IH-30 Managed HOV Lanes Occupancy Rate by Hour, AM & PM Peak Periods

Observations:

Occupancy Rates are the highest between 4:00-5:00 pm

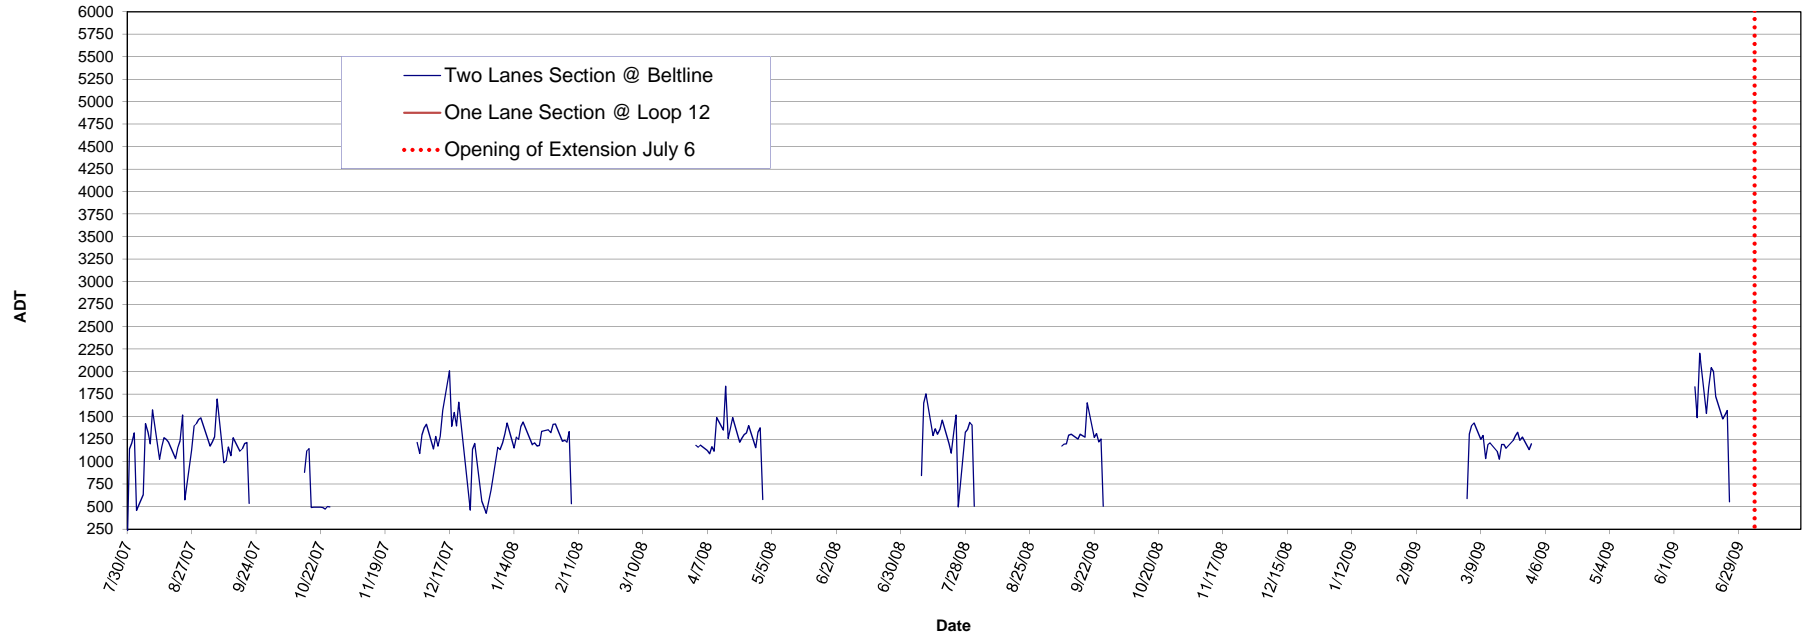

IH-30 Managed HOV Lane Occupancy Rate by Date During Peak Periods

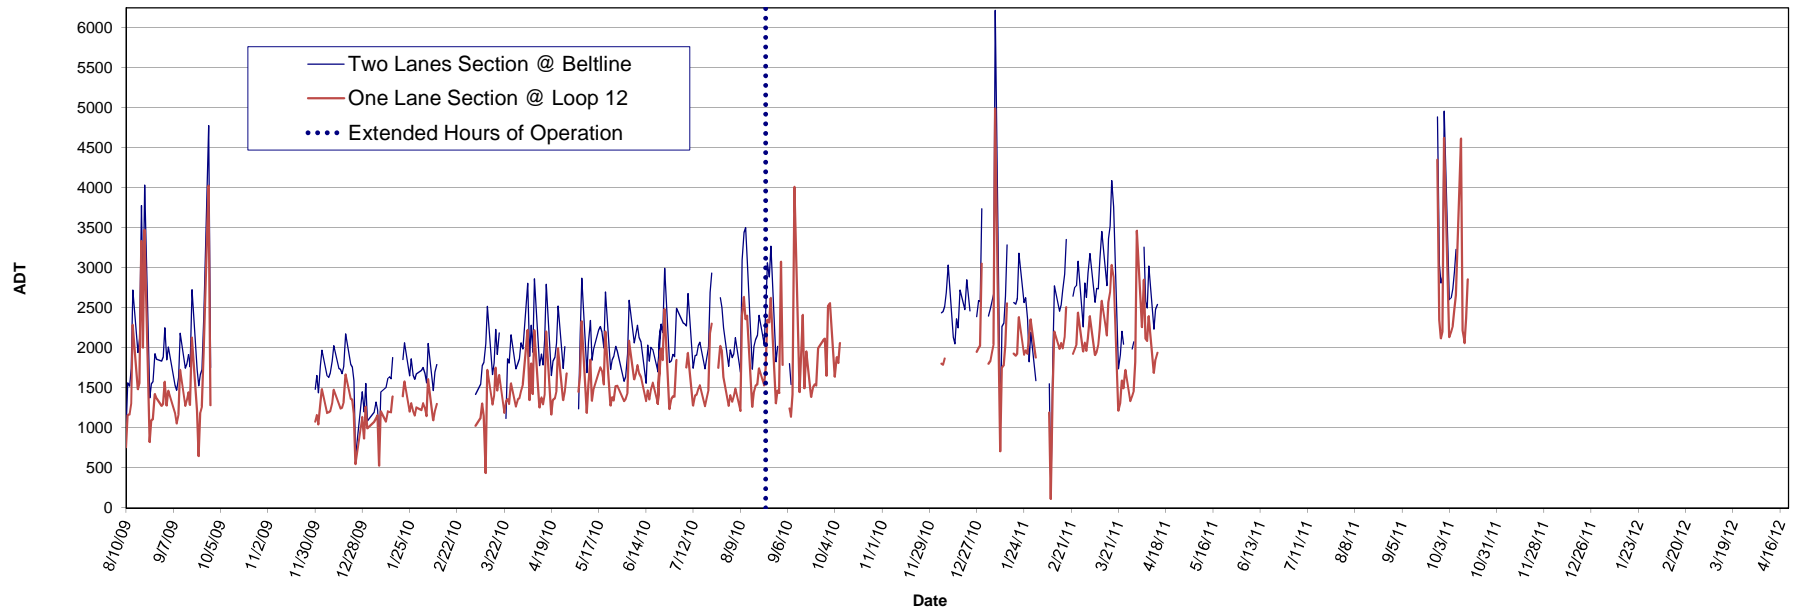

Observations:

Occupancy Rates average between 1.95 and 2.20 with the exception of Jul 08 when the price of the gas was the highest. Occupancy went higher during mid 2008 due to price of gas. Once the price dropped, the Occupancy rate returned to average. AM Occupancy rate stabilizing after steep decline (DeShazo Data started on Apr 09)

IH-30W Managed HOV ADT Before Opening of Extension, w/o Weekends & Holidays (Tube Counters)

IH-30W Managed HOV ADT After Extension Opening, w/o Weekends & Holidays (Tube Counters)

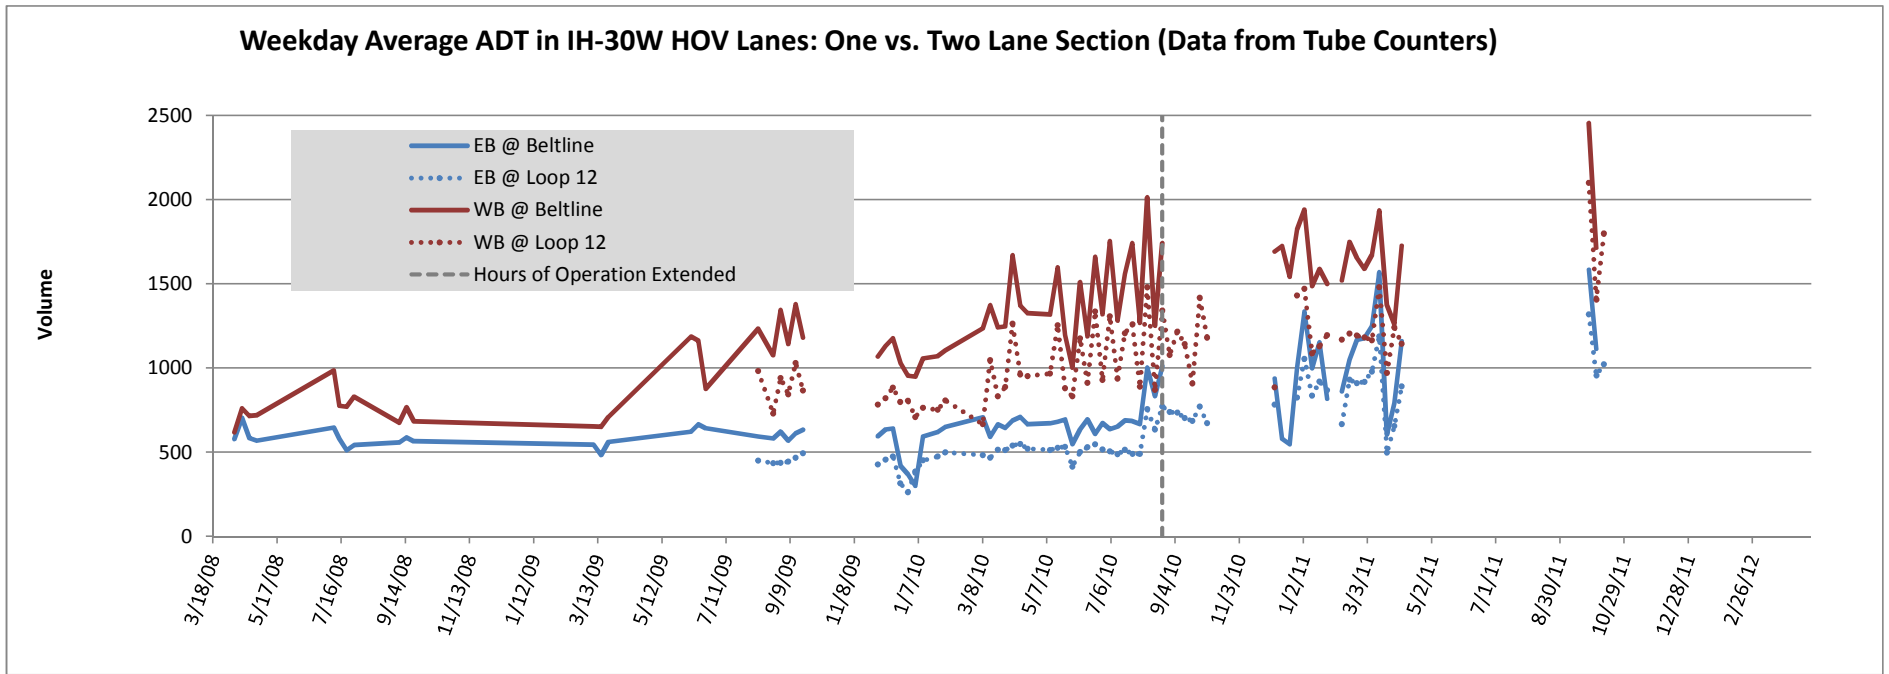

Observations:

ADT is the sum of the eastbound morning operations, westbound evening operations, and special events operations due to the reversible approach of the facility
 Weekly ADT follows the same pattern: starting with the lowest ADT on Mondays and peaking by Friday
 Blanks represent days when sensors were inactive or malfunctioning
 HOV Holiday and weekend closures not included.
 On 8/23/10 the hours of operation were extended: EB (9p-12p) and WB (1p-8p)

New:

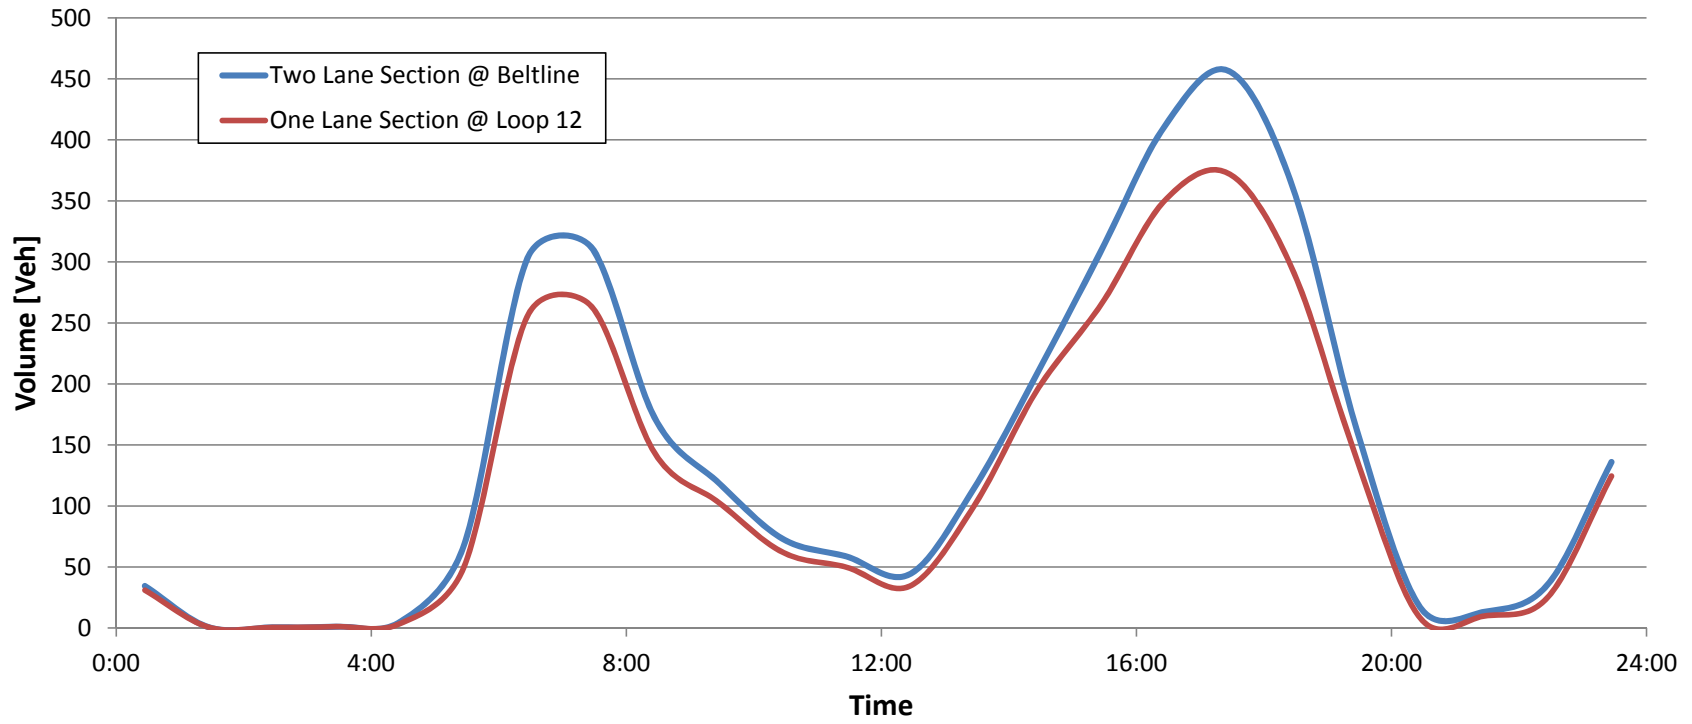

Friday traffic is the highest of the weekdays
 Traffic in the two-lane segment continues to be 33% higher than in the one-lane segment
 Usage of facility at night becoming more frequent yielding better utilization of the HOV lanes
 Record volume of 6218 vehicles on 1/7/11 due to night event

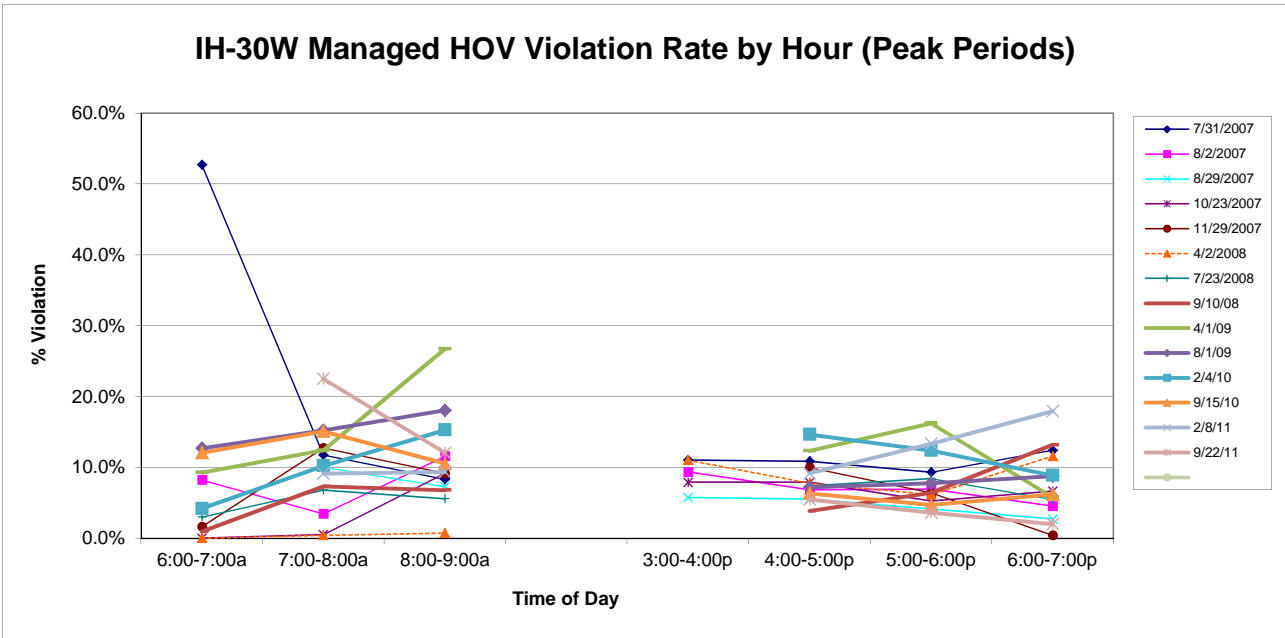

Notes:

- Weeks 8/17/09 and 9/21/09 excluded due to concerts
- Westbound traffic increased by 61% after the extension opening (Jun/2009) and fluctuates considerably
- Traffic in both directions has increased after the hours of operation were extended: 13% WB & 45% EB
- Starting 2010, special event traffic is included in the graph
- In 2011 and 2012 increased traffic in part due to the more frequent use of the facility during night events

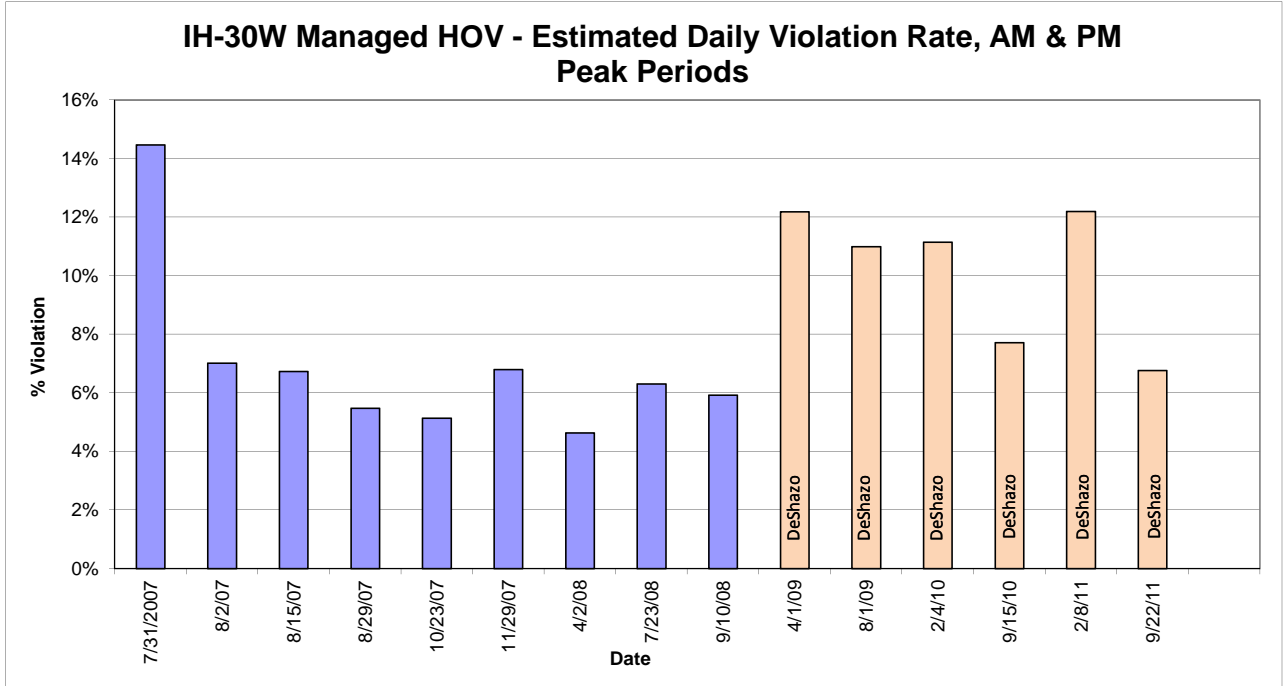

I-30W HOV Lanes Average Weekday Hourly Volume (Period 9/26/11 - 10/8/11)

Observations:

Hourly violation rates vary between 0-18%
 Appears to be no correlation between violation rates and time of day
 Post April 09 rates increased significantly. After April 09 violation rates are calculated from data generated by DeShazo.

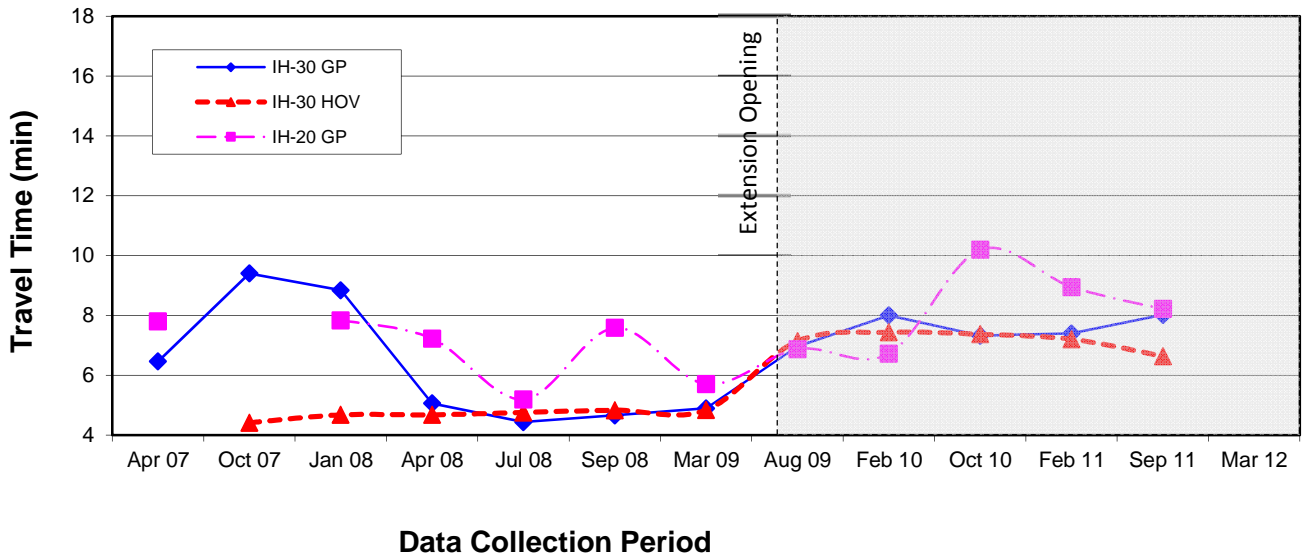

Observations:

Average Daily Violation rates after April 2009 are calculated from data provided by DeShazo
 Before April 2009 TTI average daily violation rate was in the 5-7% range. After April 2009 the average is 11%.
