Dell'Antonia	Move the blue or red route west past Custer road to enter Hiway 380 West of Walmart at Custer and 380. Do NOT attempt to widen 380. The disruption to homes and busineses would be enormous. Building an interchange at 75 and 380 would be a huge undertaking removing many businesses. Concentrate on alternative routes like Bloomdale road which has much less impact on homes or businesses.
Holly Choate	Short-term - synchronized lights might help
Rex Evans	I would prefer seeing overpasses and underpasses installed, with entry and exit ramps for US 75, with the bulk of the effort directed towards getting right of ways farther north to create a by pass or a new highway to take some of the pressure off of 380. Of the alignments shown, I would prefer the non-bypass options (Pink or Green).
Felicia Guerra	Freeway
Jon Dell'Antonia	Build the outer loop now and see what impact that has on 380 traffic.
Mark Davis	It really needs to be a freeway
Brenda Chadwick	Keep 380 on 380.
Ryan Eatmon	
Brooke Mott	
paul kawamoto	Produce an alternative road on the north side running parallel. Start/End at Preston and run it through to 75.
Bruce Borovicka	380 definitely needs to have more lanes, but a bypass will affect business along 380
Clara Bahner	
Renee Hays	I know being a Stonebridge Ranch resident, that I am concerned about the impact on our community. Even though I support a freeway, it needs to be done smart to have the least impact on surrounding neighborhoods.
Joanna Prentice	Up 380 dot has built a highway that bypasses 380 & Custard. My question to you all is why didn't McKinney for see the influx of businesses & people since you've had great examples from Plano, Frisco and Allen?
Wendi Warren	If a freeway is added, it should be built further north that the existing 380 and connect at Custer, Hardin, Lake Forest. It should not connect at Stonebridge Drive or Ridge Roads. Support the blue or red routes but move the connection west across Custer road to connect with 380 west of Walmart.
Jennifer Dido	Add additional lanes
Art Reyes	
Jeff Knowlton	
Jena Georgopulos	
Andrew Young	
Alaina	
Charmaine Cook	Go north. Please I tolls.
Jimmy Kaytovich	
TONY YUNT	Turn US 380 into a freeway.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jon Dell'Antonia	No
Holly Choate	Yes
Rex Evans	Yes, with reservations; I realize that the congestion will just get worse over time, so understand that something will have to be done. I agree with some of the residents that it may just be too late to do anything very meaningful to 380 itself, which is why I think that looking at the proposed outer loop region may be more practical.
Felicia Guerra	Yes
Jon Dell'Antonia	No
Mark Davis	Yes
Brenda Chadwick	No
Ryan Eatmon	
Brooke Mott	
paul kawamoto	No.
Bruce Borovicka	NO BYPASS, business will go down
	No
Clara Bahner	No
Renee Hays	I support a freeway if it is done smart. Whether people like it or not McKinney is growing, and we need to plan for that expected growth. If it stays as is that isn't a feasible solution. 380 is known for having many wrecks. I hear several people who avoid driving on it, because it can become a traffic nightmare.
Joanna Prentice	No!! I hope we will have a few choices that we can vote on.
Wendi Warren	Support a freeway, but not on the existing 380 path. Too many neighborhood entrances face the corridor and neighborhoods would be negatively impacted by the increased thoroughfare.
Jennifer Dido	No
Art Reyes	
Jeff Knowlton	Yes
Jena Georgopulos	No
Andrew Young	
Alaina	
Charmaine Cook	No
Jimmy Kaytovich	
TONY YUNT	No, alignment is important based on potential negative impact to existing property owners and their investment in their respective property.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
	It feels dangerous. Distracted drivers and all of those stoplights don't mix well. I completely avoid it during peak times and weekends.
David Ledvina	
Suzanne Davis	lots of traffic and lots of construction traffic (dangerous) Also, where my business is, going West on 380 past Lake Forest, people have to take an unprotected left turn and it is VERY dangerous
Jacob Seyb	Its busy
Dachia Guatelli	Not safe
Jason Cook	Congestion and traffic noise
Laurie	Yes, the traffic on this road has increased exponentially since we purchased our property three years ago (we literally back up to 380). There is SO much road noise all night long that we can't sleep at night. Engine breaking. Speeders. Motorcycles revving their engines. Wrecks. It's ridiculous.
Jill Helms	The traffic between Princeton and McKinney is ridiculous. It is backed up every morning and every afternoon. The speed limit is also too fast (60 mph) and there is at least one accident a day, some have been fatal.
Bonnie Rice	
Kristin Traw	People use Kensington at Stonebridge for a cut through
Brittney Rogers	Dangerous, too many 18 wheelers/large work trucks, congested
Nicholas Chewning	Some neighborhoods require U-turns to access them from US 380 making it incredibly difficult and dangerous to get to them.
Terry Worthy	No
Kristofor Erickson	No
Rachelle Gaither	leave 380 as is. it is such a death trap, so many car accidents, speeders
John D Holmes	No
Timothy Glassett	Numerous safety concerns...not enough turnings lanes into perpendicular roads or community and business entrances. Speed limit is also to high and bad visibility of traffic lights.
John Holmes	It is a little loud at my house. I live near Stonebridge and 380.
Joe Gordon	Yes. Too many traffic lights for the amount of traffic. Congestion at 75, Dnt intersections
Amanda Batson	
Tamara Chewning	Congestion near the 75 & 380 area. Speed when trying to slow to turn into our neighborhood (Kensington), and lack of ease of access to our neighborhood when going west on 380.
Phil Cavender	Yes there is too much congestion th ed closet you get to 75.
James debois	Congestion due to lack of Passover and service roads separating traffic
Tommy Apligian	Traffic lights. It needs to be a non stop highway. Accidents are bad on this road as well, going from 65/70+mph to a dead stop at lights. People run them all the time, creating a major risk.
Gloria Johnson	Safety issues
Laura Lanciani	It is too crowded and dangerous with huge construction and delivery trucks. If there were no trucks I feel it would be better. Plus 380 and 75 is a nightmare.
Jeffrey Giangreco	Traffic is building with all new mega shopping and entertainment. Accidents are also on the rise
Elizabeth Anderson	The heavy truck traffic
Candice Shoptaugh	I do think it is dangerous for cars to pull out in front of cars going 60+ MPH.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
	I drive through Mckinney. But going from Mckinney to Denton or Mckinney to Farmersville we have no choice except to take it.
David Ledvina	
Suzanne Davis	I have no options as my business is off of 380 and there is no other way to my business
Jacob Seyb	Virginia
Dachia Guatelli	Custer Rd
Jason Cook	Virginia
Laurie	Virgins or Eldorado
Jill Helms	From Princeton to McKinney, I take Simpson Road, to County Road 400 to S. Bridgefarmer Road to FM 546 to Airport Road to Industrial to Hwy 5/McDonald Street. (I work by Medical City McKinney Hospital.)
Bonnie Rice	
Kristin Traw	Not our side of 380 but yes in Prosper
Brittney Rogers	Virginia, Custer, Stacy
Nicholas Chewning	From East: Virginia/White which is becoming more congested. From West: 121 -> Custer
Terry Worthy	None. The congestion is only bad during rush hour just like it is on 121, NDT, 75 and all other roads.
Kristofor Erickson	It's never congested enough to warrant a different route
Rachelle Gaither	custer, independence
John D Holmes	Virginia
Timothy Glassett	I avoid 380 whenever possible...I'd rather take slower back roads.
John Holmes	Virginia
Joe Gordon	Virginia, el dorado
Amanda Batson	
Tamara Chewning	White and/or Virginia.
Phil Cavender	Virginia
James debois	Different back roads
Tommy Apligian	Any of the north/south feeder streets.
Gloria Johnson	Eldorado, Preston, Custer, Lake Forest
Laura Lanciani	I just suck it up because the construction on Virginia is bad too.
Jeffrey Giangreco	Through residential to 121
Elizabeth Anderson	Virginia parkway
Candice Shoptaugh	There isnt much else to take. We usually just sit and wait.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
	I'd love a toll road like 121 (Sam Rayburn) that gave us the ability to quickly and easily reach Denton from Mckinney.
David Ledvina	
Suzanne Davis	May want to put in an elevated highway with restricted exits. May want to widen 380. Definitely right now needing a light to take a left to the future Kroger and medical complexes located across the street from Baylor Scott & White Medical Center.
Jacob Seyb	Green route, or blue or yellow route, but intersection needs to be moved west of Custer
Dachia Guatelli	I like the Green proposal
Jason Cook	
Laurie	It needs to be redirected AWAY from Stonebridge Ranch properties. We are a very large community contributing heavily to the tax base in McKinney.
Jill Helms	It needs to be widened, but we need to have a viable option to commute on while it is being widened. I am concerned that the "cure" will be the "killer" for a really LONG time.
Bonnie Rice	
Kristin Traw	
Brittney Rogers	
Nicholas Chewning	Longer turn lanes, more left turn lanes, and a better designed intersection at US 75. It is congested there from people trying to enter US 75 from US 380 at almost any time of day.
Terry Worthy	
Kristofor Erickson	No change
Rachelle Gaither	
John D Holmes	Loop around the city
Timothy Glassett	More turning lanes...lower speed limit. Or an alternate route all together
John Holmes	Definitely not connecting a thoroughfare to Stonebridge Ranch. I would suggest Custer being a better alternative.
Joe Gordon	380 needs to be a freeway
Amanda Batson	Use existing major roads as connectors to "new" US 380. For example, Custer is an established major thoroughfare. Do not use residential streets, e.g., Stonebridge or Ridge, as points of connection.
Tamara Chewning	More alternative roadways that offer higher speed and quick access to 75 for people commuting.
Phil Cavender	
James debois	Make it a freeway with multi lane service roads similar to 75, 121, 35, etc
Tommy Apligian	Make it a non stop continuous highway. If that means you have to build up like 35 in Austin then do that. Or grab more real estate so you can have a true feeder access road then do that.
Gloria Johnson	Limited access to on & off ramps or service roads. Lower speed limit in high occupancy areas.not sure
Laura Lanciani	NO TRUCKS!!!! No 18 wheelers, dump trucks, concrete trucks etc.
Jeffrey Giangreco	A pass through toll either around area or suspended above.
Elizabeth Anderson	
Candice Shoptaugh	We love the idea of the blue route. Would help but not take away the small town of mckinney and access of 380 and 75.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
	Something has to be done.
David Ledvina	
Suzanne Davis	yes
Jacob Seyb	No
Dachia Guatelli	Only if it takes into consideration the safety of people driving on it and it is aesthetically appealing.
Jason Cook	
Laurie	Something has to be done to REDUCE traffic on the existing 380 corridor. That DOES NOT mean we want to see that corridor expanded or shifted in its existing space. It needs to be REDIRECTED.
Jill Helms	Not really, but I don't know what else would really work.
Bonnie Rice	
Kristin Traw	Prosper area yes but not needed in McKinney
Brittney Rogers	Yes
Nicholas Chewning	No.
Terry Worthy	No/maybe
Kristofor Erickson	Absolutely not, this would do nothing but negatively impact everyone
Rachelle Gaither	we need it. it has to be done
John D Holmes	Yes
Timothy Glassett	No
John Holmes	Yes. As along as it is north of 380 and no where near Stonebridge Ranch.
Joe Gordon	Yes
Amanda Batson	No
Tamara Chewning	No
Phil Cavender	Yes
James debois	Not regardless of alignment.
Tommy Apligian	I don't know honestly. I don't speak in absolutes without proper knowledge.
Gloria Johnson	Not sure.
Laura Lanciani	I don’t mind the idea of a freeway as long as all the trucks HAVE to use the bypass.
Jeffrey Giangreco	Yes
Elizabeth Anderson	
Candice Shoptaugh	Yes if it doesnt take away from the current 380.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Andrew Sisson	Traffic is very bad during commuting times
Chris Brown	More development is going to drive more stoplights and traffic, which will greatly increase the time to drive it
LILIANA P TABANG	No
Lori Juarez	Congestion.
Anne Chlebos	
Linda Waller	Too congested, especially with commercial trucks.
Ileana Popa	No
Jessica Stockmoe	
	Traffic is very heavy at the 75 ad 380
John Murphy	
Cheryl Schmoyer	Traffic volume, although that is good for our business.
Beth Stockmoe	
Joy Allison	Heavy Traffic
Andrea McAnally	
Candace New	The east side of 380 past highway 5 gets really congested during rush hours. With the surrounding areas growing, we need more than a 4 lane road.
Terry Hockenbrough	Needs better traffic control on the lights to avoid accidents.
Heather	Yes, as the population grows in Princeton and the surrounding area, US 380 as it sits now cannot support the rising population and all the traffic that comes with it.
Matthew Heatherly	
David Morton	ewroute through traffic off existing road
Charmaine Cook	Traffic congestion
Carrie Chandler	
Dustin W Wright	I have a home right off the 380 that has no sounds barrier an the traffic noise can be very loud, adding to this traffic in any way without some kind of sound reduction is not something I want.
Paula Bodine	Commute time has doubled in the 7 years I have driven on it.
Karen Barker	No
Hotch Van Blarcum	Yes.
John Magana	Traffic travels too fast
Kelly Scott	Lots of trucks and heavy traffic. It's a dangerous road, weekly accidents!
Jared Schreher	No
Janet Magana	Yes, speed limit should be reduced as traffic gets heavier.
PAUL	traffic is easily and frequently congested and moves slow during congestion

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Andrew Sisson	No
Chris Brown	Virginia pkwy
LILIANA P TABANG	
Lori Juarez	Going west I use DNT or ElDorado. Going east or south I drop down to Virginia or ElDorado or take Alma all the way down past 121
Anne Chlebos	Virginia Pkwy
Linda Waller	Virginia
Ileana Popa	
Jessica Stockmoe	
	White Avenue
John Murphy	
Cheryl Schmoyer	Highway 5 or Custer
Beth Stockmoe	
Joy Allison	Virginia Parkway
Andrea McAnally	Virginia Pkwy
Candace New	Airport Road, 546
Terry Hockenbrough	Lake Forest
Heather	I drive from north of Farmersville to Princeton every day for work. I take FM2756 instead of taking US 380. To avoid US 380 from Princeton to Mckinney, I sometimes take FM 1827 and cut through the country.
Matthew Heatherly	
David Morton	Virginia once it is done
Charmaine Cook	Virginia, Eldorado or 121
Carrie Chandler	
Dustin W Wright	
Paula Bodine	Prosper Trail, Custer/121
Karen Barker	Side streets
Hotch Van Blarcum	Dnt. Custer. Eldorado. Virginia.
John Magana	side streets
Kelly Scott	Virginia Parkway
Jared Schreher	
Janet Magana	Virginia Pkwy.
PAUL	455/white street to 289 west of anna, tx and to Princeton when going east of anna

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Andrew Sisson	Expand existing footprint
Chris Brown	
LILIANA P TABANG	
Lori Juarez	I like any of the options except for the red one.
Anne Chlebos	Rerouting through traffic farther north
Linda Waller	Corridor taking commercial trucks off 380.
Ileana Popa	
Jessica Stockmoe	Lower speed, more stoplights, add additional turn lanes, more police presence
	Build a flyover from 380 crossing the 75
John Murphy	
Cheryl Schmoyer	I think a bypass to the north of 380 from Princeton to Denton would be a great solution, as long as the existing stretch of 380 is left alone. Construction is the greatest deterrent to business!
	Use proposed blue route but with link into 380 at a point 1 mile West of Custer
Beth Stockmoe	Stop signs, left and right hand turn lanes, more police presence
Joy Allison	More lanes
Andrea McAnally	widening 380
Candace New	
Terry Hockenbrough	Take the bypass out and away from the residential and business already there. The years of building would create a nightmare!!, accidents, and lost business. Also the students going to college would be adversely affected.
Heather	n/a
Matthew Heatherly	
David Morton	Thru route north in current farm area Stonebride to three lanes if really needed Do not change Ridge
Charmaine Cook	Not a tollway please. Have the highway with service roads
Carrie Chandler	
Dustin W Wright	
Paula Bodine	Keep bypass connection to 380 east of Custer (outside of Prosper)
Karen Barker	
Hotch Van Blarcum	
John Magana	Keep it a highway - not a freeway.
Kelly Scott	
Jared Schreher	
Janet Magana	Anything that will NOT negatively impact our neighborhood in Tucker Hill!!! Not to infringe on the established community!
PAUL	make similar to US75 with exits and service roads to reduce street lights and eliminate left hand turns

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Andrew Sisson	Yes
Chris Brown	
LILIANA P TABANG	No
Lori Juarez	Not the red option. Horrible for homeowners just east of stonebridge.
Anne Chlebos	No
Linda Waller	No...a corridor connecting Prosper to 75 away from businesses on 380.
Ileana Popa	No
Jessica Stockmoe	No
	yes
John Murphy	
Cheryl Schmoyer	I would like to see 380 as it exists now left alone, regardless of whether a freeway is added. Construction on our busy stretch of 380 would close some of the many businesses, just as it did when 75 was under construction.
	NO Freeway
Beth Stockmoe	No
Joy Allison	Yes
Andrea McAnally	
Candace New	
Terry Hockenbrough	No. Only if it is out and away from existing homes and businesses.
Heather	NO
Matthew Heatherly	Yes
David Morton	yes
Charmaine Cook	Yes
Carrie Chandler	
Dustin W Wright	
Paula Bodine	No bypass within Prosper, it is a small community.
Karen Barker	No
Hotch Van Blarcum	I do believe it is eventually necessary.
John Magana	NO
Kelly Scott	
Jared Schreher	No
Janet Magana	NO
PAUL	yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
George Lovland	
	Traffic
Gail Parks	The lights are not synched on 380 in Collin County. Fix that problem and 380 would be vastly improved.
Beth Ryan	
Bruce Parks	
Vickie H. McCormack	Yes
Michael Morrell	Extreme congestion
Karen Curtis	Not at this time
Matthew Cody	No.
Jeff Truitt	
Charlsie James	Heavy traffic, number of red lights, red light backups, number of serious / fatality accidents, few alternative east/west route through Collin County
Lorene Teed	The magnitude of the building in the area will cause a particular problem with the access to the hospital. Left turn lanes in the middle of oncoming traffic is already somewhat problematic.
Cynthia Hollenbach	heavy traffic
Karen	Too congested and too many trucks
James Jenkins	Congestion and traffic accidents are a huge problem.
Linda Soltysik	Hwy 380 has become extremely frustrating with all the truck traffic, but I know that is a product of the tremendous development in McKinney, Prosper and points west. My main concern is that the danger will be increased is steps are not taken to control traffic better. More enforcement of speeds and elimination of "death-trap" intersections like CR 852 & 380. The crossover should have been at 856 where the grade is conducive to highway entering and visibility is 1000% better, making for safer entrances. GR 952 is a nightmare intersection to 380.
John Nelson	It is highly congested
Helen Gagliano	No
Frederick Nelson	Yes that it is not wide enough
Dan Lovitt	Too many stoplights with no overpasses or way to smoothly avoid the lights at any given intersection. Slow to accelerate vehicles in all lanes.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
George Lovland	Prosper trail to lake ridge. Or Virginia.
	Eldorado
Gail Parks	
Beth Ryan	Custer, preston, 1461, Dallas parkway
Bruce Parks	
Vickie H. McCormack	White ave
Michael Morrell	Only other option is south through Princeton and Lucas with FM roads onto Parker Rd.
Karen Curtis	Side streets
Matthew Cody	I will take Lake Forest South to Virginia, Eldorado, or SRT.
Jeff Truitt	
Charlsie James	Back roads through New Hope, FM 2933, FM 1827, FM 2756
Lorene Teed	If at a particular time of day, Virginia Parkway to Hardin then north White across to 75
Cynthia Hollenbach	el dorado or virginia parkway
Karen	Virginia, Wilmeth
James Jenkins	Virginia
Linda Soltysik	Virginia Pkwy.
John Nelson	N/A
Helen Gagliano	
Frederick Nelson	I have no other route
Dan Lovitt	Wilmeth from 75 to Hardin Weston Road to Highway 5 FM455 to 289

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
George Lovland	I think the current alignment is fine. Limited access would be beneficial.
Gail Parks	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge Drive; not on or bordering Tucker Hill.
Beth Ryan	
Bruce Parks	Tucker Hill's position is NO to all alignments due to potential loss of homes and evaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; NOT on or bordering Tucker Hill.
Vickie H. McCormack	I'm for the outer loop
Michael Morrell	A bypass of Mckinney regardless of current park impact.
Karen Curtis	Keep it aligned as is but widen or deck the road at intersections
Matthew Cody	I would suggest making portions of the 380 corridor continuous, for example creating over and underpasses at Custer, Lake Forest, Hardin, and Coit. I would then connect Wilmeth with a four lane road from Lake Forest all the way to 75. Then expand to four lanes and connect 123/164 all the way to 75 in a more direct path
Jeff Truitt	
Charlsie James	Additional east / west route(s) from Collin to Denton County lines, US 380 loop between Denton and Farmersville,
Lorene Teed	Frontage or access roads such as 75 has
Cynthia Hollenbach	like the idea of a highway
Karen	North outer loop to connect to Custer Rd
James Jenkins	As problematic as it would be in the short term, I would support the expansion of 380 in its current location, and converting it to a limited access roadway with frontage roads on both sides. This would create less disruption than the creation of an entirely new freeway put in as a bypass.
Linda Soltysik	While improving 380 is a noble endeavor, the current plans for a bypass are short-sighted at best. Prosper is developing along 380 at alarming rates. A bypass that starts near Custer Rd will only push the bottleneck west to Prosper. Any bypass should start near Hwy 289, or NDT. Making 380 into a larger, possibly limited access road makes the most sense.
John Nelson	build a highway with no traffic lights / on and off ramps
Helen Gagliano	Maintain the existing roads
Frederick Nelson	Do not have a suggestion
Dan Lovitt	Something similar to what was done at Spring Valley Road @ Highway 75 where through traffic bypasses the lights (sadly $$$), keeping slower vehicles from using all lanes, or a bypass of McKinney presumably to the north.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
George Lovland	No! I do not want a freeway that takes commuters miles out of the current alignment. I don't believe that would benefit anyone, especially considering the future Collin county outer loop alignment would help relieve some of that traffic. I feel that it should be built and 380 in its current alignment should be expanded with limited access.
	I support building of a freeway, but alignment should factor in minimal (as much as possible) disruption to current home/business/land owners.
Gail Parks	
Beth Ryan	As long as it doesn't take away the beauty of nature in this area.
Bruce Parks	
Vickie H. McCormack	Not sure
Michael Morrell	Yes!
Karen Curtis	No
Matthew Cody	No.
Jeff Truitt	
Charlsie James	Yes, it is a requirement to support the growing population
Lorene Teed	Yes, if the development of the area with increased population is the speculation.
Cynthia Hollenbach	not necessarily
Karen	Yes
James Jenkins	Yes. We must take action to avoid future disaster when the population of Collin County balloons beyond our ability to properly support it with transportation infrastructure.
Linda Soltysik	yes
John Nelson	
Helen Gagliano	No
Frederick Nelson	Yes
Dan Lovitt	I'm unsure, I would hate to destroy a quiet public use space for a freeway - at least without the comparable recreation of another.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
	Too congested heading west
Nora	Yes too many accidents, speed, traffic congestion
Kasey Kurtulan	Speed level
Andrew Smith	Not particularly
Brian Redford	
Ronnie Fisher	Too much traffic and not enough alternate ways for large trucks and travelers
Phyllis Fisher	Many lights and lots of traffic.
McKinsey Smith	No
Stephen Franks	Very busy. Not divided. Too many trucks. However, I worry that connecting an alternative directly with Stonebridge/380 will greatly increase traffic on Stonebridge.
Jonas Bjorklund	No.
	Not at this time.
David Boyack	Heavy traffic.
Collin Sutt	Instead of simply expanding it, plans should have been made to create an elevated freeway with separate service roads, similar to what was done with HW-121
Ruby Evans	Speed. Speed limit should be reduced due to the traffic coming in and out of businesses.
Cora	There are areas that are dangerous especially for young, new drivers.
Alex raouf	No
AUBRIANNE BISHOP	I live near Custer/off of 280 and it's not as bad as people make it sound - maybe at the 75 area,but not where I am.
Katie Fiske	Crazy drivers
Linda lack	Safety, noise, pollution
Terry Stewart	Very congested
Sarah Mcanally	No, it is nice now. Although, there are lots of red lights.
Gregory and Linda Lack	Safety
Dave Carter	Unsafe, congested at intersections, lack of sidewalks, no safe accommodations for bicycles, too many driveways and signals for a high speed highway.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
	Eldorado
Nora	Not to many options just wait in congested traffic.
Kasey Kurtulan	Backroads to 121 or 75
Andrew Smith	121
Brian Redford	
Ronnie Fisher	Prosper Trail. Runs east and west from Lake Forest to Preston. But it gets really congested during school hours and a two lane road
Phyllis Fisher	Bloomdale Road which turns into Prosper Trail...when driving from Lake Forest, McKinney to Prosper
McKinsey Smith	Anything I can find however I usually just stick with 380
Stephen Franks	Eldorado
Jonas Bjorklund	I don't need to use it at such times.
	Virginia
David Boyack	Virginia Pkwy or Eldorado.
Collin Sutt	Eldorado
Ruby Evans	There are no other routes
Cora	Bloomdale and other county roads. White. Lake Forest, Ridge or Hardin to Eldorado.
Alex raouf	
AUBRIANNE BISHOP	Coit to Virginia
Katie Fiske	That's the only way to go.
Linda lack	
Terry Stewart	Lake Forrest and Hardin
Sarah Mcanally	I just stick it out. There isn't usually too much traffic except at custer during rush hour.
Gregory and Linda Lack	
Dave Carter	There isn't a good alternative!

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
	Loop north of US 380
Nora	Added more roads with the amount of people moving to princeton definitely we need more options.
Kasey Kurtulan	None on the west side of Mckinney, the east side needs some work
Andrew Smith	
Brian Redford	
Ronnie Fisher	Widen 380 into a major highway
Phyllis Fisher	Hwy and side roads. No toll
McKinsey Smith	Keep it the way it is
Stephen Franks	If possible connect an alternative to the North Dallas Tollway and make a loop north of existing 380.
Jonas Bjorklund	
	Build another major Rd from East to West 5 miles north of 380.
David Boyack	Timed signals, additional lanes, alternate routes.
Collin Sutt	Create an elevated freeway with separate service roads.
Ruby Evans	Reduce speed limit
Cora	
Alex raouf	
AUBRIANNE BISHOP	create a bypass over US 75
Katie Fiske	
Linda lack	Tucker Hill is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications notwithstanding our recommendation if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise, pollution by means of cantilevered access lanes; a depressed throughway and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Terry Stewart	Widen 380 and make it another loop.
Sarah Mcanally	I don’t know.
Gregory and Linda Lack	
Dave Carter	Add elevated tolled express lanes - 2 or 3 in each direction for long distance travel. Build tax supported limited access main main lanes.plus frontage roads with sidewalks/ trails.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
	Yes
Nora	Yes as long the traffic stops, my commute short, and we don't have a lot of accidents due to people driving careless and in a hurry
Kasey Kurtulan	No, it will just be a patch to a bigger problem
Andrew Smith	yes
Brian Redford	
Ronnie Fisher	Yes
Phyllis Fisher	Yes. Residences are continually being built....and the roads never keep up. Would be nice to have roads completed before thousands of people move in to neighborhoods.
McKinsey Smith	No
Stephen Franks	Uncertain
Jonas Bjorklund	
	Nope
David Boyack	No. I'd have to see the alignment.
Collin Sutt	No! It should be installed at the current 380 location.
Ruby Evans	No
Cora	No
Alex raouf	Yes
AUBRIANNE BISHOP	no
Katie Fiske	
Linda lack	No
Terry Stewart	I do not want Erwin Park affected. It is a fabulous resource.
Sarah Mcanally	Sure. Anything to reduce the red lights.
Gregory and Linda Lack	No
	No
Dave Carter	No. The freeway needs to stay along the existing alignment. That is the way it should have always been planned.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Gabriela Ahrens	No
Richard Bonaparte	Yes. Congestion. Dangerous conditions. Poor planning.
Cathy Bebee	Speed, no enforcement of speed or traffic laws
Michael Peters	To busy near 75 intersection
Laura	Too many lights and congestion at 75 and 380 at peak times
Julia	The backup of traffic between 75 and Skyline, where we live.
Tom Kaphingst	Need more traffic lights at new communities like that by baylor hospital
Heather Vandygriff	The speed limit is too fast with the number of stop lights on 380. Many accidents occur from cars running lights at high speeds.
Randy Lisbona	
Andrew Royal	Concerned that there is no alternate East-West route in case of an accident or construction. That more houses mean more people trying to cross busy streets. A big new high school right on the highway so lots of kids trying to cross the street.
Michele Korth	Yes. Safety
Sandy Dickey	Speed is too high and too many people speed over 70 miles an hour. There are too many left turns that are not at a light which is very dangerous and backs up traffic on both sides.
Karen Karch	Speed is too fast, too many trucks, need better turn lanes at north/south intersections
Jada	So dangerous! People consistently going under the speed limit, serious congestion
Michele Korth	Yes. Becoming very dangerous. Silly drivers speeding and cutting corners
James morris	No
Dawn Solomon	Not at all
Marie Setliff	Yes
Scott Setliff	Yes - traffic noise; fast traffic, heavy congestion
Amy Evans	Congestion

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Gabriela Ahrens	N/a
Richard Bonaparte	Hardin. Lake forest. Custer.
Cathy Bebee	Virginia St, Eldorado
Michael Peters	Back roads
Laura	Virginia
Julia	Wilmeth
Tom Kaphingst	Lake Forrest, Custer
Heather Vandygriff	Frontier
Randy Lisbona	
Andrew Royal	No good alternative unless I go South to Lewisville.
Michele Korth	Virginia parkway
Sandy Dickey	There are none.
Karen Karch	Custer or Ridge to Virginia or Eldorado and then on to 75 or Preston.
Jada	546 & CR 400
Michele Korth	Virginia parkway
James morris	I don't.
Dawn Solomon	Where I drive on 380, I never run into it being too congested.
Marie Setliff	n/a
Scott Setliff	n/a
Amy Evans	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Gabriela Ahrens	None
Richard Bonaparte	Expand Hardin
Cathy Bebee	A freeway from Denton to Farmersville
Michael Peters	
Laura	Not sure. Less traffic and less congestion at peak times.
Julia	Traffic light sync
Tom Kaphingst	Widen, add better traffic control lights
Heather Vandygriff	
Randy Lisbona	
Andrew Royal	A highway without lights alongside roads with plenty of traffic lights.
Michele Korth	Go further north where there is land A high school is going to be built on prosper trail/ Mckinney Too many young inexperienced people driving on this road
Sandy Dickey	Construct an alternate route to the north of McKinney away from the current 380.
Karen Karch	Complete and improve the north/south roads. Build the Outer Loop for the projected growth to the north Would love to get trucks off of 380 and slow the speed Create more turn lanes at major north/south streets 380 could be like Northwest Highway is in Dallas on either side of 75 - it has traffic lights and is not a freeway but traffic moves along satisfactorily.
Jada	
Michele Korth	Make a big loop going north while there's land. The prosper trail/Mckinney spur proposed site is too dangerous as there is to be a high school there and it is too close to 380. There's is no incentive to go that close because there is already a lot of traffic now and not good during school sessions. Every here there are a lot of new teen drivers and they are not too experienced.
James morris	Stop construction
Dawn Solomon	minor expansion.
Marie Setliff	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Scott Setliff	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Amy Evans	A double highway like Austin

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Gabriela Ahrens	No
Richard Bonaparte	No.
Cathy Bebee	No. I do NOT support a freeway that ends at Stonebridge Dr or Ridge Dr. This would NOT solve the problem.
Michael Peters	Yes
Laura	I'd like a freeway but it would depend on alignment.
Julia	Unsure
Tom Kaphingst	Hell no
Heather Vandygriff	Freeway or bypass will be necessary.
Randy Lisbona	
Andrew Royal	Yes
Michele Korth	It will be needed. Yes
Sandy Dickey	No. Expanding the current 380 by adding lanes and eliminating businesses will only increase congestion and rip the city apart.
Karen Karch	NO!! 380 does not need to be a major highway. The Outer Loop needs to be developed with Hardin, Lake Forest, Ridge and Custer becoming wider connectors.
Jada	
Michele Korth	Yes unfortunately. But why are you allowing so much being built on 380? Why not diversify the area. It doesn't have to become so ugly.
James morris	No
Dawn Solomon	NO
Marie Setliff	No.
Scott Setliff	No.
Amy Evans	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Renee Smith	No
Nancy Robertson	Yes, my house is behind the sound break wall on 380 in Stonebridge Ranch in Wren Creek
David Smith	No
	No
Jean Sorochka	Yes
Matt Sowards	Not enough lanes, not built for the traffic it currently has.
Stacey Johnson	
Paulina Maldonado	
Kellie McGuffie	No.
Amy barley	High volume traffic
Kristy	no
John	No
Sara Macha	Congestion and inpatient drivers are major factors with 380.
Marianne Black	High speed traffic with dangerous intersections
Stephen Duke	
Já Wilborn-Scott	
Tony Shipman	The intersection at 380 & Airport. It only has one turn lane. This often backs 380 up into Princeton. Either a flyover or complete redesign of this intersection would fix it. No need to do a bypass
Joanna Curry	
Andy Spackman	So far, no significant concerns.
Ryan Hultquist	I'm concerned that it's becoming overly developed.
Arlene Cromwell	Yes, too much traffic
	Too crowded
Karen Barth	It’s not going to be able to handle the growth out here. It’s already congested during morning and evening commutes.
	Stop lights get backed up across intersections often and congestion near 75 is on the increase. There are locations where turn bays are needed as well.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Renee Smith	n/a
Nancy Robertson	Custer to 121
David Smith	n/a
	Wilmeth, bloomdale/123
Jean Sorochka	
Matt Sowards	Virginia, Eldorado
Stacey Johnson	Virginia parkway.
Paulina Maldonado	Hardin, lake forest, white.
Kellie McGuffie	121
Amy barley	1461/2478
Kristy	Eldarado
John	
Sara Macha	Eldorado then cut through at Lake Forest, or Hardin.
Marianne Black	Wilmath or White
Stephen Duke	
Já Wilborn-Scott	
Tony Shipman	Woodlawn/Throckmorton
Joanna Curry	
Andy Spackman	Would have no choice...Tucker Hill is directly off 380.
Ryan Hultquist	Virginia.
Arlene Cromwell	Virginia or ElDorado
Karen Barth	There aren't any alternative routes!
	Wilmeth or just take Hardin to 121 depending on the direction I have to go

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Renee Smith	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Nancy Robertson	
David Smith	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jean Sorochka	Not sure
Matt Sowards	Widen it and add more lanes.
Stacey Johnson	Raising the road and making it more like 75 with exits.
Paulina Maldonado	More monitoring. Even camaras so people respect more.
Kellie McGuffie	Nothing.
Amy barley	
Kristy	
John	Minor expantions.
Sara Macha	Plan an outer loop further north than 380 where residential impact would be less.
Marianne Black	Build overpasses for thru traffic.
Stephen Duke	
Já Wilborn-Scott	
Tony Shipman	Fix the intersection at 380 and airport. Adding another turn lane alone would fix half the congestion.
Joanna Curry	
Andy Spackman	Make best use of current 380 and explore bypass in currently less populated areas.
Ryan Hultquist	Back off on the runway development.
Arlene Cromwell	Build a bypass but come out further west of Custer
Karen Barth	Widen 380 and work on a bypass.
	There needs to be some sort of freeway going from Denton to about Princeton, maybe farther east than that

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Renee Smith	No
Nancy Robertson	NO
David Smith	No.
	Yes
Jean Sorochka	No
Matt Sowards	Yes, but keeping the current course is far preferable.
Stacey Johnson	No.
Paulina Maldonado	No if is going to be one of those toll ways that they build with our taxes and then sell it to private companies so we can be charge every time we use it.
Kellie McGuffie	No.
Amy barley	NOT a toll road
Kristy	no
John	No
Sara Macha	No, alignment is of concern.
Marianne Black	Yes
Stephen Duke	NO.
Já Wilborn-Scott	
Tony Shipman	If 380 was turned into a free way, Yes. I do not support a bypass.
Joanna Curry	
Andy Spackman	No
Ryan Hultquist	No
Arlene Cromwell	No
Karen Barth	This question is too broad for me to answer.
	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Stephen Balog	The road is crowded during peak times. The lights at 75 & 380 are not synced well with the lights a few blocks in either direction.
Junaid Khan	
	It's not the road, it's the drivers going too fast, being distracted and in too much of a hurry to drive safely.
Julie Paxton	High traffic, accidents nearby that congest my street with WAY too high and too fast a traffic volume for a residential street.
Mark Westbrook	Too busy. Too noisy.
Mary L Patrick	No
David Babin	
Alan Proctor	
Amber Simmons	No.
Jake Wesolowski	
Darin Morse	Yes
Ian Townsend	Traffic seems to be increasing during rush hours.
Linda Van Asveld	I do. The traffic is already horrible! With more businesses and more residents, it will become worse than Central Expressway! It's already difficult to drive West as it is.
Janine Stevens	Wretchedly times traffic lights that cause stop and go traffic and add to the pollution. Not enough lanes for the quantity of traffic.
Sandra Rios	Too many people speeding and running red lights. Also too many right turns must be made from the far right lane instead of having a sort of exit ramp type of turn out of the main lanes of traffic.
Brian K Abbey	If I'm on 380, my primary drive is between FM423 and US 75. Currently, the only congestion is between Preston and Dallas North Tollway so no current concerns.
Todd Keil	Yes, overcrowded, way too many access points and intersections, which create traffic problems, hazards and recurring accidents.
Pilar Ortiz	It is to small for the amount of traffic it has. It is too congested specially morning hours and afternoon.
John DeSantis	
Betty J Harper	Too many big trucks., 18 wheelers. Need a truck route that goes around McKinney not thru it. It is not safe foe all the drivers especially teenager's.
Jay Franklin	too much traffic, too many stoplights, too many big trucks,
Chad whited	Traffic, money wasted on asphault upgrades instead of concrete..
Heather Breitenstein	Yes it's not big enough. Traffics even late at night.
Andrea	That it will become a tollway. That construction will never end.
Randy felder	No
	The exit out of ridge rest onto 380 seems super dangerous due to the speed limit. The speed limit seems really high especially with new businesses going in.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Stephen Balog	White St., Wilmeth, or Louisiana/Virginia
Junaid Khan	
	Bridgefarmer Rd to FM 546
Julie Paxton	There is no alternative for me that doesn't take me miles out of my way.
Mark Westbrook	Virginia
Mary L Patrick	ElDorado to 75
David Babin	
Alan Proctor	
Amber Simmons	I just drive it
Jake Wesolowski	
Darin Morse	Virginia
Ian Townsend	Lake Forest to 121.
Linda Van Asveld	There is no other road I can access to where I need to go
Janine Stevens	Backroads or down to 121
Sandra Rios	I skip it using 121 on my way home and I use other city streets for in town travel. Many others do this as well and we have found that speeding in our neighborhood (right off of 380) is exacerbated because of this.
Brian K Abbey	Rockhill to Dallas North Tollway starting wherever the congestion begins when going West
Todd Keil	121
Pilar Ortiz	Make it wider more lanes
John DeSantis	
Betty J Harper	75 to 121 or side streets like Virginia Parkway.
Jay Franklin	
Chad whited	There arent any viable options
Heather Breitenstein	There really aren’t many other options. Fishtrap rd
Andrea	1461 to Mckinney, Fush trap twards Denton.
Randy felder	Wilmeth and virginia
	Basically the only one we take if we are heading North on 75. Otherwise we take ridge to Stacy to get on the highway.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Stephen Balog	Better traffic light synchronization, encourage more mass transit
Junaid Khan	
	Don't make a high speed bypass. You are just asking for more accidents.
Julie Paxton	Speed bumps on Wysong would be nice. There are children living on this street and it is used as a "shortcut" to Walmart and Sam''s Club. People often race down the street at 50 mph. WAY too much traffic on a 2 block residential street!
Mark Westbrook	Loop it further out on vacant land away from neighborhoods.
Mary L Patrick	
David Babin	
Alan Proctor	
Amber Simmons	No more businesses. It would be a lot less congested if people weren't trying to hurry and turn so they can get fast food, or get their nails done.
Jake Wesolowski	
Darin Morse	
Ian Townsend	Expand it where you can. The raised intersections seem to be good.
Linda Van Asveld	Stop building businesses!!!!
Janine Stevens	Underground through lanes like 635
Sandra Rios	Convert it to a standard freeway with flyovers like 75 or 121 but keep it along the current 380 path.
Brian K Abbey	Possibly an overpass at Custer and 380 similar to overpass at Preston and 380.
Todd Keil	Rebuild existing 380 route, with some variations as necessary, into a Freeway structure with limited access points.Ye
Pilar Ortiz	
John DeSantis	
Betty J Harper	Like I said, a truck route around the city like Denton has.
Jay Franklin	Make 380 another toll road all the way from Princeton to Denton
Chad whited	A 2nd level freeway built over the existing highway converted into "service roads" with on and off ramps like any freeway up and down from the second level. At least in the stretch where a freeway with service roads is to large to fit.. primarily between hardin and highway 5 ish.. maybe a little further out..
Heather Breitenstein	We need an actual freeway that goes west to east.
Andrea	
Randy felder	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Stephen Balog	No.
Junaid Khan	
	No
Julie Paxton	NO
Mark Westbrook	No
Mary L Patrick	No
David Babin	
Alan Proctor	
Amber Simmons	No
Jake Wesolowski	
Darin Morse	Yes
Ian Townsend	Not really at this point, but may be inevitable based on projected growth.
Linda Van Asveld	Growth is good but too much of something isn't good. McKinney will become so crowded that even a freeway, aligned or not will not make a difference. What good will it be when McKinney is overbuilt like Plano?
Janine Stevens	Yes
Sandra Rios	Yes
Brian K Abbey	Yes agree with alignment options 3-5
Todd Keil	Yes, 100% !!
Pilar Ortiz	Yes
John DeSantis	
Betty J Harper	Only if it gets rid of thru traffic.
Jay Franklin	No
Chad whited	I support doing what needs to be done for our infrastructure whether people whine about it or not. It has to go somewhere and anywhere people will cry about it. I appreciate we are even being asked our opinion but it isnt necessary.. the experts need to come up with a couple proper solutions to the growing infrastructure and those who have the authority decide on it and it be done.. not appease whiners. Thats why we put people in charge of it to get things done.
Heather Breitenstein	Yes. There really is no other option.
Andrea	As long as it remains a freeway and not a toll way.
Randy felder	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
C DEE	MINIMAL
Navy Villar	My concern is with the speed at which vehicles travel down this highway. It is congested at times, but what highway isn't. 380 is just as big as the DNT and other freeways in the area.
	Too congested
Deborah Smalley	conjested
Nicholas Uzoni	Safety and congestion
E. Deegan-Smith	My major concern is the amount of 18 wheel trucks and the fact that they travel in all three lanes. When we come to a stop light, it typically takes 2 or 3 cycles before I can get through because the truckers can't get off the line or up to speed to catch the next light. So if you get stuck at one light, you will get stuck at all the lights through McKinney (if the trucks are driving in all three lanes).
Jim T. Power	
Angela Johnson	
Pat Grubbs	Yes. It is very congested and has many large trucks coming through town. Many people do not observe the traffic laws.
J. McClain	Congested
Dennis Burkett	Safety suggestion - add deceleration/acceleration lanes for existing subdivisions and all future high traffic shopping centers.
GEORGE M MARKUS	
SHAHAB azmoudeh	No
Karen Bunker	Too many semi-trucks for a road that has street lights.
Robert Edgar	The current configuration is not designed for the planned density. As with all other nearby Texas communities, McKinney City and Collin County put no restrictions on development and plan 100% build out at whatever maximum density developers can squeeze in and still sell.
	Number if traffic lights; volume of traffic No median for the volume of traffic; frequent accidents along the 380 corridor from Mckinney to Denton
Edward Hodnicki	380 is a dangerous highway which I avoid as much as possible. Construction, highway posted speed and number of stop lights and intersections makes it undesirable. Addition to that is the congestion at 380 and 75.
Yessica Schessler	No
Jan Baland	
Sophie Clarke	Heavy traffic

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
C DEE	None. I just deal with it.
Navy Villar	I rarely take alternate route because 380 is congested. If I do take an alternate route I typically take Custer or the DNT (travel to Plano area).
Deborah Smalley	lake forest
Nicholas Uzoni	Virginia Parkway SRT 121
E. Deegan-Smith	I typically just take Virginia as the construction traffic is more tolerable as it's for just a short section and if the cycle of lights is better to get through.
Jim T. Power	there is no good alternative route
Angela Johnson	
Pat Grubbs	I drive through the alternate city streets.
J. McClain	
Dennis Burkett	SH 121, Rockhill Rd, Main St
GEORGE M MARKUS	
SHAHAB azmoudeh	635
Karen Bunker	Maybe White, but not on a regular basis. Just depends on the back up.
Robert Edgar	I suggest accelerating building the proposed "Outer Loop" from Denton through North McKinney and leaving everything else basically as per earlier long term development plans. Under no circumstances would I support the build of a bypass starting at Ridge Road or McKinney Ranch road. If a bypass must be built not originating in Prosper, it should start at Custer.
	Frontier parkway Rock hill road Preston road Dallas north tollway FM423
Edward Hodnicki	I take White and do a u turn at 380 when needing to go to Hoe Depot, Office Depot or other stores. If not, select another location,
Yessica Schessler	Stop building
Jan Baland	
Sophie Clarke	Virginia parkway

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
C DEE	
Navy Villar	Make improvements to 380 and build routes north of 380 to reach other areas. DNT and Custer can be made larger to accomodate this. Also, if a bypass is needed it seems natural that the bypass run further west of Tucker Hill/Stonebridge closer to Custer road.
	Clover leaf at tollway
Deborah Smalley	
Nicholas Uzoni	Convenient but not close proximity to current/future residential developments
E. Deegan-Smith	I would prefer people stop moving here and development to slow, but alas, God has different plans. I honestly wish I had studied the traffic before we moved here 2 years ago.
Jim T. Power	Cut down on the traffic lights
Angela Johnson	
Pat Grubbs	An elevated highway over the intersections as they made 121.
J. McClain	Tollway
Dennis Burkett	Coordinated intersection signalization to MOVE traffic along existing 380 between McKinney & Denton, especially during peak driving times...Greater effort to move traffic thru major intersections using traffic cameras & adding 2-lane turn lanes (both left & right) with appropriate "stack" lanes also added where necessary...Accelerate construction of "Outer Loop," first using frontage roads (then adding Limited access roadway in center - similar to FM 99 around outer Houston)...Ask North Central Texas Council of Governments to involve Prosper, Celina, Melissa, etc., to pursue east/west corridor development (such as Virginia/Eldorado) to connect between DNT & US 75... Accelerate Extension of DNT to Outer Loop... Forget pursuit of multi-color alternate up/down routes for 380. (I submit that residents prefer direct routes, not all those variations.)
GEORGE M MARKUS	
SHAHAB azmoudeh	
Karen Bunker	Better timing of lights, deceleration lanes in other places besides the major intersections. I have seen earlier studies that address modifications to the existing road to alleviate congestion. Not sure why they were never implemented.
Robert Edgar	I suggest limiting all development density to live within the constraints of the current US380 design. Further, for safety, I suggest limiting egress and ingress to US380 at only traffic light controlled intersections.
	Elevated freeway for as much as possible with service roads in both directions
Edward Hodnicki	Need more over passes along 380. You can't have cars and trucks traveling at 60 miles an hour stopping every 1/4 mile.. Insane drive. You can lower speeds, time lights to better support travel or build overpasses where possible to eliminate the constant stop and go. At the intersection of 380 and 75 heading east bound, eliminate the traffic light for Racetrac and back entrance into the shopping strip.
Yessica Schessler	Build on top
Jan Baland	
Sophie Clarke	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
C DEE	More info is necessary
Navy Villar	I do not support any of the alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of Stonebridge and not on or bordering Tucker Hill.
	Yes
Deborah Smalley	no
Nicholas Uzoni	I support on placement conditions
E. Deegan-Smith	Yes
Jim T. Power	yes
Angela Johnson	
Pat Grubbs	Yes
J. McClain	Yes
Dennis Burkett	380 is already a divided 6-lane roadway for good portion. Acquiring ROW, re-routing traffic during construction, creating loss of revenue for existing businesses during construction period, etc. seems like a very in-efficient use of tax-payer money...Suggest major money be spent on Outer Loop with plan to accommodate greater amount of traffic, and subdivision & shopping center development.
GEORGE M MARKUS	
SHAHAB azmoudeh	
Karen Bunker	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Robert Edgar	No. It will contribute to dividing the community. Send the traffic way, way north.
	No
Edward Hodnicki	Yes. Commuters need it..
Yessica Schessler	No! Absolutely not!
Jan Baland	
Sophie Clarke	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jennifer Hemingway	yes that it will dump too many vehicles into the Stonebridge Ranch HOA streets making them too crowded and thoroughfares for people commuting rather than for access points for people living in the HOA.
ERICA DERRICOTT	Standstill Traffic During rush hour and Saturdays, accidents, all the lights with almost highway speeds.
Susan Richards	Traffic jams
Deborah Livingston	
Darla I Hopson	Speeding
Brady Beavers	
Debbie Schussler	The traffic is quite heavy most of the time and rather brutal during rush hour
Kim Slater	
Diane de St Germain	
Andora Rruka-Stanton	None.
Nancy Villar	I am concerned with the rate of speed of which people travel on 380. I don't think it is that congested.
Julia Ernst	Too many businesses were allowed to build right up to 380 not leaving any room for service roads. It is nicknamed death 80 for a reason. Most dangerous road ever, especially for young drivers trying to commute to UNT.
Roger F Stanton	No.
James Wood	Lots of traffic during commute times.
Blanca	Is fine little bit of more congestion due to stop lights
Jill Kopinski	Turn in to Tucker Hill
	Too many cement trucks, 18 wheelers, and gravel haulers
Amy Spurgin	
Nick Esposito	Too many lights
Brian Hanchey	Yes, it is usually faster to go south to George Bush when going north through Denton.
David W. Higgins	Congestion, safety, lengthening travel times
Ashlyn N Dytko	some concerns with 380 is that it has too small of lanes and makes the traffic go slower
Ann Fleet	Too much traffic and not enough traffic lanes
Ashlyn N Dytko	too much construction is happening and the lanes further towards denton are too small
Theresa Mendenhall	Better since lights were added. This slows people down.
Charles Skinner Goodrich	Yes, we frequently drive to Denton and close to rush hour 380 is very conjested.
David Key	No
Sam	
Jerry Helms	Yes, it’s too congested.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jennifer Hemingway	custer to 121, virginia parkway
ERICA DERRICOTT	Eldorado, 121, side streets
Susan Richards	? Virginia? Eldroado?
Deborah Livingston	
Darla I Hopson	Eldorado the
Brady Beavers	
Debbie Schussler	
Kim Slater	Virginia Parkway
Diane de St Germain	
Andora Rruka-Stanton	No alternative. 380 is how I access my neighborhood
Nancy Villar	I rarely take alternate route because 380 is not overly congested.
Julia Ernst	I take Eldorado and pay the toll to get to I35 and take that North to Denton.
Roger F Stanton	I have no alternative than to take 380
James Wood	None - haven't found a good alternative.
Blanca	Hwy 75
Jill Kopinski	
Amy Spurgin	
Nick Esposito	Sam Rayburn toll road
Brian Hanchey	GB, SRT, 82
David W. Higgins	None. On rare occasion have taken 35E to Lewisville then to 121 to McKinney
Ashlyn N Dytko	back roads
Ann Fleet	Virginia
Ashlyn N Dytko	back roads
Theresa Mendenhall	Virginia parkway
Charles Skinner Goodrich	There really isn't one.
David Key	I don't use it in rush hour.
Sam	
Jerry Helms	I don’t have many except east west streets in McKinney like Virginia or White Street.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jennifer Hemingway	widen it but be strategic and where the traffic comes on and off.
ERICA DERRICOTT	Through traffic lanes in the center, no lights with side roads for those going to retail around the area. Similar to 121.
Susan Richards	
Deborah Livingston	
Darla I Hopson	Widen it, build overpasses at lighted intersections for through traffic. Gladly pay toll instead of bypass
Brady Beavers	
Debbie Schussler	Widen the existing lanes
Kim Slater	
Diane de St Germain	
Andora Rruka-Stanton	Leave the corridor between Custer and 380 alone.
Nancy Villar	Make improvements to 380 and build routes north of 380 to reach other areas. DNT and Custer can be made larger to accomodate this. Also, if a bypass is needed it seems natural that the bypass run further west of Tucker Hill/Stonebridge closer to Custer road.
Julia Ernst	It needs to move. This plan should have been completed years ago and businesses should not have been allowed to be built next to a road that is suppose to be a highway!!!
Roger F Stanton	Leave the corridor between Custer and 75 alone.
James Wood	
Blanca	Make as freeway as 121!!!
Jill Kopinski	Please do the bypass as far west as possible.
Amy Spurgin	
Nick Esposito	HOV Lane
Brian Hanchey	a freeway
David W. Higgins	I'm not qualified to answer that question other than to say add capacity or decrease/control volume
Ashlyn N Dytko	
Ann Fleet	Add more lanes to 380 or create a 121 type freeway
Ashlyn N Dytko	
Theresa Mendenhall	carpool lanes, longer turn lanes, widen with sound barriers.
Charles Skinner Goodrich	It needs to be updated to interstate status. The existing corridor would work for most of the route. For the rest of the route any route would be OK. Probably the one impacting the least people (cheapest route)
David Key	
Sam	
Jerry Helms	Build a bypass around the north of the city.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jennifer Hemingway	yes
ERICA DERRICOTT	Yes
Susan Richards	Yes
Deborah Livingston	
Darla I Hopson	No
Brady Beavers	
Debbie Schussler	No
Kim Slater	Yes.
Diane de St Germain	No
Andora Rruka-Stanton	No.
Nancy Villar	I do not support any of the alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of Stonebridge and not on or bordering Tucker Hill.
Julia Ernst	No!!!! My son is a Boy Scout I do not want this to go through Erwin park!!!!
Roger F Stanton	No.
James Wood	No - it depends on the alignment.
Blanca	I support making 380 as a freeway
Jill Kopinski	No
	No
Amy Spurgin	
Nick Esposito	
Brian Hanchey	Mostly. I'd like to see parts like Erwin maintained.
David W. Higgins	Alignment with what?
Ashlyn N Dytko	
Ann Fleet	Yes and no
Ashlyn N Dytko	
Theresa Mendenhall	Not sure on this. Seems like the most congestion is between Custer and 75. Past the tollway is less congested.
Charles Skinner Goodrich	Yes
David Key	No
Sam	No
Jerry Helms	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Tao Xu	Traffic is worse sometime
Brad Chaney	Heavy traffic throughout the day makes it hard to get around.
Josephine Merkle	So many wrecks and traffic. It's hard to navigate anything at the 380/75 intersection - especially on the West side of 75.
Steve Haney	Speed is too high for traffic lights.
	too dangerous, too much traffic, not enough stop lights, and not enough alternate routes to get off/around 380
Nathan James Olsson	it is turning into a city street when it is in fact a major hwy corridor
Jake	Construction
Josh Mills	Excessive redlights increasing potential for accidents.
Joe Rosario	I think there are too many traffic lights on it. Which may be indicative that a highway is needed to replace it,
April Jones	
Holly McIver Stone	Princeton to McKinney is flush with cars during morning and afternoon commute. Farmersville to Princeton is still pretty fluid each day.
Juan troncoso	No
Elizabeth Chase	
Glenn Rudolph	Traffic Volume
Ross Gillispie	Yes, too many lights, and too many stops and entry/exit from the road way in heavy traffic. Often times this is on the wrong side of a hill.
	Congestion going to McKinney
Kelly Parra	Accidents at 380 and Tremont are more frequent
Jeremy Ross	Too much traffic, and too many lights
Jenny Machalicek	traffic volume and flow
Rick seitz	Too many lights near 75 and not timed to ease flow of traffic
Macy Hogue	save erwin park.
Jesse Gray	yes to small for the traffic, too many lights and stops for thru traffic.
Jeffrey Miller	US 380 can get busy, but nothing like the parking lot that 75 is through Plano
Geoffrey Rogers	
Robert Dean	yes
Cjb	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Tao Xu	No alternative
Brad Chaney	I usually take White Avenue vs taking 380 coming into work at Raytheon. Leaving work for lunch is painful on 380.
Josephine Merkle	Virginia parkway and White
Steve Haney	Virginia
	fishtrap, and preston
Nathan James Olsson	DNT to 121
Jake	Dallas North Tollway
Josh Mills	Side streets
Joe Rosario	I'll use 35/NDTW/SRTW/75 to make my way to my destination.
April Jones	
Holly McIver Stone	I travel north of Princeton heading north from Princeton High School taking alternative country roads like FM 75 North to CR 408 and 1827. I do the same in the evenings, especially if there is a wreck.
Juan troncoso	Virginia
Elizabeth Chase	Back roads.
Glenn Rudolph	121 or up to 82.
Ross Gillispie	
	I don't i have to deal with it
Kelly Parra	White Ave
Jeremy Ross	Virginia
Jenny Machalicek	County Roads to the north
Rick seitz	Virginia
Macy Hogue	stonebridge, virginia
Jesse Gray	Virginia, white street
Jeffrey Miller	Virginia
Geoffrey Rogers	
Robert Dean	wilmeth road
Cjb	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Tao Xu	
Brad Chaney	Widen existing 380, some form of flyover lanes across intersections to keep traffic moving.
Josephine Merkle	
Steve Haney	clover leaf at 75 and 380
	stop lights at teel and 680 and windong and 380
Nathan James Olsson	Limited access freeway
Jake	Hurry up with the construction
Josh Mills	Expand the existing to a freeway or toll road similar to 121 evolution.
Joe Rosario	Create a highway with overpasses for existing cross-traffic lanes.
April Jones	
Holly McIver Stone	I believe there is still enough space for the widening of some or all of 380 from Princeton to Farmersville.
Juan troncoso	
Elizabeth Chase	Don’t go through homesteads or nature parks.
Glenn Rudolph	Overpass
Ross Gillispie	Should be utilized as a highway similar to 75. No need to reroute, just put in on/off ramps at major intersections.
	Should have been made 3 lanes each side when they widened it the first time all the way into hunt county. Doesn't take a rocket scientist to know that this was going to happen growth is inevitable.
Kelly Parra	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jeremy Ross	Need to create a loop that connects to the North Toll way that bypasses the busy sections of Mckinney and Prosper
Jenny Machalicek	Full fledged freeway
Rick seitz	More overpass like the new one going in at preston
Macy Hogue	
Jesse Gray	make a loop around the business areas
Jeffrey Miller	Widen 380 if easements allow
Geoffrey Rogers	
Robert Dean	build loop around McKinney without removibg homeowners
Cjb	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Tao Xu	Yes
Brad Chaney	Unsure, need to see the details and impact to adjacent businesses.
Josephine Merkle	Not regardless of alignment
Steve Haney	Yes
	not sure
Nathan James Olsson	yes
Jake	No
Josh Mills	No. Existing roadbed/available space can be utilized more efficiently.
Joe Rosario	Yes.
April Jones	
Holly McIver Stone	No
Juan troncoso	Yes
Elizabeth Chase	No
Glenn Rudolph	yes
Ross Gillispie	Yes, but not regardless of alignment. It should closely resemble the current 380 alignment.
	Nope
Kelly Parra	No
Jeremy Ross	Yes
Jenny Machalicek	Yes
Rick seitz	Yes
Macy Hogue	
Jesse Gray	yes
Jeffrey Miller	121 is adequate for travel east to west for a major freeway. I am concerned about the impact to local home owners and Erwin park
Geoffrey Rogers	
Robert Dean	no
Cjb

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jeremy Tennyson	No
	Only at 380/75 and 380/DNT
Evan Jewell	Speed limit is too low proportional to the size of the highway. The speed limit on US 380 could easily be raised to 65 or 70. Parts of US 75 have a speed limit of 70 and are far smaller with smaller lanes.
Diane Totty	Yes, excess traffic and dangerous conditions.
Krista Young	I'm happy the center median is there. Too high of speed to not have a median.
Nancy Intrator	
Linda LeClaire	It's a fast speed for so many stop lights. We need the speed, so better to have fewer stops.
Valerie Schmid	No
Talita Martins	
Jackie	Size
Jeff Brown	there are too many traffic lights west of DNT. Traffic around 380 and us75 is always heavy, and usually bad. The 3 lanes between Hardin and Custer seem to flow pretty well most days though.
Ron	yes
Dorothy Kindred	Yes, there is way too much traffic for this old road to handle and out of frustration, people drive to dangerously.
Jackson Porter	The construction seems unorganized on it and causes heavy traffic in peak hours
Drew Caudell	No, except at US 75
Stephen	Yes. Needs a bypass to get past the lights. The lights are what create and slow traffic.
John Brumbaugh	Lack of median west of dnt
Mark Harris	Traffic flow near larger intersections is not only subject to significant congestion, but can also be perilous especially during peak volume drive times. As the city (s) develop around 380 it should be treated as an intercity roadway rather than a freeway.
Jacob Bauer	Yes,
Chris lair	No concerns. On traffic concerns are on west side of Princeton. Has a bottleneck there
Lynn Bonaparte	No.
Cannon	
Dave Clarke	Yes, heavily congested especially during peak hour traffic, lack of turning lanes into major intersecting streets and high accident rates
Leigh Clinton	
Ty Galli	congested
Rebecca Brogan	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jeremy Tennyson	35 North
	Other nearby east west roads
Evan Jewell	Other various smaller east-west roads south of the highway.
Diane Totty	Taylor Burke or Wilmeth depending on where I am going. I often go to a different destination that doesn't require driving on 380.
Krista Young	Jig through neighborhoods
Nancy Intrator	
Linda LeClaire	Virginia or Eldorado
Valerie Schmid	Eldorafo
Talita Martins	
Jackie	None, there really isn't a good one to take
Jeff Brown	Virginia or Eldorado
Ron	US 121
Dorothy Kindred	I don't have another route that I can take to get to where I need to go.
Jackson Porter	If 380 is congested I take FM 287 to US 82
Drew Caudell	121
Stephen	El Dorado, or Northern FM roads
John Brumbaugh	Fish trap lake forest to frontier
Mark Harris	Smaller city streets to the south since little east / west routes are available to the north.
Jacob Bauer	City streets, Virginia
Chris lair	I go around 121 through Melissa.
Lynn Bonaparte	I sit through just like I used to do in Los Angeles. They widened the 10 to 12 lanes. All it did was provide an additional lane beyond the 5 they already had for cars to sit. Sitting in traffic is a way of modern life.
Cannon	Coit, Custer, 289,
Dave Clarke	Virginia Parkway, Wilmeth Road
Leigh Clinton	Coit, Custer, Hardin.
Ty Galli	Wilmeth
Rebecca Brogan	Virginia Parkway, or US 75

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jeremy Tennyson	Na
	Use the humps to eliminate red lights or go north. Terrible idea to destroy development on existing 380 in McKinney.
Evan Jewell	I am for the PINK and GREEN alignments on the proposed map ONLY.
Diane Totty	Better timed lights for existing roadway. This would cut down on frustration and hopefully cut down on the red light runner.
Krista Young	
Nancy Intrator	
Linda LeClaire	Sorry, haven't given it much thought but would prefer the least amount of upheaval for local residents and businesses.
Valerie Schmid	Continue to widen it from Prosper
Talita Martins	
Jackie	Do not take farm and ag property for roadways
Jeff Brown	I like the "red route" suggestion. It seems to be starting the beginning of a McKinney loop.
Ron	none
Dorothy Kindred	I would love to see it made into a with four lanes in either direction due to the fast growth in McKinney and other areas along the 380 corridor.
Jackson Porter	Organize the construction along the highway and invest in finishing quickly rather than creating unnecessary bypasses
Drew Caudell	
Stephen	Creating a bypass from the loop in Denton East to 75, that would allow commuters to miss the stop lights.
John Brumbaugh	Widening it and over passes at major intersections
Mark Harris	I oppose enlarging the current route in any manner due to the impact that would have on existing development around the current route. Realizing there is a need for improved traffic flow, I am more in favor of another route to the north where future development can be planned around the new route.
Jacob Bauer	Fix 380 ON 380 or do the outer loop. The outer loop if possible... keep the trend going of the Loops, (loop 12, 635, even George Bush is a "loop") Less impact on existing infrastructure. BUT please fix existing where needed
Chris lair	From Princeton into Mckinney widening could help the congestion. Also some form of alternative to traffic lights, over passes?
Lynn Bonaparte	None. It's a little to late. As people move out beyond east McKinney they should be more cognizant of allowing businesses so close to the road. Purchase easements so it doesn't become a future problem
Cannon	More over passes like the new one at Preston & 380.
Dave Clarke	Widen existing 380 corridor to accommodate a freeway section with frontage roads
Leigh Clinton	
Ty Galli	
Rebecca Brogan	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jeremy Tennyson	Yes
	No
Evan Jewell	NO. I only support the PINK and GREEN alignments. Any others would be detrimental to the surrounding communities.
Diane Totty	The, it entirely depends on the alignment. Using the existing alignment or even the ones that shift the road 400 ft north or south would greatly affect many sales tax generating businesses as well as a large number of existing homes.
Krista Young	No
Nancy Intrator	
Linda LeClaire	I only support a road that is truly “free.” We have far too many toll roads in the area. It costs me neatly every time I get in my car. Not right!
Valerie Schmid	Only if it’s not a toll road.
Talita Martins	
Jackie	NO
Jeff Brown	not necessarily. however that may end being necessary for Denton-McKinney traffic volumes.
Ron	no
Dorothy Kindred	I'm not sure about that - something needs to be done, but I don't like the use of imminent domain unless people are paid a beyond fair amount of money for their property. Moving from our homes can be very emotional and difficult for some people.
Jackson Porter	As long as it will actually help without sacrificing any parks or wildlife reserves
Drew Caudell	No
Stephen	No, green spaces and other public areas will need to be taken into consideration.
John Brumbaugh	Depends on alignment
Mark Harris	No. A freeway through McKinney where the is already substantial existing development is not the right answer. Other cities would also be affected, but McKinney would be the most negatively affected by a freeway aligned along the current rate. It would not only hurt current property owners it would hurt future growth along the current route by creating a dividing line in the what will be the heart of the city as expansion continues north.
Jacob Bauer	Yes traffic needs to be taken care off... give and take on both sides.
Chris lair	No
Lynn Bonaparte	Trick question: A freeway is necessary but NOT at the expense of Stonebridge Ranch. We will pay in lost property value, our beautiful medians and trees will be cut down. We homeowners pay for the beauty in OUR neighborhood. Some commuter speeding down our streets has no vested interest in the community therefore, their needs should not be met at OUR expense!!
Cannon	No. Putting a freeway in where people have their homes and personal property is not ok.
Dave Clarke	Yes, but want on current alignment
Leigh Clinton	No
Ty Galli	No
Rebecca Brogan	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Hali Guzman	
Matt Baker	NO. The times I drive on it the traffic is acceptable.
	Too many cars, not enough concrete
Chad Taylor	yes Congestion
Ty Galli	congestion
Brad Dart	1. Unsynchronized traffic lights 2. Parking in the medium over/around Lake Lavon. Very dangerous to have vehicles slow to almost a stop in the passing lane just to pull into the medium. 3. Heavy truck traffic (CMV's should be restricted during rush hours)
David	
Kayla	the stoplights
Trisha Dowell	I think it's fine right now.
Brad Dart	1. Unsynchronized traffic lights 2. Parking in the medium over/around Lake Lavon. Very dangerous to have vehicles slow to almost a stop in the passing lane just to pull into the medium. 3. Heavy truck traffic (should be restricted during rush hours)
Douglas Darby	Congestion
Diane Reynolds	Yes, traffic is too fast and needs to be slowed by setting the traffic lights and lowering the speed limit. Limiting the truck and hazardous materials traffic should also be done to protect residents along the route. Our neighborhood has only one entrance/exit and it is onto 380. If traffic is stopped or stalled at that entrance/exit, we have no way out. That has already happened with some traffic accidents. If hazardous materials were involved, our neighborhood could not have been evacuated.
Mary Smith	Speed
Shannon Ratliff	High school expects our kids to drive on a busy, fast road. Would like alternate route to McKinney North high school.
David Goldberg	
Alice Bootman	
Ann Boudreaux	Increasing traffic and accidents
Christie Stanfield	No
Jennifer Jesseph	Excessive accidents
Rachael Jones	Too much construction
Mia Chamblee	
Patsy Owen	Too much traffic
Joseph Davis	
Claude Owen	Too much traffic adds to travel time.
SETH ORSBORN	Parts of it are reaching max capacity flow and will likely be over-capacity as more build-up is occurring between McKinney and Denton.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Hali Guzman	
Matt Baker	Virginia Blvd.
	Sam Rayburn toll road
Chad Taylor	121
Ty Galli	Wilmeth
Brad Dart	PGBT to 78 or 121 to 78
David	Virginia
Kayla	It’s never too bad
Trisha Dowell	It's not usually terribly congested unless there has been an accident. Rush hour congestion is not great, but I think that has more to do with red-light timing creating the problem.
Brad Dart	PGBT to US78 or 121 to 78
Douglas Darby	121
Diane Reynolds	Custer, Ridge and now Coit since it opened up
Mary Smith	Eldorado
Shannon Ratliff	White ave, lake Forrest to wilmeth
David Goldberg	121
Alice Bootman	Virginia
Ann Boudreaux	CR 164 to CR 943 to Wilmeth to Highway 75
Christie Stanfield	Virginia, White
Jennifer Jesseph	Virginia
Rachael Jones	121
Mia Chamblee	Virginia
Patsy Owen	
Joseph Davis	
Claude Owen	None.
SETH ORSBORN	For south, SRT. For north, country roads like CR125 or 1461

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Hali Guzman	
Matt Baker	Go forward with the most northernly route you can. If you build a bigger road, the traffic noise will get even worse than it is and will ruin our property values and lifestyles. Go north where the housing is not yet dense
	If you can't make it wider, make a top road with limited exits and no trucks
Chad Taylor	More lanes
Ty Galli	
Brad Dart	Construct a new freeway north of New Hope, Princeton and Farmersville
David	It's called growth zone the land accordingly
Kayla	Make a highway system of 380 so traffic flows better
Trisha Dowell	I would suggest enlarging the current road to be 6 lanes instead of 4. I realize that is not a perfect solution, but it is a solution that has the least amount of impact on the cities, business and residential property owners.
Brad Dart	New alignment north of New Hope,Princeton and Farmersville
Douglas Darby	The Pink or Green proposed bypasd
Diane Reynolds	Utilize Custer going north to the outer loop that is already being planned and built.
Mary Smith	Widen and offer local lanes
Shannon Ratliff	Please run a bridge over hwy 75 at 380
David Goldberg	Widen 121
Alice Bootman	
Ann Boudreaux	
Christie Stanfield	By pass for those heading towards major freeways like 75. So much traffic those heading toward 75 or Tollway.
Jennifer Jesseph	Make existing route a freeway
Rachael Jones	
Mia Chamblee	
Patsy Owen	Northern or southern freeway that connects hwy 75 to hwy 78.
Joseph Davis	
Claude Owen	I would think a northern route that connects US 75 and US 78 that is a separate road from HWY 380 would allow the cross traffic between McKinney and points east.
SETH ORSBORN	Reduce growth rate. Time interchanges better to eliminate unnecessary slow-downs which disrupt traffic flow. Have dynamic, time-of-day dependent, light sequencing.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Hali Guzman	Don't cut through Erwin park and be hypocritical of the slogan "Unique by nature". You're going to ruin a beautiful park.
Matt Baker	Absolutely not. I oppose and will protest the enlarging of the existing roadway into a freeway.
	Yes
Chad Taylor	no. I support but not regardless of alignment
Ty Galli	No
Brad Dart	No
David	No
Kayla	no
Trisha Dowell	No. I do not think it is necessary to build a giant limited access freeway along the 380 corridor. It will decimate the towns, businesses and property owners that it will go through.
Brad Dart	Yes
Douglas Darby	No
Diane Reynolds	No, absolutely NOT!
Mary Smith	No
Shannon Ratliff	Not sure, I don’t want highway noise affecting our home life
David Goldberg	No
Alice Bootman	Yes
Ann Boudreaux	Yes
Christie Stanfield	Not happy more construction is being proposed considering 380 was just expanded. Should have done this before expanding 380. That would save tax payer money and frustration to commuters. Now it's proposed to potentially deconstruct and rebuild what was just completed.
Jennifer Jesseph	yes
Rachael Jones	
Mia Chamblee	No
Patsy Owen	No. I am 70 and my husband is 72. The blue line would take our home and render the remaining property useless. Moving the blue route 1000 yards to the west would be more cost effective and save our home as well as our neighbor's.
Joseph Davis	
Claude Owen	Not regardless of alignment because three of the proposed routes would destroy our home and make the remaining property totally useless as all access would be block by the proposed access roads for the freeway.
SETH ORSBORN	No. Current public-use areas should not be negatively impacted.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Kyle Wiltgen	the addition of stop light intersections
Suzee Bolton	It is a death trap.
Kurt Walker	Yes. Terrible traffic congestion at intersections with stop lights.
Mike Graham	Poorly-timed traffic signals and impatient drivers from side streets darting out in front of 55-60+mph traffic.
Chris moden	
Cheryl Anderson	Between Princeton and McKinney needs much better traffic flow as it is getting overcrowded with very few alternate routes available.
brent montrose	
Aimee Bushnell	
Janna Graham	Too congested
Allen Delger	Traffic congestion, safety.
corwin richardson	Yes. to many traffic light now. there use to be 3/4 traffic lights between Hwy 75 and Preston, now there is almost 3 times that number.
Ron Bowers	Too much thru traffic, not local
D. Agren	
Belinda toornburg	
Shannon Walton	
Rodney Sandersd	traffic increase
Wesley Murdock	Yes, I see that it is starting to get more congested. More specifically at Custer and 380, Hardin and 75. With the adding of new businesses and new home along 380 in McKinney, I can easily see this double in the near future. Starting to become very dangerous.
April Desch	No.
Dawn Ross	
Karon Hoban	Too congested with increasingly difficult access to hospital/doctors.
Lindsey Westbrook	30 yards from my house
KARON Hoban	380 is already extremely congested and now there is explosive big box retail growth in process. This is not smart planning considering there is a hospital and doctors offices that require access.
Eshwar Narava	yes, lanes not enough for amount of traffic.
Christopher Thomas	No
	The congestion is significant and the number of stop lights makes it dangerous.
Vera frost	Left turn safety, crossing traffic
Wayne Bullard	Just with construction which is underway.
Ken Flannigan	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Kyle Wiltgen	Virginia ave.
Suzee Bolton	No alternates as I know of none that would not be longer than traffic delays.
Kurt Walker	If I am traveling to my land out west. If 380 is congested I drive up to 82 in Sherman and go west.
Mike Graham	FM 546 or FM 1827
Chris moden	
Cheryl Anderson	CR 982 if congested between Princeton and McKinney and I know ahead of time or Bridgefarmer if the congestion isn't known ahead of time.
brent montrose	
Aimee Bushnell	
Janna Graham	982 to Lucas road or 542 or airport road.
Allen Delger	Wilmer's road to highway 5, to McIntyre to Woodlawn to 2933, to 1827
corwin richardson	TalyorBurke or Harden down to HWY 121
Ron Bowers	121 to highway 5
D. Agren	
Belinda toornburg	
Shannon Walton	
Rodney Sandersd	75
Wesley Murdock	Virginia or Stonebridge.
April Desch	I stay on it.
Dawn Ross	Preston
Karon Hoban	Lake forest or hardin
Lindsey Westbrook	Virginia Eldorado
KARON Hoban	Lake Forest or Hardin to arrive at hospital/doctors.
Eshwar Narava	i take virginia pkwy or eldorado
Christopher Thomas	Virginia
	Fishtrap is the only alternate route that gets me from home to work.
Vera frost	Virginia
Wayne Bullard	Drop down to 121 frontage to avoid the toll fees or El Dorado as back road.
Ken Flannigan	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Kyle Wiltgen	
Suzee Bolton	Bypass Freeway. No more room for to expand US 380 it is locked by business along the side in Princeton.
Kurt Walker	380 was similar to 121 before the SRT. I hate to say build a toll road but that would fix the problem. Or just widen 380 to 6 lanes and put overpasses at the intersections.
Mike Graham	At least 2 limited-access express lanes with no traffic signals.
Chris moden	
Cheryl Anderson	Better flow of lights (more green time on 380, less on side roads).
brent montrose	
Aimee Bushnell	
Janna Graham	Make it a freeway.
Allen Delger	Build a new north south artery west of Lake Lavon, and build a bypass for 380 north of Wilmeth
corwin richardson	More lanes with less traffic lights
Ron Bowers	Build bypass around Princeton, Farmers Branch, McKinney, past the maul on Preston/380. This would be for all thru traffic. Other option would be to double deck 380, Local traffic on bottom, thru traffic on top. Either way would eliminate lights for thru traffic and lessen local traffic.
D. Agren	
Belinda toornburg	
Shannon Walton	
Rodney Sandersd	widen more ways to exit the road
Wesley Murdock	Do not allow left turns from the side roads or businesses. Better left turn lanes to turn off 380. Right turn lanes to turn into businesses or residential areas. By-Pass from Custer north to 75 and around.
April Desch	None.
Dawn Ross	
Karon Hoban	No further retail development
Lindsey Westbrook	Don’t widen it. Redirect route around the residences from Custer to Lake Forest
KARON Hoban	Limit further retail.
Eshwar Narava	increase lanes or make it a tollway plus free accessway like 121 SRT or DNT
Christopher Thomas	1 more lane each direction
	We need it to be a freeway.
Vera frost	To increase safety - overpasses, service/frontage lanes for crossover traffic. We don’t need more traffic lights on the highway itself.
Wayne Bullard	Keep it straight as path seems fine.
Ken Flannigan	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Kyle Wiltgen	yes
Suzee Bolton	Yes,
Kurt Walker	Yes
Mike Graham	Unless area growth is stopped, new freeway is probably unavoidable.
Chris moden	
Cheryl Anderson	All effort should be made to accommodate those the freeway would impact, but the overall good of the community must also be considered, so yes.
brent montrose	
Aimee Bushnell	
Janna Graham	Yes as long as it's not a tollway.
Allen Delger	Yes, however, I would support a toll road if it could be done faster.
corwin richardson	no
Ron Bowers	
D. Agren	
Belinda toornburg	
Shannon Walton	
Rodney Sandersd	no
Wesley Murdock	Not regardless of alignment.
April Desch	No.
Dawn Ross	No, you should always take alignment into consideration.
Karon Hoban	No
Lindsey Westbrook	Yes if you redirect it away from all the residents and hospitals in 380 between Custer and Lake Forest
KARON Hoban	Yes
Eshwar Narava	no
Christopher Thomas	No
	Yes
Vera frost	No
Wayne Bullard	Have preference for a reasonable alignment versus random alignment or tolls.
Ken Flannigan	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
T Potter	1) Safety - to much speed vs access points and visibility. Not to mention the trucks that barrel through. Regardless of the future plans, speed limits should be reduced to 45'ish asap. 2) It is a barrier to north-south movement. 3) Excessive number of access/exit points. Flow is disrupted and dangerous due to vehicles entering exiting from an almost infinite number of places.
Marne Lackman	It's too busy Too fast Too many accidents at Tremont and 380
Tiffany Ezzedine	Preston and 380 is still a nightmare. Hoping when the construction finishes it will flow better and not be so dangerous!
Lisa Caraway	
Lisa Caraway	
Sariah	
Timothy Smolen	Too many stop lights
Jim Howe	Too many lights
Gigi Keyes	Amount of traffic, too many stoplights, too many dangerous crossings/congestion
Cale Taylor	
Amanda	Crowded
	No
Lynda tilley	No
Lynda tilley	
Michelle Flannigan	
Gary Bedell	Congestion, flow
John Soma	Traffic density and safety.
Raul Mejia	
Paul Rancuret	Capacity is too low.
Shaun hanna	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
T Potter	I usually work through it... go arounds usually take longer and add to the problem when re-entering. Always use Airport road to work around McKinney to/from the south but it gets jammed up at highway 5 - would use the new go around but not open yet. Sometimes the county and FM roads to the north of the highway.
Marne Lackman	Any major road off 380, Ridge, Lake Forest, Custer, Hardin, Preston, etc.
Tiffany Ezzedine	Virginia parkway
Lisa Caraway	
Lisa Caraway	
Sariah	
Timothy Smolen	I only use 380 if there is a business I'm needing to visit on 380
Jim Howe	
Gigi Keyes	Back roads, side streets - depending on what part of 380 I'm at.
Cale Taylor	
Amanda	
Lynda tilley	
Lynda tilley	
Michelle Flannigan	It normally is not congested when I use it.
Gary Bedell	Eldorado
John Soma	University Drive if heading eastbound. Westbound only alternative is via El Dotado to Preston/Dallas N Tollway. If going to Denton only alternative is 121 to 35.
Raul Mejia	
Paul Rancuret	Virginia or Eldorado
Shaun hanna	I dont

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
T Potter	Controlled access highway - main lanes and frontage roads (should have been that the last times that it was widened - pushed the problems down the road to today). Logic holds that the highway needs to stay in its current alignment:: 1) Any alternate would include some shared segments and would have to include interchanges onto and off of the common sections - so there is no getting around expansion of the existing corridor anyway. 2) There will be property and development impacts with any plan - adding mileage of impacts via bypasses must by definition increase the impact. Those that are along the current corridor have by their presence chosen to be there. 3) Flow is the need - traffic in relatively higher volumes needs to move through without disruption. Any intersections or interchanges between bypasses and the main corridor will disrupt that flow. All of the work around routes will only make things worse because each will require an intersection/exchange with inherent disruptions and safety issues. 4) Connect something from the south (like the new airport road) with the new hope road corridor. Or using the bridgefarmer road corridor from as far south as plano. 5) "Bypass" equals a go around - not a close quarters, intermingles alternate route. To be a "bypass" the one continuous route would need to be much more to the north (future looking instead of current, where 121 crosses 75 maybe) One real bypass, further north, connecting ne place west of McKinney and one place east of Princeton. (eventually north south connections would be made between the two as development expands, some are already shown on current Collin county road development maps).
Marne Lackman	Northern bypass route. Would love to see something from Denton to Princeton, but not on 380.
Tiffany Ezzedine	
Lisa Caraway	
Lisa Caraway	
Sariah	
Timothy Smolen	overpasses outside of the city, Loop around the city
Jim Howe	Fly overs or a route more to the north
Gigi Keyes	There needs to be a through traffic right of way that would include overpasses and bridges. McKinney, especially at US-75, would benefit from a similar project like Spring Valley thoroughfare in Richardson at US-75.
Cale Taylor	
Amanda	
	Na
Lynda tilley	
Lynda tilley	
Michelle Flannigan	Expanded lanes
Gary Bedell	Elevated highway without the need to stop at lights.
John Soma	Upgrade to freeway between 75 and Denton.
Raul Mejia	
Paul Rancuret	A McKinney Bypass. But I think you should have segmented the options (alignments) a bit differently. Specifically, on the west-side of McKinney (west of US75), my preference is for the blue alignment. On the east-side of McKinney, my preference is for the red alignment. For the New Hope / Princeton area, my preference is for the yellow alignment. For the Farmersville area, my preference is for the blue alignment.
Shaun hanna	Fix issues or turn arounds so there are more options to turn left or right

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
T Potter	Absolutely Not! I would not support a conglomeration of bottlenecks exacerbated by interchanges and transitions... I will only support expansion in the existing alignment with at max one bypass that is far enough north to actually accomplish something with max of one interchange west of McKinney and one east of Princeton. (essentially a thru traffic go around)
Marne Lackman	Yes
Tiffany Ezzedine	No
Lisa Caraway	
Lisa Caraway	Yes
Sariah	
Timothy Smolen	if it connects mckinney to greenville and denton I do support it.
Jim Howe	Yes
Gigi Keyes	Yes, somewhat, depending on the actual alignment.
Cale Taylor	
Amanda	Sure
	No
Lynda tilley	No
Lynda tilley	
Michelle Flannigan	No
Gary Bedell	
John Soma	Yes
Raul Mejia	
Paul Rancuret	The population north of 121 continues to increase, so it seems inevitable that a new 380 freeway needs to be built. But as a resident who lives near 380, and who drives 380 on a daily basis, I have a very strong opinion about the alignment.
Shaun hanna	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Mike Emmons	Congestion and lack of public transportation.
Mary V Dickerson	Waiting thru traffic lights multiple times. Continued congestion on 380.
Nathan Loewen	No
Kelli Chastain	
Mandi Mullikin	No
Minli Xu	
Patrick Smith	No
Geoffrey Davis	Seams to be working well
Christine Saville	The accidents.
Janet Disarro	Not wide enough to carry volume of traffic
Alan Somers	
Sylvia McCrory	They keep adding traffic lights. Now takes too long to get to get from McKinney to Denton
Richard K Schaaf	Truck traffic is excessive and the trucks clog up the left passing lanes.
Kip (royce) Carr	commercial traffic and accidents due to speed
Claire Salazar	Traffic speed
Larry Truesdale	No
Nathan Quinn	
Katie Carr	commercial traffic, accidents due to speed
Bill fontenot	Yes it’s congested.
Colin Humphreys	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Mike Emmons	There aren't good alternatives to some directions.
Mary V Dickerson	Wilmeth Road. I go 75 north, then Wilmoth road to get home. Also White street to the road that passes Collin College to get home, which is near McKinney North High.
Nathan Loewen	Wilmeth, not to avoid congestion, but the plethora of stoplights near 75.
Kelli Chastain	Virginia or Eldorado
Mandi Mullikin	Hardin to 75
Minli Xu	
Patrick Smith	Never have that problem
Geoffrey Davis	121
Christine Saville	Virginia Parkway or one of those FM roads north of it.
Janet Disarro	Virginia Pkwy
Alan Somers	Wilmeth Rd. -or- TX 5 To Sam Rayburn Tollway
Sylvia McCrory	There aren't any
Richard K Schaaf	Lake Forest, Ridge, Virginia, Eldorado
Kip (royce) Carr	custer rd, preston rd or coit rd to 121
Claire Salazar	Backroads/neighborhood streets
Larry Truesdale	Virginia Parkway
Nathan Quinn	
Katie Carr	custer rd, preston or coit to 121
Bill fontenot	None. I sit in traffic.
Colin Humphreys	Anything south to Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Mike Emmons	Better long range planning, including public transportation alternatives.
Mary V Dickerson	I cannot perceive the routes suggested by looking at the maps on line so I don't have a solution.
Nathan Loewen	Time the lights better, giving more time for 380 thru traffic, less for merging traffic.
Kelli Chastain	I've never had any issues on it.
Mandi Mullikin	
Minli Xu	
Patrick Smith	
Geoffrey Davis	
Christine Saville	Turn lanes.
Janet Disarro	Build another east west corridor.
Alan Somers	The Blue route is a non-starter for our flying field in Erwin Park. The Yellow and Red routes are too close for comfort.
Sylvia McCrory	A freeway with no traffic lights with access roads on the sides
Richard K Schaaf	Setup on 380 like 75.
Kip (royce) Carr	Tucker Hill position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of -way and noise pollution means of cantilevered access lanes, a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Claire Salazar	
Larry Truesdale	I'm sure an expansion of some sort is warranted because of long term population growth. The research and efforts TxDoT is doing are the right approach to figure out what the best alternative is.
Nathan Quinn	
Katie Carr	Tucker Hill position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of -way and noise pollution means of cantilevered access lanes, a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Bill fontenot	Managed lanes.
Colin Humphreys	Expand 380 or build freeway farther north where it will be needed more later. Then, brand new homes wouldn't be surprised with a freeway in 5 uears

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Mike Emmons	We cannot continue to have our way out of traffic congestion. There is no choice but to expand 380. Those along the existing corridor, knew or should have known that the freeway had to expand in the future.
Mary V Dickerson	Not necessarily
Nathan Loewen	If it is not a toll road and does not interfere with any parks, yes.
Kelli Chastain	No!! Especially if it is going to displace families.
Mandi Mullikin	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Minli Xu	
Patrick Smith	No
Geoffrey Davis	No
Christine Saville	No.
Janet Disarro	
Alan Somers	Yes
Sylvia McCrory	yes
Richard K Schaaf	No, freeway near residential areas will cause a decline in resident property values and perhap some loss of fringe housing. Also, those that located north of 380 did so to get away from the traffic and congestion. The city should have addressed this earlier so builders could taken the plans into consideration as well as new residents.
Kip (royce) Carr	NO
Claire Salazar	
Larry Truesdale	Yes. unfortunately I think it is necessary.
Nathan Quinn	
Katie Carr	NO
Bill fontenot	No. Eliminating park space for the sake of building more roads is not the answer.
Colin Humphreys	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jim Smith	-Rate of Speed -Number of accidents @ 380 and Tucker Hill entrance -Lack of warning sings approaching subdivisions that enter 380 L
Jim Smith	
Pam Pham	No
Sofie mendenhall	Traffic is always terrible!!!
Tricia Weir	Works well though I would like to see bike lanes even on this road as I sometimes ride on it.
Barbara Blanton	Toocrowdedi
Eric Atherton	Congestion. Stop lights.
Sydney McAloon	Nope
ismel camacho	
	Too many traffic lights and business turn ins and outs given the average speed. Dangerous possibilities.
Melissa Perkins	
Rebecca Langley	Areas west of the tollway aren't enough lanes and it seems like it's been under construction for an extremely long period of time
Shannon Atherton	A lot of big trucks. It is extremely high speed for all the businesses that are on that road now between 75 and Lake Forest.
David Osmun	Absolutely. It is miserable to drive this road.
Kevin Clements	
	Medians
Mike Organ	Too many lights. No turn lanes for neighborhoods directly on 380, causing accidents
Jonathan Perkins	No
Scott Berryhill	Congestion
Paul Landman	No
Sean Smith	Too slow
Carlos Castro	
Katie Nicholson	
Kevin L. Smith	Heavy traffic, too many lights for the amount of cars/trucks using it.
	Not enough concrete from Mckinney to Princeton.
Steven Earles	I have concerns about the safety of 380. Speed limits are not enforced, and traffic signals are routinely ignored.
Leslie Thompson	Too much traffic
Liz Wolff	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jim Smith	Custer Rd Ridge Rd Hardin - before new businesses congest that area
Jim Smith	
Pam Pham	Hwy 5
Sofie mendenhall	Virgina
Tricia Weir	
Barbara Blanton	I either go north or go south
Eric Atherton	Virginia
Sydney McAloon	
ismel camacho	
	For longer distances there is not a good alternative.
Melissa Perkins	
Rebecca Langley	Virginia Parkway or Eldorado Parkway
Shannon Atherton	White
David Osmun	The only other option is to drive down the DNT to either PGBT or I-635 to I-30.
Kevin Clements	
Mike Organ	Custer to 121, Rockhill to DNT/121
Jonathan Perkins	Whatever Waze suggests
Scott Berryhill	Wilmeth or Virginia
Paul Landman	N/A
Sean Smith	I stick it out
Carlos Castro	
Katie Nicholson	
Kevin L. Smith	Virginia
	121 to Melissa to 78. Or Monte Carlo around Princeton.
Steven Earles	380 is the only route in and out of my neighborhood.
Leslie Thompson	Preston Road or Custer Road or 1461
Liz Wolff	380 is my option, haven’t had need to use an alternative

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jim Smith	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jim Smith	
Pam Pham	
Sofie mendenhall	Figure out a way to make the traffic flow more easily
Tricia Weir	
Barbara Blanton	Go north above the existing 380. The places you have it now or thenew ones you just added are in congested neighborhoods.
Eric Atherton	Find a way to have a highway without lights so drivers can get through the area faster.
Sydney McAloon	
ismel camacho	
	Make it a highway without lights etc on the main freeway.
Melissa Perkins	
Rebecca Langley	Adding an additional lane each way, bridges over major intersections
Shannon Atherton	It should not become a freeway/highway. Something else should be built away from all the housing rather than tearing up the existing road near the businesses/homes there
David Osmun	A bypass to the North or install overpasses and exits for cross traffic to reduce stoplights.
Kevin Clements	
Mike Organ	Buildout like 121, but free road
Jonathan Perkins	
Scott Berryhill	
Paul Landman	Pink or Green Alignments
Sean Smith	Higher speed limit
Carlos Castro	
Katie Nicholson	
Kevin L. Smith	Upgrade the existing right-of-way to a limited access freeway, why put in new routes which will only ruin the value of more country property.
	A flyover in Princeton or divided highway with median from Princeton to Mckinney.
Steven Earles	Improve the safety of 380 by more turn lanes, an overpass or flyover at 380 and 75. Decrease the speed limit and enforce it, red light cameras.
Leslie Thompson	Bridges over 380 to improve traffic flow
Liz Wolff	N/a

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jim Smith	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jim Smith	
Pam Pham	Yes
Sofie mendenhall	No
Tricia Weir	Preferred not. Like the rural nature of the area and would like to keep that.
Barbara Blanton	Almost too late. You waited too long to plan.
Eric Atherton	No
Sydney McAloon	
ismel camacho	
	No. Anyone who has lived in The McKinney area should realize that Erwin park is a treasure. My guess is the opposition to losing all or part of the park would be met with quite a bit of criticism.
Melissa Perkins	
Rebecca Langley	No
Shannon Atherton	No
David Osmun	I'm not sure. It would depend on location and direction
Kevin Clements	
Mike Organ	Should not impact community areas/parks
Jonathan Perkins	
Scott Berryhill	Yes
Paul Landman	No
Sean Smith	No
Carlos Castro	
Katie Nicholson	
Kevin L. Smith	I support the building of a freeway as there is no going back to a lower population/less traffic. All the Collin Co. cities are guilty of planning/zoning for unbridled growth, the genie is out of the bottle now.
	Yes
Steven Earles	No.
Leslie Thompson	Yes
Liz Wolff	NO!

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Richard & Sandra Johnson	
Elizabeth Banner	Speed limit
Weston Smith	No
Andrea Loker	Past 15 yrs highway is now a local road. Either drop the speed to 35mph. Or Build a bridge to 75 for traffic needing north or south access to other connecting highways or Dallas north tollway, depending on the location.
Richard Clare	Yes. Congestion, especially at 380/Highway 75
Mike Marion	Too many stops West of hwy 75
Nash Lowrance	Yes, removal of trail system at Erwin.
Kerry Doke	Dangerous, lots of accidents. High speeds for a road with traffic lights & heavy traffic.
Steve Hester	Need to finish construction
Craig Coffey	Just the bottlenecks in princeton
TIMOTHY LEETH	congestion
Gene Fedorko	Yes. Traffic is bad during rush hour and on the weekend.
Melissa Castaneda	congestion
	Crowded and there are several housing areas being built
Kelly Richmond	I have concerns about the amount of vehicle accidents at the entrance to Tucker Hill due to the number of vehicles and high speed through the intersection, as well as drivers' disregard for the light. US 380 has also been highly congested at Preston and Dallas North Tollway due to the construction.
Cathy Forrest	too congested and the putting in of costco and other big stores will bring more traffic
Teresa Metzger	Slightly congested
Vince Sena	Frequent accidents
Annette Gordon	Too much traffic especially since the Costco will be opening.
Jean Westbrook	It's 25 yards from my bedroom window!!!!
Marian Oconnor	Unprotected left turns, speed
Lindsey Rogers	to congested, dangerous
Jan Clare	Due to uncontrolled growth and poor planning by the city of McKinney, it can be very congested at various times of the day.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Richard & Sandra Johnson	Lake Forest, Custer Road, 121
Elizabeth Banner	Virginia
Weston Smith	Virginia Pkwy
Andrea Loker	Virginia, alma, Custer,lake forest, ridge road, service road on 75 to any other alternate streets to avoid 380 During rush hour, Christmas shopping and trade days, weekend shopping before 630 pm.
Richard Clare	Going East on 380: left at Community to Wilmeth, then Highway 75 North Going East on 380: right at Community to White Street, then Highway 75 South
Mike Marion	
Nash Lowrance	
Kerry Doke	There are no good alternatives for 380.
Steve Hester	virginia parkway
Craig Coffey	I don't. 380 is generally ok
TIMOTHY LEETH	pink or green
Gene Fedorko	Local roads
Melissa Castaneda	121
	White or Harden
Kelly Richmond	Custer to 121
Cathy Forrest	virginia, it is too congested most days
Teresa Metzger	NONE
Vince Sena	
Annette Gordon	
Jean Westbrook	Eldorado or virginia
Marian Oconnor	75, Virginia
Lindsey Rogers	Preston (US 289), Custer Rd
Jan Clare	Stonebridge Drive, Hardin, Eldorado Parkway, Virginia Parkway, Community, Custer Road, White Street

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Richard & Sandra Johnson	We are in favor of a 380 bypass
Elizabeth Banner	
Weston Smith	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Andrea Loker	Think long term! All past efforts were short term! Review population growth, new communities under construction, why does everything need to be flat? Go Up. Make Local only lanes and include bridge like Preston from121. Seems to work for this road, use feeder bridges to move heavier traffic up and around and lower decks of traffic move at slower speeds with more traffic lights.
Richard Clare	Pink/Green alignment
Mike Marion	
Nash Lowrance	
Kerry Doke	Turning it into a “bypass” highway.
Steve Hester	build a freeway or tollway
Craig Coffey	elevated interchanges on the existing 380 path
TIMOTHY LEETH	
Gene Fedorko	Built a rail system that also connects to DART.
Melissa Castaneda	
	Not sure
Kelly Richmond	Building an alternate highway north of 380 to be the primary transportation route for commuting from Denton to McKinney to reduce vehicles on 380.
Cathy Forrest	light timing
Teresa Metzger	Leave as is
Vince Sena	
Annette Gordon	
Jean Westbrook	Go around 380 from Custer with a road that connects to 75. Yes only if it goes around all the housing additions and hospitals on 380 . Too many housing additions that nearly touch 380 from Custer to Lake Forest plus a major hospital
Marian Oconnor	
Lindsey Rogers	elevated highway that goes from county line to county line
Jan Clare	Pink or Green route...380 needs to be widened where enough ROW exists. If there is no room to widen, go up or down like many other cities have done.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Richard & Sandra Johnson	We don't want 380 to become a freeway or tollway.
Elizabeth Banner	
Weston Smith	No
Andrea Loker	Yes! Get on it Already!
Richard Clare	No.
Mike Marion	No
Nash Lowrance	No.
Kerry Doke	Yes
Steve Hester	Yes
Craig Coffey	No
TIMOTHY LEETH	no
Gene Fedorko	yes but preserve the trees.
Melissa Castaneda	would depend on what the cost would mean to us as residents.
	Something has to be done!
Kelly Richmond	I do not support converting US 380 to a freeway due to the number of residential communities and businesses that will be adversely impacted. As a resident of Tucker Hill, my position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Cathy Forrest	no
Teresa Metzger	No
Vince Sena	No
Annette Gordon	Yes
Jean Westbrook	Yes if it goes around the housing additions and hospitals on 380 from Custer to Lake Forest. Not down 380 from Custer to Lake Forest. No freeway from Custer to LakeForest
Marian Oconnor	No
Lindsey Rogers	yes
Jan Clare	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Marian OConnor	Unprotected left turns/speed
Ashleigh Beale	Occasional congestion as it approaches 75 and current speed limit is too high
Christine Harper	The high speed that people drive on 380 is concerning.
Arturo Garcia	That the speed limit will be decreased and that it will get more stop lights
Misty Miller	
Marjorie Brown	Yes, its congested now as it is and more business, shopping, and entertainment venues are coming into the area. As it is now, it will not be able to sustain the amount of traffic to come.
Todd Dudley	Many of the lights keep vehicles who need to turn stopped for extended periods with no oncoming traffic. If a flashing yellow turn signal can't be implemented, then a more rapidly reacting sensor should be put in place. I've sat at some red turn signals for close to 2 minutes without a vehicle coming the other direction.
Marjorie Brown	
Dixon Glaze	no
Randall Jacobs	With current growth in the area I don't believe it will adequately handle traffic in the near future. I also don't believe adding another lane is workable considering the proximity of current existing structures. Also I believe it would be best to route traffic onto a limited access bypass around the McKinney area to avoid the inevitable gridlock. There are enough signal lights that anticipated increases in traffic will create backups from signal to signal, an event that occurs frequently during current rush hour traffic. I also see a potential for needing even more signals on 380 through McKinney further exacerbating the problem.
Brad Price	Not as it is.
Christine Huang	Yes, ruining our neighborhood
Victoria Newsom	As a daily commuter, the road and drivers perform as expected in a growing city. The congestion occurs at the junction of US380 and 75.
Jamie Cooper	Amount of wrecks and entrance of Tucker Hill neighborhood
johnny hollandsworth	to many red light
David Allison	Yes, truck traffic to the west makes 380 congested
Ashleigh Beale	No
Lisa Mir	It is congested.
Karen	Heavy traffic during rush hour, many stop lights in McKinney and Princeton
Bryan Douglas	No
Shanda Lowery	Too much traffic, accidents

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Marian OConnor	75, lake forest to Virginia, Hardin to Virginia
Ashleigh Beale	Virginia
Christine Harper	Lake Forrest, Ridge
Arturo Garcia	Virginia or Eldorado
Misty Miller	
Marjorie Brown	I'll take Hardin or Community Drive to Wilmeth if going north to 75. Otherwise I'll choose White Ave to go East.
Todd Dudley	Stonebridge, Custer, Lake Forest, Hardin, then Preston and DNT
Marjorie Brown	
Dixon Glaze	It just takes longer.
Randall Jacobs	Virginia or Eldorado.
Brad Price	Virginia
Christine Huang	Virginia parkway
Victoria Newsom	None.
Jamie Cooper	Stonebridge
johnny hollandsworth	121
David Allison	NA
Ashleigh Beale	Virginia
Lisa Mir	Virginia or eldorado or 121
Karen	Wilmeth/Hardin, Hwy 5 south to 399
Bryan Douglas	
Shanda Lowery	New Hope

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Marian OConnor	
Ashleigh Beale	
Christine Harper	
Arturo Garcia	Over or under passes
Misty Miller	
Marjorie Brown	
Todd Dudley	Better timing on lights. Close to Hwy 75 there are too many lights combined with too many entry/exit points. That's the only part that really gets backed up, but can back up almost to Lake Forest.
Marjorie Brown	
Dixon Glaze	Interurban passenger trains like north Texas used to have instead of more & more & more & more cars taking more and more land for more roads.
Randall Jacobs	Developing and building a freeway style bypass around the city of McKinney as soon as possible. As the community builds further north it will only be more difficult to obtain the right of way for that bypass. Having driven a commercial truck for a living, I can wholeheartedly sympathize with the drivers as they work their way through town. It will only get worse for them as time passes.
Brad Price	
Christine Huang	None leave as is
Victoria Newsom	Public Transportation.
Jamie Cooper	
johnny hollandsworth	have it you don't have to stop all red light. like 121
David Allison	Limit E-W traffic to local and car traffic. Reroute trucks
Ashleigh Beale	
Lisa Mir	Timing of lights.
Karen	Traffic primarily travels east or west on US 380 to access 75, and then moves south to Plano or Dallas. As the major east-west corridor, 380 has already been approved by Prosper and Frisco as an improved, limited-access freeway. It makes sense to continue the road in a seamless manner through McKinney and Princeton as well.
Bryan Douglas	
Shanda Lowery	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Marian OConnor	No.
Ashleigh Beale	
Christine Harper	Not sure
Arturo Garcia	Yes
Misty Miller	
Marjorie Brown	
Todd Dudley	No. Many structures along 380, and some neighborhoods, are either currently undergoing construction or very recently completed construction. There's no reason to have that construction take place only to risk tearing it down because of poor communication/planning. Making 380 a freeway will turn several "safe" neighborhoods into a risk, which not only impacts quality of life but also seriously impacts the financial future of the residents whose neighborhoods would be impacted.
Marjorie Brown	
Dixon Glaze	NO! Not if it is minimal access.
Randall Jacobs	Absolutely.
Brad Price	Maybe
Christine Huang	No
Victoria Newsom	No. With the proposed loop around Mckinney, wouldn't that relive potential conjestion? McKinney and the surrounding cities need to provide a system of public transportation that would be a model for other similar cities.
Jamie Cooper	No
johnny hollandsworth	yes
David Allison	No
Ashleigh Beale	
Lisa Mir	I do not want any parks are recreation areas in McKinney to be affected by a new freeway .
Karen	No. An outer loop has already been approved by the Council of Governments -it is being built now and needs to be completed. The TxDOT-proposed pink & green routes improve a long-established thoroughfare that is the major east-west route through McKinney and Princeton. There is no published traffic study showing that the red and yellow routes would actually alleviate traffic congestion, and those routes disrupt farms and neighborhoods.
Bryan Douglas	No
Shanda Lowery	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Aojing Lu	No.
Michelle Smith	The turn lane westbound at Airport Road needs to be longer and a double left turn onto Airport Road.
Mike Kohl	No
J.J. Vernier	Too much traffic. Too many big trucks driving very fast
Aojing Lu	No
Bruce A. Spence	Yes, I avoid it during afternoon rush.
Heather Cramer	
Donna Tarallo	So much congestion
Lobelia Miller	Many accidents with high speed limit. It's a main highway for trucks AND a local road for residents.
J David Thompson	I am routinely on 380 several times per day. Congestion is mostly commuter/rush hour traffic.
Torrie and James Levins	Speed limit in places seems too high and some lights are poorly timed and dangerous. Some places don't have deceleration lanes for people turning.
	Way too busy
	Too many trucks and traffic
Jenna Urben	People speed to quickly down US 380
Robert Cannon	no
	It's too congested already
Fritz Hager, Sr	Too many stoplights and low speed limits.
Jo Ann Long	Too Busy in its current form
Brandt Oliver	
Joanie Norwood	Congestion and Safety
Michael J Beaudoin	Not great concerns

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Aojing Lu	El Dorado, Virginia, 121
Michelle Smith	FM 546 or back roads north through to FM75
Mike Kohl	I don't
J.J. Vernier	White St and Virginia Pkwy
Aojing Lu	Virginia, El Dorado, 121
Bruce A. Spence	I stay off the highway.
Heather Cramer	
Donna Tarallo	Virginia
Lobelia Miller	
J David Thompson	Woodlawn/Throckmorton, Wilmeth, Hardin
Torrie and James Levins	121 or Custer or tollway
	Us 380 is my only option
	Side Roads
Jenna Urben	Virginia, roads throughout McKinney
Robert Cannon	Custer
	There aren't any other good alternatives
Fritz Hager, Sr	US 75 south
Jo Ann Long	Virgina
Brandt Oliver	N/A
Joanie Norwood	Custer Road or Virginia
Michael J Beaudoin	East west alternatives, main, eldorado etc

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Aojing Lu	ucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Michelle Smith	Act fast
Mike Kohl	
J.J. Vernier	
Aojing Lu	None needed with existing roads and planned outer loop
Bruce A. Spence	et rid of the traffic lights.
Heather Cramer	
Donna Tarallo	
Lobelia Miller	Northern loop for highway traffic
J David Thompson	Keep 380 as the major east/west corridor; follow the examples of Frisco and Prosper, and make 380 a better thoroughfare through McKinney (and Princeton) with overpasses, limitation of stoplights, or convert to limited access freeway.
Torrie and James Levins	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
	Elevate and expand
Jenna Urben	Put in more stoplights, similar to Preston Rd. through Frisco
Robert Cannon	none, it is generally fine as is
	A loop further out from the current location. It would have the least impact on existing neighborhoods. There are fewer homes further out that would be impacted, not to mention most future growth will be in that direction.
Fritz Hager, Sr	Bypass towns.
Jo Ann Long	Start now
Brandt Oliver	Do not go through Erwin Park
Joanie Norwood	develop a northern loop to reduce traffic on 380, just as George Bush Freeway and then 121/Sam Rayburn highway were developed to reduce traffic load on 635
Michael J Beaudoin	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Aojing Lu	No.
Michelle Smith	Not sure, we can't seem to. Hold roads big enough or fast enough to keep up with the growing area.
Mike Kohl	No
J.J. Vernier	No
Aojing Lu	Outer Loop only
Bruce A. Spence	Yes
Heather Cramer	
Donna Tarallo	yes
Lobelia Miller	Yes
J David Thompson	No; there is no traffic study (certainly no published traffic studies) which document the necessity, advisability, or effectiveness of a northern 380 bypass. Most rush hour traffic on 380 and 75 is trying to go to Dallas or Plano (where the jobs are); a southern bypass makes sense; a northern bypass does not make sense or hold promise for decreasing rush hour congestion. The Council of Governments has approved and mapped out the Outer Loop (a northern bypass); the Outer Loop should be completed.
Torrie and James Levins	No
	NO
Jenna Urben	No
Robert Cannon	no
	Absolutely not!!
Fritz Hager, Sr	Yes
Jo Ann Long	yes
Brandt Oliver	Doesn’t matter as long as it doesn’t interfere with Erwin Park
Joanie Norwood	No, it needs to be aligned north of 380
Michael J Beaudoin	I do not. Definitely do not want existing parks or housing impacted

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Amy Arnold			Property Owner	Nearby resident		Daily
Alison Schmitt	Commuter					Weekly

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Paul keyworth	Congestion is mainly from the two lights prior to 75 moving east And again from the 75 through to HW5
Mark	
Michael Forehand Jr.	
Todd Warner	No
Bob Maynard	It is heavily traveled and needs to be traveled with caution.
Tracy Prince	No
Christopher Wilson	
Tommi Wilson	yes
Deborah Papatonis	Congestion and safety issues.
Mark and Beth Ayers	
	Just that it is too crowded/ busy
Renato J Regalado	it could use some barriers and other safety related improvements. Could also increase the speed limit.
Amy Lindahl	The traffic is just getting worse and especially during "peak" hours.
Jenny McBrayer	number of stop lights between Preston and Hwy 5
Sharon R. Cromwell	
McKenna Smith	no
Brian Cummings	US 380 currently is too congested, and the unsafe conditions are exacerbated by the traffic lights placed approximately every two blocks, thus preventing function as a highway.
	Dangerous traffic patterns, long lights
Jim Cruse	Excessive speed—disregard for traffic signals, heavy use by school buses, potential grid lock as business growth along the 380 corridor continues
Roger Garcia	Speed Limit is too high.
Carol Hopkins	It is getting congested already with the new business
Amy Arnold	Congestion around Hardin to 75
Alison Schmitt	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Paul keyworth	North east and west via Wilmeth and into McKinney downtown visa HW 5
Mark	
Michael Forehand Jr.	Eldorado Stacy Rd / Main Street Sam Rayburn/ 121
Todd Warner	190
Bob Maynard	Virginia
Tracy Prince	Virginia Parkway, Eldorado Parkway, 121
Christopher Wilson	
Tommi Wilson	none
Deborah Papatonis	Virginia Parkway to Preston Rd
Mark and Beth Ayers	I would recommend a route to the North of existing 380. Tearing up the 380/75 intersection will be a nightmare. Move the main artery to the north of existing road
	??
Renato J Regalado	I take Virginia
Amy Lindahl	I take White, Community, Virginia, Hardin & Lake Forest and try to avoid 380 when possible.
Jenny McBrayer	121
Sharon R. Cromwell	
McKenna Smith	Stonebride/Ridge and Virginia
Brian Cummings	Lake Forest to 121, or Custer to Eldorado
	Hwy 121, Virginia Parkway
Jim Cruse	Stonebridge & Virginia
Roger Garcia	Virginia
Carol Hopkins	
Amy Arnold	
Alison Schmitt	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Paul keyworth	If a northern loop is still planned this could lower the business pass through traffic Better right turn access at all intersections would speed traffic A simple increase to 6 lanes with the above should meet needs
Mark	
Michael Forehand Jr.	Make it a tollway from Greenville to Denton with access roads. This would reduce traffic going through Dallas, promote growth, and speed up the flow of commuting. If that is too far, recommend considering Tollway on 380 from Hwy 75 in McKinney to I-35 in Denton.
Todd Warner	Avoid Erwin Park
Bob Maynard	380 needs to be a PGBT or SRT
Tracy Prince	Widen Road maybe another lane or two on each side only do a half a mile at a time don't close the entire road down at one time don't make it under construction for miles and miles and miles do a little open that section do a little more open that section do a little more open that section and definitely no more toll roads
Christopher Wilson	
Tommi Wilson	build limited access road
Deborah Papatonis	
Mark and Beth Ayers	
	Put a 2nd layer or ramp for thru traffic going over existing road.
Renato J Regalado	Turning it into a freeway
Amy Lindahl	More options for vehicles- without lights so as to avoid stopping- perhaps like Austin- an overpass for people that want to avoid all the lights.
Jenny McBrayer	
Sharon R. Cromwell	
McKenna Smith	
Brian Cummings	I prefer keeping the current corridor, but increasing 380 to a freeway, similar to Sam Rayburn Tollway (121), to allow seamless thru-traffic, with service road access.
Jim Cruse	Develop Ridge-as a 4 lane hwy north to Wilmeth and beyond Extend Wilmeth west to Custer Develop Bloomdale as a 4 lane divided hwy from Custer to US 75 With a correct traffic grid on McKinneys north side, local traffic will have alternatives and relieve 380 volume . Speed limit must be reduced to 45 mph from Custer east to US75
Roger Garcia	Raised roadway overpass.
Carol Hopkins	
Amy Arnold	
Alison Schmitt	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Paul keyworth	More emphasis on a northern loop should be used for initially solving any increase More of a freeway could show benefits from the Dallas Tollway towards Denton
Mark	No
Michael Forehand Jr.	Yes
Todd Warner	No.
Bob Maynard	Yes
Tracy Prince	Not necessarily because they'll try to turn it into a toll road and we have enough damn toll roads around here
Christopher Wilson	
Tommi Wilson	no
Deborah Papatonis	Not on 380
Mark and Beth Ayers	Support a freeway north of present 380
	Mostly
Renato J Regalado	Yes
Amy Lindahl	I don't completely understand this question. Do you mean regardless of where the freeway goes? If so- it would depend.
Jenny McBrayer	no
Sharon R. Cromwell	
McKenna Smith	No
Brian Cummings	Yes...regardless of alignment, there is almost no choice but creating a freeway. With our growth, denying a freeway now would actually just be a delay, requiring far more expensive solutions within 10 years.
	Maybe - need more info to answer
Jim Cruse	NO!
Roger Garcia	no
Carol Hopkins	Yes
Amy Arnold	No.
Alison Schmitt	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Stephanie Ketcham	Congestion nearing 75. The lack of appropriate signal light timing during peak traffic hours.
Twila Anderson	I am just wondering, since they already have so many accidents, how many more will occur as a result from all the new building/developing plans? Also, I do not want to see more toll roads.
Barry Card	Too much traffic and the commercial development is only going to make it worse
Lisa denton	
Denny Denton	
Barbara Robinson	Speeding/accidents
Jessica Hiestand	NOt really.
Keith Robinson	Traffic gets very heavy at certain times plus people speed quite a bit.
Carrie	
Starla Ledbetter	Congestion at 75 and 380
David W. Smith	Speed is not controlled for the amount of traffic carried. Need more law enforcement.
	no
Susan Crossland	Yes. Traffic
Jane Damon	I live close to tollway but will soon be driving to US 75 each day. Easing congestion is needed.
Nancy Lawrence	Yes. Too much traffic and accidents.
Brent Heady	
Roger Matthews	
Brandy G Comba	Crowded
Sarah cuellar	
	Only where it meets the 75. It’s too congested. The rest of the time this road moves fine and not congested. Unlike the 121 which is bumper to bumper every morning and evening
Alysia Danielle Osorio	Yes, it's a dangerous road with heavy traffic. I dread getting on it.
Keith Debes	To many lights. Takes to long to travel.
Don Seale	Where does one start? Many. Dangerous. Over crowded. Getting worse daily.
Swamynathan Ganesh	Yes. It is very congested during peak hour morning traffic. So I take the parallel Virginia Pkwy even though it has construction on going.
israel	YES
John Hickman	Yes
Debbie Norvet	All the stop lights on a highway. Have two children living in Denton, can take us at times over one hour to get to Denton.
Roberta Boyd King	Aside from all the road construction, it's fine.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Stephanie Ketcham	Any cross street heading south. I usually am headed south, then make my way west to 75 or east to the tollway.
Twila Anderson	I am not sure. I guess I will just need to avoid 380 during the developmental phase of your planned project(s).
Barry Card	Virginia, but it is undergoing construction and is crowded
Lisa denton	North through Prosper or Virginia parkway
Denny Denton	Virginia pkwy
Barbara Robinson	Never had it so congested!
Jessica Hiestand	I've never hit much congestion, but I would take Virginia instead and then cut back north when needed.
Keith Robinson	
Carrie	Preston, back roads, eldorado
Starla Ledbetter	I work at Cameron Crossing, I haven't an alternative.
David W. Smith	Eldorado
Susan Crossland	FM 1461 or Lake Forest
Jane Damon	Preston road, but that is not an option to drive downtown when my commute changes in 2019.
Nancy Lawrence	Virginia Parkway
Brent Heady	
Roger Matthews	
Brandy G Comba	
Sarah cuellar	289
	It’s hasn’t been congested except for where it meets the 75.
Alysia Danielle Osorio	Virginia Parkway, El Dorado
Keith Debes	121
Don Seale	Too many back roads to mention.
Swamynathan Ganesh	Virginia pkwy.
israel	El dorado / First street
John Hickman	I don't.
Debbie Norvet	Started taking 121 toll road then north on I-35. More miles but less time!
Roberta Boyd King	None. I sit in the congestion until it resolves,

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Stephanie Ketcham	Proper signal light timing. Adding another lane. Building the 380 freeway as far north as possible. Growth will continue north...build it where it will be most needed in the long term future. Don't "compete" with the use of nearby 121.
Twila Anderson	More lanes, better signs, set speeds, and more lights.
Barry Card	Option 1
Lisa denton	Make a highway
Denny Denton	Green shifting it north
Barbara Robinson	Widen by one lane on each side only. From Custer to Central would be a nightmare for the people of that area if you widen more.
Jessica Hiestand	I think simply widening 380 would ease much of the congestion.
Keith Robinson	Somewhere north of 380 would have the least impact.
Carrie	
Starla Ledbetter	
David W. Smith	Need to develop another north-south, school zone free corroder to help relieve Custer. Need another east-west corridor from Tollway to US 75.
Susan Crossland	
Jane Damon	Limited access road (highway) Is best solution
Nancy Lawrence	
Brent Heady	
Roger Matthews	
Brandy G Comba	
Sarah cuellar	
	Connect the 380 to the 75 but leave the rest of it as is
Alysia Danielle Osorio	
Keith Debes	Make existing 380 road a freeway with no lights and build in side frontage roads do local traffic.
Don Seale	Double deck w express lanes only with only a few exits. Too late for aesthetics. Think Hwy 183 Austin. Same footprint.
Swamynathan Ganesh	I would like to see 380 expanded as freeway in its current alignment or at least have underpass/over bridge at select junctions.
israel	DO the construction on weekends and night times ... not during rush hour, and or have some police officers directing traffic.
John Hickman	wider or taller
Debbie Norvet	Put in overpasses at the lights and access side roads to accommodate all the new and growing traffic for shopping and businesses on the 380 corridor.
Roberta Boyd King	Nothing

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Stephanie Ketcham	Yes. It will be necessary with the growth further north.
Twila Anderson	If it will help reduce accidents, then yes. However, I do not want to see yet another toll road.
Barry Card	No.
Lisa denton	Yes
Denny Denton	Yes
Barbara Robinson	No
Jessica Hiestand	Not if it cuts through existing parks
Keith Robinson	No
Carrie	No
Starla Ledbetter	
David W. Smith	Yes.
	no
Susan Crossland	Yes
Jane Damon	Yes
Nancy Lawrence	No. I support on the pink/green routes.
Brent Heady	
Roger Matthews	
Brandy G Comba	No
Sarah cuellar	No
	There are new developments along the 380. That would be a major impact to home owners. Also some of them are. Re houses. That's not very good planning
Alysia Danielle Osorio	Im not sure what that means or entails...but if it made the road safer and easier to get through then yes.
Keith Debes	Yes
Don Seale	Yes yes yes
Swamynathan Ganesh	No - I would like it to expanded as freeway only in its current alignment. Like how 380 is expanded between Prosper/Frisco. I do not support the freeway destroying the Erwin park. The beauty of McKinney is in its greenery and we don't want it to go away.
israel	NO ... ABSOLUTELY NOT, I suggest improve the current one ... better signals, better lights
John Hickman	Not sure.
Debbie Norvet	Yes
Roberta Boyd King	No
	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Tiffani Jones	Not enough lanes and wrecks are very common on this road.
William McClellan	None. If it needs to be widened fine. The people that built up against 380 anticipated this. People miles away never anticipated having a highway in there backyard.
NorrisBroussard	
Travis McDowell	
Julia Odle	The other drivers scare me, not the road itself. Speed, impatience, distracted, following too closely, etc.
Benita Elias	Yes
Jenn Sharber	
Todd Brown	Yes, too much traffic. Particularly large commercial vehicles. Slow traffic and far too many accidents.
Rhonda Jamee	
JohnAnn	congestion, especially with new development, especially in McKinney at Hardin and at Tollway
Ellen Latimer	Yes, traffic jams.
Meredith Haynes	
	It is a deathtrap.
Logan	
David Davis	Yes. Major safety and noise concerns
R. Thompson	380 is a very dangerous and also congested road
Bre Ayers	No
Stacy Reed	
	It is too congested, and not enough lanes. Also, the 18 wheelers should be made to go around McKinney, instead of down the congested sections.
Tori Archer	Lights & traffick back up.
Richard Brady	
Kaitlynn Dragoo	
Steven Allen	no
Nancy Labadie	Safety and speed as businesses increase.
Steve DAILY	Dangerous to turn on or off with or without lights. Speed and blind corners throughout McKinney
Elaine Moreland	Way too much traffic!!!!
Stephany Williams	Traffic.
Todd Little	
Pay Armstrong	
Jennifer Rogers	
Kim Lawless	Traffic is horrible

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Tiffani Jones	Airport Freeway to get to 121. Sometimes I don't have a choice other than 380.
William McClellan	
NorrisBroussard	
Travis McDowell	121 or eldorado
Julia Odle	
Benita Elias	I take Virginia Parkway if 380 is congested. Sometimes I take Wilmeth Rd. if I am north of 380.
Jenn Sharber	Preston or back county roads
Todd Brown	yes, Virginia Parkway, White or Eldorado
Rhonda Jamee	
JohnAnn	Virginia Parkway, or Eldorado My son drives to UNT for school: there is no alternate route
Ellen Latimer	Hwy 5, 75
Meredith Haynes	
	FM 546
Logan	Viginia, Eldorado, Hardin
David Davis	Virginia
R. Thompson	I don't
Bre Ayers	El dorado
Stacy Reed	
	I take Wilmeth, or White depending on where I am going.
Tori Archer	Wilmeth & Virginia Pkwy
Richard Brady	
Kaitlynn Dragoo	
Steven Allen	
Nancy Labadie	Virginia or Eldorado
Steve DAILY	Virginia
Elaine Moreland	Unfortunately there are no good viable alternatives, but I sometimes use Eldorado Pkwy just to avoid 380.
Stephany Williams	Wilmeth Road and or White Street
Todd Little	
Pay Armstrong	
Jennifer Rogers	
Kim Lawless	Virginia or Eldorado

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Tiffani Jones	Widen the freeway
William McClellan	Widen it
NorrisBroussard	
Travis McDowell	limited access
Julia Odle	Ideally, more law enforcement. Realistically, I haven't a clue.
Benita Elias	I believe the best solution would be to go north of 380 about 5-10 miles.
Jenn Sharber	
Todd Brown	A McKinney or N. Collin County by-pass
Rhonda Jamee	
JohnAnn	bypass to north
Ellen Latimer	
Meredith Haynes	
	Eliminate "suicide lane"
Logan	
David Davis	Northern routes for the by pass, however the pass should go north at Custer Road instead of Stonebridge to reduce the impacts to existing neighborhoods.
R. Thompson	Other roads elevating traffic for blue Ridge, Nelissa areas.
Bre Ayers	
Stacy Reed	
	A road that goes around the mainly congested part of 380 (from Hwy. 5 to Lake Forest) would be good. There is the Outer Loop road that could be used. It is already partially built. Whatever the road is, it must be north of already built neighborhoods.
Tori Archer	Freeway over business road.
Richard Brady	
Kaitlynn Dragoo	
Steven Allen	Widening 380
Nancy Labadie	
Steve DAILY	Limited access freeway... like 75 through Plano and Richardson
Elaine Moreland	Fly-overs.
Stephany Williams	A loop around McKinney much like Denton did several years ago.
Todd Little	
Pay Armstrong	
Jennifer Rogers	
Kim Lawless	More lanes

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Tiffani Jones	Yes
William McClellan	No
NorrisBroussard	
Travis McDowell	alignment? Like North-South?
Julia Odle	No. Displacing homeowners and businesses will not help.
Benita Elias	NO
Jenn Sharber	No
Todd Brown	No
Rhonda Jamee	
JohnAnn	not sure of question
Ellen Latimer	Yes
Meredith Haynes	
	No
Logan	No, Keep Erwin Park right where it is
David Davis	no
R. Thompson	No
Bre Ayers	No
Stacy Reed	
	I support the building of a freeway, depending on the alignment.
Tori Archer	Yes
Richard Brady	
Kaitlynn Dragoo	
Steven Allen	No
Nancy Labadie	
Steve DAILY	Yes
Elaine Moreland	Yes
Stephany Williams	no
Todd Little	
Pay Armstrong	
Jennifer Rogers	
Kim Lawless	Sure

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Michael Salazar	Frequent congestion at peak traffic times
Katie Buckland	none
Damon Marra	Traffic congestion at the intersection to US 75.
Todd Little	
	380 and 75 area is really congested and the northbound exit is always backed up.
Barbara Zuniga	Yes, it's very loud, extremely congested. I try to avoid it at all costs, except in the middle of the night.
Phillip Jaubert	too many lights
Jill Angell	The worst congestion is usually the 75 interchange. During commute hours the turn from westbound 380 to Airport is bad and the turns at New Hope and Bridgefarmer going East.
Susan Samuel	lots of traffic and very fast driving
Mourier Marc	Too many red lights immediately west and east of 75.
Gary Smith	Yes, heavy traffic, especially trucks
Emily Christensen	It is becoming more and more busy.
Will Sass	Congestion especially crossing US75 but also west to I35
John McAllister	
Eric Petersen	yes speed that people travel and the number of lights and access points
Jill	
LeAnn Smith	Yes businesses built right on top of 380 allowing zero room for expanding.
Kendon Armstrong	
Prince Aryee	Area is out growing the current infrastructure.
	Traffic congestion at Hwy 75
Dale L. Huffman	road noise, property values diminshed
Randy Way	Too many resi lights, ruins the flow of traffic.
Kevin Campbell	NO
Ronald Jordan	Yes. We have lived in McKinney for 10 years and the amount of traffic has increased significantly and continues to increase. Many new signal lights have been added between McKinney and Denton during that time. With all of the new development and increase in population, the increased traffic causes gridlock along 380 more and more often.
Kevin Campbell	NO

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Michael Salazar	121 or surface streets
Katie Buckland	Virgina
Damon Marra	Stacy Road or Virginia.
Todd Little	
	Wilmeth or louisiana
Barbara Zuniga	I'm at Hardin and Buchanan, in President's Point subdivision. I take Taylor Burke to the 75 service road, then turn left or right on 380 if I need to visit a business there. When I can, I avoid 380 completely by making a u-turn at 75 and traveling up the service road and then cutting to the right. (For example, to get to Walmart or Sam's Club.) If I need to travel all the way to McDonald St, for example, I take Taylor Burke to Community to Wilmeth and drive all the way up.
Phillip Jaubert	Virginia, Eldorado
Jill Angell	Airport to 121 or Eldorado going South or West, 5 to Wilmeth going North.
Susan Samuel	Virginia
Mourier Marc	I have no alternatives
Gary Smith	Eldorado or Fish Trap
Emily Christensen	I take 164 to Wilmeth.
Will Sass	Us 82 121
John McAllister	
Eric Petersen	not a lot of choices
Jill	
LeAnn Smith	Depends if traveling east or west. Usually eldorado,Virginia or CR 428
Kendon Armstrong	
Prince Aryee	None, I do not have any other route. Currently we seat in traffic and wait.
Dale L. Huffman	Custer to SRT
Randy Way	Virginia and Wilmeth
Kevin Campbell	Ridge, Lake Forest, Hardin
Ronald Jordan	There is not a good east/west alternative route between McKinney and Denton that is direct and with shorter travel time.
Kevin Campbell	Ridge, Lake Forest, Hardin

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Michael Salazar	
Katie Buckland	A freeway design that is cantilevered or depressed with minimal R.O.W. A bypass as far east of the Tucker Hill housing development
Damon Marra	Some kind of dedicated onramp to the highway, perhaps?
Todd Little	
Barbara Zuniga	I have no idea how to solve the problem, but STOP MAKING THE PROBLEM WORSE; stop bringing in new businesses on 380! For example, all the businesses about to open at Hardin and 380. Who okayed this fiasco??? What businesses in their right mind would want to move to that location?
Phillip Jaubert	double deck
Jill Angell	I like the blue options off the existing path, with the addition of the yellow section at New Hope and either of the freeway connections down to the 121 interchange which keeps commuters out of the middle of town.
Susan Samuel	widening and not so many businesses
Mourier Marc	Build a full blown highway with no lights
Gary Smith	Northern routes
Emily Christensen	I like the bypass idea depending on placement.
Will Sass	Overhead from Hardin to Hiway 5. Maybe make it a toll.
John McAllister	
Eric Petersen	limit access points and get rid of lights
Jill	
LeAnn Smith	Expand by building up like y'all did to 121 10 years ago.
Kendon Armstrong	
Prince Aryee	Extending the roads to accommodate the current/ anticipate development.
	Bypass
Dale L. Huffman	
Randy Way	Elevated highway between 35 & 75
Kevin Campbell	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Ronald Jordan	New construction on a bypass route might be cheaper and less disruptive than trying to make the existing 380 alignment an expressway by adding a lot of overpasses and underpasses.
Kevin Campbell	NONE

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Michael Salazar	No
Katie Buckland	no
Damon Marra	No, it needs to be carefully planned so as not to destroy the communities nearby to the highway. We don't want to repeat the mistakes of redlining back in the 50's and 60's.
Todd Little	
Barbara Zuniga	Not sure what that that could possibly mean.
Phillip Jaubert	yes
Jill Angell	Yes, something has to be done. I prefer the options that impact the fewest homes and businesses.
Susan Samuel	I support the freeway where it has the least impact on residents
Mourier Marc	Yes
Gary Smith	Yes
Emily Christensen	As long as the alignment has minimal property loss.
Will Sass	Not necessarily, I do not support runners h it through or over residential areas
John McAllister	
Eric Petersen	yes
Jill	
LeAnn Smith	If expanding up sure. If tearing through homesteads and nature parks then hell no
Kendon Armstrong	
Prince Aryee	I support building the infrastructure to relief traffic.
	Yes
Dale L. Huffman	No
Randy Way	No, 380 need to be improved
Kevin Campbell	NO
Ronald Jordan	Yes, definitely.
Kevin Campbell	NO

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Scott				Nearby resident		Monthly

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
LeAnn Smith	Businesses are built right on top of road leaving no room for expanding.
Erik Sampsel	Development will create havoc on road congestion
Diana Falcon	Traffic, accidents
Jeff Walker	yes
Charles	
Paul Campbell	lights need to be synchronized
Steven Puskas	No
Amanda Holmes	Countless accidents. It's a very dangerous highway with high speeds for all of the residential areas/businesses that are being put in. With all of the housing additions going up in Princeton, it's going to be hat much worse.
Eric Sweet	It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.
Stacy Powell	
Brian Sweet	It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.
Allan Parker	Too congested
Myra	Too much construction
Catelyn Marie Carpenter	Trucks and hazardous material . Speeding
Robert Chisholm	To much traffic, should be a limited access highway
Sara Brice	Speed limits, bad driving, too crowded.
Stephanie Weyenberg	Safety in the sections that do not have divided medians and still have a center turn lane, lack of deceleration turn lanes, 18 wheelers that frequently run red lights, and the mess that is the 75/380 exchange.
Greg Sweet	It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.
Christopher Weiss	None
Kevin Barnett	
Deanna Angell	
scott Chidester	Too many traffic lights!
Robert Dreffs	No
Anita Watkins	Increasingly busy, congested. Large proportion of cement trucks and similar work vehicles that travel at speeds above the limit. Long waits at traffic lights.
Cara Bonney	Lots of lights making slow
Scott	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
LeAnn Smith	Depends if going east or west. Usually eldorado, Virginia or county road 428
Erik Sampsel	El Dorado, Sam Rayburn Tollway
Diana Falcon	South on lake Forrest and 121
Jeff Walker	virginia, eldorado, or 121
Charles	
Paul Campbell	Hardin, Ridge or Stonebridge
Steven Puskas	
Amanda Holmes	Sometimes I will gonup Bethany through Lucas. But, that area is becoming just as bad.
Eric Sweet	Multiple side roads to get to 75 from Custer Road area.
Stacy Powell	Virginia Parkway, White to I-75
Brian Sweet	Multiple side roads to get to 75 from Custer Road area.
Allan Parker	75 & 121
Myra	Waddill
Catelyn Marie Carpenter	I have no alternative
Robert Chisholm	Preston to 455.
Sara Brice	121, virginia, el dorado
Stephanie Weyenberg	Wilmeth to county roads or Virginia Parkway.
Greg Sweet	Multiple side roads to get to 75 from Custer Road area.
Christopher Weiss	Virginia
Kevin Barnett	Rockhill Road, El Dorado
Deanna Angell	Back roads
scott Chidester	
Robert Dreffs	City streets. Virginia Pkwy, etc.
Anita Watkins	Lake Forest to Eldorado to 75.
Cara Bonney	None
Scott	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
LeAnn Smith	I guess build it up like y'all did 121 about 10 years ago.
Erik Sampsel	I have no problem if they widened it
Diana Falcon	Expansion
Jeff Walker	no bypass, finish wilmeth, bloomdale, laud howell and the outer loop
Charles	
Paul Campbell	go further North off of Central
Steven Puskas	
Amanda Holmes	There definitely needs to be some type of intersection barriers or protected turn lanes. Ideally, a turning into an actual "highway" with service roads would be the best solution.
Eric Sweet	Limited access freeway with 3 lanes in each direction so as not to disrupt and homeowners and business owners.
Stacy Powell	
Brian Sweet	Limited access freeway with 3 lanes in each direction so as not to disrupt and homeowners and business owners.
Allan Parker	Widening it
Myra	No suggestions
Catelyn Marie Carpenter	roundabouts, Intellegent lights, and removal of trucks
Robert Chisholm	Make a east west bypass north of current 380
Sara Brice	more lanes, wider lanes, better signage
Stephanie Weyenberg	I would like to see the current footprint of 380 converted to a limited access roadway. The quickest route between two places is a straight line.
Greg Sweet	Limited access freeway with 3 lanes in each direction so as not to disrupt and homeowners and business owners.
Christopher Weiss	A freeway design that is cantilevered or depressed with minimal ROW. A bypass that is as far west as possible from the Tucker Hill housing development.
Kevin Barnett	
Deanna Angell	
scott Chidester	Better intersections with on ramps and bridges.
Robert Dreffs	Overpasses at intersections.
Anita Watkins	
Cara Bonney	
Scott	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
LeAnn Smith	If expanding yes, if tearing through homesteads and parks then hell no.
Erik Sampsel	Not if it destroys open spaces or affects the tranquility of Erwin Park
Diana Falcon	Yes
Jeff Walker	NO
Charles	
Paul Campbell	NO
Steven Puskas	
Amanda Holmes	Yes
Eric Sweet	100% against the by-pass options. Limited access on existing 380 foot print with minimal impact on Tucker Hill since it is the narrowest part. Sunken freeway with cantilevered access roads.
Stacy Powell	no
Brian Sweet	100% against the by-pass options. Limited access on existing 380 foot print with minimal impact on Tucker Hill since it is the narrowest part. Sunken freeway with cantilevered access roads.
Allan Parker	Yes
Myra	Yes
Catelyn Marie Carpenter	NO
Robert Chisholm	Yes
Sara Brice	yes
Stephanie Weyenberg	NO, I do not support a freeway that would include a bypass in NW McKinney. I would rather see 380 become our version of NW Highway and have the Outer Loop expedited than see a bypass that was planned at least a decade to late to be effective.
Greg Sweet	100% against the by-pass options. Limited access on existing 380 foot print with minimal impact on Tucker Hill since it is the narrowest part. Sunken freeway with cantilevered access roads.
Christopher Weiss	No thank you.
Kevin Barnett	Yes
Deanna Angell	
scott Chidester	No
Robert Dreffs	No
Anita Watkins	Yes
Cara Bonney	No.
Scott	Not if the alignment disturbs other things such as Erin patk

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jim Reinarz	
Rick Downing	Yes, it is a dangerous road with drivers believing it's a 6 lane superhighway between 75 and the Dallas North Tollway, driving at speeds in excess of 75 mph only to come upon stoplights. The elevation at Preston Road makes sense and should likely be done on the entire path from 75.
Mike Placke	It is getting more congested, but still manageable now. With the new growth being built it is going to be very difficult.
Greg Fleming	capacity has not kept up with growth
Linda Oaks Garrett	Needs more lanes
Chris Curran	It does get very congested at 75
Brack Salyer	
Tyler Kenealey	Safety
	Yes. It's dangerous
Alexis Jacobs	
Ames Goodyear	Yes.
Eric Wolf	It has been proven that no matter what you do to the existing routes they will become congested again. You need to change the way you are building roads. Too many lights and poor light timing.
Jeremy Richmond	No concerns west of Hardin.
James Burnett	
victor long	
Annette Zimmer	Very busy and too small to handle traffic
Ashfia Salemin	Yes, it is getting really crowded, needs to make it a freeway.
Bogdan Djurdjulov	Yes, major concerns with loss of homes, devalued property values, noise, air pollution, congestion, and elimination of safe access to walking and biking paths
Lisa Scheffler	Traffic at 75 and 380
Melody Robinson	yes, at 75 and 380 is always congested
Glenda Smith	Congestion on 380
Kenneth wagner	No
peggy djurdjulov	Yes, major concerns with loss of homes, devalued property values, noise and air pollution, congestion, and elimination of safe access to walking and biking paths
Holly Whitt	It makes me nervous. Fast.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jim Reinarz	
Rick Downing	There is not really an alternative if your trying to get from 75 to Denton. 121 heads too far south.
Mike Placke	Virginia Pkwy
Greg Fleming	none
Linda Oaks Garrett	Back roads
Chris Curran	Virginia or exit north
Brack Salyer	
Tyler Kenealey	121 or El Dorado
	Not many alternatives. Rockhill/Virginia Parkway. Prosper trail
Alexis Jacobs	
Ames Goodyear	Side streets
Eric Wolf	
Jeremy Richmond	
James Burnett	121 (Sam Rayburn tollway)
victor long	
Annette Zimmer	Virginia- also congested
Ashfia Salemin	Virgina or El Dorado
Bogdan Djurdjulov	Tucker Hill is locked in by US 380 being the only exit from our community. We must take it regardless of any other route we may later take.
Lisa Scheffler	Eldorado
Melody Robinson	community street to white
Glenda Smith	Taylor-Burk Drive to 75 or Taylor-Burk to Community to White to 75
Kenneth wagner	
peggy djurdjulov	Virginia Parkway, White Ave., Hardin, S, Coit, Independence
Holly Whitt	Eldorado

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jim Reinarz	
Rick Downing	Removing stoplights with elevation would help a lot. With the anticipated growth, extra lanes may very well be needed as well. An additional loop from the DNT to HWY 35, north of Denton, would be useful as well.
Mike Placke	Yellow Route
Greg Fleming	widening like 121
Linda Oaks Garrett	Build more E W roads
Chris Curran	A bypass would be fine as long as it doesn't interfere or infringe on Erwin Park
Brack Salyer	
Tyler Kenealey	Continue making it a freeway
	Limited access highway from W side of Denton County to est side of Collin County
Alexis Jacobs	
Ames Goodyear	
Eric Wolf	
Jeremy Richmond	I do not support a bypass. I would suggest additional lanes or converting to a freeway with ultra-narrow design in certain spots.
James Burnett	
victor long	
Annette Zimmer	
Ashfia Salemin	More lanes.
Bogdan Djurdjulov	No bypass. Reduce speed limits and provide better monitoring and segregation of truck traffic to righthand lanes. And if a bypass is the only option, Tucker Hill's position is NO to all current alignments due to reasons listed previously. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Lisa Scheffler	A ramp over 75
Melody Robinson	make it larger
Glenda Smith	Yellow Line
Kenneth wagner	Leave it the way it is
peggy djurdjulov	No bypass. Reduce speed limits and light compliance and provide better monitoring and segregation of truck traffic to righthand lanes. And if a bypass is the only option, Tucker Hill's position is NO to all current alignments due to reasons listed previously. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Holly Whitt	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jim Reinarz	No
Rick Downing	While I believe the Blue alignment shown on the following page is the most logical on the map, it may not be in terms of disturbing nature or existing homes/businesses. The least harmful would make the most sense.
Mike Placke	No. Freeways tend to cut areas and isolate communities.
Greg Fleming	no. keeping it in the same location is the only option
Linda Oaks Garrett	No
Chris Curran	Not st the expense of Erwin Park
Brack Salyer	
Tyler Kenealey	
	Yes
Alexis Jacobs	
Ames Goodyear	
Eric Wolf	No
Jeremy Richmond	No, alignment is the most critical part. I support making a freeway with a much narrower ROW where desired. There are places where a 400' wide ROW (right of way) is not a problem. In front of Tucker Hill is not one of those places. I propose a 200' ROW max in front of Tucker hill starting from the existing sound wall on the south side. See the intersection of Dallas North Tollway and Beltline road. That ROW is 205' including 3 lane service roads and a turning lane. A 400' ROW is unacceptable in front of Tucker Hill.
James Burnett	
victor long	
Annette Zimmer	Yes
Ashfia Salemin	Yes, I would love a freeway connection with I-35.
Bogdan Djurdjulov	NO. Absolutely Not.
Lisa Scheffler	no
Melody Robinson	no
Glenda Smith	Yes
Kenneth wagner	No
peggy djurdjulov	NO. We purchased this home at this location with 380 at its current distance from our house. - no real effort has been made to enforce speed and light compliance - try that FIRST. Your unfortunate lack of planning now puts our home, our investment, our health, and our peace and quiet at jeopardy. Could TxDot and Mckinney make it any harder to access walking and bike paths - the answer is no, in fact this proposal makes it worse.
Holly Whitt	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Ernest Smith	380 congestion
Tom Polston	slow and congested, avoid during early late hours of day
Sam Dunn	Increased commercial development along the highway will slow traffic.
Angel Velarde	the center of the way is not separated and in some places it could be confusing for the drivers.
Kimberlee Greider	No, maybe semis should stay off as it is residential through our portion, neighborhoods, schools, church access, etc
Heather Hamilton	There are accidents daily. During rush hour there is so much congestion and the alternate routes are under construction at this time.
Darby Stewart	Lights, too many cars
Laura Donahue	All the new building along Rt 380 in the McKinney area is causing a tremendous amount of additional traffic.
Danielle Cameron	Too Narrow heading east into Collin Co.
Goran Petrovski	No
Monica McClellan	
Misti Reed	
Wade J Darbonne	No
Amanda Archer	No
Brandon	
Tracy Orchowski	No. Leave it alone. We don't want a freeway impacting our homes and property with noise or ruining our nature.
Amanda Archer	
Misty Irby	Yes
Greg Herbst	no
Clinton Fisher	
	unsafe
William Bednarz	yes - it is over populated now between Central and Ridge
Kayla Romine	Traffic and frequent stops make it hard to get anywhere
Bradam-Reavis	Too many trucks.
CHAITRALI CHANDORKAR	
Mike Miller	
Andrew Harsch	
Kathy L Smith	Too many large tractor trailers and commercial vehicles which make unsafe for commuters.
Emilio Garcia	traffic
Justin	Mostly the frequent lights on the west side of 75
Susan Holdrich	Speed is way to fast with this amount of traffic, especially when you are making a turn into our neighborhood from 380.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Ernest Smith	Taylor-Burk Drive and 75
Tom Polston	Virginia Pkway
Sam Dunn	Virginia Parkway, Stacy Road
Angel Velarde	121
Kimberlee Greider	
Heather Hamilton	CR 337 to 2933 to 331 to hwy 5
Darby Stewart	121
Laura Donahue	Virginia - but that is currently even worse.
Danielle Cameron	Preston to Eldorado - Little Elm Bridge into Corinth and 35E north into Denton for Work.
Goran Petrovski	Virginia or Eldorado
Monica McClellan	
Misti Reed	
Wade J Darbonne	White or Virginia Parkway into McKinney. 121 into Denton.
Amanda Archer	Custer
Brandon	
Tracy Orchowski	
Amanda Archer	
Misty Irby	Hwy 121 or US 75
Greg Herbst	n/a
Clinton Fisher	
	don't take any
William Bednarz	have not found too many
Kayla Romine	121 or eldorado
Bradam-Reavis	Custer to Hwy 121
CHAITRALI CHANDORKAR	
Mike Miller	Virginia Pkwy
Andrew Harsch	
Kathy L Smith	There are not really many east & west in the mckinney area.
Emilio Garcia	Virginia
Justin	There really arent many that I know of.
Susan Holdrich	There is zero alternatives from Ridgecrest neighborhood.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Ernest Smith	Prefer the yellow line route
Tom Polston	Keep trucks to one lane
Sam Dunn	Need an alternate route on the north side of 380
Angel Velarde	similar to 121
Kimberlee Greider	
Heather Hamilton	
Darby Stewart	Not to invade Erwin park it's beautiful and peaceful and no place in the area like it., build to accommodate not the current growth but future.
Laura Donahue	a loop branching off Preston and reconnecting with 380 on the far east side of McKinney would probably keep all through traffic going around.. leaving 380 for residents and internal traffic.
Danielle Cameron	Build a Toll Road somehow.. above it or something...
Goran Petrovski	None! Widen it & leave it alone.
Monica McClellan	
Misti Reed	
Wade J Darbonne	Improve the light layout and traffic flow at 75/380, but otherwise leave as is.
Amanda Archer	
Brandon	
Tracy Orchowski	If a bypass is necessary, build it where there aren't existing homes near the DNT entrance. Don't disrupt homeowners land and property by putting a noisy freeway in a residential area. Property values will go down.
Amanda Archer	
Misty Irby	More lights and underpasses.
Greg Herbst	large bypass several miles north of 380
Clinton Fisher	
	I support the freeway option as long as it doesn't send routes through heavily populated residential areas on Ridge and Stonebridge Drive.
William Bednarz	Maybe a HOV lane
Kayla Romine	
Bradam-Reavis	Develop a loop around the far north part of McKinney, avoiding existing homes.
CHAITRALI CHANDORKAR	
Mike Miller	
Andrew Harsch	
Kathy L Smith	Create a commercial route to move all the big trucks off existing 380 or vice versa. Create multiple east- west 4 lane options, but still separate commuters and passenger vehicles.
Emilio Garcia	expanding
Justin	If a "bypass" is made. I would like to request that it avoids the Erwin Park trails and parks area. This is a fantastic attribution to the Mckinney area. Would hate to see it go due to a road...
Susan Holdrich	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Ernest Smith	Yes
Tom Polston	yes
Sam Dunn	Unsure
Angel Velarde	yes
Kimberlee Greider	No I do not support the freeway regardless of alignment, this is too residential of an area. Too many neighborhoods, children on bikes, going to and from school.
Heather Hamilton	Yes
Darby Stewart	Not near Erwin park, May be one further north with no lights
Laura Donahue	no
Danielle Cameron	YES
Goran Petrovski	No
Monica McClellan	
Misti Reed	
Wade J Darbonne	No
Amanda Archer	No no no
Brandon	
Tracy Orchowski	No.
Amanda Archer	
Misty Irby	No. Not if tolls are involved.
Greg Herbst	no
Clinton Fisher	
	See above.
William Bednarz	yes
Kayla Romine	
Bradam-Reavis	Yes, but only if it does not disrupt existing homes and families.
CHAITRALI CHANDORKAR	
Mike Miller	No
Andrew Harsch	
Kathy L Smith	To grow and be able to drive, we have to! For anyone misplaced give them FMV PLUS 35%. It's not just the $$$ cost, but memories and intangibles that you cannot ever put a price on.
Emilio Garcia	no
Justin	Not really... To be honest... I think if eminent domain is necessary for this to happen, I would disagree entirely.
Susan Holdrich	No.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jeff Miller	
Alex Mathis	It is very prone to congestion, and has too many stoplights
Jeff Halsey	The frequent stops hurts potential traffic through the area.
Sharron Edwards	From Farmersville, TX to Denton, TX Hwy. 380 is extremely congested. New housing developments are being built west of Hwy. 75 all along Hwy. 380 to Denton, TX. This will only add to the congested area. Hwy 380 needs to be at least 6 lanes in both directions as a major thoroughfare.
	Too crowded
MJ Roark	Need more lanes.
DWIGHT G GARRETSON	
Leonard Osborn	Currently theres too much speeding.
Kenneth Cole	Yes, there needs to be a northern bypass.
O. David DeRossett	Even with recently added lanes U.S. 380 is one of the most congested roads that I've ever seen. When all of the new neighborhoods and businesses currently under construction are completed it will be a nightmare. There are more traffic lights on U.S. 380 now between U.S. 75 and Denton, TX than I have ever seen on a multi-lane U.S. "through" highway.
Betty Buckland	Unsafe
Ryan Carpenter	speeding cars and distracted drivers, trucks
Tom Patrick	Yes. It cannot effectively handle today's and the immediate future's traffic which is inundated with trucks and traffic lights.
Ireneusz Burski	
Mark Montgomery	
Melanie King	380 can not handle the congestion with the current number of people living off it and the decisions made about the road don't make any sense.
J.D. Kennedy	Yes.
Carlenya Veasley	Traffic during rush hours in the morning and after work.
Lisa Hammond	Many, many red lights. A lot of gravel hauling large trucks. This road is very dangerous due to the amount of trucks.
Douglas King	Too much congestion and too many traffic signals.
Kendra Taliaferro	yes, the future growth of North McKinney and Prosper are going to be an issue with traffic on 380.
Steven Staton	Extraordinarily dangerous road thanks to congestion, traffic lights and posted limits. It desperately needs to be a six or eight lane highway instead of a four lane local road.
Claudio LoCicero	It is relatively congested.
Patrick LaCour	Traffic level and light metering make it a road to avoid when possible
DONNA BAKER	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jeff Miller	428
Alex Mathis	Taylor Burke
Jeff Halsey	Side streets that run parallel to the south.
Sharron Edwards	There are no better alternative routes say from McKinney to Farmersville or from McKinney to Denton.
	Virginia Pkwy
MJ Roark	Virginia
DWIGHT G GARRETSON	Virginia Parkway
Leonard Osborn	None sometimes 380 is the only way
Kenneth Cole	I take Community to Wilmeth, then to highway 5. Hardin or Lake Forest to Eldorado.
O. David DeRossett	White Ave. when travelling East and Virginia St. when travelling East or West
Betty Buckland	I don't take alternative routes as this hasn't been an option.
Ryan Carpenter	None. Patiences
Tom Patrick	Residential roads both east and west. Going East to Highway 5 and West to the DNT.
Ireneusz Burski	Virginia
Mark Montgomery	
Melanie King	there is no alternative route for me to take
J.D. Kennedy	Depends on where I'm going.
Carlenya Veasley	720 to Eldorado
Lisa Hammond	south through Little Elm on El Dorado parkway.
Douglas King	
Kendra Taliaferro	Virginia Prkwy.
Steven Staton	Locally, White St., and Virginia Parkway.
Claudio LoCicero	Will take Virginia Pkwy for as much as possible, when necessary.
Patrick LaCour	I typically travel in town and use White, Virginia, Eldorado, or Wilmeth avenues, depending on my final destination. When traveling East I use Eldorado and Airport, when traveling West, I use either 121/SRT, Eldorado, or Virginia, depending on distance.
DONNA BAKER	ElDorado

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jeff Miller	
Alex Mathis	Lights based on the current flow of traffic, overpasses for busier intersections.
Jeff Halsey	1) Avoid the Red and Blue paths to minimize impact to Erwin Park and the DORBA trails there, as there are precious few options for those of us that appreciate exercising in nature riding on dirt paths! The next closest options for us are already way out in Frisco or Flower Mound!! 2) Stick to the established path that 380 is on. 3) Have a plan for all of the truck traffic heading east/west. Having driven to/from Arkansas, it seems there is more big rigs on it than sedans.
Sharron Edwards	I believe Hwy 380 needs to be expanded to 6 lines in either direction.
	Raised Highway over exisiting 380
MJ Roark	Double deck freeway
DWIGHT G GARRETSON	Alternate Freeway
Leonard Osborn	Make it a toll road
Kenneth Cole	The northern bypass.
O. David DeRossett	An additional multi-lane controlled access mostly elevated highway through many congested areas.
Betty Buckland	I do not want traffic routed through Ridge or Stonebridge Drive. They are both heavily populated areas and increasing traffic would be dangerous for families/pets. I do support a freeway option if this doesn't propose increasing routes through these populated suburban areas.
Ryan Carpenter	readdress speed limit and truck traffic Hazardous material
Tom Patrick	A direct freeway similar to SRT i.e 121. I understand the disruption while construction is in progress but a direct line for traffic once completed will be the best approach.
Ireneusz Burski	Do the north bypass
Mark Montgomery	
Melanie King	add lanes however do it smarter, which doesn't seem to be happening now.
J.D. Kennedy	Build a freeway.
Carlenya Veasley	I'm not sure.
Lisa Hammond	A freeway situation with exits to access the numerous neighborhoods that have been developed along this corridor. There is also a new large school on 380 - it is unsafe for children to attempt to cross 380!!! A freeway with exits would provide greater safety to this school and the neighborhoods.
Douglas King	
Kendra Taliaferro	Compromise between the citizens and TXDOT
Steven Staton	Replace with modern divided highway, preferably not 100% toll.
Claudio LoCicero	It needs to become more of a Freeway...without lights except on the intersections for the access roads on either side of a freeway.
Patrick LaCour	A freeway makes sense, and one that bypasses current congestion and businesses (except with a business loop) makes most sense to me. The intersection with Hwy 75 should be via ramps and not through intersections.
DONNA BAKER	perimeter hwy

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jeff Miller	No, not regardless. I think 380 needs to stay in its current configuration and widened as best as possible.
Alex Mathis	Yes, it seems inevitable
Jeff Halsey	I see the need for it to help the expansion of the area, but fear that because traffic would divert to it, it would become a main artery in the area and would quickly get used heavier than what is being planned for.
Sharron Edwards	Yes
	Not necessarily
MJ Roark	Yes
DWIGHT G GARRETSON	Yes
Leonard Osborn	NO
Kenneth Cole	Yes.
O. David DeRossett	It would seem to be necessary. It should also incorporate an elevated public transportation system. Good examples are used at Walt Disney World.
Betty Buckland	No
Ryan Carpenter	no
Tom Patrick	Yes, freeway traffic is the best alternative.
Ireneusz Burski	Yes
Mark Montgomery	
Melanie King	there is no yes or no to this question, it would depend on the proposal and the cost to residents
J.D. Kennedy	Yes.
Carlenya Veasley	yes
Lisa Hammond	Yes!
Douglas King	Yes.
Kendra Taliaferro	No
Steven Staton	In most cases, especially if built on the existing footprint (model it after I-35 in downtown Austin, for example).
Claudio LoCicero	Yes!!!
Patrick LaCour	I question the viability of pink and green alignment as a freeway, and know it would likely be a horrible mess during construction.
DONNA BAKER	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
James Schwartz	No
Holly	No
Jose Torres	Traffic is always backed up, mainly on 380 and 75
Erik Johnson	Too many lights. You used to be able to get to Denton in 35 minutes or less, now it's way too congested and I've heard the improvements are being done by the NTTA which already takes over $1200.00 from me a year.
Andrea Bell	
Debbie Wilson	There is entirely too much traffic and bad accidents on this roadway. The load of traffic is more than the road can handle.
Jack William Matz Jr	Too many lights and very congested. Truck traffic Is extensive
Janis Shard	Yes, with new shopping centers (McKinney area) the traffic flow pattern will shift again, I admit I have not studied to see if right turn lanes into these facilities have been added as an easement to the main traffic flow lanes, if not they should be considered and added
Elmer Schenk	slow to get from Mckinney to Denton
Steven Spainhouer	yes- traffic congestion
Joy Watkins	
Lori Abajian	No, I believe during the times that I use 380 there is not much traffic. The only issue I have is the big trucks driving fast and weaving in and out of traffic.
Denise Bordelon	I have commuted from McKinney to Denton for the last 7 years and it has increasingly gotten more hazardous particularly in the vicinity of the new Denton High School through TX FM 423. Additionally, there is significant congestion at the North Dallas Tollway intersection
Steven Spainhouer	Yes
Brandon Fulenchek	Yes, safety and congestion.
Paul Alwardt	It is crowded inside the city limits and too many vehicles that speed on this road in the more rural areas.
Jill Allison	No
T.J. Cook	
Matthew Leavell	Traffic is ridiculous at the intersection of 75 & 380 anytime during the day. Also trading is starting to get particularly bad between Ridge to Community.
James Holman	
Angela Sherer	Yes, it seems unable to handle the amount of increasing traffic, there are frequent auto accidents, etc. I think US 380 should be a freeway, like 75 or 635 in Dallas, or a tollway. At the very minimum, I think overpasses for major intersections should be put into place (grade separated intersections), but that's really just a temporary fix because the traffic is going to keep increasing.
Christopher Brady	Yes, it's dangerous.
Barbara Adams	Congestion, large commercial vehicles and the speed at which they go thru congested area. Hard to get in and out of businesses along the route. The traffic lights do not appear to be timed right. With the new businesses going in at Hardin and 380 it will only get worse.
Jackie K Sternfels	
Alexandra Vargas	No
Todd Christie	Way too congested at 75. Should be more of a city parkway than a highway for truck traffic or loop traffic.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
James Schwartz	Virginia and Eldorado
Holly	Haven't had a problem with traffic
Jose Torres	Virgina or white.
Erik Johnson	Virginia to 380 or Sam Rayburn to 35
Andrea Bell	I take the back roads. I wish those roads were in better shape. Most of them are full of potholes.
Debbie Wilson	
Jack William Matz Jr	121
Janis Shard	Depend on Waze to work around
Elmer Schenk	That's the problem, no choice to get to Denton
Steven Spainhouer	Back roads
Joy Watkins	Virginia, Eldorado
Lori Abajian	
Denise Bordelon	US 380 to FM 720 to El Dorado Pkwy to FM 423 to Panther Creek Pkwy to DNT to Rockhill Pkwy
Steven Spainhouer	Backroads
Brandon Fulenchek	Virginia, eldorado, 121..traveling east from the tollway.
Paul Alwardt	Virginia Parkway
Jill Allison	Whatever google maps tells me to take
T.J. Cook	
Matthew Leavell	Virginia or 1461 if possible
James Holman	
Angela Sherer	I often take Rock Hill across Frisco to/from Preston and the DNT instead of driving across 380. I also go south and take Eldorado sometimes.
Christopher Brady	Stacy or SH121
Barbara Adams	Wilmeth if I am going east or to 75, or take Hardin down to Virginia.
Jackie K Sternfels	
Alexandra Vargas	
Todd Christie	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
James Schwartz	Making a loop north of 380 from 75 to the Dallas North Toll way
Holly	Haven't seen issues here
Jose Torres	Add a back road highway that connects east McKinney to DNT
Erik Johnson	Overpasses that bypass the traffic signals.
Andrea Bell	
Debbie Wilson	Looping north of the McKinney area. We already have George Bush Tollway in the southern part of the county, need one in the north.
Jack William Matz Jr	Make it an outer loop Around DFW
Janis Shard	Additional study for alternative transit options (rail etc)
Elmer Schenk	Outer Loop
Steven Spainhouer	Bypass
Joy Watkins	
Lori Abajian	I believe a freeway from DNT to 75 through the Prosper area would be good
Denise Bordelon	Please consider an I35 to I75 toll road option between Denton and McKinney.
Steven Spainhouer	Tunneling under the section in the highest density areas
Brandon Fulenchek	Build a freeway that bypasses current businesses and heavily populated residential areas.
Paul Alwardt	Some overpasses at intersections with three lane cross streets.
Jill Allison	Widen the highway, but keep it where it is!
T.J. Cook	
Matthew Leavell	Build freeway similar to 121 from the DNT to 75. With frontage/service roads for exits on side
James Holman	
Angela Sherer	Make 380 a freeway (raised, limited access freeway with on/off ramps and service road) or tollway. I am not opposed to the by-pass with the current proposed alignments, but request consideration of the impact of the proposed by-pass on First Street, Prosper Trail, and Frontier Parkway in Prosper due to possible "cut through" traffic.
Christopher Brady	Freeway, or rt turn lanes to access local businesses along 380 between I-75 and Preston Rd. as well as a concrete median
Barbara Adams	It would be good to finish out Wilmeth to the West and Hardin to the North, to allow alternate routes. Turn lanes are an excellant way to keep the traffic flowing. The blinking turn arrows were also a great idea. They are underused because I don't think many people understand them. Maybe some public info adds might help get the word out.
Jackie K Sternfels	
Alexandra Vargas	
Todd Christie	Build a loop north of Mckinney

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
James Schwartz	No
Holly	No
Jose Torres	Yes!
Erik Johnson	Yes
Andrea Bell	
Debbie Wilson	No - alignment does matter
Jack William Matz Jr	Yes
Janis Shard	It is clear the increase of people in the area will need a solution. It will be difficult to come up with a solution everyone is happy with, the more you build to the North the more it will grow so finding a balance to maintain current dedicated open space (Erwin Park) and what the increased traffic will have on the ecosystem should be a priority. Besides a highway solution are there other considerations for alternative transportation and tying into rail systems? Less reliance on highway and better transit options?
Elmer Schenk	yes
Steven Spainhouer	Yes
Joy Watkins	No
Lori Abajian	Not where 380 is but in the area north of 380
Denise Bordelon	YES
Steven Spainhouer	Yes
Brandon Fulenchek	Yes
Paul Alwardt	Yes
Jill Allison	No
T.J. Cook	
Matthew Leavell	Yes.
James Holman	
Angela Sherer	I support building a freeway or a tollway, whichever gets the biggest improvement for traffic and future capacity done. However, I'm opposed to any change in the proposed alignments that brings a by-pass or major traffic west of Custer Road as it reconnects to 380.
Christopher Brady	Yes, I believe that will help for future growth in traffic and make 380 safer.
Barbara Adams	Full disclosure has not been provided setting out what the "freeway" comprises so I am not able to answer the question.
Jackie K Sternfels	
Alexandra Vargas	
Todd Christie	no

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Divakar Kamath	Waiting every day for a major disaster to happen at 380 and Tremont. Warn all family members to watch out for speeding cars and drivers running thru red light. Almost an accident per week.
Kay Bly	Yes, too many 18-wheeler trucks and increasing accidents.
Ashley Cleveland	
Ann Marie McCarthy	YES The speed limit is excessive. The truck traffic is a total free for all - any weight, size, traveling at speeds in excess of 65mph, moving in,out, and across all lanes of the road with little regard to vehicles trying to share the road.
Kiley fugate	The speed limit and no light at auburn hills subdivision.
Miller	My concern is that 380 can get very congested. It also has too many stop lights.
Josh	Traffic
Eric Beeby	Yes - it is becoming a multiple lane scar and barrier cutting across Collin County
Kacey Royer	Lights timed horribly. Terrible traffic on 380. Time consuming to get anywhere. Accidents.
Alicia Akins	YES! way too many trucks and traffic, people not paying attention, more development will equal heavier congestion
John Curran	Very congested, increasing speeders, stop lights cause issues....people aren't paying attention and they speed up and have to slam on their brakes...
Baron Truesdell	1) 75 & 380 congestion. 2) lights not synchronized for be the flow.
Michael Burridge	No emergency lane on either side of the roadway. Any accident, collision, stalled vehicle causes major congestion
Adam Perkins	
sharon apligian	
Sarah Chastain	Many. Poorly timed lights, too much congestion, far too many accidents (probably due to the above).
Ann Hiner	Traffic is ridiculous at 380/75 and 380/DNT
	Speeding and texting and driving causes most of the accidents on 380

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Divakar Kamath	Ridge or Stonebridge or Custer
Kay Bly	I don’t because I have to use 380 to get to my home.I would like
Ashley Cleveland	
Ann Marie McCarthy	None. Travel it daily without congestion. If anything I take alternate route to avoid the speed and the unsafe travel of the trucks. Stonebridge, Custer, Coit, Preston to Virginia Pkwy, Eldorado Pkwy, or 121. Hardin to White to 75. North in Prosper: Custer to 1st, Preston Tr, or Frontier Pkwy to Preston or points in Prosper and North.
Kiley fugate	Virginia or Eldorado
Miller	It depends on where I am going. If I am going into downtown McKinney I may take Virginia. If I am going somewhere towards hwy 75 then I take the tollway. If I am going to Denton, then there is not a good alternative and I get stuck in traffic.
Josh	Only option.
Eric Beeby	Virginia, Eldorado, or even 121
Kacey Royer	Side streets. Virginia and Louisiana. I'll take anything to avoid 380 if it's contested.
Alicia Akins	Usually head down Virginia if super congested or stay on 380 while free flowing and cut over once I hit congestion
John Curran	Traveling to WF or OK - Up 289 to 82 across to 81
Baron Truesdell	Surface & 121 depending on destination. Many times just avoid 75 & 380.
Michael Burridge	Custer / Stonebridge / Virginia / El Dorado / Stacy
Adam Perkins	Custer South to 121
sharon apligian	
Sarah Chastain	Highway 5 and residential streets, mainly White.
Ann Hiner	Virginia or Eldorado
	None. Sit through it.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Divakar Kamath	Reduce the speed and use flashing lights to warn drivers of upcoming red lights.
Kay Bly	I would like to see an alternative north of 380.
Ashley Cleveland	
Ann Marie McCarthy	Reduce the speed limit to 40 or 45 mph. Sync traffic signals to the new posted speed limit. Enforce the posted speed limit. Add acceleration and deceleration lanes. Restrict truck traffic - lane restrictions and time restrictions (i.e. only allowed between the hours of 6pm-6am)(trucks must travel in the right lane only) Widen and extend use of other existing east/west roads: 1st Street from Preston dead ends into Custer - continue that through. Preston Trail widen through. Frontier Pkwy widen through. Extend use of existing North/South roads: Stonebridge Dr, Ridge Rd.
Kiley fugate	I'm not sure what can be done now. I've been saying for years that something needs to happen but it seems the cities involved have missed out and have allowed development where R.O.W.s could have been properly salvaged. Now it looks like some neighborhoods will have a highway running through their backyards and I am not in favor of that.
Miller	Expand it. Treat it more like a highway with faster speeds and less stop lights.
Josh	More lanes and less lights.
Eric Beeby	Let's not repeat the disaster inflicted on Dallas with I35, I345, I45, I30 and especially 366. TxDOT has already inflicted enohg damage on the city of McKinney with its 16+ lane scar called HWY75 ripping through the town, dividing east from west, doubling noise energy and complete with Kriegs lighting that affects neighborhoods for miles around. Let 380 from both east and west feed into a 4 lane 380 and other surface streets in McKinney. A bypass loop could be built far to the north with the least impact.
Kacey Royer	
Alicia Akins	blue route should begin where red route is designed
John Curran	Don't know the solution about the lights and drivers not paying attention to them...
Baron Truesdell	Congestion could be reduced by synchronized timing the lights with a flow of 60 mph away from 75. I've seen this done effectively. Also the solution used on 75 & Spring Valley with the tunnel might be an option to look at.
Michael Burridge	
Adam Perkins	
sharon apligian	
Sarah Chastain	Toll road on or near the existing highway. The intersection of 75 and 380 is the worst part about living in McKinney. I will go South to businesses in Allen to avoid 380 during certain parts of the day.
Ann Hiner	Create a bypass that would affect the fewest residents/businesses/parks
	Lower speed limits

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Divakar Kamath	NO
Kay Bly	Yes, but north of Tucker Hill.
Ashley Cleveland	
Ann Marie McCarthy	No, absolutely not. There has yet to be shown maximized and efficient use of existing roads. There is so much that can be improved upon without having to take the unnecessary measure, adverse impact, and excessive cost of constructing a freeway through residential areas. Please fix what exists.
Kiley fugate	No. It is too late for that. I am not in favor of neighborhoods loosing value due to a freeway being in their sight lines.
Miller	Yes.
Josh	Yes
Eric Beeby	Absolutely not!!!!!!!!!!!!!!!!!!
Kacey Royer	For the most part
Alicia Akins	no
John Curran	Yes
Baron Truesdell	Overpasses would help for sure. My experience in large city shows that a freeway needs to be about every 10 miles. A freeway needed to be constructed earlier with a simple east to west flow. The alignment needs to be more linear or another route for a freeway found.
Michael Burridge	Yes but as a bypass well above the current 380
Adam Perkins	If it is separate from the current US 380. With all the businesses going on 380, having it be a highway would become unsafe for traffic pulling in and out. On top of the fact there are young kids going accessing 380 to get to school in the mornings and afternoons.
sharon apligian	
Sarah Chastain	Yes, provided it aligned well enough that citizens could use it get from Princeton to Prosper and bypass McKinney.
Ann Hiner	No, only if the alignment is agreed upon by residents
	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Betsy Sellinger	Congestion west of Tremont as you get past Lake Forest going on toward 75 is my main concern.
David Olsen	Congested
Jennifer Hemingway	
Scott Smith	Yes - too many lights!
Holly Rudnick	Accidents occurring almost daily
Gregory Geerts	No
Virginia Roush	Excess traffic due to planned retail
Kaitlin Anderson	
Richard Green	Traffic and Lights
Jesper Jensen	Only two lanes with no divider and too many non coordinated intersections
stephen fuks	No
Melinda Corn	Yes
Michele Crabtree	Too congested. Too many stoplights through town.
doojin lee	
Sarah Eaton	traffic moving at high speeds
Amy Toson	Safety, traffic, time,
Sharon Smith	
Kelly Robinson	There are too many large trucks traveling the roadway, which causes the traffic to increase. There are only 2 lanes in each direction, which also leads to more congested traffic.
Benjamin Hanssen	The current roadway provides inadequate traffic flow and backs up too often. With future growth, is is all but inevitable that 380 will become a parking lot without major changes.
Brian Enneking	Want less congestion.
Dick Price	Yes way to congested .....way too many trucks and lights!
Lisa Marie Gonzalez	Gets congested frequently
Tracy Tesauro	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Betsy Sellinger	Any of the available arterial roads running east/west.
David Olsen	121
Jennifer Hemingway	
Scott Smith	121
Holly Rudnick	RockHill
Gregory Geerts	Eldorado pkwy
Virginia Roush	
Kaitlin Anderson	
Richard Green	Virginia & Eldorado
Jesper Jensen	South to 121 to 114
stephen fuks	Local roads -- Va Pkwy or El Dorado
Melinda Corn	546 or at Beauchamp any road going south of the congestion
Michele Crabtree	Not many options.
doojin lee	
Sarah Eaton	none
Amy Toson	None bc I need 380 to get to where I need to be. Sometime Hardin to white.
Sharon Smith	
Kelly Robinson	There are no alternative routes available for most of my traveling, which leads to much of my aggravation.
Benjamin Hanssen	I sometimes take Eldorado or Virginia to 75.
Brian Enneking	Virginia
Dick Price	Virgins Parkway, McKinney
Lisa Marie Gonzalez	Take back roads
Tracy Tesauro	Idk

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Betsy Sellinger	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill
David Olsen	Reroute further north
Jennifer Hemingway	
Scott Smith	As expensive as it might be, we need to have bridges for each of the lights.
Holly Rudnick	Existing 380 should remain a business 380 through McKinney between the Tollway and 75. A new highway should be built outside of business 380 and connect to it at the Tollway.
Gregory Geerts	If there is an outer loop it should go continuous from Preston to the other side of Princeton. (Blue and yellow combination) With the rate these cities are growing it will soon be engulfed. So I think the best strategy is limited exits and on ramps and large service roads.
Virginia Roush	Improve other east west roads north of 380 to help reduce trough traffic.
Kaitlin Anderson	
Richard Green	Lane expansion
Jesper Jensen	Elevate and use existing roads as frontage rd
stephen fuks	Build limited access freeway above the existing road, and use lower road for local access
Melinda Corn	Go above or corridor around
Michele Crabtree	Elevated roadway, with existing 380 as access roads through McKineey
doojin lee	
Sarah Eaton	make it a freeway (not a tollway)
Amy Toson	Make an interstate option with over and underpasses to take off lights and turning into/off of.
Sharon Smith	
Kelly Robinson	More lanes on the current 380 path, a bypass for large trucks to keep them out of the main traffic, and fewer lighted intersections to keep traffic moving at a better pace.
Benjamin Hanssen	I think a bypass is the best option for future growth. Using the current alignment will not provide adequate road growth or traffic flow.
Brian Enneking	I suggest freeway for decrease congestion and faster commute. Also frees up Baylor McKinney Hospital access for emergency purposes.
Dick Price	Do not run it or connecting roads thru Stonebridge or other souronding communities!
Lisa Marie Gonzalez	
Tracy Tesauro	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Betsy Sellinger	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill
David Olsen	Yes
Jennifer Hemingway	
Scott Smith	Yes - even if it turns into a toll road.
Holly Rudnick	No. Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Gregory Geerts	Yes
Virginia Roush	No!

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Kasey Soape	YES, loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications
Matthew Boley	
Matt Gingerich	The area near Tucker Hill seems to have a large number of accidents
Charles Holcomb	Too much traffic, no bypass
Charles Trimble	My main concern is that the current design does not allow for needed traffic flow and I don't think that a bypass, although necessary, will provide adequate relief from current and future congestion.
Shervin Alavi	Congestion
Leisa Williams	
Mathew	The amount of chains instead of Texas owned businesses. Also, apartment buildings and the type of people moving here.
Michael McCarthy	No, other than there's not enough law enforcement of the speed limits.
Bob Safford	Congestion at traffic lights.
simon leicester	stop lights are numerous, lots of stopping traffic, fender benders
Kevin Washa	Too narrow and too many stop lights that slows down traffic
Michael Malakoff	very crowded at 380 and 75
Julia Sutherland	Dangerous, frequent accidents, lack of traffic control, turn lanes etc.
Clark Hoffman	Allow for bikes to cross safely as it becomes more developed.
Jean Westbrook	Too many cars
Doug Littwin	Way too crowded and seems way too long to start on relieving traffic.
Ben Ward	Needs to be added to to reduce traffic. I cut through neighborhoods often to avoid the traffic on 380
Mark Lawless	Heavy rush hour traffic
Krista Fuller	A little scary with the amount of cars and the speed at which they drive
Paul Champagne	
	The traffic and the inconvenience that has developed due to the volume of commuters.
ryan rousser	Dangerous
Christina Navarro	Yes, traffic.
Dana Brown	It’s the only direct corridor from Mckinney to 35 north at Denton. The trucks are traveling at high rates of speed and with growth the traffic is bad and getting worse. Need a loop further north to bypass and give options. The congestion at 380 and 75 is crazy... st done point will need ramps like at 121 and 75.
Erin Botkin	It can get horribly congested, and I do not feel like there are good alternate routes when this happens.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Kasey Soape	if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Matthew Boley	
Matt Gingerich	Virginia
Charles Holcomb	Wilmeth to Hardin Wilmeth to Hwy 5
Charles Trimble	I will take Virginia Parkway or possibly Ridge to Stacy Rd route.
Shervin Alavi	No
Leisa Williams	Virginia
Mathew	121
Michael McCarthy	For me, 380 is a connection route between the Tollway and 75. Frankly, I'd like to see more $$ invested on the North & South routes than the East & West thoroughfares.
Bob Safford	Main Street, El Dorado, Sam Houston (121).
simon leicester	I stay on it
Kevin Washa	It depends on where its congested. If your near Prosper or Cross Roads your out of luck. That part of 380 is the absolute worst and there aren't any alternatives.
Michael Malakoff	Virginia Pwky and back streets
Julia Sutherland	I can't, I live so close that I can't get anywhere without using 380.
Clark Hoffman	121, main st
Jean Westbrook	Eldorado
Doug Littwin	Eldorado Pkwy, Va Pkwy
Ben Ward	Depends on where I'm going but usually 121 to 75N or frontier
Mark Lawless	Community to White to 75
Krista Fuller	Virginia Parkway
Paul Champagne	
	Side roads
ryan rousser	Virginia Street or El Dorado
Christina Navarro	Virginia Parkway or Eldorado
Dana Brown	None.
Erin Botkin	I feel like there aren't any helpful alternative routes.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Kasey Soape	if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Matthew Boley	
Matt Gingerich	If at all possible, I would like to see the new bypass connect with the existing 380 west of Custer Rd. I wouldn't want it to be more difficult or congested to access services like Lowe's north of 380 on Custer.
Charles Holcomb	Finish out the Collin County "Outer Loop" to east side of Princeton, and to west side near 380 / Custer Rd
Charles Trimble	I think multiple solutions are necessary. 1. A bypass alternative freeway. 2. Upgraded intersection improvements on parts that are not converted to a freeway. 3. Improved ingress and egress from side roads and entrances. 4. Improved signal light coordination along non-freeway routes. 5. Substantial improvements to the 380/75 interchange if not part of the updated freeway.
Shervin Alavi	Double decker freeway, regular traffic below, toll traffic above.
Leisa Williams	
Mathew	More homes, farms, parks. More suburbs instead of restaurants, buildings and apartments.
Michael McCarthy	Widen existing roadway. Better timing of lights. Increased law enforcement presence to reduce reckless speeding. Minimize the amount of commercial development which attracts traffic, traffic that in turn affects neighborhoods with its noise and need for additional lanes.
Bob Safford	Additional lanes, overpasses to allow better traffic flow.
simon leicester	raised carriageway with on off ramps
Kevin Washa	Construct a fly around loop to the north.
Michael Malakoff	Outside loop north of 380
Julia Sutherland	Regardless of the final freeway solution, 380 needs practical improvements such as more turn lanes, etc
Clark Hoffman	Do not bulldoze Erwin park
Jean Westbrook	Whatever helps the flow
Doug Littwin	Widen immediately, possible overhead express lanes.
Ben Ward	No clue
Mark Lawless	Widen by 2 lanes in each direction from Custer Road to County Road 458 in Princeton.
Krista Fuller	Lower speed limits
Paul Champagne	
	Expand the lanes. No rerouting through Erwin Park!
ryan rousser	The loop system is the best that I have heard
Christina Navarro	Bypasses over Preston, Dallas Tollway, and Highway 75
Dana Brown	Bypass further north connecting 35 north of Denton to 75 north of Mckinney.
Erin Botkin	I'm not sure how to help with the congestion, but possibly work out a better stoplight system? Also, the stoplight and lane structure by 380 and the Dallas North Tollway is not good. The turn lane is incredibly short and gets backed up easily.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Kasey Soape	NO!!
Matthew Boley	
Matt Gingerich	Yes, with the projected population increase it will be needed.
	Yes
Charles Holcomb	No
Charles Trimble	Yes, something needs to be done. A no build alternative has crippling long term affects on the entire region.
Shervin Alavi	Yes
Leisa Williams	
Mathew	A freeway would not be out of the question as long as it is done to support Texans and their commute instead of disrupting homes and families.
Michael McCarthy	No. ALL additional building that takes place should be done in a way that does not impact existing neighborhoods. That means the State better buy the open space now before additional neighborhoods come into being and the land gets even more expensive.
Bob Safford	Yes
simon leicester	no
Kevin Washa	Yes. Our community isn't getting any smaller
Michael Malakoff	maybe
Julia Sutherland	Yes. In spite of the noisy protests of a few, transportation is absolutely necessary to accommodate transportation needs in the area.
Clark Hoffman	380 will need to be a freeway in early near future.
Jean Westbrook	No if your a home owner. Guess we'll have to move
Doug Littwin	Yes
Ben Ward	Yes!
Mark Lawless	Build an elevated toll road to relieve congestion thru McKinney from Hwy 5 to Hardin with ramps onto 75
Krista Fuller	I don't use 380 enough to support or oppose
Paul Champagne	
	No. Not if it is going to interfere with the "unique by nature" of McKinney. It has already become excessively lost due to expansions of roads and development of buildings and businesses.
ryan rousser	no
Christina Navarro	Yes but it depends on how it will improve the traffic conditions, and promote safety.
Dana Brown	Most likely.
Erin Botkin	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Charlotte Waters	Speed needs to be lowered due to all the development.
Jill mason	Congestion especially at 75
Claudia	back up
Barbara Collins	Lots of traffic and lots of time to get from Custer to central
Marc misuraca	More traffic caused by new development from Hwy 75 to Dallas North Tolway
Jeffrey Alexander	It is highly congested.
Terri L Landau	yes - High speeds broken by stop lights (Lake Forest), Custer.
Jeremy Rowland	
Heather Powell	no
Jill Allison	
Stephen Coles	Traffic to heavy
Claud & Beverly Fleener	Yes - congestion accidents
Michelle Cano	
Jason Spears	Yes, it has not kept up with growth
James E Jones	Not much. Except coming out of McKinney it gets bad
Sharon Carter	Yes.. Not enough lanes to handle all the traffic at 75 & 380
Lauren Halsey	No. Traffic flows fairly easily at the moment, and generally there is not too much congestion on the McKinney side. Once you hit the construction closer to the Frisco border and Preston Rd, traffic does get bottlenecked.
Michelle Clough	Dangerous and too busy.
Terry Bachran	Traffic congestion
Hillary Shiels	Yes! 380 is incredibly dangerous. People drive way too fast and some are running lights. There have been way too many accidents to not do something to improve safety.
Neil Gaylor	I am concerned about traffic congestion in the near future as more and more large businesses are building along it, plus the influx of new residents is very high.
	It is too congested....thus causing dangerous driving conditions.
Scott Machalicek	congestion & wrecks
Scott Rhodes	Yes, I drive from McKinney to Denton daily. Very congested
	Better signage neeed
Carmen Nina	If it's meant to be a Highway it should not have stop lights.
Denise Willis	Too congested
Mark Nicholson	Yes, safety & congestion
Veyenise Delarosa	People driving in the median, always! People driving erratically
Ronnie	Two small and crowded, needs more lanes

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Charlotte Waters	
Jill mason	Virginia
Claudia	none unfortunately
Barbara Collins	virginia parkway which is worse because of all the construction on it
Marc misuraca	Still take 380
Jeffrey Alexander	I will take Wilmeth Road or back roads north of 380 but south of Wilmeth.
Terri L Landau	there aren't any good ones - I wind through the residential areas or take White to the 75 and head East on 380 when I have to go east on 380 rather than take 380 east from Lake Forest
Jeremy Rowland	
Heather Powell	75, George Bush, 35
Jill Allison	
Stephen Coles	Community to White
Claud & Beverly Fleener	Through country Bridge Farmer off 1827
Michelle Cano	
Jason Spears	depends
James E Jones	
Sharon Carter	Redbud or hardin
Lauren Halsey	Virgina Parkway/Rockhill to DNT
Michelle Clough	
Terry Bachran	Back roads thru Molisa to 121
Hillary Shiels	I don’t
Neil Gaylor	164 to 943 to Wilmuth, but that is not a preferred route for many reasons.
	Hardin up to Wilmeth then moving east to drop South back to 380- This will not be viable as the development at the corner of Hardin and 380 will cause more congestion
Scott Machalicek	Back roads
Scott Rhodes	Eldorado, around thru Prosper, Sam Rayburn, lots of different routes. Most end back on 380 at some point
	US121
Carmen Nina	
Denise Willis	Side roads. Hardin, Graves, Highway 5
Mark Nicholson	New Hope 406
Veyenise Delarosa	There really are not many alternative routes, those usually get congested too.
Ronnie	Fishtrap

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Charlotte Waters	Not sure.
Jill mason	Freeway? Timed traffic lights.... Really timed based on traffic at the time not just random times
Claudia	I am not sure
Barbara Collins	need some sort of road that allows people to skip the custer to 75 segment
Marc misuraca	
Jeffrey Alexander	Create some frontage roads and new right hand turn lanes as well as bypass access if at all possible.
Terri L Landau	Deal with the speeds - give longer Right & left Turn options, eliminate the stop lights and create under and over passes
Jeremy Rowland	
Heather Powell	
Jill Allison	
Stephen Coles	Double turn lane from 380 to south 75
Claud & Beverly Fleener	Build a north route bypassing Princeton
Michelle Cano	
Jason Spears	Definitely needs to be widened. 3 lanes each way versus 2
James E Jones	The Blue Mape corridor
Sharon Carter	An over pass for r traffic that is not turning or going to shops
Lauren Halsey	Widen lanes, remove some of the traffic lights.
Michelle Clough	
Terry Bachran	
Hillary Shiels	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Neil Gaylor	Wider and higher -- like 121.
	Raised highway (Austin) or a loop
Scott Machalicek	Elevated freeway - the third option.
Scott Rhodes	a bypass, maybe something like 288 that Denton has
	Better light coordination
Carmen Nina	It needs bridges (stop lights under the bridge for the crossing streets) like most Highways.
Denise Willis	More lanes and don’t have trees or shrubs near the lanes blocking the road.
Mark Nicholson	Anythink less then a freeway would be to small
Veyenise Delarosa	Raise the median to reduce accidents
Ronnie	More lanes or elevated lanes

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Charlotte Waters	Yes
Jill mason	Yes but no tolls we have enough.
Claudia	as long as it is NOT a tollway
Barbara Collins	no
Marc misuraca	Yes
Jeffrey Alexander	Not if it disrupts current homeowners and their property/homes.
Terri L Landau	Freeway yes - Tollway no
Jeremy Rowland	
Heather Powell	no
Jill Allison	
Stephen Coles	Yes
Claud & Beverly Fleener	Yes
Michelle Cano	No
Jason Spears	I do not support taking away community recreation parks like Erwin Park in McKinney. Build it somewhere else.
James E Jones	yes
Sharon Carter	Yes
Lauren Halsey	Yes!
Michelle Clough	
Terry Bachran	
Hillary Shiels	No
Neil Gaylor	yes
	yes
Scott Machalicek	Yes!!
Scott Rhodes	yes
	Sure
Carmen Nina	
Denise Willis	Yes
Mark Nicholson	yes
Veyenise Delarosa	Still unsure, this may affect where we live.
Ronnie	No as the alignment is the issue

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
George Merryweather	
Sharon Rambo	
David Wellborn	Yes, very congested
Kayte Ghaffar	
Ginger Murchison	Safety, speed, accidents.
Sandra Rojas Chang	Too much congestion and too many traffic lights
Gretchen Creighton	So much traffic and people texting and driving and sun rise and sun set can be blinding. Probably why there are so many accidents
Ashley	improper timing of lights. Hazardous Material transportation. Truck Traffic
Brad Chaney	
Terri McCallister	Noise
Marla Dozier	Very congested
Josh Sorenson	
Jerry Cashdollar	
Damon Villar	My concern is with the speed at which vehicles travel down this highway. It is congested at times, but what highway isn't. 380 is just as big as the DNT and other freeways in the area.
Jay Northcut	Too much stop and go traffic.
	Too many stoplights.
Aaron Pagnard	Congestion, lack of traffic light coordination, lack of similar alternate east/west routes
Joann Sams	congestion & noise level for residents who live close to highway
Guy Anderson	two few lanes for traffic load, traffic lights in 50 and 60 MPH zones, too many drives and entrances on road carrying this much traffic, non-sensical speed limits -- 65mph from Farmersville to Hunt County, where it goes up to 70, but 60 MPH between Farmersville to Princeton
Peggy Stearns	Not equipped to handle the amount of traffic now. Increased traffic will occur because of new construction at intersection with Hardin road.
Paul Robert Zanno	Increased levels of truck through fare have picked up noise levels in our development and home with both day and night traffic flow
Terri Mahanay	From Hwy 5 to Princeton - very dangerous
Patrick Carroll	too many stops
Kathy Sherwood	no
Cindy Dickens	
Kerry Roy	Very congested, lots of wrecks, especially Airport Rd through Princeton

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
George Merryweather	
Sharon Rambo	
David Wellborn	Widen 380 as is.
Kayte Ghaffar	Virginia Parkway
Ginger Murchison	Virginia
Sandra Rojas Chang	none
Gretchen Creighton	This is my only way home
Ashley	Typically stay on 380. Congestion clears after 75 interchange
Brad Chaney	
Terri McCallister	Not much choice, Bridge Farmer.
Marla Dozier	543 towards Myers Even Center to 1461
Josh Sorenson	
Jerry Cashdollar	
Damon Villar	I rarely take alternate route because 380 is congested. If I do take an alternate route I typically take Custer or the DNT (travel to Plano area).
Jay Northcut	Rural roads to the north, city roads to the south.
	El Dorado.
Aaron Pagnard	There aren't any good alternatives currently.
Joann Sams	the yellow
Guy Anderson	McKinney to Farmersville: Airport Rd=>546=>398=>982, Bridgefarmer=> Myrick Lane=>982, Monte Carlo=>1377=>496=>561=>559
Peggy Stearns	121, White avenue or shop outside McKinney.
Paul Robert Zanno	Virginia Parkway
Terri Mahanay	There are not options currently available.
Patrick Carroll	Sam Rayburn (121). El Dorado to I-35
Kathy Sherwood	Hardin, Ridge, Stonebridge
Cindy Dickens	
Kerry Roy	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
George Merryweather	
Sharon Rambo	
David Wellborn	Stop building businesses right to the existing 380 curbside. Widen 380 provide adequate access roads and entrance and exit ramps to support business and commuter traffic.
Kayte Ghaffar	Having a highway or lanes that don't stop at lights as I have seen many accidents from drivers not stopping . Also no solutions that go through Erwin Park
Ginger Murchison	Make it a traditional highway, with barriers, overpasses, etc.
Sandra Rojas Chang	Turn it into a limited access/controlled access highway
Gretchen Creighton	I don’t know. Maybe medians do people can just whip out into traffic. Make a u-turn Lane. So many accidents from people sitting in median to get over
Ashley	Review all options. I believe there are many options /technologies that available . Such as roundabouts, Intelligent Traffic Lights.
Brad Chaney	
Terri McCallister	Widen from 1872 to Airport or fix lights where they are scenradized better. One more left turn at Airport Rd.
Marla Dozier	
Josh Sorenson	
Jerry Cashdollar	
Damon Villar	Make improvements to 380 and build routes north of 380 to reach other areas. DNT and Custer can be made larger to accomodate this. Also, if a bypass is needed it seems natural that the bypass run west of Tucker Hill/Stonebridge close to Custer road.
Jay Northcut	Widening.
Aaron Pagnard	Additional lanes, a business route bypass for commercial/nonresident traffic,
Joann Sams	
Guy Anderson	Supporting light/medium rail to get cars off of 380, express fly-over lanes at every traffic light, bypasses around towns and traffic areas, access roads
Peggy Stearns	Stop construction of businesses that attract large numbers of drivers.
Paul Robert Zanno	Given density increase and current building out around existing 380 would highly recommend a faster speed more northern route for 380 through Collin County. That would keep the existing 380 corridor in place for business and local traffic while diverting a good portion of cross county traffic and trucks which are not turning off 380 in the county.
Terri Mahanay	Not sure...but possible a center barrier in areas to prevent head on collisions.
Patrick Carroll	make it a freeway
Kathy Sherwood	
Cindy Dickens	
Kerry Roy	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
George Merryweather	
Sharon Rambo	
David Wellborn	No - 380 alignment is the ONLY one that makes any sense at all.
Kayte Ghaffar	
Ginger Murchison	Yes
Sandra Rojas Chang	Yes
Gretchen Creighton	Sure
Ashley	NO
Brad Chaney	
Terri McCallister	NO
Marla Dozier	Not sure at this time
Josh Sorenson	
Jerry Cashdollar	
Damon Villar	I do not support any of the alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of Stonebridge and not on or bordering Tucker Hill.
Jay Northcut	Yes.
	Yes.
Aaron Pagnard	Yes
Joann Sams	yes, something has to be done
Guy Anderson	No
Peggy Stearns	Depends on the time frame.
Paul Robert Zanno	Do not support adding additional "in town" options that allow turning 380 into a high speed, even wider access road, for traffic to move across the county
Terri Mahanay	Yes
Patrick Carroll	yes
Kathy Sherwood	
Cindy Dickens	NO
Kerry Roy	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Kathleen Lacy	Too congested
Akthar Goolam	Yes, heavy traffic. Traffic lights
Troy Hammond	yes its dangerous. i know people who have lost their child in an accident at 380 / Lake forest
Diane Jones	Still traffic congestion problems at 380 and Hwy 75
E Armstrong	The center turn lane, people drive in it causing accidents
Nancy Lawrence	Yes. It is dangerous because large trucks are on the road a lot, people drive too fast, and there have been too many accidents.
Lynn Randolph	Congestion, middle turn lane very dangerous
Leilani	
	Way to much Traffic and with new businesses going in it's going to make traffic even worse
Patricia Jones	Speeding on Audie Murphy - Farmersville
Kaye Franks	It is already congested - especially going west.
Vitay Sagi	Yes
Shelley Bronowitz	Too much traffic but can use alternate routes
Mike Beene	too busy
Richard Wallace	Yes Congestion Property values Pollution
Mickey Davison	I avoid due to bad congestion
Lisa Johnson	congestions
Claude & Patsy Owen	
jennifer owens	has too many stoplights. dangerous.
Heather OBrien	No
Douglas George	Large volume of traffic, needs to be configured as a highway instead of all the traffic lights.
Alden Harsch	Currently is congested especially at US 75
Ken Bado	
Alesa D Downing	Safety and the high speed of travel, with the many stoplights.
Kristal Macone	Speeding with reckless driving. Almost daily, I either see an accident or a near accident.
Randy Rial	Yes...it needs to be widened.
Ashley Solis	Yes, not enough stoplights going East on 380 after you leave Farmersville going towards Greenville.
Gerald Todd	US 380 is congested
Ophelia (Unreadable)	Safety
	Heavy traffic Too close to schools
Ted Hosterman	Congested, confusing, always under construction - overall a very dangerous nasty road
Travys Tadlock	Unsafe drivers safety, congestion,
H A Johnson	too many trucks and speed

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Kathleen Lacy	Virginia parkway
Akthar Goolam	
Troy Hammond	viginia parkway
Diane Jones	El Dorado or Virginia
E Armstrong	546
Nancy Lawrence	Virginia Parkway
Lynn Randolph	546
Leilani	
	Virginia and Eldorado
Patricia Jones	
Kaye Franks	We take back roads if we are going to Denton, I-75 for other routes
Vitay Sagi	
Shelley Bronowitz	Custer, Lake Forest Independence, 1461
Mike Beene	none yet
Richard Wallace	US 380 is ALWAYS congested Virginia Parkway is the only alternative and it is far too congested as well
Mickey Davison	Highway 5 and Red Bud St.
Lisa Johnson	none
Claude & Patsy Owen	
jennifer owens	121 and go around.
Heather OBrien	I take side rides. I have lived in McKinney long enough to know what roads will help me get where I am going.
Douglas George	Any of the side roads that intersect 380
Alden Harsch	Virginia St
Ken Bado	
Alesa D Downing	George Bush
Kristal Macone	Custer to 121 or Virginia to 75.
Randy Rial	Virginia Ave/Rockhill
Ashley Solis	I have no choice but to take 380 to get to my job. It's always congested.
Gerald Todd	El Dorado or 121
Ophelia (Unreadable)	FM 546 & any dirt road CR 307 to Allen
	Virginia
Ted Hosterman	Virginia Pkwy; El Dorado Pkwy - no viable alternative to the north
Travys Tadlock	C.R. 546
H A Johnson	Work place on 380 so have no alternative

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Kathleen Lacy	More routes
Akthar Goolam	Broaden with fewer street lights - free flow of traffic
Troy Hammond	
Diane Jones	
E Armstrong	proper turn lanes
Nancy Lawrence	
Lynn Randolph	
Leilani	Do not run it through Erwin Park
	A bypass
Patricia Jones	None at this time
Kaye Franks	Make better turn lanes
Vitay Sagi	
Shelley Bronowitz	
Mike Beene	Depress 380, 6 or 8 lanes with 6 access lanes directly above at ground level. This will leave about the width of the median in the middle open for ventilation and light. If there is a bypass, have it go alongside custer on the mckinney side. No visual or sound impact on tucker hill.
Richard Wallace	There needs to be a US 380 bypass from US75 to the Dallas North Tollway
Mickey Davison	Definitely the Freeway option.
Lisa Johnson	freeway with alignments
Claude & Patsy Owen	
jennifer owens	wider lanes. no stoplights. more light...it's very dark on 380.
Heather OBrien	One that does not include the road going in the back of my neighborhood.
Douglas George	Create a formal highway with on and off ramps.
Alden Harsch	A bypass both on south as well as north
Ken Bado	
Alesa D Downing	
Kristal Macone	
Randy Rial	
Ashley Solis	More lanes, more stoplights in these small towns like princeton and Farmersville.
Gerald Todd	
Ophelia (Unreadable)	Elevated road & more north-south roads - service road badly needed between New Hope FM 1827 & Bridgefarmer Road
	Evening out flow of traffic by expanding some of the FM roads
Ted Hosterman	
Travys Tadlock	Elevated road bed & service roads
H A Johnson	Widen and or double stack like LBJ or 35 in Austin

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Kathleen Lacy	Yes
Akthar Goolam	Yes
Troy Hammond	yes
Diane Jones	
E Armstrong	
Nancy Lawrence	
Lynn Randolph	
Leilani	No
	Yes
Patricia Jones	Yes
Kaye Franks	It depends on where the freeway runs and if it will affect residents living south of it.
Vitay Sagi	Yes
Shelley Bronowitz	No
Mike Beene	only according to the solutions I mentioned above. Then, yes.
Richard Wallace	No
Mickey Davison	Not "regardless of alignment".
Lisa Johnson	yes
Claude & Patsy Owen	NO
jennifer owens	yes
Heather OBrien	No
Douglas George	Yes
Alden Harsch	yes
Ken Bado	
Alesa D Downing	Yes
Kristal Macone	
Randy Rial	yes
Ashley Solis	Yes.
Gerald Todd	Yes
Ophelia (Unreadable)	yes
	No
Ted Hosterman	Absolutely!
Travys Tadlock	yes
H A Johnson	not sure-question too open ended

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Joseph Delarosa	I travel daily between US75 and 2nd st/4th st. Too many people are traveling on 380 now. With the added stop lights it is has added more congestion. The center turning lane is used by impatient drivers to pass traffic causing more accidents. Driving on 380 is like having stop lights in the middle of a busy freeway, Going from 60mph to dead stop because of traffic lights and congestion. And there is no other optional route to take once stuck in the middle of traffic, no regular streets and cross streets leading away from 380 like a preston, custer, coit etc. The speed limit is too high for this busy roadway as it is right now.
Dawn Lewey	No
Brandy Chandler	No
Jennifer Strain	Too much traffic. Extremely dangerous.
Jill Korbelic	Too much traffic, too many lights
John Davis	I think the speed limit should be lowered
Mike Kessler	Traffic congestion
Elijah	Too many stop lights
Shannon Cooper	
Ian Buchanan	
George Moore	Looking ahead 30 years, my main concern is that it won't be designed big enough to handle the traffic and that it won't be built soon enough. I see 380 as being the next I-635... design it for ease of expansion.
Roy Ralls	Yes, its heavily congested and getting worse
Samuel Forman	Too many really big trucks going too fast
James Gilmore	
Duke Monson	Too much traffic, too many lights, too little road
John Landguth	
Lisa A Manning	
Kelli Grimes	Heavy traffic and construction
Tiffany Fisher	Yes, the middle lane being open to all and no designated turn lanes. Speed limit in front of Princeton High School.
Kelly Ritchie	Safety. Too many semis. Cars running red lights. Lots of stop and and go due to so many lights. Congestion in general near shopping and restaurants.
Ally Rodriguez	It is very congested, and with more shops opening, will be increasingly so.
Stephen Joseph Kerkvliet	Yes, way to busy, need a freeway system, like US 75
Matthew Madden	
Jon Fisher	Yes, the center turn lanes are unsafe and four lanes isn't enough to handle the traffic during rush hour.
Heather Standerfer	Yes, too many stop lights, businesses. Stop/go....accidents occurring daily.
Nick Kaylor	Traffic lights preventing flow of traffic.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Joseph Delarosa	Only option for me is to take the winding FM roads from airport dr that lead to bridgefarmer. Or I go out of my way and take bethany past lake lavon and come out past my houe by 2th street. Nevermind the 2 times 380 was completely shut down for hours due to fatality, and we could not get home.
Dawn Lewey	Any north south st to get back to an east west travel
Brandy Chandler	Virginia
Jennifer Strain	There is no alternative
Jill Korbelic	
John Davis	Virginia, Eldorado east west Lake Forest, Custer north south
Mike Kessler	
Elijah	635
Shannon Cooper	
Ian Buchanan	
George Moore	Virginia
Roy Ralls	Virginia or El Dorado
Samuel Forman	Virginia
James Gilmore	
Duke Monson	Sam Ray Burn Tollway, Back roads around New Hope & Princeton
John Landguth	
Lisa A Manning	
Kelli Grimes	Tollway
Tiffany Fisher	FM 546, Airport Road
Kelly Ritchie	I use Virginia or I go across Lake Forest to the tollway. If I'm going North, I will go the back roads by Myers.
Ally Rodriguez	
Stephen Joseph Kerkvliet	US Hwy 82
Matthew Madden	
Jon Fisher	Monte Carlo/CR 407 towards McKinney, coming from McKinney I go down CR 407
Heather Standerfer	FM 546 to any back roads to avoid the area.
Nick Kaylor	Eldorado Pkwy, Sam Rayburn Tollway

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Joseph Delarosa	East of US75 380 still isn't as big as 380 going into mckinney. So, speaking of where I live on 380 I think 2 options would work. 1- Keep its current alignment and make it bigger 6 total lanes with normal sized medians with Dedicated turning lanes. Just like it is in Mckinney. Lower the speed limit to 45 mph, add more traffic signals Especially at community entrances(my Cypress Bend Community still does not have traffic signal). And make more cross streets and cross roads. These are not small country towns any more so it needs more roadways everywhere. All the while making an additional major freeway/highway either north or south of 380 for east/west traffic and major freeway running north/south. I saw on the news this is the plan anyways, for 4 more major freeways. 2 - do whatever you want. I know whatever will happen will happen regardless of what input we have have.
Dawn Lewey	Noneno
Brandy Chandler	Widen it
Jennifer Strain	1. Turn it into a freeway 2. Lower the speed to 40 and make a 380 bypass
Jill Korbelic	
John Davis	I suggest full development of outer loop to divert non-local traffic and trucks off 380.
Mike Kessler	Adding additional routes to handle increasing traffic
Elijah	Fewer intersections where you have to stop as you're going west toward 287
Shannon Cooper	
Ian Buchanan	
George Moore	From above, I see 380 as being the next I-635, which is the new Loop 12. Neither of these was built with the capacity to handle the traffic when they were completed, much less today. Suggestions: design it big and with provisions for easy expansion later; either time the stoplights or remove them as soon as possible (keep stoplights to an absolute minimum.
Roy Ralls	Create a freeway further north to bypass the current route
Samuel Forman	Double deck
James Gilmore	
Duke Monson	Freeway
John Landguth	
Lisa A Manning	
Kelli Grimes	Complete construction
Tiffany Fisher	raised median/designated turn lanes reduced speed
Kelly Ritchie	Better turn lanes (particularly to make right turns) to alleviate backups.
Ally Rodriguez	
Stephen Joseph Kerkvliet	Build over passes where possible on existing highway and most of the suggested alignments are north of McKinney, It is to late to make them south of McKinney.
Matthew Madden	
Jon Fisher	Make it six lanes on existing roadway and divide the highway with designated turning lanes for major businesses or stoplights.
Heather Standerfer	Need median and specific turning areas.
Nick Kaylor	overpasses for intersections so those who are continuing through do not have to stop.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Joseph Delarosa	Yes
Dawn Lewey	No
Brandy Chandler	No - we like McKinney as a small town
Jennifer Strain	Yes
Jill Korbelic	YES
John Davis	Freeway will not solve issue of heavy traffic west of Custer. Prefer outer loop development first to determine if freeway is necessary for 380.
Mike Kessler	Not on 380 - I'd suggest creating an alternate route to handle increasing traffic
Elijah	Yes
Shannon Cooper	
Ian Buchanan	
George Moore	Pretty much, yes.
Roy Ralls	Yes
Samuel Forman	maybe
James Gilmore	
Duke Monson	Yes
John Landguth	
Lisa A Manning	
Kelli Grimes	No
Tiffany Fisher	NO
Kelly Ritchie	I can’t say without knowing more of the details.
Ally Rodriguez	
	No
Stephen Joseph Kerkvliet	Yes
Matthew Madden	
Jon Fisher	NO
Heather Standerfer	Yes
Nick Kaylor	Yes

todd rolen	Commuter		Property Owner	Nearby resident	councilman	Daily

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Suzanne Houston	
Jonathan Todd	Yes, most days I spend over 20 minutes driving 6 miles on 380 between princeton and Airport rd.
Jennifer Askew	The section from 75 east is too slow and no one drives that speed limit. Either needs to be raised to at least 40-45 or needs to be enforced.
Fred Zavala Jr.	No, it's fine the way it is.
Maxim Gorelkin	
Thomas G. Putman	
Kerry Roy	Traffic congestion is horrendous and so many wrecks due to no dividers in highway between New Hope and Princeton and backups near airport road resulting in many wrecks as well.
Christina	Too congested
Bethany Serrano	Accidents
Wahed Mohammed	Traffic lights
Michael Galli	
Mike Parrott	Congested, safety.
Kelly Zink	Yes. Heavy traffic during peak hours, and a lot of heavy truck traffic with no concrete barrier between westbound and eastbound lanes.
Mark Van De Veer	Uncoordinated traffic lights
Andre kocher	
Saad Malik	Too much traffic lights on 380 which congest the traffic
Unreadable M. Hail	
Murray Schwartz	Too much traffic???
Melissa George	It has a speed limit of an interstate with lights. Dangerous!! Plus sit and wait for light to make a left hand turn and traffic goes flying by you while you wait. Dangerous as you can literally feel the traffic go flying past you while you waitZ dangerous. Our 16 year old is not allowed to drive 380 due to excessive speeds, congestion, lack of visibility and left hand turn situation.
Callie M. Dunn	Yes - too many cars
Heather yates	Something needs to be done from fm 982 in Princeton to 289 in prosper
Andrew Morgan	Yes. Too much traffic too many redlights
Jayme Schmalzried	yes
Michelle Day	Medians are becoming dangerous. Heavy traffic. Constant accidents.
B Westbrook	of course
todd rolen	not a big fan of speed through town. like to see it stay on course it is just be wider as if it moves to south i am afraid our downtown will fade as businesses will run to hwy.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Suzanne Houston	
Jonathan Todd	New hope or Bridgefarmer
Jennifer Askew	Depends on where I'm going but I generally will avoid 380 if at all possible.
Fred Zavala Jr.	I've lived here a long time, so I know which backroads to take if I don't want to use the highway.
Maxim Gorelkin	
Thomas G. Putman	
Kerry Roy	FM 1827, to other FM roads to Hwy 5.
Christina	Drive through the city on Virginia or take Hey 121
Bethany Serrano	Virginia pkwy
Wahed Mohammed	
Michael Galli	Wilmeth
Mike Parrott	El Dorado
Kelly Zink	I don't.
Mark Van De Veer	Virginia, Eldorado
Andre kocher	
Saad Malik	Virginia to 75 and Go down on Independence/Coit/Custer to Main to 75
Unreadable M. Hail	
Murray Schwartz	?
Melissa George	Virginia
Callie M. Dunn	My house faces 380. If 380 is congested I don't have any alternative routes!
Heather yates	County roads
Andrew Morgan	Any road except 380. I have tried them all
Jayme Schmalzried	RockHill
Michelle Day	Monte Carlo Blvd, or county roads
B Westbrook	side roads
todd rolen	i like the county roads as everyone is always in a hurry to go nowhere....

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Suzanne Houston	
Jonathan Todd	Additional lanes & synced lights
Jennifer Askew	a by-pass from Custer or 289 to Princeton.
Fred Zavala Jr.	
Maxim Gorelkin	
Thomas G. Putman	
Kerry Roy	freeway/expanded lanes for existing 380 and small loops or elevated roadway to bypass stoplights.
Christina	
Bethany Serrano	Widen it
Wahed Mohammed	Would like it to be a full-fledged highway.
Michael Galli	
Mike Parrott	Bypass
Kelly Zink	Developing a freeway starting near Custer Rd., going north of McKinney and north of Bloomdale Rd. This would have the least impact on businesses and residents currently located near existing 380.
Mark Van De Veer	Coordinate traffic signals at intersections along 380 to minimize stopping at lights.
Andre kocher	
Saad Malik	make a proper highway with no traffic lights
Unreadable M. Hail	
Murray Schwartz	Stop trying to attract out of state people
Melissa George	Turn it into an Interstate. That is how people drive it and to reduce the speed limit would do no good as people would still speed rap the large construction trucks
Callie M. Dunn	
Heather yates	Road work was already done threw farmerville to Greenville I see nothing wrong threw there traffic is not nearly as bad as from fm 982 in Princeton to 289 in prosper especially from bridgefarmer road to airport Rd going threw he country like using county roads I believe will make it worse cause people don't won't a major highway that's why they moved into the country is to get away from traffic I have worked as county worker working on roads I know the only way is to make the road wider for more lanes starting at Fm 982 I would do anything threw town that will take away from alot of people that have business in town especially are yard in Princeton and will make it harder to get in and out if you take away the median that's the only way to get into business in town and are yard
Andrew Morgan	Some kind of freeway
Jayme Schmalzried	
Michelle Day	At least adding turning medians. Making some bypasses for McKinney and Princeton
B Westbrook	by-pass
todd rolen	bridges and overpasses are costly but keep the traffic moving and that would help as red lights are awful on hwys. i really dont want to see a road just open up to the hwy would rather see on ramp to keep people from trying to cross the traffic...

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Suzanne Houston	
Jonathan Todd	Yes
Jennifer Askew	Yes if it means we can relieve some of the congestion on 380 going through McKinney
Fred Zavala Jr.	Yes.
Maxim Gorelkin	
Thomas G. Putman	
Kerry Roy	yes
Christina	No!!!
Bethany Serrano	Yes
Wahed Mohammed	YES
Michael Galli	No
Mike Parrott	No
Kelly Zink	I do not support a freeway built along the existing 380 route. This would cause severe disruption to the existing businesses along the route, and would likely see some of them close due to lost revenue.
Mark Van De Veer	Freeway for bypass of cities. Need to avoid hydrids, as any lights or stop signs would defeat it's purpose.
Andre kocher	
Saad Malik	yes
Unreadable M. Hail	
Murray Schwartz	Need a lot more info to answer this question
Melissa George	Yes
Callie M. Dunn	
Heather yates	No cause noting needs to be done threw the town of Princeton just to fm 982 to McKinney
Andrew Morgan	Yes
Jayme Schmalzried	yes
Michelle Day	Yes
B Westbrook	yes
todd rolen	it is a need not a want

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Cynthiann Kesterson	
Bill Carpenter	Safety, traffic count/congestion and stoppages/mobility between Custer and 75
Amy Kennedy	Yes it is very unsafe. I fear for mine and my children's life daily
Kenneth Russell	Traffic and accidental cross over from other lanes.
E R Griggs	congestion & noise
Elizabeth Lowe	Yes, the congestion and lights.
John George	Congestion surrounding the 380 / Hardin intersection. Seems to be too much on those four corners
Brent Holdburg	
Dennis seeman	Dangerous road to drive on and very congested.
Kelly Hendrey	NO
Tiffany Turpen	To much traffic and way to many wrecks
Cathy Tweedt-Irwin	Yes. It already gets congested during rush hour. Then it is only going to get worse when all of the new development is completed at the intersection of 380 & Hardin
Kay	
Kale (Unreadable)	No
Alexandre Antonio	I believe that this route should be turned into a freeway to avoid traffic lights from McKinney to Denton.
Jerald & Donna Dolvin	Yes - too congested at all hours of day
Paul Lastrapes	too many lights
Patti Spangler	It's a horrible road to have to travel on each day to go to Southern Collin county. Numerous accidents daily and always heavy traffic.
Karen Young	Traffic
Don Stopfel	Heavy traffic. Many large trucks.
June	Too many lights! Too much congestion
Michael Galli	Too narrow and congested
Chris Ellis	Number of stop lights, there are too many
Lynn Ballard	Yes, too congested, too much commercial traffic, need outer loop to be built for thru traffic.
James Gebhart	I won't go to the stores on 380 and 75 on weekends because there is too much traffic. We do not need another tollway.
J.D. Askew	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Cynthiann Kesterson	
Bill Carpenter	Travelling east....Virginia Pkwy, Wilmeth Rd. Travelling west, Virginia/Rockhill Rd.
Amy Kennedy	I try to take back roads but there are not many choices
Kenneth Russell	121 over to 75 to get up to 75/380. Or 121 to highway 5. I Used to take Virginia, but it's a mess with construction right now.
E R Griggs	no other choice & dead end road
Elizabeth Lowe	Virginia, Lake Forrest, Ridge, Eldorado, White, Custer.
John George	Only alternative would be Virginia to 75
Brent Holdburg	
Dennis seeman	Sam Rayburn tollway
Kelly Hendrey	Hwy 82, Hwy 69, Hwy 121
Tiffany Turpen	Fm 546 or new hope road
Cathy Tweedt-Irwin	It depends on my final destination, but I usually check Eldorado and/or Virginia.
Kay	
Kale (Unreadable)	Hwy 82, Hwy 69 Hwy 121
Alexandre Antonio	None.
Jerald & Donna Dolvin	
Paul Lastrapes	there is no alternative
Patti Spangler	I don't have an alternate route as I have to use 380 to get to 75S to get to work.
Karen Young	El Dorado
Don Stopfel	Southern routes. Virginia Parkway or ElDorado
June	It depends on where I'm going. I'll take Virginia or Eldorado over and come up most of the time
Michael Galli	Wilmeth
Chris Ellis	Virginia Pkwy
Lynn Ballard	Virginia, White, Wilmeth, Eldorado
James Gebhart	Virginia Parkway, El Dorado
J.D. Askew	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Cynthiann Kesterson	
Bill Carpenter	Express route/loop north of existing 380(south of Outer Loop) that spans from Custer in the west to 78 in the east. Very similar to proposed "Yellow Alignment" in TxDOT study.
Amy Kennedy	
Kenneth Russell	Convert 380 to a freeway
E R Griggs	Concerns with intersection at 490. Already impossible, to pull out onto 380 during rush hour. With population growth in increases traffic. Not only for those on 490 & 491, but also at Princeton lakes.
Elizabeth Lowe	Make it an Interstate like 75 with a through highway and side roads using the existing roadway. This roadway should connect with 35 in Denton and 30 in Greenville.
John George	Complete the road work further west on 380 first. Thoughtful planning needs to be given to the access of the new businesses surrounding the 380/Hardin intersection. I do not feel that widening the road would make an appreciable difference
Brent Holdburg	
Dennis seeman	Widen the existing road and eliminate the cross streets
Kelly Hendrey	
Tiffany Turpen	Needs to be wider and maybe even speed limit lowered. Which may not matter on lowering speed limit people are always going way over. So maybe more police.
Cathy Tweedt-Irwin	Widen it and add a lane on both sides.
Kay	
Kale (Unreadable)	
Alexandre Antonio	I believe that this route should be turned into a freeway to avoid traffic lights from McKinney to Denton.
Jerald & Donna Dolvin	
Paul Lastrapes	Either a loop north of 380 or make 380 similar to SH121
Patti Spangler	Toll road that would relieve traffic sooner rather than 10—15 years from now.
Karen Young	
Don Stopfel	It seems 380 has choke points at some major intersections where traffic backs up. I suggest overpass bridges where appropriate @ an elevated multi-level bridge config at Hwy 75 north & south
June	Overpasses for people trying to go through the area
Michael Galli	Widen the road or build a freeway
Chris Ellis	Freeway to lessen stops from 75 to farther suburbs
Lynn Ballard	Get plans for outer loop done to compliment 380 solution, pull thru traffic out. Freeway is preferred for safety and flow.
James Gebhart	Freeway is a good alternative.
J.D. Askew	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Cynthiann Kesterson	
Bill Carpenter	With the growth of the county and specifically northern McKinney, I support building of the freeway.
Amy Kennedy	Yes
Kenneth Russell	Yes.
E R Griggs	yes
Elizabeth Lowe	No, use the existing route for the most part.
John George	Yes
Brent Holdburg	
Dennis seeman	Yes
Kelly Hendrey	
Tiffany Turpen	Yes
Cathy Tweedt-Irwin	No.
Kay	
Kale (Unreadable)	If a freeway is constructed I do not believe crossing lake lavon would be necessary.
Alexandre Antonio	I support the building of freeway at the same place US 380 currently is.
Jerald & Donna Dolvin	Yes- but not regardless of alignment
Paul Lastrapes	Yes
Patti Spangler	Yes, give it to a toll company so it can be completed in the next 5 yrs
Karen Young	
Don Stopfel	Yes. Congestion relief is necessary
June	I think you are already behind with an east/west corridor for the population to the north. I think there needs to be one north of 380 for the population explosion occurring north of 380.
Michael Galli	Yes
Chris Ellis	Yes
Lynn Ballard	Yes
James Gebhart	Yes
J.D. Askew	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Joseph R Rosenberger	
Cristi Littrell	The speed of traffic and people turning into and out of businesses.
Mari J Echavarria	Yes - not traffic controlled - to may cars.
Bob Drury	Congestion
Ron Wagner	to crowded
N Soucy	Nightmare traffic, especially at 380 & 75
Thomas Johnson	As I am on 380 2 - 3 times every day the traffic pattern that I have noticed Custer 380 to the east McKinney city limits is . Heavy traffic is a issue from 6 am - 11am & 4pm to 7pm. Moderate traffic 11am - 3pm & 7pm - 11:30 Light to virtual non existent much of the remaining hours.. The existing road setup will within 5 years become virtual stop and go traffic
Kirk Davis	Starting to be too congested already. This survey should have been started 4 years ago when this area was already being built up at a rapid pace. By the time the problems with 380 are ironed out years from now, it will be too late. And like everything else TXDOT and the Politicians do, they will be years behind construction instead of planning, AND PREPARING, for the future.
J. English	Too many accidents.
Lori Haberberger	Congestion, lack of alternate routes. The congestion west of Princeton is where the problems start.
	No.
Novle Rogers	
AJ Sanchez	It's dangerous, overcrowded, and it's getting worse. The lights between Princeton and McKinney are badly timed. There is a consistent slowdown between Princeton and McKinney every morning going West because the lights
Megan	Traffic and dangerous
Joshua Strain	Traffic is overwhelming. No flow and constantly backed up. Speed limit is too high with so many traffic lights. Dangerous with lots of accidents
Sue Neal	Yes! There are NO street lights at all along 380. Please install street lights with yellowish, not harsh bright bluish, lighting
Lori Gage	Congested
	380 between lake forest and 75 heading east and from highway 5 west to 75 is already terrible without all of the new stores that are opening between 75 and lake forest.
Rod VanHoose	Far too many access points, cross streets and resultant traffic lights. Since the widening and 'improvements' it now takes 50% more time to get from McKinney to Denton.
Dacia Page	Yes, traffic is a nightmare during rush hour traffic and morning traffic. People drive faster than they should, don't use their signals and basically don't pay attention to the road and other drivers.
Juli Westcott	I am concerned about the increased traffic that will occur from the development of the Hardin/380 interchange.
BRADLEY WEHNER	
Amy Ravitz	The number of accidents, the number of trucks, and the ability for people to cross over three lanes of oncoming traffic and sit at the median to go the other way.
David J McGill	The speed of the traffic for the amount of new businesses that are being built. The traffic buildup around 380/75, 380/Preston, 380/Tollway, 380 between FM423 and FM720.
Ashley burns	Speeding, crazy drivers
RJ Regenold	
Gary Cox	Way too many traffic lights

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Joseph R Rosenberger	
Cristi Littrell	Virginia or Eldorado
Mari J Echavarria	546
Bob Drury	FM roads to the north of 380
Ron Wagner	none
N Soucy	Virginia pkwy, Lake Forest to Preston Trail (cr 123?)
Thomas Johnson	Virginia, White
Kirk Davis	Eldorado. It's pretty sad since there is no REAL alternative within close proximity to where I live that traffic will flow fairly unimpeded.
J. English	Small county roads to the north of 380.
Lori Haberberger	2nd street in Princeton, back roads to Hwy 546
	121
Novle Rogers	
AJ Sanchez	I usually end up just waiting because any alternative route is jammed with people trying to get out of 380 traffic
Megan	Live off 380 so have no alternative routes
Joshua Strain	No alternatives available
Sue Neal	Lake Forest to Virginia to I-75
Lori Gage	
	Virginia west to Custer then Custer north to 380
Rod VanHoose	Show me one!!
Dacia Page	I am not sure the street names, but it's a back way to Hwy. 5.
Juli Westcott	I usually take Virginia.
BRADLEY WEHNER	75 Central Expressway, Virginia Ave
Amy Ravitz	It has never happened to me, but I would go south and take Virginia Parkway as an alternative route.
David J McGill	There isn't a good way, I just deal with the traffic.
Ashley burns	982 through lavon area to Bethany road
RJ Regenold	Eldorado
Gary Cox	Not really any good choices to go from McKinney to Denton and back

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Joseph R Rosenberger	
Cristi Littrell	An access road with lights for people turning into or out of businesses.
Mari J Echavarria	More traffic signals - lower speed limit - extra lanes.
Bob Drury	Make 380 a freeway
Ron Wagner	new by pass
N Soucy	Overpass at 380 & 75
Thomas Johnson	Widen existing road by 2 lanes each way without rerouting & add flyovers for existing intersections
Kirk Davis	Widening by adding lanes NOW, not 6 months or 2 years from now are needed. At the rate construction moves, it will still be too late to adequately handle the traffic load withing 6 months from now.
J. English	Either widen it with frontage roads and remove all stop lights or put in a bypass.
Lori Haberberger	More lanes west of Princeton. Also some way to bypass the traffic lights at Monte Carlo, Bridgefarmer, and Airport Road would reduce the congestion tremendously.
	Overpasses at red light
Novle Rogers	
AJ Sanchez	Build the biggest freeway you can that will be able to relieve traffic now and accommodate all the people coming for years to come
Megan	
Joshua Strain	Turn into Highway
Sue Neal	Light it up
Lori Gage	Widen in areas if possible. Create bypass north of 380.
	Bypass east of route 5 to DNT north of Prosper then connecting to 380 or continuing west to Denton.
Rod VanHoose	Restrict access and eliminate half of the 35 traffic lights between Denton and Hwy 75.
Dacia Page	
Juli Westcott	It might be good to have “thru” lanes or express lanes for people driving to the tollway or to Denton.
BRADLEY WEHNER	
Amy Ravitz	A good number of high school students travel Route 380 to get to school. Please keep those new drivers and their likely routes in mind in making changes.
David J McGill	Northern loop between McKinney (75) and Denton (288).
Ashley burns	
RJ Regenold	
Gary Cox	Make it a true highway with no traffic lights

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Joseph R Rosenberger	
Cristi Littrell	yes
Mari J Echavarria	Possibly
Bob Drury	Yes
Ron Wagner	yes
N Soucy	Not sure
Thomas Johnson	No - your projected realignment may help 380 initially but my feeling is that within a few years you will be revisiting the 380 main road expanded usage issue. Fixing by rerouting seems to be throwing good money away that could be be better invested.
Kirk Davis	YES!
J. English	Yes.
Lori Haberberger	No. One option showed a freeway that circled quite a bit north of Princeton. That would add even more mileage. I would not support any type of toll road!!!
	Yes
Novle Rogers	No, I just want to make sure that the natural parks do not get disturbed.
AJ Sanchez	Yes. The traffic here doesn't stand a chance at getting better unless a freeway is put in
Megan	Yes
Joshua Strain	Not sure what that means
Sue Neal	No. Needs a loop
Lori Gage	Yes
	There needs to be some solution. We can't stay stat it's quo.
Rod VanHoose	NO!
Dacia Page	Yes, if it helps traffic congestion I am all for it.
Juli Westcott	I'm not sure what this question means... I would want to see plans for any freeway construction before I could say whether or not I support it.
BRADLEY WEHNER	Yes
Amy Ravitz	I'm undecided but agree that trucks and travelers need an alternate route away from shoppers and student drivers.
David J McGill	Absolutely.
Ashley burns	
RJ Regenold	No, definitely not through Erwin Park.
Gary Cox	Yes.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Christi Dowdy	The main problem is that people do not know how to drive. Need more police on a daily basis.
Greg	Traffic... speed
Clint Norris	It sucks from tollway to Denton to and from congestion
Alyson Evans	Yes! Too many lights. Too many people getting on and off at slow speeds. I get stuck behind big trucks that hit lots of red lights and don't get up to speed in between. Too many accidents. Hard to get out from businesses into road. People driving slowly because they plan on turning. So many business entrances and exits on the road. Construction makes the lanes very narrow. I don't feel safe driving this road.
William Shelt	yes, safety due to traffic congestion.
Johnny Rodriguez	Yes, very congested, construction, hazardous.
April Lynn Adams	Congestionat the 75 - 380 intersection
	No
Tonia Pilliod	No
Matt Phillips	
Veronic Honeycutt	traffic, accidents
Sean Thompson	Increased noise levels and loss of open spaces along the 380 (New construction)
Philip Smith	Yes need access roads to reduce amount of lights on 380.
Cathy Buchfink	More traffic than it can handle.
John Kizlyk	poor exit ramps that do not leave enough distance to allow you to move to the right lane safely (northbound from US75)
	Too many cars!
Alan Rice	The number of traffic lights and increasing number of residential areas opening up all along 380.
Melissa Johnson	Congestion
	The traffic lights are out of sync and do not allow enough time for cars to move through at Preston Rd and the North Dallas Tollway, as well as the lights all through Little Elm and Crossroads.
Jay Halderman	It is congested due to the lack of alternate routes, especially lack of freeway
Gordon Hackett	Traffic volume and narrowness of existing lanes.
Cynthia Gabriel	Don't destroy additional land for expansion
Greg McIntire	Traffic moving too fast, lane cross-over accidents too often, too many cars!
Nita Downum	
Martin Olgin	Amount of traffic and high speeds, especially by commercial vehicles
Matt Payne	Yes, it is congested most of the time in the areas that I travel through McKinney. In fact I do my best to avoid it.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Christi Dowdy	There are no alternate routes to take for my commute
Greg	Airport rd or 546
Clint Norris	Anything but 380
Alyson Evans	121 to I-35, and El Dorado through Frisco to I-35
William Shelt	route 428 between McKinney and Denton
Johnny Rodriguez	Depends on route/direction taken: Custer, Virginia Pkwy, Hwy 121, Hardin,
April Lynn Adams	Virginia or EL Dorado
	I've never found it to be overly congested execpt at 75 where all the commercial area is and that would be understandable.
Tonia Pilliod	Virginia Parkway in town, otherwise I just grin and bear it.
Matt Phillips	
Veronic Honeycutt	FM 546, Bridgefarmer, Myrick
Sean Thompson	Virginia Parkway
Philip Smith	Take El Dorado to Lake Toll-bridge or use Fishtrap Rd.
Cathy Buchfink	Virginia street in McKinney
John Kizlyk	TX121, Virginia Pkwy, Eldorado Pkwy
Alan Rice	The primary alternative route would be 75, down to the 121 tollway, but I don't want to pay the tolls so I just take the access streets, which has numerous traffic lights along it as well.
Melissa Johnson	
	None since this is the most direct route to my job.
Jay Halderman	Depends on the destination. Parallel roads when local. 121 to 35 if west and no good alternative going east.
Gordon Hackett	I am restricted to 380 until I can exit via Airport in McKinney.
Cynthia Gabriel	Virginia, El dorado, 121
Greg McIntire	Monte Carlo, FM 982 - Across lake at 546
Nita Downum	
Martin Olgin	Virginia or even Eldorado and finally 121
Matt Payne	I will utilize Wilmeth road and Virginia Pkwy. If travel further distances to the north west, I go to Sherman and take 82 west.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Christi Dowdy	Keep the existing route, but make it 6 lanes
Greg	
Clint Norris	Widen the freaking lanes to four your going to have more congestion with more residents there are no faster alternate routes to take acept tollway and thats even more congested tollway sucks to
Alyson Evans	Some how get less lights and intersections. They feel dangerous and slow down traffic. Better entrances and exits from businesses and neighborhoods.
William Shelt	blue or yellow route
Johnny Rodriguez	Develop a loop around McKinney and contiguous towns or development such as the loop in Denton, 635, PGBT.
April Lynn Adams	
	The 380/75 interchange is where the backup happens
Tonia Pilliod	
Matt Phillips	
Veronic Honeycutt	I have none.
Sean Thompson	Public Transportation options need to be available in order to reduce vehicle traffic along the corridor.
Philip Smith	
Cathy Buchfink	Overpasses at main intersections
John Kizlyk	add additional lanes, build overpasses so that traffic signals can be bypassed to keep traffic moving.
	Extra lanes. Bridges
Alan Rice	I really like the flyover approach that is being implemented at Preston and 380. If that same approach could be implemented as much as possible along 380, but at least at Custer, that would greatly reduce my drive time.
Melissa Johnson	I like the freeway option. I am concerned that the alignments will affect my neighborhood, Waterstone Estates.
	Resync the traffic lights to allow better flow along 380.
Jay Halderman	Complete the outer loop
Gordon Hackett	Widening and adding additional lanes. Providing turn lanes and longer exits & entrances onto 380. Increased law enforcement presence.
Cynthia Gabriel	Put up walls and trees to keep the noise and smell down
Greg McIntire	Controlled access hi-way Break away walls to prevent cross-over accidents
Nita Downum	
Martin Olgin	Make it a freeway like Hwy 360 with service roads
Matt Payne	I don't have any thoughts other than an outer bypass that is further north, maybe through Melissa or rural McKinney where development is minimal.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Christi Dowdy	No
Greg	Mostly
Clint Norris	yes
Alyson Evans	I would
William Shelt	no
Johnny Rodriguez	If this relieves traffic congestion between the major populations from Princeton, McKinney and Denton. Unfortunately, this population area will continue to be developed and there needs to be planning/solutions to relieve traffic congestion with population boom.
April Lynn Adams	No
	no
Tonia Pilliod	No
Matt Phillips	
Veronic Honeycutt	I don't know Maybe....
Sean Thompson	No, where the freeway is placed and what it replaces is important. Careful consideration should be taken in mapping out a new freeway.
Philip Smith	
Cathy Buchfink	It depends on the alignment chosen
John Kizlyk	No, I do NOT.
	Yes
Alan Rice	Not sure what “regardless of alignment” means, but I do support the building of a freeway. I do not want it to be a toll. At all. Not even a little bit. If that’s what you’re asking.
Melissa Johnson	Yes
	yes
Jay Halderman	No. It's gone too long without being addressed and now there are some options on the table that would be too disruptive to business or neighborhoods and some that seem non-nonsensical (routing way off current 380 for short distances) I think completing the outer loop is a better use of funds.
Gordon Hackett	Yes. Increasing population demands it.
Cynthia Gabriel	
Greg McIntire	Yes
Nita Downum	Only if it’s not a toll. We are tolled to death in the Dallas area. Our gas tax should be paying for these freeways.
Martin Olgin	Yes
Matt Payne	I believe that a freeway is needed, but feel that it's best to place it in areas that are not already developed.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Katie Barber	None.
Heather Groff	Can get to crowded
James Glenn	Congestion
Dayn Jackson	It is becoming more congested and with all the traffic lights along the way, the semi-trucks that use it really slow the traffic flow.
Jim Funsch	Yes access to 380 during rush hour is some time suicidal
Rhonda Kenyon	For being a highway there a lot of red lights and is very dangerous to drive on
Kelly A Himes	The traffic and lights are terrible the closer you get to central. It is very dangerous to get on 380 without traffic lights.
Andrew Tate	as it gets towards 75 it becomes very congested
Elaine Carter	The area on and off of 75 is usually so crowded that it's quicker and easier to take surface streets, so residential areas around Louisiana/Virginia get a lot of traffic.
Rudy Zupanic	Always congested in McKinney. I also travel to Greenville every week and continuously hit traffic through Farmersville and Princeton. It's continually getting worse.
Jennifer Allison	Yes. Poor timing of traffic lights leads to congestion and traffic backup. Lack of right turn lanes means that traffic backs up at intersections. The intersection at 380/75 is a complete mess due to people waiting til the last minute to merge into right turn lane because of traffic backup from shopping center.
Tim Tholen	Too noisy!
Rob Astle	
Stacy Apple	major congestion at the 75 intersection
Erika Schmit	Too small. Not enough access. There are no better routes
Scott A Vick	Traffic is too congested, too many stop lights, having to sit through them multiple times
Sandra Katada	Congested certain times of day.
Mike Masinelli	
Jeff Young	380/75 bottleneck.
Adam	
Casey Murrell	
Peter Wiltse	Severely congested. Dangerous with turning into residential areas.
Ashton Curtis	
Robert McNaught	Costco and movie theater going in with no space to handle flow.
JANE KINTZ	Its has too many cars.
Matthew Keith Kerns	congestion on 380 west of 75
Cathryn Beresford	The number of cars and signals and speed do not make a safe environment.
William Elliott	Traffic has become very congested at times.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Katie Barber	Virginia.
Heather Groff	Country Roads to 75
James Glenn	Patiently waiting
Dayn Jackson	If I am trying to get to Hwy-75, I may take a southbound road like Hardin Rd or Community Ave to get to White Ave and the then merge onto Hwy-75 at White Ave. If I am going East and want to avoid major congestion, I would take Custer Rd going southbound to Hwy-121 and use the frontage road or toll road.
Jim Funsch	None - Just like with it.
Rhonda Kenyon	Virginia Pkwy or 121
Kelly A Himes	Virginia but it is under construction
Andrew Tate	SRT 121, Eldorado or Virginia
Elaine Carter	Wilson Creek and Redbud, or Wadill.
Rudy Zupanic	I cut around airport road to get past the I75 380 area.
Jennifer Allison	South on Hardin to White going eastbound. Wilmeth road coming westbound from 75.
Tim Tholen	Virginia Parkway
Rob Astle	Eldorado, Frisco Main
Stacy Apple	Custer
Erika Schmit	None available
Scott A Vick	If going west of Denton, I-30 If going north to Winstar, 75 to 82
Sandra Katada	Virginia, White
Mike Masinelli	
Jeff Young	Virginia Pkwy/other side roads.
Adam	
Casey Murrell	
Peter Wiltse	Can't,have to go on 380.
Ashton Curtis	
Robert McNaught	FM455 to Pilot point. Wilmeth road. 121
JANE KINTZ	back roads
Matthew Keith Kerns	I don't feel like I have a good alternative route
Cathryn Beresford	Down Hardin to any street that will get me to the I 75. I need to get south of 380 - 99% of the time.
William Elliott	White Ave is alternate route to go east on 380.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Katie Barber	
Heather Groff	Overpass above
James Glenn	
Dayn Jackson	The Red Route would be my first option. There is way too much traffic on 380 near the Hwy-75 corridor and widening 380 through that area would only exacerbate the current situation. There is so much traffic in the morning at that location that often the platoon of vehicles will extend from one signal light to the next with cars stopped in the intersections even on green lights. Any you want to add even more traffic by widening 380 through that section? The Green Route does not seem like a feasible solution.
Jim Funsch	Build a freeway
Rhonda Kenyon	Protected lanes when getting onto 380
Kelly A Himes	Something similar to what they did for Preston road in Frisco.
Andrew Tate	widen it near McKinney
Elaine Carter	A better on/off ramp is needed at 75. Major construction to turn 380 into a true highway with service roads could eventually benefit the area, but that would take many years and a lot of annoying construction. Local businesses would also take a hit.
Rudy Zupanic	Somehow create a loop around the Mckinney Princeton and Farmersville conjeston areas.
Jennifer Allison	Improve timing of traffic lights so you don't have to stop and wait at each intersection. Implement right turn lanes so that traffic continues to flow in 3 lanes at intersections instead of backing up due to people turning right. Add an additional right turn lane at 380/75 similar to the way the intersection is at Custer/121.
Tim Tholen	Freeway with noise barriers in residential areas.
Rob Astle	Intersection bypasses/overpasses are nice. Turn lanes (left and right) with adequate space to reduce speed would help to keep traffic moving better.
Stacy Apple	75 bypass, lights timed for the amount of traffic flowing
Erika Schmit	More lanes.
Scott A Vick	3 lane highway both ways with exits for existing streets
Sandra Katada	Divert north
Mike Masinelli	
Jeff Young	Bypass
Adam	
Casey Murrell	
Peter Wiltse	bypass Princeton area.
Ashton Curtis	
Robert McNaught	Freeway by use of Eminent domain.
JANE KINTZ	turn it into a full highway
Matthew Keith Kerns	
Cathryn Beresford	Make 380 a fwy. Take the lights out, add lanes and then create other 4-6 lane roads like Custer etc. that the public can use to get around the area.
William Elliott	The suggestion that are on the books look feasible. It want be up to me, but the engineers will be the final word.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Katie Barber	Oh no. Please no.
Heather Groff	No
James Glenn	
Dayn Jackson	NO! My home is in La Cima Manor (near Stonebridge/380). A freeway would add additional traffic volume, noise, access roads, and negatively impact the value of my property.
Jim Funsch	Yes
Rhonda Kenyon	Yes as long as it is not a toll. We have enough toll highway.
Kelly A Himes	Not sure
Andrew Tate	As long as it is a FREEway. We are fed up with toll roads.
Elaine Carter	Yes, as long as construction is undertaken with minimal traffic impact (road closures at night, etc.)
Rudy Zupanic	Yes and would even support a tolllway to get it done quicker
Jennifer Allison	No. If Prosper has voted not to allow the freeway through their city, I don't see why McKinney has to pick up the slack. It makes the most sense to implement a "freeway" coming from the DNT --> 75, otherwise you are just pushing the congestion west of Custer as there is more development in that area, and disproportionately negatively impacting McKinney residents to the north/south of 380.
Tim Tholen	Yes
Rob Astle	Yes
Stacy Apple	No, there are high schools barely off 380. With young drivers, a freeway could be very dangerous.
Erika Schmit	Yes
Scott A Vick	Yes!
Sandra Katada	No
Mike Masinelli	
Jeff Young	Yes
Adam	
Casey Murrell	
Peter Wiltse	yes
Ashton Curtis	
Robert McNaught	Yes.
JANE KINTZ	yes
Matthew Keith Kerns	i don't know what you mean by alignment
Cathryn Beresford	Not if it’s going to make a large number of homeowners loose their homes. 380 is there- we should use that to create a freeway.
William Elliott	Yes, the congestion at 75 and 380 has become worse daily.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Glenn Mieritz	Trucks speeding.
Frank Buhr	Not yet.
George Steed	The number of stoplights between 75 and 35. There are nearly as many on 380 as there are on roads like Virginia or El Dorado. It's build like it's a city street, not a highway.
Mitch Murray	No
Judy Box	Amount of traffic
Wes Webb	Too many lights between the tollroad and Denton
Lynn Brooks	Traffic is horrid at 75 and 380 and I avoid that area and shopping there because of it.
	Congestion, safety
Edward Thompson	Traffic.
Christina Osmer	Lights need to be timed better.
Mark Crockett	The combination of high speed limits, improperly-timed traffic signals, and a growing number of business plazas increase the risk of collisions.
Angie Farmer	
Dori Chelland	Very congested and cars speeding.
Gabe Fain	Large construction and hauling vehicles travel fast
Johnny Johnson	Traffic congestion between Custer and Hwy 5
Russell D Roy	
Matthew Link	Currently there is no way to move more than a mile or so without experiencing extreme slow downs due to traffic signals and turning vehicles
Miguel A Avalos	with the growing rate of mckinney, congestion is becoming unbearable not only during peak hours but throughout the whole day. Not to mention the upcoming opening of Costco and Cinemark, which will definitely flood US380
Marci Williams	Yes traffic congestion.
Louann Smith	no
Paulette M Trusty	
Matt Morgan	Congestion seems to be increasing by the day.
Shakti SHANDILYA	Gets congested
Amie Lyman	No
Tom Wenzel	I know that it is extremely busy and with more business coming in like Costco it will become even more dangerous for the consumers to get where they want to go. There are times that I go south into Allen or Plano to do shopping than go north into McKinney and giving tax money to them.
Jennifer Richardson	Between 75 and Hardin very congested
Barbara Berliner	Lots of traffic

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Glenn Mieritz	Virginia pky or Eldorado Dr
Frank Buhr	
George Steed	It depends on how far I'm going. I go down Virginia or El Dorado of if going far down 121.
Mitch Murray	Westridge Virginia
Judy Box	White, Virginia or El Dorado
Wes Webb	Eldorado or Virginia
Lynn Brooks	Virginia, White St.... I have many go arounds as long as I"m not stuck at 380 and 75
Edward Thompson	Virginia Parkway
Christina Osmer	Virginia
Mark Crockett	US-75 service road and city streets like Virginia pkwy.
Angie Farmer	
Dori Chelland	Virginia Pkwy
Gabe Fain	123/prosper trail, virginia, and el dorado
Johnny Johnson	Wilmer or White
Russell D Roy	
Matthew Link	
Miguel A Avalos	Virginia/Louisiana if i need to go west/east of 75, which is a lot of people's alternative causing congestion.
Marci Williams	Virginia or Eldorado Parkways
Louann Smith	none
Paulette M Trusty	
Matt Morgan	On occasion, I'll utilize Rock Hill Road, but the condition of the road is awful.
Shakti SHANDILYA	Virginia pkwy
Amie Lyman	Eldorado or Virginia
Tom Wenzel	Back streets into residential areas
Jennifer Richardson	Any way to avoid the area.
Barbara Berliner	Virginia/rockhill

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Glenn Mieritz	Control speeders.
Frank Buhr	No trafficking lights. More of on ramp off ramp
George Steed	Raise the highway. Put underpasses at all major intersections. Routing short sections far to the north is useless except for only those people who live in the vicinity of those "bypasses".
Mitch Murray	Overpass at major intersections
Judy Box	Build a bypass for through traffic
Wes Webb	Addition of another lane
Lynn Brooks	Not sure why we need to spend tax money on this.....
Edward Thompson	Any of the proposed solutions are fine with me but partial to red route.
Christina Osmer	Expand Wilmeth or another road North of 380 to run East/West to 75
Mark Crockett	Make all turn signals flashing yellow instead of "turn on green only." Align traffic signal timing for the majority of traffic and hold US-380 signals longer.
Angie Farmer	
Dori Chelland	Lower speed limits
Gabe Fain	widen with overpasses at main intersections like prosper and frisco are spring at preston
Johnny Johnson	Create aNorthern route
Russell D Roy	
Matthew Link	
Miguel A Avalos	1. ramp for quick access to hwy 75 or a double decker (free flow above, going through stoplights below on current street 2. sync stop lights. 3. increase green light on 380 for faster flow.
Marci Williams	Bypass arteries north of 380 or east of 75.
Louann Smith	upper lanes for thru traffic
Paulette M Trusty	
Matt Morgan	I believe the highway should be 8 lanes from US 75 to DNT.
Shakti SHANDILYA	
Amie Lyman	Lower toll road costs or take tolls away so people will be more apt to take other freeways besides 75.
Tom Wenzel	Go north well before Baylor Hospital and come back in east of McKinney somewhere, I am not familiar with the east area on McKinney.
Jennifer Richardson	Widening the road with turn lanes for left turn and right turn.
Barbara Berliner	Tollway? Or highway

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Glenn Mieritz	Not really. Need more information!
Frank Buhr	Yes
George Steed	I cannot answer this because I don't know the context of "regardless of alignment". This is a poorly worded question.
Mitch Murray	Not sure
Judy Box	Yes
Wes Webb	As long as there in no toll. There are already too many tollroads in Texas.
Lynn Brooks	no
	Yes
Edward Thompson	Yes.
Christina Osmer	No
Mark Crockett	I support building a bypass NORTH of US-380 that connects US-380 about 5 miles on either side of US-75.
Angie Farmer	
Dori Chelland	Yes
Gabe Fain	no
Johnny Johnson	Yes, if it relieves congestion between Custer and Hwy 5.
Russell D Roy	
Matthew Link	
Miguel A Avalos	yes!
Marci Williams	Not on the existing 380. There is still plenty of farmland north of 380 to build a freeway.
Louann Smith	yes
Paulette M Trusty	
Matt Morgan	Not regardless of alignment. A freeway is certainly needed, but there has to be a common sense approach to the routing. I live less than a mile South of the existing highway and wouldn't want it any closer to my neighborhood.
Shakti SHANDILYA	Yes
Amie Lyman	No
Tom Wenzel	Yes
Jennifer Richardson	No
Barbara Berliner	Yes

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Kristina Kvalheim	It's seemingly a death trap! That's more about the people I suppose, and not the road itself. The area is being over populated too quickly and therefore is leading to too much congestion. 380 was busy 6+ years ago and it's only gotten worse.
Jennifer Mangrum	There is too much heavy truck traffic.
martha mcdowell	no
Jen Alvarado	Safety, speed, safety of my young drivers on route, Large truck congestion and safety to other drivers
Troy Hogue	Yes. Way too congested and too many lights.
Victor Zepeda	It's too dangerous. I try to avoid it when I can, but the number of accidents and fatalities is staggering.
	Congestion at 75. I avoid 380 as much as possible. I'd like to use it more.
Mia Griggs	There are a lot of accidents and they are often fatal. All the 18 wheelers use it and the speed limit is high, yet kids use it to drive to school and McKinney residents use it to get to the Northern part of McKinney and Central Expressway.
Chris Ottinger	Safety
Shane Cheek	It is getting very congested and much longer commute times over the last few years.
Dustin Cohen	It has become increasing dangerous to drive on 380 in its current condition. There are daily wrecks just on the small portion that I drive.
Jen Alvarado	Speed, accidents, my young drivers safety on it, big work trucks use, safety and speed
Kinney Barcuch	It sucks as it sits. Too much traffic congestion and way too many lights.
Jerry Rabenaldt	I'm against every route that would dump traffic directly into Stonebridge Drive. I'm also against any route that will alter Erwin Park in any way.
Patrick Capel	Too many lights, too much congestion. Often cannot get through 380/75 interchange because it is clogged both ways.
Connie Eggleston	Congestion at junction w/75. Prefer keeping 380 local w/loop around 75 - red route.
James E Fowler	Heavy truck traffic; increasing development along 380 resulting more local traffic: poor traffic flow at 380/75 resulting in delays.
Jennifer Featherston	
Clay Brantley	Too much traffic. Too congested now and business are growing along 380.
Kim Sudtelgte	
Alisha	
Chelsey Cole	
Jimmy L Lanier	Yes, it is crowded, dangerous, has too many stoplights, and has businesses built too close to the road. It needs to be converted to a freeway
Paige CHRISTISON	
Robert Dietz	Traffic gets bad during certain times of days affecting my desire to use it or shop at the adjacent businesses.
Glynn r williams	From McKinney to Princeton and Texas the posted speed means nothing the traffic is way too much and too fast

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Kristina Kvalheim	I honestly avoid it as much as I can. So I'll take Virgina and Eldorado as Far East or west as needed and then head north.
Jennifer Mangrum	I will divert to Virginia if have too.
martha mcdowell	121
Jen Alvarado	Virginia, white, Stacy to 75
Troy Hogue	Virginia; El Dorado; 121; 82
Victor Zepeda	I generally use El Dorado as an alternate route.
	Virginia and Redbud
Mia Griggs	Virginia Parkway to 75. Sometimes I'll use Lake Forest or Hardin to cut over.
Chris Ottinger	Fishtrap Rd
Shane Cheek	Virginia Pkwy or Eldorado Pkwy
Dustin Cohen	I drive through the historic district neighborhoods.
Jen Alvarado	Virginia, White, Wilmeth and Stacy to 75
Kinney Barcuch	SH121 tollway. I would rather pay than to have to deal with the lights and traffic.
Jerry Rabenaldt	Virginia, Lake Forest, Wilmeth, White St. It all depends on where I'm going.
Patrick Capel	White Ave, Wilmeth Rd
Connie Eggleston	Virginia to 75 access road or Eldorado.
James E Fowler	Virginia or El Dorado
Jennifer Featherston	
Clay Brantley	El Dorado west but that is out of the way to get to Denton. Sometimes down 121 to 35 and up.
Kim Sudtelgte	
Alisha	
Chelsey Cole	
Jimmy L Lanier	I take SRT to 35 and up to Denton if I don't want to deal with 380.
Paige CHRISTISON	
Robert Dietz	Virginia Pkwy
Glynn r williams	We have a farm bridge from a road trip to the north we can go the back roads through new Hope when there is a wreck or just too much traffic every time my wife goes one time in the morning And then again in the afternoon with my daughter to feed and take care of the horses that we have showhorses there's a wreck on 380 I just came through from Princeton back to McKinney on Sunday and two people coming from Newhope ran a red light didn't even slow down thank God There was nobody there they pulled out in front of me

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Kristina Kvalheim	Honesty, slow down development! There is too much going up too quickly. I can't imagine making more lanes, that would be even worse to cross but the more that's built on 380, the more cars on the road. Maybe lower the speed limit in the area where it's higher; people don't pay attention to those turning. People jet out in front of cars going 55+ miles per hour. With as many turn offs and stop lights as there is, the limit really shouldn't be over 45!
Jennifer Mangrum	Just giving trucks another route to take would help the flow of traffic a lot.
martha mcdowell	double deck exisisting 380
Jen Alvarado	
Troy Hogue	Widen it to a freeway...OR make a REAL loop that bypasses the entire current 380 from McKinney to Denton. Do NOT make a half-way by-pass and shoot it back onto 380 at Stonebridge or Ridge - what's the point of that? Connect a REAL by-pass from Princeton to the West side of Denton North by-pass! Think long-term and real please!!!
Victor Zepeda	
	Freeway
Mia Griggs	Slow it down through McKinney and give trucks an alternate route.
Chris Ottinger	
Shane Cheek	Tollroad or Managed HOV lanes
Dustin Cohen	I think bypassing the current 380 north is a decent solution.
Jen Alvarado	
Kinney Barcuch	make it a freeway. It should be like hwy 75 with exits to the major throughways
Jerry Rabenaldt	I would be most supportive of 380 becoming a freeway but I feel that TxDot is 10 years behind already.
Patrick Capel	Build bypass north of 380, possibly using Collin County Outer Loop. I thought that was the intent of the Outer Loop.
Connie Eggleston	Red option loop around 75.
James E Fowler	None of the proposals seem ideal.Diversion to the north begs the question of increased traffic from local development as well as how to get thru traffic to use a longer route.
Jennifer Featherston	
Clay Brantley	By-pass
Kim Sudtelgte	
Alisha	
Chelsey Cole	
Jimmy L Lanier	Make it a freeway. We need better infrastructure between McKinney and Denton.
Paige CHRISTISON	Build a new bridge freeway over the current route.
Robert Dietz	widen it or look at creating an alternate loop further out now for future growth
Glynn r williams	I've heard suggestions that there would be a loop to the self or to the north around new Hope Road that would take the commuters and give them a different route that will not fix the problem where the Traffic accidents or I would suggest breaking it down in segments with red lights more patrolling by the highway patrol and local law-enforcement and put some teeth into the phone traffic accidents or I would suggest breaking it down in segments with red lights more patrolling by the highway patrol and local law-enforcement and put some teeth into the Tickets

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Kristina Kvalheim	I'm guessing at some point it's going to be needed. But I'd honesty prefer it to be north of 380.
Jennifer Mangrum	Yes.
martha mcdowell	no
Jen Alvarado	Yes
Troy Hogue	Yes.
Victor Zepeda	Yes. Highway 380 needs to be a freeway, no matter what the alignment is.
	While I support the building of a freeway I worry about freeway noise at my property.
Mia Griggs	I like the idea of a freeway because it will include access roads as an option. But I'm not sure it will be good for Stonebridge and Tucker Hill. But at least you won't be displacing property owners.
Chris Ottinger	
Shane Cheek	YES
Dustin Cohen	Yes.
Jen Alvarado	
Kinney Barcuch	Yes
Jerry Rabenaldt	I support 380 becoming a freeway as long as the alternative options 1 & 2 are not pursued any further to dump major amounts of traffic directly into my neighborhood directly on Stonebridge Dr. where we become the major thoroughfare.
Patrick Capel	I think the alignment needs to make sense, and disrupt as few established communities as possible. If they built before there was a road planned there, you should let them be.
Connie Eggleston	No
James E Fowler	Yes or at least the modified version with overpass at major intersections. However, a true freeway would probably best serve future growth.
Jennifer Featherston	
Clay Brantley	yes
Kim Sudtelgte	
Alisha	
Chelsey Cole	
Jimmy L Lanier	Yes
Paige CHRISTISON	No
Robert Dietz	yes, 100%
Glynn r williams	Regardless of what I think one thing I've learned in the construction business is you cannot stop progress no one wants to lose their property or their business but it happens I've been involved with highway work mostly utility relocation For over 10 years and a metroplex 183 121 through Bradford Hearst Euless and a 35W project and Ft Worth it's a painful process for the people that live in the businesses that are there but everybody benefits when it's over so I'm don't make it But it always comes back thank you

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Renee Mooney	
Jason	yes of course.
Anne Staton	Suicide lanes are dangerous. Lack of frontage and merged entrances and exits. Density of trucks mixed with passenger vehicles is dangerous. Gridlock at most traffic intersections.
Drew Williams	Timing and coordination of lights. North US75 exit to 380 can be backed up on the highway during rush hour. The intersection at US75 and 380 gets congested frequently. Inconsistent speed zones causes confusion for motorists and contributes to ineffective flow of traffic.
Jennifer Sorenson	Traffic congestion, safety
Benito Orsini	Yes. The intersection of 380 and 75, East and West on 380 is a disaster. It is always too congested. With more retail going in at Lake Forest and 380 and also Hardin and 380, it is going to be worse.
Justin Miller	Rush hour congestions.
Matt Scott	Congested traffic with many 18 wheelers
Andrew Kissel	West of Lake Forest, the daily traffic patterns are not heavy, even during rush hour times. East of Lake Forest, the addition of right-hand turn bays along with improved traffic signaling control would alleviate the majority of the congestion, which is less about the volume of cars and more about their movement patterns - braking when someone wants to turn right with no dedicated right-hand turn lanes, etc.
Carol Pernsteiner	Traffic congestion near I75 and soon at Dallas North Tollway
Susan Warmack	It is my least favorite route due to congestion, traffic entering from side streets, too low speed limits which are ignored, and high volume of wrecks
Ginger Chang	yes. Cars drive very fast.
John Donnelly	
Paul Doherty	
	Slow moving traffic. Too Many lights that keep traffic from flowing. It's a heavily commuted road and very easy to have accidents with the number of stop Lights and people trying to beat them.
Randy Earle	Overcrowded
Brian Pierce	Too many lights. The way 380 has evolved makes me believe removing lights and adding a non-stop highway is impossible. I would hope some form of slightly more north non-stop highway would be in the works. This would help those looking to travel directly across City, and County, lines to do so without the congestion on the current 380 route.
Judy Colvin	Too congested, too much traffic, not enough lanes.
	Traffic is horrible, will continue to see more accidents. What makes it so bad is that it's not just a rush hour issue it's for significant portions of the day every day. Also it does begin to start easing up until you get to Ridge and then it's bad all the way to Princeton.
Eric Lee Zimmerman	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Renee Mooney	
Jason	Custer to El Dorado Parkway
Anne Staton	SH121 to I35. Or White Street. Or Community
Drew Williams	121 or Eldorado.
Jennifer Sorenson	Hardin north from my neighborhood to Wilmott to access 75. If I need to go West, there is no “time saving” alternative route
Benito Orsini	Are none for retail near the intersection of 380 and 75. Many days I avoid the area all together.
Justin Miller	Yes at rush hour times. 121 Toll or Eldorado pkwy
Matt Scott	Virginia
Andrew Kissel	I usually stay put. Taking any side roads usually wind up taking more time than just waiting.
Carol Pernsteiner	Virginia
Susan Warmack	ANY nearby Parkway is better than 380
Ginger Chang	Virginia Parkway or Eldorado Parkway
John Donnelly	
Paul Doherty	Eldorado Pkwy, or Custer if heading a north/south
	121
Randy Earle	Virginia
Brian Pierce	Currently I do not have a viable option. I would be traveling from McKinney to Cross Roads, Denton or Decatur. For these locations, 380 is my only option West.
Judy Colvin	Don’t have one, I suffer through the traffic :-(
	Have no choice but to take 380 as all other routes have you go through a bunch of lights and stop signs.
Eric Lee Zimmerman	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Renee Mooney	
Jason	Raise the highway from at least McKinney to Denton and use existing 380 as feeder roads.
Anne Staton	Construction of new loop highway with designated truck lanes
Drew Williams	Study to enhance flow of traffic by appropriately timing of intersection lights.
Jennifer Sorenson	Overpass style Hwy (Like Tollroads) that don't have stoplights except on access roads.
Benito Orsini	Expand 380 from lake forest to somewhere East of 75
Justin Miller	Outer loops.
Matt Scott	
Andrew Kissel	Better signal control. There are numerous technology companies who have produced AI-based software that have proven to alleviate traffic pattern congestion significantly. West of Lake Forest, more right-hand turn bays for retail entry.
Carol Pernsteiner	
Susan Warmack	Allow entry at fewer intersections. Remove stoplights at most junctions and/or set timing for better flow. Change speed limit to a more reasonable and consistent point.
Ginger Chang	
John Donnelly	
Paul Doherty	It seems pretty good, actually. Maybe widen it by a lane or two on each side?
Randy Earle	Freeway or alternate route farther north.
Brian Pierce	Got no more than 5 miles north of the current 380 and build a freeway that can connect I35 to HWY75, if not go further West and East of mentioned HWYs.
Judy Colvin	More lanes
	There needs to be a bypass that would allow Semi-trucks to stay on the outskirts of Mckinney, perhaps go through Weston and back in 380 west of Custer.
Eric Lee Zimmerman	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Renee Mooney	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Jason	I support the building of a freeway, but the alignment would have to make sense and I would like to see various options. I wonder what it would do to property values in the immediate vacinity.
Anne Staton	Yes
Drew Williams	As long as it is not a tollway.
Jennifer Sorenson	No. Alignment needs to be such that it interferes with business' as opposed to residential neighborhoods.
Benito Orsini	Yes
Justin Miller	Yes
Matt Scott	Yes
Andrew Kissel	No. Consider what the 30/75 interchange did to downtown/deep ellum/fair park? McKinney's "Unique By Nature" motto implies that we consider more creative and innovative ways to solve problems such as traffic than just plopping a freeway down.
Carol Pernsteiner	Yes
Susan Warmack	I don't support any change which is "regardless". Changes must be made; but should be made with MUCH regard for the impact on nearby citizens, neighborhoods, and traffic flow. Please be diligent as you decide for us what our quality of life will be.
Ginger Chang	no
John Donnelly	No
Paul Doherty	Yes. No tollway though. We have enough of that nonsense already.
	Overpasses need to be constructed to allow better flow. 380 and 75 is heavily congested. An overpass there would be great. Or a better solution to allow flow of traffic
Randy Earle	Yes
Brian Pierce	Do not build a freeway where the current 380 is. The traffic and congestion of 5+ years of construction would be horrible.
Judy Colvin	Yes!
	No needs to be beneficial for truckers, people out of town, and locals.
Eric Lee Zimmerman	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Scott Millman				Nearby resident		Weekly

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jennifer Cheek	The only concern is the fact the lights are not aligned. The traffic on 380 is not overwhelming and is standard for our area.
Nancy Price	Too many accidents near HWY 75
Eric Roberts	The current 380 is already getting too congested. Add in the amount of large truck traffic due to all the construction and it is a frustrating road to drive.
Cody Johns	Crazy busy, congested, poor light sequence, too many lights, needs exits or by passes. FAR too many commercial trucks and 18 wheelers. About 35% is huge commercial vehicles
Thomas Cross	No
ENRIQUE VELAZQUEZ	It seems is getting increasingly congested, more frequent accidents
Diane Beasley	Traffic as businesses are being built and more neighborhoods North of the 380.
Michael John Matusik Jr.	Most accidents I see on 380 seem to be fatalities.
Matt L Merritt	
Russell Swain	Yes, it should have been made into a limited access hwy years ago.
NFDavis	large trucks, commuters speeding and cutting through traffic trying to get through
Erin Conner	
	congestion, reckless driving, confusing traffic flow
Octavian Covaci	Not at this point. The only congestion I encounter is at the intersection of 380 with 75.
Jeffrey Davis	Number or stoplights currently on it.
Tina Herman Hamp	Congestion
Jeanne	No
Peggy Schmidt	No
Jeanne	
Mary Salmon	Existing US380 needs to be expanded with overpasses and entrance/exit ramps
Ed Smith	Yes congestion.
Dawn	No
Donald Hanson	I live in LaCima village and feel the traffic noise will lower our property value. It is getting noisier by the year now, making it carry more traffic at a faster pace will only get noisier!
Matthew	It is becoming more and more of a traffic nightmare. The intersection at 75/380 should have been designed using a four-leaf clover model.
Eric Baesel	No
Melody Smith	Too congested
Scott Millman	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jennifer Cheek	None.
Nancy Price	Virginia Parkway
Eric Roberts	I will either take Virginia to 75 or just not head East towards downtown at all.
Cody Johns	Virginia or Prosper Trail
Thomas Cross	N/A
ENRIQUE VELAZQUEZ	If driving to 75, no alternative. If driving south/south west, take Custer, or Preston or DNT down to 121
Diane Beasley	Virginia.
Michael John Matusik Jr.	I don't know if there are any other options coming from Greenville to Mckinney.
Matt L Merritt	
Russell Swain	I go the dirt roads north of mckinney.
NFDavis	FORCED TO TAKE 121
Erin Conner	
	fishtrap, 1st street, el dorado
Octavian Covaci	The only congestion I encounter is at the intersection of 380 and 75.
Jeffrey Davis	Tollways, El Dorado pkwy or Virginia pkwy
Tina Herman Hamp	I usually just wait it out.
Jeanne	No
Peggy Schmidt	Na
Jeanne	
Mary Salmon	
Ed Smith	Residential streets
Dawn	White
Donald Hanson	Virginia or some times Eldorado
Matthew	White Ave
Eric Baesel	Virginia Parkway and Frontier Parkway
Melody Smith	Residential
Scott Millman	Parallel roads such as Virginia Parkway, White etc

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jennifer Cheek	The 380 Corridor should not be changed. Rather TXDOT should look north where future development will occur and identify a path for a freeway north of 380 that can accommodate a freeway. Unfortunately, TXDOT and Collin County did not act proactively and allowed development to occur on 380. Any change to the corridor would ruin people's lives financially and would only serve to waste taxpayer money as lawsuits will be abundant under the proposed plans.
Nancy Price	More stop lights
Eric Roberts	1) Turn the current 380 in to Business 380 and create a new, main 380 which would bypass the bulk of the city. 2) Turn the lights on Business 380 so that you can actually make more than one green light while doing the speed limit. 3) Consider limiting or preventing all large truck traffic on the current 380 unless they are doing a local delivery.
Cody Johns	Exit ramps, over passes to avoid lights at smaller intersections like stone bridge, coit, ridge, etc
Thomas Cross	Build overpasses at the major intersections
ENRIQUE VELAZQUEZ	Convert to freeway, with service roads
Diane Beasley	Widening.
Michael John Matusik Jr.	
Matt L Merritt	
Russell Swain	Only solution is a limited access hwy.
NFDavis	better traffic control, designated lanes for heavy duty vehicles
Erin Conner	
Octavian Covaci	I prefer the Blue route but I would connect it back to 380 a bit more to the West, either at Cluster road or after.
Jeffrey Davis	Creating more turn lanes that help decreases slow downs and bottlenecks
Tina Herman Hamp	Expansion of current corridor.
Jeanne	NA
Peggy Schmidt	
Jeanne	
Mary Salmon	The existing highway needs to be expanded and overpasses added with entrance/exit ramps. It needs to be a true freeway.
Ed Smith	Make sure traffic lights are synced.
Dawn	It is really not that bad.
Donald Hanson	Go North @ the toll road or Preston to a Northern looping route.
Matthew	We need a northern bypass.
Eric Baesel	
Melody Smith	Better traffic light syncronnization.
Scott Millman	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jennifer Cheek	REVISED. After attending sessions and speaking with our negligent community leaders I have changed my position. No. There is no need for a freeway along 380. Any freeway that may be needed in the future to deal with future growth in Northern Collin County should be where that development will occur not where there is already developed home and business.
Nancy Price	NO. You have ruined a quite easy drive and turned it into a nightmare. I moved outside of the city for a reason, less traffic. You have spoiled my peaceful existence added crime, constant sirens, road races and road rage.
Eric Roberts	It depends on the alignment. I would rather not have a freeway less than two miles from my house. If it could begin the "bypass" prior to reaching Stonebridge I would support it.
Cody Johns	Yes
Thomas Cross	No
ENRIQUE VELAZQUEZ	Yes
Diane Beasley	As long as it is NOT a toll road. We have enough of those surrounding us.
Michael John Matusik Jr.	Yes.
Matt L Merritt	
Russell Swain	Yes It needs to be done sooner than later.
NFDavis	expansion is needed but concerned for homeowners adjacent to road
Erin Conner	
Octavian Covaci	NOOOOOO!!!!! That is a firm NO for me.
Jeffrey Davis	If it minimizes disruptions
Tina Herman Hamp	No
Jeanne	No
Peggy Schmidt	Depends on location
Jeanne	
Mary Salmon	Yes
Ed Smith	No.
Dawn	As long as it is not a toll way
Donald Hanson	Yes, as long as it’s not in my back yard.
Matthew	Sure
Eric Baesel	Yes
Melody Smith	No
Scott Millman	NO. I do not want to see Erwin Park or any other area where outdoor enthusiasts get to enjoy nature and be with friends and family. I run and bike Erwin several times a week and encounter model plane flyers, hikers, scouts, campers, families etc and don't want to lose that. Its one of the few places to escape the noise of the city.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Teresa Estrada	
Jorge Name	
Rolando Negron	
	Custer intersection needs improvement for turning traffic. Get rid of Lowe's and Walmart entrances so close to intersection. They are dangerous. Only allow Custer access.
Jessie fernandez	
Jason mellet	No
Ray Liberatore	No
Susana McDole	No
Jeffrey Steward	There appears to be a lot of accidents on 380 and Lake Forrest, 380 and Custer.
Carla	Congested
Jon Bolen	Dangerous, unregulated traffic
David Priestley	Current road is dangerous and accident prone. Construction has increased this risk
Cathryn Peace	Never having flashing yellow for left hand turns at 380/stonbridge.
Jason McDonnell	To many traffic lights that are poorly timed. Heavy truck traffic. Speed limits to low.
Andrea Deitz	I have heard of and seen some accidents on 380 I believe due to the many accesses. I think it would be safer as a freeway.
John Shapiro	Safety and the speed drivers travel
Hot milf	Traffic lights aren't timed properly
Mike Kays	
Michael Cook	Too many trucks.
Shannon Miles	No
Gina Aplin	No
David Smithey	
Lesley	
Tanya Davis	No
Jennifer Kirkpatrick	
Karen	
William A. Starnes	Too much traffic, especially at 75. People drove too fast for the amount of traffic.
Lora Stickney	too dangerous
Brianne Sanchez	No. It's already been widened. Too many houses being put into one area at one time is what is causing the congestion.
Suni Li	No
	Always backed up
Stacy Barney	Congestion

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Teresa Estrada	
Jorge Name	
Rolando Negron	
	None, but the laud Howell outer loop would get the semis off the road
Jessie fernandez	
Jason mellet	It’s fine
Ray Liberatore	Eldorado
Susana McDole	121
Jeffrey Steward	It depends on which way I am coming. I will take Preston road if headed east bound and Lake Forrest if I am coming west bound.
Carla	
Jon Bolen	Custer
David Priestley	first street to Preston
Cathryn Peace	Wilmeth/ Virginia
Jason McDonnell	Virginia parkway and prosper trail
Andrea Deitz	I have not experienced any congestion on 380. I usually take 1st street to Preston to go to my job in Plano from Prosper.
John Shapiro	White Ave Virginia Ave
Hot milf	121
Mike Kays	
Michael Cook	Virginia
Shannon Miles	I take 380
Gina Aplin	Virginia, White.
David Smithey	
Lesley	
Tanya Davis	121 or 190
Jennifer Kirkpatrick	
Karen	Country club to 78
William A. Starnes	Virginia
Lora Stickney	
Brianne Sanchez	Side streets, usually Virginia Parkway, connecting to one of the many streets that intersect depending how far I need to go.
Suni Li	
	Just wait in it
Stacy Barney	Virginia

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Teresa Estrada	
Jorge Name	
Rolando Negron	
	Widen and fix in place. Tell cities to lower thier housing density plans.
Jessie fernandez	
Jason mellet	
Ray Liberatore	Additional lanes and/or toll lanes.
Susana McDole	More Alternative routes
Jeffrey Steward	Create double turn lanes on major roads leading north and south. Time the signal lights better.
Carla	
Jon Bolen	Limited access
David Priestley	I have significant concerns regarding any proposal that adjusts the bypass to come closer to Custer Road. Any increase in traffic on the local residential streets due to cut over drivers to avoid congestion is extremely dangerous and detrimental to the community.
Cathryn Peace	
Jason McDonnell	Keep current alignment, replace intersections with overpasses. Create an alternative highway north near 1461/frontier Pkwy.
Andrea Deitz	Coming from California, I am impressed that such a small area has such a large nice road. I suggest turning 380 into a highway as is.
John Shapiro	Pink and Green
Hot milf	Time the lights properly
Mike Kays	
Michael Cook	If you look at the amount of current development, the new route to the north should start west of Custer and east of Coit. There is more unimproved land and it would be an easier transition. If that cannot be done, then Route 1 would be my choice.
Shannon Miles	Widen 380 on 380.
Gina Aplin	
David Smithey	
Lesley	
Tanya Davis	
Jennifer Kirkpatrick	
Karen	
William A. Starnes	Make it like 121, exit and entrance ramps with feeder road.
Lora Stickney	make a tollroad
Brianne Sanchez	Stop overcrowding the area. While progress is important, jamming houses on every available spot of land and flooding people into the area are what's causing the problems. 380 was not as bad as it is now just three years ago.
Suni Li	
Stacy Barney	Keeping as much green scape as possible

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Teresa Estrada	
Jorge Name	
Rolando Negron	
	No
Jessie fernandez	
Jason mellet	As long as it doesn't affect nature trails
Ray Liberatore	No
Susana McDole	It depends on what we need to sacrifice in order to have a freeway. I would not want Erwin Park to be touched
Jeffrey Steward	No I do not.
Carla	No
Jon Bolen	No
David Priestley	no - i have significant concerns with some of the alignment proposals that move toward Custer road
Cathryn Peace	
Jason McDonnell	Yes
Andrea Deitz	No
John Shapiro	Yes
Hot milf	Sure
Mike Kays	
Michael Cook	No
Shannon Miles	I do no support tearing down established family homes.
Gina Aplin	No
David Smithey	
Lesley	
Tanya Davis	No not if it impacts Erwin Park.
Jennifer Kirkpatrick	
Karen	No
William A. Starnes	I support a treaty style, Not regardless of alignment.
Lora Stickney	no
Brianne Sanchez	No
Suni Li	No. Please keep Erwin Park.
	No
Stacy Barney	Not really

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Jeff Fene	Commuter					Weekly
Luke				Nearby resident		A couple times a year

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jana Horowitz	Traffic is congested at peak times especially.
Kailey needham	The amount of wrecks.
William Yackinous	
JOHN M GREY	Safety and conjestion
Donald Alford	Yes. Too many vehicles greater than 1/2 ton pickup truck.
Janice Cabral	Too many stop lights. Would be great to have a straight freeway or toll road (prefer “free”way ofcourse) directly to DNT (selfishly this is the route I take). However, it is already hard to get onto 380 during rush hour. Will have to plan the entry/exit onto the freeway properly.
Brook Aleman	Yes it’s too fast for the amount of traffic. Especially in the retail and neighborhood areas with oncoming & turning cars.
Amy Witt	McKinney from US 75-Princeton is difficult with so many lights and traffic headed to Princeton
Janelle Freeman	It gets congested near 75 entrances. It is slow for lunch traffic to get from the West side to the East side. There are lots of lights if you really want to go to Denton.
Andrew	
Erica Quave	The level of congestion near the 75 exchange makes it undesirable to travel from north Frisco or Prosper.
Jeannine McCallister	Yes, there is so much traffic it’s hard to get anywhere. When I try to go around I just face the same issues.
Joseph Guyton	Yes, but I would think they are solvable if dealt with in a thoughtful manner
Nicole christy	High speeds, distracted drivers, hurried drivers w/ stop lights
Dama Sayh	
Luke	Nope
Cheryl Bottoms	
Matthew Harp	Too crowded
Hector Alvidres	Yes. Very busy.
Anissa Amaroufi	Traffic accidents
Jeff Fene	Lots of lights
Luke	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jana Horowitz	Custer road, Stonebridge, First Street.
Kailey needham	
William Yackinous	At peak work travel times (morning and late afternoon), alternative parallel roads are often more congested than US 380.
JOHN M GREY	Virginia
Donald Alford	El Dorado
Janice Cabral	None. Just suffer through it.
Brook Aleman	
Amy Witt	Virginia Parkway
Janelle Freeman	To get to 75, I prefer taking White
Andrew	
Erica Quave	We travel eldarado or Virginia. Sometimes tollway to 121
Jeannine McCallister	Preston to Roundrock
Joseph Guyton	I don’t, I wait it out if going east/west
Nicole christy	Virginia pkwy
Dama Sayh	
Luke	
Cheryl Bottoms	
Matthew Harp	Virginia
Hector Alvidres	Loop around the city.
Anissa Amaroufi	White Ave
Jeff Fene	121
Luke	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jana Horowitz	Only opposed to any change in proposed alignments that brings the bypass west of Custer as it connects to 380. Expanding current alignment of 380 seems ideal.
Kailey needham	
William Yackinous	For heavy trucks transiting through and across local areas, bypass alternatives that avoid the the densely populated areas would benefit both the truckers and the local populations.
JOHN M GREY	I prefer the yellow route
Donald Alford	1. Move forward with the suggested alternate blue highway route concepts but make the highway continuous from the east side of Princton to were it joins 380 in in West McKinney. 2. Force vehicles greater than 1/2 ton pickups to take the to blue route and impose heavy fines for each violation. This would provide some congestion relief on 380 AND/OR Concurrent to the blue highway concept construction, come up with an RFID windshield sticker for Collin County registered vehicles and RFID tag reader sensors that would allow Collin County registered vehicles to travel the 380 portions that runs parallel to the alternate blue route, all other vehicles must take the alternate blue route. TxDot could use the already designed technology (tags and sensor stations) used by NTTA today to save cost. To pay for the RFID sensor stations cost, increase the Collin County vehicle registration fees.
Janice Cabral	Freeway/tollway. Need ample opportunities for exit off the main road though, especially with new business's popping up everywhere.
Brook Aleman	Add access roads
Amy Witt	
Janelle Freeman	This isn't specifically 380, but I like the outer loop concept, especially by the airport.
Andrew	
Erica Quave	Service roads or at least exit lanes. Less lights more overpasses.
Jeannine McCallister	It depends upon the proposals.
Joseph Guyton	Improve the current highway where it sits. We don't need a bypass in my view.
Nicole christy	Freeway where it is now m
Dama Sayh	
Luke	Definitely not getting rid of parks to make room for more cookie cutter houses and red lobsters
Cheryl Bottoms	
Matthew Harp	Limited access highway or bypass
Hector Alvidres	Highway around the city, but keep it away from the established communities.
Anissa Amaroufi	
Jeff Fene	Expand
Luke	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jana Horowitz	Not opposed to bypass with any proposed current alignments. Please do consider the impact of proposed bypass on First street, Prosper Trail, and Frontier Parkway in Prosper due to possible through traffic.
Kailey needham	
William Yackinous	No. US 380 passes right through many existing communities and existing residential areas. Given the improvements made to US 380 over the last few years (with some improvements still in progress), we already have a six-lane highway. Further broadening or re-routing of US 380 will negatively impact many surrounding residents.
JOHN M GREY	no
Donald Alford	No
Janice Cabral	I wouldn't go that far. I would like to see alignment first. What areas are being impacted? Is it the shortest distance between two points? How far on the service road to get on/off? Cost implications?
Brook Aleman	Depending on the area of the freeway.
Amy Witt	As long as it remains a FREEway and not a toll way as what happened to 121.
Janelle Freeman	Yes.
Andrew	
Erica Quave	I do not think this project to should take away from the limited outdoor rec opportunities in McKinney. I hope they can find a solution that will leave the Park
Jeannine McCallister	No
Joseph Guyton	No
Nicole christy	Please do not touch Erwin Park!
Dama Sayh	
Luke	Nope. Hard pass.
Cheryl Bottoms	No.
Matthew Harp	Yes
Hector Alvidres	Not if it is to close to large neighborhoods that have been there for decades.
Anissa Amaroufi	
Jeff Fene	No
Luke

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Rick Chlebos	
Jason Johnson	
Lacey	
Shane everett	
Erica Westhoff	No
Kavitha	
Rob Carpenter	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Kathy Butler	Short light changes.
Amparo Rodvold	
virginia	
Stacey Rodts	No
Kristen Gathright	No
Bradley Olbrey	gets congested around the intersection with highway 75, especially due to all the stores around there making it really busy.
Gary and Christine Quinn	Increased traffic
Wendy Funk	No
Matt Petty	Needs to be rerouted to avoid princeton & eventually farmersville
Alicia Loran	
Jalynn Mitchell	
Kristy Begshaw	No
Emily Pennington	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Rick Chlebos	
Jason Johnson	
Lacey	
Shane everett	
Erica Westhoff	Verginia
Kavitha	
Rob Carpenter	Virginia, Bloomdale
Kathy Butler	Lake Lewisville Bridge
Amparo Rodvold	No other route.
virginia	
	Virginia
Stacey Rodts	Side roads, 121, tollway
Kristen Gathright	Eldorado pkwy
Bradley Olbrey	Virginia, Eldorado
Gary and Christine Quinn	south on Hardin or Lake Forest to White or Virginia. north on Hardin or Lake Forest to Wilmeth
Wendy Funk	Eldorado or Virginia
Matt Petty	
Alicia Loran	
Jalynn Mitchell	White Virginia
Kristy Begshaw	121
Emily Pennington	There are countless other options. Any other major street in McKinney is an option. 121, eldorado, Virginia, taking any perpendicular crossroad to circumnavigate the traffic. But traffic is rarely bad enough for me to really have to go out of my way.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Rick Chlebos	
Jason Johnson	
Lacey	
Shane everett	Take loop north of 380 from DNT to Princeton
Erica Westhoff	
Kavitha	
Rob Carpenter	Turn Lanes, timed lights using AI, different alignment with 75 in lieu of current multiple turns in single block.
Kathy Butler	Express lane
Amparo Rodvold	
virginia	
Stacey Rodts	
Kristen Gathright	Widen it
Bradley Olbrey	why doesn't it just go above highway 75, instead of having a messed up intersection?
Gary and Christine Quinn	Make 380 a freeway
Wendy Funk	None right now
Matt Petty	Reroute
Alicia Loran	
Jalynn Mitchell	Not sure
Kristy Begshaw	Less stop lights. Maybe more turn-around lanes like they have in San Antonio on loop 1604
Emily Pennington	Just widen it by one lane on each side. Traffic really isn't that bad on 380 though. However, I would be more in favor of widening 380 than making Virginia wider. I would hate to see eldorado and Virginia become as high volume as 380 as they are through the center of town and are among old neighborhoods. People who live on these roads do so because they are sweet neighborhoods, and are away from the heavier traffic of 121 and 380. If you widen 380 to ease the traffic, more people would opt to take 380 and would not congest Virginia And eldorado. The city could save money by widening 380 since it is already a main inter-city highway instead of widening all other east-west roads. The reason people have started taking Virginia more is because there is less traffic. If 380 were widened, people would stay on 380 to get places. But if you leave 380 as it is, people will fill up Virginia, and you will widen it, and then they will fill up eldorado and you will widen it. The other option would be to make 380 a traffic light-less Highway, and build a smaller access road system off of it that runs to the stores and neighborhoods that line it, just like 121. Diverting the highway through McKinney's parks is a huge mistake. The coziness and beauty of McKinney is why people move here. You will lose so much of our charm, uniqueness, and worth if you continue to tear down our trees, parks, and natural lots. We will look just like any other Plano or Richardson soon.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Rick Chlebos	
Jason Johnson	
Lacey	
Shane everett	No
Erica Westhoff	No
Kavitha	
Rob Carpenter	NO
Kathy Butler	No
Amparo Rodvold	No
virginia	
	No
Stacey Rodts	Do not want any build to interfere with existing parks
Kristen Gathright	No
Bradley Olbrey	Not sure what you mean by alignment, but fix 380 on 380. Don't go blowing up Erwin Park!
Gary and Christine Quinn	No, only for the 380 alignment options
Wendy Funk	No
Matt Petty	No, not if it will destroy nature preserves such as Erwin park in McKinney
Alicia Loran	
Jalynn Mitchell	No
Kristy Begshaw	No
Emily Pennington	No, my support of the building of a freeway is contingent on alignment. It is directly connected to the alignment. You will lose support if you make the wrong decision and divert it through our park.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Michelle Davis	Don't take out beautiful green spaces to accommodate another texas highway. If there is a beautiful park, enhance it. Portland parks are so beautiful and compromise a good part of their city. It allows a much needed break from TX highways where families can spend time in nature. The last thing TX needs is more concrete. We need more space to live and find space in our busy highway driving lives to appreciate nature and the silence and beauty that comes with it. As a former Collin County resident, I urge you to put parks first, highlight tourism, encourage the outdoors. You'll have happier residents.
Clay Pleasant	yes
Jamie Mckown	
Audrey Edwards	The stop lights
Lisa Larson	
James Wolf	
ALLENE Cashmore	Not currently
Melinda Harper	
Jada Snider	No
Anjlica Dattatreya	I would like to see more vegetation by the highway
Paula Edwards	Busy and too many people entering 380 from small side roads at slow speeds while people are exceeding the 60 mile per hour speed zone
Jeff Smith	It is starting to get very congested at various times of the day and I feel like it will only get worse with the number of people moving to the area.
Colleen McConnell	Traffic
vicki argabright	
Moni G	
JUDSON JONES	As with most things in collin county, 380 is experiencing changes due to growth. 380 should grow in its current alignment.
Michelle Sanna	No exit lanes to get off the highway safely and equally as dangerous to leave a neighborhood straight onto the highway.
Mike Egan	Growing traffic
Nathaniel Pendleton	Too many traffic lights
Diane Nestande	No
Rick Stuckmann	The current speed limit is too fast between Custer and Hardin. School buses and new high school drivers travel 380 to at least 4 schools off of 380. In addition, there is a hospital at 380 and Lake Forest. There have been several accidents related to trucks or cars speeding through this area. There are also several retail outlets, restaurants, and a movie theater being built along this stretch of 380 so if the speed limit is not reduced, the potential for accidents will only increase. The bypass needs to go north of 380 before it gets to Custer when going east in order to improve the flow of traffic through Collin County.
Sara Gray	Way too many untimed stoplights, drivers speeding and weaving in and out of traffic, congestion
Wendy Foster	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Michelle Davis	75
Clay Pleasant	I don't
Jamie Mckown	
Audrey Edwards	Take the toll road or 35 further south to 121 or GB
Lisa Larson	
James Wolf	HWY 121 or north to Sherman and across
ALLENE Cashmore	121
Melinda Harper	Virginia
Jada Snider	Whatever
Anjlica Dattatreya	
Paula Edwards	Lucas Road to 982 to 380
Jeff Smith	Surface streets: Lake Forest Dr., Hardin, Ridge, etc.
Colleen McConnell	No good alternative
vicki argabright	
Moni G	
JUDSON JONES	Custer south to Hwy 121/SRT
Michelle Sanna	It is always congested. Eldorado Pkwy is an option.
Mike Egan	In town McKinney routes
Nathaniel Pendleton	Eldorado or Virginia
Diane Nestande	George Bush
Rick Stuckmann	US 380 normally only gets congested when you get to Harden going east as you approach the shopping and restaurants in that area. As the new retail, restaurants, and movie theater that are currently being built open, that congestion will start sooner. If you are going to that retail or restaurants, there is not another good choice. If you going to downtown McKinney, then Virginia is an option.
Sara Gray	Varying country back roads
Wendy Foster	Custer to 121

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Michelle Davis	
Clay Pleasant	widen
Jamie Mckown	
Audrey Edwards	Unsure
Lisa Larson	
James Wolf	Leave it as is. Major highway will bring more cars and congestion to the area than already exist
ALLENE Cashmore	Widen if
Melinda Harper	
Jada Snider	No NOT mess up Erwin Park. It is a treasure that we all need and love.
Anjlica Dattatreya	
Paula Edwards	Slower speed on 380 with more police patrol
Jeff Smith	Some sort of business or truck bypass that DOES NOT affect our beloved Erwin Park in ANY way.
Colleen McConnell	Widen Reduce traffic lights
vicki argabright	
Moni G	
JUDSON JONES	Build out 380 as a freeway in the current alignment.
Michelle Sanna	Widening the highway to allow for an exit lane on either side OR possibly a HOV type route (think hwy 35 in Austin where the lower part of the highway exits into downrown and the upper bridge route bypasses everything).
Mike Egan	Overpasses
Nathaniel Pendleton	Under/over passes to bypass smaller intersections
Diane Nestande	Just don’t take away Erwin Park!!
Rick Stuckmann	There needs to be a US 380 bypass that goes North of the current US 380 before Custer going east to improve the flow of traffic around the growing north McKinney area. This would alleviate the congestion along the current 380 between Custer and 5. It would also allow the speed limit to be reduced through this area as residential and retail grows. The lower speed limit will improve safety and reduce the number of serious accidents in this area.
Sara Gray	Alternate bypass to Denton? Honestly, i don't know. I just know, like you, something must be done. 380 has gotten too dangerous with no sign of relief.
Wendy Foster	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Michelle Davis	
Clay Pleasant	yes
Jamie Mckown	
Audrey Edwards	Unsure
Lisa Larson	
James Wolf	No
ALLENE Cashmore	Not if it ruins Erwin park
Melinda Harper	No. I feel that keeping the green spaces in McKinney are more important than new roadways.
Jada Snider	No
Anjlica Dattatreya	Yes.
Paula Edwards	No
Jeff Smith	No, not regardless of alignment, but in general, yes.
Colleen McConnell	Yes
vicki argabright	
Moni G	
JUDSON JONES	No. 380 is a major road and the natural progression would be for it to become an east/west freeway, just like 121 and 635 before it. Realigning the bypass to another east/west route like Bloomdale/Prosper trail would cause undue traffic in residential areas.
Michelle Sanna	No, 380 can keep the same footprint.
Mike Egan	No
Nathaniel Pendleton	Not regardless of alignment.
Diane Nestande	No
Rick Stuckmann	No. I don’t believe any of the options I saw on Drive380.com will resolve the safety issues along US 380 in the north McKinney area. The options that add lanes to the current 380 route have the potential to make the safety issues worse given the growth of residential and retail between Custer and Harden.
Sara Gray	I'm not sure.
Wendy Foster	

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Daniel Collins	Too much traffic, traveling too fast
Ann Collins	YES! The speed limit needs to be dropped to 45MPH with so many people turning into businesses and stop lights. It is a dangerous road to have highway speeds.
Dan Drummond	Yes
Fiona Lu	
Amanda Pettit	
Donna McNamara	unable to manage McKinney growth - crowding and traffic
Amber Petrik	Yes, traffic is going too fast. Too many large construction type vehicles, 18 wheelers, etc. Too congested.
Stephanie Lewey	
Miguel Pereira	No
Deborah Hartman	No
steve marston	At times difficult to exit our neighborhood; heavy congestion around highway 75; it's the only east-west route between I-35 and 75
Chesle Blair	
Terry Nicholas	The traffic lights are a hassle when you hit all of them.
Lisa Barouh	Congestion and ability for existing infrastructure to keep pace with development growth in the area
Deanna J. Ross	No
scott robinson	
Angie Ahrens	With all the new businesses being built along 380 in McKinney, I feel like speeds need to be reduced to increase safety.
Lindsey Thomasson	Too many lights makes getting into Mckinney from Princeton difficult. 380 is our only route that Is most efficient so if there is one wreck it shuts everything down.
Tammy	Too much traffic and trucks
Sergio Arias	No
Michelle Rutledge	
Lisa Bender	Too much traffic gets heavily congested
Brandy Comba	
Amber McMellan	Yes, too much traffic
Andrew Cheney	Not really.
Anjuli Hancock	There are a lot of stop lights.
	No
Brianna Larsen	Yes, speed limit too high, too many accidents, too many large trucks
Madeleine Harrison	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Daniel Collins	Virginia or ElDorado
Ann Collins	121
Dan Drummond	121
Fiona Lu	
Amanda Pettit	
Donna McNamara	Virginia, Wilmeth
Amber Petrik	Virginia
Stephanie Lewey	
Miguel Pereira	
Deborah Hartman	Virginia
steve marston	No alternate out of our neighborhood; around 75 try to go north or south
Chesle Blair	
Terry Nicholas	SH 121
Lisa Barouh	El dorado, Virginia, toll road and cut up
Deanna J. Ross	Virginia
scott robinson	El Dorado, 75
Angie Ahrens	I take Virginia if in town. If I'm travelling North, I take 75 and the cut across to 1-35 if needed.
Lindsey Thomasson	Bridgefarmer or Monte Carlo I will also go over lake lavon.
Tammy	El Dorado
Sergio Arias	Don't really hand issues with it
Michelle Rutledge	
Lisa Bender	White, Virginia, Community
Brandy Comba	
Amber McMellan	Hardin to Wilmeth to 75 or Hardin to White to 75
Andrew Cheney	None. I frequent the businesses on 380
Anjuli Hancock	None. Just try to time my travels to avoid congestion.
	Multiple, but only issues are 380/75 and 380/DNT
Brianna Larsen	Currently no good options for where I'm coming from and going to
Madeleine Harrison	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Daniel Collins	Widen 380.
Ann Collins	Make elevated roadway to drive straight over existing traffic lights, but keep enough lanes left on the ground for those who need to go s short distance down 380.
Dan Drummond	Widen and put in a concrete divider
Fiona Lu	
Amanda Pettit	
Donna McNamara	
Amber Petrik	Prevent pass through of large construction type and 18 wheeler; or, have them only travel in slow lane.
Stephanie Lewey	
Miguel Pereira	
Deborah Hartman	Pink and green alignments.
steve marston	The "northern loop" from 75 to Dallas North Tollway or beyond
Chesle Blair	
Terry Nicholas	
Lisa Barouh	Not sure
Deanna J. Ross	Use the blue route however have it begin at Custer, not Stonebridge Drive or Ridge Road. Custer seems a more natural fit for this interchange.
scott robinson	need to be able to aupport more traffic
Angie Ahrens	Decreased speeds in busy areas, no hills in the road to block drivers view of traffic ahead.
Lindsey Thomasson	Bridges over intersections and please don't make it a tollway. There are no free east west highways.
Tammy	
Sergio Arias	
Michelle Rutledge	
Lisa Bender	Have throughways at lights for those that are not turning
Brandy Comba	
Amber McMellan	
Andrew Cheney	Overpasses to skip the lights while using the same footprint that already exists. Similar to the area down by Frisco's mall
Anjuli Hancock	
	Leave it and build new roads
Brianna Larsen	A bypass north of the 380 makes sense but Only if it is connecting at a more commercial based road in place such as Custer Rd. Tying into Stonebridge Dr which is is currently residential will be a disaster, and it’s not a major thoroughfare to have good southbound options after coming off the bypass.
Madeleine Harrison	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Daniel Collins	no
Ann Collins	yes. If it is a true freeway, and not freeway speed limits with street lights and cross traffic.
Dan Drummond	No, DO NOT destroy Erwin Park for a concrete freeway!!!! We are losing all access to nature. Collin county is wasting a resource.
	No
Fiona Lu	
Amanda Pettit	
Donna McNamara	yes
Amber Petrik	Yes
Stephanie Lewey	No
Miguel Pereira	No
Deborah Hartman	No
steve marston	No
Chesle Blair	No
Terry Nicholas	Not necessarily. My primary concern would be saving Erwin Park.
Lisa Barouh	Not sure
Deanna J. Ross	If the population grows to the expected number, we will need a freeway. It should not connect with streets running through our residential developments.
scott robinson	perhaps
Angie Ahrens	No. Placement is important.
Lindsey Thomasson	Yes
Tammy	
Sergio Arias	No
Michelle Rutledge	
Lisa Bender	Somewhat
Brandy Comba	No
Amber McMellan	
Andrew Cheney	I could see building a freeway a little farther north that connects the DNT, 75, and 35.
Anjuli Hancock	
	No
Brianna Larsen	the residential areas already in place should not be forced to now sit so close to a major freeway. A bypass of sorts is needed to ease congestion and give altnerate routes but only in the way that residential areas will be least impacted
Madeleine Harrison	Ni

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Belinda	
Danielle Coleman	It could use a concrete barrier down the middle and actual shoulders in case of emergency.
Jim Busse	
Marco Nardi	
	No
Madison	
Larry Harper	Congestion is an issue
Nicholas Cate	Yes.
Deborah Bancroft	Way to congested and dangerous
	Safety
F. Alston	No
Dray Petrik	Traffic congestion is inevitable with the future increases in population.
Jordan Hope	The traffic light timing is atrocious. I'm sure you'd see a great improvement just by fixing this issue.
Katherine Morris	Speed limit
Jodi Anderson	Too many stop lights
Lance Crabtree	Congestion
Tyler Boysen	Too many stop lights. Always crowded and backed up.
Julianne White	It's dangerous.
Samuel Rodriguez	Yes. Congestion
Stephanie guignard	No
Nikki	
S Mathis	Traffic control
Richard	Any of the 5 options would have a terrible impact on Tucker Hill! I oppose all of the options.
dan doyle	traffic, better timing with the lights
GAIL P WONG	It’s busy but not a long commute from headed west on 380 from 75.
Maria Ford	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Belinda	
Danielle Coleman	Virginia or county roads north of 380
Jim Busse	
Marco Nardi	
	Not necessary
Madison	
Larry Harper	Take Virginia to 75 or take Ridge to 121
Nicholas Cate	Parallel roads (Virginia, el dorado, farm roads).
Deborah Bancroft	I try my best to avoid 380...I will take Virginia
	Eldorado
F. Alston	Wait and drive through it
Dray Petrik	Virginia Pkwy, El Dorado Dr., or 121.
Jordan Hope	I don't take alternative routes. I live and work off of 380.
Katherine Morris	Virginia or Eldorado. Hopefully Wilmeth soon.
Jodi Anderson	121
Lance Crabtree	No other route
Tyler Boysen	Virginia
Julianne White	Virginia or Eldorado
Samuel Rodriguez	Hardin to White to 75
Stephanie guignard	Side roads but this is a rare occurance
Nikki	
S Mathis	Virginia or White
Richard	I go south to HW 121 or North on HW289 to HW82
dan doyle	backroads, Virginia
GAIL P WONG	Virginia exit but it too has construction.
Maria Ford	Highway 121

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Belinda	
Danielle Coleman	More lanes
Jim Busse	Widen 380, leave the neighborhoods alone
Marco Nardi	
	Leave it, build other roads. Tearing down existing development and impacting higher end homes is an unacceptable solution.
Madison	
Larry Harper	An additional route to take pressure off of 380
Nicholas Cate	Build a freeway using existing infrastructure.
Deborah Bancroft	
	Medians
F. Alston	
Dray Petrik	I believe the yellow route option will likely provide the best traffic flow to free up some of the traffic on 380 itself; however, will the present day route of 380 through McKinney be turned into a business route?
Jordan Hope	All of the routes that are considering joining back to 380 need to rejoin 380 at Custer Road. NOT Stonebridge or Ridge. Stonebridge is a residential road and should absolutely not be joined with a major intersection.
Katherine Morris	Build a loop
Jodi Anderson	
Lance Crabtree	Less intersections
Tyler Boysen	Not sure what the options are. Some sort of highway system.
Julianne White	Reduce speed limit.
Samuel Rodriguez	I am against all current proposed alignment options. If a freeway is built on existing 380 it must be depressed in front of Tucker Hill. If a bypass is done it must be west of future stonebridge.
Stephanie guignard	Widen the road
Nikki	
S Mathis	
Richard	Build an outer loop North of McKinney from Denton to Greenville. Build North/South access for each town
dan doyle	Fix the lights
GAIL P WONG	Turning traffic up custer and not stonebridge ranch due to well established homes at tucker hill and Stonebridge Ranch.
Maria Ford	Finish widening of 380 to DNT Traffic lights synchronization

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Belinda	
Danielle Coleman	No
Jim Busse	No freeway, widen 380
Marco Nardi	
	No
Madison	
Larry Harper	Freeway yes but not regardless of alignment
Nicholas Cate	I do, just not close to my property/ neighborhood.
Deborah Bancroft	maybe
	No
F. Alston	No
Dray Petrik	Yes, because this is really the only way the traffic congestion is going to be manageable with the increased population.
Jordan Hope	ABSOLUTELY NOT!
Katherine Morris	Not regardless of alignment
Jodi Anderson	No
Lance Crabtree	No
Tyler Boysen	Yes!!
Julianne White	No
Samuel Rodriguez	No. I am against all current proposed alignment options. If a freeway is built on existing 380 it must be depressed in front of Tucker Hill. If a bypass is done it must be west of future stonebridge.
Stephanie guignard	No
Nikki	No
S Mathis	
Richard	NO
dan doyle	No
GAIL P WONG	Not on 380
Maria Ford	NO definitely not

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Heather Doyle	Traffic and a lot of accidents.
Daniel Dean	
Kelly Towery	It is very dangerous with speed and 18 wheelers
Meghan Cate	No
Melinda Washburn	It’s getting busier.
Ashley testoni	It’s dangerous and crowded
Kelly Towery	
Michael	
Teri Anderson	Not really
E Duran	
Rebecca McKelvy	Too dangerous, too congested
Matt Verner	Congestion and stop lights
Peter Ford	Yes, the existing 380 expansion needs to be finished to DNT. That is the major problem.
Sherri Kerr	Busy, too fast, hard to get out of businesses on 380
Robin Black	Way too much traffic. I prefer bypassing 380 completely by taking the country routes to avoid the dense traffic.
Jocelyn Crowston	Congestion with more stores and traffic lights not synced
Janine Miller	No
R.Halperin	
Kelley	
Kirsten Ladera	No
	Not really
Jennifer Rodekuhr	No
Martha Cislo	It has way too much traffic for it's current design. There are lots of huge trucks, and too many lights.
Elizabeth	
Brittany Magoun	Dangerous drivers going above the speed limit
Kevin Stafford	
Kara Ezell	It can be difficult to turn left onto the road with traffic.
Wendy Schreher	To much traffic, people speeding and the number of accidents that occur on this road
Susan herr	Yes it needs less stop lights/signs
Dana Carboni	Too many traffic lights that aren’t synced
Mark Peterson	Yes
Melissa King	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Heather Doyle	Backroads.
Daniel Dean	
Kelly Towery	Virginia Parkway or Eldorado Parkway
Meghan Cate	Side streets
Melinda Washburn	No alternative routes. We wait in the traffic.
Ashley testoni	Any other road in McKinney
Kelly Towery	
Michael	
Teri Anderson	75, 121
E Duran	
Rebecca McKelvy	Virginia if possible
Matt Verner	Virginia, Eldorado, numerous smaller city streets
Peter Ford	Highway 121.
Sherri Kerr	Cut over on any street and use Virginia
Robin Black	455
Jocelyn Crowston	Virginia or Eldorado
Janine Miller	
R.Halperin	Virginia
Kelley	
Kirsten Ladera	Virginia Pkwy or Stacy
	Eldorado, Virginia
Jennifer Rodekuhr	121, Virginia, Eldorado
Martha Cislo	white avenue or hardin blvd
Elizabeth	
Brittany Magoun	Virginia
Kevin Stafford	
Kara Ezell	Virginia
Wendy Schreher	I take a N/S secondary road to an E/W secondary road that runs parallel with 380
Susan herr	Any route that does not go through Erwin Park
Dana Carboni	Virginia or Eldorado
Mark Peterson	
Melissa King	N/a

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Heather Doyle	Lower the speed, better timing of the lights and less lights, increased patrols.
Daniel Dean	
Kelly Towery	Divert traffic in some manner to the north around Mckinney
Meghan Cate	
Melinda Washburn	Widen US 380 where safe and space allows.
Ashley testoni	An additional lane.
Kelly Towery	
Michael	
Teri Anderson	
E Duran	
Rebecca McKelvy	Freeway with overpasses to decrease amount of red lights
Matt Verner	Routing US 380 around McKinney to the north and south
Peter Ford	Traffic light synchronization. Better planning at 75 / 380.
Sherri Kerr	Blue route
Robin Black	Make it into a freeway or toll road with a service road.
Jocelyn Crowston	Up high overpass above current one
Janine Miller	
R.Halperin	Keep it as is. Build North of 380 where the growth will be.
Kelley	
Kirsten Ladera	
	Leave it and build new roads north
Jennifer Rodekuhr	
Martha Cislo	a freeway would help alleviate congestion
Elizabeth	
Brittany Magoun	Create exits and ramps like 75
Kevin Stafford	
Kara Ezell	Keep the current set up making 380 a highway and adding an access road.
Wendy Schreher	More traffic lights so people can't go as fast and people don't have to cut traffic leaving neighborhoods or trying to leave businesses.
Susan herr	Over passes for the lights
Dana Carboni	Sync the traffic lights
Mark Peterson	Limited access highway
Melissa King	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Heather Doyle	NO!
Daniel Dean	
Kelly Towery	Yes
Meghan Cate	No
Melinda Washburn	No. The alignment must be taken into consideration.
Ashley testoni	No
Kelly Towery	
Michael	
Teri Anderson	Yes
E Duran	
Rebecca McKelvy	Yes
Matt Verner	Yes
Peter Ford	No
Sherri Kerr	Yes
Robin Black	Yes
Jocelyn Crowston	
Janine Miller	No
R.Halperin	Only if it is at least 3 miles north of the current 380. This is where the majority of the growth will occur.
Kelley	
Kirsten Ladera	
	No
Jennifer Rodekuhr	No! This will destroy our neighborhoods!
Martha Cislo	I support the building of a freeway as long as it stays on top of the current 380 and doesn't deviate into the subdivisions.
Elizabeth	
Brittany Magoun	Not to disrupt neighborhoods
Kevin Stafford	
Kara Ezell	Yes, a freeway, not a tollway.
Wendy Schreher	yes
Susan herr	Yes
Dana Carboni	Yes as long as it isn’t a tollway
Mark Peterson	Yes
Melissa King	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Beth Douglas	no
Wenqiang zhou	High traffic. Unsafe Security
Jennifer Yarbrough	I don't want it to be a tollway
	No
Andrew Quick	
Mark Peterson	Yes
Brian WIlliamson	Ready for construction to be over
Irene Cook	
Chris Ekrut	Too many traffic lights
Monica Mercado	
Nikki Woolsey	
Kelly Espinoza	The number of lights impedes traffic flow and creates dangerous situations.
Anthony Mendez	Over congested and inconvenient
Heather Blakley	No
Elizabeth Wang	Too congested
Barbara Barany	
Jonathan Wickersham	Traffic congestion with increased lights and additional commuters.
David Nylec	Noise. We live in La Ciema and don't want it so close.
Susan lafferty	Yes too big and too busy! Scary to drive on with huge trucks and fast cars
Tracy Gordon	Already seems overloaded in many sections with more growth coming
JD McCall	No
Dina Caballero	
Fischetti Linda s	No
Michelle Ekrut	
Sarah Fermaglich	People drive way too fast and it causes fatal accidents
Judith Spriggs	
Jennifer Dickey	
Yan lin	Too many cars
Jennifer Globensky	In its current state it is extremely dangerous
Sumanth hallegiri	No
Shannon Supplee	No
Job Rohrbach	Speed and congestion
Nicole Faltys	Too congested and traffic lights make it dangerous at high speed areas.
Frances T Krug	no
Stacey Rotunno	No
Stacey Rotunno	No

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Beth Douglas	go south
Wenqiang zhou	Unknown
Jennifer Yarbrough	
	It really is only congested at 380 and 75 and 380 and DNT
Andrew Quick	
Mark Peterson	None
Brian WIlliamson	121, tollway
Irene Cook	
Chris Ekrut	121
Monica Mercado	
Nikki Woolsey	Virginia
Kelly Espinoza	
Anthony Mendez	Sam Ray Burn Tollway
Heather Blakley	We take 123 to 75 if needed
Elizabeth Wang	Need another road for residents to come south . 420 is not enough . Need another road parallel to 420.
Barbara Barany	
Jonathan Wickersham	Virginia Pkwy
David Nylec	Vergina east to 75 or west to Dallas N Toll
Susan lafferty	N/a
Tracy Gordon	SRT
JD McCall	
Dina Caballero	
Fischetti Linda s	I take 380 to avoid congestion on Virginia during the construction phase
Michelle Ekrut	Wilmeth
Sarah Fermaglich	423 to Eldorado
Judith Spriggs	
Jennifer Dickey	
Yan lin	Eldorado Pkwy and custer rd
Jennifer Globensky	121
Sumanth hallegiri	Local county route
Shannon Supplee	N/a
Job Rohrbach	Preston to Rockhill to the DNT
Nicole Faltys	121
Frances T Krug	none
Stacey Rotunno	
Stacey Rotunno	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Beth Douglas	widen 380
Wenqiang zhou	Do not build apartments on us 380.
Jennifer Yarbrough	
	Flyovers at 380/75 and 380/DNT
Andrew Quick	
Mark Peterson	Make it limited access
Brian WIlliamson	Widen, turn to highway (NOT ANOTHER TOLLWAY)
Irene Cook	
Chris Ekrut	Mass transit options should always be considered
Monica Mercado	
Nikki Woolsey	
Kelly Espinoza	Creating a freeway instead of divided highway as the population has exploded and will only increase.
Anthony Mendez	Widening it to a freeway
Heather Blakley	Double deck like 635
Elizabeth Wang	Add more lanes
Barbara Barany	
Jonathan Wickersham	Outer loop tollway/highway from US-75 to Dallas North Tollway.
David Nylec	Not sure. It seems it's the only way to go west to east up here.
Susan lafferty	Keep trucks off of road...
Tracy Gordon	Make it wider now instead of later
JD McCall	Dont go through Erwin Park with the construction.
Dina Caballero	
Fischetti Linda s	Either widen existing road or create a freeway in the existing footprint
Michelle Ekrut	
Sarah Fermaglich	Make the current highway systems better and promote the use of them. Give more speeding tickets daily and have more police presence to deter people from driving crazy.
Judith Spriggs	
Jennifer Dickey	
Yan lin	N/A
Jennifer Globensky	
Sumanth hallegiri	
Shannon Supplee	Unknown
Job Rohrbach	
Nicole Faltys	6 lane or raised highway
Frances T Krug	Pink and Green
Stacey Rotunno	
Stacey Rotunno	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Beth Douglas	no
Wenqiang zhou	Yes if could fix the traffic problems
Jennifer Yarbrough	
	No
Andrew Quick	
Mark Peterson	No
Brian WIlliamson	I support a freeway but Not regardless of alignment
Irene Cook	
Chris Ekrut	Not necessarily. Areas such as Erwin Park in McKinney should be maintained due to the quality of life that is supported by such amenities
Monica Mercado	No
Nikki Woolsey	
Kelly Espinoza	I don't even understand this question. Work on your wording for the general public as I have 2 masters degrees and this is unclear.
Anthony Mendez	Yes
Heather Blakley	No I do not
Elizabeth Wang	Yes
Barbara Barany	No
Jonathan Wickersham	No.
David Nylec	No but understand something might need to be done.
Susan lafferty	No
Tracy Gordon	yes
JD McCall	No
Dina Caballero	
Fischetti Linda s	no
Michelle Ekrut	I do not support a freeway that in any way takes out Erwin park
Sarah Fermaglich	Nope
Judith Spriggs	
Jennifer Dickey	
Yan lin	No
Jennifer Globensky	No
Sumanth hallegiri	
Shannon Supplee	No should not go through parks
Job Rohrbach	No. Park land should not be sacrificed for the freeway.
Nicole Faltys	Yes
Frances T Krug	no
Stacey Rotunno	
Stacey Rotunno	No

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Helen mootz	
Brett Donahey	Inadequate lanes
Rochelle Aguilera	No
Kacie Phelps	
Amelia Phillips	
Zachary Hope	The poorly timed lights are a major concern. Main thoroughfares would flow much better with some signal coordination.
anthonyhershberger	
Phoebe	
Jolene Aden	A lot of accidents. Turn around areas with no turning lanes. Too much construction.
Sharon Yates	
Lorie Cox	
Christy Bowers	Not enough lanes (from Denton Co to Collin Co), too many driveway entrances, not enough/lack of turn lanes, light cycles not coordinated, lack of alternative routes
Kara Schmidt	Very congested. The exit from northbound 75 to 380 backs up onto 75 at times.
Selina Hinojosa-Lin	
Paula Ogden	
Henry Cojulun	
Christy Thomas	Too many stoplights.
Amber Wax	The speed of traffic is very high as well as the amount of congestion on the road.
Keith and Mary Mussog	Yes, Traffic volume and safety
Martika	
Aimee McCall	Only west of the DNT is very concerning with traffic
Rashea A Leeper	Not really
Brigitte Robertson	Big trucks at high rates of speed, noise polution
Elizabeth	No
Mike Grayson	People now go at high rates of speed and rush up on the stop lights.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Helen mootz	
Brett Donahey	121
Rochelle Aguilera	Other side or neighborhood roads
Kacie Phelps	
Amelia Phillips	Virginia pkwy
Zachary Hope	Virginia Parkway or Rockhill Road
anthonyhershberger	
Phoebe	
Jolene Aden	SRT, 455 to preston
Sharon Yates	
Lorie Cox	
Christy Bowers	To the south the only options are Eldorado or Virginia *IF* you're able to make it to a north/south street to get off 380. to the north, there isn't any!
Kara Schmidt	Virginia or Wilmeth
Selina Hinojosa-Lin	
Paula Ogden	75 or Eldorado, Ridge, lake forest, Hardin, Virginia.
Henry Cojulun	
Christy Thomas	121
Amber Wax	Tollway, Preston Rd, Custer Rd, other side streets
Keith and Mary Mussog	depends on which direction I am travelling. east bound from Preston I usually take Eldorado to Lake forest. West bound from Princeton I take hwy 5 to Wilmeth rd.
Martika	
Aimee McCall	Eldorado
Rashea A Leeper	WHatever Waze tells me
Brigitte Robertson	Virginia
Elizabeth	Dallas Tollway up to Denton
Mike Grayson	Eldorado and Main St.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Helen mootz	
Brett Donahey	Freeway like 121 or North Dallas Loop freeway north of 380 like Denton and Austin
Rochelle Aguilera	Not going through Erwin
Kacie Phelps	
Amelia Phillips	
Zachary Hope	The blue or red routes through McKinney are fine, but the connection back to US 380 should be done at Custer Road, NOT Stonebridge or Ridge. Custer already needs improvements, why not kill two birds with one stone? Also, this defines the city limits of two cities. (Yes, Prosper can make concessions, too!) Makes more sense to make the highway cut in there rather than connect it to a small neighborhood road (Stonebridge Drive). Plus, the development of US 380 west of Custer Road is less than that of US 380 east of Custer Road so you disturb less population.
anthonyhershberger	
Phoebe	
Jolene Aden	Finish the road!
Sharon Yates	
Lorie Cox	
Christy Bowers	1st Street needs to be completed (and improved where needed) east beyond Custer and west all the way to FM 377! North/South feeders (ex: Teel) need to be built to allow traffic to flow smoother. Also allows emergency vehicles through when 380 is blocked (Hello, 380/Tollway concrete barriers!!!!) and provides a safer route for school buses - gets them off dangerous 380. 380 is a major east/west traffic mover. Local traffic needs alternative routes so that long distance travelers can move quickly through the region. (Even been in TX/OU weekend 380 traffic? NIGHTMARE.) Also need limited access. Less like Preston Rd. and more like Hwy 82.
Kara Schmidt	Access roads with on and off ramps
Selina Hinojosa-Lin	
Paula Ogden	
Henry Cojulun	
Christy Thomas	Tollway
Amber Wax	Expand the existing lanes, lower the speed, overpasses to relieve congestions.
Keith and Mary Mussog	Making 380 more efficient by using overpasses with service rds similar to 121 between 75 and North Dallas Tollway.
Martika	
Aimee McCall	
Rashea A Leeper	NOT rerouting through Erwin Park
Brigitte Robertson	overpasses
Elizabeth	
Mike Grayson	Build a full service freeway and make it a tollway with a service road. That will provide those who don't want to use the toll road the freedom of taking the service road. More importantly, it will pay for the road.

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Helen mootz	
Brett Donahey	Yes
Rochelle Aguilera	No!!
Kacie Phelps	
Amelia Phillips	No
Zachary Hope	No, no, no, and no. McKinney is a nice community and does not need to bare the sacrifice of our property values declining for commuters headed to the Dallas North Tollway or Highway 121. Prosper and Celina need to make concessions as well.
anthonyhershberger	
Phoebe	
Jolene Aden	No. Do NOT put a highway through Erwin park. The outdoor quality of life is low enough in this state, nature areas should be able to be preserved. Texans seem to have little regard for wildlife and nature, it'd be nice to see something beautiful preserved.
Sharon Yates	No
Lorie Cox	
Christy Bowers	YES
Kara Schmidt	No
Selina Hinojosa-Lin	
Paula Ogden	No
Henry Cojulun	
Christy Thomas	No
Amber Wax	No
Keith and Mary Mussog	No
Martika	No
Aimee McCall	No
Rashea A Leeper	No
Brigitte Robertson	not sure, not if it affects home owners
Elizabeth	No
Mike Grayson	Absolutely.

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Jonda Alegria	
Gina Alvarez	Speed limit is too high
Amy Smith	It has become much busier, but that is to be expected with all the new businesses coming to McKinney.
Shannon Meredith	Yes, congestion. Big concern is all the trucks/semis and the speed limit.
Al	The speed limits and traffic are too high. People are having far too many accidents along this corridor. The signal lights seem too far apart and do not accommodate the neighborhoods that access them. If you have to stop at any of these intersections along 380 you run the risk of being struck by the traffic that comes up behind you before you can accelerate to a safe speed. Particularly the intersection at 380 and Ridge. Why don't you extend the blue route to Custer Road instead?
Donna Jones	Heavy Traffic
Crystal doup	No
Kathleen McClain	
Alex Vasquez	
Michael Chandler	Busy
Rick Jordan	No.
Jeremy	Yes
David Baker	Yes, it is the most dangerous part of my daily commute
Shantini Supramaniam	
Carol Hopf	
Reed Fritz	Just the amount of congestion at the big intersections (DNT, Preston, 75).
Jenny Allen	Construction and congestion
cathy	
Mellissa Federico	Speed limit is too high
Melissa Bishop	Red light runners
Mary Lee Fritts	
Julie Bomgren	As a road with speed limits 60+mph, the route needs to have right-hand turn lanes. Suddenly stopping from a high rate of speed to make a right-hand turn invites accidents from inattentive drivers. Additionally, the speed limit is too high.
alex toskovich	only at I75
Jennifer Wilson	Heavy traffic and lots of accidents.
Angela Tomooka	Too much traffic congestion and seemingly many accidents
Kiley	
Laurie Staempfli	Safety: speed is too high for the number of streets and driveways entering/exiting highway. Lack of median also increases risk of accidents
Holly Brown	We NEED medians!!!
Alana Finley	
Travis Hofeldt	Congestion and number of accidents daily.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Jonda Alegria	
Gina Alvarez	Virginia
Amy Smith	
Shannon Meredith	Some times Virginia Parkeay.
Al	Unfortunately I would take Virginia which is very near my house.
Donna Jones	no alternate route
Crystal doup	Airport road
Kathleen McClain	
Alex Vasquez	
Michael Chandler	Virginia or Wilmeth
Rick Jordan	N/A
Jeremy	
David Baker	982 and 455 out of Princeton and roads to south and west to get to Richardson
Shantini Supramaniam	
Carol Hopf	
Reed Fritz	I usually only use it to get through McKinney, so I will take Virginia or White. But occasionally, I will go to Denton or Princeton, and in those cases, I tough it out and take 380 regardless.
Jenny Allen	1st St./Fishtrap
cathy	any routes possible
Mellissa Federico	Virginia Blvd
Melissa Bishop	Hardin south
Mary Lee Fritts	Virginia Avenue
Julie Bomgren	
alex toskovich	virginia/eldorado
Jennifer Wilson	Virginia and Lake Forest.
Angela Tomooka	virginia if heading east; different side roads if heading west
Kiley	
Laurie Staempfli	
Holly Brown	I don’t
Alana Finley	SRT to 35E.
Travis Hofeldt	There are few options available, which is why something is needed.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Jonda Alegria	
Gina Alvarez	
Amy Smith	Do not go through Erwin Park.
Shannon Meredith	Need a 380 bypass
Al	Add an alternate north of 380 and extend the blue or red line down onto Custer Road instead of Stonebtidge or Ridge.
Donna Jones	Green and Red Lines
Crystal doup	I think you should work on 380 on 380
Kathleen McClain	
Alex Vasquez	
Michael Chandler	Northern outer loop starting west of Custer, where there is undeveloped land
Rick Jordan	As long as there are no parks messed with during reconfiguration. Anything.
Jeremy	Raised highway and access roads
David Baker	My main concern is congestion between Hwy 5 and 380 going east through Princeton so I would prefer a south route below Princeton that bypasses the town and joins 380 just before Lavon Lake
Shantini Supramaniam	
Carol Hopf	
Reed Fritz	An overpass at the problem areas would be nice or a diversion of traffic.
Jenny Allen	More lanes and fewer lights.
cathy	change it to highway
Mellissa Federico	Many Corridor's throughout Texas are managed through speed limits regulations and patrolling. A freeway is not the solution.
Melissa Bishop	
Mary Lee Fritts	
Julie Bomgren	I am not opposed to the bypass with any of the current alignments. Opposed to any change in the proposed alignments that brings the bypass west of Custer Road as it reconnects to 380 Please consider the impact of the proposed bypass on First Street, Prosper Trail and Frontier Parkway in Prosper due to "cut through" traffic to connect with the proposed bypass versus expanding the current alignment of 380
alex toskovich	loop farther north of 380
Jennifer Wilson	
Angela Tomooka	
Kiley	
Laurie Staempfli	Median, slower speed
Holly Brown	Make it a freeway
Alana Finley	
Travis Hofeldt	Freeway, limited access

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Jonda Alegria	
Gina Alvarez	
Amy Smith	
Shannon Meredith	Yes
Al	No. But I can not stop progress now can I?
Donna Jones	
Crystal doup	No
Kathleen McClain	Please do not infringe upon Erwin Park
Alex Vasquez	
Michael Chandler	No
Rick Jordan	No. Not if parks were taken out.
Jeremy	Yes
David Baker	Yes, along with some immediate changes to 380 between New Hope road and Lavon Lake for safety.
Shantini Supramaniam	
Carol Hopf	
Reed Fritz	I would prefer it even further north, but nobody wants a freeway in their backyard. I am concerned about the impact on green areas like Erwin Park and Myers Park in McKinney. It looks like some of the options go right through there.
Jenny Allen	
cathy	yes
Mellissa Federico	No
Melissa Bishop	
Mary Lee Fritts	Yes
Julie Bomgren	No.
alex toskovich	yes but a farther north loop from Dallas Tollway and I75 too much road noise
Jennifer Wilson	Yes
Angela Tomooka	not sure
Kiley	
Laurie Staempfli	No
Holly Brown	No
Alana Finley	
Travis Hofeldt	YES

Please provide us with your contact information.	If US 380 is constructed as a freeway, which alignment do you prefer? (select all that apply)

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Tammy Eiland	Traffic
Clayton Shapiro	No
Ellen Hill	Very heavy traffic, especially in the morning. My 8 miles commute takes 40 minutes some days
Jeff Clark	yes, any routes that would take away land from Erin Park area
Darla I Hopson	Speeding
Glen Merrick	Congestion continues to increase
benjamin hemken	
Darla I Hopson	Speeding
Lia Fernandez	Safety
Gage Galinger	Through traffic and local traffic on same roads at highly variable speeds. Too many traffic lights.
Kathryn Manders	
Darla I Hopson	Speeding
Sigrun Clariot	Too congested
Maggie Carrell	make it a freeway and take out the lights
RHONDA ENNEKING	No
Gail Riegle	Yes. Too many trucks.
Catherine Carmean	The congestion in the intersection of 75 and 380. There needs to be two turn lanes when turning right to go south on 75. Also there should NOT be a right turn lane for the businesses (chick fil a) right before the turn lane to turn onto 75 frontage road this causes extreme back up for people in that lane trying to turn onto the highway to go to work.
Lisa Dean	
Darla I Hopson	Speeding
Rashmi Jain	yes....traffic, accidents, too much construction
Cynthia Sandlin	It is very crowded & needs traffic diverted more north & south
CHARLES P MILHEM	Dangerous and congested
Debbie Schussler	
oliver Cromwell	Yes, too congested already
Cindy Gamble	
Kimberlee Greider	
Ward Rudolph	no
Melissa Richardson	No
Steve DeHan	
Wyndi Veigel	Yes. Traffic after 4 p.m. going east bound from McKinney is crazy. Too many wrecks.
Patty Bockenfeld	

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Tammy Eiland	
Clayton Shapiro	SRT
Ellen Hill	New hope Rd
Jeff Clark	south on either the tollway, preston, or Lake Forrest
Darla I Hopson	Eldorado
Glen Merrick	Virginia or White
benjamin hemken	
Darla I Hopson	Eldorado
Lia Fernandez	
Gage Galinger	Virginia
Kathryn Manders	
Darla I Hopson	Eldorado
Sigrun Clariot	If you want the byway it would have to go from Preston Rd and further north were there are not residential homes alrighty built . Like Laury Crossing and meet 75 around were Melissa starts .
Maggie Carrell	virginia
RHONDA ENNEKING	Virginia
Gail Riegle	Virginia thru McKinney.
Catherine Carmean	lake forest to Virginia parkway to get to 75 south.
Lisa Dean	
Darla I Hopson	Eldorado
Rashmi Jain	custer to main st or 380 to preston to rockhill
Cynthia Sandlin	546 to Lucus Rd.
CHARLES P MILHEM	Virginia Pky or Eldorado
Debbie Schussler	
oliver Cromwell	Virginia or Eldorado
Cindy Gamble	75 North
Kimberlee Greider	
Ward Rudolph	
Melissa Richardson	
Steve DeHan	
Wyndi Veigel	I often take Airport Road from McKinney & meander through the country.
Patty Bockenfeld	

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Tammy Eiland	
Clayton Shapiro	Extra lanes on current route.
Ellen Hill	
Jeff Clark	
Darla I Hopson	Widen it Build over passes to skip the lighted intersections
Glen Merrick	In McKinney area, keep alignment as close as possible to current.
benjamin hemken	
Darla I Hopson	Widen it Build over passes to skip the lighted intersections
Lia Fernandez	
Gage Galinger	Put in a full highway with overpasses. The region needs an east-west corridor north of 121.
Kathryn Manders	
Darla I Hopson	Widen it Build over passes to skip the lighted intersections
Sigrun Clariot	Or go north onCuster rd to past frontier parkway and to 75 in Melissa or if going east go into New Hope and Princeton there rutes have less buildings and homes just enter that into the planing so it showed " there will be a highway built here "
Maggie Carrell	widen it and make it into a freeway
RHONDA ENNEKING	Im okay with proposed plans.
Gail Riegle	
Catherine Carmean	Please see above.
Lisa Dean	
Darla I Hopson	Make overpass to pass over red lights, widen it
Rashmi Jain	Not opposed to the by-pass with any of the current proposed alignments. •Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380. •Request consideration of the impact of the proposed by pass on First Street, Prosper Trail and Frontier Parkway in Prosper due to possible "cut through" traffic to connect with proposed by pass versus expanding the current alignment of 380
Cynthia Sandlin	
CHARLES P MILHEM	No good solution for access routed through the heart of McKinney
Debbie Schussler	
oliver Cromwell	Build the bypass from 75 to the DNT
Cindy Gamble	The blue line
Kimberlee Greider	
Ward Rudolph	leave as is
Melissa Richardson	
Steve DeHan	
Wyndi Veigel	More lanes on 380 divided with a median that cannot be easily crossed. Need sound edging on shoulder so people cannot drive off of the road as easily when intoxicated or sleepy. Ready for 380 to stop killing people.
Patty Bockenfeld	

Please provide us with your contact information.	Do you support the building of a freeway regardless of alignment?
Name	Open-Ended Response
Tammy Eiland	Do not
Clayton Shapiro	No
Ellen Hill	Not sure
Jeff Clark	no
Darla I Hopson	No
Glen Merrick	Yes
benjamin hemken	
Darla I Hopson	No
Lia Fernandez	Yes
Gage Galinger	yes.
Kathryn Manders	
Darla I Hopson	No
Sigrun Clariot	No
Maggie Carrell	yes
RHONDA ENNEKING	Yes
Gail Riegle	Yes. Allows local residents to access businesses along the 380 frontage road without actually using the freeway.
Catherine Carmean	No Comment.
Lisa Dean	
Darla I Hopson	No
Rashmi Jain	Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380.
Cynthia Sandlin	Traffic needs more north/south travel not all east/west
CHARLES P MILHEM	No
Debbie Schussler	
oliver Cromwell	NO.
Cindy Gamble	No
Kimberlee Greider	
Ward Rudolph	no
Melissa Richardson	
Steve DeHan	
Wyndi Veigel	Yes, we need it for growth.
Patty Bockenfeld	No

Please provide us with your contact information.	Do you have any concerns with the existing US 380?
Name	Open-Ended Response
Birgit Mendoza	Accidents
Amy Nardi	Yes. Growing congestion
Denise Broyles	Traffic, noise pollution
Jenny Martin	Yes. Very congested dangerous road.
Andrea Evans	No
Lana Casica	Yes, too many cars!! Too many lights!!!
Tony Keefer	Accidents
Danna Demma	Busy and dangerous
Brentney Hamilton	
Janis Cable	Center lane is not utilized properly & should be eliminated.
Jenny Little	
Jennifer Potter	Not safe, big semis drive dangerously. Our kids have to cross 380 or take it to get to high school AND middle school from our neighborhood.
Dina Davenport	US 380 is over-crowded. Too many stop lights.
Gary Deese	Yes,
Amanda Jackson	High traffic with unsafe intersections.
Cindy Cash	yes, to busy
Ashly Caserotti	yes - very dangerous between Princeton and Airport Rd. Constant wrecks. Very dangerous to turn onto FM 1827: Traffic coming at you at 60 mph & you are sitting at he light waiting to turn.
Matthew Jeanes	No
Heather Mordue	No
James Larkin	No.
Lance Casesotti	Yes. 380 has been overused and out of space/date for over 8 years.
Christine Correa	
Andrew Mericle	No
Eric Fortner	Congestion
Jackson Gamble	No
Joe Lichter	380 is very congested and is expected to get worse.

Please provide us with your contact information.	If US 380 is congested, what alternative routes do you take?
Name	Open-Ended Response
Birgit Mendoza	
Amy Nardi	I take Hardin and loop back to 380
Denise Broyles	Virginia
Jenny Martin	Monte Carlo to back way to Farmersville
Andrea Evans	HW121
Lana Casica	Panther Creek or Eldorado
Tony Keefer	Virginia
Danna Demma	Virginia
Brentney Hamilton	
Janis Cable	FM 546
Jenny Little	
Jennifer Potter	Virginia Pkwy or Eldorado Pkwy ,or White.
Dina Davenport	HWY 121
Gary Deese	Secret
Amanda Jackson	Rockhill
Cindy Cash	FM 546
Ashly Caserotti	In New Hope, I drive FM 2933 from FM 1827 or Buck Board/Trail Dr/FM 293/McIntyre Rd to Hwy 5.
Matthew Jeanes	121/5, Virginia, or Eldorado
Heather Mordue	Virginia or El dorado. Lake Forest or Custer
James Larkin	Virginia, El Dorado
Lance Casesotti	1827 to 2933
Christine Correa	
Andrew Mericle	I suck it up.
Eric Fortner	Through McKinney on South
Jackson Gamble	Virginia
Joe Lichter	I don't have too many alternatives. I typically just stay on 380.

Please provide us with your contact information.	What solutions would you suggest in the US 380 Corridor?
Name	Open-Ended Response
Birgit Mendoza	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Amy Nardi	
Denise Broyles	
Jenny Martin	Bypass would help a lot, possibly a median on 380.
Andrea Evans	Instead of a dog leg around McKinney why not have a proper loop starting at DNT taken the route further north of current 380. Where your demographic map shows the largest population growth.
Lana Casica	Make it an interstate with frontage roads to get to the businesses.
Tony Keefer	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
Danna Demma	Take it north
Brentney Hamilton	
Janis Cable	- Alternate alignment North of 380, a bypass per se. - Eliminate center turn & use concrete barriers to help with head on collisions - Possible lane expansion E & W.
Jenny Little	Stay away from Erwin Park!
Jennifer Potter	Make into a freeway or tollway like 121.
Dina Davenport	Build a parallel Hwy NORTH or Hwy 380. Stay out of Stonebridge, please!
Gary Deese	Dedicated transit system lanes w/ distribution to main work areas
Amanda Jackson	Expand and put lanes for better entrance and exit points.
Cindy Cash	Double Decker highway bypass loop
Ashly Caserotti	Please do not go through New Hope.
Matthew Jeanes	Enhance/expand the current route
Heather Mordue	
James Larkin	Center divider.
Lance Casesotti	I liked the studies I reviewed tonight. Blue and Yellow seem to be my favorite. The pink and green don't supply any help for the McKinney area (Near SAMS)
Christine Correa	
Andrew Mericle	Expand in the current footprint
Eric Fortner	Do not impact Erwin Park!
Jackson Gamble	Not killing Erwin park
Joe Lichter	The Blue Route looks to make the most sense to me.
