1056	Stonebridge Ranch	4/7/2019	Email	<p>As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9417 residences of Stonebridge Ranch and its 36,000 residents who live in McKinney. In a unanimous vote, we stand in agreement along with the 381 residences in the Tucker Hill Homeowners Association and its 900 residents, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor. We hereby make an official statement in support of either bypass Red Option-B (our preferred option) or Red Option-E and oppose bypass Red Option-A or the green alignment of widening 380 or converting it to a limited access freeway. Options B or E are the most viable, least expensive and least disruptive to businesses and homes along 380 when compared to widening 380 (the green option). If Highway 380 (the green option) were implemented, according to TxDOT's own numbers, it will destroy nearly 200 businesses and homes along the 380 commercial corridor including all of the existing businesses on the four corners at the intersection of Highways 380 and 75, and impact the historic and empowerment zones in McKinney. This will result in a significant reduction in the sales and property taxes to the City of McKinney along with bringing an increase in traffic and noise to the already developed housing subdivisions that abut 380 with more to come. As to the detrimental impact on Stonebridge Ranch if 380 were widened, it would double the width of the current highway and bring significantly more traffic to the area. In addition to the increased noise for the hundreds of homes in Stonebridge Ranch that abut 380 on the Northern edge of Stonebridge Ranch, there are three roads: Lake Forest Drive, Ridge Road, and Stonebridge Drive that go completely through Stonebridge Ranch and provide the only means between Hardin Road and Custer Road for getting to Virginia Parkway, ElDorado Pkwy, Custer Road and Highway 121. These roads were designed for neighborhood traffic and not arterial connectors to other major roads. That is the reason for our opposition. If the proposed bypass (Red Option-A) that enters Highway 380 East of Custer Road were implemented, in addition to the above traffic problems, there would have to be a major interchange built at the intersection of the new six lane bypass and existing 380 which is already six lanes. This interchange would be right above the northern edge of Stonebridge Ranch just east of Ridge Road. It would have a very detrimental impact on both Stonebridge Ranch and Tucker Hill by bring a significant increase in traffic along with an increase in the air and noise pollution to our neighborhoods beyond any other option. On the subject of impacts to non-profit organizations that would be affected, if 380 were widened (the green option), three non-profit organizations in McKinney would be destroyed: Life Path Crisis center which is Collin County's only inpatient mental health facility, INN STYLE which is the store that provides funding for the Samaritan Inn homeless shelter, and Cornerstone Ranch that houses adults with special needs. No one is speaking up for them. Since they are not backed by individuals with financial resources, they do not have the funds to mount a campaign to save themselves. It would be a tragedy to lose them. Ask yourself; is ManeGait (who would not be destroyed) more important than these three entities who serve more individuals? We also support business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be eliminated if 380 were widened (the green alignment option). To reiterate, our Board, on behalf of our residents has unanimously voted to oppose the proposals to widen Highway 380 or convert it to a limited access freeway and support either of the alternative bypass route options North of Highway 380 that cross Custer Road and enters Highway 380 West of Custer Road known as Red Option-B or Red Option-E. Thank you for taking the time to consider this letter and our position.</p>	Comment noted.
1057	Stuart Kimbs	3/28/2019	Comment Form	Fix 380 on 380 – No bypass options	Comment noted.
1058	Sue Reiskus	3/28/2019	Comment Form	Fix 380 on 380 is the option that needs to go forward. I live in the Timber Creek subdivision. We built here 3 years ago. We chose this location because it sat back off of 380, but still close to 75. Being back off of 380 we are not impacted by the noise. If the other options go thru you will be putting the bypass in my backyard. I encourage you to build out the arterials as planned in the 2040 master plan. This bypass will effect our quality of life, as our home value. Sue Reiskus	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
1059	Susan Carpenter	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
1060	Susan Gradick	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1061	Susan Horak	4/4/2019	Email	I have been riding all of my adult life. I am 72 and still ride for therapy. I know the importance of the ManeGait Therapeutic Riding Center and I am a supporter and contributor to them. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

1062	Susan Jump	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.
1066	Susie Miles	3/28/2019	Comment Form	If we must pick between two evils Red D with Green B are the logical choice. First off shorter distance, people wont use a bypass if it is to far out of the way second less number of residential property impacts and displacements as well as future developements and costs. it meets all the criteria - mobility travel, safety and future economic growth plus it does not go through my family property of 65 years. I hope to kept it in my family for generations to come.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1067	Tami Johnson	3/28/2019	Comment Form	I am writing to voice my opinion to any 380 by-pass and for keeping 380 on Both of TX DOT'S surveys indicate the vast majority of participants in Frisco, Pros, & McKinney want 380 to remain on 380. This makes perfect sense, since any by-pass will be of limited access to most residents and will be too far north to be of any real value to many. A by-pass will not address the traffic problems that already exist and will contribute to worse, on existing 380, because the majority of people will continue to use this route to access 75 & the numerous businesses that are located on & carring to existing 380. The Perryman report also reflects that making existing 380 a limited access freeway will in fact, enhance the long-term value of businesses in that area. A by-pass will disenfranchise all of the residents who bought McKinney which did not include any such bypass. rewarding the city of McKinney for its lack of foresight & planning. For all these reasons I vote NO BYPASS and KEEP 380 ON 380.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted. The Perryman study completed January 2017 analyzed potential economic effects of converting portions of the the existing US 380 corridor into a freeway. The study did not analyze economic effects of new location alignments.
1068	Tammie Mercer	4/10/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1069	Tammy Biggis	3/28/2019	Comment Form	Keep 380 on the original 380. I would like to see the outer loop completed and 380 widened on the existing 380. <u>No ByPass</u> Thank you	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
1070	Tammy Pennington	3/28/2019	Comment Form	We lived in Stonebridge at 380. We sent our kids of to college, became empty nesters + moved to Prosper, away from 380, noise + pollution. We are in the home we plan to die of old age in. Now here comes a bypass to take our peace + serenity. Years ago, long before all the people moved here we had a friend killed on 380. It's been dangerous a very long time. The high school kids in Stonebridge north of Custer are zoned to MNHS at 75. All these kids have to drive on dangerous 380 multiple times a day. Its dangerous + needs to be fixed. Fix 380 + make it a LAR & the Loop will take up the slack. Why harm 20+ neighborhoods + wildlife habitat when 380 need to be fixed ?	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
1071	Tara Voigt	3/28/2019	Comment Form	I am completely against any bypass option. Until thorough environmental research as been done there is <u>no way</u> a bypass is even up for discussion	Comment noted.

1072	Tara Watkins	3/28/2019	Comment Form	What a disappointment to find that DOT has not listened to the result of the public surveys of October 2018 - Where the vast majority of people prefer 380 to stay on 380. Yet another possible alignment going through Prosper does not support Prosper Town Councils Plan. Listen to your public or don't bother asking them !	Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.
1073	Taylor Renberg	4/5/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. God Bless	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1074	Tena Worthy	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. 1076	Teresa Dempsey	3/28/2019	Comment Form	We need a bypass for McKinney. I live and work on 380 and travel it every day. I see wrecks at Lake Forest and 380 all of the time. When there is a wreck all of the lanes are blocked. More lanes on 380 will not solve this issue just more lanes will be blocked. Move this traffic as far from here as possible. I would like the west most option. I have to sit through the light at Hardin 3 or 4 times to go home. As McKinney grows more on 380 this problem is only going to increase. Please do a long term solution not a band aid for now. If you widen 380 in McKinney, many businesses will have to move. Will those jobs be permantly lost ?	Comment noted.
1077	Teresa Murphy	4/8/2019	Email	Please consider the Green Alignment , not the Red Alignment B & E for the US 380 Expansion. In choosing that route, ManeGate will continue to provide much needed therapy for our area. I am one of the many volunteers at ManeGate and I have witnessed myself the positive changes that have occurred as a result of riding horses! Part of our mission statement says that we help children and adults with disabilities through the healing power of a horse! Please come visit and see why ManeGate is so important to our community!	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
1078	Teresa Murphy	4/10/2019	Email	I sent a comment in on Monday but I wanted to share what happened on Tuesday when I was volunteering at ManeGait. I have been working with a child that is mute and uses sign language for communication. On Tuesday, we got to trot the horse that the child was riding. The child was so excited and said "I like it"! We could not believe it! This was a miracle! Miracles take place at ManeGait! Please don't take that away! Please use the Green Alignment or the Red Alignment A so that ManeGait can be saved!	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
1079	Teresa Price	3/28/2019	Email	Please accept my support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east -west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1080	Terry Prindwille	3/28/2019	Comment Form	These are not stragic plans please do not impact Prosper or Whitely Place. Spend what is needed and use 380 instead of traffic causing loops -	Comment noted.

1081	Terry Reiskus	3/28/2019	Comment Form	I just built our retirement 2 yrs ago in timber creek never dreaming a LAR would be built next to our subdivision. This bypass option will affect my home value and our quality of life. Build the arterials as planned in the 2040 master plan. You are going to have to fix 380 as it is the straight line. The outerloop when built will serve as a true bypass. The arterials will serve the local residents Fix 380 on 380	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
1082	Terry Sutton	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	<p>Comment noted. 1086	Thomas E & Victoria E Fi Fiore	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road.</u></p>
1087	Thomas George	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. 1094	Tim Karamas	4/9/2019	Email	Hello Mr. Endres, I got a letter in the mail today about the May meetings about the Highway 380 bypass routes. I live at the southern end of County Road 8 6 2 northeast of Myers Park and I wondered if I am still 2 miles north of the most northern route? Would you please let me know? Thanks very much! I appreciate your help ! Tim	Comment noted. Mr. Karamas was notified that he remains over two miles away from a proposed alignment. He received notice of the meetings because he signed up for updates at Drive380.com.
1095	Tim Karamas	3/28/2019	Comment Form	As residents of County Rd 862 for 21 years, we love the rural style of this area. We would like you to keep this road/highway as far south from us as possible. McKinney use to be a special place to live, but it is becoming too much like a big city. Some states have a no-growth- or slow-growth amendment, or 2 acre minimum lots in order to preserve the quality of life of that city. Please preserve the quality of life here or there will be nothing "unique by nature"about McKinney because there will be no more "nature" left. Thank you!	Comment noted.
1096	Tim Kihm	3/28/2019	Comment Form	I am writing this AGAINST any bypass of 380 which enters or borders the Town of Prosper. The Town of Prosper has had a longstanding plan for development, which has never included any bypass of 380. Rather, this plan considered the existing 380 plans , which contemplate expansion along the existing route. Many residents of Prosper considered this when selecting Prosper as their home. To later this due to pressure from a MINORITY of McKinney residents (Hon. Self – Tucker Hill) is WRONG. Keep 380 on 380	Comment noted.
1097	Timothy & Susan Anderson	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. This is an amazing service.....please don't let anything happen to it. Thanks in advance for your consideration, Timothy and Susan Anderson	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
1098	Timothy Tebo	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. 1103	Todd Clayton	4/11/2019	Letter	<p>Dear Mr. Endres, Regarding the TxDOT US380 Feasibility Study, Encore Wire offers the following in opposition to proposed East McKinney Green Alignment. Option B: Encore Wire Corporation was founded in McKinney in 1989, and has grown into the City's largest taxpayer for 20 years running via a culture of rapid, deliberate growth. Their current employment sits at 1400 employees, operating with nearly 2.1 million square feet of manufacturing space on a 24/7 basis. Encore Wire is a public-owned company (NASDAQ: WIRE) whose earnings are affected by fluctuating commodity prices vs. product pricing, in a cyclical construction industry. As such, costs are closely managed and decisions made based on current market conditions. The key to Encore's success as the low-cost industry producer, and its staying power in the wire industry has been flexibility. Encore is constantly moving or upgrading equipment to improve efficiency and expanding existing facilities to offer increased capacity and new product lines. Encore Wire has expanded its operations and/or manufacturing capacity roughly every two years since 1992. Forecasted growth for the residential construction industry is expected to grow 7% over the next five years, and commercial construction is expected to grow by 28% for the same time period. Encore Wire will need to expand to meet forecasted industry demands. Encore Wire has to move fast to take advantage of market trends. Their construction partnerships allow for product to be shipped from a brand-new, green field manufacturing plant twelve months from groundbreaking. Having all facilities in one geographical location, connected and easily monitored via a single high-elevation viewpoint offer genuine advantages. Encore Wire represents a significant economic impact to the area economy. Over the last five years, payroll totaled \$327.3 million. Five-year capital expenditures totaled \$137.1 million as investments in growth. Charitable contributions totaled \$2.3 million. And, taxes paid over the last five years totaled over \$53.7 million. These items alone account for over \$520 million of direct economic impact. Given all these factors, splitting the Encore campus in such a manner would result in significant interruption to operations and future growth opportunities. The long-term uncertainties of a US380 bypass alignment through campus would limit Encore's short-term flexibility and hence its growth and success. Encore Wire Corporation respectfully requests TxDOT recommend a US380 bypass alignment that does NOT involve development along existing Airport Road.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 1104	Todd Huthmaker	4/9/2019	Email	<p>I strongly SUPPORT the Red Option-B bypass alignment option. This option is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option -A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option -B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
1105	Todd Payne	4/1/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. 1111	Tom & Paula Ford	3/28/2019	Comment Form	Keep 380 on 380! Fix 380 on 380! Your new "E" bypass is no better. The disaster that will be Custer Road is unconscionable. All of the residents in all the neighborhoods along Custer, including mine – Rhea Mills Estates – will be adversely affected by the unending traffic, noise, construction, & destruction of our peaceful, quiet existence. Either fix 380 on 380 or choose the "A" Route, which doesn't destroy people's homes or our Prosper Lowe's store, which generates millions in tax revenue for our town.	Comment noted.
1112	Tom Hanson	4/10/2019	Email	As a homeowner and citizen of McKinney, Texas I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. I strongly OPPOSE widening US 380 (the Green Alignment option) or convert US 380 to a limited access freeway for all the reasons of which you are probably already aware. I strongly OPPOSE Red Option-A. Red Option -B or Red Option-E are the best solutions to better serve the future growth areas north of McKinney. The best option should not be held hostage to a shrill politically connected minority when it will be primarily located on undeveloped land as opposed to major disruptions, economic loss and excessive costs for all other proposed solutions.	Comment noted.
1113	Tom Reidy	3/28/2019	Comment Form	Red option B & E ruin ManeGait. This cant happen every one that has put a business or residence close to 380 knew (or could have known) the risks. It is/was very obvious 380 would be a major thoroughfare. Most businesses + residents also have the power to handles this. They can move. They can get more business. They have options. ManeGait is a non-profit, does a lot of good, and has no power to overcome this. Like most small non-profit, charitable orgs, the \$ *** **** the pockets are not deep, it is all heart. No ability to react. It is completely unfair to make ManeGait deal with this. *Don't hurt the "powerless". Stick to the original plan, the state + county have the \$ to build it or just start the bypass from the tollway – go west. Thanks T	Comment noted.

1116	Toni Margolis	4/5/2019	Email	<p>As a 16 year resident of Prosper, I would like to make it known that i support the GREEN alignment between Coit and FM 1827 for the Hwy 380 expansion project. It is the path that makes most sense for both Prosper and Mckinney, and is the least destruction of a beautiful portion of our town. As the mother of a daughter who has benefitted as a rider at Mane Gait, I cannot stress enough how vital that organization has been to our family. To see such a wonderful nonprofit organization possibly be forced to displace hundreds of therapeutic riders at the expense of an alternate UNNECESSARY expansion plan such as the Red alignment B and E is unacceptable. I appreciate you reading this and am praying the entities involved choose GREEN.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

1122	Truett Harris New resident to Prosper from McKinney	3/28/2019	Comment Form	<p>Bypasses are a bandaid. What should be done is to widen 380 all the way to 75 and beyond. Lowes @ customer + 380 bought the land where Kohls was to be. Kohls built their parking lot + discussed the future w/TXDOT + because TXDOT had no concrete plan, Kohls decided not to build. Baylor Scott White intentionally set back their hospital to accommodate the widening of 380. Little to no local traffic will use the bypass just as little traffic uses the Denton bypass. Unfortunately, TXDOT does not appear to have a solid plan in place. It was amazing that at 6:32 pm tonight there were reports out about the meeting.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
1123	Tucker Hill	3/28/2019	Letter	<p>The board of directors of the Tucker Hill Residential District Association on behalf of 381 residences and its approximately 900 residents who are citizens of the city of McKinney stand in agreement with Stonebridge Ranch Homeowners, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor. We hereby make an official statement in support of a bypass option B or E and oppose bypass option A or the green alignment of widening 380, converting it to a Limited Access Roadway. The proposals to widen Highway 380 (the Green Alignment option) and convert it to a limited access freeway would destroy much of the commercial corridor and significantly impact the historic and empowerment zones in McKinney. This will result in a significant reduction in sales and property taxes to the City along with bringing an increase in traffic and noise and environmental hazards to the already developed housing subdivisions that abut 380 with more to come. This has been confirmed by the city of McKinney's review of the Perryman study in which it was determined that the city of McKinney alone would bear between 70-75% of the total destruction and negative impacts of the entire 380 study region that includes McKinney, Prosper, and Frisco. We also oppose the very detrimental impact to Tucker Hill if the proposed bypass Red Option-A which enters Highway 380 East of Custer Road were implemented. The air and noise pollution to our neighborhood will be significantly increased beyond any other option. In addition, we have concerns regarding the safety and the ability of both residents and emergency vehicles to enter and exit our neighborhood both during and after construction. We support Red Option-B or Red Option-E as the most viable, least expensive, and least disruptive to all businesses and homes along 380 when compared to widening 380. We also support business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be initially, and potentially permanently, eliminated if 380 were widened (the green alignment option). To reiterate, our Board, on behalf of our residents, has unanimously voted to respectfully request you to oppose the proposals to widen Highway 380 and convert it to a limited access freeway from Coit Road to FM 1827 and support either of the alternative bypass route options West of Custer Road known as Red Option-B or Red Option-E.</p>	<p>Comment noted. Alignment options are still being evaluated and any future improvements will be designed to enhance safety.</p>
1124	Tyler Dorsett	3/29/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road.</u></p>
1125	Tyrel Gear	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
1126	Valerie Farrington	3/28/2019	Comment Form	<p>The "alignment" as I understand the word does negatively impact the people who live east and of the proposed bypasses A,B,E. These neighborhoods have many children and very hard working people who have invested in an area they believed was to remain quiet and suburban, far from freeways – I ask you to <u>not</u> build alignment or bypasses - Use 380 for what it was originally intended - convert to limited highway or freeway with frontage roads. Thanks so much Val Farrington</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

1127	Veronica Heathcock	4/11/2019	Email	<p>My name is Veronica Heathcock, I live at [REDACTED]. I am extremely concerned about the so called 380 bypass. I would like my voice heard please. I do support the GREEN alignment and most efficient path for east-west traffic through the cities of McKinney and Prosper. I do not believe a bypass is necessary and would destroy the beauty of our community. The noise level would be horrendous. Plus the GREEN alignment preserves a very prominent and very worthwhile nonprofit organization; ManeGait Therapeutic Horsemanship. If you have not been to this organization and personally see the good they do for the less fortunate, you should visit and see for yourself. Both the RED alignments would have direct impact on ManeGait and also my neighborhood. You are welcome to contact me if you want additional information or have questions.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

1139	Whitney Kenney	3/28/2019	Comment Form	As a homeowner and new citizen (as of Aug. 2018) of McKinney, TX I STRONGLY SUPPORT the RED OPTION B or RED OPTION E bypass alignment options. My neighborhood would be negatively impacted by any of the proposed (red option A and green) options. My husband and I recently relocated from Southern California, and some of the big selling features of McKinney were the fresh air, country feel (while still being close to the city, and beauty without all of the LA/Orange County Traffic. By putting a freeway/massive highway construction project in our literal front yard, you will impose on us all of the negative things that made life in CA unbearable, along with neighborhood safety and depreciating property values (due to undesirable proximity to a highway). Both of our homes in were located near freeways/freeway entrance. And both location we had cars broken into, and after talking w/police we were told it was because thieves target neighborhoods close to freeways. Please Red options B or E	Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.
1140	Whitney Oestreich	3/28/2019	Comment Form	As a homeowner and citizen of McKinney TX, I strongly support either the Red Option B or Red Option E bypass alignment option. The options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. I strongly oppose the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway, these costly options will destroy 200+ existing & future businesses, one of them including a convenience store my family owns & runs.	Comment noted.
1141	Willene Peterson	3/28/2019	Comment Form	Proposed Wording for US 380 MAPO Comment Form As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
1142	William & Joyce Bunting	4/9/2019	Email	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380 They are also the least expensive options when compared to the cost of the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>There is not a 4 level interchange proposed near Ridge Road.</p> <p>Comment noted. 1144	William Elliott	4/4/2019	Email	<p>COMMENT: "I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services." We use to live in Prosper right by ManeGait. They have served so many and helped just as many. Please save ManeGait & Support the GREEN alignment!!!!</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
1145	William Guernsey	3/28/2019	Comment Form	<p>I oppose all by-pass options but particularly red option E because: 1 E cuts thru Prosper and destroys Lowes & surrounding retail stores which are primary revenue sources for the town of Prosper; and 2 A bypass will not be heavily traveled. The new proposed outer loop will take significant north bound traffic. 380 will still be heavily traveled so its best to make it a limited access highway now because it will eventually need that designation regardless of a bypass. No traffic study/forecast has yet been completed per TXDOT. Do your study forget the politics – engineering & economic logic will tell you to stay on 380.</p>	<p>Comment noted. Any future improvements will be designed to enhance safety.</p>

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>
1157	William Spilman	4/2/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. 1158	Yolanda Perez	3/28/2019	Comment Form	<p>Please choose Red Option B. We have lived in our home for over 16 years. We treasure our neighborhood our land & moved out here to be away from every thing. We totally understand the need for change but respectful ask that you minimize the effect on our daily lives. Its already so much louder here than before & this would impact this further along with the pollution /air/trash that this would create. Our goal is to continue to live here til the end... As in, our request is not even based on property value (which would) but based on quality of life.</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>

US 380 Collin County Feasibility Study

MEETING OF AFFECTED PROPERTY OWNERS (MAPO)

Proposed Improvements to US 380 from Denton County Line to Hunt County Line Collin County, Texas
CSJs: 0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

TxDOT will conduct a **Meeting of Affected Property Owners (MAPO) to discuss and receive public comments on a new alignment segment added to the feasibility study in East Prosper and West of the McKinney area.** You are receiving this notice because your property is located within 1,000 feet of a new alignment segment.

This MAPO is part of the TxDOT feasibility study for improvements to US 380 through Collin County. The purpose of the study is to analyze potential roadway options for US 380, including improving the existing alignment or utilizing a new alignment. Alignment options could require additional right-of-way to accommodate the project. This meeting will only focus on the new alignment segment. Public meetings regarding the full study area are anticipated for late spring 2019.

The MAPO will be held in an open house format with no formal presentation. Representatives from TxDOT and project consultants will be available to answer questions about the possible changes to the proposed project improvements. The meeting date, time, and location is listed below.

Thursday, March 28, 2019
6:00 p.m. to 8:00 p.m.
Lorene Rogers Middle School
1001 Coit Road
Prosper, TX 75078

Study data and maps showing the new alignment segment under consideration will be available for viewing at the MAPO. Written comments from the public are requested and will be accepted for a period of 15 calendar days following the meeting. Written comments may be submitted either in person at the public meeting or by mail to: Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, TX 75150-6643, or by email addressed to Stephen.Endres@txdot.gov. **Written comments must be postmarked on or before Friday, April 12, 2019 to be included in the documentation of the MAPO.**

The MAPO will be conducted in English. Persons interested in attending the meetings who have special communication or accommodation needs, such as the need for an interpreter, are encouraged to contact the TxDOT Dallas District Public Information Office at (214) 320-4480. Requests should be made at least two days prior to the MAPO. TxDOT will make every reasonable effort to accommodate these needs. If you have general questions or concerns regarding the proposed project, you may contact the TxDOT project manager, Mr. Stephen Endres, P.E. by phone at (214) 320-4469 or by email at Stephen.Endres@txdot.gov.

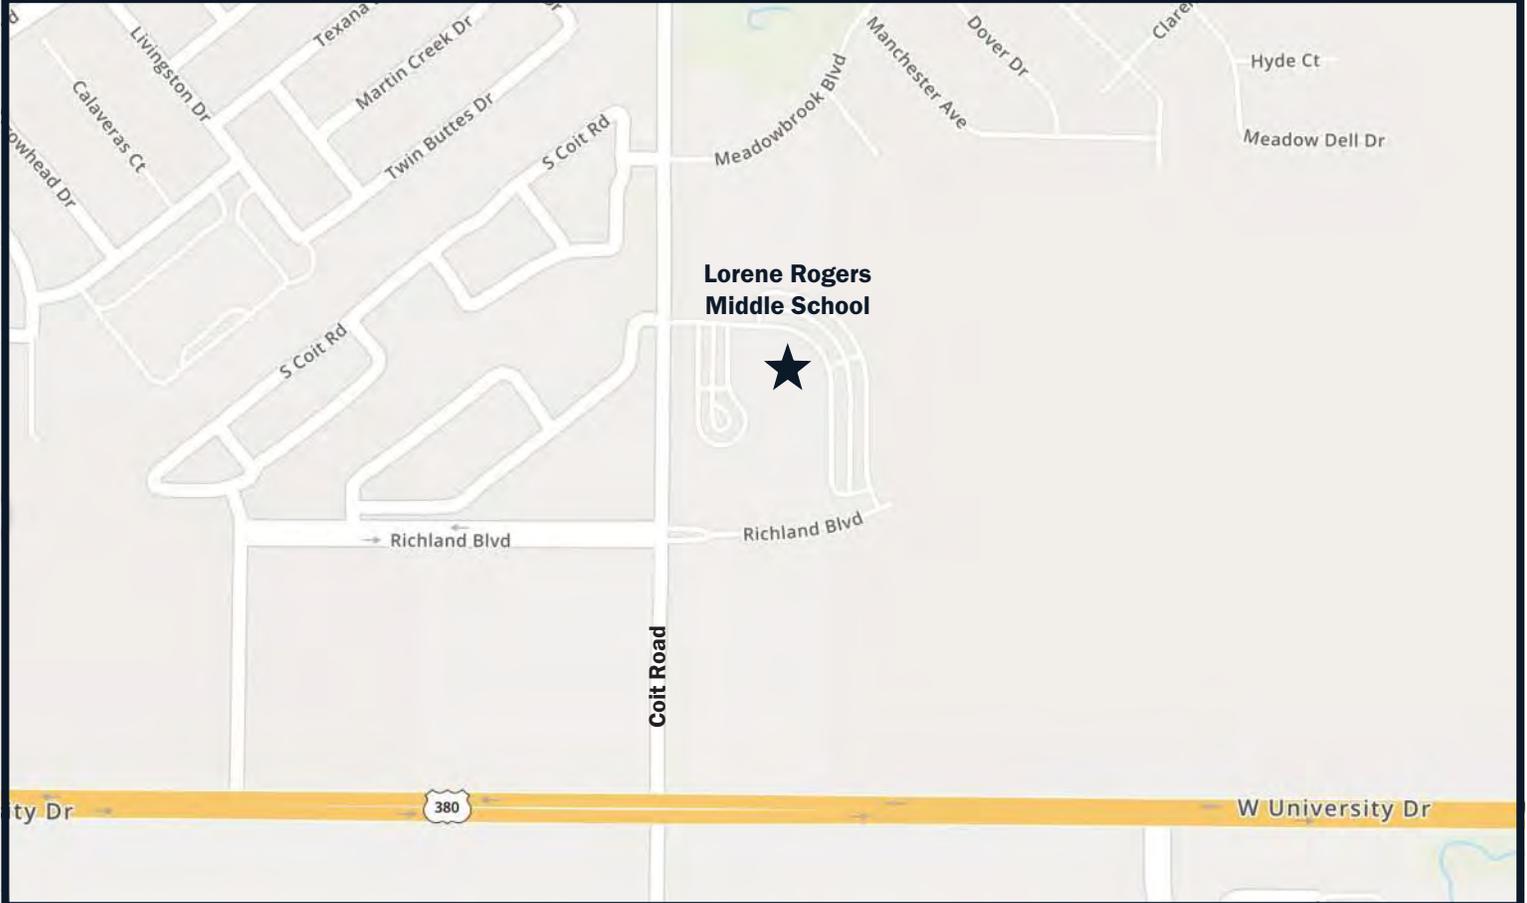

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Contact information: TxDOT, Stephen Endres, P.E., Stephen.Endres@txdot.gov, (214) 320-4469

[REDACTED]

"I support the GREEN alignment for US HWY 380 for many reasons, including, but not limited to:

- 1. Businesses and homeowners with the forethought to locate away from the Highway, should not have the highway coming to them!*
- 2. Moving a bypass into Prosper, is bullying from McKinney. Prosper is small, needs the tax base any real estate taken by a potential bypass, and again, had the forethought to build in most cases well back from the Highway.*
- 3. There's already a plan for an outer loop, an additional bypass is redundant.*
- 4. Expanding the existing Highway, will improve access to businesses along the Highway in the long term, rather than moving traffic away from them.*

"

"I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Thanks

Aaron

The Texas Department of Transportation is seeking your comments on the proposed project. All written comments are welcome.
All written comments must be postmarked by April 12, 2019.

Please Print

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT This note is to show support for the Green option regarding 380. A close friend has a son who benefits greatly from the services offered by Manegait . The Green option allows Manegait to continue to provide the services needed. I have personally seen the joy of the kids who use the services provided by Manegait. Please allow their programs to continue by choosing the Green option. Sincerely yours Joyce & Al Preisser

COMMENT: I am writing because I have a loved one at ManeGait, a non profit providing therapeutic horsemanship. I am in favor of the GREEN alignment between FM1827 and Coit Rd for the HWY380 expansion. This is the best option for traffic between Prosper and McKinney.

There is no need for a bypass. RED alignment B and E would directly impact ManeGait's property and cause issues for for their clients.

We need to preserve the beauty of the area as well as protect MainGait's ability to provide their much needed services.

That said GREEN alignment addresses all these needs and everyone wins.

Sincerely,

Alex Brannon

Subject: Oppose Red Alignments E and B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,
My name is Alisa Benson.
My home is in [REDACTED]

I strongly oppose the proposed bypass, Red Alignments E and B.

I support GREEN alignment between Coit Rd and FM 1827 for the expansion of US Hwy 380.

The green alignment is the optimal and most efficient path for east to west traffic through McKinney and Prosper.

The proposed bypass will unnecessarily scar the natural beauty of our community and will ultimately destroy Mane Gait Therapeutic Horsemanship.

Mane Gait assists countless families, including individuals with special needs as well as our Country's Veterans.

I implore you to examine options used in Dallas through University Park when Southbound 75 was widened years ago.

Regards,
Alisa Benson

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway.

Fixing 380 on 380 is the best option to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. Keeping some of the "Unique by Nature" that McKinney is known for rather than placing a large freeway which would make 3 (121, bypass, outer loop) within approximately 10 miles is the better option for McKinney.

Build out the surface streets the way that has been planned for years. And stay with the McKinney 2040 plan.

BYPASS Option E does not take care of the existing issues and concerns about a 380 bypass:
future - already in development

- Destruction of approximately 50-75 homes in Erwin Farms & Timber Creek neighborhoods.
- Proximity and noise to Erwin Park - one of McKinney's only preserved park areas
- Proximity to neighborhoods who chose NOT to live by 380!
- Proximity to Mane Grait property & noise
- Continued commercial development along 380 that will continue to be congested due to high speeds + stoplights. FIX 380 ON 380!

COMMENT:

1. *I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services*

Thanks!

Keep 380 on 380 - Red Option B cuts through a prime piece of property to be developed for the benefit of Prosper residents. This would drastically change the landscape of that land. NO to Option Z as it hurts our tax base by eliminating Lowe's that already exists.

NO BYPASS through Prosper is necessary with the Collin Co. Outer Loop coming.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, Texas, I strongly SUPPORT either the Red Option-B or Red Option-E alignment segment. These options are the least disruptive to existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive by up to 139M compared to option A or up to 271M compared to the green alignment. I strongly OPPOSE Red Option-A and the proposals to widen US 380 (the Green alignment option) converting US 380 to a limited access freeway. These costly options will negatively impact Empowerment and Historic zones along US 380 and will destroy over 200 existing and future businesses, thereby reducing sales and property taxes in McKinney as well as eliminating thousands of jobs initially, and potentially permanently, should businesses choose not to relocate in McKinney. Encouraging more traffic along the US 380 route with added lanes is also likely to decrease traffic safety on neighborhood streets arterial to Highway 380, increasing noise and pollution in our neighborhoods and reducing our property values. These long-term implications are in addition to our environmental concerns regarding pollution and waste from significant demolition of structures along 380 as well as new freeway construction should these either of these options be chosen.

To reiterate, I support either of the alternative bypass routes north of US 380 which enter the highway west of Custer Road: Red Option-B or Red Option-E. These are the best options to improve traffic flow in our corridor while also preserving and growing the economic and residential vibrancy of our community and city.

Hi, Mrs. Endres,

As a Stonebridge Ranch residence, I favor the Red option B plan for US380 bypass. This plan is least expensive and least disturbance to nearby residence and businesses. And as city of Prosper and Mckinney grows, more and more developments are occurring to the north of US380. Build a bypass to the north of US380 would benefit more in the long run.

Thanks for your time!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT: I support the green alignment for the 380 Highway expansion. I am a long time volunteer and supporter of Manegait Therapeutic Horsemanship. It is a wonderful place that does an amazing service for our community. A bypass of 380 is unnecessary and would destroy a beautiful area of our community.

Thank you for listening to the community's input.

I am extremely disappointed that TXDOT continues to propose bypass options when it has been made clear through previous surveys that ~~this~~ ^{ANY} Bypass is not wanted by the majority of residents. In particular residents like myself who live in Prosper. We purchased a home in Prosper after living 13 years in Stonebridge Ranch because we desired a small community that showed thoughtful planning. Now we are at risk of losing property value, tax revenue and safety for our children because of ~~poor~~ poor planning by certain land developers. As a Prosper resident, I vote NO to ANY bypass option. Keep 380 on 380 the way ~~it~~ ^{it} was originally planned.

Hello Mr. Endres,

My name is Amy Stanley. I am new to Texas, having moved to support Toyota's relocation to Plano. My address is [REDACTED]

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. My Toyota career has taken me from Southern California, to Ann Arbor, Michigan, to North Texas. What makes North Texas unique is the proximity of corporate headquarters to rural living. A bypass is unnecessary and would take a direction of over-development within community, limiting the rural character that blends with the urban conveniences.

GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. We are horse people and see great value in equine therapeutic programs for people with developmental and physical challenges. Since moving to the area, I have quite accidentally stumbled upon people whose children are clients of the ManeGait program. It is a tremendous asset to the community that very likely could not overcome the financial impact if relocation became necessary.

Since there are reasonable alternatives for the US 380 route, the community should consider each route's impact carefully. Based on the above, I believe the GREEN option is the most suitable.

Respectfully,
Amy Stanley

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Furthermore, I object to the bypass as a resident of Heatherwood. The difference between us and Stonebridge/Tucker Hill is that we DIDN'T buy homes next to a growing freeway. 380 was there before their homes and developments, and was projected to grow even back then. We bought our home with knowledge of plans to expand Wilmeth and Bloomfield into roads similar to Virginia. Those plans should be followed, along with a 380 expansion.

Hello. I am a resident of Prosper, Tx. My home address is [REDACTED]
[REDACTED]

I would like to provide my input into the US 380 expansion in the Prosper and McKinney area.

I strongly support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community, and have massive impact to the City of Prosper and many businesses. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you
Andrew Coetzee

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Sir,

As a resident of prosper for almost 10 years, I am opposed to any bypass solution being proposed. You need to keep Highway 380 ON Highway 380. Highway 380 through Prosper was just improved/widened. Should have been widened one more lane each side or another alternative would be to double deck it. If there is no choice but to have a by pass I suggest the bypass occur east of Custer Road.

Please note that I am not employed by TxDOT, nor do business with TxDOT, now would I benefit monetarily or otherwise from the project or any other item about which I am commenting.

Sincerely,

Andrew A Franco & Elizabeth A Franco

Subject: US 380 Improvements

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

My name is Angela Thiele. I am the homeowner's president in Creekview Landing, an acreage community situated off of FM 1827 in an unincorporated area of McKinney. I left you a voice message earlier, but thought I would also email you if it easier for you to get back to me via email.

I received the Notice of Public Meetings regarding the feasibility study for US 380, which I typically pass on to our residents in case they have not signed up individually to receive updates. My question is whether widening 1827 as part of the 380 improvements is still an option. If so, I would like to advise the residents of that because I think more of them would turn out for these meetings if they knew the answer to that question.

I would appreciate any advice you can give me on this question either via email or phone. Please feel free to call me at [REDACTED]

Thank you!

Angie Thiele

None of the options other expanding existing 380 is acceptable. It has the minimum amount of impact on local people. It is where all the business and the traffic should flow to help the businesses developed on 380.

If you don't do the Green Option then I say NO to 380.

This is a waste of Tax payer Money. Not enough traffic will use the by pass.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Subject: US-380 Comment Form--McKinney Area

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My husband's employer, Toyota, moved us to the North Dallas area almost four years ago. We drove through many different cities while looking for places to put down our roots--Celina, Prosper, McKinney, Denton, Little Elm, Frisco, Melissa, Plano, Lucas, Fairview, Allen, Plano, and Flower Mound. While driving, we as very experienced drivers of Southern California and the congestion exhibited in that state, commented several times how Texas is ill-prepared for what is coming very soon to these areas. TXDOT is at least ten year behind in several areas here in North Texas and US-380 is a major sore spot. Most importantly, TXDOT should have had jurisdiction and a say on any building projects that directly connects to US-380 especially since it is considered one level lower than an interstate highway.

As I've stated we have been here less than four years and the developing of properties off US-380 is out of control.

- Denton, with a by-pass already built because of their downtown congestion, was granted permission to build Ray Braswell High School on the corner of US-380 and Union Park Boulevard. This nightmare is just rearing its ugly head and will never get better. A combination of new 16-18 year-old brand new drivers, poor access, and lots of congestion is a recipe for disaster. I don't want to read about lives lost because of this poor planning but unfortunately I believe it is inevitable. Denton has solved one area of congestion yet caused more congestion east of their by-pass.
- McKinney has built much of its retail area at the intersection of US-380 and US-75. McKinney is continuing their retail spread at the intersections of Lake Forest and US-380 and Harding and US-380. McKinney has also developed neighborhoods such as Tucker Hill and Auburn Hills in the area of discussion. These new areas again were built with the knowledge that US-380 was under review for widening/re-aligning yet McKinney chose to build anyway.

Prosper has responsibly planned and implemented a fix for US-380 near congested areas such as DNT and Preston Road by building raised thru-ways and access roads to the local businesses. The town of Prosper has a smaller land footprint than McKinney and does not have the ability to create tax revenue as McKinney. By removing Lowes and other businesses in the center at Custer and US-380, TXDOT severely hampers the town of Prosper's right to prosper. Prosper should not have undeveloped land taken by another city as a "land grab" because Prosper is choosing to develop responsibly and purposefully. Had the homes, schools, and other businesses already been developed at this corner, these by-passes would not have even been an option.

It is irresponsible for the city of McKinney to force the problem McKinney created and not planned for growth onto any other city especially when McKinney has had the land to develop properly but has utterly failed. McKinney needs to solved their problem in their own backyard without affecting other adjoining cities.

TXDOT needs to be proactive not reactive in building roads especially in areas that are experiencing exponential growth--the fastest in the nation.

I would like to keep US-380 on US-380. If McKinney wants a by-pass then the by-pass should be entirely in the city limits of McKinney and have not adverse affect on neighboring cities.

NO ON RED BY-PASS OPTION B.

NO ON RED BY-PASS OPTION E.

YES ON GREEN OPTION.

A yes to red option A IF AND ONLY IF green option to keep US-380 on US-380 cannot be completed. Red option A keeps all McKinney's problems inside McKinney.

Regards,
Ann Radcliffe

Keep 380 on 380! It would seem to me that that would make the most sense. Before we moved to this area (we visited family) it was obvious that 380 is a main thoroughfare and that if widening and increased transport was necessary that it would occur on 380. The only bottle neck + transportation issues I've ever incurred has been on 380 Near Tucker Hill. You want a bypass? Do it there. None of the alternatives make sense.

Subject: proposed bypasses of route 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

NAME/ADDRESS: Anthony Burokas, [REDACTED]

COMMENT: I support the GREEN path east and west between Coit Road and FM 1827 for the expansion of US HWY 380. It is the most efficient path for east-west traffic through the cities of Frisco, McKinney and Prosper.

I even urge you to sink it like much of the DNT is sunk, helping to reduce road noise to surrounding communities. I live along 121 and the road noise actually wakes me up some mornings, as well as keeps me up Friday and Saturday nights. With the impending expansion of 121, it's only going to get worse. There are no walls to block the noise, and the highway extends up higher than surrounding structures which spreads the noise everywhere.

A bypass is unnecessary. 380 is already a wide thoroughfare. And, not being a toll road, it does not need the excessively wide "double highway" structure of the toll roads. So an expansion along the current route should suffice.

Keep 380 on 380. It is ridiculous to continue to present these "options" that appeases a small constituency when there is already a thoroughfare in place to be improved. Cutting through private land that was never in any city or town's Master Plan and the zoning changes that would likely result are not acceptable. Any homes or businesses that would be in the right of way of an improved 380 should not be considered. They knew where they were buying or establishing their business and should have done the research like the homebuyers and landowners of property away from 380. None of the Red options even the new one (E) resolve the existing concerns.

Subject: US 380 MAPO Comment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.** These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thanks,
Anthony Eggers

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.** These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A.** It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you,
Anthony Lackman

Anthony Williams – [REDACTED]

I am in favor of either the Green Alignment or the Red Alignment A because my wish is that the operations of ManeGait Therapeutic Horsemanship not be impacted. ManeGait helps many members of our community and it would be a shame if they had to discontinue operations or move away from our County. My wife and I are supporters of ManeGait and friends with a family who have a child that regularly rides at ManeGait.

Sincerely,
Anthony Williams

COMMENT: I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

As a Prosper resident, I have to drive on 380 when I go east or west. I've seen new housing developments and businesses being built along this road and traffic lights eventually have to be added for those risking their lives trying to cut across the "highway". I am not a fan of any loop plan, but would like to see 380 made into a limited access freeway. Prosper hasn't allowed much building along their section of 380. McKinney has quite a bit of business along their stretch and to turn the highway into something like 75 would be an undertaking. That said, I believe that would be what is best for the future. We avoid going east on 380 toward businesses in McKinney because of congestion and instead head south to Frisco.

I support Red Option B

- smooth transition
- minimum impact on business and home owners
- was undeveloped land - which reduces tax base of municipality west of center
- Non profit horse ranch has 10 years to relocate using TxDOT funds

Primary Concern - Safety and ease of access to Truck/Hill
 - Residential traffic flow rather than construction trucks

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380.

Red alignment A and E would directly impact Manegait, a physical therapy center for the disabled which require space and peace in order to ensure the safety of their riders.

Alignments running through Prosper are pretty unfair too. This dilemma is a result of McKinney's failure to plan, and should not punish the town of Prosper for McKinney's own negligence. Prosper has been very meticulous regarding its own infrastructure.

I work with a business owner whose property is located on the southwest corner of highway 75 & 380 (Lone Star Food Store Valero). This convenience store location is a key site for our company and employs 8 full time employees. Convenience store properties, located in high traffic areas are irreplaceable. We serve thousands of customers a week, with food and fuel needs. This location has assisted customers on their daily commute for decades. We as a company support the Red Option B alignment, as this option is the least disruptive to homes and businesses in the area.

Thank you

To Whom It May Concern:

Our family received a letter in regards to the proposed changes for 380. First I would like to plainly state that US 380 should stay in its initial footprint.

Our family built a home in the Heatherwood Neighborhood 7 years ago, to raise our family. If the path of 380 is moved north it would directly affect our neighborhood and the economy in the north area.

The lack of poor planning of future road info structure during this major housing boom should not be corrected at the expense of the citizens living in the north region where you want to relocate the road.

Please keep 380 in its original footprint.

Sincerely,
Ashley Malfitano

Fix 380 on 380! We moved to Whitley Place in Prosper, TX due to the small town feel. ~~We~~ picked our neighborhood to be away from any major/minor highway. We do not want a bypass through/by our house. We were intentional in our purchase and should not be penalized for TxDOT to appease a judge or Mayor Fuller who benefit financially. 380 has always been designed to be a limited access highway - No bypasses. A bypass does not even make sense. Lowering intential property value, misplacing homeowners, destroying wetland, and decreasing Prosper's tax income is simply unacceptable. 380 will need to be fixed, the noise pollution, vehicle pollution, and other environmental impact has already done its damage ~~on~~ 380. We do not want any highway causing pollutions moved our direction. The only

My name is Austin Anderson and my home is located on Bloomdale Rd/123 in McKinney, TX. The proposed 380 bypass would be less than 1000' from my primary residence and destroy the value of my home. Homes in Hentherswood are already feeling the impact of the proposed bypass and are losing value and sitting on the market. The construction and traffic associated with the bypass could also introduce structural damage to my home, further encumbering my wife and 6 month old son. Speaking to some of the reps tonight, they mentioned "the path of least resistance" being the preferred option. To me, the best option and path of "least resistance" is to build the Outer Loop. There isn't as much development where the Outer-Loop is proposed and it is only a few miles north of the currently proposed bypass. I also believe that the Outer Loop will make the 380 bypass obsolete and no one will use it. I appreciate your time and concern in this matter.

Dear Mr. Endres,

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. This is an important facility for many impaired children.

COMMENT: In short, I want to say, "what are you thinking?" when aligning the Coit Road to FM 1827 with anything other than the **Green Option** ! You will hear the arguments that it is the "*optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community.*" But the reality is that we have children who are not welcome in our society right now who benefit from a quiet serene environment. We are not talking about "units" or "miles" or "traffic patterns".. we are talking CHILDREN ! It is the GREEN alignment which preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. This program was built far away from the main thoroughfare and the "city" of McKinney many years ago. I understand the boom that has happened to bring the need for traffic control to this area, but when other options are on the table why would a caring family-friendly city purposefully aim to destroy this exceptional property and displacement of this vital community service.

I would like to join the hundreds of other ManeGait supporters to beg a serious look at the Green Option.... and NO OTHER !

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Mr.. Endres:

As a resident of Collin County and a Texas Realtor (license holder [REDACTED]), I am well aware the impact US 380 expansion will have on ALL in Collin County as the population increases at a very rapid rate.

(I note the 13% population increase recorded in the last census for Collin County versus just 7% for all of Texas. Also, I am informed by the Texas Association of Realtors (TAR) that approximately 350,000 make Texas their residency each year.)

Thus, I am very aware of the difficult decisions the Texas Department of Transportation will face in administrating the road development of US 380, in ALL DIRECTIONS, from Denton, TX to US 75, and actually beyond.

//////////

The Mane Gait Therapeutic Horseman facility provides a very positive impact on those having personal challenges which the majority of us do not face.

I have seen the positive influence it's efforts provide for ALL who support their mission.

I have been a donar and volunteer in Texas AND St. Louis County, MO.

//////////

I ask that you find a solution which will be as fair as possible to all as Texas & Texans advance through the first half of this century ... and beyond, as there are many issues of population redistribution which will occur.

Hi!

I am a Prosper resident and I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you!

Subject: TxDOT is about to get inundated with comment cards from the Stonebridge Ranch community.

Hi Stephen,

We are quite pleased with the “NO US 380 Bypass” (Red Shirts) turnout last Thursday evening. What you saw was a group of more than 150 ETJ, City of McKinney, and Town of Prosper residents expressing their opposition to TxDOT’s proposed U.S. Highway 380 RED bypass option. Residents that completed comment cards at Thursday’s meeting did not have their comments scripted or comments cut and pasted, nor were there proxies. These residents provided personal observations and concerns about how the proposed bypass will effect their lives. Some may have expressed concern about the process. ETJ residents may have expressed concerned that their voice is not being heard or considered. The comments may have a similar theme, but they represent a diversity of opinion.

You are about to get inundated with comment cards from the Stonebridge Ranch community.

The Stonebridge Ranch Community Association (SRCA) is mounting a campaign in favor of Red-Option-B or Red Option-E. SRCA is asking residents to submit comments before April 12. Here is the link to their website with their stated objective to: *“Preserve Our Way of Life.”*

<https://www.stonebridgeranch.com/txdot-traffic-corridor-proposals/>

The SRCA is proposing several alternatives for submitting comments.

- Add your name and address to the bottom of a pre-filled Comment Card. Here is the link: https://www.stonebridgeranch.com/wp-content/uploads/2019/04/US-380-MAPO-Comment-Form_Red-Option-B-or-Red-Option-E_040119.pdf
- Copy this comment (Here is the link: https://www.stonebridgeranch.com/wp-content/uploads/2019/04/US-380-Comment_Red-Option-B-or-Red-Option-E_040119.pdf) and paste in an email. Subject line will be “US 380 MAPO (Prosper) Comment Card.”

- Requesting residents to provide their name and address giving SRCA permission (proxy) to fill out and submit the comment card for them.
- Requesting people to stop by the SRCA office and complete a card in person and the SRCA will submit the card for them. Residents are also encouraged to leave their comment cards in SRCA's mail slot by the front door and the SRCA will forward the comment cards.

It does not surprise me that SRCA is requesting its residents to submit comments. However, the residents are not submitting their comments. They are being asked to submit comments prepared and approved by the SRCA Board of Directors. However, what is really surprising is SRCA's request for proxies. I do hope TxDOT recognizes the questionable methods SRCA is using to "obtain numbers" rather than valid comments.

Sadly, the process TxDOT and its consultant (Burns & McDonald) have chosen has created a lot of unnecessary animosity among McKinney residents, between McKinney residents and residents residing in McKinney's ETJ, and between McKinney and Prosper residents. Unfortunately for some, the animosity will likely remain for some time.

It is time to do what's right and select improving U.S. Highway 380's current GREEN alignment as a limited access highway.

Sincerely,

Ben Pruett

ADDRESS: [REDACTED]
CITY: [REDACTED]

U.S. Highway 380

U.S. Highway 380's GREEN alignment, and the U.S. Highway 380 proposed RED bypass alignment may be viable options for moving traffic through the City of McKinney. While both may be viable for moving traffic, what consideration is TxDOT giving to the comparative environmental and economic impacts?

Environmental Impact Baselines

Improving U.S. Highway 380 in its Current Alignment - GREEN Alignment

The environmental negative impacts associated with improving U.S. Highway 380 in its current footprint to a limited access highway are incremental. In other words, the highway and its existing use have established a baseline to assess the project's additional negative environmental impacts. Mitigation strategies can be developed to minimize the incremental negative environmental impacts. However, current environmental impacts can potentially be mitigated to levels below the established baseline, which should be scored as positive environmental impact.

Constructing U.S. Highway 380 Bypass - RED Alignment

The RED bypass option's baseline is established by the corridor's current environment. The proposed bypass introduces a myriad of transformative negative environmental impacts, including air quality and noise impacts, and additional impacts affecting the wetlands, wildlife, and possibly the North Texas's water supply itself. Gary Graham, Director of Engineering, stated in a McKinney city council study session (March 19, 2019) that even with mitigation "its not going to be as tranquil and peaceful as it is out there today." Homeowners and neighborhoods located along the bypass corridor will see their lives transformed. Families must live with the lasting deteriorating negative environmental impacts with the introduction of a limited access highway to their neighborhoods.

In Conclusion

Comparatively the proposed RED bypass alignment's negative environmental impacts are much greater than the GREEN alignment's. The proposed RED bypass alignment's impacts cannot be fully mitigated. Whereas, mitigation strategies for the GREEN alignment may have the positive effect of reducing the incremental environmental impacts below the baseline. How much consideration is TxDOT giving to the comparative environmental costs in selecting the preferred alignment?

Economic Impacts - Cost vs. Benefit

Improving U.S. Highway 380 in its Current Alignment - GREEN Alignment

Another significant issue is the cost-benefit of improving U.S. highway 380's current alignment to a limited access highway, including the economic impact imposed on commercial businesses. There is no argument that the costs to improve U.S. Highway 380 to a limited access highway will be significant. However, commercial business districts have a history of adjusting, redeveloping and thriving following similar projects. The

U.S. Highway 380

commercial corridor along U.S. Highway 380 will be a completely different economic model when improvements are completed in fifteen to twenty years.

The economic benefits for investing in the GREEN alignment are significant. The Perryman Group Study (2017), funded by Collin County Commissioners Court, estimates economic activity along U.S. Highway 380 will generate more than \$300 million annually for the City of McKinney and the McKinney Independent School district at maturity. Additionally, the study estimates the State of Texas will also receive more than \$900 million in tax revenues annually.

Constructing U.S. Highway 380 Bypass - RED Alignment

The costs to construct the proposed U.S. Highway 380 bypass are projected to be significant, but less than improving U.S. Highway 380 in its current alignment. However, the economic benefit will likely be significantly less than that projected for the GREEN alignment. Additionally, there is the economic cost imposed on residential properties and neighborhoods transformed by the project. Unlike commercial businesses, the economic value of adjacent residential properties and neighborhoods do not recover following the construction of a limited access highway (freeway). In fact, the economic and social costs are long-lasting.

The bypass also imposes an economic cost on the Town of Prosper with the seizing of commercial businesses and the loss of property and sales tax revenue. The loss in tax revenues are estimated to be over \$4 million annually. This does not include revenue losses from future development. The proposed bypass will not generate any economic benefit for the Town of Prosper or its taxpayers.

In Conclusion

The proposed RED bypass alignment has not proven to provide a significant economic cost benefit for the City of McKinney. The RED alignment imposes an unrecoverable economic penalty on the Town of Prosper. The economic cost benefits, offset by the economic penalty on Prosper, are not sufficient to justify selecting the proposed RED bypass alignment. *Is protection of McKinney's business and commercial sector more important in consideration of this project than the welfare of families and neighborhoods forced to live with the lasting deteriorating negative environmental impacts introduced by the proposed RED bypass alignment?*

TxDOT Survey Results

Two public input periods in 2018 returned over 14,000 responses. An apparent record for the department. In all cases, Collin County respondents in both surveys prefer that TxDOT update and modernize U.S. Highway 380 in its current location.

Just how much does TxDOT value the surveys and public comments they solicited?

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

First of all, thanks for your hard work. I had the pleasure of living in Denton County for years and have been beyond impressed with TxDOT's work on 35E. That being said,

I've had a question on my mind so here it goes: I'll begin by asking, why the strong avoidance of Tucker Hill? Financial motivation from developers or (two) former politicians from the county and Plano? The residents of Tucker Hill (and Stonebridge too, which makes no sense as their inner roads (Virginia, etc.) will be torched by traffic with a bypass) chose to be on a US Hwy, claim to be strongly against businesses at 75 and 380 being taken out, yet strongly oppose alignment Red A, which would avoid that... makes sense.... *sarcasm*

My name is Benjamin Watson. I live at [REDACTED], which is within the city limits of McKinney, in the proposed 850 home community of Willow Wood. The newest proposed red alignments A and B, will clip our neighborhood, and come within hundreds of feet of my home and hundreds of others. There is also poured concrete where new homes will be built that the bypass will actually go through. The utility easements and pluming has already been established. This is one of the main reasons why we selected to live where we do. Keep in mind, we are less than FIVE MINUTES from the future Outer Loop. There are many reasons why the bypass is not a desirable alignment. Those impacted by a bypass chose NOT to build or live next to a US HIGHWAY. I work off Custer and can't imagine the impact creating a bypass beginning at Custer will have. I realize and appreciate that US Highway 380 needs improvement and support an alignment that stays on the current footprint as planned in the master thoroughfare plans of McKinney, Prosper and Frisco. Keeping 380 in its current footprint has less substantial impact on families, lives, and children. If this was such a viable option (keep in mind we've known about Collin county growth for years and years) why wasn't this proposed prior to 2 years ago? Build out the arterials like in the 2040 plan.

Sincerely,
Benjamin Watson

Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

To: Stephen Endres
Subject: US 380 MAPO (Prosper) Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres:

We have been homeowners in Stonebridge Ranch and citizens of McKinney for more than 14 years. We want you to know that we **strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment options for US 380.**

We believe that these options are the least disruptive to businesses, existing homes and families living in our neighborhood and those along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

We OPPOSE the proposal to widen US 380 (the Green Alignment option) because this option will destroy existing homes and businesses along US 380—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of business sales and property taxes in McKinney and possibly eliminate jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets feeding onto Highway 380, increasing traffic, noise and air pollution in our neighborhoods, as drivers seek shortcuts to access a more robust US 380. This would endanger our children and grandchildren who regularly bike the streets of Stonebridge Ranch to get to school, use our parks and visit their friends.

We also strongly oppose Red Option-A. It requires a large interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. This, too, would decrease safety on our residential streets as more drivers seek shortcuts. Furthermore, both the Green Alignment and Red Option-A will depress home values in our area and decrease property-tax revenues needed for increased police and fire protection.

For the thousands of residents, like us living in Stonebridge Ranch, the **Red Option-B or Red Option-E** are the best options to improve traffic flow in our corridor while also preserving the economic and residential safety of our community.

Thank you for your kind attention to our concerns.

Sincerely,
Bill and Sharon Hockensmith

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I would like to register my support for the green alignment down 380. Both red alignments are properly colored as red means stop or danger. Those alignments are disruptive to economic activity to businesses along 380 and will wipe out one of Collin County's treasures, ManeGait. I know firsthand the value of ManeGait to the volunteers and the members of our communities with disabilities. Take is down the current 380 alignment and do the right thing.

Thanks for giving our objections thoughtful consideration.

Good morning Tony,

Your meeting sure drew a crowd last night. With all due respect I wanted to ask for some clarification. The new Alignment Red E shown last night was the same as the one your team presented to us at ManeGait on March 20th. Many many people came up to me last night indicating that the new alignment was being presented as one that saves ManeGait. Can you verify for me that it was being presented in that manner? I didn't go to a table to hear the presentation to know if that was the case.

I certainly hope that wasn't the case due to our response to you on March 20th and in my follow up letter of Monday March 25th. Both at the onsite meeting and in my letter I indicated the difference in Alignment B and E did not allow our organization to stay on that property. If there needs to be clarification in this regard I'm happy to be available.

Respectfully,

Bill Darling

AS A BUSINESS MAN AND OWNER OF A BUSINESS
LOCATED AT THE INTERSECTION OF US 380 & US 75 IN MCKINNEY, TX
(1815 N-CENTRAL EXPRESSWAY, MCKINNEY, TX 75070), I SUPPORT RED OPTION
"B" BYPASS ALIGNMENT OR "E" ARE ACCEPTABLE.

WIDENING US 380 AS PROPOSED WOULD PUT US
OUT OF BUSINESS IN MCKINNEY.

Bill Douglas

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I work with a business owner whose property is located on the southwest corner of highway 75 & 380 (Lone Star Food Store Valero). This convenience store location is a key site for our company and employs 8 full time employees. Convenience store properties, located at high traffic corners in McKinney, are irreplaceable. We service thousands of customers a week, with food and fuel needs. Although our company has owned this location for a couple of years, the location has assisted customers on their daily commute for decades.

Please see the statement below to understand what we are requesting for the proposed 380 expansion.

As a business owner in McKinney, TX., **I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.** These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. IF 380 CANT BE KEPT, ^{AND EXPANDED} IN ITS ORIGINAL ALIGNMENT, IT IS REALLY DIFFICULT TO UNDERSTAND THE DESIRABILITY OF EITHER OPTION "B" OR OPTION "E". NEITHER MAKES MUCH SENSE COMPARED TO RED OPTION "A". - ASSUMING YOU HAVE TO HAVE A BYPASS AT ALL COMPARED TO OPTION "A", BOTH "B" & "E" ARE MUCH LONGER & AFFECT MANY MORE RESIDENCES & IN THE CASE OF "E" SOME SIGNIFICANT TAX REVENUE PRODUCING (PROPERTY) [LOWES & REG.]

Comments Regarding US 380 Bypass Options MAPO Red B and Red E

Dear Stephen Endres, P.E. - TxDOT,

My name is Bill Terrell.

I live in WALNUT GROVE ESTATES at [REDACTED].

I strongly SUPPORT WIDENING 380 in its existing alignment.

I am strongly AGAINST ANY bypass options.

Bypass option Red B passes through Prosper's sovereign territory against the **STRONG** objections of the City of Prosper and the citizens of Prosper and it obliterates ManeGait Therapeutic Horsemanship charity center for children and adults with disabilities. Enough said!

Bypass option Red E also passes through Prosper's territory, again against Prosper's strong objections. It destroys several small new businesses and obliterates the giant new Lowe's store that was built to serve the neighborhood. Red E Option crosses Custer Rd to enter Walnut Grove and eliminates several families' long-time homes in its path, then continues on through several lots that families have bought to build homes on in the future. Red E's path will then continue right by ManeGait, touching the ManeGait's riding field, and subjecting the at-risk children and adults in therapy to significant truck and high-speed highway traffic noise and exhaust pollution. The Red E Option would then run directly over two more Walnut Grove family homes and continue to take a portion of the back yard of another home. And, the entire remaining population of West and North-West Walnut Grove would be subjected to all of the highway noise and exhaust fume pollutions from the Red E bypass.

You may not consider us a tightly-knit neighborhood because we are separated from each other by woods, creeks, beautiful rolling hills, and mature trees. But I assure you, we truly are a closely knit community. We all know each other and watch out for and take care of each other. Early on in the 380 planning stages, the Walnut Grove community was lead to believe by TxDOT personnel that TxDOT would not violate and obliterate existing neighborhoods, except as an absolute last resort - and a bypass is hardly a last, or even a reasonable, resort. Yet, here we are, trying to preserve our neighborhood from incursion and destruction

by a major US Highway and literally having to fight to save our homes and our highly prized, long-time quality of life.

All bypasses, Red A, Red B, and Red E ultimately disrupt families and follow Bloomdale Road where there are many subdivisions that would likewise be negatively affected. Many homes and properties would be directly impacted and even more would suffer quality of life issues, decline in property values, noise and fume pollution, etc. To force a new, unwelcome major highway through Walnut Grove, a long-established neighborhood of over 50 years, existent long before Stonebridge, Eldorado, Tucker Hill, etc, seems unconscionable. My family and I have lived here since we built our house here in the woods in 1978. The Red E option goes within feet of my property line, the smell and sound of which, if I were sitting on my deck drinking my morning coffee, would daily evoke very unpleasant thoughts about politicians and state public servants.

Highway 380 already has an existing, large footprint with most of the needed right-of-way for future expansion already in place. Why not utilize it and just expand existing 380 instead of re-inventing the wheel, thus saving the tax-payers from spending a gazillion dollars for a bypass to nowhere.

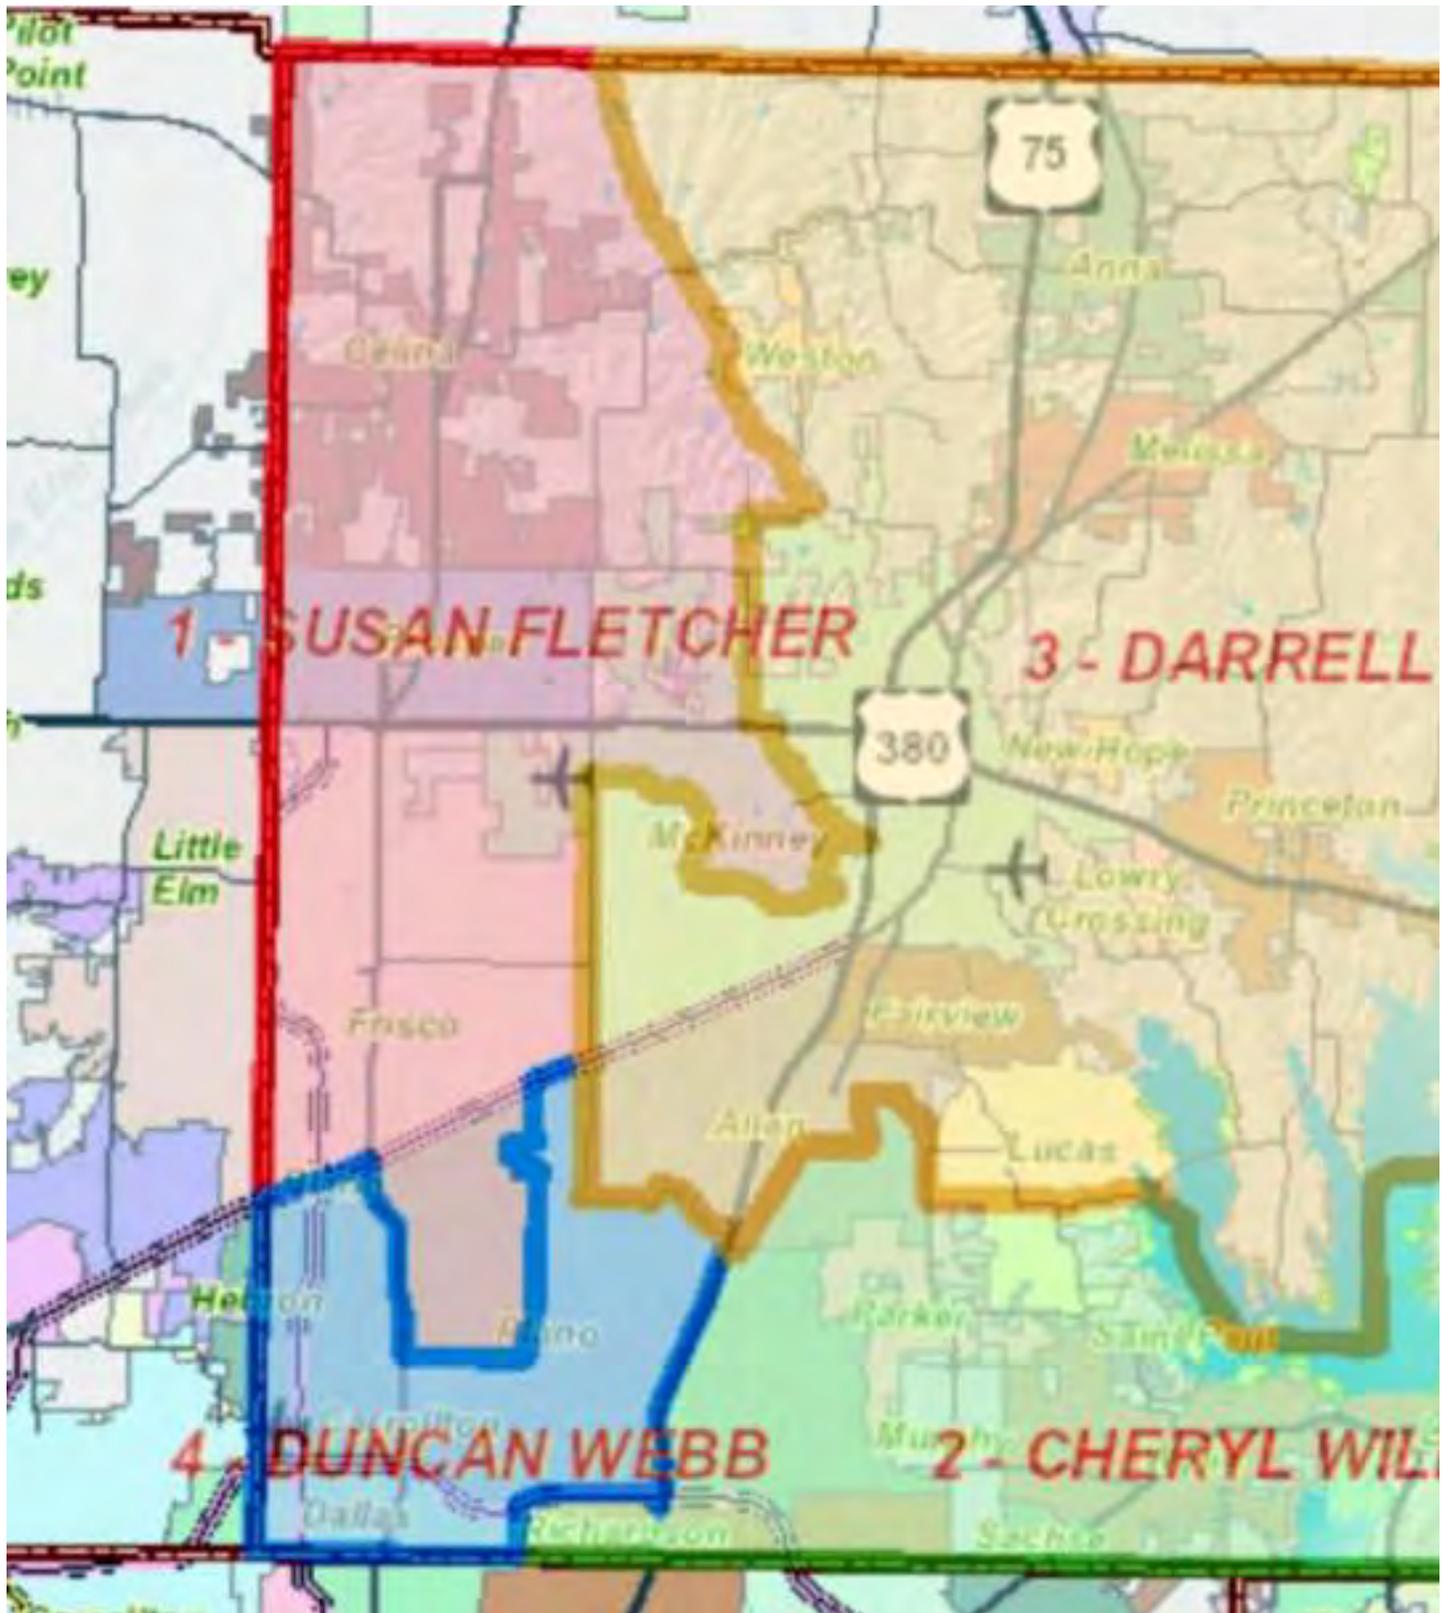

We, as a group, consisting of Walnut Grove and the other affected Northwest McKinney sector subdivisions, have been supporting expansion and enhancement of Highway 380 and have been actively opposing ANY bypass for over 2 years. Two of our Collin County Commissioners (the ONLY commissioners who represent constituents directly affected by 380 options) have come out very publicly and have been very outspoken FOR WIDENING 380 and keeping it in its existing alignment. It's also interesting to note that these two commissioners, Susan Fletcher (District 1) and Darrell Hale (District 3) represent the ONLY two districts which totally engulf and surround the Entire 380 corridor. (Please see the attached District Map of Collin County Commissioners.) Since they both live in those districts, and represent both of those districts and the residents and the highways within those districts, they are very familiar with the critical situation and the dire impacts to and direct negative effects on their constituents of an unwarranted bypass.

Our two involved County Commissioners have expressed, as do we and all of our Walnut Grove and Bloomdale Road and Prosper neighbors, and even several of the McKinney City Council members, that the best choice for all of the people of Collin County, both 380 users and tax payers, and Prosper city is to WIDEN EXISTING 380. Surely this all must carry at least SOME weight with TXDOT.

I know that this has been somewhat wordy, but I appreciate you struggling through to the bitter end.

Thank you,

Bill Terrell

COMMENT:

I support the green alignment on Hwy 380 expansion. My grandson with cerebral palsy rode there from 6 to 18 years of age. This has been the highlight of his, and many other kids with special needs lives. Please don't take this wonderful place from present and future riders. There is very few places that they can go that improves there emotional as well as physical lives.

Thank you

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Hello,

This is Blake Goodwin at [REDACTED]. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship which I volunteer at. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services, not to mention the issues which arise from putting a major road next to a horse facility. Not to mention, the noise and distraction to the riders.

Thanks,
Blake Goodwin

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Hi Mr. Endres,

My name is Brandi Perry and I live at [REDACTED] I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper.

A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship.

Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you,
Brandi

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

380 should be fixed "on 380". No bypass options should be approved. A 380 bypass would negatively affect McKinney and Prosper and ruin ~~the~~ what makes it "unique by nature". Additionally a bypass would impact Mountain Therapeutic Horseback riding where my son and hundreds of others receive/have received services. In addition, everyone has a choice in where they live - as a former McKinney resident who lived ~1 block from 380 I know that I moved there knowing about the traffic & potential for future building, I also chose to move away from 380 for a more peaceful rural life as my children grew older. A 380 bypass should NOT be approved and NOT be an option.

I feel it should stay on 380. The majority of traffic on 380 now will continue to use 380 due to the growth of businesses along 380.

It is still too close to Mame East when you consider you are working with disadvantaged adults & children that may be upset by the noise.

If someone is still pushing this bypass then let it be through McKinney only and use Opt. A. Stay out of other people's towns & tax bases that have been following their growth plan.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper and fits with the 2040 comprehensive plan voted and approved by McKinney.

A bypass is unnecessary and would scar the beauty of our community and cause my property value to plummet as the bypass is set to go mere feet from my home and where my children play.

GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Hello Mr Endres,

I would like to comment regarding my support for the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380.

In my opinion it is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. As a resident that owns a home in this area, does business in this area and recreates as well, the other options are far more intrusive in this great community of communities.

Please support the GREEN alignment.

Thank you,

Brian D. Audia

Hello,

My name is Brian Woodward, I am a McKinney business owner operating out of [REDACTED] and would like to voice my support for the GREEN alignment between Coit Rd and FM 1827 for the expansion of US HWY 380 as it appears the most optimal and efficient path for all traffic. Any bypass would be a nightmare and lead to more traffic, congestion, and confusion through our city.

I very much oppose all other alignments, but vehemently oppose Red Alignment E and B due to the direct impact it would have on ManeGait Therapeutic Horsemanship.

Best Regards,

Brian Woodward

I fear that the output of the TADOT process for determining the final solution will NOT be consistent with the goals. The key to getting a consistent, reliable output for any process is process discipline and the required time to evaluate any process changes that occur along the way. TADOT, in my opinion, has allowed too much variation in their process (new alternatives, options) without allowing sufficient input and evaluation of these "mid-process" changes. As a "customer" of the output, I have lost faith in the process to give the best output for all customers; rather it has been compromised by "squeaky wheels" and "unvetted" changes.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Enders,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you for your consideration,

J Bruce Duty

My name is Karen Wilson and I live at 333 Rhea Mills Circle in Prosper, TX. I am strongly opposed to all bypass options to 380. All the bypass options will negatively impact the neighborhoods and "coventry" living in Prosper. I have lived in Prosper for 19 years, moving from Dallas (one block off of LBJ Hwy). I took in consideration the growth of the area when choosing my home. Living close to a bypass was not even a consideration. I realize that US Hwy 380 needs improvement and believe that will best serve the communities of Frisco, McKinney, and Prosper by making those improvements ON US Hwy 380.

Good afternoon Mr. Endres,

I would like to express my personal opinion on the US 380 by-pass, which has cause quite a stir in Prosper & McKinney. I will only support the **GREEN** alignment or **Option A By-Pass**. Both of these options will have very little impact on existing business, home owners and Town of Prosper. Why should Prosper give up over 80+ acres for a City of McKinney problem?

I am also a volunteer at Mane Gait and previously I volunteer for over 10 years at Equest, another Therapeutic Horseback riding center. I personally seen the impact that Horses have on Veterans, Veterans family suffering from PTSD and individuals with disabilities. As one rider stated "no one knows that I have a disability when I am riding a horse"

It appears that TXDOT is siding Jack Harvard, McKinney and playing politics vs what is morally, ethically and cost efficient, by picking the **Green Alignment or Option A...** Secondly I don't appreciate one of Jack Harvard's employees calling me a "flat earthers"

Sincerely,

Carol Bloxsom

we live along Bloomdale Road & the Bypass would go behind our property & disrupt the (our) neighborhood. there is talk of an outer loop so why is this ~~never~~ ever necessary?

75 in Dallas was improved with existing business why can't the same be done to 380?

Also when it cuts back into McKinney/Pronger makes no sense when the traffic increases between Custer & the Toll Road. If anything it should be ~~connected~~ connected to Preston 289 on the Toll Road! Keep 380 on 380!

As a Prosper Resident who Retired here to enjoy the peaceful, slow pace of the town, we are disgusted that TxDOT is considering ~~plan~~ town to alleviate the ~~problem~~ problem. We oppose Del B+E plans! If Custer / 380 intersection is impacted, Prosper will lose a major TAX provider in Lowes and surrounding businesses. We pay exhorbitant taxes now and cannot afford to increase the amount.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I appreciate all the "studies" but I am very disappointed that TX Dot has once again decided to affect Prosper and Non Profits by running a by-pass on Custer. TX Dot has decided to play the political game and as a resident of Prosper and a volunteer at Mane Gait, I am deeply disappointed in your feasibility studies and continuing pushing the by pass onto Custer vs Stonebridge or Ridge Rd.

It is not the Town of Prosper nor Prosper residents fault, that the City of McKinney planners didn't not plan for their growth. Yet TX DOT is putting the majority of the 380 By-Pass headaches and congestion on the Town of Prosper. The only people that are going to get rich off this feud will be attorneys.

Sincerely,

Carol Little

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

We are homeowners and citizens of McKinney, TX., We **strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options**. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. We **also strongly oppose Red Option-A**. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

An additional reason is why destroy a good road (380) to replace it with a bigger one. 380 is so slow now, a major improvement as suggested will affect traffic even more dramatically traveling between Custer and 75.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Sincerely,

Carolyn Denise McMillan & William McMillan

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I don't understand why it is even being considered. The cost would be a lot more to clear the areas for the red alignments instead of just expanding where 380 already is! Use the money saved for other road repairs that are needed!!

Mr Endres,

I am writing to share that I am in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper and is the original plan that should not be deviated from. A bypass is unnecessary and would scar the beauty of our community and impact many families, properties and the property values negatively. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services to many children and families in North Texas.

Thank you,
Carrie Long

COMMENT:

Dear Stephen,

Please accept my support of the Green Alignment of 380 so that we don't impact the magic of ManeGait. I have been a special educator since 1981 and currently work as an educational diagnostician. Through my career, I've been involved with providing the most effective services for our special education population academically, socially, behaviorally, and motorically. I've worked with numerous Occupational and Physical Therapists and have seen trendy therapies come and go. The equestrian therapy provided at ManeGait is the real deal. I have worked as a volunteer at ManeGait since 2012 and feel that the time I spend there is 100% my happy place because I have seen this positively effect the development of all kids involved. For all of the Aylas, Graces, Hannahs, Ethans, Traces, Hazmas, Cammy's, Logans, and Michaelas, of the world, please support the Green Alignment to enhance the development of these our most needy and deserving citizens.

Red - Bypass option B

A line in Walnut Grove and will be in the area taken for the green route. Where will the traffic be while building this road. ON 380!

A Bypass is so much smarter. Option B is the best Route

I'm Affected By This Project.

Please check the comments for the people who are sending more than one vote!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT:

Dear Mr. Endres,

My 6.5 acre horse property is right in the cross-hairs of the red alignment of the proposed US 380 bypass. This unnecessary loop will destroy wetlands, wild animal habitat and horse sanctuary property like mine. It will cause major disruption, financial hardship and mental anguish in my life.

All of the surveys that have been completed heavily favor fixing US 380 on US 380. The people have spoken and a solution like widening and/or creating a double deck like 635/LBJ in Dallas or US 183 in Austin, just makes more sense for the property owners and business owners on US 380.

At this point, the only explanation for ignoring your own surveys and defying the will of the property owners, business owners and residents of McKinney can only be explained by corruption in the heavily conflicted McKinney City Council. I believe there should be an investigation into real estate interests both directly and indirectly held by the members of the council.

For the sake of the wetlands, natural habitat, private property, Erwin Park, MainGait and other unique parts of this wonderful part of Collin County Texas..... I ask you to save our strong horse culture and do the right thing. Abandon your plans for a US 380 bypass. Thank you for your time.

Best,

Charles Patmore

If even conservative population estimates of Collin County come true, the highway infrastructure will fall far short of what's necessary. Dallas County has five East/West highways (including PGBT) all with 4+ lanes in each direction. Even if the current 380 and a bypass are built, along with the future outer Loop, Collin will still be behind. I believe that not only should a bypass be built, but that ROW along the current 380 should be reserved so that in the not so distant future it can be converted to a limited access freeway. I realize that both plans have critics on both sides but that an honest discussion needs to happen about future gridlock. That way at least ten years down the road people who move in will know what's planned.

To: Stephen Endres
Subject: S 380 MAPO 3/28/19 Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper.

A bypass is unnecessary and would scar the beauty of our community.

The **GREEN** alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I look forward to having 380 continue on 380 and see no reason for any other route.

Thank you,
Cheri

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

We purchased our home in Whitley Place due to its distance AWAY from Highways, Tollways and Interstates. It does not make sense for A major highway bypass to now be moved much closer to our home. There was A major highway (380) as close as we ever thought it could be, and this bypass will hurt my property value when I purchased away from the highway on Purpose.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

COMMENT: *I understand the need to expand HWY 380 due to the increased traffic. **After reviewing the options I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380.** It would address much of the current traffic problems and looks to be an efficient path for east-west traffic through the cities of McKinney and Prosper. I think a bypass is unnecessary and would adversely affect many established facilities. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. I feel this nonprofit provides a much needed service to the community and it would be destroyed with a bypass. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.*

I hope you will go with the GREEN alignment.

Sincerely,

Christine Churchill

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Stephen,

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Dear Stephen, my husband and I have lived at [REDACTED] for the past 35 years. We have enjoyed the peace and tranquility living in the country until **NOW**. With the widening of Custer Road, eminent domain; Atmos gas lines running and survey stakes throughout our property, proposed water line and now the 380 Bypass – our life has been turned upside down. We understand growth but believe that the City fathers lacked foresight in the future growth of the City at our expense. The Red Alignment E and B will be a major blow to us and have us “living under bridge”.

"I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. COMMENT:

Dear Mr. Endres,

I fully support the GREEN option to 380 expansion as the ONLY option that makes sense on every level.

1. Financially - At the recent TxDot meeting presenting the new bypass option to the community of Prosper, a chart was displayed showing the financial benefit of a bypass and the business/residential impact of each option. Bypasses were presented as having a much lower impact on most levels. I feel that this chart is a misrepresentation of the whole picture.

Assuming a Bypass was chosen and developed, the current 380 is STILL going to need major improvements to help with traffic flow as the communities grow. Why not just develop 380 along its current pathway (the GREEN option) and do it right? Most of our citizens that use 380 at peak traffic hours are commuting to and from southern destinations. These commuters will not be using a northern Bypass to access 75 and will not be using a northern Bypass on their return home. The cost of improving 380 along its current alignment needs to be added into any cost of Bypass to represent the entire picture.

You might argue that as the communities in the North develop they will be using the Bypass. True, but there is also the Collin County Outer Loop that is under current development for this problem.

Again, a Bypass IS NOT cost effective compared to the preferred option of a vast majority of citizens, which is the GREEN Route. Whether intended to or not, please do not misrepresent that a Bypass will alleviate all the congestion problems along 380 and save everyone money. This just is not true.

2. The GREEN option adheres to the MAJORITY opinion by citizens in EVERY city along 380. Why is a Bypass still being pushed upon everyone? It seems TxDot is trying very hard to sell everyone on a Bypass as if a Bypass is the only real option and the decision is already made. How about listening to the surveys TxDot itself requested from the citizens? You already know what we prefer, by a large majority. Stop coming up with alternatives. I have to assume either a decision is already made or there is intense political pressure being utilized to save a minority opinion of citizens and businesses.

3. Environmental - A Bypass will destroy native wetlands and the beautiful landscape we all enjoy. And again, 380 will still have to be improved along its current alignment. Therefore a Bypass will only add to the negative environmental impact.

I STRONGLY URGE you and the other members of TxDot to listen to the citizens of our towns and municipalities along 380. Hear what we, the majority, are saying. DO NOT succumb to the political pressure no doubt being applied. Do what is right for the majority of citizens that are blessed to call this part of the state home. KEEP 380 ON 380 as it was intended. And if this is not a realistic possibility, please quit giving us hope that we have a say in what goes on. I am tired of being asked the same question over and over, only to find out I am in concert with a large majority, and then hearing another Bypass is being looked at.

Please do not push the poor planning of Mckinney and the problems of their community into a Bypass that will negatively effect numerous other communities who have planned correctly and according to the intended future plans of 380. KEEP 380 ON 380. IMPLEMENT THE GREEN OPTION.

I sincerely thank you for your time and consideration.

Warm Regards,

Clint Moss

Good Morning;

My name is Colleen Lynn and I live at [REDACTED]

I wanted to write you to let you know that I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your time and consideration.

Regards,
Colleen Lynn

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I grew up in Collin County and have been a long-time volunteer of Manegait, so I think it is of utmost importance to preserve their current presence. I plan to soon move back to Collin County and would be hesitant to do so under an alternate alignment.

① MCKINNEY'S APPROVED 2035 PLAN HAD A BYPASS OPTION IN THE APPENDIX THAT DID NOT IMPACT PROSPER - WHAT CHANGED?

② MCKINNEY'S LACK OF FORESIGHT & PLANNING ROW ON 380 SHOULD NOT CREATE A PROBLEM FOR PROSPER

③ OPTION E GOING THROUGH LOWE'S DESTROYS A HUGE TAX BASE FOR THE TOWN OF PROSPER

④ THE STATED PURPOSE OF THE COLLIN COUNTY OUTER LOOP WAS TO RELIEVE TRAFFIC ON 380 & 78. TWIN LOOPS/BYPASS OPTIONS ARE REDUNDANT AND NEITHER ROAD WILL BE OPTIMIZED

⑤ IT APPEARS THAT MCKINNEY UNILATERALLY DECIDED TO RECOMMEND A BYPASS THAT IMPOSES ON PROSPER

⑥ MCKINNEY SHOULD BE REQUIRED TO EXPAND ALL NORTH/SOUTH & EAST/WEST ARTERIALS BEFORE A BYPASS SHOULD BE CONSIDERED - BOTH NORTH & SOUTH OF 380

NAME/ ADDRESS: Craig Wenning, [REDACTED]

COMMENT: The GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380 makes the most sense. It is the natural path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. The GREEN alignment also preserves one of Collin County's most effective nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this amazing property and displacement of their vital community services. Please make the prudent decision here and choose the GREEN alignment. Thanks!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Red option A would seem to be the least impactful as far as residential communities. Red option B+E should NOT be chosen as these would have a greater effect upon the residents of McKinney on the East side of Custer + the noise that it would bring to the residents of Whitley Place.

The best option would be to keep 380 on 380 + expand it. I feel that any of the proposed routes would probably not be used. Few drivers are going to want to go that far North.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

My wife and I bought our house on Grace Cove directly adjacent to Bloomdale 18 months ago with the knowledge that Bloomdale would be a "Custer-Like" thoroughfare and not a 75 mph highway. We put out life's savings into our house as first-time homebuyers and will now lose property value and equity from the sudden change. Please do not affect homeowners to spare businesses and affluent special interests. Stick to the plan to widen 380 on 380 and build out arterial thoroughfares on Bloomdale and other two lane roads. 380 will not be fixed just from a bypass. Too many red lights and too short turn lanes will remain. Only pass through traffic would re-route.

Stephen,

My name is Daneé Diaz. I live at [REDACTED].

As a Realtor and a citizen of the Town of Prosper, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Oh, by the way™... if you know of someone who is thinking of buying or selling a home, please send us their name and number and we will be happy to follow up and take care of them for you.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

To Whom it may concern,

As a McKinney citizen/ homeowner, I strongly support either Option B or E bypass. These options are least expensive and least disruptive. They are the BEST options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. Thank you for your consideration.

Sincerely,

Darlene and Steve Simmons

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

My name is David Cox, I live with my wife and 2 boys age 6 and 9 at [REDACTED] in Walnut Grove. The bypass options B and E would ruin my neighborhood, and have a very huge negative impact on my family and neighbors. The bypass option A is the most ~~for~~ desirable; less impact to homes, less impact to businesses, and less of ~~the~~ noise & air pollution to neighborhoods. Keep 380 on 380.

I appreciate the effort by TxDOT to consider public input in developing a new RED E alignment. Protecting Manegait, reducing future development costs, and lowering environmental impacts are all benefits of this alignment. However, RED B continues to be my first choice in terms of reduced cost to taxpayers and smaller impact to residences and businesses overall. The GREEN alignment and RED A are not acceptable based on cost and impact. On a personal note, these would devalue my house and neighborhood. We bought where we did because we loved the area; also, we ^(my wife and I) were told that future 380 development would head up Custer Road. We support either RED E or RED B.

Dear Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. Among the build options, both Red Option B and Red Option E minimize the disruption to existing homes and businesses, and they are the least costly.

I strongly OPPOSE the alternative build options, Red Option-A or widening the existing highway. Both of these options would be very damaging not only to existing homes and businesses in the direct vicinity but also to thousands of homes impacted along highway 380 arterials.

Thank you,

David Montgomery

I support the business that have invested in McKinney along 380 and employ our citizens. Therefore I do not support green route

I do not support Red A because anyone wanting to go south after exiting by pass will have to use Ridge, Stonebridge or Custer

I do favor both Red B & E. Between the two my preference is E because it minimizes impact on Prosper developed and undeveloped land.

Dear Mr. Endres,

My family and I have lived in McKinney for more than 20 years and while we enjoy all of the additions and improvements to our community since we moved here, we want to be certain that future developments don't hinder current operations.

As such, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the best and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would negatively impact the beauty of our community. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have a direct impact on ManeGait, leading to the destruction of this exceptional property and displacement of their vital community services.

My daughter is one of the riders at ManeGait and has been greatly impacted by the therapy they have been able to provide to her. We have seen vast improvements in her physical and mental abilities at school and with her peers and can attribute this directly to the services that ManeGait has been able to offer.

Thanks for your consideration,

David Paul

Please keep 380 on 380, at least on the west end. There is not an economic benefit to any of the proposed improvements vs. keeping it on 380. The businesses will adapt to the change.

There is a huge environmental cost to ~~making~~ the improvements vs. keeping the work on 380.

Keeping the green alignment and rejecting the red alignments helps McKinney and prosper economically and environmentally.

Subject: Against Bypass / For Widening
Attachments: US-380-MAPO-Comment-Form.pdf

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Attached is my comment card response related to the 380 issue.

As a homeowner and citizen of McKinney, TX, I am strongly AGAINST any bypass that impedes upon or is in close proximity to the Walnut Grove neighborhood near 380 / Custer Road. Any bypass is a highly inefficient and inappropriate method for improving traffic flow and capacity, due both to additional distance required to travel across McKinney, the resulting air and noise pollution, adding more unsightly highways to the area, cost of constructing the new road and the horrible disruption to residents and businesses. There is more than adequate room to add a lane to the existing 380 corridor with minimal disruption while maintaining the intended flow of traffic and isolation of noise to the intended area. I am STRONGLY FOR WIDENING 380.

Thank you,
David Soltysik

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

What an incredible waste of our taxdollars!
Why can't you just improve 380 as is?

1. *Dear Stephen,*

My name is Dawn and I have been a volunteer at Manegait. Please use wisdom and do not displace this therapeutic horse ranch. You do not know the level of stress the parents and these children go through. It is a well orchestrated machine the way it operates now and the beautiful setting it has. You would displace and disrupt the lives of some very fragile people if 380 expansion were to encroach their property.

2. *I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."*

Keep 380 on 380! The proposed "red routes" will negatively affect homeowner quality of life, endanger wildlife habitats, increase air, noise and light pollution, and more. Our Childrens quality of life will be adversely affected. Keeping 380 on 380 might impact businesses along there temporarily, but they will re-creep those losses after construction is completed. Homeowners and natural habitats will lose out 100%.

Prosper is being bullied by Judge Self and Mayor Fuller and that TxDOT is allowing that is unacceptable. We already have an Outer loop being built, so the 380 Bypass is a gross mis-use of taxpayer dollars. Collin County EDC's have been planning for growth for decades, and should have planned the infrastructure accordingly. Keep 380 on 380! If you bought or

Deborah Cahoon, [REDACTED]

Dear Mr. Endres,

As a loyal member of the MainGait Therapeutic Riding Center, I am emailing you in regard to the TxDot 380 proposed expansion alternatives.

I respectfully request you fully support the GREEN Alignment and oppose the Red Alignments B & E as these will have a serious impact on a terrific program. Supporting the Red Alignments B & E would affect the many children and adults with disabilities, not to mention the veterans and first responders, that have made serious gains with the programs offered by Mane Gait.

Both Red Alignment B and E would have a direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I appreciate your time, consideration and hopefully TxDot's support in not destroying a beautiful and important therapy center.

Deborah Cahoon

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A.** It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT:although I know that expansion is inevitable. I moved to prosper for the small town charm. I didn't move here for the area to turn into Frisco or PLANO. I do not support any expansion deal that takes away any of the charm that we still have with the the expanse we currently have and the unfortunate infiltration of Walmart and other undesirable businesses like chili's, Olive Garden and Texas road house. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

I vote GREEN and nothing else.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

Please be advised that option E as presented at the public hearing will still impact the Manegait Horse facility. I am the son of a veterinarian and spent many years assisting my father at all kinds of horse facilities. Simply moving a freeway to the edge of the property will not mitigate impacts and will cause the facility to cease to exist at this location due to the nature of the operation and equine behavior characteristics. This option would also subject TEXDOT to many unfavorable issues to come. I submit this with many years of experience and expertise. Thank you for your time.

Sincerely,

Dennis J. DeMattei

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

The proposed red alignment B or E will dump a significant amount of traffic onto Prosper trail and First street in Prosper. Anyone wanting to head north and west will exit the bypass and go onto these two streets instead of going all the way back down to 380. Propser's plan does not have either of these streets scheduled to be major arteries. This is not acceptable.

COMMENT: Please keep 380 on 380! Prosper should not have to pay for McKinney's zoning mistakes. If McKinney wants a bypass, they need to keep it in their city. That said, everyone (including people in McKinney) thought they knew where the highways and major streets would be when they bought their properties—including us. It seems very unfair to mess up everyone's property values because McKinney just now figured out that they let businesses build too close to the highway! No matter what is decided, many people will be hurt financially, but if we keep 380 on 380, at least it was somewhat expected. My next choice would be option A—keep this problem in McKinney where it belongs!

As a business owner of the property located at 1815 N. Central Expressway (Valero), I strongly support Red Option B or Red Option E - bypass alignment option. These are the least expensive alternatives + least damaging to businesses affected. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These would destroy 200+ homes and businesses + cost thousands of jobs if those affected did not relocate in McKinney. Adding more lanes to US 380 would not help property taxes, noise, pollution or safety. Red Option B or Red Option E are the best options to improve traffic flow in our corridor while preserving our economics and > \$1 Million investment.

Subject: Against all Bypass options going through Prosper

I have been involved with all of the meetings on the 380 expansion, including the Spring 2018 TXDoT 380 Meeting in Prosper and the 7/24/18 Prosper Town Council Meeting where Stephen Endres gave a presentation on the 380 bypass where he stated that TXDoT rarely, if ever, goes against the wishes of a Town. In that meeting, the citizens came away with the understanding that since both the Town of Prosper and the City of Frisco wanted 380 to be a limited access freeway west of Custer that TXDoT would honor that. So I was very angered and concerned when the Fall 2018 TXDoT Survey options included a red alignment option B for a bypass cutting through Prosper, which before that was never even on the table, due to the pressure of an elected official that lived in Tucker Hill. The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion.

I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDoT should do bypass option A that originates in McKinney.

I hope TXDoT does not bow to special interests again and honors the **VAST MAJORITY** of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.

Thank you for your time and attention on this matter. I hope to hear that TXDoT is moving forward with the overwhelmingly supported green option of fixing 380 on 380 when it presents its final alignment option for 380 this Spring.

Sincerely,
Dianne Brown
Prosper Christie Farms Residential Association Board Member

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Mr. Endres,

Just a note to let you know that we support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It seems to be the optimal and most effective path for east-west traffic through the cities of McKinney and Prosper. A bypass seems unnecessary and would certainly damage the beauty of our community.

The GREEN alignment would also preserve one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignments E and B would have direct impact on ManeGait and damage or destroy this exceptional property. It would also severely impact the many local citizens who depend on the services provided by this great organization.

We appreciate your consideration of our views on this issue.

Sincerely,
Donald and Linda Alexander

To take away any land in a small-area town like Prosper would reduce the area available for development, thereby limiting the growth of the potential tax base. The fiscal harm to the town and its residents has apparently not been factored into any of TxDOT's deliberations. Such harm would be ongoing and not be able to be offset from other sources.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your time and service!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you for reading and considering that the proposed bypass options for any other than the GREEN ALIGNMENT would shut down a most prominent and life changing non-profit organization in the McKinney/Prosper area. I'm sure you have heard of the impact on the riders, the community, and the many volunteer and family members who care so much and and are impacted so powerfully by this very special place.

With that in mind, I support the Green Alignment and "vote" against the Red Alignment B or E.

Thank you very much for keeping ManeGait at the Center of all that is good for a strong, healthy, vibrant community.

Drew Allen

Hi Stephen,

I have noticed that there's a red alignment for the proposed 380 change and I'm 100% against it. I'm currently building my, what I hope to be, forever home for my family in the Willow Wood community.

Green alignment is the best option long term for not only my community but other communities in the area.

Thanks,

Dustin Tong

I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would ruin the beauty of our community and force ManeGait Therapeutic Horsemanship to close.

Thank you for taking this into account.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Strongly advocating for this.

Emily Johnson

TX DOT - We chose North Texas as the region we planned to live for decades. We've been here since 2005 and have actively served in government and community programs for 15 years. We support keeping 380 ON 380 - AS WAS PLANNED, forecasted, and projected for decades⁺

Any other option is illogical and unfair to the VAST MAJORITY of homeowners, residents and business owners in the affected communities - We have worked HARD to bring businesses to Prosper, community groups and NPOs like ~~Waco~~ Gait, and thriving neighborhoods. #Keep 380 on 380⁺

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Additionally, traffic routed off 75 will not traverse north additional mileage to go west/west through the McKinney corridor but continuing to use the existing route. If this was true, then the Collin County outer loop project should be the route then to be followed. This project has been planned and has the land allocated to it now and would not have the current planned disruption that a bypass of HWY 380 would cause

We live near Stonebridge Drive and Hwy 380. I believe Red Option B is the best alternative but Red Option E would be an acceptable alternative. Both are cheaper and less disruptive to the businesses and residence along Hwy 380 than other plans presented.

Thanks

If we had known, three years ago, when we built our dream home, and finally settled into our unique by nature, McKinney that we would possible and most likely have to uproot ourselves, we would never have lived in McKinney. It took us twenty six years to be able to afford + move here from Maryland. I honestly do not know, where we are going to go. We are at a loss. We will never find a home and neighborhood like Heatherwood. We did not choose to live near a bypass, Residents on 380, did! What a waste of money to build, destroy home's family for a bypass that will be a short term. Who is going to get off of 380 + take a bypass.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

My wife and I are in support of the GREEN alignment between Coit road and FM 1827 for the expansion and congestion relief of HWY 380. We feel a bypass is not necessary and would effect, one of Prospers great non-profits, ManeGait Therapeutic Horseman. Our daughter volunteered for five years and her relationship with staff and the children with disabilities are memories she will cherish forever! She learned skills that are unteachable in a classroom. The GREEN alignment only makes sense in preserving a great non-profit and the beautiful "country living" where we reside. Thank you for your consideration!

Best regards,

--

Frank & Mary Anne Loncar, Jr.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Subject: 380 Alignment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I currently live less than a mile from the proposed north 380 alignment. I do not agree with option A or E. I used to live West of 389 in Prosper and we decided to move east because traffic west of 380 was dangerous and extremely difficult to get around. We now live in Lakewood of Brookhollow in between Custer and Coit on 380. I use Custer regularly to go to the Sprouts located in McKinney. I go to Sprouts for all my groceries because I am on a restricted diet and they have a lot of the items I can eat in order to stay healthy. If the Custer alignment was to take effect I would no longer feel safe driving through Custer and I would have to find an alternate longer route making it a real inconvenience. I also travel through Custer to go to my Pilates studio in McKinney. If the alignment was to proceed I would likely no longer attend that studio. I'm sure a lot of the businesses south of McKinney would be impacted and loose Prosper customers who would no longer want to travel south across 380. I support green alignment on 380 and expansion on 380.

We are in favor of fixing 380. We are not sure how many would use a bypass. There are a lot of big trucks using 380 for deliveries to the new businesses popping up all along 380 from Custer to 75, along with all the patrons of the businesses.

The City of McKinney has gotten ahead of themselves by issuing all the building permits to new business and homes without the roads to support them. The problem, we think, is all the stoplights thru downtown McKinney. Without the stoplights, there would be no problem.

Brad & Gaby Smith
[REDACTED]

We support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your time & consideration-

My family and I prefer Option B. Reasoning is 380 Freeway will wipe out businesses and provide only additional 2 lanes versus planned 4 Lane ~~near~~ street on University. Option B provides North Access to 75 and those living in Prosper already take DNT to go south to Dallas. From my house to 75 is 6 miles, to ~~380~~ DNT its also 6 miles. Option E is another good alternative but seems like a 2 lane option thus not truly scalable.

The Outer loop could alleviate E/W traffic but that seems to be quite a distance and those using DNT can avoid 380 Westerly travel.

PLEASE STOP the ENDLESS parade of bypass options. Bypasses DISRUPT communities and DESTROY properties that homeowners have worked their whole lives to own.

Solve McKinney's 380 problems on 380. It's been no secret that property owners along 380, especially commercial, located there in anticipation of future business opportunities. After all, it's been a US Hwy for decades.

Employ some best engineering practices to lessen the impacts and KEEP 380 on 380, not in our neighborhoods.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

I am employed by TxDOT

I do business with TxDOT

I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Red Option E makes even less sense than Red Option B. First off there has been no study to determine if either option will relieve the congestion on 380. Secondly, Red Option E will destroy ~~existing~~ ^{existing} businesses ^{is howev} at the corner of Custer & Highway 380. If you ~~built~~ changed 380 to a limited Access highway in its current location, Prospon tax revenue would be protected.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper.

A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship.

Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I travel 380, Coit Road and know all these areas possibly affected, very well. I also ride in many of the red aligned proposals East and West and believe it is vitally important to preserve as much of this beautiful countryside as possible. People will always drive along 380 and so expanding 380 along 380 makes more sense for the flow of traffic and the environmental impact. If TxDOT can hold these in high priority instead of the money from businesses.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

For your consideration.

As a homeowner and citizen of McKinney, TX., I strongly **SUPPORT** either **Red Option-B** or **Red Option-E** bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

I strongly **OPPOSE** the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Very Respectfully,

Greg Gordon

Greg Horne/[REDACTED]

COMMENT : Though not a resident of McKinney, I do volunteer at ManeGait every week. My concern is for the safety of the horses and riders of the facility. The added traffic and noise near to the facility adds risk to the equestrian activities that take place there. In addition, the red alignment may even displace a beloved facility that serves many. As such, I support the green alignment that is most cost effective and less disruptive to most citizens/organizations of the area. Thank you.

I do not support support 380 bypass, The noise the length of time to build, If it is build it will be so close To my house. The highway noise would drive me crazy. If Prosper has voted against it why can't McKinney. It just doesn't make much sense to me at this moment. Please consider not building. Every Option would effect where I live. Any option is bad for my family.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

380 needs to be fixed on 380 there shouldn't even be other options. Building a bypass will affect elementary schools, houses, Mama Gait, etc. Being someone that works at a preschool and volunteers working people that have special needs I have disagree with the options. Thanks for taking time to read this and I hope you put the kids and special needs community into consideration.

I Harpneet Judge, reside on [REDACTED] which is the first street, which would be merely 30-50 feet from the proposed freeway. And this proposed freeway would be huge impact on our daily livings considering the noise right from beginning of construction to the probability of when its up and running, is going to be a great nuisance not for just auditory point of view but also for safety of those homes which are just 20' from the freeway. When we purchased the house, we took all of those aspects in consideration so now at this stage we can certainly not have this highway build top on all of us, We urge you to consider 380 as a better option and let us all reside in peace

Red option B is the best option. 192M for red option B and 253M for red option E is not being financially responsible to us tax payers. Mare Bait which is nothing more than 10 horses and some pasture can be easily relocated.

Prosper needs the freeway as much as anyone. Being behind houses in some open fields will have minimum impact on them.

Prospers letter writing campaign to save Mare Bait is nothing but a ploy to keep the by pass out of their city. The red B option is the best long term solution for the future.

I would like to state our concerns about the option B of the Spur 399 alignment. Option B will impact the Heard Museum wildlife sanctuary. If there is a need for a new bypass, we recommend the use of the option A to minimize the impact on our sanctuary. I would be more than glad to visit with you on this subject matter.

To Whom It May Concern,

I support the GREEN alignment thru Prosper (Coit to FM 1827) on 380 for the expansion of US HWY 380. This path is the most efficient and less impacting to the people of Prosper and McKinney. The bypass is not necessary and will take away the beauty and uniqueness of these 2 cities. Furthermore, the GREEN alignment preserves and maintains full operations for the loved organization ManeGait Therapeutic Horsemanship. The alignments RED E and B will cause the organization to relocate its services and cause the organization to become displaced. This will cause issues for so many people who depend on ManeGait for their therapeutic support and wellness. Do not make Prosper and MainGait take on the burden of McKinney's mistakes and poor planning.

Thank you for your time!

Heather Powell

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Please KEEP 380 ON 380!
Thank you,
Heather

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

- 1) Keep US 380 on current alignment of US 380 as depicted on the Town of Prosper Thoroughfare Plan
- 2) Red Option B and Red Option E have significant impact to existing developments as well as planned developments. An option east of Custer Road allows those developments to remain without compromising the future expansion plans for FM 2478 (Custer Road, north of US 380).
- 3) Since the City of McKinney does not want US 380 to be a LAR, then any bypass should remain within corporate limits of the City of McKinney.
- 4) The City of McKinney produced multiple alignments east of Custer that were not evaluated. Red Option F is similar to one.
- 5) Red Option B and E do not show all the traveling public connections from US 380 like option A

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Dear Stephen,

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services and hurt the children and veterans that have come to look upon ManeGait as their sanctuary.

Sincerely,

James & Teresa Garry

Subject: US 380 MAPO 3/28/19 Comment Card - Please Approve 380 Expansion Green Alignment to Keep 380 on 380.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

I am a resident of Whitley Place, which is located at the Northwest corner of Custer Road and 1st Street in Prosper, TX. My wife and I have been engaged with local organizations regarding the 380 expansion project, have attended the informative and very well executed TXDOT presentations, and have attended and presented at McKinney and Prosper City/Town Council meetings. Because of the significant negative impact the 380 Red Alignment Options B and E would have on our quality of life, we respectfully request that TXDOT select the Green Alignment between Coit Road and FM 1827 to keep 380 on 380. The Green Alignment is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. We believe the Red Bypass Alignments are inefficient, would not provide the necessary reduction in traffic to support Collin County's expected growth, would disrupt many communities that enjoy a rural environment, and destroy much of that environment itself.

Additionally, I am a volunteer at ManeGait Therapeutic Horsemanship. Several days a week, I see firsthand the profound benefits that ManeGait's programs provide to Special Need, Veteran, and First Responder members of the surrounding communities. Working with the ManeGait staff, volunteers, riders and their families, and horses, provides me with an opportunity to serve others in the community and is great therapy for me after careers in the US Army and the Aerospace industry. As a disabled veteran, I participate in ManeGait's Veterans and First Responders riding and brain therapy programs. These programs have improved my core strength, balance, coordination, and memory, and have helped me control my stress and anxiety, significantly improving my quality of life. Both Red Alignments B and E would have direct negative impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Many thanks to you and the TXDOT teams who have displayed exceptional openness, transparency, and professionalism during the 380 expansion selection process.

Respectfully,

James Dougherty

Dear Mr. Endres,

As it relates to the re-routing of US Highway 380 and it's impact on surrounding properties and organization, I support the GREEN alignment between Coit Rd and FM 1827. This is the optimal and most efficient path for east-west traffic.

While I live in Frisco, my three children all reside in McKinney in property purchased by our family and would be impacted in various ways by both Red Alignment E and B. Of significant importance is the impact on ManeGait Therapeutic. I have seen, first hand, the impact this organization has on the clients they serve. To choose a route for 380 that would directly impact this fine organization and lead to the destruction of this exceptional property and displacement, and potential ending, of the vital community service boarders on criminal. Please do not allow this to happen and hurt the children and veterans that are serviced by this great organization.

Respectfully submitted,

James H. Webb

COMMENT

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

We have personal connections with ManeGait. Having grown up with Priscilla Lewis Darling, co-founder, we also have volunteered with our therapy miniatures for many years at events. ManeGait now is home to two of our miniature horses and this possible move would affect them as all the horses to readjust to different surroundings, which in turn would affect how the horses react with the many people with disabilities that attend and depend on the interaction with the horses.

Please do not choose a way that would displace ManeGait or put them in harms way. This facility has been and continues to be a vital asset to McKinney and surrounding areas.

Thank you for your time and listening to a desperate plea to help save ManeGait.

Subject: US 380 MAPO (Prosper) Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of Prosper, TX, I strongly OPPOSE either the Red Option-B or Red Option-E bypass alignment option. I strongly **SUPPORT the proposal to widen US 380 (the Green Alignment)** or convert US 380 to a limited access freeway. I would also **SUPPORT Red Option A** but to a lesser extent.

These options are the most beneficial to existing businesses and homes and the families living in neighborhoods adjacent to US 380. Prosper has limited area for retail and residential development and has planned accordingly. This new alignment being pushed by McKinney could have been avoided by their own planning, and instead, they would like to make this a problem for Prosper. Options B or E would negatively impact the city by reducing sales and property taxes for Prosper.

False allegations by supporters in McKinney for Options B and E:

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. — not true and ridiculous— clearly none of the options would displace businesses at 75 and 380. I think they are hoping you won't actually read and think about what they are stating.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. The Green Alignment and Red Option-A will depress home values in that area. -Pure conjecture. It does not seem to have harmed Highland and University Park home values to have the Dallas North Tollway going through it, or Plano home values to have George Bush Freeway going through it, or Frisco and The Colony to have 121. Where are they getting this?

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge -Road. Unsightly? We've seen it already? Or is this person psychic?

I hope you will recognize the manipulations of a small but motivated group of entitled McKinney homeowners who simply don't want the inconvenience of having an exchange near them or to deal with the hassle of widening 380. There is no problem with widening 380. I myself live right off of 380. The exchange at 121 and 75 in McKinney was nicely done, all of the roads we've seen TXDOT update and build in the last ten years have been handled well. I think they are underestimating your ability to handle our growing traffic. **I support widening 380 or Bypass Option A.** Thank you.

Subject: Meeting Comment Form. March 28, 2019 Red Bypass Option E

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I can't really even remember how many times I have sent comments to you guys. This nightmare has been ongoing for over two years now. At your first reveal meeting you said that Walnut Grove would not be touched because you rarely ever destroy existing neighborhoods. Now with the Red Bypass option E, 17 of my 80 neighbors have gotten impact letters and many of those will lose their homes. I am curious as to what changed in a few short months. I am also curious as to what will happen if Prosper continues to say NO to a Bypass. Clearly they will because they've already said NO with formal resolutions three separate times. Is this a new plan by Mayor Fuller to destroy Walnut Grove along with Prosper commercial properties regardless of the wishes of ETJ residents, a wonderful non-profit organization and a smaller developing town? If so, that plan goes against everything he campaigned for in the spring of 2017!

I know that Stonebridge and Tucker Hill are against widening Highway 380. That does not, however, mean that every single resident in those two neighborhoods are against fixing 380. In Stonebridge, a small group of individuals is speaking for the entire neighborhood. In Tucker Hill, a few residents, a commercial developer who also happens to be a felon who served three years in prison, and a former County Judge are speaking for all of Tucker Hill. Stonebridge and Tucker Hill are sending the same prescribed comments designed by a handful of individuals. By contrast, my neighborhood, Walnut Grove, has been here almost 50 years and we are truly a neighborhood. We have custom homes on acreage and we are a cohesive community that genuinely cares about each other. We do not want our beautiful neighborhood destroyed, especially the 150-year-old trees and all the wildlife that we enjoy on a daily basis. Please do not let a handful of individuals change the entire Northwest sector of McKinney and destroy Walnut Grove, the most unique by nature neighborhood in all of McKinney along with MainGate Therapeutic Horsemanship!

Businesses can relocate and with the 6 to 8 year timeframe they have before construction starts, they will be able to make alternative plans if necessary. However, homeowners will see their homesteads plummet in value if a bypass becomes a reality. Walnut Grove, in particular, will be especially hard hit because we will be surrounded by Highway 380, a widened Custer Road, and a bypass. Please use some logic and fix 380 on 380 because it will have to be done eventually anyway. Any bypass option is an atrocity which ruins the entire northwest sector of McKinney. Please consider the people whose lives you will be changing forever as well as the wildlife and ecosystems that you will be destroying.

MainGate Therapeutic Horsemanship is just a half mile down the hill from my home in Walnut Grove. It is a twelve year old non-profit organization dedicated to serving hundreds of special needs individuals with disabilities as well as Veterans, their families, Active Duty military, and First Responders. Both the Red Bypass and the Bypass Option E would force the closing of this wonderful facility and leave a huge gap in services for the special needs community.

Stonebridge and Tucker Hill have basically nothing to lose. Stonebridge makes the argument that people will cut through their neighborhood to avoid Highway 380. Guess what? People have been doing that for years! And by the way, Stonebridge doesn't own those public roads. I believe that Stonebridge will lose a sign and Tucker Hill might lose a few parking spots up front in their commercial area. Please do not bow to a few and destroy our way of life and the natural beauty of Northwest McKinney. FIX Highway 380 on 380!

Sincerely,

Jan Clare

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Hello Mr. Endres,

I'm Jana Horowitz a homeowner at [REDACTED]
I support the Green Alignment between Coit Rd and FM 1827 for the expansion of HWY US 380. It is the most efficient path for east-west traffic and US 380 will need to be fixed in time anyway. The majority of TX Dot's previous survey results prefer fixing 380 on 380 as well. I would sincerely hope TX Dot would care about the majority of TX Dot's survey recipients opinions.

A bypass is completely unnecessary and would destroy many people's homes, property values and a serene way of life considering we actively chose homes away from a highway.

Please do not cave to McKinney's mounting political pressure and corruption in building the bypass into Prosper. McKinney's poor planning should not be allowed to punish Prosper as a result. Please do not allow Mckinney to continue to bully this into the small town of Prosper.

Regards,
Jana Horowitz

Proposed Wording for US 380 MAPO Comment Form

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Good morning!

Option E would cut off all of the roads into/out of Walnut Grove on the west. So, will the Option E be elevated all the way from Custer to the north of WG or are would we lose all 3 roads?

Janet Anders

COMMENT:

As a resident of McKinney I want to express my support for the **Green** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Expanding the current footprint seems to be the most optimal and efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would cause unnecessary reduction of the natural green space areas established within the paths of the other alternatives. I was happy to move to McKinney and value the dedicated spaces and feel the other proposed Red Alignments will devalue the area.

I left California and had a 45 mile each way commute to work. My move to Texas with Toyota and finding a home in McKinney has been a life changer. I chose to give back to the community by volunteering my newly found time. This past year I was blessed to have been able to volunteer over 200 hours at ManeGait Therapeutic Horsemanship. This nonprofit organization provides an amazing service and when I found out some of the alignment proposals would have a direct affect on their being able to continue their quest I was very disappointed. The **Green** alignment is the **ONLY** choice going forward. It not only preserves the beauty of our community but will prevent the destruction of this exceptional organization and their service.

I implore you to realize all of the negative impacts any other choice would have on our community.

Thank you for your consideration.

Subject: Against Bypass Options B & E

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDoT should do bypass Option A that originates in McKinney.

The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion.

I hope TXDoT does not bow to special interests again and honors the **VAST MAJORITY** of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.

I hope to hear that TXDoT is moving forward with the overwhelmingly supported green option of fixing 380 on 380 when it presents its final alignment option for 380 this Spring.

Sincerely,
Jason Brown

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

In addition, Red Alignment E and B would run directly in front of a proposed Prosper High School, located on Prosper Trail, east of Custer and serving both McKinney and Prosper students. It is my understanding the land has already been purchased for this school and plans are moving forward for the construction of this high school. Putting a bypass on the same road as this high school would create a tremendous safety issue for students, parents and the drivers on the bypass.

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

I am JATINDER JUDGE, a resident of [redacted]

The proposed highway

will run directly behind the Grove Cove Dr which would be approx. 50 feet from my house. I have spent my hard earned money to buy this house (which is my first house) to raise my 3 little kids, which I don't feel will be safe in the living across a big highway. Property prices will take a hit, schools will be directly impacted because of proposed alignment. I would request to consider some other viable option which would not impact families (such as expand 380 on 380 itself).

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT ONLY the Red Option-B bypass alignment option.** It is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. It is also one of the least expensive options.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.

I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area and cause marked disruption and pose noise and pollution risk to nearby homeowners.

***OF SIGNIFICANT CONCERN** is the unscrupulous and publicly documented tactics used by certain individuals and an organization to attempt to preserve the non-profit (i.e., no tax revenue) ManeGait facility, which ostensibly has influenced TXDOT decisions. Relocating a small non-profit including horses, barns, and administrative buildings to another equally beautiful location in Collin county where the important people they serve can simply go pales in comparison to destroying Lowes, other tax generating business, and actual peoples homes (Red option E), and the negative and costly consequences of the Green alignment and Red option A as outlined above.*

Red Option-B is the only rational option not influenced by unsavory means which will improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

RED ALIGNMENT OPTION B CONTINUES TO MAKE THE MOST SENSE FROM A COST AS WELL AS MINIMIZING DISPLACEMENTS STANDPOINTS. NO OPTION IS PERFECT BUT WHEN YOU REMOVE THE EMOTIONS ALIGNMENT B MAKES THE MOST SENSE. USING THE EXISTING 380 CORRIDOR WOULD BE A DISASTER AND SHOULD BE A NON-STARTER.

THANK YOU!

I moved back to TX from Colorado just over 1.5 years ago into Whitley Place. We intentionally selected our neighborhood knowing 380 would need to be expanded to keep up with the rapid growth in Collin County. We DID NOT purchase where we did thinking/knowing 380 would be completely moved from it's current location. Do you think businesses and residents purchased close to 380 knowing it would need to be expanded? Of course they did! Keep 380 on 380 and stop trying to appease the few and do what the majority has already stated they want to happen, time and again.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My name is Jeff Parsons and my address is [REDACTED]. My daughter Quincy has ridden horses at MainGait for many years.

The effects of the therapeutic riding have been tremendous for her. She communicates better, she has more confidence, and her core muscles have gotten stronger. Quincy, along with the other riders at MG, need their equine therapy. Please strongly consider routing the 380 expansion so that it doesn't put an end to this wonderful program.

I invite you to come visit our riding session some Saturday at 4:00 to see what I'm talking about. My number is [REDACTED]. Thank you Mr. Endres.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Jeff Parsons

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Our daughter has been a rider at Mane Gait for four years and the growth she has made is amazing. She would be devastated if she was not able to ride on Saturday afternoons.

PLEASE vote Green!

I vote for Red Option A. Prosper is a small town with limited land & revenue resources. ^{Both} Red option B & Red option E damage the present & future financial stability of Prosper. Red option B takes a large amount of land preventing future business or residential development & revenue. Red option E steals a highly trafficked & profitable business corner of Custer Rd & 380. McKinir owns (3) of the intersection's corners. Prosper owns & has developed their own (1) North West corner. Loss of the Lawes, Firestone, Sherman Williams, Taco Bueno would severely inconvenience me as a Prosper resident AND would devastate the present & future financial stability of Prosper. It has the optics that McKinney is willing to sacrifice its smaller neighbour's future. Red option A - Please

COMMENT:

*I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Prosper residents shouldn't be forced to deal with McKinney's lack of planning. The horses at ManeGait aren't just large beautiful animals to look at.. they give life to many that are disadvantaged. The little girl who can't walk.. but can fly on her horse. The older woman who cannot take care of herself without aids but is 100% in control on her horse and responsible for its care. Spend one day on the property and then decide if you can sleep well at night knowing this has been taken away from so many that have sacrificed for it to be here.
Thank you.*

Please keep 380 on 380. Both alignments E and B take precious Commercial Revenue opportunity away from Prosper and their residents to lower the tax burden. We have so little land along 380, since the town of Prosper planned for expansion on 380 it wouldn't be fair to reduce our ability for commercial tax revenue on the small stretch of 380 that runs through Prosper

NAME: Jennifer Mason

ADDRESS:

CITY:

April 5, 2019

I oppose Red alignments A, B and E. I support the Green Alignment as it pertains to the city of McKinney.

The shortest way from point A to point B is a straight line. The green alignment is just that. Alignments A, B, and E route traffic up to 2 miles north of highway 380. This does not make sense considering much of the traffic is either traveling east or west from town to town with the intention of traveling southward at some point; either Highway 75, DNT or I35 – all are major thoroughfares to the larger cities – Dallas and Ft. Worth. People will not go north to go south. A good example of this is loop 288 in Denton. 380 through Denton is a nightmare yet loop 288 is a ghost town and I believe its distance from 380 is even less than the bypass you are proposing.

The word “highway” is defined by Google Dictionary as:

A main road, especially one connecting major towns or cities
Another term for “expressway”

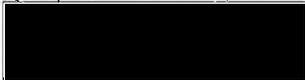

US Highway 380 in Collin County is exactly that. It directly connects county seats from Greenville to McKinney to Denton, and so on. Business owners and Developers who chose to build on Highway 380 knew they were building on a highway. Business chose such a location due to exposure to high traffic volume. Home values along Highway 380 are adjusted to account for their close proximity to a highway.

Creating a bypass to appease homeowners is not the answer. Those homeowners knew they were building off of a highway and made the educated choice to do so. Homes in the path of the proposed bypass made a conscientious and educated decision NOT to build on a highway based on the City of McKinney's public city plans and a Mayor whose campaign was against a bypass.

Your maps are outdated. There are many new neighborhoods now in the path of the proposed bypass. The city simply waited too long to address this. Anything other than fixing 380 on 380 is wrong.

Thank you,

Jennifer Patrick

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

My name is Jennifer Sedwick and I live at [REDACTED] My neighborhood is Heatherwood and it backs up to Bloomdale road, the sight of the proposed Red Alignment.

I attended the presentation on 3/28/19. I was able to ask questions and see the new options on alignments. Please let me first state that my support is for the GREEN option of keeping 380 in its current footprint.

As I learned on March 28, regardless of the option chosen (a, b or e) the decision to build the Red Alignment will run along Bloomdale road. The impact to my neighborhood and surrounding neighborhoods will be devastating. There are 50 homes just in my neighborhood who's backyard will be less than 50' from the proposed path.

For the specific alignment options, A, B or E, all of those have a devastating impact. The most devastating impact will be to Mane Gait Therapeutic Non profit. This non profit serves a great need in our community and statewide. There are VERY few places like Mane Gait in the entire State of Texas. Options B and E specifically would destroy their ability to perform their services and force them to shut their doors.

Additionally, a bypass option is unnecessary as it falls far below the minimal optimal spacing between highways, with some points being approximately 1 mile from the current footprint of 380. Expending funds to overhaul 380 in its current footprint is the most fiscally responsible use of funds. Bypass or no bypass, 380 will need to be fixed. Why not fix it and fix it right?

In summary, please accept this as support for the GREEN alignment of keeping 380 on 380.

Kind Regards,
Jennifer Sedwick

Smith, Chelsey

NAME/ADDRESS: Jennifer Steele, [REDACTED]

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Subject: US 380 MAPO (Prosper) Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you!

Jenny Ahlemeyer

COMMENTS RELEVANT TO 360 BYPASS ROUTE DETERMINATION

AS REQUESTED BY TEXAS DEPARTMENT OF TRANSPORTATION (TxDOT)
 BY JERRY AND RITA COLLUM
 RESIDENTS OF WALNUT GROVE RESIDENTIAL COMMUNITY

Walnut Grove is a completely built out community of single family residential homes featuring an established rural family residential ambiance. Walnut Grove is a community of middle class families living the all American dream of having a place of raising their families in a healthy, wholesome and safe environmental culture. People here have for many years worked diligently together to maintain such a community culture. Until now this has been a highly successful endeavor. Now our life's effort, our dreams, are being seriously threatened by political forces reaching beyond our ability to control, or yet it seems, beyond our ability to influence.

Comments here are seeking to reach the conscience and good will of those who will ultimately make the 360 Bypass routing decisions. This is a plea that our political and governmental representatives consider the positions of those directly and substantially affected most, be held more favorable to those represented by the more powerful political forces at play here, that appear to be representing remote considerations.

Particularly, the residents of Walnut Grove will be deeply affected both financially and emotionally by uprooting their homes, their community culture, their deep rooted personal dreams, and for many, years of hard work promoting and maintaining a unique life style. Whereas, outsiders such as MainGate promoters who do not live in this community will not have their lives, their homes and their endeared dreams uprooted nor will they be affected and any way, other than possibly moving their activities to another horse pasture.

To the politicals involved: Put yourself, your family, your personal effort to build a home, a community, a wholesome and safe life for your family (as they may apply) in our position. Show us you seriously care. Truly be the peoples representative. Stand up, be counted.ik

On a personal basis, Rita and I have already been seriously impacted by the Bypass project. We have actually been trying to sell our property and home for nearly two years. As soon as potential buyers learn of the uncertainty of how the Bypass will impact property values they disappear. We have reduced the sales price by more than \$100k, based on assessments of local property sales (i.e.; prior to Bypass speculations), and buyers just walk away. The same loss of property value is surely impacting all of our neighbors. In our case, investment in this property represents a substantial amount of our retirement. I suspect this is the case for many others.

To the tax payers of Prosper: wake up, if the Bypass cuts across the corner of empty pastures within your city limits, it will bring improved property values, it will bring merchants that will be helping pay much of your taxes. And it will not be uprooting family homes and destroying wholesome communities and newly established businesses.

To the City Council of Prosper: Your argument for trying to prevent the Bypass from cutting through the corn fields and pastures in favor of uprooting family homes and newly established businesses at additional costs of hundreds of millions of tax payer dollars defies logic and is frankly embarrassing.

To Texas State Government, city and county councils and planners, and the people of all cities and communities north of and around Hwy 380: Clearly the reason we all find ourselves with this devastating highway traffic overload is that we are caught unprepared in handling the massive regional growth in this area. And unless we get mobilized behind building the proposed "North Texas Outer Loop" history will repeat. The Outer Loop project must get going now before the area is populated with homes, communities and businesses that will need to be similarly uprooted. As we all hear, north Texas is touted as one of the fastest growing region in the country. This is Boom Town country and our state and local planners have not kept up with infrastructure demands.

To Texas State Government officials and planners: This is clearly in need of leadership. Hello Governor Abbot, look north, you are badly needed here. Particularly, the cross country eighteen wheelers and ground traffic needs routes around the fast growing cities of north Texas. We must get mobilized behind this fast growing problem.

A couple of notes of recognition:

First, in reverence to the very good work of ManeGait supporters, and not to derogate your efforts; your facilities can more easily be relocated, and with little planning and cost could be significantly improved. The affected property will be paid for by 'purchase of right of way'. To restate the previously presented fact, 'you don't live here', your homes and families will not be affected, no matter what is decided. On balance with the impact to families resident in Walnut Grove, there is no comparison. Have a heart. Be fair. Back down with your objections.

Second, to the efforts of TxDOT engineers, planners and others who have developed the comprehensive 'Impact study': We commend your effort and good work comparing the hit on families and businesses and tax payers for the various proposed bypass routes.

Each of us have our own biases and desires which present numerous difficulties, but the impact study puts clarity, fairness and logic in the decision making process. On examination it clearly reveals that the proposed Route B will by far have the least impact on all. The logic presented by the study is clear and overwhelmingly compelling.

So, if logic prevails in the final route selection, Route B will be selected; otherwise, the selection will be based on purely political overbearing; and we all know how unjust that becomes.

Therefore, among the proposed Routes A, B or E, our vote is for Route B.

More credibly, some serious consideration is hereby proposed to route the 380 Bypass north of and parallel to Hwy 380 through unpopulated pastures and corn fields, with multiple inter-connections, all the way to Hwy 35 north of Denton.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Mr. Endres,

*I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.*

I encourage you to take a little bit of time out of your day to visit MainGait to understand its benefit and beauty, and why this equestrian therapy center should be maintained.

MainGait's address
[REDACTED]

*Sincerely,
Jessica Marshall*

YES TO EITHER / Red B works

Red E IS VERY NICE + MIGHT PLEASE MANY
Also Red E utilizes custer which needs
to be widened. It's so narrow + dangerous in its
current state! I tell my kids to stay off it.
I like Red E the best.

No to RED A
380 WIDEN

Fix 380 on 380. The earlier taxpayer feasibility studies confirmed that a 380 LAR is what is best for businesses, and Frisco, Prosper, and McKinney have all had 380 in its current footprint in all planning. As a Prosper resident, I stand with the Town of Prosper Council and Prosper ISD against any route going through Prosper. I am opposed to any route that impacts the Walnut Grove neighborhood. McKinney is roughly ~63 sq mi in land area - Prosper is roughly ~23 sq mi in land area - McKinney is 3 times the land area size than prosper and ~~needs~~ should not be passing on their lack of planning to the town of prosper.

Hello,

My name is Jill Workman and I live at [REDACTED]

I am writing you in hopes of expressing my support in the GREEN ALIGNMENT for the HWY 380 Expansion. For a number of reasons, the GREEN ALIGNMENT is the most optimal proposal for this highway running through the beautiful cities of McKinney and Prosper. We do not need another new and major highway/bypass leaving it's mark on these beautiful communities. As a homeowner in Heatherwood living community, I support the GREEN ALIGNMENT as I do not want to see a major highway just hundreds of feet from where my children play each and every day. The GREEN ALIGNMENT also preserves one of Collin County's most notable nonprofit organizations, ManeGait Therapeutic Horsemanship. This incredible facility provides community services to the people - men, women and children - in not only McKinney and Prosper, but the entire surrounding area. We need ManeGait to keep its doors open for the good for this amazing community.

Thank you for your time and attention as I continue to support the GREEN ALIGNMENT.

Regards,
Jill Workman

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses---

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

My name is Jim Kiser and I live at [REDACTED]

I support the Green alignment for the expansion of US Route 380. It is the optimal and most efficient path for east-west traffic through the cities of Princeton, McKinney and Prosper. In that regard, I am not in favor of either Green spur A or B as a connector of 121 with 380. Instead, I would favor using the existing routing onto 75 and then providing an improved connector between 75 and 380 to provide this connection.

West of 75, I continue to favor the Green alignment. The Red Loop Alignment would scar the beauty of our community and threaten the ability of ManeGait Therapeutic Horsemanship, a prominent Collin County non profit organization, from providing their vital community services.

Best option B seems to be the most logical choice with minimal impact upon Residential & Commercial -
Decisions should be made that would best benefit the community @ large and not 1 vocal group over the other.

Mr. Endres,

I know that you have been inundated with calls, emails and letters regarding US 380 improvement which should show you how important your (and TXDOT) decisions impact the citizens of Collin County. Whatever happens could majorly impact the lives and livelihoods of many people. With that in mind, I would like to go on record that we support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. A 380 alignment along its current route is the most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and will NOT alleviate the traffic on 380 in McKinney. **There is already a Collin County Loop in the works no more than 5 miles north of the proposed 380 bypass.**

GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your time and consideration.

This only acceptable option to/for ~~the~~^{US} is Red Option A. This is the only option that honors the City of Prosper's position NOT to allow the Hwy 380 by-pass to go through any portion of the City of Prosper. It appears to me Red option A will have the least impact to the businesses and residents on and ~~near~~ along Center north of Hwy 360. This by-pass will negatively stunt the commercial & residential development of this area. In addition any other option than option Red A will lower ~~the~~ property values on & along Center Ave north of Hwy 380. My opinion now and in the future is keep Hwy 380 on Hwy 380.

I have lived in Stonebridge Ranch in McKinney for nearly 20 years. I believe that reworking of US 380 needs to be done via the Green Option. I do not believe in choosing neighborhoods. People who purchased homes near 380 should have recognized the potential for expansion. Again improvements to US 380 need to be aligned with the current highway.

Mr. Endres,

I am a homeowner in McKinney and I strongly SUPPORT Red Option B as well as Red Option E. These options cause the least disruption and destruction of current homes and businesses as well as have the least cost of all the options. Especially compared to the green OR Red Option A. We as a community should be using a solution that has the least negative impact on all parties located our city.

Thank you for your time.

Subject: Re: 380 timeline

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I understand that areas on 380 will need to be reconstructed no matter the recommended alignment. There are intersections and definitely areas that need to be addressed sooner rather than later.? What I am thoroughly confused about is why one non-profit, Main Gait, is garnering so much attention when there are 3 more non-profits along 380 which are slated to be destroyed by its widening to a LAR yet no one is talking about them or adding bypass options to save them. While Main Gait provides an important service so does Life Path which is the only mental health facility in Collin County. Inn Style supports the Samaritan Inn serving poor families in need of housing and financial support. Cornerstone Ranch provides housing for adults with special needs and is one of the only facilities that administers to this group. All of these businesses are just as import as Main Gait yet they don?t have the voice of a multimillionaire backing them. Spending the time and resources on an alternate route (Red Option E) has proven to be futile as it not only destroys 12 businesses (Lowe's, L'arte nails, a supplement business, Dickey's, Firestone, Starbucks, Popeyes, UPS, Sherwin Williams, Burger King, Taco Bueno and Team Mobile) to save Main Gait but in Bill Darling's own words it is the worst possible option for his business as it surrounds it by thoroughfares. Mr. Darling states in a letter to Main Gait supporters that having a thoroughfare or a thoroughfare and a bypass through and near his property "compromises the SAFETY of our riders, horses, volunteers and staff and they will be unable to provide therapy services in this location and would be forced to relocate".? This statement from Main Gait's owner indicates that once Custer is widened into the arterial road or thoroughfare as? it is slated to be in the near future it will run right through this property in too close of proximity for them to conduct therapy services in a safe environment. My question is then why are we bothering to focus our attention on a business that will ultimately move once Custer is widened anyway? Mr. Darling clearly has the means to move his business to a more suitable and safe location while the other non-profits do not.? My hope is that this wealthy millionaire's use of sympathy for those that utilize this business and his millions of dollars will not lessen the importance of the services that the other 3 non-profits provide Collin County and they? as well as the other businesses along 380 will be given just as much attention and consideration as Main Gait has been awarded.?

Another point of confusion is how wide Red Option A will be as its location is right next to Ridge which will already be a 6 lane arterial (making 12 lanes of roadways in that area) and also why is it being considered given it poses the greatest environmental impact on the city. It will ultimate destroy my neighborhood of Tucker Hill as this option will surround it by an arterial to the west (Stonebridge) as well as a LAR to the south and east completely isolating it from the rest of the city and destroying our "front porch" living neighborhood due to the noise and pollution that being surrounded on 3 sides by large roadways is sure to bring.? No other neighborhood will have to sustain this much of an impact in any of the other options. This option will also impact Stonebridge Ranch and Auburn Hills as well as it will force thousands of cars to travel into these and surrounding neighborhoods when 380 gets too crowded which poses a significant safety threat. This option will also take away the easy access that those west of Baylor Hospital currently have and could potentially cut us off from those services in the event of an emergency along 380.? At the very least it will? impact thousands of citizens west of the hospital who benefit from quick access by emergency response vehicles that the current road provides unlike an LAR with limited access which? poses a huge impact to timely response times. This limited access can literally mean the difference between life and death.

As I have stated before Red Option B is still the most viable option as it keeps the traffic flowing, communities safe, it keeps our businesses which provide a much needed tax break and as well as thousands of jobs. ? It also provides the town of Prosper an opportunity to expand their business corridor along their southeastern border (not destroy it as it is slated when 380 is widened) while providing Collin County with another road choice besides 380 to travel on when it is congested and also in case of an emergency shut down as well.? The growth is slated for the north and that is where the bypass needs to be in anticipation of this growth and is the best possible choice for the county.? You have the opportunity to do what no one else has up to this point and that is to plan for the growth before it happens and not just react to it once it is here. Forcing the northern growth onto one already too heavily traveled road south of them makes no sense as it will not be able to handle the 2 million people that are projected to move in along with additional business traffic.? Splitting that traffic growth between two roads closer to where it is projected makes the most sense and will benefit the flow of traffic of all roads in the future. Instead of being like the short-sighted road planners of the past only seeing what is immediately in front of them and hoping that one road will handle all of the traffic we can plan for this growth and be ahead of it. As I mentioned in an earlier email I grew up in California where big business and shortsightedness dictated road placement and that lack of planning ended up in continued constant traffic while forcing the use of toll roads. The same can be said for McKinney if anything but Red Option B is chosen.

Please let all of us be heard not just the wealthy businessmen as we all travel on this road and very much want it to be a smooth, uncongested ride not one filled with the overwhelming burden of not just McKinney's but the entire east-west counties traffic as it is currently.

Thank you for your continued consideration of Red Option B.

Joanne Thompson

I am confused as to how the build timeline can be the same for a new location build with almost nothing in the construction path and one that has 200+ business and other properties in the path that will have to be destroyed and then cleared before construction can begin. While I understand that either project comes with the unknown of what you will find when you are building and clearing the land for the road to be built but it seems to me that the one with tear downs will have that extra aspect which will certainly take more time that one without having to deal with tearing down of existing businesses and buildings.

Subject: "US 380 MAPO (Prosper) Comment Card"

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen-

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.

These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380.

They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.

I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you for your support

Joseph Sadowy

I do NOT want to see options B or C
pursued - these routes MAKE ZERO sense to me -
the impact to the prep is too significant!!
The reasonable option is to keep 380 on
380!!

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. ManeGait provides exceptional services for those affected by disability in our community, and also to our wounded veterans who have given their service to our country.

Thank you for voting to keep the GREEN alignment.

To Whom it May Concern,

In light of the finalization of solving the traffic on 380, the best remedy is still to fix the highway at its source. A by-pass option will not solve traffic patterns on 380. Therefore, for both short and long term viability, it is necessary to widen 380 in a creative + cost-effective manner to improve mobility in the 380 corridor both now and in the future.

The **GREEN alignment** also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both the Red Alignment E and B, would have a direct negative impact on ManeGait and the surrounding properties, leading to destruction of this exceptional property and displacement of MainGait's vital community services. I would like to note that there are also studies that indicate when one develops the confluence of 3 major arteries at a near single point, accidents increase dramatically. Presently it is taking me 10 minutes or more to exit our Walnut Grove neighborhood onto Custer RD during rush hour. And it is getting worse every day. Moreover, our Walnut Grove neighborhood has no curbs or sidewalks. Hence, many community members walk in the street, often with their children. Bringing more traffic to our area with the Red options will only increase danger by encouraging more traffic to cut through our neighborhood - something it was not designed for. Thank you for your consideration, John Nugent

This bypass proposal along Custer is a
travesty. First, Custer rd is already overburdened.
Placing this by-pass along Custer north of 380
will only exacerbate this growing traffic problem,
AND will create a traffic jam at 380
& Custer. Moreover, this by-pass along Custer will
draw traffic into the Walnut Grove neighborhood
which has no sidewalks or curbs. Many children
play on these neighborhood country roads. So your
proposal will also endanger many children.
But more south bound traffic merging
onto Custer will be a travesty
Keep 380 on 380

April 5, 2019

Attn: Mr. Stephen Endres P.E.

This is somewhat of a rebuttal to the attached protest / blanket letter. Everyone has an opinion; however they should at least put their name on it when asking neighbors to support their position.

This attached protest misses a few points.

- All of the property south and east of McKinney Airport is planned Manufacturing or commercial all the way to East Fork of the Trinity and south from FM 546 to Old Mill Road or Wilson Creek
- The purpose of the east loop, is to get traffic thru McKinney, around McKinney, not too McKinney
- The Airport has to have access to the East side ,If McKinney doe's not continue to develop the airport FAA will ask for a refund of the millions of dollars in grant money.
- I question the argument about property values , currently the indecision has put a serious burden on land owners that are considering selling because no one knows what is to happen , but once the decision is made values should increase regardless of zoning.
- The proposed connection to Airport Blvd. on the south end is currently being closed off due to building development
- There are few actual residences that would be further impacted from Hwy 5 east if the design is done correctly. In fact from Country Lane east and south then north much of the property is absentee land lords , of course the distance from the new road would have an impact on noise and traffic in the neighborhood
- I'm sorry but choosing to live in a County that is one of the fastest growing areas in the nation is going to get crowded if you are going to grow you have to have water, electricity, roads .My family did not ask for this much growth we have been here since 1928. So yes we have had to endure a lot of changes I have no objections to contributing to the success of the County but it has to be even handed. All government agencies have to be honest with the folks. Those that benefit have to compensate those that are giving up their way of life
- Those concerned about the collateral effect of growth should petition their local governments to stop issuing building permits.

Thank you

John Powell sr

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Hi Stephen,

My name is John Thielmier and I reside at [REDACTED]

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Sincerely,

John Thielmier

US380 – Denton and Collin County

Overview

The image below was taken from the TXDOT presentations on the possible realignments for US380 through Denton and Collin Counties. In Denton County, the multiple possibilities shown represent the early stages of the project. In Collin County, the routes still being considered are shown.

The image below is the same image with the shortest TXDOT route highlighted (in red) and my proposed route (in blue).

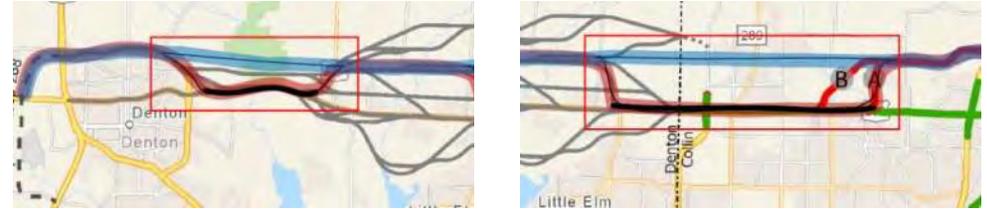

Routes Compared

The primary difference between the 2 routes is that the TXDOT route returns to use portions of the existing US380 in 4 places while my proposal uses a (mostly) new route.

In order to convert existing US-380 to a Limited Access Roadway, the entire roadbed would need to be removed and replaced, at a much higher cost and longer schedule.

The image below left shows the differences through Denton. The TXDOT route is 1.26 miles longer than my proposal (8.68 miles), and uses 5.32 miles of existing US-380.

The image above right shows the differences across the county lines. The TXDOT route is 3.03 miles longer than my proposal (14.35 miles), and uses 12.41 miles of existing US-380.

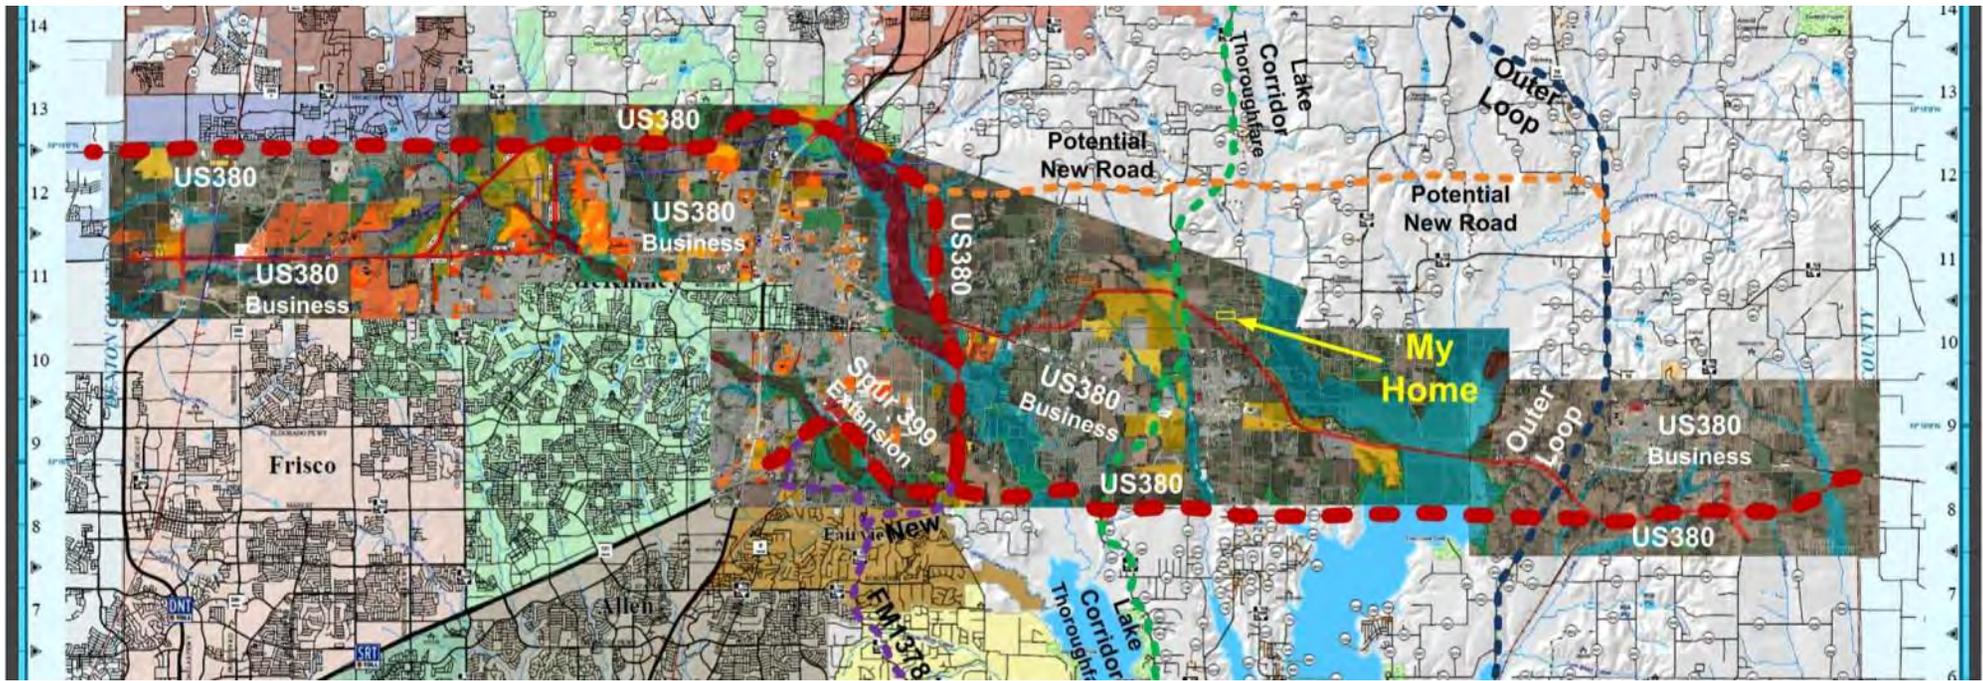

The image below shows the differences in eastern Collin County. The DOT route is 1.7 miles shorter than my proposal (24 miles), and uses 7.34 miles of existing US-380.

An alternate route (shown in dashed pink) is 25 miles long, but only uses 17.5 miles of new roadway.

Returning to the image with the shortest TXDOT route highlighted (in red) and my proposed route (in blue), my proposed route is 71 miles long while the TXDOT route is 2.6 miles longer and uses 25 miles of existing US-380.

The Differences Between the Routes in Collin County

The TXDOT route does use 25 miles of existing US350 Right of Way, whereas my proposal uses very little existing Right of Way. However, the TXDOT route still requires 68% as much new Right of Way purchase (48.6 vs. 71 miles) as my proposal. And, as noted earlier, in order to make the existing sections of US380 that are planned to be reused into a Limited Access Roadway, those entire sections would need to be completely torn out to be upgraded.

During construction of the TXDOT route, along the existing sections of US380 that are planned to be reused, as well as the connection points to the new sections on the ends of those existing sections, traffic along US380 would be significantly disrupted. My proposal would not effectively impact any existing traffic during construction. The TXDOT route has 8 connection points with the existing traffic flow where slowdowns will occur anyway after completion. The existing sections to be reused have the longest traffic tie ups currently.

Traffic Flow Projections

Traffic originating in a section of existing US380 that is bypassed and/or traffic terminating in those sections will be required to merge and exit from the traffic flow of the new roadway, adding to the congestion there. There are no effective alternate routes for them in the TXDOT route.

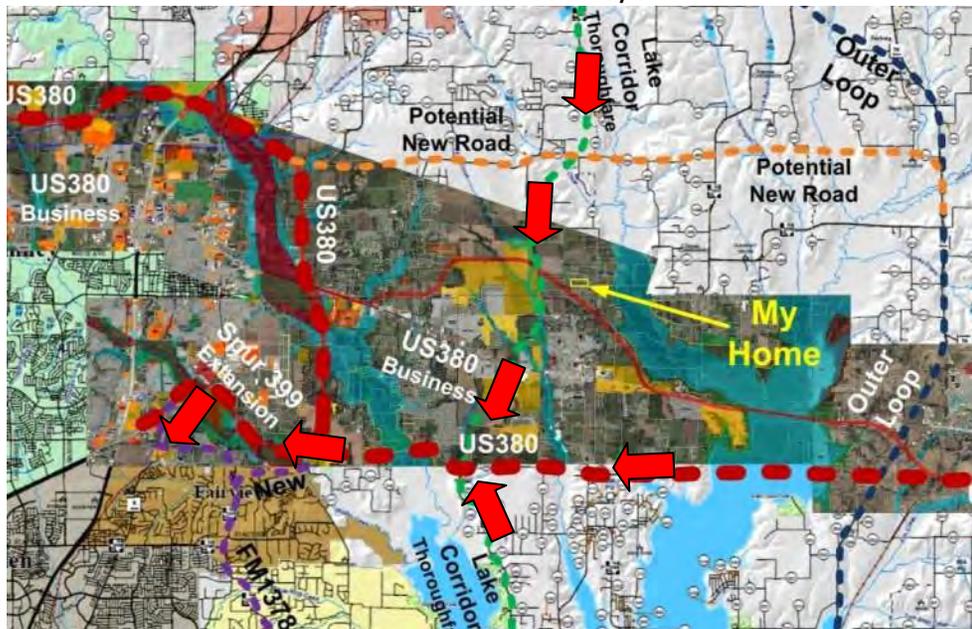

Grade Separated Intersections (shown above) will improve traffic flow some, but the traffic entering or exiting the stream in those locations will still cause tie ups. The tie ups will be furthered by traffic entering or exiting the businesses along the exiting US380. Unless these sections are upgraded to a Limited Access Roadway (at additional cost and traffic disruptions as noted), the traffic flow improvements proposed will not be realized.

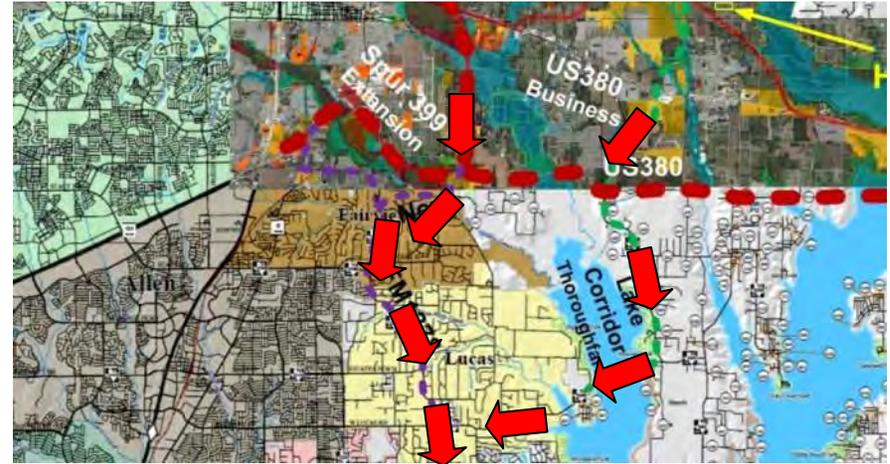

Additionally, the entry and exit lanes will require removal of all businesses currently on all 4 corners of the intersection.

In my proposal, existing US380 becomes US380 Business and would carry traffic that wants to flow less than 5-10 miles, while the new route would carry traffic that wants to flow more than 5-10 miles.

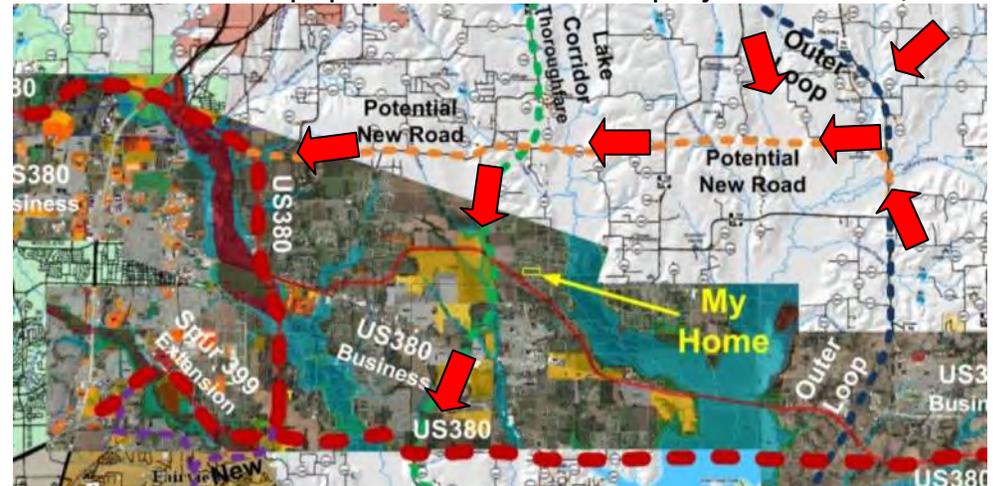

Besides carrying the US380 through traffic, my proposed new section of US380 in eastern Collin County (south of US380 Business), along with the Spur 399 Extension, and the Lake Corridor Thoroughfare, provides a good route for all of the traffic in the Lake Corridor to reach US75/SH121.

With the proposed improvements to FM1378, a new, short, section of roadway could connect from the corner where FM1378 turns southerly, east of the Heard Museum, to the new US380/Spur 399 Extension interchange, allowing N-S flow. Additional traffic along the Lake Corridor Thoroughfare ties into FM1378 in Parker.

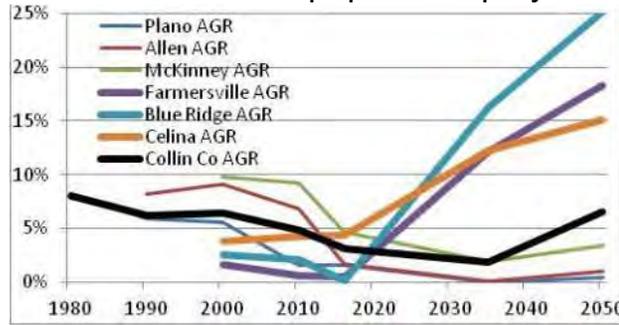

My potential new road in eastern Collin County (north of US380 Business) would serve the residents of Blue Ridge and Farmersville if the population increases as projected to 750,000.

The Analysis Starts with Population Projections

The need for roadways is based on population projections. Original projections of Collin County were 2.1M; then 2.5M; then 3.44M; and now 3.8+M. The chart below shows the required Annual Growth Rate experienced in the past and that required in the future based on population projections.

Note that Plano, McKinney, and Allen have never exceeded a 10% AGR, while Farmersville, Blue Ridge, and Celina must not only exceed 10% AGR for over 25 years, but must reach 25% AGR. Using a more realistic AGR, the Collin County population would remain below 2.2M until well after 2050.

The chart below left came from a Freese and Nichols presentation representing a population of 3.44M. The chart below right came from the most recent TXDOT presentation representing a population of 3.8+M.

Figure 21. Collin County Population (2.6M Estimated Subtotal)

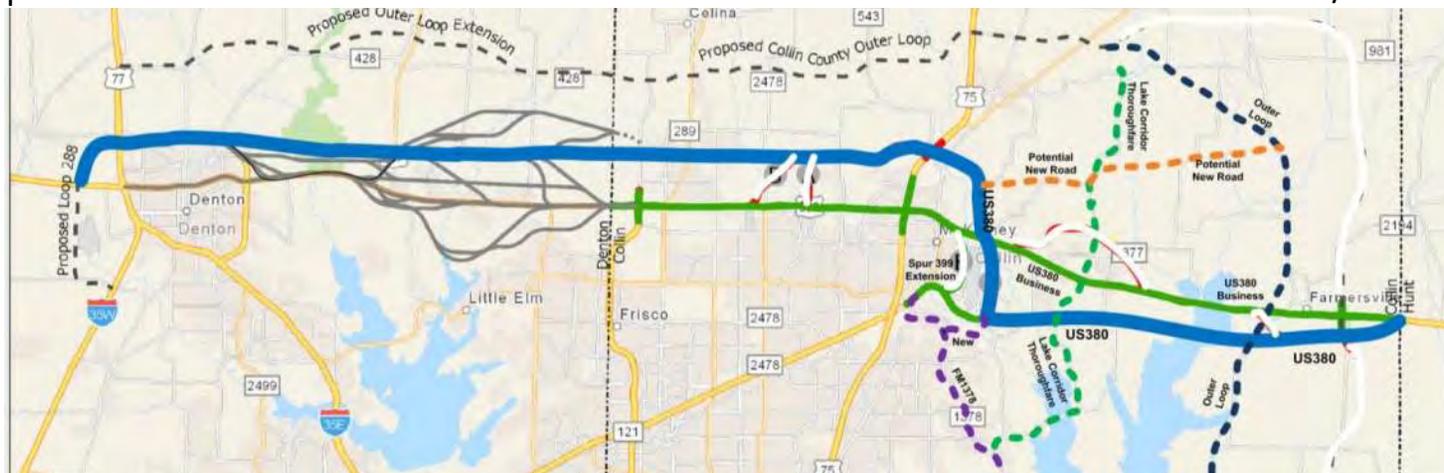

In both charts, each yellow dot represents 250 people. However, the higher population chart (on the right) has a notably lower density of dots.

Conclusion

In my opinion, the population projections are way out of line. I do believe the TXDOT population density chart above right, in that the population in the eastern third of Collin County will be as light as shown, and on its own, doesn't justify all of the new roadways proposed by NCTCOG.

US380 needs to be improved without closing all but 1 lane each direction over the 25 miles across over a 5-8 year construction period (as will happen with the TXDOT plan).

The planned 3rd lane of US380 (Business) in eastern Collin County should handle local traffic, if a new US380 is built for through traffic. Using the route planned for the Spur 399 Extension south of US380 Business can also provide a route for Lake Corridor traffic to reach the US75/SH 121 corridor.

Community Association, Inc.**

6201 Virginia Parkway
McKinney, Texas 75071
Office (214) 733-5800
Fax (214) 778-0595

April 7, 2019

To: Mr. Stephen.Endres@txdot.gov

As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9417 residences of Stonebridge Ranch and its 36,000 residents who live in McKinney.

In a unanimous vote, we stand in agreement along with the 381 residences in the Tucker Hill Homeowners Association and its 900 residents, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor.

We hereby make an official statement in support of either bypass Red Option-B (our preferred option) or Red Option-E and oppose bypass Red Option-A or the green alignment of widening 380 or converting it to a limited access freeway.

Options B or E are the most viable, least expensive and least disruptive to businesses and homes along 380 when compared to widening 380 (the green option).

If Highway 380 (the green option) were implemented, according to TxDOT's own numbers, It will destroy nearly 200 businesses and homes along the 380 commercial corridor including all of the existing businesses on the four corners at the intersection of Highways 380 and 75, and impact the historic and empowerment zones in McKinney. This will result in a significant reduction in the sales and property taxes to the City of McKinney along with bringing an increase in traffic and noise to the already developed housing subdivisions that abut 380 with more to come.

As to the detrimental impact on Stonebridge Ranch if 380 were widened, it would double the width of the current highway and bring significantly more traffic to the area. In addition to the increased noise for the hundreds of homes in Stonebridge Ranch that abut 380 on the Northern edge of Stonebridge Ranch, there are three roads: Lake Forest Drive, Ridge Road, and Stonebridge Drive that go completely

Stonebridge Ranch Community Association, Inc.

6201 Virginia Parkway

through Stonebridge Ranch and provide the only means between Hardin Road and Custer Road for getting to Virginia Parkway, Eldorado Pkwy, Custer Road and Highway 121. These roads were designed for neighborhood traffic and not arterial connectors to other major roads. That is the reason for our opposition.

If the proposed bypass (Red Option-A) that enters Highway 380 East of Custer Road were implemented, in addition to the above traffic problems, there would have to be a major interchange built at the intersection of the new six lane bypass and existing 380 which is already six lanes. This interchange would be right above the northern edge of Stonebridge Ranch just east of Ridge Road. It would have a very detrimental impact on both Stonebridge Ranch and Tucker Hill by bring a significant increase in traffic along with an increase in the air and noise pollution to our neighborhoods beyond any other option.

On the subject of impacts to non-profit organizations that would be affected, if 380 were widened (the green option), three non-profit organizations in McKinney would be **destroyed**: Life Path Crisis center which is Collin County's only in-patient mental health facility, INN STYLE which is the store that provides funding for the Samaritan Inn homeless shelter, and Cornerstone Ranch that houses adults with special needs. No one is speaking up for them. Since they are not backed by individuals with financial resources, they do not have the funds to mount a campaign to save themselves. It would be a tragedy to lose them. Ask yourself; is MainGate (who would not be destroyed) more important than these three entities who serve more individuals?

We also **support** business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be eliminated if 380 were widened (the green alignment option).

To reiterate, our Board, on behalf of our residents has unanimously voted to **oppose** the proposals to widen Highway 380 or convert it to a limited access freeway and **support** either of the alternative bypass route options North of Highway 380 that cross Custer Road and enters Highway 380 West of Custer Road known as Red Option-B or Red Option-E.

I SUPPORT RED OPTION - B OR RED OPTION - E.

I OPPOSE THE WIDENING OF 380 (THE GREEN ALIGNMENT).

YOU NEED TO BE AWARE THAT THERE HAS BEEN
A 1.2 BILLION IN PROPERTY VALUE ADDED TO THE CITY
OF Mc KINNEY IN THE PAST 12 MONTHS. MOST OF IT
HAS COME FROM THE REDEVELOPMENTS AT HADDIN AND
380. THE LOSS OF THAT PROPERTY AND SALES TAX
DOLLARS WOULD BE SIGNIFICANT TO THE CITY, THAT
WOULD HAPPEN IF THE GREEN ALIGNMENT WERE SELECTED.
THE BYPASS OPTIONS B AND E AVOID THIS PROBLEM.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community.

Subject: 380 Bypass Opposition- Property Owner directly affected

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres-

I am writing this email on behalf of the my family (the Reilly's) that lives at [REDACTED] In January 2018, while living in Stonebridge Ranch, my wife and I began to look for our dream property as we were getting ready to welcome our first child into this world. We had a few requirements:

- 1) We wanted to raise our children on multiple acres to resemble the semi-rural lifestyle that my wife enjoyed growing up in Missouri
- 2) We wanted to stay in the McKinney area as we have loved every second of living here due to the family culture, the people, and the living conditions.
- 3) We wanted to stay close to our church (First McKinney) as we are the Young Married Life Group directors of over 20 young couples that live in McKinney and I (Jordan) currently serve as a Deacon in the church.

As you can imagine, this was not an easy find and one that took much prayer and searching. We found this property in April and closed on it in August 2018. It was a huge blessing for our family for many reasons. It has everything that we were looking for: amazing neighbors, beautiful property, close to everything that McKinney offers, and we are able to continue to serve in our church and in our community (we love serving the less fortunate through Samaritan Inn and Grace2Go).

I (Jordan) was born and raised with humble beginnings in Detroit, Michigan and moved to Texas to work with IBM soon after graduating from the University of Michigan. I now run Global Sales for a Silicon-Valley based technology startup and it has provided the means to give our family the living arrangements of our dreams. However, if the 380 bypass is approved, all of this will sadly be for naught as it will run directly through our house.

We ask that you strongly consider keeping 380 on 380. We are one of the many families that would be directly impacted in a negative way if the bypass is approved and it breaks our heart as we have spend our entire professional careers saving for this property. It seems that every couple we speak to in our community or at our church is strongly opposed to the bypass.

We love this city, and pray that you and our other leaders would continue to do what is right for our community. We ask that you oppose the 380 bypass.

Sincerely,

The Reilly Family

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I live 600 feet from Bloomdale Road (CR123). When we bought our house, the city plans showed Bloomdale becoming a 6 lane road with a speed limit of 45 MPH. We were not expecting to have an 8 lane Highway with a speed limit of 75 MPH. There are a lot of homes right off Bloomdale that are in the same situation that my family are in. I think that it makes sense to fix the problem on the problem which would be US highway 380 and to start the construction of the collin county outer loop

Subject: Against Bypass alignments B & E

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDOT should do bypass option A that originates in McKinney.

The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion.

I hope TXDOT does not bow to special interests again and honors the **VAST MAJORITY** of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.

Sincerely,
Josh Brown

The revised alignment presented does not save Maingate.
Maingate is a staple to the area and should not be destroyed due
to poor planning in this area. 380 should stay on 380
as that was and is the central arterial roadway in the area.
Traffic noise, construction and increased volume does not allow
therapeutic horses in their native environment.
380 should stay on 380

I am against the ~~by~~ 380 bypass. Driving on 380 it is easy to see the communities that took 380 into account and set their communities ~~far~~ far back enough from the Highway. The fact that ~~A~~ City officials allowed businesses to continue to build so close to 380, is not a reason ~~to~~ for a bypass. Homeowners along the bypass route took 380 into account before buying/building their homes. Expanding the already planned outer loop would make more sense. ~~As~~ Instead of ~~potentially~~ ~~potentially~~ having to fight homeowners at every city ^{bypass} along 380, as well as business, we should look at the outer loop. ~~It~~

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Keep 380 on 380.

The bypass options disrupt areas that properly planned for development. Homeowners in Prosper should not have our home values negatively impacted, nor should we lose valuable tax revenue in the town of Prosper.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would be detrimental to the beauty of our community, as well as the homes of many of our fellow citizens. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

*Thank you,
Juli Westcott*

Subject: Against Bypass options B & E

I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDoT should do bypass option A that originates in McKinney.

The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion.

I hope TXDoT does not bow to special interests again and honors the **VAST MAJORITY** of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.

Thank you for your time and attention on this matter. I hope to hear that TXDoT is moving forward with the overwhelmingly supported green option of fixing 380 on 380 when it presents its final alignment option for 380 this Spring.

Sincerely,
Julianne Brown

COMMENT:

I support expansion of 380 into a highway with no bypasses. Think through what should be built now that could later be part of a highway system.

I am particularly against the Red Alignment B and E bypasses to the north because they would compromise a model therapeutic program, Manegait. This program is a national model engaging the community as volunteers and healing patients outdoors with incredible results for neural path development after traumas like a stroke or traumatic brain injury. Making 380 a highway would not compromise the program; building bypasses near or through it would ruin it.

If building the Green Alignment or Red Alignment A could jumpstart making 380 a proper highway, those would be acceptable.

Mr. Endres,

I am writing in support of the Green Alignment. It is the best option to ensure that the entirety of 380 can handle the future growth both residential and commercial. Driving down 380 from Preston to Hardin there is still a vast amount of undeveloped land zoned for both residential and commercial. Once that land is built out, the internal traffic along 380 will only get worse. More cars will travel to these locations, and more traffic lights will be placed which will result in significantly more congestion. The bypass will not fix the issue with people traveling to those businesses or homes. Fixing 380 now is the best option to handle that inevitable growth. It will absolutely save time and money in the long run and ensure that both Prosper and McKinney's future growth is guided in the appropriate manner. Fix the issue now where it needs to be fixed, rather than wasting time and money on a bypass that is severely limited in value.

Thank you for your time,

Kaitlyn Stroud

Red Option A would seem to be the least impactful as far as residential communities. Red Option B & E should NOT be chosen as these would ~~not~~ have a greater effect upon the residents of McKinney on the east side of Custer & the noise that it would bring to the residents of Whitley Place. The best option would be to keep 380 as 380 & expand it. I feel that any of the proposed routes would probably not be used. Few drivers are going to want to drive that far North.

I do not understand at this late date why we are now considering different alignments. Based on my current knowledge I am in favor of the .following:

- **The GREEN Alignment** that would expand 380 on the existing US. 380. This would not affect myself or the well established community I live in.
- **Red Alignment A** as a bypass highway.

In addition to myself,this would also ensure the preservation of Mane Gait which supports a population that is in need of these services.

TXDOT has already taken part of my property for the expansion of Custer which is in need of widening. I do not understand how any bypass next to Custer can possibly make any sense--two heavily congested roads practically on top of each other?

I appreciate in advance your review of this information,

COMMENT :

"I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

*Thank you very much.

1. I am concerned that the environmental impacts have not been studied re. the Red A,B,E & Green

2. Mane Gait is a unique & precious commodity - treating Artistic kids from the Metroplex - situating it even close to a bypass will make it non-viable as Artistic kids need quiet.

3. I was told tonight that homes within 50 feet of any bypass (i.e. Grove Cove in Heatherwood etc) would be "taken" & torn down by TxDOT. We have never been told that

4. KEEP 380 ON 380

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT

Mr. Endres,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.** These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A.** It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Best regards,

Kathryn Ryan

380 has been a U.S. Highway since 1952. People who chose to build their homes along a highway that has been slated on its current alignment on all the transportation/thoroughfare plans for the cities of McKinney, Prosper & Frisco. A little research by the homeowner on 380 would have informed them that it would one day be expanded

NAME:

Nathu See

ADDRESS:

CITY:

Attachment: (Written Comments Presented to Transportation Comm)

Kathy Seei

My name is Kathy Seei. My husband Bob and I have been citizens and homeowners in Collin County for over forty years. We currently reside in the Whitley Place neighborhood in Prosper just north of the two proposed by-passes through the Town of Prosper.

Ray Perryman was hired to complete an economic impact study and environmental impact studies have been completed for improving US Highway 380 in its current alignment through McKinney (land mass of 62 Square Miles). None of these professional evaluations have been completed for the two remaining proposed by-passes through the Town of Prosper (land mass of 28 square miles).

The Town of Prosper has passed resolutions opposing both proposed by-passes through Prosper. The first by-pass cuts through land zoned for single family residential on large lots and includes wetlands and cemeteries. The second by-pass eliminates \$8 million dollars in tax revenue for the Town of Prosper with the destruction of a Lowes Home Improvement Store and several other businesses. Without thorough economic and environmental impact studies, we can only project the total economic and environmental impacts to the Town of Prosper and our neighborhood just north of both proposed by-passes through Prosper.

For Prosper residents to be treated fairly, full financial and environment impact studies need to be completed for the by-passes through Prosper BEFORE the decision is made on a final alignment of US Highway 380. Only then can a fair decision on the true impacts of these new alignments to the Town of Prosper and its citizens be made. If the by-passes through Prosper are not serious contenders, please do not waste precious transportation dollars on these studies. Simply eliminate the suggestion of any by-pass through Prosper as the Town Council has made known through resolutions and use those savings to mitigate impacts to keeping 380 on 380.

IMPACT STATEMENT: Loss of Trust in TxDOT

My three brothers are all engineers – if I had been born 10 years later I would probably be an engineer. Engineers by nature stick with the facts and are resolute in championing the best solution. I am a politician by default. My impact statement today - a potential loss of trust in TxDOT. Reasons for loss of trust:

1. Both by-pass options have been formally opposed through resolutions by the Prosper Town Council but remain as alternatives to keeping 380 on 380
2. Both by-pass options have not been evaluated for economic benefit
3. Both by-pass options have not been evaluated for environmental impacts

4. Continued consideration of two bypasses through the Town of Prosper even though keeping US Highway 380 is currently documented in the comprehensive thoroughfare plans of Frisco, Prosper and McKinney (updated less than a year ago)

Since I am a politician not an engineer I can only imagine the reasons for the last minute addition of these two by-passes through the Town of Prosper that have not been fully evaluated:

1. Powerful elected leaders (former and current) who are personally impacted or whose political and powerful friends are impacted by improvements to the current alignment
2. Threat of political retribution for elected leaders at the ballot box if they support keeping 380 on 380

Please restore my faith that TxDOT is run by engineers not politicians. Do a fair comparative analysis or better yet just eliminate the by-passes from consideration and Keep 380 on 380 as all the affected municipalities thoroughfare plans dictate.

I support fixing 380 on 380 and strongly oppose any bypass options. All of the current bypass options go down Bloomdale Rd (CR123) which will have a heavy residential impact. In particular, Heatherwood and Bloomridge are sitting directly next to the proposed bypass. Our home is less than 600 feet away. We moved to McKinney to start a family and bought a house within walking distance of a school. We didn't move here to hear traffic and experience the other negative consequences of a 75 mile per hour bypass felt from our home. Although construction wouldn't start for years, the property value impacts on our neighborhoods would be immediate and it would likely be more difficult for individual citizens to relocate versus a business. Additionally, per the survey results, McKinney, PWSK and Frisco residents preferred to perform the work on 380. The current problems on 380 will not go away with a bypass. With the added growth as well as continued commercial options, even more traffic will be heading down 380 which means construction to make 380 safer and resolve traffic is inevitable. I support keeping 380 on 380 in addition to building the outer loop and expanding arterial roads. Please do not choose to impact a larger number of McKinney home owners by building an unnecessary bypass.

Dear Mr. Endres

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you.

My name is Kayli Self and I live at [REDACTED]. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US Highway 380. It is in my mind the optimal and most efficient way to route traffic through McKinney and Prosper. I feel a bypass is unnecessary and scar the beauty of the community. The GREEN Alignment will also help preserve a vital nonprofit organization in Collin County, ManeGait Therapeutic Horsemanship. This organization is so beneficial to many special needs people in the area, including my granddaughter. Both RED Alignments E and B will have a direct negative impact on ManeGait and lead to the destruction of their property and displace many users of this vital community service.

Thank you for your consideration.

Kayse Paul

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. There are 2 miniature horses that we raised and taught to drive a cart that were taken in by MainGait to be used in their program. They are thriving so well there, doing what they love. This program is extremely important to many families with children and some adults with disabilities and should not be disrupted in ANY way. We are friends with the founders (whom also have 2 more of our miniature horses) and their home and the horses they own would also be forced to move as they reside directly beside ManeGait. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

① One has to question the integrity of this process when the majority of Frisco, McKinney, and Prosper residents voted to improve US Hwy 380 and that seems to be ignored. Additionally, Prosper Town Council and Prosper ISD passed resolutions opposing any by-pass. Bill Darling of Mane Gait took a public position against a by-pass. Then TXDOT appears to do an "end run" around Prosper Town Council, PISD, and Mane Gait by coming up with Red Option "E". Why is TXDOT ignoring Prosper's sovereign rights as a Town? ② How does TXDOT justify proposing Red Option "E" to wipe out Lowe's, Taco Bueno, Papey's, Burger King (which generates \$4 million in tax revenue), along w/ the planned Kroger, in order to please Tucker Hill and Stonebridge Ranch? ③ These by-pass options reek of bending to political pressure brought by former Collin County Judge Keith Self (a Tucker Hill resident) who told TXDOT to investigate a Prosper by-pass and it was not a decision of the entire Commissioners Court. What pressure is also being brought by former Plano ^{MAYOR} Jack Harvard (owner of Papi's Pizza next to Tucker Hill) and who was convicted in Federal Court of fraud? What about Stonebridge Ranch HOA President (Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

I am employed by TxDOT John Deittonia who is the president of the Stonebridge Business Owners Association? Simply put, "Fix 380 on 380" and listen forming the majority.

I do business with TxDOT

I could benefit monetarily from the project or other item about which I am commenting to the residents

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

FROM THE FACEBOOK PAGE "Fix 380 on 380?"

Interesting question and two responses I just read:

Question: "If Option B (or E) goes through would the loss of the tax revenues from those businesses be enough to affect the PISD bond repayment? PISD is holding a bond election in May.

Response: PISD Bonds are repaid thru the residential property taxes. So yes a dip in those or decrease in the projected revenue would affect all of the bypass areas that are zoned for Prosper ISD. INCLUDING HOMES/LAND IN MCKINNEY if they are a part of PISD. PISD supports fixing 380 on 380.

Would it prevent it from being repaid, no. But it would definitely restructure the investments and land use for schools etc. PISD charges the maximum tax amount allowed in the state of Texas so no reduction is expected and no increase to the amount is allowed.

Like with the stadium PISD is frugal in its usage of the Bond funds, like waiting until the high school was at capacity before building the one at Rock Hill, so repayment will be greatly considered before spending or building new schools. Unlike Frisco that built while it has the right to and then schools sit empty for time until they can fill it.

Response: It will cost the school district a large amount in having to sell the land slated for the third high school and acquiring new land at today's market. They can't possibly build that school if the bypass goes in.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

My name is Kevin J Carley and I live at [REDACTED] I am writing to you in support of either the 380 Green Alignment or the Red Alignment A. My main reason for supporting either of these two options is that the other plans would have a major and catastrophic impact on ManeGait Therapeutic Horsemanship. This non-profit organization does amazing work for our community and changes the lives of children who otherwise are lost in mainstream America. The work they do in order to make children as well as adults feel that they are important and can ACHIEVE is immeasurable. I know this because I have a 42 year old son who has Cerebral Palsy and has been riding at ManeGait since it's opening. His life and that of many other riders revolve around that one hour lesson every week. He feels part of something special, not to mention the medical benefit he receives from the therapy.

You may say that they can move and adjust to a new location. Yes, they can. However (and I don't expect anyone to understand this, unless they have a child in the program) there is something magical about their current location. The peaceful tranquility is unmatched. The mature trees that surround the property, the open fields the livestock next door, and especially the familiarity these kids have come to latch onto. Sounds trite, but to ask some of these children to adjust to a new location could be devastating for them.

In summary, I hope you consider some of my points and choose the plan that will preserve a very very special place for some very very people.

Cordially,
Kevin J Carley

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Kim Williams [REDACTED]

COMMENT: I have been a McKinney resident for 18 years and have been a volunteer at ManeGait for approximately 5 years. With the exception of a brief stint living on the west side of central expressway, I have always lived in the historic district. McKinney is special, both the downtown area and the city as a whole, since it still retains its small town feel, while growing at a rapid pace. I understand that Collin County is projected to grow by another 2 million residents in the next 25 years, and with that comes the need to expand our infrastructure and roadways. I support the GREEN alignment plan between Coit Road and FM 1827 for the expansion of US Hwy 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community; a community that is truly Unique by Nature. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on MainGait, leading to destruction of this exceptional property and displacement of their vital community service.

Much appreciation for your consideration of this request.

Take care.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Please keep 380 on 380. Our family has special needs children & moved from California to Prosper, TX after finding it a quiet place to help calm our depressive son's autistic behaviors. The noise from a freeway previous caused our family extreme stress. We carefully selected Whitley Place based on land development plans for the town to provide lower density housing - minimizing nearby noise & congestion. We used 10 years' savings to make this possible. It has been life transforming. Please don't destroy this child's refuge.

Hello,

I am emailing you to tell you that I support the **GREEN** alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. **GREEN** alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your time,

Kristi Hooten

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

To: Stephen Endres
Subject: US 380 MAPO (Prosper) Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, Texas, I STRONGLY SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A.

I STRONGLY OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.

I also very STRONGLY OPPOSE Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road - right in the backyard of thousands of homes. The Green Alignment and Red Option-A will depress home values in that area. If this option were implemented, it would have a detrimental impact on both Stonebridge Ranch (with 10,000+ homes) and Tucker Hill. It would require that a large interchange be constructed at US 380 on the northern border of Stonebridge Ranch, creating an eyesore for adjoining neighborhoods and decreasing the home values of neighbors in our community.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

It's unfortunate that a few homes and properties may be lost with bypass options, but widening 380 and putting in interchanges in the middle of thousands of homes and businesses will destroy home values, tax revenue and jobs in our city. It makes no sense for the future of our community.

Sincerely,

Kristin Welsh

From a monetary standpoint, option B or E make sense. However, this is only true due to McKinney's horrible lack of foresight in allowing businesses and communities to be built so close to 380. Or perhaps, they have "won the game" since they are to this day approving businesses and communities to be built on 380. They beat Prosper to poor development, so Prosper and its residents are getting screwed. "Existing development" takes precedence over future development". So ~~that~~ that so by screwing up, McKinney wins and gets to put a bypass through Prosper, past my backyard, past my daughter's school. I feel betrayed and aghast at the poor planning on McKinney, Collin County and TxDOT.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

April 8, 2019

To: Stephen Endres-Texas Department of Transportation

My husband and I (Larry and Martha Garske) support the **GREEN** alignment option between Coit Road and FM1827 for the expansion of US Hwy 380. The **Green** alignment preserves Colin County's most prominent nonprofit organization, ManeGait Therapeutic Horsemanship. Both Red alignments E and B would have direct impact on ManeGait, leading to the destruction of this exceptional property and the displacement of the vital community service it provides for special needs people.

Our grandson, Gabriel Roberts, is a 19 year old with disabilities. He is non-verbal and cannot walk. The main activity outside of his home that gives him pleasure, is the Therapeutic Riding Program at ManeGait. His confidence, as well as muscle strength, balance and social skills have improved greatly because of this program. The love and care given to Gabriel by his instructors is very heart-warming and exciting for his family. The environment at MaineGait is fun and enriching for Gabriel. My husband and I have been with Gabriel at ManeGait several times. We see his enjoyment of this wonderful opportunity.

We have a serious concern regarding plans for the US Hwy 380 expansion and the potential impact on ManeGait. We pray that this beautiful land and caring community will be able to continue its mission to provide for the needs of all special needs people.

We ask that ManeGait be able to continue the services provided for our children and grandchildren for many years to come by choosing the **GREEN** alignment option.

Sincerely,

Larry and Martha Garske

I am against the proposed 380 bypasses. When we moved to McKinney from Dallas we knew that 380 was not going to be able to handle the growth. We knew to look for our home away from 380. This was almost 10 yrs ago. If we knew this, the city had to know this as well. Citizens should not be losing their homes, playgrounds, schools because of the city's poor planning. I do not want to see a concrete jungle from my window, I dont want to see smog as I walk my son to school. A bypass is a bandaid. ~~It~~ It will not fix / cure congestion 380 will have to be expanded - just do it now!!

Build out the outer loop. Fix arterials. Keep 380 DN 380 is the right thing to do

COMMENT:

- 1. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of the community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.*

The Texas Department of Transportation is seeking your comments on the proposed project. All written comments are welcome. All written comments must be postmarked by April 12, 2019.

Please Print 380 MUST BE FIXED ON 380! TOO MANY PROTECTED HOMES
IN THE MCKINNEY WATERSHEDS WILL BE IMPACTED BY THE NEW
CUSTER ALIGNMENT. MANDALAY WILL BE NEGATIVELY IMPACTED
WITH 6 LANES OF CUSTER AND TWO BYPASSES SURROUNDING IT. THE
LOSS OF TAX REVENUE TO PROSPER IS APPROXIMATELY \$4 MILLION
PER YEAR. THAT SUM WILL NEED TO BE MADE UP BY CITIZENS.
FIX 380 ON 380!

I support the GREEN alignment because it is the optimal and most efficient path for E/W traffic through McKinney and Prosper. It also preserves ManeGait Therapeutic Horsemanship, one of Collin County's most prominent nonprofit organizations. A bypass is unnecessary and would scar the beauty of our community, and would also directly impact ManeGait, leading to destruction of this exceptional property and displacement of their vital services.

Thank you,
Lauren Palmer

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Please Print I am writing to express my strong support of the Red Bypass B. I am a longtime McKinney resident and am very aware of the dire need for more traffic options for the ever-growing population of Collin County and the surrounding areas. The Red Bypass B disrupts the fewest homes and businesses and offers a great additional option to the 380 highway. If 380 was widened to a LAR it would eliminate my home and also my business. Please consider my plea in favor of the Red Bypass-B

Stephen,

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Here is why:

1. I have lived in this area for almost 25 years. I opened the first Target store on the East side of 75. When that store was open in 1994, 75/380 was a nightmare back then. You have allowed McKinney to grow without looking at the future. I believe that McKinney should have to figure out what to do with 380.
2. Taking away Mane Gait from these riders and volunteers would be devastating. My daughter has been riding out there since the second session. The programs that Mane Gait provides help kids and adults feel normal even if it is for an hour or a few hours. Even being a parent taking her out there makes me feel less stressed and I can have a watch her ride and compete like a normal person.

If either Alignment E or B ends up being the final option, you will not only displace the residents and business, but you will also displace many riders who thrive out at Mane Gait.

An easier way to ease some traffic along 380 would be finishing building out Wilmeth and Bloomdale. Most traffic from the north are using these back roads anyway. And why would traffic cut through go north to east and west as bypass? It does not make sense.

To put a face to the people that love Mane Gait and all it offers, here are a 2 pictures of the Special Olympic area horse show from last weekend.

Thank you for reading this email and I hope and pray you don't take this wonderful place away and allowing some feel normal for an hour or two a week.

The new option along Custer that takes out homes still impacts Mane Gate Farm & the beautiful ponds. It runs along Custer for a long way & then cuts over to howes. There will be a lot of traffic backup in peak hours sending lots of polluted air to Whitey Place & the homes around which right now have minimal traffic impacts & pollution. Please give up this idea of cutting thru Prosper. The tax revenue loss to Prosper will be ~~significant~~ significant. There is an area that totally by passes Mane Gate further to the south & would affect only a corner on 380 & Custer & leave howes intact.

RE: Proposing the "ByPass" becoming the main U.S. 380 and the current 380 becoming Business 380 -

We lived off the current Bus 121 in Lewisville during the time that the current 121 was built & completed. When we moved in, this thoroughfare was a thriving business district. Within a few years of becoming Business 121, businesses closed leaving empty buildings. The area became quite economically depressed.

Collin County paid dearly for an economic feasibility study

Keep 380 ON 380 / It will only get more dangerous if \$ is not used to improve it, rather than being distracted by a bypass. Please don't turn our roadway system into LA South, a mess of political and distracted planning. Frontage Rd & Raised 380 at intersections is best as your own study shows.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

We have personal connections with ManeGait. Having grown up with Priscilla Lewis Darling, co-founder, we also have volunteered with our therapy miniatures for many years at events. ManeGait now is home to two of our miniature horses and this possible move would affect them as all the horses to readjust to different surroundings, which in turn would affect how the horses react with the many people with disabilities that attend and depend on the interaction with the horses.

Please do not choose a way that would displace ManeGait or put them in harms way. This facility has been and continues to be a vital asset to McKinney and surrounding areas.

Thank you for your time and listening to a desperate plea to help save ManeGait.

Dear Mr Endres,

I live at [REDACTED] and support the GREEN alignment for the expansion of US HWY 380. It is the most efficient path through Prosper and McKinney and would not ruin the beauty of the area north of 380 where the bypass is proposed. My young children (4 months, 3 years, 5 years) would be unsafe with the proposed bypass as we travel to elementary school right along one of the proposed bypass routes. We just moved up here and the reason we chose it was for the peace, quiet, safety and good schools. A bypass right in the middle of it all would really change the quality of life drastically. Additionally, the bypass would have a crippling negative impact on ManeGait and the amazing services it provides to our community. ***Please choose the GREEN alignment for the US HWY 380 expansion.***

Thank you for your time and consideration.

Subject: Green Option for US 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres and the TXdot committee,

I have been a donor to ManeGait located in McKinney, Texas for years. My family personally knows multiple families who have loved ones that have greatly benefitted from the therapy ManeGait provides. This specialized therapy has been life changing for so many individuals.

Therefore, I am in support of the Green Alignment which will preserve ManeGait's ability to continue to help countless individuals (Veterans and children and adults with special needs).

The Green alignment between Coit and FM 1827 for the expansion of US Highway 380 is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. Green alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment B and E would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

For those making the final decision, please allow ManeGait to continue the healing of their riders in an uninterrupted atmosphere...lives are counting on it.

Thank you,

Lorri Deems

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

My name is Lydia Gober. I am a resident of McKinney at [REDACTED]. I live near Hwy. 380 and I hear it's noise and see the high traffic. Expansion of this roadway may help traffic, but it could destroy beautiful small farms and this very important resource of ManeGait. Many have moved north and west only now to hear that it could all be interruptive to a hoped-for scenic living experience.

As the least disruptive expansion, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your attention.

Sincerely,

Lydia Gober

The yellow arrow points to the NW corner
of my property.

B. H. & Lynette Terrell

April 5, 2019

MAPO COMMENTS REGARDING BYPASS OPTIONS RED B AND RED E

My name is Lynette Terrell. I live in WALNUT GROVE a [REDACTED] I am adamantly opposed to any bypass. Every time TXDOT has asked for comments I have always said that I enthusiastically support keeping 380 on 380. I remain steadfast in my belief that the GREEN alignment is superior to any bypass options you have suggested. 380 already has a very large footprint. It seems only logical to expand 380 in its current alignment. Creating a bypass would destroy homes, divide neighborhoods, and create a maze of concrete going through the Northwest Sector. Not only my neighborhood but MANY other neighborhoods would be affected. Even though a property may not be "impacted" by your definition, the quality of life of having an LAR literally feet from your door is devastating.

I particularly am opposed to the Red options that that come into my neighborhood, Walnut Grove. The Red B option destroys MainGait, which is a wonderful facility serving many. Red B is also just a few hundred feet from me and directly impacts and displaces at 2 of my neighbors. The Red E option is even more invasive. It destroys Lowe's, enters Walnut Grove, and proceeds north while destroying several homes and properties in its wake. Even though it barely misses MainGait, it still has its effects of noise and pollution on the facility. As the bypass leaves the MainGait are, it destroys more, long-established homes in Walnut Grove. From my northwest property line, I would be approximately 100 feet from the edge of Red E (please see the attached map.) It seems with every new potential alignment introduced, more homes and properties are compromised.

I notice that Red E ROW has been reduced to a narrower footprint. Since this engineering doesn't seem to be objectionable to TXDOT, why not apply the same concept in front of Tucker Hill and Stonebridge. I know that you are already considering it on the GREEN alignment. By adopting the GREEN alignment, you would be GOING BY neighborhoods, not THROUGH them. Any objections by Tucker Hill and Stonebridge could be mitigated by landscaping, berms, noise abatement design, cantilevering, etc. It wouldn't take much extra ROW to make that work. This seems a far better option than cutting across Walnut Grove, a neighborhood that has been established for well over 40 years. I, myself, have been here since 1978.

I went back and listened to the McKinney City Council Work Session, April 30, 2018 and was rather taken with the words of Councilman Rogers while addressing Mr. Endres during a presentation of bypass options looping above the existing 380. I quote, "One other quick question, the loop that goes out, to me, that's where McKinney is growing and if you've ever driven out there, have you personally driven out there? That is magnificently beautiful property and land through there. To me, if you take a limited access highway going through that pristine beautiful land through there, I think it devalues everything that it goes around. Limited access highways do not bring commercial stuff in that area. I look at the limited access around Denton; there are some schools, an old nasty highway. I picture that going through the north pristine side of McKinney, and that is the jewel of McKinney going forward to be able to build that and I don't see that even as an option when you look at where McKinney is growing and how it should grow. That's why my thought, as my good friend on the council, La' Shadion, says, the best way to get somewhere is a straight line. So, that's the other thing I'd like you to consider, the kind of damage you will do to some of the rolling hills and beautiful areas of McKinney." At this point Mayor Fuller interjects, "and Walnut Grove".

One of Mr. Rogers's statements particularly resonates with me regarding the fact that an LAR devalues everything that it goes around. This is so true especially in Walnut Grove. Please don't change the character of our neighborhood.

One last thought – please encourage McKinney to build out the arterials, particularly east and west. Currently there are NO arterials that connect Custer to Highway 75. There are three east/west arterials in the works but they really need to be built ASAP. If the north/south arterials were also expedited, traffic would be greatly relieved on 380 IMMEDIATELY!

Lynette Terrell

It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Furthermore, I would like to add that I was a volunteer for a few years at ManeGait and the impact ManeGait has on both the riders and the volunteer members is truly amazing. I would really hate to see the original location be torn down, especially for the risk of the business shutting down completely. Seeing the love these children have for the horses and all of the hard work people do to give back is inspiring and heart warming! Giving special needs children the opportunity to enjoy learning something new and enjoy the outdoors is incredibly important for them and this is such a special environment. So much time and care is put into training the animals and the people and maintaining this wonderful place and I would hate to see it uprooted from where it all began!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Please say 'NO' to 380 Expansion.

~~Please~~ choose Option Red B as the bypass route to 75.
 The numbers, in terms of actual cost (\$192M) alone should be reason enough (as compared to Red A & Red E).
 The disruption along 380 (if it is chosen) would be horrendous, expensive, and really, long term, how would any expansion of 380, beyond this development, ever be practical???

As a resident of Starbridge Ranch in McKinney, I DO NOT want to experience increased traffic, noise, most especially decreased property value, if 380 is expanded. A BYPASS would not only allow for improved traffic flow on 380, but would save ~~hundreds~~ millions of dollars, both at completion and in the distant future when inevitable development & traffic would ~~necessitate~~ necessitate further infrastructure development.

I like the original Red option B over E, but either of these are better than the other alternatives. I am in-favor of a bypass route instead of focusing on 380 because of the lower overall impact, lower cost, and the additional throughput that a bypass provides through the County.

Please don't let the "No Bypass" supporters make your decision. They want the 380 only option just to keep the freeway out of their backyard. The West bypass routes, B or E, are the least disruptive overall.

with the outer loop on the near horizon, has sufficient study been applied for the long-term benefit and VALUE of a bypass?

More effort should be focused on enhancing 380 for local traffic. The transportation traffic will be attracted to the outer loop.

There is a high probability the ~~the~~ bypass will not serve its ~~intended~~ intention once the outer loop is built, and will become expensive maintenance in 10 years

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. The other options for alignment would shut down this organization that is extremely valuable to our community.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I support the 380 on 380 (Green) alignment. While construction costs may be more to upgrade the current 380, it does not disrupt people's lifetime homes or ^{have} the environmental impact that the by pass options threaten.

^(the green option) This is certainly going to impact business on 380, but history and statistics tell us that businesses will return bigger and better within a very short period of time.

Please consider that the same is not true of the environment or individual's homes and lives!

Please vote for 380 on 380 (Green) option!

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

You can tell from my address that I am one of those affected property owners with the new red option E. I and my husband strongly oppose ANY bypass north of 380 and recommend improving the existing alignment of 380 at least from Prosper to 75. I understand this is viable and want this to be your focus going forward. Why do you want to destroy my neighborhood (Walnut Grove) that has existed for decades?

Please keep 380 on its current path solving the transportation issue with your engineering genius I know you have.

Sincerely
Mary Nugent

Proposed Wording for US 380 MAPO Comment Form

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

MaryAnne King
[REDACTED]
[REDACTED]

Please note, I strongly prefer RED Option-B as it appears it will have less impact on currently developed residential and business areas and once this work is undertaken and complete new development can occur in accordance with the new roadway structure.

Thank you,

MaryAnne King

Stephen,

I support the GREEN alignment between Coit Road and FM1827 for the expansion of US HWY 380. It is the optimal and most efficient path for the east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent non profit organizations ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

We attend the Gala at the Gait every year and see how much good this facility does for the people that use its services. My daughter also volunteered there and it helps kids see they can make a difference in other people's lives as well.

I'm a fan of Red E or Red B. Less impactful to my neighborhood, Tucker Hill, but also less impactful to commercial along 380 east of Custer.

It seems like a no-brainer to champion the least impactful choice. ~~Red A also takes that territory~~

~~and does another thing, the best scenario had regular~~

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Sincerely,

Matt Ludwick

Please Print PLEASE, FIX 380 ON 380. PROSPER IS APPROPRIATE TO A BYPASS
OF ANY SORT. THE CURRENT REALIGNMENT IS GOING THROUGH
PROSPER WOULD BE DETRIMENTAL TO PROSPER'S TAX BASE BY
REMOVING NUMEROUS BUSINESSES AT 380 AND CUSTER. TAX
REVENUES OF \$14 MILLION WOULD BE LOST THROUGH THIS ALIGNMENT.
COUNTLESS EMPLOYEES OF THOSE COMPANIES WOULD BE
DISPLACED. ADDITIONALLY, THE BYPASS WILL NOT BE UTILIZED BY
COMMUTERS AS EXPECTED AS IT WILL TAKE DRIVERS OUT OF THEIR
WAY. FIX 380 ON 380!

Hello,

I recently moved to the McKinney area. As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.** These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A.** It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road right in my neighborhood. The Green Alignment and Red Option-A will depress home values--including mine--in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. Please enact one of those two options.

Thank you for your consideration,

Maureen D. Dudley

COMMENT:

I have read about the proposed alignments the Texas Department of Transportation is considering between Coit Rd. and FM 1827. I support the GREEN alignment for the expansion of US HWY 380. I believe it is the most efficient path for traffic through the cities of Prosper and McKinney, as well as the optimal choice. I believe a bypass is unnecessary. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Which provides services to children and adults with disabilities as well as veterans and first responders. Both Red Alignment B and E, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of the community. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. By keeping the traffic on 380 you will be assuring a safer route for volunteers, clients and animals of ManeGait. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. My daughter has volunteered there for 5 years and she has witnessed the tremendous need this organization serves and the amazing impact it has on peoples lives. This is one of the most well run non-profits I have been involved with and it would be an unthinkable mistake to displace such an incredible charity.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

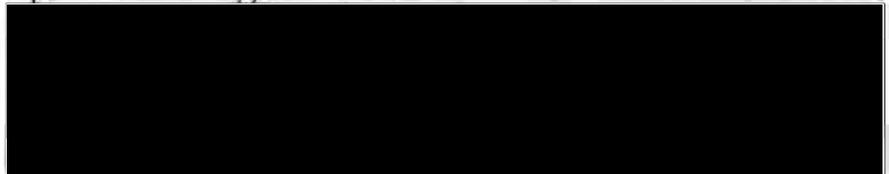

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Subject: Mane Gait & 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am writing to say that any bypass route that comes through or near Man Gait will be doing a large disservice to the area. They provide a much needed service to veterans, autistic children and adults and others that benefit from the therapeutic horsemanship facility. The noise level would be detrimental to the people using the facility.

Due to this I prefer the green option or Red alignment A. Mckinney wants a bypass so keep it in Mckinney.

Thank you for your time

COMMENT:

Stephen, for the life of me I cannot understand why we are considering building a road into the countryside as a bypass. Such a waste of land and negative impact on our properties.

Maybe you are in Austin and don't realize that this area the state wants to build into is beautiful private property. You have got to be kidding me. Someone in Austin who thinks this is a great idea doesn't live up here and has no idea the impact; it just looks interesting on paper. DO NOT DO THIS. It brings traffic and highway noise into new areas of the community! All of us who live here chose it because it is at the end of the metroplex and has a great feel – running highways through that area is STUPID. There is no other way to say it. Just build an overpass on an existing road like EVERYWHERE ELSE in Dallas. What are we getting "creative" out here??

I am **STRONGLY petitioning for the GREEN ALIGNMENT** which expands 380 onto the existing 380 corridors. You can call me anytime to discuss – [REDACTED]

Thank you for all your time and effort on the 380 bypass issue.
I recommend bypass option B, west of Luster, as the least disruptive and least costly alternative. It will also be the least disruptive to homes and access to major neighborhoods.
The financial impact on the City of McKinney if 380 was to be widened from Luster to US75 is immeasurable but significantly higher than all other options.
PLEASE KEEP THE BYPASS WEST OF LUSTER.

Please Print My name is Michael Galli and I own & live at the home located at [REDACTED]

I just invested hundreds of thousands of dollars to get away from a highway so that my family can live safely away from noise and air pollution while resting peacefully in Erwin Farms for many years to come. I made my investment in my family's future based on these facts, and now an intrusive alternate bypass option threatens that. Please think about the millions of dollars residents like me invested in this area based on these assumptions. Now please realize that the residents & businesses on US380 made these same respective investments and assumptions, but accepted doing so ON 380. I'm in support of an alignment that stays on the current footprint as planned.

The new alignment 'E' still encroaches on the property of existing residential and future residential sites. The total disruption to future growth by moving 380 off of Hwy 380 has a greater negative impact on future growth and division of property. Expanding 380 on the existing Hwy 380 allows for cities to use the land that is being proposed for 380 realignment paths to benefit their future planned town growth. In summary Expanding Hwy 380 on the existing Hwy 380 is the best option for all involved.

Dear Stephen,

I hope that TX DOT will strongly co sided the Green Route or Option A as I don't want to affect the great work that Mainegate Therpeutic Horsemanship does for the local community. I also don't want major disruptions to my community for the benefit of only the residents and people who work in McKinney. I think it makes no sense to destroy existing businesses or lower property values in the Prosper area for the sake of convenience.

Thank you in advance for your consideration of these requests.

Sincerely,

Michael L. Crowder

Subject: US 380 MAPO Plan

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Red Option-B bypass alignment option**. This option is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option when compared to the cost of the other alignments.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A**. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B is the best option to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you for the opportunity to offer my opinion and your consideration of my opinion.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Please use my attachment as my stand on the US 380 bypass issue.

I really can not believe that anyone would believe that destroying businesses, non profit org., and homes along 380 would be better that a by pass that goes through mostly undeveloped areas. I understand that it does effect some homes and businesses on long the by pass route, but those are far fewer.

380 is A great MAJOR ROAD that allows traffic to flow. Do NOT re-DIRECT TRAFFIC off 380. This does NOT improve TRAFFIC flow. The ENHANCEMENTS made @ Preston & the North DALLAS Toll Road ARE MUCH MORE Effective - Efficient ways to Move TRAFFIC.

NAME/ADDRESS: Michele Huiatt - [REDACTED]

COMMENT: I support the Green Route of expansion of 380 on 380. It is the most efficient way to go east/west bound through the cities of Prosper and McKinney. Nobody wants to travel further out of their way, a straight shot on 380 is the most efficient of everybody's time. It would also preserve the beautiful land that people moved here for and save the ManeGait facility which is extremely beneficial in the community.

Sincerely,

Michele Huiatt

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I am strongly in favor of the Red Bypass B. It is the option that offers the fewest disruptions to residential and commercial properties and makes the most financial sense.

It is obvious to me that a bypass is essential to maintain the ~~residential~~ homes and businesses along 380 and also provide an alternate to 380.

The city of Prosper is trying to not compromise any property at all but we know that this is a regional issue not a city one and the Red Bypass-B offers the fewest casualties.

Please consider my plea - Red Bypass B!

Keep 380 on 380. Answer to the will of the majority and not a handful of politically connected people. Do not upset people's lives and homes. McKinney should not have allowed businesses nor homes to locate so close to 380. Poor planning on the developer - (money#)

Please EXPAND the Highway ON 380 AND DO NOT CREATE A BYPASS. I understand that there are business that will be affected and they will be able to relocate. There are hundreds of homeowners that purchased their house for their families. THEY chose a location AND to have a 6 LANE Freeway in their backyard a vicinity will affect their VALUES & LIFESTYLES. Homeowners that purchased in Tucker Hill + the North side of Stonebridge were aware there are close to a highway when they made THE DECISION. STAYING ON 380 is the best, most economical ALTERNATIVE

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

WE LIVE IN WALNUT GROVE ON CUSTER RD. AND DO NOT WANT ANY BYPASS. OPTION "E" WOULD WIFE OUT MY HOUSE AND PROPERTY VALUE AND ~~THAT~~^{THOSE} OF MY NEIGHBORS.
WIDENING 380 ^{ON 380} IS THE BEST-LONG TERM, WOULD TAKE OUT BUSINESSES SHORT TERM, BUT WOULD PROVIDE FAR GREATER BENEFITS LONG TERM.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

COMMENT: I support the green alignment in Prosper and McKinney. I live in Whitley Place and purchased my house in the neighborhood because we knew where they proposed the highways to be. The green option is the fastest from point A to B. Also, McKinney's lack of planning on 380 should not make Prosper suffer. Thirdly, some of the alignments would affect schools that Prosper ISD has planned for. Fourthly, the bypass options would effect Main Gait, a prominent non-profit. The bypass options also affect the distance between highways when the new Collin County loop is built(not being the suggested 5 miles apart). In summary, the green route through Prosper and Mckinney makes the most sense.

Thank you,

Mitch Phillips

We are very concerned about the bypass running too close to Whitley Place. The noise & disruption to our development, not to mention the increased crime that a freeway brings is not acceptable to us. We therefore must say we don't think the new segment you've proposed (E) solves the problem. It only causes problems for us. We ask you to keep 380 on 380

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

380 should be fixed on 380 in its current alignment. the entire "Bypass" idea makes no sense ~~any sense~~ to most because the green alignment (fix on 380) scores higher from a safety aspect, most drivers are headed south to get to 75/south and won't take a Bypass going in the opposite direction and the number of homes you would impact is outrageous. the town of Prosper will NEVER agree to this. Please fix 380 on 380. It only makes sense.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

I am Neeraj Chaurasia, living in Robinson Ridge (North). I would like to share my view on proposed two 380 alignments.

I bought this house around 2 years back and selected this area so that i can live at a peaceful place with out traffic noise and lots green space. After looking the proposed 380 bypass option it looks like that highway will pass just 100-200 meters from my house. It will be very difficult to live in this noisy environment.

Also I feel that in case of 380 bypass there will be lots of hops (Not straight road), which will increase commute time/distance.

380 bypass will also affect many families and communities living in affected arias then improving existing 380.

I would also like to add that due to 380 bypass my house prices will go down and I will be in loss once 380 bypass will be constructed.

To conclude, I would like to register my vote for improving existing 380 alignment and not to go for 380 bypass.

Sincerely,
Neeraj Chaurasia

Though I am a resident of Stonebridge Ranch, I do not agree with their proposals. SRCA has spent a lot of money, money taken in from dues that I pay, to lobby for different routes. Several of their suggestions are not taking into account the impact it will have on other communities and non-profits. They have a selfish goal, and quite frankly I don't believe their concerns of a negative impact on Stonebridge Ranch are founded.

Though I know it is more costly and will impact businesses that have built out close to the current 380 HWY, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. To me it is a more optimal street, and quite frankly provides access to the new HWY to more individuals. The Red paths to me really provide little improvement in traffic since it in essence bypasses a good section of HWY that already has heavy traffic. The green path is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Hello,

I am sure you have had a wonderful time sifting through the emails related to each proposal for the potential bypass. I am a resident of northern McKinney (StoneBridge Ranch) & would like to cast my vote/opinion.

I vote for Red Alignment B

It has the least impact on home/business owners and bypasses the largest chunk of HWY 380. Not to mention, this option should reduce the daily headache of commuters once construction starts.

I wish you the best of luck!

In Good Health,
Nicholas Pitts

COMMENT:

Stephen, for the life of me I cannot understand why we are considering building a road into the countryside as a bypass. Such a waste of land and negative impact on our properties.

Maybe you are in Austin and don't realize that this area the state wants to build into is beautiful private property. You have got to be kidding me. Someone in Austin who thinks this is a great idea doesn't live up here and has no idea the impact; it just looks interesting on paper. DO NOT DO THIS. It brings traffic and highway noise into new areas of the community! All of us who live here chose it because it is at the end of the metroplex and has a great feel – running highways through that area is STUPID. There is no other way to say it. Just build an overpass on an existing road like EVERYWHERE ELSE in Dallas. What are we getting "creative" out here??

I can tell you from my experience in Utah that getting creative in these Rural parts just creates more headache. Stick with the plan that works.

I am **STRONGLY petitioning for the GREEN ALIGNMENT** which expands 380 onto the existing 380 corridors. You can call me anytime to discuss – [REDACTED]

Stephen

I know we have talked on the phone and also thru email throughout the 380 process. Wanted to send this email to further state my position on the last meeting. I am in support of the green route as this will save not only the viability of the north west corner as a much need tax base for the city of Prosper. Prosper does not have the population nor the land for a commercial tax base that the city of Mckinney does. This will be detrimental to the tax base and tax burden for the residents of prosper not to mention Prosper isd. Also the bypass routs B and E take out Maingate. While you might say E does not take them out it truly does and they will not be able to offer their services to the people who need it most. This is not just a building that they can relocate they need the land to make their mission work.

Nick

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Comments:

1st option: widen 380

No traffic on 380 will exit to
a Bypass through Walnut Grove!

~~If~~ You Really want to make a difference

2. Recommendation:

Connect to Prosper trails at Coit Rd. with (4 lanes)
East past Custer Rd on Bloomdale Rd.
all the way to 75 by the Court house.

3. Recommendation:

Widen Frontier Pky (FM 1461) (4 lanes) from
289 around to connect with Bloomdale

Note: Recommendations 2 and 3 would take most if
not all Prosper traffic, Cal. wa traffic and
a lot of Rural Denton County traffic
off of 380 to McKinney.

also Recommendation 2 would service
the 145 acres at (CR 123 & 124) scheduled
to be covered with apartments. also
would service all of Aikman property
on North side of Bloomdale Rd
also scheduled for multiple family
housing. It would also service the
future Prosper High School Campus already
purchased from Aikman property.

Thank you for Read

WHEN WILL THERE BE A PUBLIC HEARING ON THE NEW PROPOSAL?
SO THE ONLY CHANGE IS A SHARPER TURN TO CUSTER, SO IT NOW 'ONLY'
GOES THROUGH LOWES CORNER IN PROSPER. WHY DO YOU THINK THIS A
BETTER OPTION. THIS IS INTENDED TO BE A BYPASS FOR MCKENNEY & WHY GO
THROUGH PROSPER AT ALL? AND WHY DO WE NEED A BYPASS ANYWAY?
THE OUTER LOOP IS ONLY A COUPLE OF MILES FURTHER NORTH. WHAT IS WRONG
WITH 380 and the OUTER LOOP as the BYPASS FOR 380? DONT
UNDERSTAND THE NEED EXCEPT ~~JUDGE~~ JUDGE SELFISH DONT
WANT ANYTHING PASSING BY HIS HOUSE. JUDGE SELF IS A JERK
AND TXDOT IS IN HIS POCKET HOW MUCH DOES TXDOT CONTRIBUTE
TO HIS REELECTION CAMPAIGN??

As a homeowner and citizen of McKinney, TX., my preference for the 380 alignment would be Red Option-B or as a second choice Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

I totally OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes would decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

The interchange at 289 / tollway seems to work well now the project is complete. The tollway as an exit makes a great deal of sense. It seems logical that the same concept would be beneficial all along 380 going East from the tollway particularly at 75. Each major road (ie Lake Forest) could be an exit and some of current 380 could function as a service road in order to continue to access the businesses along 380 easily.

NAME: Resident of Walnut Grove

ADDRESS:

CITY: STATE: ZIP:

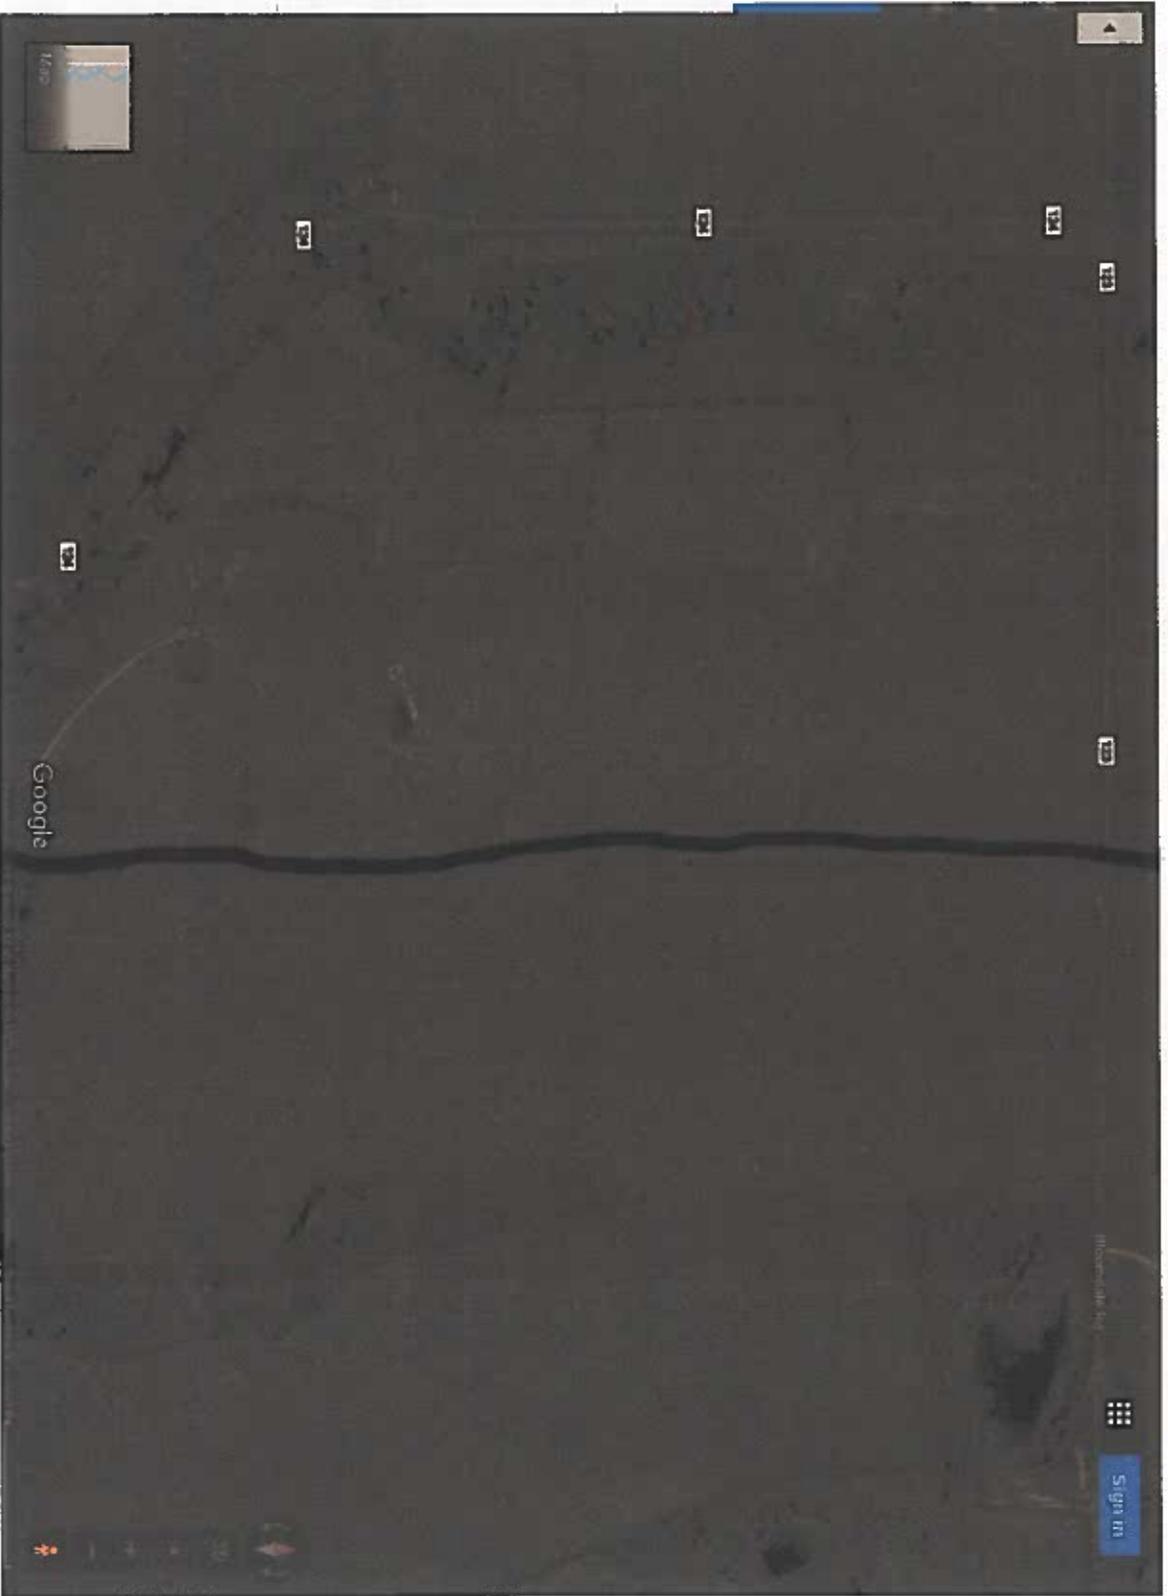

Cut North between the IaReservoir and Tucker Hill.

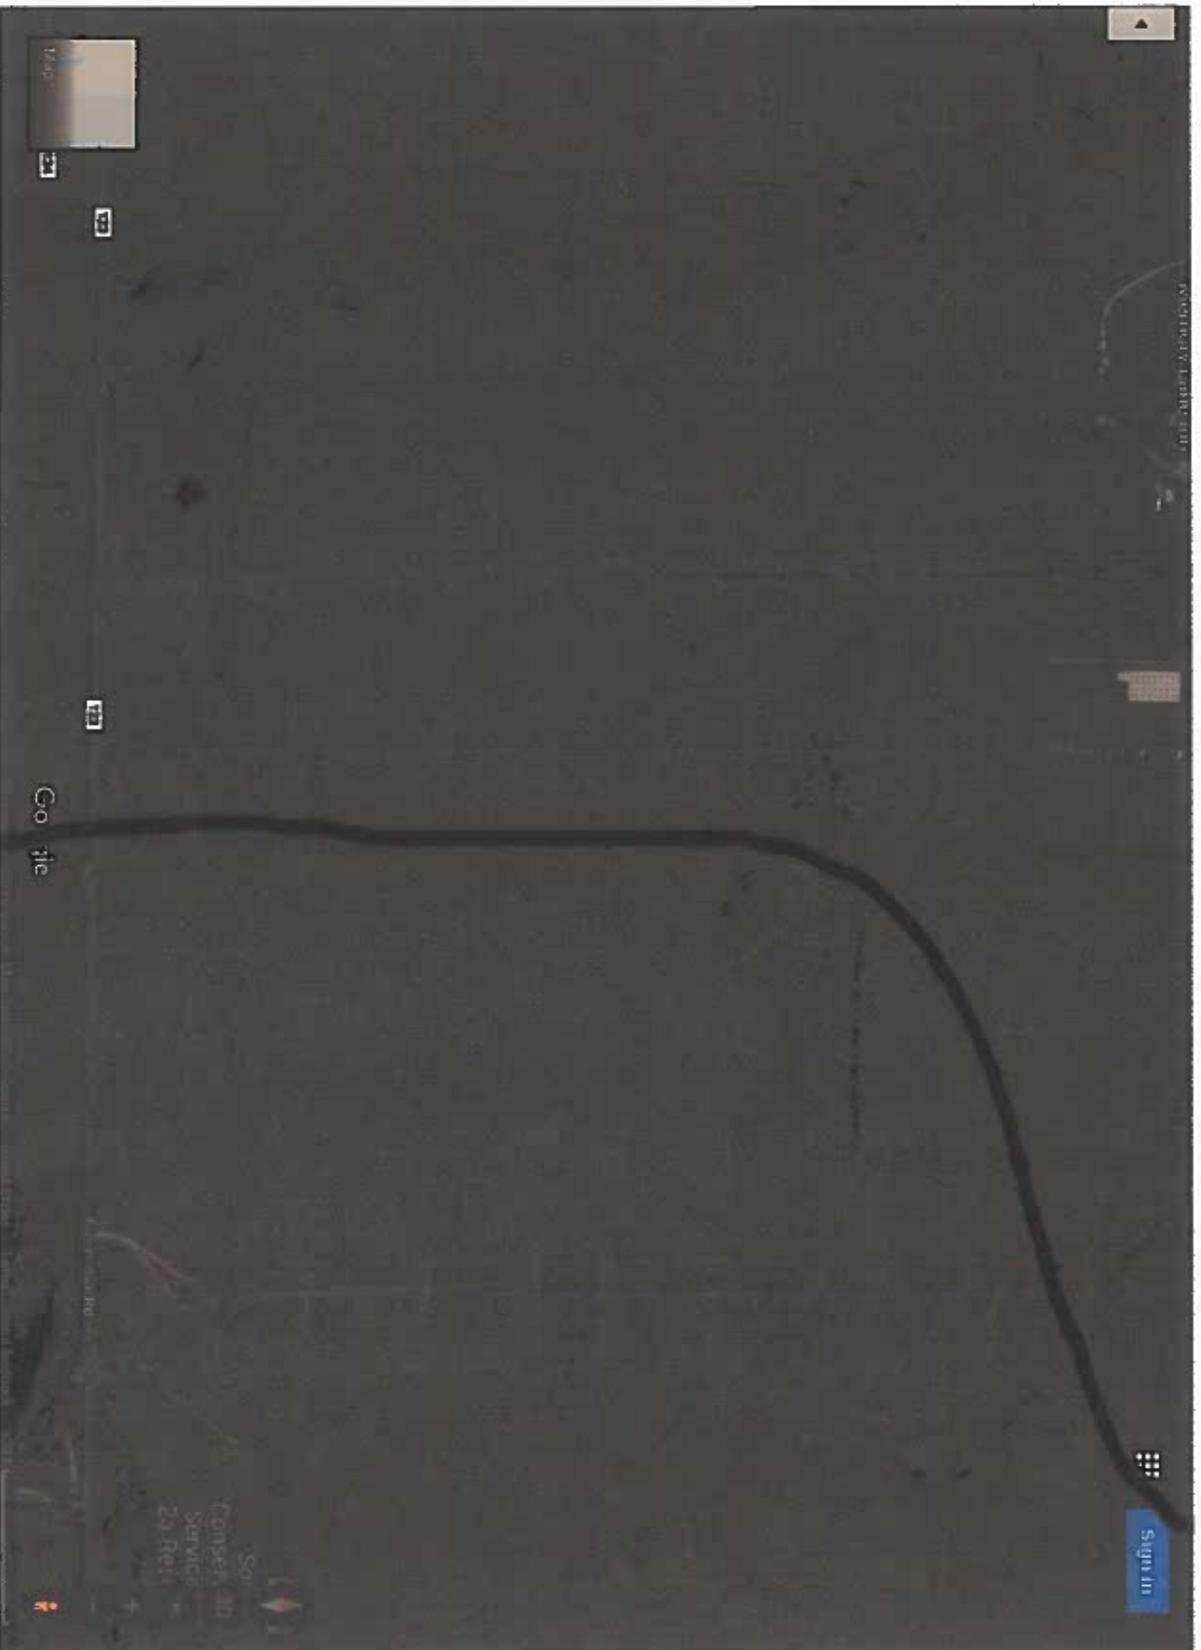

North between the two homes on FM124 and trying to follow property lines in the field boundaries.

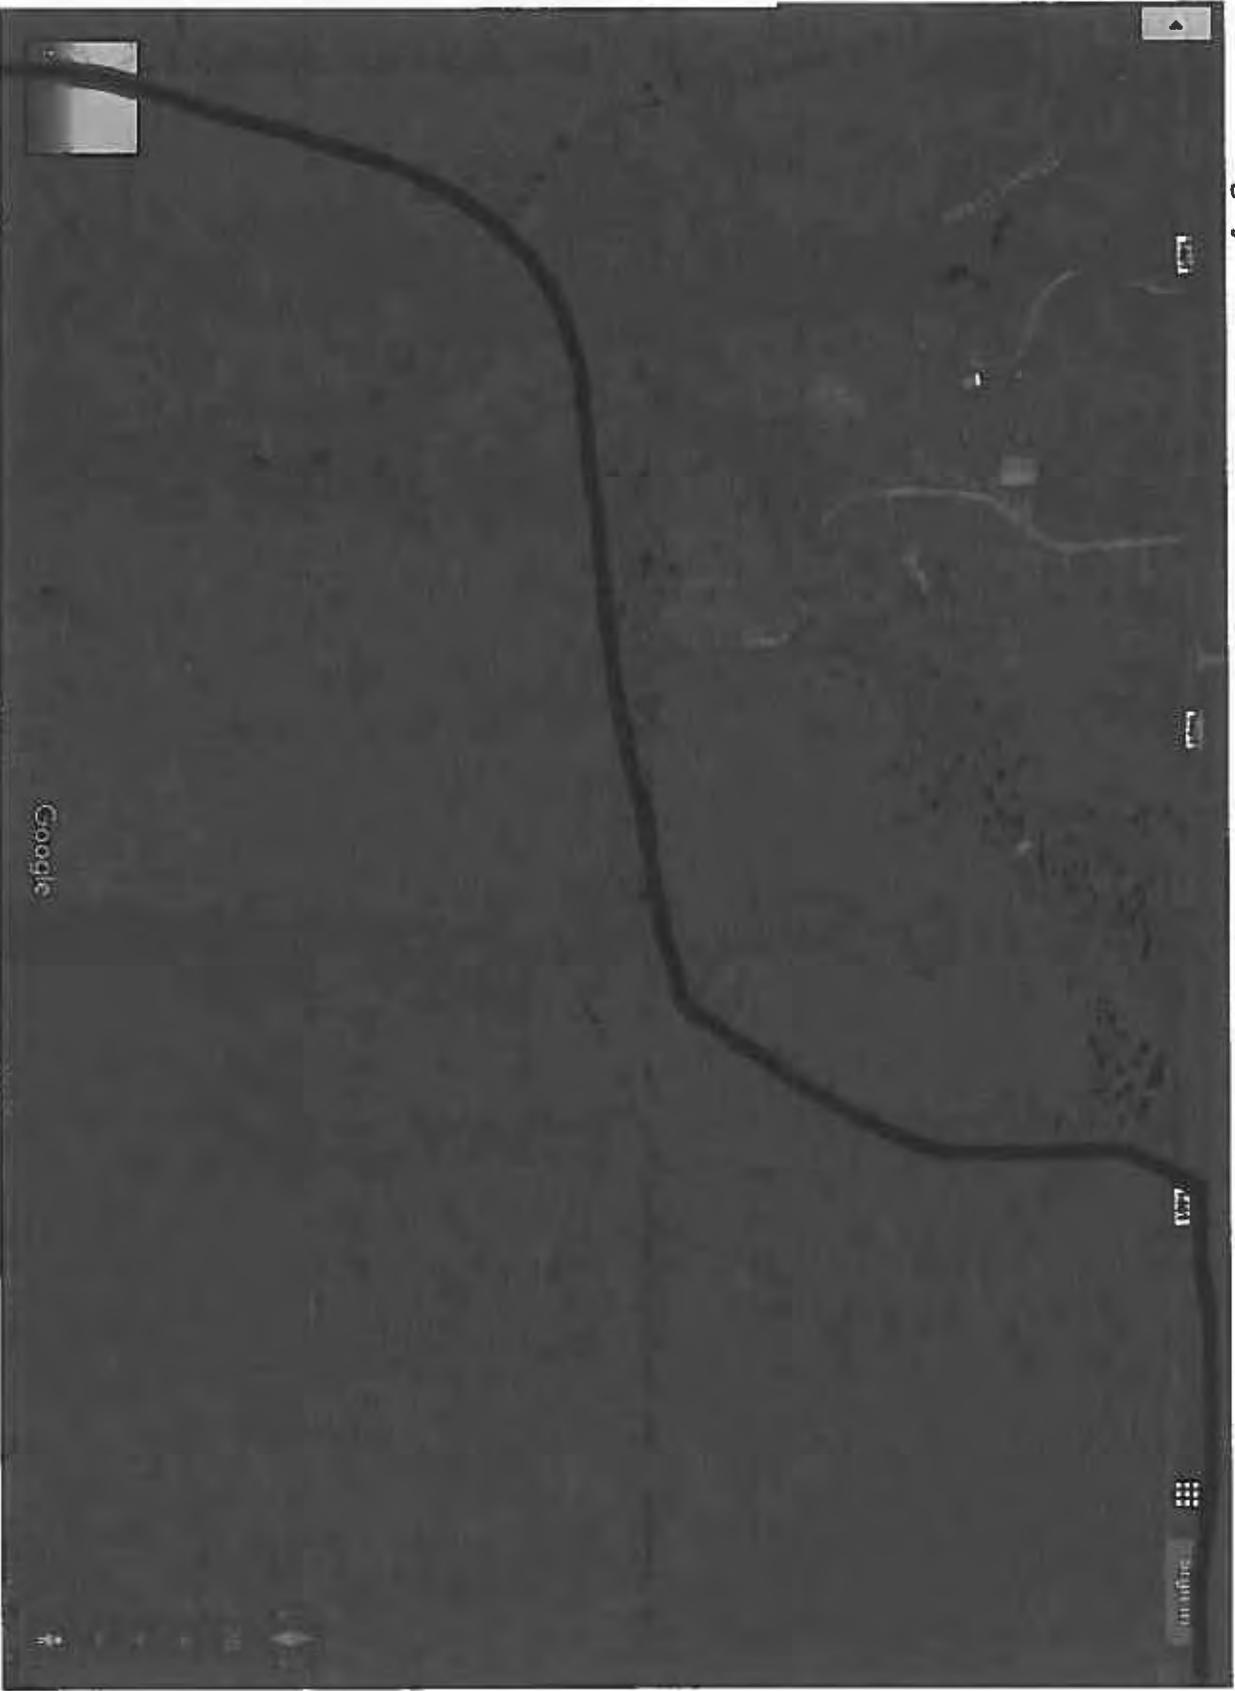

Going North trying to stay on prosperity boundary lines.

This property is cut in half due to the 2a reservoir.

Now this will get you to FM1461 and then East to US75.

No Saturday and Sunday I drove US380 to US75 and there was a minimum number of cars on road compared to the traffic on Monday thru Friday. The individuals living in the communities West of Collin County are trying to get to US75 to go to work in Dallas. Instead of trying to increase the size or the number of roads going West to East why do we not increase the roads number of roads going North to South from Denton County. This would resolve the problem West to East and fix the North to South problem. This may be accomplished by increasing the size of the North Dallas Toll Road or tunneling under the Toll Road.

If another loop is needed we may need to do what has been done in the past. Beltline was the loop around Dallas and five other counties, then 635 loop across the North Dallas expanding northward and then five miles North the Bush increased our northern direction, and in another 5 miles we now have 121 which extends from one side of Dallas to the other, but 380 five miles North of 121 was a main highway between Denton and Greenville to connect 30 and 35. If we need a new loop it should be at least five miles North of Denton, McKinney, Princeton, Farmersville, and Greenville or somewhere North of these cities and South of 82.

COMMENT:

I strongly prefer the green alignment and building a freeway on the existing road. I understand that McKinney needs a concrete plan for current 380 highway, but a bypass seems like a short term solution for a long term problem.

Regards,

Nolan Kipp

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

My name is Piper Fakkell and I am a rider at ManeGait. I live at [REDACTED]. It takes about 10 minutes to drive to my therapy from there. ManeGait is most convenient time wise in the location that it's in. With that being said, I fully support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of the community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Please don't move the location of my therapy at ManeGait!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

To: Mr. Stephen Endres, TXDOT

Mr. Endres,

I am compelled to add my voice to this significant debate about the potential options for routing the growing volume of traffic through the cities of McKinney and Prosper. I used to be a McKinney resident but now live in Frisco. I travel US HWY 380 on a regular basis to The Samaritan Inn and ManeGait Therapeutic Horsemanship where I volunteer. As I look at the various options I want to voice my support for the GREEN alignment. Certainly there is some personal interest because ManeGait has been an important part of my life for the last 11 years – I have witnessed many minor to amazing miracles with the families and riders served by this program. I also have grown to love the open spaces and beauty of the open country around the communities along this corridor. It seems to me that using the path already established by 380 is by far a better choice versus adding yet another ribbon of highway through that open land and the likely commercialism that will follow. And of course I like the GREEN option because it preserves ManeGait and it's amazing program within easy reach of the surrounding cities and neighborhoods.

Thanks for listening to me
Sincerely
Pam Hatch

I strongly support improving 380 (as it is in need of improvement whether or not a bypass occurs). Fixing 380 only (no bypass) aligns with the current footprint as planned in McKinney, Prosper, and Frisco and has significantly less impact on residential homes and families.

NO BYPASS!

I live in Prosper. We are still in our infancy while McKinney has tons of commercial builds. You hurt Prosper by trying to take our future commercial lands. McKinney has a lot of ETJ that can be used. They should have done something about 380 long ago. Instead, they allowed businesses & home developments to build almost right up to 380. Please do not punish Prosper for McKinney & Tucker Hill developers bad decisions.
Thank You -

ManeGait will not be able to continue to operate with either Red option - it will not be safe for our riders to be mounted on horseback in such close proximity to 2 major roadways (sandwiched in between). Children with autism will no longer be able to receive therapeutic benefit in this environment and this is the majority of our client base! Option E does nothing to help ManeGait and negatively impacts so many people!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I support Bypass Red B
Please do not widen 380
We now hear that Darling Homes
is not in support of a bypass near
their property and that TxDOT
capitulated by redrawing a
new alignment = Red E.
You can go with either option
so long as you do not widen 380

Our family of 5 support the GREEN alignment KEEPING 380 ON 380.

We moved here last year to WillowWood community because of the surrounding area wetlands, which we assumed because of the flooding and wildlife habitat would be safe from development.

The bypass would directly cut through the edge of our neighborhood, displacing homes and creating significant property value decline, noise and traffic pollution as well as ruining a very large swath of natural habitat/beauty along the bypass.

Please keep 380 where it already exists so we keep Mckinney UNIQUE BY NATURE.

Thank you!!!

The current proposal for 380 should and always should have been focused on the GREEN ALIGNMENT. The city of Prosper + McKinney should not have to fight one another for the lack of foresight into the growth of both Frisco, McKinney, & Prosper. The division that this has caused is absurd. Keep 380 on 380 as not to cause any more friction between communities. The loss of Laves, Main Gate, Farmland, forever homes ranches, and subdivisions that specifically moved to the county to be in the county. Please think about your decisions before making a monumental mistake.

COMMENT: Dear Sir, I am writing as a Collin County resident and business owner who has for the last decade supported the mission of ManeGait. Please consider the Green Alignment for the 380 Project, expanding the existing 380 corridor as it currently exists, with no bypass through the ManeGait property.

ManeGait has made a huge impact in our community through their empowerment of children and people with special health needs, and it would be a huge shame to see their work destroyed.

Thank you for your consideration.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Unfortunately, the proposal of yet another Bypass alignment (Option E) indicates that TXDOT is not listening to their own October survey where the majority of respondents said Fix 380 on 380. Prosper Town Council opposes any option thru Prosper, and I personally oppose ~~any~~ any bypass option. 380 will still require improvement, regardless of a Bypass option and should be ~~be~~ factored economically into the cost estimates of All Bypass solutions. ~~What is~~ How does the Outer Loop impact usage of any Bypass?

COMMENT:

I support the GREEN alignment between Coit Rd and FM 1827 for the expansion of HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you,
Paula Browning White

My neighborhood and home will be effected by widening 380. While it is true we purchased a home near 380 never in our wildest thoughts did we think it would end up being a freeway. With the city and the area growing why would the freeway not be placed where more homes and businesses will be going?

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. The new bypass option will go through Prosper, Texas. The Prosper city council has voted against this. Additionally, the new bypass option will demolish Lowe's, a major business tax contributor of Prosper as well as a business that supports our veterans. TXDOT ~~refused~~ continues to favor McKinney mayor Fuller + the residents of Tucker Hill and Stonebridge Ranch and fails to acknowledge other communities along 380. It is very interesting that Mayor Fuller is the President of Stonebridge Ranch Commercial Association and is using his role as the Mayor of McKinney to benefit his financial interests and investments with the help of TXDOT. These TXDOT bypass options are leaving citizens to conclude that the 380 conclusion will be reached based on politics/financial interests of politicians and not based on what

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you: is best for Prosper, McKinney, Princeton, etc.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial 1

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US Highway 380. It is in my mind the optimal and most efficient way to route traffic through McKinney and Prosper. I feel a bypass is unnecessary and scar the beauty of the community. The GREEN Alignment will also help preserve a vital nonprofit organization in Collin County, ManeGait Therapeutic Horsemanship. This organization is so beneficial to many special needs people in the area. Both RED Alignments E and B will have a direct negative impact on ManeGait and lead to the destruction of their property and displace many users of this vital community service.

Thank you for your consideration.

Ray Paul

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. My disabled son has used MaineGait and I can attest they provide valuable services to the community. It is rare to be able to access this kind service so near where one lives. Previously, we had to go 2 hours for our son to have access to this type of therapy. I pray you will do the right thing by this community.

OPPOSE ALL 380 BYPASS OR REALIGNMENT -
KEEP 380 on 380 -

① Prosper will not sacrifice a Corner to this project -
IT IMPACTS OUR FINANCIAL WELL BEING AS A SMALL TOWN -
WE DID NOT CREATE THIS Problem w/ POOR PLANNING -

② TxDOT HISTORICALLY HAS PLACED HWYS 5 miles APART -
WE BOUGHT OUR HOMES BASED ON THIS HISTORY -

③ BUILD OUT current under constructed Roads to alleviate
TRAFFIC - COMPLETE THE OUTER LOOP - TO REROUTE
TRUCKS AND PEOPLE WANTING TO BYPASS - (VERY FEW) AS MCKINNEY
HAS built up Commercial all down 380 - THAT IS THE DESTINATION

④ ENVIRONMENTAL IMPACT STUDIES ARE REQUIRED BY ALL CITIES
TxDOT HAS NO SUCH STUDIES.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

My name is Rich Allen and I reside at [REDACTED]

I want to express my **STRONG** support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380.

It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community.

Most importantly, the GREEN alignment preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. As an active supporter, board member and volunteer at ManeGait, I have witnessed first-hand the impact that this organization has on those who desperately need their services. Disrupting the delivery of their support to the families of those with disabilities would be a tragedy and a disgrace.

Both Red Alignment E and B, would have direct impact on ManeGait, leading to the destruction of this exceptional property and displacement of their vital community services.

I ask you to sincerely and seriously consider selecting the GREEN alignment - for the benefit of our citizens in need.

Respectfully submitted,

Rich Allen

Subject: Meeting Comment-March 28,2019. Red Bypass Option E

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

My name is Richard Clare and I live at [REDACTED] [in Walnut Grove Estates](#). I am writing in opposition to either of the Red Bypass options, specially Option E which would completely change my neighborhood. If Red Bypass Option E is chosen, it will mean the destruction of many upscale homes on beautiful acreage and the displacement of many families. If a bypass were to be built, it would cause the loss of beautiful and irreplaceable land, native trees, and a variety of wildlife. It would also destroy ManeGait Therapeutic Horsemanship which is just 1/2 mile down the hill from my house. ManeGait serves special needs children and adults as well as military families and first responders. The turmoil of the construction of a bypass would affect the entire northwest sector of McKinney. Years of dirt haulers, rock haulers, cement trucks, graders, and other heavy equipment would be lining up on McKinney streets and highways and creating excessive noise and pollution. The length and cost of construction almost always surpasses initial estimates. In the long run, the widening of Highway 380 would be quicker, less expensive, less destructive to the natural environment, and would save many family homesteads.

Both Collin County Commissioners Fletcher and Hale, who represent and understand the areas that would be drastically changed by any bypass, have publicly stated that they are for fixing 380 on 380. According to the Perryman study which Collin county had done, fixing 380 would have huge financial benefits to both the city of McKinney and McKinney ISD. This is the logical solution and will enable the city of McKinney to fulfill its master plan.

I realize and appreciate the fact that US Highway 380 needs improvement. I adamantly support an alignment that stays on the current footprint as planned in the master thorough fare plans of McKinney, Prosper and Frisco. Keeping 380 in its current footprint has less substantial impact on families, lives, and children.

Thank you,
Richard Clare

Despite the absolute majority opinion that 380 fix should remain on 380 + no bypass should be created, I am frustrated by TxDOT's continued efforts to create bypass options in an effort to solicit less opposition. As a homeowner + as a business owner whose properties will both be affected by the changes to 380, regardless of what they are, I am concerned that the desires of residents have been put as a secondary concern to the whims of a retiring judge + other politicians who stand to benefit by circumventing what I believe should be a question of democratic process. I will do everything in my sphere of influence to hold those responsible for ignoring the desires of the residents so clearly already voiced.

COMMENT:

My closed head injury daughter was in equine therapy class last year when a sudden, loud noise startled her horse. He went into a frenzy and she was hanging onto his mane trying to stay out from being under. Please don't do anything that changes the routine for Mane Gait. Highway noise would be too close and too unpredictable.

- [REDACTED]

COMMENT: I support the green alignment from Coit Road and FM 1827 for the expansion of US HWY 380. The alternative options Red E and Red B would cause safety concerns with multiple schools, directly and irreparably impact ManeGait to the point they would no longer be able to provide services to the disabled and would cause significant negative impacts on the natural landscape and wildlife that currently live in that area. I implore you to not select Red B or Red E, but instead select the Green option for the 380 expansion. Thank you.

Rob Stogsdill

I prefer Red Option B.
It extends the by-pass nature of the road. Further west might be even better, but it is better than A or E.

DO NOT LIKE ANY VERSION OF BYPASS WEST OF 75. AS BYPASS WILL BE TOO CLOSE TO ERWIN PARK. THIS IS USED BY CYCLIST, RUNNERS, ETC. AND A BYPASS THIS CLOSE TO THE PARK WILL UPSET THE SERENITY, ACCESS, TO THE PARK.

LOWERS

THE BYPASS WILL KILL A LOT OF DREAMS PURCHASED YEARS AGO TO GET AWAY FROM THE CONSTANT SOUND OF FREEWAYS AND SPEEDING CARS. NOT FAIR TO CURRENT RESIDENTS AND FUTURE

NOT TO MENTION THE LOWERING OF PROPERTY VALUES AND ^{RESTORE} COMMERCE IN PROSPER, TX. TAX ROLLS WILL BE IMPACTED SEVERELY.

KEEP 380 ON 380 PLEASE!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

My son, has been attending ManeGait for the past 9 years on the medical advice of his physician and physical therapist. It is an integral part of his therapeutic routine and life. It is a therapy that he actually enjoys and looks forward to every week! Personally, I can't imagine not being able to enjoy the peace and quiet of the country while he takes his lessons. It is therapeutic on another level for us parents. I am in favor of the GREEN Alignment / opposing the Red Alignment B & E.

The high view point does not make sense when zooming out. Please consider building out all arterial roads (Bloomdale, Frontier 1461, and 289²⁸⁹¹ and outer loop) before deciding on this initiative.

- Consider bypassing via 289 upto the outerloop.
- Who will travel north to inturn go south to DFW?
- I purchased my home away from 380 because I have an immune deficient child. Pollution would hurt him.
- The \$\$ of Tucker Hill shouldn't override common sense.

Please put this decision on hold for 5 years while the town is built out w/ arterial roads

All bypasses make the best choices.
My preference would be B.
Any decision will affect people. However, the main question is who will be affected less?
The widening of 380 would affect the entire city. The number of people commuting, the hospital, all the shopping - would be a nightmare for construction. Safety would also be a major issue. It's already bad, imagine what 380 widening would be like during that time.

Bypass B

I AM OPPOSED TO ALL 3 BYPASSES ~~BECAUSE~~ BECAUSE 380 DOES NOT GET FIXED IN THE PROCESS. IT APPEARS POLITICS IS TOO INVOLVED IN THE PROCESS FOR TXDOT TO REACH THE BEST DECISION. COLLIN COUNTY COMMISSIONERS COURT JUDGE KEITH SELF, INSERTED HIMSELF IN THE DECISION MAKING PROCESS WHICH IS A CLEAR CONFLICT OF INTEREST SINCE HE LIVES IN TUCKER HILL. THIS CAUSED TXDOT TO SHIFT THEIR EMPHASIS FROM 380 ON 380 & THE TUCKER HILL BYPASS TO 2 PROSPER BYPASSES. MAYOR FULLER MCKINNEY, ALSO HAS A CONFLICT OF INTEREST DUE TO HIS POSITION ON STONEBRIDGES COMMERCIAL COMPANY.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX. Residing at [REDACTED] I **strongly SUPPORT** either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. **I strongly OPPOSE** the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and potentially eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also **strongly oppose Red** Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Respectively,

Ronald W. Ferris

Subject: US 380 MAPO (Prosper) Comment Card

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endress,

As a homeowner and citizen of McKinney, Texas I **strongly support red option B**. It is obvious that the other options would be more disruptive to existing infrastructure including business and residential properties. Red option B is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. Red option B is the least expensive option when compared to the cost of the green alignment or red option A or E. If red option B is not selected then red option E would be my preferred secondary choice.

I **strongly oppose the proposal to widen US 380** (the green alignment option) or converting US 380 to a limited access freeway. These costly options will destroy empowerment and historic zones along US 380 and 200+ existing and future businesses including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.

I also **strongly oppose red option A**. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The green alignment and red option A will depress home values in that area. Red option B or red option E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. They provide a wider buffer for future planned expansion and clearer separation between businesses and residential areas and the transportation corridor.

Thank you for your time and consideration regarding this matter and your continued service to Texas citizens.

Sincerely,

Ronald C. Jones

I do not wish to have the bypass. I worked hard to have a beautiful home and now I will live 500^{ft} away from one. I check to see before I build my home what 123 would be. You change it after I had build my home. This was to be my forever home. Please don't do this fix 380 or stay away from Bloomdale Rd

Roxie Byars
[REDACTED]

I Roxie Byars support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Sir,

The impact on ManeGait and the service they provide to their clients would be devastating. As a massage therapist I see first hand how Equine / horse therapy impacts (positive) some of my clients. The clients/ children have enough struggles, please don't disrupt or take this away from them. Please support the Green alignment if any. I am also a McKinney resident who drives Hwy 380 and other cities in Collin county to service my clients. I see what people go through with traffic. I still feel very strongly that ManeGait and their property and services should not be disturbed.

"I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Dear Mr. Endres,

We support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you for your consideration,

Sara and Paul Pederson

you don't ruin a city to create a freeway, you use the corridors that are already there and expand them (380) Traffic on 380 will need to be alleviated regardless so why spend the \$ twice? McKinney failed to plan properly years ago to the detriment of the community, please don't do it again. Widen 380! It's the option that makes the most sense!

I am in favor of fixing 380 on 380. My husband and I bought property well north of 380 to avoid any issues with our county's growth + the expansion of 380. I do not want a bypass of any sort. In addition to it putting a highway between my home + my children's elementary, it would have a negative impact on our property + our way of life. Please fix 380 on 380. The quickest way from point A to point B is a straight line. No one would drive north to go South. In all my years, I have never used the Denton bypass (289) to go South on 35. Please fix 380 on 380. Don't ruin our great Texas landscape that is north of 380.

From: Scott Brown <[REDACTED]>
Sent: Saturday, March 30, 2019 4:22 PM
To: stephen.endres@txdot.gov; Kimmey, Tony; michelle.raglon@txdot.gov
Subject: Opposed to any 380 bypass that would route through Prosper, TX

I would like to voice my objection to the ongoing discussion of the 380 expansion going through the Town of Prosper. It was stated in the town council meeting on July 24, 2018 by Stephen Endres that TXDOT rarely goes against the wishes of a town. So now we find out about new Bypass options B and E cutting through Prosper. From my understanding this was mainly due to the pressure of a politician living in Tucker Hill. Why when the residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway and residents of Prosper paid a higher price for our homes to live away from a highway, is this option even being considered? It seems reprehensible that Tucker Hill residents are trying now to shift the consequences brought by their own poor planning to the residents of Prosper. I hope that you have the integrity to see through the call of a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion, one of them a politician. It would seem that there should be questions asked when a politician, who has been involved with any sort of community development, should have been prepared to accept the consequences of his home purchasing decision but now seems to be steering the debate so that he can take advantage of lower purchase pricing on his home and then use his position to try to influence change so that he can profit personally by rewriting the rules now.

I am opposed to any bypass option that starts west of Custer Road and passes through Prosper. I'm aware that the politician in question has used the argument that widening 380 east of Custer would impact business along 380 by eliminating parking at those businesses. He's used this as justification to route 380 through Prosper. Of course doing this would limit commercial development in Prosper. Also, in his statement, he failed to mention the fact that if 380 is rerouted, these same businesses that he's so keen to protect will be adversely impacted by the reduction in drive-by traffic. So either way the businesses in McKinney along 380 are likely to be adversely impacted. Perhaps the City of McKinney should have done more future planning and anticipated growth instead of trying to make the neighboring towns pay the price for their poor preparation.

My hope is that TXDoT will follow the will of the majority of people surveyed on this issue and make 380 a limited access freeway. Other roads parallel to 380 should also be improved to help reduce congestion on 380.

Thank you for your consideration on this issue.

D. Scott Brown

Although no options are perfect and have no impact on residents, some options are clearly worse than others. Option B & E specifically target the residents and town of Prosper to carry an undue share of the burden.

Option E will displace many existing high-revenue stores. This will have a significant negative impact on the quality of life of Prosper residents, as those stores are ALWAYS very busy. Those businesses (Lowes, Firestone, etc.) contribute MILLIONS of dollars of tax revenue to Prosper. After being forcibly removed from their relatively new locations, they won't return causing Prosper to lose millions of tax base - a HUGE blow to a small town!

Option B is almost as bad, except instead of evicting existing revenue-generating and quality of life businesses, it will consume space to prevent them from ever moving in - stunting Prosper's growth.

Options B & E force Prosper to pay for McKinney's unmanaged growth problem. Option D forces the instigator of the problem to bear the majority rather than the small neighbor FLX 380 on 380!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Sincerely,

Scott Lerner

I support the green Alignment for 380 and firmly believe that any fix of US 380 needs to stay on 380. I am against the red B alignment because of its negative impact on ManeGait and Prosper's east side. The fix for US 380 in McKinney needs to stay in McKinney, on US 380 and not negatively impact other cities and the premier non-profit gem of our county, ManeGait. ManeGait surely can be preserved in tact and without negative impact and still meet the roadway needs of our growing county.

Red alignment A would have a lesser negative impact than red alignment B. If one of the red alignments must be used, the red alignment A would be better than red alignment B for all concerned and our county.

Respectfully submitted,

Sean Murphy

I am opposed to all 3 bypass options.

The city of Prosper has passed 3 resolutions stating that they do not want a bypass in their city. McKinney is pushing their problems into other cities & county residents. The businesses on 380 need 380 to be improved & need the foot traffic in order to survive. The bypass options all lead into Environmental habitats that would be destroyed by a highway. The wetlands of the northwest sector of McKinney ~~are~~ would remain the only green space, after this area is built out because of the floodplain in the area. Please save the natural habitats & also preserve businesses along 380.

Fix 380 on 380

We purposely purchased a home away from a highway.

A bypass will lower our property value.

It will make my kids have to drive on dangerous roads just to get to high school.

And it takes away from the beauty & nature that is McKinney.

Please consider the large impact the bypass would have on the Heatherwood community and the Baker Elementary School. Safety and environmental impact are a large part of my concern. My concern focuses on the young children that attend Baker Elementary and the amount of traffic that will be brought so close to the school. In addition, I feel that a bypass so close to the elementary school can make it a larger target, as schools have been targets recently that have major roads/bypasses/highways near them. We, Heatherwood, have a large amount of young school walkers and a bypass is simply not safe or desirable near our neighborhood. Please, consider the impact on safety in our neighborhood and at Baker Elementary.

Thank you for your time.

Drew and Shelby McMurtre
[REDACTED]

Good afternoon,

My name is Shelby McMurtre, my husband Drew and I are residents of Prosper, Texas where we are currently raising two kiddos (and have one on the way). We are extremely proud of our community and the contentedness we feel living within such an amazing little town.

With that, I am writing in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. The GREEN alignment is the most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass would unnecessarily scar the beauty and quaint nature of our community-- aspects that, despite our understanding of the growing county, drew us from Frisco, Texas to plant our roots in Prosper.

The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. ManeGait offers exceptional services as well as opportunities for service and involvement-- my family has not only volunteered at ManeGait, but we have also attended numerous functions in support of this organization's important cause.

The GREEN alignment is the most logical avenue for the expansion of 380 and the alleviation of through traffic.

Thank you for your time and consideration,

Shelby and Drew McMurtre

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

TEXAS POPULATION PROJECTIONS 2010 TO 2050

In this Brief:

- The latest population projections include more recent migration trends, a new race/ethnicity category, and expand the age distribution to 95 years plus.
- The newly added non-Hispanic Asian group is projected to grow at the fastest rate, growing five-fold by 2050.
- The Hispanic population will likely surpass the non-Hispanic white population by 2022 but is not projected to make up the majority of the state population during the projections horizon.
- Much of the population growth in Texas is projected to come from the large urban counties of Harris, Bexar, Dallas, and Tarrant and neighboring suburban counties. The fastest growth

The Texas Demographic Center produces population projections for 40 years beyond the most recent Census to help planners and policymakers anticipate future demand for services and pressures on infrastructure. In our most recent set of projections, one migration scenario is employed in which the migration patterns observed in Texas between 2010 and 2015 are assumed throughout the projections horizon. Additionally, this updated set of projections includes a new race/ethnicity category, non-Hispanic Asian, and expands the age distribution to 95 years and older.

This document provides a brief overview of the statewide population projections for 2010 to 2050 using the migration trends observed in Texas between 2010-2015. This scenario represents our recommended scenario as it most closely reflects the most recent migration trends. Projections using the previous migration scenarios can be accessed by contacting our office. Our full methodology can be found on our [website](#).

Migration rates between 2010 and 2015 were somewhat lower than migration rates observed in Texas between 2000 and 2010. This updated scenario yields a state population approaching 47.4 million by 2050, which represents an 88.3 percent increase over that period.

Projected Geographic Distribution of the Population

Our population projections suggest the majority of Texas counties will experience continued steady population growth between 2010 and 2050. This is especially the case for suburban

US 380 Collin County Feasibility Study

[Project Map](#)

What is the purpose of the study?

Analyze potential roadway alternatives, including the existing alignment and new alignments, for US 380 through Collin County from the Denton County line to the Hunt County line.

What is a feasibility study?

A feasibility study is one planning tool that TxDOT uses when a project is in the very early stages of development. It helps determine if the project should move on to more advanced phases of project development such as more in-depth environmental analysis, public involvement, schematic design and right-of-way mapping.

The reason this type of study is done is to identify high level or critical elements of engineering, impacts to stakeholders and the public, and the economic feasibility of potential new roadways or improvements to existing roadways.

Feasibility studies are not intended to result in detailed design, environmental analysis, or cost estimates.

What will be evaluated in this feasibility study?

The study team will consider projected regional traffic, existing and planned developments, stakeholder input and the impact on the economy and environment.

What are expected project milestones?

Summer 2017 – Study begins

Spring 2018 and Fall 2018 – Public open house meetings will be held to discuss the project and gather feedback from the public

Spring 2019 – Project implementation plan finalized that would include a recommended alignment(s)

*Please note that the project schedule is subject to change.

Why is the study being conducted?

The County is growing...

The population of Collin County is projected to grow from just under 800,000 people (2010 Census) to over 3.8 million people in 2050, according to the Texas Demographic Center.*

*Assume the 2000-2010 Migration scenario for 2014 Texas Population Projections

More and more land in the County is being preserved for development.

The study team is working with Collin County and cities in the study area to identify land which has been purchased and right of way

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arteria US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT:

I am in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you,

Stacey Eubank

US 380 needs to be improved all the way into McKinney, so why not save the money by not building any bypass. Otherwise, there will be a duplication when the Outer Loop is constructed in that it will be closer than 7 miles.

The economic detriment to Prosper is not worth the bypass construction. Most of the East bound traffic on 380, entering McKinney turns to the South at 75. Why bypass this traffic to the North of McKinney

Keep 380 on 380

We are absolutely opposed to all bypass options, but particularly option B, E, + A in West McKinney/Prosper. All of the bypass options introduce unacceptable environmental, noise, + safety issues into rural, residential-zoned areas of Collin county. Numerous residential neighborhoods are affected adversely. These optional Bypasses are in violation of Prosper, McKinney, and Frisco Transportation Plans. Moreover, City of Prosper passed a resolution opposing all Bypass Options. Fix 380 on 380! McKinney has approved commercial + residential development that has caused the congestion, not, not through traffic! Do the traffic count analysis. Do the environmental impact studies for the proposed Bypasses!!

I attended the March Information meeting. I learned little new information, other than TXDOT now openly admitting that 380 will be a freeway.

I trust that the representative was truthful when he stated that expansion impacting Red Bud Estates will be on the north side of 380, along that section. If that is true, it avoids taking more of my property, as well as other Estates homes and nearby businesses. Increasing to four freeway lanes ^{per side} plus four frontage lanes will have a major negative impact on my home, where I've lived 23 years. Please preserve our properties!!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Thank you for your consideration,

Stephanie Diener

Thank you for thoughtfully addressing concerns brought forward regarding the Red A & B alignments. Although the new Red E alignment does not change the impact to my residence or community, (Tucker Hill) I do favor the Red E alignment due to its reduced impact on ~~manegalt~~, the environment, and on future development.

Between all 3 red alignments, Red E and B are both highly preferred over Red A, due to the greatly reduced impact on businesses and reduced cost, as well as removing the damage/impact to Tucker Hill and to homes in Stonebridge that back up to 380.

Red option ~~A~~ and all green options are not acceptable due to business and residential impact and greatly increased cost.

I oppose bypass B+E bypasses. I support keeping 380 on 380. Too many families will be displaced by either of these bypasses. Maingate would suffer and it could disrupt wetland areas.

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Why are all these options on the red line? It still is a major safety issue with all the homes with kids being affected. What about going back to upgrading 380 with no bypass.

I'm only for fixing 380 - no bypass anywhere at anytime. All other lanes pose major safety issue with closeness to homes.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. NAME/ADDRESS: Stephen D Remington, Jr. / [REDACTED] (Lakewood at Brookhollow, just West of Custer)

COMMENT: I support the Red E alignment between Coit Rd and FM 1827 for the expansion of US HWY 380. It is the optimal path for east-west traffic without unnecessary disruption to the eastern edge of our neighborhood, leveraging the existing easements and open spaces around the Custer corridor, rather than cutting through more densely populated neighborhoods and businesses that currently exist, or are in the process of being built along the 380 corridor

If you have any questions, please do not hesitate to contact me.

Sincerely,

Stephen D Remington, Jr.

COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

I appreciate you taking my comments into consideration.

Thank you

Stonebridge Ranch
Community Association, Inc.

April 7, 2019

To: Mr. Stephen.Endres@txdot.gov

As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9417 residences of Stonebridge Ranch and its 36,000 residents who live in McKinney.

In a unanimous vote, we stand in agreement along with the 381 residences in the Tucker Hill Homeowners Association and its 900 residents, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor.

We hereby make an official statement in support of either bypass Red Option-B (our preferred option) or Red Option-E and oppose bypass Red Option-A or the green alignment of widening 380 or converting it to a limited access freeway.

Options B or E are the most viable, least expensive and least disruptive to businesses and homes along 380 when compared to widening 380 (the green option).

If Highway 380 (the green option) were implemented, according to TxDOT's own numbers, It will destroy nearly 200 businesses and homes along the 380 commercial corridor including all of the existing businesses on the four corners at the intersection of Highways 380 and 75, and impact the historic and empowerment zones in McKinney. This will result in a significant reduction in the sales and property taxes to the City of McKinney along with bringing an increase in traffic and noise to the already developed housing subdivisions that abut 380 with more to come.

As to the detrimental impact on Stonebridge Ranch if 380 were widened, it would double the width of the current highway and bring significantly more traffic to the area. In addition to the increased noise for the hundreds of homes in Stonebridge Ranch that abut 380 on the Northern edge of Stonebridge Ranch, there are three roads: Lake Forest Drive, Ridge Road, and Stonebridge Drive that go completely

Stonebridge Ranch Community Association, Inc.

through Stonebridge Ranch and provide the only means between Hardin Road and Custer Road for getting to Virginia Parkway, Eldorado Pkwy, Custer Road and Highway 121. These roads were designed for neighborhood traffic and not arterial connectors to other major roads. That is the reason for our opposition.

If the proposed bypass (Red Option-A) that enters Highway 380 East of Custer Road were implemented, in addition to the above traffic problems, there would have to be a major interchange built at the intersection of the new six lane bypass and existing 380 which is already six lanes. This interchange would be right above the northern edge of Stonebridge Ranch just east of Ridge Road. It would have a very detrimental impact on both Stonebridge Ranch and Tucker Hill by bring a significant increase in traffic along with an increase in the air and noise pollution to our neighborhoods beyond any other option.

On the subject of impacts to non-profit organizations that would be affected, if 380 were widened (the green option), three non-profit organizations in McKinney would be **destroyed**: Life Path Crisis center which is Collin County's only in-patient mental health facility, INN STYLE which is the store that provides funding for the Samaritan Inn homeless shelter, and Cornerstone Ranch that houses adults with special needs. No one is speaking up for them. Since they are not backed by individuals with financial resources, they do not have the funds to mount a campaign to save themselves. It would be a tragedy to lose them. Ask yourself; is MainGate (who would not be destroyed) more important than these three entities who serve more individuals?

We also **support** business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be eliminated if 380 were widened (the green alignment option).

To reiterate, our Board, on behalf of our residents has unanimously voted to **oppose** the proposals to widen Highway 380 or convert it to a limited access freeway and **support** either of the alternative bypass route options North of Highway 380 that cross Custer Road and enters Highway 380 West of Custer Road known as Red Option-B or Red Option-E.

**Stonebridge Ranch
Community Association, Inc.**

Thank you for taking the time to consider this letter and our position.

Jon Dell'Antonia
Board President, Stonebridge Ranch Community Association

Fix 380 on 380 is the option that needs to go forward.

I live in the Timber Creek subdivision. We built here 3 yrs ago. We chose this location because it sat back off of 380, but still close to 75.

Being back off of 380 we are not impacted by the noise. If the other options go thru you will be putting the bypass in my backyard.

I encourage you to build out the arterials as planned in the 2040 master plan.

This bypass will effect our quality of life, as ^{our} home values.

Sue Reishus

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

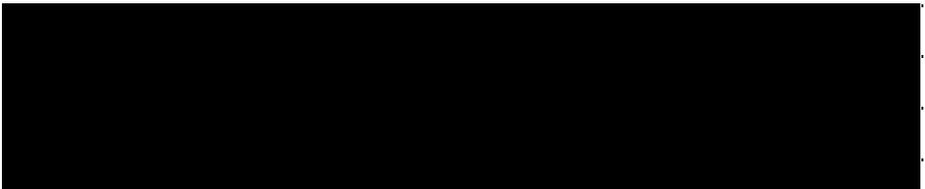

- I am employed by TxDOT
- I do business with TxDOT

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

Thank you,
Susan Gradick

I am writing to voice my opinion to any 380 by-pass and for keeping 380 on both of TX DOT's surveys indicate the vast majority of participants in Frisco, Prosper, McKinney want 380 to remain on 380. This makes perfect sense, since any bypass will be of limited access to most residents and will be too far north to be of any real value to many. A by-pass will not address the traffic problems that already exist, and will end to worsen, on existing 380, because the majority of people will continue to use this route to access 75 & the numerous businesses that are located on & coming to existing 380. The Perryman Report also reflects that making existing 380 a limited access freeway will, in fact, enhance the long-term value of businesses in that area. A by-pass will dis-enfranchise all of the residents who brought their rural & residential properties relying on the long-term ^{transportation plans of} ~~value of businesses~~ Prosper and McKinney which did not include any such bypass, while rewarding the City of McKinney for its lack of foresight & planning. For all these reasons, I vote NO BYPASS and KEEP 380 ON 380.

We lived in Stonebridge at 380. We sent our kids of to college, became empty nesters + moved to Prosper, away from 380, noise + pollution. We are in the home we plan to die of old age in. Now here comes a bypass to take our peace + serenity. 11 years ago, long before all the people moved here we had a friend killed on 380. It's been dangerous a very long time. The high school kids in Stonebridge north of Custer are zoned to MATHS at 75. All these kids have to drive on dangerous 380 multiple times a day. It's dangerous + needs to be fixed. Fix 380 + make it a LAR + the Loop will take up the slack.

Why harm 20+ neighborhoods + wildlife habitat when 380 needs to be fixed?

What a disappointment to find the DOT has not listened to the results of the public surveys of October 2018 - where the vast majority of people prefer 380 to stay on 380. Yet another possible alignment going through Prosper does not support Prosper Town Council's Plan. Listen to your public or don't bother asking them!

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

We need a bypass for McKinney. I live and work on 380 and travel it every day. I see wrecks at Lake Forest and 380 all of the time. When there is a wreck all of the lanes are blocked. More lanes on 380 will not solve this issue just more lanes will be blocked. Move this traffic as far from here as possible. I would like the west most option. I have to set through the light at Hardin 3 or 4 times to go home. As McKinney grows more on 380 this problem is only going to increase. Please do a long term solution not a band aid for now. If you widen 380 in McKinney, many businesses will have to move. Will those jobs be permanently lost?

COMMENT:Please consider the Green Alignment , not the Red Alignment B &E for the US 380 Expansion. In choosing that route, ManeGate will continue to provide much needed therapy for our area. I am one of the many volunteers at ManeGate and I have witnessed myself the positive changes that have occurred as a result of riding horses! Part of our mission statement says that we help children and adults with disabilities through the healing power of a horse! Please come visit and see why ManeGate is so important to our community!

COMMENT:I sent a comment in on Monday but I wanted to share what happened on Tuesday when I was volunteering at ManeGait. I have been working with a child that is mute and uses sign language for communication. On Tuesday, we got to trot the horse that the child was riding. The child was so excited and said "I like it"! We could not believe it! This was a miracle! Miracles take place at ManeGait! Please don't take that away! Please use the Green Alignment or the Red Alignment A so that ManeGait can be saved!

Sincerely,
Teresa Murphy

Dear Mr. Endres,

Please accept my support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Thank you,
Teresa Price

Keep 380 or 380. This new option helps Whitley place some, but still will impact our environment with pollution & noise & congestion. If by pass must happen, it still is most efficient to come thru the empty space either to East or West of Tucker Hill.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses---

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

AS Residents of county Rd 862
for 21 years, we love the rural style
of this area. We would like you to keep
this road/highway as far south from us
as possible. McKinney use to be a special
place to live, but it is becoming too much
like a big city. Some states have a no-growth-
or slow-growth amendment, or 2 acre minimum lots
in order to preserve the quality of life of that city.
Please preserve the quality of life here or there
will be nothing "unique by nature" about McKinney because
there will be no more "nature" left.
Thank You!

I am writing this AGAINST any bypass of 380 which enters or borders the Town of Prosper. The Town of Prosper has had a ~~long~~ long standing plan for development, which has never included any bypass of 380. Rather, this plan considered the existing 380 plans, which contemplate expansion along the existing route. Many Residents of Prosper considered this when selecting Prosper as their home. To alter this ~~is~~ due to pressure from a MINORITY of McKinney residents (Hon. Self - Tucker Hill) is WRONG.

Keep 380 on 380.

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. This is an amazing service.....please don't let anything happen to it.

Thanks in advance for your consideration, Timothy and Susan Anderson

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I support the **GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380**. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community.

GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

As a former volunteer for ManeGait, I have personally witnessed the dramatic therapeutic effect that this facility has on the lives of the children and families it serves. These children and families deserve your thoughtful consideration. The activities and skills they learn at ManeGait produce measurable results. Destroying or displacing the ManeGait facility would be a catastrophic disruption in these important services and a irreplaceable loss for our community.

NAME: Todd A. and Dana L. Brown

ADDRESS:

CITY:

04/11/2019

Stephen Endres, P.E., Project Manager
TxDOT Dallas District Office
4777 E. Highway 80
Mesquite, TX 75150-6643

Dear Mr. Endres,

Regarding the TxDOT US380 Feasibility Study, Encore Wire offers the following in opposition to proposed East McKinney Green Alignment, Option B:

Encore Wire Corporation was founded in McKinney in 1989, and has grown into the City's largest taxpayer for 20 years running via a culture of rapid, deliberate growth. Their current employment sits at 1400 employees, operating with nearly 2.1 million square feet of manufacturing space on a 24/7 basis.

Encore Wire is a public-owned company (NASDAQ: WIRE) whose earnings are affected by fluctuating commodity prices vs. product pricing, in a cyclical construction industry. As such, costs are closely managed and decisions made based on current market conditions.

The key to Encore's success as the low-cost industry producer, and its staying power in the wire industry has been flexibility. Encore is constantly moving or upgrading equipment to improve efficiency and expanding existing facilities to offer increased capacity and new product lines. Encore Wire has expanded its operations and/or manufacturing capacity roughly every two years since 1992.

Forecasted growth for the residential construction industry is expected to grow 7% over the next five years, and commercial construction is expected to grow by 28% for the same time period. Encore Wire will need to expand to meet forecasted industry demands.

Encore Wire has to move fast to take advantage of market trends. Their construction partnerships allow for product to be shipped from a brand-new, green field manufacturing plant twelve months from groundbreaking. Having all facilities in one geographical location, connected and easily monitored via a single high-elevation viewpoint offer genuine advantages.

Encore Wire represents a significant economic impact to the area economy. Over the last five years, payroll totaled \$327.3 million. Five-year capital expenditures totaled \$137.1 million as investments in growth. Charitable contributions totaled \$2.3 million. And, taxes paid over the last five years totaled over \$53.7 million. These items alone account for over \$520 million of direct economic impact.

Given all these factors, splitting the Encore campus in such a manner would result in significant interruption to operations and future growth opportunities. The long-term uncertainties of a US380 bypass alignment through campus would limit Encore's short-term flexibility and hence its growth and success.

Encore Wire Corporation respectfully requests TxDOT recommend a US380 bypass alignment that does NOT involve development along existing Airport Road.

Sincerely,

Todd Clayton | VP Facilities Engineering

Encore Wire Corporation | www.encorewire.com

1329 Millwood Rd., McKinney, TX 75069

COMMENT:

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Keep 380 on 380! Fix 380 on 380! Your new "E" bypass is no better. The disaster that will be Custer Road is unconscionable. All of the residents in all the neighborhoods along custer, including mine - Rhea Mills Estates, will be adversely affected by the unending traffic, noise, construction, & destruction of our peaceful, quiet existence.

Either Fix 380 on 380 or choose the "A" Route, which doesn't destroy people's homes or our Prosper Lowe's Store, which generates millions in tax revenue for our town.

Dear Mr. Endres:

As a homeowner and citizen of McKinney, Texas I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options.

I strongly OPPOSE widening US 380 (the Green Alignment option) or convert US 380 to a limited access freeway for all the reasons of which you are probably already aware.

I strongly OPPOSE Red Option-A.

Red Option -B or Red Option-E are the best solutions to better serve the future growth areas north of McKinney. The best option should not be held hostage to a shrill politically connected minority when it will be primarily located on undeveloped land as opposed to major disruptions, economic loss and excessive costs for all other proposed solutions.

Sincerely,

Tom Hanson

Red option B & E RUIN MANEGAIT. This can't happen
 Every one that has put a business or residence close to
 380 knew (or could have known) the Risks. IT
 IS/WAS VERY obvious 380 would be A major thruway for
 most Businesses & Residents also have the power to
 handle this. They can move. They can get more business.
 They have options.
 MANEGAIT is A NON-Profit, does a lot of good, and
 has no power to overcome this. Like most small
 NON-profit, CHARITABLE ORGS, the pockets are not deep, IT'S ALL HEART. NO ability to resist.
 It is completely UNFAIR to make MANEGAIT deal with this.

ADDN'T hurt the "powerless" stick to the original plan, the State

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Mr. Endres,

As a 16 year resident of Prosper, I would like to make it known that i support the GREEN alignment between Coit and FM 1827 for the Hwy 380 expansion project. It is the path that makes most sense for both Prosper and Mckinney, and is the least destruction of a beautiful portion of our town. As the mother of a daughter who has benefitted as a rider at Mane Gait, I cannot stress enough how vital that organization has been to our family. To see such a wonderful nonprofit organization possibly be forced to displace hundreds of therapeutic riders at the expense of an alternate UNNECESSARY expansion plan such as the Red alignment B and E is unacceptable. I appreciate you reading this and am praying the entities involved choose GREEN.

Sincerely,
Toni Margolis

Bypasses are a bandaid. What should be done is to widen 380 all the way to 75 and beyond. Lowes @ custer + 380 bought the land where Kohls was to be. Kohls built their parking lot + discussed the future w/ TXDOT + because TXDOT had no concrete plan, Kohls decided not to build. Baylor Scott White intentionally SET back their hospital to accommodate the widening of 380. ~~As~~ Little to no local traffic will use the bypass just as ~~no~~ little traffic uses the Denton Bypass. Unfortunately, TXDOT does not appear to have a solid plan in place. It was amazing that at 6:32 pm tonight there were reports out about the meeting.

NAME:

Tawert Harris - New resident to Prosper McKinney ^{From}

ADDRESS:

CITY:

The board of directors of the Tucker Hill Residential District Association on behalf of 381 residences and its approximately 900 residents who are citizens of the city of McKinney stand in agreement with Stonebridge Ranch Homeowners, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor. We hereby make an official statement in support of a bypass option B or E and oppose bypass option A or the green alignment of widening 380, converting it to a Limited Access Roadway.

The proposals to widen Highway 380 (the Green Alignment option) and convert it to a limited access freeway would destroy much of the commercial corridor and significantly impact the historic and empowerment zones in McKinney. This will result in a significant reduction in sales and property taxes to the City along with bringing an increase in traffic and noise and environmental hazards to the already developed housing subdivisions that abut 380 with more to come. This has been confirmed by the city of McKinney's review of the Perryman study in which it was determined that the city of McKinney alone would bear between 70-75% of the total destruction and negative impacts of the entire 380 study region that includes McKinney, Prosper, and Frisco.

We also oppose the very detrimental impact to Tucker Hill if the proposed bypass Red Option-A which enters Highway 380 East of Custer Road were implemented. The air and noise pollution to our neighborhood will be significantly increased beyond any other option. In addition, we have concerns regarding the safety and the ability of both residents and emergency vehicles to enter and exit our neighborhood both during and after construction.

We support Red Option-B or Red Option-E as the most viable, least expensive, and least disruptive to all businesses and homes along 380 when compared to widening 380.

We also support business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be initially, and potentially permanently, eliminated if 380 were widened (the green alignment option).

To reiterate, our Board, on behalf of our residents, has unanimously voted to respectfully request you to oppose the proposals to widen Highway 380 and convert it to a limited access freeway from Coit Road to FM 1827 and support either of the alternative bypass route options West of Custer Road known as Red Option-B or Red Option-E.

The "alignment" as I understand the word does negatively impact the people who live east of the proposed bypasses A, B, E. These neighborhoods have many children and very hard working people who have invested in an area they believed was to remain quiet and suburban, far from freeways.

I ask you to not build alignment or bypasses.

Use 380 for what it was originally intended - convert to limited highway or freeway with frontage roads.

Stephen,

My name is Veronica Heathcock, I live at [REDACTED]. I am extremely concerned about the so called 380 bypass. I would like my voice heard please.

I do support the GREEN alignment and most efficient path for east-west traffic through the cities of McKinney and Prosper. I do not believe a bypass is necessary and would destroy the beauty of our community. The noise level would be horrendous. Plus the GREEN alignment preserves a very prominent and very worthwhile nonprofit organization; ManeGait Therapeutic Horsemanship. If you have not been to this organization and personally see the good they do for the less fortunate, you should visit and see for yourself. Both the RED alignments would have direct impact on ManeGait and also my neighborhood.

You are welcome to contact me if you want additional information or have questions.

Kind Regards,
Veronica Heathcock

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

Dear Mr. Endres,

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

Sincerely,

Vicky Bailey

COMMENT: I support and believe that the GREEN alignment between Coit Road and FM 1827 is the best option for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves both the company of FarmHouse Fresh (Bath & Body company) which also is a sanctuary for the rescued horses/donkeys/goats FarmHouse Fresh saved, along with one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on these 2 companies - FarmHouse Fresh and ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

As a homeowner and new citizen of McKinney, TX

(as of Aug. 2018)

I STRONGLY SUPPORT the RED OPTION B or RED OPTION E bypass alignment options. My neighborhood would be negatively impacted by any of the proposed (red option A and green) options. My husband and I recently relocated from Southern California, and some of the big selling features of McKinney were the fresh air, country feel (while still being close to the city), and beauty without all of the LA/Orange County traffic. By putting a freeway/massive highway construction project in our literal front yard, you will impose on us all of the negative things that made life in CA unbearable, along with neighborhood safety and depreciating property values (due to proximity to a highway). Both of our homes, in (Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that were located near freeways/freeway entrances. And both locations we had broken into, and after talking w/police we were told it was because thieves target neighborhoods close to freeways. Please

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

COMMENT: "I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."

We use to live in Prosper right by ManeGait. They have served so many and helped just as many. Please save ManeGait & Support the GREEN alignment!!!

Sincerely
William Elliott

I oppose all by-pass options but particularly red option E because:

① E cuts thru Prosper and destroys Lowes + surrounding retail stores which are primary revenues for the town of Prosper; and,

② A bypass will not be heavily traveled. The new proposed outer loop will take significant north bound traffic. 380 will still be heavily traveled so it's best to make it a limited

access highway now because it will eventually need that designation regardless of a

by pass. No traffic study/forecast has yet been

completed per TxDOT. Do your study, forget the politics - engineering + economic logic will tell you to stay on 380.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Stephen Endres:

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Red Option-B bypass alignment option.** This option is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380.

It is also the least expensive option when compared to the cost of the green alignment or Red Option- A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. **I also strongly oppose Red Option-A.** It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.

Red Option-B is the best option to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

I am not employed by TxDOT
I do not do business with TxDOT
I could not benefit monetarily from the project or other item about which I am commenting

Please choose Red Option B.

We have lived in our home for over 16 years. We treasure our neighborhood, our land & moved out here to be away from everything. We totally understand the need for change but respectfully ask that you minimize the effects on our daily lives. It's already so much louder here than before so this would impact this further, along with the pollution (air & trash) that this would create. Our goal is to continue to live here til the end... as in, our request is not even based on property value (which would be) but based on quality of life

(Per Texas Transportation Code, §201.811(a)(5)): check each of the following boxes that apply to you:

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option.

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380.

They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway.

These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—

including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do

not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs.

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to

US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose

Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge

Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best

options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.

NEW ALIGNMENT SEGMENT - RED E

Fall 2018

Why?

- We conducted additional engineering analysis and thought it prudent to get input on another option in the area

Spring 2019

COMPARE THE RED ALIGNMENTS

Evaluation Category	No Build	Red Alignment Option A	Red Alignment Option B	Red Alignment Option E
Number of Residential Property Impacts	0	11	10	13
Number of Current Residential Displacements	0	5	2	7
Number of Business Impacts	0	15	2	6
Number of Business Induced Displacements	0	1	0	1
Number of Business Direct Displacements	0	14	1	4
Number of Business Displacements	0	15	1	5
Future Development Impacts (acres)	0	11	89	51.7
Environmental, Wetland, and Park Land Impacts (acres)	0	30	16	8.5
Cost - Includes construction, ROW, utility relocation	0	\$331M	\$192M	\$253M
Enhances Regional Mobility	○	●	●	●
Satisfies Travel Demand	○	●	●	●
Enhances Safety	○	●	●	●
Supports Future Regional Economic Growth	○	●	●	●

Alignment trends	5 alignment options		2 alignments with options			TxDOT selects recommended alignment

***ADDITIONAL ANALYSIS**

- Economic impacts by alignments.
- More specific input from potentially affected property owners & stakeholders.
- Travel demand modeling including full build out model and demographics.
- Preliminary noise analysis.

TEXAS DEPARTMENT OF TRANSPORTATION

TOGETHER WE HAVE DONE EXTENSIVE ANALYSIS OF THE NEED AND POTENTIAL SOLUTIONS.

Decisions about the next steps of this corridor the process will take time
- that is why it is so important that we start NOW to plan for our future.

WE ARE HERE

INPUT FROM THE PUBLIC IS IMPORTANT AND CONSIDERED BY TxDOT AT EVERY PHASE OF PROJECT DEVELOPMENT
