

Need:

The proposed action is needed because population growth within Denton and Collin Counties has caused increases in current and forecasted traffic volumes that exceed the capacity of US 380 between Teel Parkway/Championship Drive and Lakewood Drive, leading to increased congestion, reduced mobility, and higher crash rates compared to other similar roadways in the region.

Purpose:

The purpose of the proposed project is to manage congestion and improve east-west mobility and safety and to accommodate future traffic demand by adding capacity and converting the existing US 380 into a controlled-access highway.
