

Documentation of Meeting with Affected Property Owners

Project Location

Collin County
US 380

0135-11-022, 0135-02-059, 0135-03-048, 0135-04-032, 0135-05-026

Project Limits

Denton County Line to Hunt County Line

Meeting Location

Lorene Rogers Middle School, 1001 Coit Rd, Prosper, TX 75078

Meeting Date and Time

Thursday, March 28, 2019, 6:00 p.m. to 8:00 p.m.

Translation Services

Not requested

Elected Officials in Attendance:

Hon. Darrell Hale Commissioner Precinct 3 – Collin County
Hon. Michael Korbuly Council Member Place 1 – Town of Prosper
Hon. Craig Andrea Council Member Place 2 – Town of Prosper
Hon. Curry Vogelsang Jr. Council Member Place 3, Mayor Pro Tem – Town of Prosper

1	Aaron Brooks	4/11/2019	Email	<p>"I support the GREEN alignment for US HWY 380 for many reasons, including, but not limited to:</p> <ol style="list-style-type: none"> 1. Businesses and homeowners with the forethought to locate away from the Highway, should not have the highway coming to them! 2. Moving a bypass into Prosper, is bullying from McKinney. Prosper is small, needs the tax base any real estate taken by a potential bypass, and again, had the forethought to build in most cases well back from the Highway. 3. There's already a plan for an outer loop, an additional bypass is redundant. 4. Expanding the existing Highway, will improve access to businesses along the Highway in the long term, rather than moving traffic away from them. <p>"I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
2	Ada Carnes	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

8	Al Preisser	4/4/2019	Email	<p>This note is to show support for the Green option regarding 380. A close friend has a son who benefits greatly from the services offered by Manegait . The Green option allows Manegait to continue to provide the services needed. I have personally seen the joy of the kids who use the services provided by Manegait. Please allow their programs to continue by choosing the Green option. Sincerely yours Joyce & Al Preisser</p>	<p>Comment noted. 12	Alex Brannon	4/4/2019	Email	<p>COMMENT: I am writing because I have a loved one at ManeGait, a non profit providing therapeutic horsemanship. I am in favor of the GREEN alignment between FM1827 and Coit Rd for the HWY380 expansion. This is the best option for traffic between Prosper and McKinney. There is no need for a bypass. RED alignment B and E would directly impact ManeGait/s property and cause issues for for their clients. We need to preserve the beauty of the area as well as protect MainGait's ability to provide their much needed services. That said GREEN alignment addresses all these needs and everyone wins.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted. Comment noted.</p>
13	Alex Parker	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. Regards, Alfredo Castillo [REDACTED]</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

18	Alice Mcquitty	4/4/2019	Email	COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
19	Alisa Benson	4/12/2019	Email	Mr. Endres, My name is Alisa Benson. My home is in Prosper, [REDACTED]. I strongly oppose the proposed bypass, Red Alignments E and B. I support GREEN alignment between Coit Rd and FM 1827 for the expansion of US Hwy 380. The proposed bypass will unnecessarily scar the natural beauty of our community and will ultimately destroy Mane Gait Therapeutic Horsemanship. Mane Gait assists countless families, including individuals with special needs as well as our Country's Veterans. I implore you to examine options used in Dallas through University Park when Southbound 75 was widened years ago. Regards, Alisa Benson	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
20	Alison Dishman	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
35	Amy Bartley	3/28/2019	Comment Form	<p>Keep 380 on 380 - Red Option B cuts through a prime piece of property to be developed for the benefit of Prosper residents. This would drastically change the landscape of that land. No to option E as it hurts our tax base by eliminating Lowe's that already exists. No bypass through Prosper is necessary with the Collin Co Outer loop coming.</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
36	Amy Lancaster	4/5/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

37	Amy Limas	4/12/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 44	Amy Penland	4/9/2019	Email	Please support Red Option B for the 380 improvement project. Please see attachment.	Comment noted.
45	Amy Robinson	4/5/2019	Email	COMMENT: I support the green alignment for the 380 Highway expansion. I am a long time volunteer and supporter of Manegait Therapeutic Horsemanship. It is a wonderful place that does an amazing service for our community. A bypass of 380 is unnecessary and would destroy a beautiful area of our community. Thank you for listening to the community's input.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
46	Amy Roller	3/28/2019	Comment Form	<p>I am extremely disappointed that TXDoT continues to propose bypass options when it has been made clear through previous surveys that <u>any</u> Bypass is not wanted by the majority of residents in particular residents like myself who live in Prosper. We purchased a home in Prosper after living 13 years in Stonebridge Ranch because we desire a small community that showed thoughtful planning. Now we are at risk of losing property value, tax revenue and safety for our children because of poor planning by certain land developers. As a Prosper resident, I vote <u>NO</u> to <u>ANY</u> bypass option. Keep 380 on 380 the way it was originally planned.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
47	Amy Stanley	4/7/2019	Email	<p>My name is Amy Stanley. I am new to Texas, having moved to support Toyota's relocation to Plano. My address is [REDACTED]. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. My Toyota career has taken me from Southern California, to Ann Arbor, Michigan, to North Texas. What makes North Texas unique is the proximity of corporate headquarters to rural living. A bypass is unnecessary and would take a direction of over-development within community, limiting the rural character that blends with the urban conveniences. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. We are horse people and see great value in equine therapeutic programs for people with developmental and physical challenges. Since moving to the area, I have quite accidentally stumbled upon people whose children are clients of the ManeGait program. It is a tremendous asset to the community that very likely could not overcome the financial impact if relocation became necessary. Since there are reasonable alternatives for the US 380 route, the community should consider each route's impact carefully. Based on the above, I believe the GREEN option is the most suitable.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

52	Andrew Franco & Elizabeth Franco	4/3/2019	Email	<p>Dear Sir, As a resident of prosper for almost 10 years, I am opposed to any bypass solution being proposed. You need to keep Highway 380 ON Highway 380. Highway 380 through Prosper was just improved/widened. Should have been widened one more lane each side or another alternative would be to double deck it. If there is no choice but to have a by pass I suggest the bypass occur east of Custer Road. Please note that I am not employed by TxDOT, nor do business with TxDOT, now would I benefit monetarily or otherwise from the project or any other item about which I am commenting. Sincerely, Andrew A Franco & Elizabeth A Franco</p>	<p>Comment noted. Elevated freeway sections will not be further considered for the segment between the Tucker Hill and Stonebridge neighborhoods, because an elevated freeway would not significantly reduce the amount of right of way needed to construct it.</p>

The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

55	Angela Hill	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. 57	Angela Thiele	4/5/2019	Email	<p>My name is Angela Thiele. I am the homeowner's president in Creekview Landing, an acreage community situated off of FM 1827 in an unincorporated area of McKinney. I left you a voice message earlier, but thought I would also email you if it easier for you to get back to me via email. I received the Notice of Public Meetings regarding the feasibility study for US 380, which I typically pass on to our residents in case they have not signed up individually to receive updates. My question is whether widening 1827 as part of the 380 improvements is still an option. If so, I would like to advise the residents of that because I think more of them would turn out for these meetings if they knew the answer to that question. I would appreciate you can give me on this question via email or phone. Please feel free to call me at [REDACTED].</p>	<p>Comment noted. Stephen Endres contacted Ms. Thiele on April 10. This feasibility study is not evaluating widening of other roadways.</p>
58	Angelo D Huggins	3/28/2019	Comment Form	<p>None of the options offer expanding existing 380 is acceptable. It has the minimum amount of impact on less people. It is where all the businesses are & the traffic should flow to HEB the businesses developed on 380. If you don't do the Green option, then I say no to 380. This is a waste of taxpayer money. Not enough traffic will use the bypass.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

59	Ann Carrell	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. 63	Ann Henkels	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

64	Ann Radcliffe	4/6/2019	Email	<p>My husband's employer, Toyota, moved us to the North Dallas area almost four years ago. We drove through many different cities while looking for places to put down our roots--Celina, Prosper, McKinney, Denton, Little Elm, Frisco, Melissa, Plano, Lucas, Fairview, Allen, Plano, and Flower Mound. While driving, we as very experienced drivers of Southern California and the congestion exhibited in that state, commented several times how Texas is ill-prepared for what is coming very soon to these areas. TXDOT is at least ten year behind in several areas here in North Texas and US- 380 is a major sore spot. Most importantly, TXDOT should have had jurisdiction and a say on any building projects that directly connects to US-380 especially since it is considered one level lower than an interstate highway. As I've stated we have been here less than four years and the developing of properties off US-380 is out of control.</p> <ul style="list-style-type: none"> · Denton, with a by-pass already built because of their downtown congestion, was granted permission to build Ray Braswell High School on the corner of US-380 and Union Park Boulevard. This nightmare is just rearing its ugly head and will never get better. A combination of new 16-18 year-old brand new drivers, poor access, and lots of congestion is a recipe for disaster. I don't want to read about lives lost because of this poor planning but unfortunately I believe it is inevitable. Denton has solved one area of congestion yet caused more congestion east of their by-pass. · McKinney has built much of its retail area at the intersection of US-380 and US-75. McKinney is continuing their retail spread at the intersections of Lake Forest and US-380 and Harding and US-380. McKinney has also developed neighborhoods such as Tucker Hill and Auburn Hills in the area of discussion. These new areas again were built with the knowledge that US-380 was under review for widening/re-aligning yet McKinney chose to build anyway. Prosper has responsibly planned and implemented a fix for US-380 near congested areas such as DNT and Preston Road by building raised thru-ways and access roads to the local businesses. The town of Prosper has a smaller land footprint than McKinney and does not have the ability to create tax revenue as McKinney. By removing Lowes and other businesses in the center at Custer and US-380, TXDOT severely hampers the town of Prosper's right to prosper. Prosper should not have undeveloped land taken by another city as a "land grab" because Prosper is choosing to develop responsibly and purposefully. Had the homes, schools, and other businesses already been developed at this corner, these by-passes would not have even been an option. It is irresponsible for the city of McKinney to force the problem McKinney created and not planned for growth onto any other city especially when McKinney has had the land to develop properly but has utterly failed. McKinney needs to solved their problem in their own backyard without affecting other adjoining cities. TXDOT needs to be proactive not reactive in building roads especially in areas that are experiencing exponential growth-- the fastest in the nation. I would like to keep US-380 on US-380. If McKinney wants a by-pass then the by-pass should be entirely in the city limits of McKinney and have not adverse affect on neighboring cities. NO ON RED BY-PASS OPTION B. NO ON RED BY-PASS OPTION E. YES ON GREEN OPTION. A yes to red option A IF AND ONLY IF green option to keep US-380 on US-380 cannot be completed. Red option A keeps all McKinney's problems inside McKinney. 	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

69	Annette Fuller	3/28/2019	Comment Form	<p>Keep 380 on 380! It would seem to me that that would make the most sense. Before we moved to this area (we visited family) it was obvious that 380 is a main thoroughfare and that if widening and increased transport was necessary that it would occur in 380. The only bottle neck & transportation issue I've ever incurred has been on 380 near Tucker Hill. You want a bypass? Do it there. None of the alternatives make sense.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
70	Anthony Burokas	4/4/2019	Email	<p>I support the GREEN path east and west between Coit Road and FM 1827 for the expansion of US HWY 380. It is the most efficient path for east-west traffic through the cities of Frisco, McKinney and Prosper. I even urge you to sink it like much of the DNT is sunk, helping to reduce road noise to surrounding communities. I live along 121 and the road noise actually wakes me up some mornings, as well as keeps me up Friday and Saturday nights. With the impending expansion of 121, it's only going to get worse. There are no walls to block the noise, and the highway extends up higher than surrounding structures which spreads the noise everywhere. A bypass is unnecessary. 380 is already a wide thoroughfare. And, not being a toll road, it does not need the excessively wide "double highway" structure of the toll roads. So an expansion along the current route should suffice.</p>	<p>Comment noted. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Initial traffic analysis indicates that a freeway is needed for the 2045 projected population. A freeway cannot be built within the existing ROW.</p> <p>Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

71	Anthony Contreras	3/28/2019	Comment Form	Keep 380 on 380. It is ridiculous to continue to present these "options" that appeases a small constituency when there is already a thoroughfare in place to be improved. Cutting through private land that was never in any city or Town's Master Plan and the zoning changes that would likely result are not acceptable. Any homes or businesses that would be in the right of way of an improved 380 should not be considered. They knew where they were buying or establishing their business and should have done the research like the homebuyers and landowners of property away from 380. None of the Red options even the new one (E) resolve the existing concerns.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
72	Anthony Eggers	4/7/2019	Email	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

78	April Miller	4/4/2019	Email	<p>COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. This is not acceptable. Many lives would be adversely affected. If you have been to this facility and seen the DAILY miracles and positive impact that it has on our community, then any option other than the GREEN wouldn't be acceptable. Thank you for your consideration!</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
79	Arthur Goerlitz	3/28/2019	Comment Form	<p>As a Prosper resident, I have to drive on 380 when I go east or west. I've seen new housing developments and businesses being built along this road and traffic lights eventually have to be added for those risking their lives trying to cut across the "Highway" I am not a fan of any loop plan but would like to see 380 made into a limited access freeway. Prosper hasn't allowed much building along their section of 380. McKinney has quite a bit of business along their stretch and to turn the highway into something like 75 would be an undertaking. That said, I believe that would be what is best for the future. We avoid going east on 380 toward businesses in McKinney because of congestion and instead head south of Frisco.</p>	<p>Comment noted.</p>
80	Arthur Nighueser	3/28/2019	Comment Form	<p>I support Red Option B. Smooth transition Minimum impact on business and home owners Uses undeveloped land - which reduces tax base of municipality west of Custer Non profit horse ranch has 10 years to relocate using TexDot funds Primary concern - safety and ease of access to Tucker Hill - Residential traffic flow rather than construction trucks</p>	<p>Comment noted.</p>
81	Ashleigh Trout	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Red alignment A and E would directly impact Manegait, a physical therapy center for the disabled which requires space and peace in order to ensure the safety of their riders. Alignments running through Prosper are pretty unfair too. This dilemma is a result of McKinney's failure to plan, and should not punish the town of Prosper for McKinney's own negligence. Prosper has been very meticulous regarding its own infrastructure.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
82	Ashley Limas	3/28/2019	Comment Form	<p>I work with a business owner whose property is located on the southwest corner of Highway 75 & 380 (Lone Star food store Calero). This convenience store location is a key site for our company and employs 8 full-time employees. Convenience store properties, located in high-traffic areas, are irreplaceable. We service thousands of customers a week, with food and fuel needs. This location has assisted customers on their daily commute for decades. We as a company support the Red Option B alignment, as this option is the least disruptive to homes and businesses in the area. Thank you.</p>	<p>Comment noted.</p>

83	Ashley Limas	4/12/2019	Email	<p>I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 84	Ashley Malfitano	4/9/2019	Email	<p>Our family received a letter in regards to the proposed changes for 380. First I would like to plainly state that US 380 should stay in its initial footprint. Our family built a home in the Heatherwood Neighborhood 7 years ago, to raise our family. If the path of 380 is moved north it would directly affect our neighborhood and the economy in the north area. The lack of poor planning of future road info structure during this major housing boom should not be corrected at the expense of the citizens living in the north region where you want to relocate the road. Please keep 380 in its original footprint.</p>	<p>Comment noted. Additional right-of-way would be required to add capacity to the existing US 380.</p>
85	Aubrey Kennedy	3/28/2019	Comment Form	<p>Fix 380 on 380! We moved to Whitley Place in Prosper, TX due to the small town feel. We picked our neighborhood to be away from any major/minor highway. We do not want a bypass through/by our house. We are intentional in our purchase and should not be penalized for TX DOT to appease a judge or Mayor Fuller who benefit financially. 380 has always been designed to be a limited access highway – No bypasses. A bypass does not even make sense. Lowering intentional property value, misplacing homeowners, destroying wetland, and decreasing Prosper's tax income is simply unacceptable. 380 will need to be fixed, the noise pollution, vehicle pollution, and other environmental impact has already done it's damage on 380. We do not want any highway causing pollutions moved our direction. The only option is to fix 380 on 380.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 86	Austin Anderson	3/28/2019	Comment Form	<p>My name is Austin Anderson and my home is located on Bloomdale Rd/123 in McKinney, TX. The proposed 380 bypass would be less than 1000' from my primary residence and destroy the value of my home. Homes in Heatherwood are already feeling the impact of the proposed bypass and are losing value and selling on the market. The construction and traffic associated with the bypass could also introduce structural damage to my home, further encumbering my wife and 6 month old son. Speaking to some of the reps tonight, they mentioned "the path of least resistance" being the preferred option. To me, the best option and plan of "least resistance" is to build the outer loop. There isn't as much development where the outer loop is proposed as it is only a few miles north of the currently proposed bypass. I also believe that the outer loop will make the 380 bypass obsolete and no one will use it. I appreciate your time and concern in this matter.</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
87	Barb Parrish	4/9/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. 90	Barbara Eubank	4/4/2019	Email	<p>In short, I want to say, "what are you thinking?" when aligning the Coit Road to FM 1827 with anything other than the <u>Green Option</u> ! You will hear the arguments that it is the "optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. " But the reality is that we have children who are not welcome in our society right now who benefit from a quiet serene environment. We are not talking about "units" or "miles" or "traffic patterns".. we are talking CHILDREN ! It is the GREEN alignment which preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. This program was built far away from the main thoroughfare and the "city" of McKinney many years ago. I understand the boom that has happened to bring the need for traffic control to this area, but when other options are on the table why would a caring family-friendly city purposefully aim to destroy this exceptional property and displacement of this vital community service. I would like to join the hundreds of other ManeGait supporters to beg a serious look at the Green Option.... and NO OTHER !</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>

94	Barry Farris	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

96	Barton Johnson	4/5/2019	Email	<p>As a resident of Collin County and a Texas Realtor (license holder ██████), I am well aware the impact US 380 expansion will have on ALL in Collin County as the population increases at a very rapid rate. (I note the 13% population increase recorded in the last census for Collin County versus just 7% for all of Texas. Also, I am informed by the Texas Association of Realtors (TAR) that approximately 350,000 make Texas their residency each year.) Thus, I am very aware of the difficult decisions the Texas Department of Transportation will face in administering the road development of US 380, in ALL DIRECTIONS, from Denton TX to US 75, and actually beyond. The Mane Gait Therapeutic Horseman facility provides a very positive impact on those having personal challenges which the majority of us do not face. I have seen the positive influence it's efforts provide for ALL who support their mission. I have been a donar and volunteer in Texas AND St. Louis County, MO. I ask that you find a solution which will be as fair as possible to all as Texas & Texans advance through the first half of this century...and beyond, as there are many issues of populations redistribution which will occur.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
97	Becky Morris	4/5/2019	Email	<p>I am a Prosper resident and I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

98	Ben Pruett	4/1/2019	Email	<p>Hi Stephen, We are quite pleased with the "NO US 380 Bypass" (Red Shirts) turnout last Thursday evening. What you saw was a group of more than 150 ETJ, City of McKinney, and Town of Prosper residents expressing their opposition to TxDOT's proposed U.S. Highway 380 RED bypass option. Residents that completed comment cards at Thursday's meeting did not have their comments scripted or comments cut and pasted, nor were there proxies. These residents provided personal observations and concerns about how the proposed bypass will effect their lives. Some may have expressed concern about the process. ETJ residents may have expressed concerned that their voice is not being heard or considered. The comments may have a similar theme, but they represent a diversity of opinion. <u>You are about to get inundated with comment cards from the Stonebridge Ranch Community.</u> The Stonebridge Ranch Community Association (SRCA) is mounting a campaign in favor of Red-Option-B or Red-Option-E. SRCA is asking residents to submit comments before April 12. Here is the link to their website with their stated objective to "Preserve Our Way of Life." https://www.stonebridgeranch.com/txdot-traffic-corridor-proposals/</p> <p>The SRCA is proposing several alternatives for submitting comments.</p> <p><input type="checkbox"/> Add your name and address to the bottom of a pre-filled Comment Card. Here is the link: https://www.stonebridgeranch.com/wp-content/uploads/2019/04/US-380-MAPO-Comment-Form_Red-Option-B-or-Red-Option-E_040119.pdf</p> <p><input type="checkbox"/> Copy this comment (Here is the link: https://www.stonebridgeranch.com/wp-content/uploads/2019/04/US-380-Comment_Red-Option-B-or-Red-Option-E_040119.pdf) and paste in an email. Subject line will be "US 380 MAPO (Prosper) Comment Card." <input type="checkbox"/> Requesting residents to provide their name and address giving SRCA permission (proxy) to fill out and submit the comment card for them.</p> <p><input type="checkbox"/> Requesting people to stop by the SRCA office and complete a card in person and the SRCA will submit the card for them. Residents are also encouraged to leave their comment cards in SRCA's mail slot by the front door and the SRCA will forward the comment cards.</p> <p>It does not surprise me that SRCA is requesting its residents to submit comments. However, the residents are not submitting their comments. They are being asked to submit comments prepared and approved by the SRCA Board of Directors. However, what is really surprising is SRCA's request for proxies. I do hope TxDOT recognizes the questionable methods SRCA is using to "obtain numbers" rather than valid comments. Sadly, the process TxDOT and its consultant (Burns & McDonald) have chosen has created a lot of unnecessary animosity among McKinney residents, between McKinney residents and residents residing in McKinney's ETJ, and between McKinney and Prosper residents. Unfortunately for some, the animosity will likely remain for some time.</p> <p>It is time to do what's right and select improving U.S. Highway 380's current GREEN alignment as a limited access highway.</p>	Comment noted.
99	Ben Pruett	3/28/2019	Comment Form	<p>U.S. Highway 380's GREEN alignment, and the U.S. Highway 380 proposed RED bypass alignment may be viable options for moving traffic through the City of McKinney. While both may be viable for moving traffic, what consideration is TxDOT giving to the comparative environmental and economic impacts? Environmental Impact Baseline improving U.S. Highway 380 in its Current Alignment - GREEN Alignment the environmental negative impacts associated with improving U.S. Highway 380 in its current footprint to a limited access highway are incremental. In other words, the highway and its existing use have established a baseline to assess the project's additional negative environmental impacts. Mitigation strategies can be developed to minimize the incremental negative environmental impacts. However, current environmental impacts can potentially be mitigated to levels below the establish baseline, which should be scored as positive environmental impact. Construction U.S Highway 380 Bypass – RED Alignment The RED bypass options baseline is established by the corridor's current environment. The proposed bypass introduces a myriad of transformative negative and environmental impacts, including air quality and noise impacts, and additional impacts affecting the wetlands, wildlife, and possibly the North Texas's water supply itself. Gary Graham, Director of Engineering, stated in McKinney city council study session (March 19, 2019) that even with mitigation "its not going to be as tranquil and peaceful as it is out there today." Homeowners and neighborhoods located along the bypass corridor will see their lives transformed. Families must live with the lasting deteriorating negative environmental impacts with the introduction of a limited access highway to their neighborhoods. In Conclusion Comparatively the proposed RED bypass alignment's negative environmental impacts are much greater than the GREEN alignment's. The proposed RED bypass alignment's impacts cannot be fully mitigated. Whereas, mitigation strategies for the GREEN alignment may have a positive effect of reducing the incremental environmental impacts below the baseline. How much consideration is TxDOT giving to the comparative environmental cost in selecting the preferred alignment? Economic Impact-Cost vs. Benefit Improving U.S. Highway 380 in its Current Alignment-GREEN alignment Another significant issue is the cost - benefit of improving U.S. Highway 380's current alignment to the limited access highway, including the economic impact imposed on commercial businesses. There is no argument that the cost to improve U.S Highway 380 a limited access highway will be significant. However, commercial business districts have a history of adjusting, redeveloping and driving following similar projects. The commercial corridor along U.S. Highway 380 will be a completely different economic model when improvements are completed in fifteen to twenty years. The economic benefits for investing in the GREEN alignment are significant. The Perryman Group Study (2017), funded by Collin County Commissioners Court, estimates economic activities along U.S. Highway 380 will generate more than \$300 million annually for the City of McKinney and the McKinney Independent School district at maturity. Additionally, the study estimates the State of Texas will receive more than \$900 million in tax revenues annually. Constructing U.S. Highway 380 Bypass-RED Alignment The cost to construct the proposed U.S Highway 380 bypass are projected to be significant, but less than improving U.S. Highway 380 in the current alignment. However, the economic benefits will likely be significantly less than that projected for the GREEN alignment. Additionally, there is the economic cost imposed on residential properties and neighborhoods transformed by the project. Unlike commercial businesses, the economic value of adjacent residential properties and neighborhoods do not recover following the construction of a limited access highway (freeway). In fact, the economic and social cost are long-lasting. The bypass also imposes an economic cost on the Town of Prosper with a seizing of commercial businesses and the loss of property and sales tax revenue. The loss in tax revenues are estimated to be over \$4 million annually. This does not include revenue losses from future development. Their proposed bypass will not generate and economic benefit for the Town of Prosper or its taxpayers. In Conclusion The proposed RED bypass alignment has not proven to provide a significant economic cost benefit for the City of McKinney. The RED alignment imposed an unrecoverable economic penalty on the Town of Prosper. The economic cost benefits, offset by the economic penalty of Prosper, are not sufficient to justify selecting the proposed RED bypass alignment. Is protection of McKinney's business and commercial sector more important in consideration of this project then the welfare of families and neighborhoods forced to live with the lasting deteriorating negative environmental impacts by the proposed RED bypass alignment? TxDOT Survey Results Two public input periods in 2018 returned over 14,000 responses. An apparent record for the department. In all cases, Collin County respondents in both surveys preferred that TxDOT update and modernize US highway 380 in its current location. Just how much does TxDOT value the surveys and public comments the solicited?</p>	<p>Comment noted. Environmental and economic impacts are 2 of many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>The Perryman study completed January 2017 analyzed potential economic effects of converting portions of the existing US 380 corridor into a freeway. The study did not analyze economic effects of new location alignments.</p> <p>The Collin County Feasibility Study team is conducting an economic analysis for both the red and green alignments and will present their findings at the Spring 2019 Public Meetings.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p>
100	Ben Silver	3/28/2019	Comment Form	<p>I live on Grove Cove and have a first hand need for 380 to stay on 380, I feel that TxDot has not done all the studies needed to make a fair decision. I think a new option is needed to make a more rural option not near the housing development along Bloomdale. If you went ½ - 1 mile north it would help elevate future foundation problems and issues that TxDot had at the LBJ expansion plans</p>	Comment noted. Initial traffic analysis has indicated that an alignment closer to Frontier Parkway is less attractive from a traffic perspective.
101	Ben Watson	4/4/2019	Email	<p>I fully support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

102	Benjamin Watson	3/29/2019	Email	<p>Firsr if all, thanks for your hard work. I had the pleasure of living in Denton County for years and have been beyond impressed with TxDOTs work on 35E. That being said, I've had a question on my mind so here it goes: I'll begin by asking, why the strong avoidance of Tucker Hill? Financial motivation from developers or (two) former politicians from the county and Plano? The residents of Tucker Hill (and Stonebridge too, which makes no sense as their inner roads (Virginia, etc.) will be torched by traffic with a bypass) chose to be on a US Hwy, claim to be strongly against businesses at 75 and 380 being taken out, yet strongly oppose alignment Red A, which would avoid that... makes sense.... *sarcasm* My name is Benjamin Watson. I live at [REDACTED], which is within the city limits of McKinney, in the proposed 850 home community if Willow Wood. The newest proposed red alignments A and B, will clip our neighborhood, and come within hundreds of feet of my home and hundreds of others. There is also poured concrete where new homes will be build that the bypass will actually go through. The utility easements and pluning has already been established. This is one of the main reasons why we selected to live where we do. Keep in mind, we wee less than FIVE MINUTES from the future Outer Loop. There are many reasons why the bypass is not a desirable alignment. Those impacted by a bypass chose NOT to build or live next to a US HIGHWAY. I work off Custer and Cant imagine the impact creating a bypass beginning at Custer will have. I realize and appreciate that US Highway 380 needs improvement and support an alignment that stays on the current footprint as planned in the master thoroughfare plans of McKinney, Prosper and Frisco. Keeping 380 in its current footprint has less substantial impact on families, lives, and children. If this was such a viable option (keep in mind we've known about Collin county growth for years and years) why wasn't this proposed prior to 2 years ago? Build out the arterials like in the 2040 plan.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. The green alignment as proposed in October 2018 would displace approximately 50 more homes and 275 more businesses than the proposed red alignment. Evaluation matrices for each alignment are posted on Drive380.com.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
103	Bill and Daniell Bowman	4/7/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
104	Bill and Sharon Hockensmith	4/9/2019	Email	<p>We have been homeowners in Stonebridge Ranch and citizens of McKinney for more than 14 years. We want you to know that we strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment options for US 380. We believe that these options are the least disruptive to businesses, existing homes and families living in our neighborhood and those along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. We OPPOSE the proposal to widen US 380 (the Green Alignment option) because this option will destroy existing homes and businesses along US 380—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of business sales and property taxes in McKinney and possibly eliminate jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets feeding onto Highway 380, increasing traffic, noise and air pollution in our neighborhoods, as drivers seek shortcuts to access a more robust US 380. This would endanger our children and grandchildren who regularly bike the streets of Stonebridge Ranch to get to school, use our parks and visit their friends. We also strongly oppose Red Option-A. It requires a large interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. This, too, would decrease safety on our residential streets as more drivers seek shortcuts. Furthermore, both the Green Alignment and Red Option-A will depress home values in our area and decrease property-tax revenues needed for increased police and fire protection. For the thousands of residents, like us living in Stonebridge Ranch, the Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential safety of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 105	Bill Benton	4/8/2019	Email	<p>I would like to register my support for the green alignment down 380. Both red alignments are properly colored as red means stop or danger. Those alignments are disruptive to economic activity to businesses along 380 and will wipe out one of Collin County's treasures, ManeGait. I know firsthand the value of ManeGait to the volunteers and the members of our communities with disabilities. Take is down the current 380 alignment and do the right thing. Thanks for giving our objections thoughtful consideration.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

106	Bill Darling	3/29/2019	Email	Good morning Tony, Your meeting sure drew a crowd last night. With all due respect I wanted to ask for some clarification. The new Alignment Red E shown last night was the same as the one your team presented to us at ManeGait on March 20th. Many many people came up to me last night indicating that the new alignment was being presented as one that saves ManeGait. Can you verify for me that it was being presented in that manner? I didn't go to a table to hear the presentation to know if that was the case. I certainly hope that wasn't the case due to our response to you on March 20th and in my follow up letter of Monday March 25th. Both at the onsite meeting and in my letter I indicated the difference in Alignment B and E did not allow our organization to stay on that property. If there needs to be clarification in this regard I'm happy to be available.	Comment noted. Alignment E does not directly displace ManeGait; however, it is located in close proximity to it. Impacts to the ManeGait facility are being considered along with other potential impacts on the human and natural environments.
107	Bill Douglas	3/28/2019	Comment Form	As a business man and owner of a business located at the intersection of US 380 & US 75 in McKinney, TX (██████████), I support RED OPTION "B" bypass alienment or "E" are acceptable. Widine US 380 as proposed would put us out of business in McKinney.	Comment noted.
108	Bill Douglas	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. 110	Bill Gross	3/28/2019	Comment Form	After looking at the latest revisions to the proposed 380 alignments, I continue to STRONGLY FAVOR the 380 on 380 alignment. Thank you Bill Gross	Comment noted.

111	Bill Martin	4/3/2019	Email	<p>I work with a business owner whose property is located on the southwest corner of highway 75 & 380 (Lone Star Food Store Valero). This convenience store location is a key site for our company and employs 8 full time employees. Convenience store properties, located at high traffic corners in McKinney, are irreplaceable. We service thousands of customers a week, with food and fuel needs. Although our company has owned this location for a couple of years, the location has assisted customers on their daily commute for decades. Please see the statement below to understand what we are requesting for the proposed 380 expansion. As a business owner in McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
112	Bill Meilahn	4/1/2019	Email	Sir, I strongly support the widening of 380, "in place," and its conversion to a limited access freeway.	Comment noted.
113	Bill Ruff	3/28/2019	Comment Form	If 380 cant be kept and expanded in its original alignment, it is really difficult to understand the desirability of either option "B" or option "E". Neither makes much sense compared to Red option "A" – Assuming you have to have a bypass at all. Compared to option "A", both "B" & "E" are much longer & affect many more residences & in the case of "E", some significant tax revenue producing (Prosper) [Lowes rest]	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Red B displaces fewer residences than Red A or E.</p> <p>If a bypass alignment is chosen, the existing US 380 will remain in place.</p>
114	Bill Terrell	4/9/2019	Email	<p>I live in WALNUT GROVE ESTATES at [REDACTED]. I strongly SUPPORT WIDENING 380 in its existing alignment. I am strongly AGAINST ANY bypass options. Bypass option Red B passes through Prosper's sovereign territory against the STRONG objections of the City of Prosper and the citizens of Prosper and it obliterates ManeGait Therapeutic Horsemanship charity center for children and adults with disabilities. Enough said! Bypass option Red E also passes through Prosper's territory, again against Prosper's strong objections. It destroys several small new businesses and obliterates the giant new Lowe's store that was built to serve the neighborhood. Red E Option crosses Custer Rd to enter Walnut Grove and eliminates several families' long-time homes in its path, then continues on through several lots that families have bought to build homes on in the future. Red E's path will then continue right by ManeGait, touching the ManeGait's riding field, and subjecting the at-risk children and adults in therapy to significant truck and high-speed highway traffic noise and exhaust pollution. The Red E Option would then run directly over two more Walnut Grove family homes and continue to take a portion of the back yard of another home. And, the entire remaining population of West and North-West Walnut Grove would be subjected to all of the highway noise and exhaust fume pollutions from the Red E bypass. You may not consider us a tightly-knit neighborhood because we are separated from each other by woods, creeks, beautiful rolling hills, and mature trees. But I assure you, we truly are a closely knit community. We all know each other and watch out for and take care of each other. Early on in the 380 planning stages, the Walnut Grove community was lead to believe by TxDOT personnel that TxDOT would not violate and obliterate existing neighborhoods, except as an absolute last resort - and a bypass is hardly a last, or even a reasonable, resort. Yet, here we are, trying to preserve our neighborhood from incursion and destruction 2 by a major US Highway and literally having to fight to save our homes and our highly prized, long-time quality of life. All bypasses, Red A, Red B, and Red E ultimately disrupt families and follow Bloomdale Road where there are many subdivisions that would likewise be negatively affected. Many homes and properties would be directly impacted and even more would suffer quality of life issues, decline in property values, noise and fume pollution, etc. To force a new, unwelcome major highway through Walnut Grove, a long established neighborhood of over 50 years, existent long before Stonebridge, Eldorado, Tucker Hill, etc, seems unconscionable. My family and I have lived here since we built our house here in the woods in 1978. The Red E option goes within feet of my property line, the smell and sound of which, if I were sitting on my deck drinking my morning coffee, would daily evoke very unpleasant thoughts about politicians and state public servants. Highway 380 already has an existing, large footprint with most of the needed right of-way for future expansion already in place. Why not utilize it and just expand existing 380 instead of re-inventing the wheel, thus saving the tax-payers from spending a gazillion dollars for a bypass to nowhere. We, as a group, consisting of Walnut Grove and the other affected Northwest McKinney sector subdivisions, have been supporting expansion and enhancement of Highway 380 and have been actively opposing ANY bypass for over 2 years. Two of our Collin County Commissioners (the ONLY commissioners who represent constituents directly affected by 380 options) have come out very publicly and have been very outspoken FOR WIDENING 380 and keeping it in its existing alignment. It's also interesting to note that these two commissioners, Susan Fletcher (District 1) and Darrell Hale (District 3) represent the ONLY two districts which totally engulf and surround the Entire 380 corridor. (Please see the attached District Map of Collin County Commissioners.) Since they both live in those districts, and represent both of those districts and the residents and the highways within those districts, they are very familiar with the critical situation and the dire impacts to and direct negative effects on their constituents of an unwarranted bypass. Our two involved County Commissioners have expressed, as do we and all of our Walnut Grove and Bloomdale Road and Prosper neighbors, and even several of the McKinney City Council members, that the best choice for all of the people of Collin County, both 380 users and tax payers, and Prosper city is to WIDEN EXISTING 380. Surely this all must carry at least SOME weight with TXDOT. I know that this has been somewhat wordy, but I appreciate you struggling through to the bitter end.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. None of the proposed alignments divide an existing neighborhood, but all of the alignments will displace homes.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Initial traffic analysis indicates that an additional east-west freeway is needed to satisfy the 2045 projected population. A freeway cannot be built within the existing ROW.</p> <p>An alignment along the existing US 380 is expected to be more expensive than a bypass alignment.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p>
115	Bill Walker	3/28/2019	Comment Form	GREEN ROUTE IS THE ONLY FINANCIALLY VIABLE OPTION.	Comment noted. The green alignment is expected to be the most expensive alternative.
116	Billie Cooper	3/28/2019	Email	I support the green alignment on Hwy 380 expansion. My grandson with cerebral palsy rode there from 6 to 18 years of age. This has been the highlight of his, and many other kids with special needs lives. Please don't take this wonderful place from present and future riders. There is very few places that they can go that improves there emotional as well as physical lives.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.

117	Bin Li	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 118	Blake Goodwin	4/8/2019	Email	<p>Hello, This is Blake Goodwin at [REDACTED]. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship which I volunteer at. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services, not to mention the issues which arise from putting a major road next to a horse facility. Not to mention, the noise and distraction to the riders.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
119	Bob Seei	3/28/2019	Comment Form	<p>Unbelieable! I have been a loyal republican for 51 years of voting, donating, volunteering etc. The <u>only</u> house in Whitley place, Prosper that had a "Ted Cruz" sign in our yard when he ran against the Irishman "Robert Francis O'Rourke". With this behavior I am going to vote straight republica Democratic!! In the next state elections. I will then vote Republican till i die. Shameful & disappointing Keep 380 on 380 !</p>	<p>Comment noted.</p>

128	Bree S Kihm	3/28/2019	Comment Form	<p>380 should be fixed "on 380". No bypass options should be approved. A 380 bypass would negatively affect McKinney and Prosper and ruin what makes it "unique by nature" Additionally a bypass would impact ManeGait Therapeutic Horseback riding where my son and hundreds of other receive/have received resources. In addition, everyone has a choice in where they live. As a former McKinney resident who live ~1 block from 380 I know that I moved there <u>knowing</u> about the traffic & potential for future building, I also choose to move away from 380 for a more peaceful rural life as my children grew older. A 380 bypass should NOT be approved and NOT be an option.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
129	Brenda Istre	3/28/2019	Comment Form	<p>I feel it should stay on 380. The majority of traffic on 380 now will continue to use 380 due to the growth of businesses along 380. It is still too close to Mane Gait when you consider you are working with disadvantaged adults & children that may be upset y the noise. If someone is still pushing this bypass then let it be through McKinney only and use Opt. A. Stay out of other people's towns & tax bases that have been following their growth plan.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
132	Bri Westbury	4/11/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
133	Brian D. Audia	4/4/2019	Email	<p>I would like to comment regarding my support for the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. In my opinion it is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. As a resident that owns a home in this area, does business in this area and recreates as well, the other options are far more intrusive in this great community of communities. Please support the GREEN alignment.</p>	<p>Comment noted.</p>

134	Brian De Paul II	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 140	Brian Woodward	4/4/2019	Email	<p>My name is Brian Woodward, I am a McKinney business owner operating out of 1005 S. McDonald St and would like to voice my support for the GREEN alignment between Coit Rd and FM 1827 for the expansion of US HWY 380 as it appears the most optimal and efficient path for all traffic. Any bypass would be a nightmare and lead to more traffic, congestion, and confusion through our city. I very much oppose all other alignments, but vehemently oppose Red Alignment E and B due to the direct impact it would have on ManeGait Therapeutic Horsemanship.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

142	Bruce Blackmon	3/28/2019	Comment Form	<p>I fear that the output of the TDOT process for determining the final solution will <u>NOT</u> be consistent with the goals. The key to getting a consistent, reliable output for any process is process discipline and the required time to evaluate any process changes that occur along the way. TDOT in my opinion, has allowed too much variation in their process (new alternatives, options) without allowing sufficient input and evaluation of these "mid-process" changes. As a "customer" of the output, I have lost faith in the process to give the best output for all customers; rather it has been compromised by "squeaky wheels" and "unvetted" changes.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
143	Bruce Carlin	3/28/2019	Comment Form	<p>Widen 380 into a 6 lane controlled access highway. No ByPass</p>	<p>Comment noted.</p>

152	Caren Wilson	3/28/2019	Comment Form	<p>My name is Caren Wilson and I live at [REDACTED]. I am strongly opposed to all bypass options to 380. All the bypass options will negatively impact the neighborhoods and "country" living in Prosper. I have lived in Prosper for 19 years moving from Dallas (one block off LBJ Frwy). I took in consideration the growth of the area when choosing my home. Living close to a bypass was not even a consideration. I realize that US Hwy 380 needs improvement and believe that will best serve the communities of Frisco, McKinney, and Prosper by making those improvements ON US Hwy 380.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
153	Carleen Patterson	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
154	Carol Bloxsom	4/4/2019	Email	<p>I would like to express my personal opinion on the US 380 by-pass, which has cause quite a stir in Prosper & McKinney. I will only support the GREEN alignment or Option A By-Pass. Both of these options will have very little impact on existing business, home owners and Town of Prosper. Why should Prosper give up over 80+ acres for a City of McKinney problem? I am also a volunteer at Mane Gait and previously I volunteer for over 10 years at Equest, another Therapeutic Horseback riding center. I personally seen the impact that Horses have on Veterans, Veterans family suffering from PTSD and individuals with disabilities. As one rider stated "no one knows that I have a disability when I am riding a horse" It appears that TXDOT is siding Jack Harvard, McKinney and playing politics vs what is morally, ethically and cost efficient, by picking the Green Alignment or Option A... Secondly I don't appreciate one of Jack Harvard's employees calling me a "flat earthers"</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
155	Carol Clower	3/28/2019	Comment Form	<p>We live along Bloomdale Road & the Bypass would go behind our property & destroy the (our) neighborhood. There is talk of an outer loop so why is this even necessary? 75 in Dallas was improved with existing business why cant the same be done to 380? Also when it cuts back into McKinney/Prosper makes no sense when the traffic increases between Custer & the Toll Road ***** it should be connected to Preston 289 or the Toll Road! Keep 380 on 380</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
156	Carol Danielson	3/28/2019	Comment Form	<p>As a Prosper resident who retired here to enjoy the peaceful, slow pace of the town, we are disgusted that TXDOT is considering our town to alleviate McKinney's problem. We oppose Red B&E plans! If Custer/380 intersection is impacted, Prosper will lose a major tax provider in Lowes and surrounding businesses. We pay exorbitant taxes now and cannot afford to increase the amount</p>	<p>Comment noted.</p>
157	Carol Gillis	4/9/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. 158	Carol Halperin	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
159	Carol Harned	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Please do not ruin the this great asset to our community, my family and my child with disabilities.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
160	Carol Little	4/1/2019	Email	<p>Stephen, I appreciate all the "studies" but I am very disappointed that TX Dot has once again decided to affect Prosper and Non Profits by running a by-pass on Custer. TX Dot has decided to play the political game and as a resident of Prosper and a volunteer at Mane Gait, I am deeply disappointed in your feasibility studies and continuing pushing the by pass onto Custer vs Stonebridge or Ridge Rd. It is not the Town of Prosper nor Prosper residents fault, that the City of McKinney planners didn't not plan for their growth. Yet TX DOT is putting the majority of the 380 By- Pass headaches and congestion on the Town of Prosper. The only people that are going to get rich off this feud will be attorneys.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

165	Carrie Archer	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I don't understand why it is even being considered. The cost would be a lot more to clear the areas for the red alignments instead of just expanding where 380 already is! Use the money saved for other road repairs that are needed!!	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
166	Carrie L. Botts	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
167	Carrie Long	4/4/2019	Email	I am writing to share that I am in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper and is the original plan that should not be deviated from. A bypass is unnecessary and would scar the beauty of our community and impact many families, properties and the property values negatively. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services to many children and families in North Texas.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
168	Cassandra Seitz	4/7/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. There is not a 4 level interchange proposed near Ridge Road.
171	Cathy Cheatham	4/8/2019	Email	Please accept my support of the Green Alignment of 380 so that we don't impact the magic of ManeGait. I have been a special educator since 1981 and currently work as an educational diagnostician. Through my career, I've been involved with providing the most effective services for our special education population academically, socially, behaviorally, and motorically. I've worked with numerous Occupational and Physical Therapists and have seen trendy therapies come and go. The equestrian therapy provided at ManeGait is the real deal. I have worked as a volunteer at ManeGait since 2012 and feel that the time I spend there is 100% my happy place because I have seen this positively effect the development of all kids involved. For all of the Aylas, Graces, Hannahs, Ethans, Traces, Hazmas, Cammy's, Logans, and Michaelas, of the world, please support the Green Alignment to enhance the development of these our most needy and deserving citizens.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.

The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
175	Chad Gibbons	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 182	Charles Patmore	4/7/2019	Email	<p>My 6.5 acre horse property is right in the cross-hairs of the red alignment of the proposed US 380 bypass. This unnecessary loop will destroy wetlands, wild animal habitat and horse sanctuary property like mine. It will cause major disruption, financial hardship and mental anguish in my life. All of the surveys that have been completed heavily favor fixing US 380 on US 380. The people have spoken and a solution like widening and/or creating a double deck like 635/LBJ in Dallas or US 183 in Austin, just makes more sense for the property owners and business owners on US 380. At this point, the only explanation for ignoring your own surveys and defying the will of the property owners, business owners and residents of McKinney can only be explained by corruption in the heavily conflicted McKinney City Council. I believe there should be an investigation into real estate interests both directly and indirectly held by the members of the council. For the sake of the wetlands, natural habitat, private property, Erwin Park, MainGait and other unique parts of this wonderful part of Collin County Texas..... I ask you to save our strong horse culture and do the right thing. Abandon your plans for a US 380 bypass. Thank you for your time.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Elevated freeway sections will not be further considered for most of the corridor because it does not significantly reduce the amount of right of way needed to construct it. Drawings of the typical sections being considered are available in the public meeting boards posted on Drive380.com.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p>

186	Charles Trimble	3/28/2019	Comment Form	<p>If even Conservative population estimates of Collin County came true, the highway infrastructure will fall far short of what is necessary. Dallas County has five East/West highways (including PGBT) all with 4+ lanes in each direction. Even if the current 380 and a bypass are built, along with future outer Loop, Collin will still be behind. I believe that not only should a bypass be built, but that row along the current 380 should be reserved so that in the not so distant future it can be converted to a limited access freeway. I realize that both plans have critics on both sides but that an honest discussion needs needs to happen about future gridlock. That way at least ten years down the road people who move in will know whats planned</p>	<p>Comment noted. Initial traffic analysis does not indicate that both the red and green alignments need to be built as freeways.</p>
187	Cheri C Stanwix	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I look forward to having 380 continue on 380 and see no reason for any other route.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
192	Cheryl Ullom	3/28/2019	Comment Form	<p>Keep 380 on 380 1. New alignment take out Lowe's - a huge tax base for us. 2. The outer loop is too close for the bypass options. 3. The out loop may help negate the need for any bypass. 4. Environmental impact of bypasses are huge when compared to keeping 380 on 380.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
193	Chidananda Sular	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 197	Chris Dugas	3/28/2019	Comment Form	<p>We purchased our home in Whitley Place due to its distance AWAY from Highways, Tollways and Interstates. It does not make sense for a major highway bypass to now be moved much closer to our home. There was a major highway (380) as close as we ever thought it could be, and this bypass will hurt my property value when I purchased away from the highway on purpose.</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
198	Chris Keating	4/15/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services."</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
199	Chris Kokenes	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 205	Christine Churchill	4/4/2019	Email	<p>COMMENT: I understand the need to expand HWY 380 due to the increased traffic. After reviewing the options I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It would address much of the current traffic problems and looks to be an efficient path for east-west traffic through the cities of McKinney and Prosper. I think a bypass is unnecessary and would adversely affect many established facilities. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

213	Christopher Richardson	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

217	Christy Whitfill	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. ManeGait provides exceptional services for those affected by disability in our community, and also for our wounded veterans who have given their lives to serve our country. Thank you for voting to keep the GREEN alignment.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
218	Christy Williams	3/28/2019	Comment Form	Why don't they just fix 380 and go up with the 380 Hwy	Comment noted.
219	Cindy Evans	4/4/2019	Email	Dear Stephen, my husband and I have lived at [REDACTED] for the past 35 years. We have enjoyed the peace and tranquility living in the country until NOW. With the widening of Custer Road, eminent domain; Atmos gas lines running and survey stakes throughout our property, proposed water line and now the 380 Bypass – our life has been turned upside down. We understand growth but believe that the City fathers lacked foresight in the future growth of the City at our expense. The Red Alignment E and B will be a major blow to us and have us "living under bridge". "I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. 224	Clint Moss	4/7/2019	Email	<p>I fully support the GREEN option to 380 expansion as the ONLY option that makes sense on every level. 1.Financially - At the recent TxDot meeting presenting the new bypass option to the community of Prosper, a chart was displayed showing the financial benefit of a bypass and the business/residential impact of each option. Bypasses were presented as having a much lower impact on most levels. I feel that this chart is a misrepresentation of the whole picture. Assuming a Bypass was chosen and developed, the current 380 is STILL going to need major improvements to help with traffic flow as the communities grow. Why not just develop 380 along its current pathway (the GREEN option) and do it right? Most of our citizens that use 380 at peak traffic hours are commuting to and from southern destinations. These commuters will not be using a northern Bypass to access 75 and will not be using a northern Bypass on their return home. The cost of improving 380 along its current alignment needs to be added into any cost of Bypass to represent the entire picture. You might argue that as the communities in the North develop they will be using the Bypass. True, but there is also the Collin County Outer Loop that is under current development for this problem. 2. The GREEN option adheres to the MAJORITY opinion by citizens in EVERY city along 380. Why is a Bypass still being pushed upon everyone? It seems TxDot is trying very hard to sell everyone on a Bypass as if a Bypass is the only real option and the decision is already made. How about listening to the surveys TxDot itself requested from the citizens? You already know what we prefer, by a large majority. Stop coming up with alternatives. I have to assume either a decision is already made or there is intense political pressure being utilized to save a minority opinion of citizens and businesses. 3.Environmental - A Bypass will destroy native wetlands and the beautiful landscape we all enjoy. And again, 380 will still have to be improved along its current alignment. Therefore a Bypass will only add to the negative environmental impact. I STRONGLY URGE you and the other members of TxDot to listen to the citizens of our towns and municipalities along 380. Hear what we, the majority, are saying. DO NOT succumb to the political pressure no doubt being applied. Do what is right for the majority of citizens that are blessed to call this part of the state home. KEEP 380 ON 380 as it was intended. And if this is not a realistic possibility, please quit giving us hope that we have a say in what goes on. I am tired of being asked the same question over and over, only to find out I am in concert with a large majority, and then hearing another Bypass is being looked at. Please do not push the poor planning of Mckinney and the problems of their community into a Bypass that will negatively effect numerous other communities who have planned correctly and according to the intended future plans of 380. KEEP 380 ON 380. IMPLEMENT THE GREEN OPTION. I sincerely thank you for your time and consideration</p>	<p>Comment noted. Initial traffic analysis does not indicate that both the red and green alignments need to be built as freeways.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a falling level of service for congestion and delay.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
231	Coral Rojas Acosta	4/4/2019	Email	<p>I ONLY support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Please keep in mind all the benefits that ManeGait brings to so many kids, Veterans and others. Thank you</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

233	Courtney Condit	4/8/2019	Email	<p>Hi, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I grew up in Collin County and have been a long-time volunteer of Manegait, so I think it is of utmost importance to preserve their current presence. I plan to soon move back to Collin County and would be hesitant to do so under an alternate alignment.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
234	Craig Hansen	3/28/2019	Comment Form	<p>1 McKinney's approved 2035 Plan had a bypass option in the appendix that did not impact Prosper – what changed? 2 McKinney's lack of foresight & planning Row on 380 should not create a problem for Prosper 3 Option E going through Lowe's destroys a huge tax base for the town of prosper 4 The stated purpose of the Collin County outer Loop was to relieve traffic on 380 & 78. Two loops/bypass options are redundant and neither road will be optimized. 5 It appears that McKinney unilaterally decided to recommend a bypass that imposes on Prosper 6 McKinney should be required to expand all North/South & East/west arterials, before a bypass should be considered – both north & south of 380</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
235	Craig Wenning	4/4/2019	Email	<p>The GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380 makes the most sense. It is the natural path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. The GREEN alignment also preserves one of Collin County's most effective nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this amazing property and displacement of their vital community services. Please make the prudent decision here and choose the GREEN alignment. Thanks!</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

236	Cynthia and Glenn Goodwin	4/9/2019	Email	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
237	Cynthia Caldwell	4/1/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 243	Dan Gramham	3/28/2019	Comment Form	<p>Red option A would seem to be the least impactful as far as residential communities. Red option B & E should not be chosen as these would have a greater effect upon the residents of McKinney on the East side of Custer & the noise that it would bring to the residents of Whitley Place. The best option would be to keep 380 on 380 & expand it. I feel that any of the proposed routes would probably not be used. Few drivers are going to want to go that far North.</p>	<p>Comment noted. Red B displaces the least amount of homes of any of the alignments.</p> <p>Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

246	Dane Harris	3/28/2019	Comment Form	<p>My wife and I bought our house on Grove Cove directly adjacent to Bloomdale 18 months ago with the knowledge that Bloomdale would be a "Custer-like" thoroughfare and <u>not</u> a 75 mpg highway. We put our life's savings into our house as first-time homebuyers and will now lose property value and equity from the sudden change. <u>Please</u> do not affect homeowners to spare business and affluent special interests. Stick to the plan to widen 380 on 380 and build out arterial thoroughfares on Bloomdale and other two lane roads. 380 will not be fixed just from a bypass. Too many red lights and too short turn lanes will remain. Only pass through traffic would re-route.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. The green alignment as proposed in October 2018 would displace approximately 50 more homes and 275 more businesses than the proposed red alignment. Evaluation matrices are posted on Drive380.com.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
247	Danee Diaz	4/4/2019	Email	<p>As a Realtor and a citizen of the Town of Prosper, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

251	Daniel Collins	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. 255	Danlce Atchley	3/28/2019	Comment Form	No bypass through the town of Prosper & Denton County West	Comment noted.
256	Danna Hamann	4/8/2019	Email	<p>COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

269	David Cox	3/28/2019	Comment Form	<p>My name is David Cox, I live with my wife and 2 boys age 6 and 9 at [REDACTED], in Walnut Grove. The bypass options B and E would ruin my neighborhood, and have a very large negative impact on my family and neighbors. The bypass option A is the most desirable & less impact to homes, less impact to businesses and less of noise & air pollution to neighborhoods. Keep 380 on 380.</p>	<p>Comment noted. Red B impacts and displaces the fewest homes of all of the alignments. Of the bypass alignments, Red A has the largest impact to businesses.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>This Feasibility Study has not evaluated air pollution to neighborhoods for each alignment.</p>

270	David Cuthbertson	3/28/2019	Comment Form	Keep 380 on 380! None of the Red options are acceptable. Improvements to intersections on 380 will have a much more positive impact. Improve/Restrict ingress & egress on 380. Another "Bypass" will be an expensive road to nowhere, such as the virtually unused and unusable Collin County outer loop. Keep 380 on 380! No bypass!	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
271	David Hedgpeth	4/5/2019	Email	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
272	David J Johnson	3/28/2019	Comment Form	I appreciate the effort by TxDOT to consider public input in developing a new Red E alignment. Protecting Manegait. Reducing future development costs, and lowering environmental impacts are all benefits of this alignment. However, Red B continues to be my first choice in terms of reduced costs to taxpayers and smaller impact to residences and businesses overall. The GREEN alignment and RED A are not acceptable based on cost and impact. On a personal note, these would devalue my house and neighborhood. We bought where we did because we loved the area; also, we (my wife and I) were told that future 380 development would head up Custer Road. We support either RED E or RED B.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 274	David Montgomery	4/12/2019	Email	Dear Mr. Endres, As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. Among the build options, both Red Option B and Red Option E minimize the disruption to existing homes and businesses, and they are the least costly. I strongly OPPOSE the alternative build options, Red Option-A or widening the existing highway. Both of these options would be very damaging not only to existing homes and businesses in the direct vicinity but also to thousands of homes impacted along highway 380 arterials. Thank you,	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

275	David N Counts	3/28/2019	Comment Form	I support the business that have invested in McKinney along 380 and employ our citizens. Therefore I do not support green route. I do not support Red A because anyone wanting to go south after exiting bypass will have to use Ridge, Stonebridge or Custer. I do favor both Red B & E. Between the two my preference is E because it minimizes impact on Prosper developed and undeveloped land.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
276	David Paul	4/4/2019	Email	My family and I have lived in McKinney for more than 20 years and while we enjoy all of the additions and improvements to our community since we moved here, we want to be certain that future developments don't hinder current operations. As such, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the best and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would negatively impact the beauty of our community. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have a direct impact on ManeGait, leading to the destruction of this exceptional property and displacement of their vital community services. My daughter is one of the riders at ManeGait and has been greatly impacted by the therapy they have been able to provide to her. We have seen vast improvements in her physical and mental abilities at school and with her peers and can attribute this directly to the services that ManeGait has been able to offer. Thank you for your consideration.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
277	David R Oakes	3/28/2019	Comment Form	Please keep 380 on 380, at least on the west end. There is not an economic benefit to any of the proposed improvements vs. keeping it on 380. The businesses will adapt to the change. There is a huge environmental cost to the improvements vs. keeping the work on 380. Keeping the green alignment and rejecting the red alignments helps McKinney and Prosper economically and environmentally.	Comment noted. From County line to County line, the green alignment is estimated to cost more to construct than the red alignment, impact more businesses and displace more homes and businesses than the red alignment.
278	David Soltysik	4/9/2019	Email	As a homeowner and citizen of McKinney, TX, I am strongly AGAINST any bypass that impedes upon or is in close proximity to the Walnut Grove neighborhood near 380 / Custer Road. Any bypass is a highly inefficient and inappropriate method for improving traffic flow and capacity, due both to additional distance required to travel across McKinney, the resulting air and noise pollution, adding more unsightly highways to the area, cost of constructing the new road and the horrible disruption to residents and businesses. There is more than adequate room to add a lane to the existing 380 corridor with minimal disruption while maintaining the intended flow of traffic and isolation of noise to the intended area. I am STRONGLY FOR WIDENING 380.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted. Adding capacity to the existing US 380 would require additional right-of-way.
279	David Tu	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. There is not a 4 level interchange proposed near Ridge Road.
280	David Yew	3/28/2019	Comment Form	What an incredible waste of our taxdollars! Why cant you just improve 380 as is ?	Comment noted. Initial traffic analysis indicates that a freeway is needed to accommodate the 2045 projected traffic. A freeway cannot fit within the existing US 380 ROW.
281	Dawn Campbell	4/4/2019	Email	My name is Dawn and I have been a volunteer at Manegait. Please use wisdom and do not displace this therapeutic horse ranch. You do not know the level of stress the parents and these children go through. It is a well orchestrated machine the way it operates now and the beautiful setting it has. You would displace and disrupt the lives of some very fragile people if 380 expansion were to encroach their property. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
282	Dawn Oldfield	3/28/2019	Comment Form	Keep 380 on 380! The proposed "red routes" will negatively affect homeowner quality of life, endanger wildlife habitats, increase air, noise and light pollution and more. Our childrens quality of life will be adversely affected. Keeping 380 on 380 might impact businesses along there temporarily, but they will re-coup those losses after construction is completed. Homeowners and natural habitats will lose out 100%. Prosper is being bullied by Judge Self and Mayor Fuller and that TXDOT is allowing that is unacceptable. We already have an Outer loop being built, so the 380 bypass is a gross mis-use of taxpayer dollars. Collin County EDC's have been planning for growth for decades, and should have planned the infrastructure accordingly. Keep 380 on 380! If you bought or built a house on 380 you knew the risks.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. The green alignment would displace homes as well as businesses. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
283	Dawnda Daniel	4/3/2019	Email	NAME/ADDRESS: Dawnda Daniel Prosper, Texas COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
294	Dee Kohl	4/4/2019	Email	<p>Please put my vote down for the GREEN option of expanding only380 and NOT creating any by pass which will take private property or threaten the mission of ManeGate with noise and congestion.</p>	<p>Comment noted.</p>

295	DeLou Douthitt	4/3/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 296	Dena Hill	4/4/2019	Email	<p>although I know that expansion is inevitable. I moved to prosper for the small town charm. I didn't move her for the are to turn into Frisco or PLANO. I do not support any expansion deal that takes away any of the charm that we still have with the the expanse we currently have and the unfortunate infiltration of Walmart and other undesirable businesses like chili's, Olive Garden and Texas road house. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services." I vote GREEN and nothing else.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
297	Dennis J. DeMattei	3/28/2019	Comment Form	<p>I support 380 on 380 – all Red bypass options have political and environmental faults</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
298	Dennis J. DeMattei	4/4/2019	Email	<p>Please be advised that option E as presented at the public hearing will still impact the Manegait Horse facility. I am the son of a veterinarian and spent many years assisting my father at all kinds of horse facilities. Simply moving a freeway to the edge of the property will not mitigate impacts and will cause the facility to cease to exist that this location due to the nature of the operation and equine behavior characteristics. This option would also subject TEXDOT to many unfavorable issues to come. I submit this with many years of experience and expertise. Thank you for your time.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

306	Diane Furguson	4/4/2019	Email	<p>Please keep 380 on 380! Prosper should not have to pay for McKinney's zoning mistakes. If McKinney wants a bypass, they need to keep it in their city. That said, everyone (including people in McKinney) thought they knew where the highways and major streets would be when they bought their properties—including us. It seems very unfair to mess up everyone's property values because McKinney just now figured out that they let businesses build too close to the highway! No matter what is decided, many people will be hurt financially, but if we keep 380 on 380, at least it was somewhat expected. My next choice would be option A—keep this problem in McKinney where it belongs!</p>	<p>Comment noted. 310	Dianne Brown	3/29/2019	Email	<p>I have been involved with all of the meetings on the 380 expansion, including the Spring 2018 TXDoT 380 Meeting in Prosper and the 7/24/18 Prosper Town Council Meeting where Stephen Endres gave a presentation on the 380 bypass where he stated that TXDoT rarely, if ever, goes against the wishes of a Town. In that meeting, the citizens came away with the understanding that since both the Town of Prosper and the City of Frisco wanted 380 to be a limited access freeway west of Custer that TXDoT would honor that. So I was very angered and concerned when the Fall 2018 TXDoT Survey options included a red alignment option B for a bypass cutting through Prosper, which before that was never even on the table, due to the pressure of an elected official that lived in Tucker Hill. The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion. I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDoT should do bypass option A that originates in McKinney. I hope TXDoT does not bow to special interests again and honors the VAST MAJORITY of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East -West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmet Road to 75, expanding FM 1461 to 75, and completing the Outer Loop. Thank you for your time and attention on this matter. I hope to hear that TXDoT is moving forward with the overwhelmingly supported green option of fixing 380 on 380 when it presents its final alignment option for 380 this Spring.</p>	<p>Comment noted. The purpose of the feasibility study is to analyze potential roadway alternatives, for US 380 through Collin County. Based on feasibility study factors presented at the public meetings, TxDOT determined that when all alignment options were compared that the proposed alignment segment through Prosper is a viable option that should be further analyzed.</p> <p>Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>

311	Dick Pratt	3/28/2019	Comment Form	Keep #380 on #380. Any by-pass has a terrible <u>impact</u> on residents and wildlife. People south of #380 are signing petitions w/o knowing the facts – just putting their name on a form put in front of them at a beach party – I know because I lived in SB Ranch for 20 years. By passes don't get utilized (eg = Denton etc) People traveling on #380 will continue to stay on #380 – especially if it is improved.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
312	Don Weiland	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
313	Donald & Linda Alexander	4/8/2019	Email	Just a note to let you know that we support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It seems to be the optimal and most effective path for east-west traffic through the cities of McKinney and Prosper. A bypass seems unnecessary and would certainly damage the beauty of our community. The GREEN alignment would also preserve one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignments E and B would have direct impact on ManeGait and damage or destroy this exceptional property. It would also severely impact the many local citizens who depend on the services provided by this great organization. We appreciate your consideration of our views on this issue.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.
314	Donald Crawford	3/29/2019	Comment Form	As a citizen of Prosper Tx I would prefer option green of keeping 380 on 380	Comment noted.
315	Donald Hanson	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
335	Edward & Kathryn Fowlkes	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 353	Erik Tillisch	4/12/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Additionally, traffic routed off 75 will not traverse north additional mileage to go west/west through the McKinney corridor but continuing to use the existing route. If this was true, then the Collin County outer loop project should be the route then to be followed. This project has been planned and has the land allocated to it now and would not have the current planned disruption that a bypass of HWY 380 would cause</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>

Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
355	Erika Franz	4/4/2019	Email	I vote to preserve the facility and the surrounding area for the benefit of the participants and the animals.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Voting is not a part of TxDOT's process.</p>
356	Erika McWilliams	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Voting is not a part of TxDOT's process.</p>
357	Ernest Townsend	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses— including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 364	Forrest & Shannon Raines	3/28/2019	Comment Form	<p>If we had known, three years ago, when we built our dream home, and finally settled into our unique by nature, McKinney that we would possible and most likely have to uproot ourselves, we would never have lived in McKinney. It took us twenty six years to be able to afford & move here from Maryland. I honestly do not know where we are going to go. We are at a loss. We will never find a home and neighborhood like Heatherwood. We did not choose to live near a bypass, Residents on 380, did! What a waste of money to build, destroy homes & family for a bypass that will be a short turn who is going to get off of 380 and take a bypass when what they are looking for & needing are the stores on 380! The stores will also suffer. Thank you</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
365	Frank & Mary Ann Loncar Jr.	4/4/2019	Email	<p>My wife and I are in support of the GREEN alignment between Coit road and FM 1827 for the expansion and congestion relief of HWY 380. We feel a bypass is not necessary and would effect, one of Prospers great non-profits, ManeGait Therapeutic Horseman. Our daughter volunteered for five years and her relationship with staff and the children with disabilities are memories she will cherish forever! She learned skills that are unteachable in a classroom. The GREEN alignment only makes sense in preserving a great non -profit and the beautiful "country living" where we reside. Thank you for your consideration!</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

367	Fransis Sermino	4/10/2019	Email	<p>I currently live less than a mile from the proposed north 380 alignment. I do not agree with option A or E. I used to live West of 389 in Prosper and we decided to move east because traffic west of 380 was dangerous and extremely difficult to get around. We now live in Lakewood of Brookhollow in between Custer and Coit on 380. I use Custer regularly to go to the Sprouts located in McKinney. I go to Sprouts for all my groceries because I am on a restricted diet and they have a lot of the items I can eat in order to stay healthy. If the Custer alignment was to take effect I would no longer feel safe driving through Custer and I would have to find an alternate longer route making it a real inconvenience. I also travel through Custer to go to my Pilates studio in McKinney. If the alignment was to proceed I would likely no longer attend that studio. I'm sure a lot of the businesses south of McKinney would be impacted and loose Prosper customers who would no longer want to travel south across 380. I support green alignment on 380 and expansion on 380.</p>	<p>Comment noted.</p>
368	Fred & Ceidy Vogel	3/28/2019	Comment Form	<p>We are in favor of fixing 380. We are not sure how many would use a bypass. There are a lot of big trucks using 380 for deliveries to the new businesses popping up all along 380 from Custer to 75, along with all the patrons of the bussinesses. The City of McKinney has gotten ahead of themselves by issuing all the building permits to new business and homes without the roads to support them. The problem, we think, is all the stoplights thru downtown McKinney. Without the stoplights, there would be no problem.</p>	<p>Comment noted.</p>
369	Fred & Gail Riegle	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 374	Gail Wong	3/28/2019	Comment Form	My family and I prefer Option B. Reasoning is 380 Freeway will wipe out businesses and provide only additional 2 lanes versus planned 4 lane street on University Option B provides North access to 75 and those living in Prosper already take DNT to go south to Dallas. From my house to 75 is 6 miles to DNT its also 6 miles. Option E is another good alternative but seems like a 2 lane option this not truly scalable. The outer loop could alleviate E/W traffic but that seems to be quite a distance and those using DNT can avoid 380 Westerly travel.	<p>Comment noted. Typical sections for the proposed alignments are available online at www.Drive380.com.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
375	Gail Wong	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. Both the red and the green alignments presented were viable when traffic analysis was conducted.
377	Gary & Monica Sharapata	3/28/2019	Comment Form	No By pass! Widen current 380 Hwy.	Comment noted.
378	Gary Davis	3/28/2019	Comment Form	Please stop the endless parade of bypass options. Bypasses disrupt communities and destroy properties that homeowners have worked their whole lives to own. Solve McKinney's 380 problems on 380 . It's been no secret that property owners along 380, especially commercial, located there in anticipation of future business opportunities. After all, it's been a US Hwy for decades. Employ some best engineering practices to lessen the impact and Keep 380 on 380 , not in our neighborhoods.	Comment noted.

379	Gary Galarza	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

384	Georgette Guernsey	3/28/2019	Comment Form	<p>Red option E makes even less sense than Red option B. First off there has been no study to determine if either option will relieve the congestion on 380. Secondly, Red option E will destroy existing businesses ie Lowes at the corner of Custer & Highway 380. If you changed 380 to a limited access highway in its current location. Prosper tax revenues would be protected.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
385	Georgina Swinfen	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I travel 380, Coit Road and know all these areas possibly affected, very well. I also ride in many of the red aligned proposals East and West and believe it is vitally important to preserve as much of this beautiful countryside as possible. People will always drive along 380 and so expanding 380 along 380 makes more sense for the flow of traffic and the environmental impact. If TxDOT can hold these in high priority instead of the money from businesses.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

397	Greg Gordan	4/10/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. 400	Gregory Horne	4/8/2019	Email	<p>COMMENT : Though not a resident of McKinney, I do volunteer at ManeGait every week. My concern is for the safety of the horses and riders of the facility. The added traffic and noise near to the facility adds risk to the equestrian activities that take place there. In addition, the red alignment may even displace a beloved facility that serves many. As such, I support the green alignment that is most cost effective and less disruptive to most citizens/organizations of the area. Thank you.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. From County line to County line, the green alignment is estimated to impact more businesses and displace more homes and businesses than the red alignment.</p>

407	Gwen Ray	3/28/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
408	Hannah King	3/28/2019	Comment Form	<p>380 needs to be fixed on 380 there shouldn't even be other options. Building a bypass will affect elementary schools, houses Mane Gait, etc. Being someone that works at a preschool and volunteers working people that have special needs I have disagree with the options. Thanks for taking time to read this and I hope you put the kids and special needs community into consideration.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

409	Hannah Wolf	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 410	Harold Covin	4/9/2019	Email	I support alignment N- Green an am opposed to alignments A and B -- Red. Please accept this.	Comment noted.
411	Harpreet Judge	3/28/2019	Comment Form	<p>I Harpreet Judge reside on [REDACTED] which is the first street, which would be merely 30-50 feet from the proposed freeway. And this proposed freeway would be huge impact on our daily livings considering the noise right from beginning of construction to the probability of when its up and running, is going to be a great nuisance not for just auditory point of view but also for safety of those home which are just 20' from the freeway. When we purchased the house, we took all of those aspects in consideration is now at this stage we can certainly not have this highway build top on all of us, we urge you to consider 380 as a better option and let us all reside in peace.</p>	Comment noted. Alignment options are still being evaluated and any future improvements will be designed to enhance safety. Any future improvements would include assessment of the potential impact on the human and natural environments.
412	Harvey Graham	3/29/2019	Comment Form	<p>Red option B is the best option. 192m for red option B and 253 m for red option E is not being financially responsible to us tax payers. Mane Gait which is nothing more then 10 horses and some pasture can de easily relocated. Prosper needs the freeway as much as anyone. Going behind Lowes in some open fields will have minimum impact on them Prosper's letter writing campaign to save Mane Gait is nothing but a ploy to keep the by pass out of their city. The red B option is the best long term solution for the future.</p>	Comment noted.
413	Heard Museum	4/15/2019	Email	<p>I would like to state our concerns about the option B of the Spur 399 alignment. Option B will impact the Heard Museum wildlife sanctuary. If there is a need for a new bypass, we recommend the use of the option A to minimize the impact on our sanctuary. I would be more than glad to visit with you on this subject matter.</p>	Comment noted. None of the proposed alignments would require land acquisition from the Heard Museum or its Wildlife Sanctuary. Any future improvements would include assessment of the potential impact on the human and natural environments.
414	Heather Ferguson	3/28/2019	Comment Form	I oppose any 380 bypass – fix 380 on 380	Comment noted.
415	Heather Powell	4/5/2019	Email	<p>I support the GREEN alignment thru Prosper (Coit to FM 1827) on 380 for the expansion of US HWY 380. This path is the most efficient and less impacting to the people of Prosper and McKinney. The bypass is not necessary and will take away the beauty and uniqueness of these 2 cities. Furthermore, the GREEN alignment preserves and maintains full operations for the loved organization ManeGait Therapeutic Horsemanship. The alignments RED E and B will cause the organization to relocate its services and cause the organization to become displaced. This will cause issues for so many people who depend on ManeGait for their therapeutic support and wellness. Do not make Prosper and MainGait take on the burden of McKinney's mistakes and poor planning.</p>	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

418	Hector Cardona	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

421	Holly Dee	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
422	Hulon T Webb Jr.	3/28/2019	Comment Form	<p>1)Keep US 380 on current alignment of US 380 as depicted on the Town of Prosper Thoroughfare Plan. 2)Red option B and Red Option E have significant impact to existing developments as well as planned developments. An option east of Custer Road allows those developments to remain without compromising the future expansion plans for FM2478 (Custer Road, north of US 380 3)Since the City of McKinney does not want US 380 to be a LAR, then any bypass should remain within corporate limits of the City of McKinney. 4)The City of McKinney produced multiple alignments east of Custer that were not evaluated. Red option F is similar to one. 5)Red option B and E do not show all the traveling public connections from US 380 like option A. (photo of a map follows comments)</p>	<p>Comment noted. This Feasibility Study has not produced a Red Option F. It has evaluated the alignments presented by the City of McKinney but eliminated them from consideration because of their lack of viability.</p>

These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p> <p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
436	James Dougherty	4/4/2019	Email	<p>I am a resident of Whitley Place, which is located at the Northwest corner of Custer Road and 1st Street in Prosper, TX. My wife and I have been engaged with local organizations regarding the 380 expansion project, have attended the informative and very well executed TXDOT presentations, and have attended and presented at McKinney and Prosper City/Town Council meetings. Because of the significant negative impact the 380 Red Alignment Options B and E would have on our quality of life, we respectfully request that TXDOT select the Green Alignment between Coit Road and FM 1827 to keep 380 on 380. The Green Alignment is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. We believe the Red Bypass Alignments are inefficient, would not provide the necessary reduction in traffic to support Collin County's expected growth, would disrupt many communities that enjoy a rural environment, and destroy much of that environment itself. Additionally, I am a volunteer at ManeGait Therapeutic Horsemanship. Several days a week, I see firsthand the profound benefits that ManeGait's programs provide to Special Need, Veteran, and First Responder members of the surrounding communities. Working with the ManeGait staff, volunteers, riders and their families, and horses, provides me with an opportunity to serve others in the community and is great therapy for me after careers in the US Army and the Aerospace industry. As a disabled veteran, I participate in ManeGait's Veterans and First Responders riding and brain therapy programs. These programs have improved my core strength, balance, coordination, and memory, and have helped me control my stress and anxiety, significantly improving my quality of life. Both Red Alignments B and E would have direct negative impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Many thanks to you and the TXDOT teams who have displayed exceptional openness, transparency, and professionalism during the 380 expansion selection process.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p>

437	James Peterson	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 440	James Webb	3/28/2019	Email	As it relates to the re-routing of US Highway 380 and it's impact on surrounding properties and organization, I support the GREEN alignment between Coit Rd and FM 1827. This is the optimal and most efficient path for east-west traffic. While I live in Frisco, my three children all reside in McKinney in property purchased by our family and would be impacted in various ways by both Red Alignment E and B. Of significant importance is the impact on ManeGait Therapeutic. I have seen, first hand, the impact this organization has on the clients they serve. To choose a route for 380 that would directly impact this fine organization and lead to the destruction of this exceptional property and displacement, and potential ending, of the vital community service boarders on criminal. Please do not allow this to happen and hurt the children and veterans that are serviced by this great organization.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
441	James Wolf	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. 442	James Woods	4/5/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east -west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. We have personal connections with ManeGait. Having grown up with Priscilla Lewis Darling, co -founder, we also have volunteered with our therapy miniatures for many years at events. ManeGait now is home to two of our miniature horses and this possible move would affect them as all the horses to readjust to different surroundings, which in turn would affect how the horses react with the many people with disabilities that attend and depend on the interaction with the horses. Please do not choose a way that would displace ManeGait or put them in harms way. This facility has been and continues to be a vital asset to McKinney and surrounding areas.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
443	James Yancey	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 444	Jamie Spence	4/3/2019	Email	<p>As a homeowner and citizen of Prosper, TX, I strongly OPPOSE either the Red Option-B or Red Option-E bypass alignment option. I strongly SUPPORT the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. I would also SUPPORT Red Option A but to a lesser extent. These options are the most beneficial to existing businesses and homes and the families living in neighborhoods adjacent to US 380. Prosper has limited area for retail and residential development and has planned accordingly. This new alignment being pushed by McKinney could have been avoided by their own planning, and instead, they would like to make this a problem for Prosper. Options B or E would negatively impact the city by reducing sales and property taxes for Prosper. False allegations by supporters in McKinney for Options B and E: These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. — not true and ridiculous— clearly none of the options would displace businesses at 75 and 380. I think they are hoping you won't actually read and think about what they are stating. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. The Green Alignment and Red Option-A will depress home values in that area. -Pure conjecture. It does not seem to have harmed Highland and University Park home values to have the Dallas North Tollway going through it, or Plano home values to have George Bush Freeway going through it, or Frisco and The Colony to have 121. Where are they getting this? Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge -Road. Unsightly? We've seen it already? Or is this person psychic? I hope you will recognize the manipulations of a small but motivated group of entitled McKinney homeowners who simply don't want the inconvenience of having an exchange near them or to deal with the hassle of widening 380. There is no problem with widening 380. I myself live right off of 380. The exchange at 121 and 75 in McKinney was nicely done, all of the roads we've seen TXDOT update and build in the last ten years have been handled well. I think they are underestimating your ability to handle our growing traffic. I support widening 380 or Bypass Option A. Thank you.</p>	<p>Comment noted. Many businesses would be displaced at the existing US 380 and US 75 intersection should the green alignment be constructed. Maps are available at Drive380.com.</p>
445	Jan Clare	4/8/2019	Email	<p>I can't really even remember how many times I have sent comments to you guys. This nightmare has been ongoing for over two years now. At your first reveal meeting you said that Walnut Grove would not be touched because you rarely ever destroy existing neighborhoods. Now with the Red Bypass option E, 17 of my 80 neighbors have gotten impact letters and many of those will lose their homes. I am curious as to what changed in a few short months. I am also curious as to what will happen if Prosper continues to say NO to a Bypass. Clearly they will because they've already said NO with formal resolutions three separate times. Is this a new plan by Mayor Fuller to destroy Walnut Grove along with Prosper commercial properties regardless of the wishes of ETJ residents, a wonderful non -profit organization and a smaller developing town? If so, that plan goes against everything he campaigned for in the spring of 2017!</p> <p>I know that Stonebridge and Tucker Hill are against widening Highway 380. That does not, however, mean that every single resident in those two neighborhoods are against fixing 380. In Stonebridge, a small group of individuals is speaking for the entire neighborhood. In Tucker Hill, a few residents, a commercial developer who also happens to be a felon who served three years in prison, and a former County Judge are speaking for all of Tucker Hill. Stonebridge and Tucker Hill are sending the same prescribed comments designed by a handful of individuals. By contrast, my neighborhood, Walnut Grove, has been here almost 50 years and we are truly a neighborhood. We have custom homes on acreage and we are a cohesive community that genuinely cares about each other. We do not want our beautiful neighborhood destroyed, especially the 150-year-old trees and all the wildlife that we enjoy on a daily basis. Please do not let a handful of individuals change the entire Northwest sector of McKinney and destroy Walnut Grove, the most unique by nature neighborhood in all of McKinney along with MainGate Therapeutic Horsemanship!</p> <p>Businesses can relocate and with the 6 to 8 year timeframe they have before construction starts, they will be able to make alternative plans if necessary. However, homeowners will see their homesteads plummet in value if a bypass becomes a reality. Walnut Grove, in particular, will be especially hard hit because we will be surrounded by Highway 380, a widened Custer Road, and a bypass. Please use some logic and fix 380 on 380 because it will have to be done eventually anyway. Any bypass option is an atrocity which ruins the entire northwest sector of McKinney. Please consider the people whose lives you will be changing forever as well as the wildlife and ecosystems that you will be destroying.</p> <p>MainGate Therapeutic Horsemanship is just a half mile down the hill from my home in Walnut Grove. It is a twelve year old non-profit organization dedicated to serving hundreds of special needs individuals with disabilities as well as Veterans, their families, Active Duty military, and First Responders. Both the Red Bypass and the Bypass Option E would force the closing of this wonderful facility and leave a huge gap in services for the special needs community. Stonebridge and Tucker Hill have basically nothing to lose. Stonebridge makes the argument that people will cut through their neighborhood to avoid Highway 380. Guess what? People have been doing that for years! And by the way, Stonebridge doesn't own those public roads. I believe that Stonebridge will lose a sign and Tucker Hill might lose a few parking spots up front in their commercial area. Please do not bow to a few and destroy our way of life and the natural beauty of Northwest McKinney. <u>FIX Highway 380 on 380!</u></p>	<p>Comment noted. Residents of Walnut Grove received letters because they were within 1,000 feet of the Red E alignment. This does not indicate that their property will be impacted or displaced.</p> <p>Red E was introduced as an option because TXDOT was trying to provide options to proposed alignments.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TXDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
446	Jan Mzzolini	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 447	Jana Horowitz	4/8/2019	Email	I support the Green Alignment between Coit Rd and FM 1827 for the expansion of HWY US 380. It is the most efficient path for east-west traffic and US 380 will need to be fixed in time anyway. The majority of TX Dot's previous survey results prefer fixing 380 on 380 as well. I would sincerely hope TX Dot would care about the majority of TX Dot's survey recipients opinions. A bypass is completely unnecessary and would destroy many people's homes, property values and a serene way of life considering we actively chose homes away from a highway. Please do not cave to McKinney's mounting political pressure and corruption in building the bypass into Prosper. McKinney's poor planning should not be allowed to punish Prosper as a result. Please do not allow McKinney to continue to bully this into the small town of Prosper.	Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.
448	Jana Tinsley	4/11/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road.</u>
450	Janelle Freeman	3/28/2019	Comment Form	First Choice: Red B - It connects with existing 380 West of Custer. It affects fewest existing residences and businesses and costs least. Second Choice: Red E- It connects with existing 380 West of Custer. It costs less than other alternatives.	Comment noted.
451	Janet Anders	4/1/2019	Email	Option E would cut off all of the roads into/out of Walnut Grove on the west. So, will the Option E be elevated all the way from Custer to the north of WG or are would we lose all 3 roads?	Comment noted. Any future improvements would include access to existing properties that would be cut off any the alignment. Drawings of the typical sections being considered are available in the MAPO boards posted on Drive380.com. <u>The thought would be to have the freeway depressed when parallel to Custer Road with existing access to Custer to remain the same.</u>
452	Janette Forth	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road.</u>

453	Janise Ambrose	3/28/2019	Email	As a resident of McKinney I want to express my support for the Green alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Expanding the current footprint seems to be the most optimal and efficient path for east west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would cause unnecessary reduction of the natural green space areas established within the paths of the other alternatives. I was happy to move to McKinney and value the dedicated spaces and feel the other proposed Red Alignments will devalue the area. I left California and had a 45 mile each way commute to work. My move to Texas with Toyota and finding a home in McKinney has been a life changer. I chose to give back to the community by volunteering my newly found time. This past year I was blessed to have been able to volunteer over 200 hours at ManeGait Therapeutic Horsemanship. This nonprofit organization provides an amazing service and when I found out some of the alignment proposals would have a direct affect on their being able to continue their quest I was very disappointed. The Green alignment is the ONLY choice going forward. It not only preserves the beauty of our community but will prevent the destruction of this exceptional organization and their service. I implore you to realize all of the negative impacts any other choice would have on our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
454	Jasmine Bridge	4/1/2019	Email	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 455	Jasmine Hook	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
456	Jason Brown	3/30/2019	Email	I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDOT should do bypass option A that originates in McKinney. The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion. I hope TXDOT does not bow to special interests again and honors the VAST MAJORITY of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.	<p>Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>

466	Jayme Schinalwied	3/28/2019	Comment Form	<p>Keep 380 on 380! Austin TX has a double decker that works great. Should be less expensive. The real issue on 380 that needs serious help is on the west side of the tollway</p>	<p>Comment noted. Double decked freeway sections will not be further considered for the corridor, because double-decking would not significantly reduce the amount of right of way needed to construct the roadway, and it would be more expensive. Drawings of the typical sections being considered are available in the public meeting boards posted on Drive380.com. TxDOT is being asked by Cities to remove elevated freeways in several locations across the state.</p>
467	JC Diaz	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
468	Jean Denillees	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

Both Red Alignment E and B, would have a direct impact on ManeGait, leading to the destruction of this exceptional property and displacement of their vital community services. I am also an avid mountain biker, and am concerned that the red paths would ultimately degrade what little greenspace we have left at Erwin Park.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
477	Jeff Kennedy	3/29/2019	Comment Form	<p>I moved back to TX from Colorado just over 1.5 years ago into Whitley Place. We intentionally selected out neighborhood knowing 3810 would need to be expanded to keep up with the rapid growth in Collin County. We DID NOT purchase where we did thinking/knowing 380 would be completely moved from it's current location. Do you think businesses and residents purchased close to 380 knowing it would need to be expanded? Of course they did! Keep 380 on 380 and stop trying to appease the few and so what the majority has already stated they want to happen, time and again.</p>	<p>Comment noted.</p>
478	Jeff Parsons	4/4/2019	Email	<p>My name is Jeff Parsons and my address is [REDACTED]. My daughter Quincy has ridden horses at MainGait for many years. The effects of the therapeutic riding have been tremendous for her. She communicates better, she has more confidence, and her core muscles have gotten stronger. Quincy, along with the other riders at MG, need their equine therapy. Please strongly consider routing the 380 expansion so that it doesn't put an end to this wonderful program. I invite you to come visit our riding session some Saturday at 4:00 to see what I'm talking about. My number is [REDACTED]. Thank you Mr. Endres. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option- A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>

490	Jennifer Crawford	3/28/2019	Comment Form	<p>I vote for Red Option A. Prosper is a small town with limited land and revenue resources. Both Red Option B & Option E damage the present and future financial stability of Prosper. Red Option B takes a large amount of land preventing future businesses or residential development & revenue. Red Option D steals a highly trafficed & profitable business corner of Custer Rd & 380. McKinney owns 3 of the intersection corners. Proper owns and developed their only 1 North West corner. Loss of the Lowes, Firestone, Sherman Williams, Taco Bueno, would severely inconvenience me as Prosper resident and would devastate the present and future financial stability of Prosper. It has the optics that McKinney is willing to sacrifice it's smaller neighbor's future. Red Option A please.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p> <p>Comment noted.</p>
491	Jennifer Haeg	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east -west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have a direct impact on ManeGait, leading to the destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

495	Jennifer Mason	3/28/2019	Comment Form	<p>Please keep 380 on 380. Both alignments E and B take precious Commercial Revenue opportunity away from Prosper and their residents to lower the tax burden. We have so little land along 380, since the town of Prosper planned for expansion on 380 it wouldn't be fair to reduce our ability for commercial tax revenue on the small stretch of 380 that runs through Prosper.</p>	<p>Comment noted.</p>
496	Jennifer Patrick	4/5/2019	Letter	<p>I oppose Red alignments A, B, and E. I support the Green Alignment as it pertains to the city of McKinney. The shortest way from point A to point B is a straight line. The green alignment is just that. Alignments A, B, and E route traffic up to 2 miles north of highway 380. This does not make sense considering much of the traffic is either traveling east or west from town to town with the intention of traveling southward at some point; either Highway 75, DNT or I35 - all are major thoroughfares to the larger cities - Dallas and Ft. Worth. People will go north to go south. A good example of this is loop 288 in Denton. 380 through Denton is a nightmare yet loop 288 is a ghost town and I believe its distance from 380 is even less than the bypass you are proposing. The word "highway" is defined by Google Dictionary as: A main road, especially one connecting major towns or cities, Another term for "expressway". US Highway 380 in Collin County is exactly that. It directly connects county seats from Greenville to Mckinney to Denton, and so on. Business owners and Developers who chose to build on Highway 380 knew they were building on a highway. Business chose such a location due to exposure to high traffic volume. Home values along Highway 380 are adjusted to account for their close proximity to a highway. Creating a bypass to appease homeowners is not the answer. Those homeowners knew they were building off a highway and made the educated choice to do so. Homes in the path of the prosed bypass made a conscientious and educated decision NOT to build on a highway based on the City of McKinney's public city plans and a Mayor whose campaign was against a bypass. Your maps are outdated. There are many new neighborhoods now in the path of the prosed bypass. The city simply waited too long to address this. Anything other than fixing 380 on 380 wrong. Thank you.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

497	Jennifer Sedwick	4/4/2019	Email	<p>My neighborhood is Heatherwood and it backs up to Bloomdale road, the sight of the proposed Red Alignment. I attended the presentation on 3/28/19. I was able to ask questions and see the new options on alignments. Please let me first state that my support is for the GREEN option of keeping 380 in its current footprint. As I learned on March 28, regardless of the option chosen (a, b or e) the decision to build the Red Alignment will run along Bloomdale road. The impact to my neighborhood and surrounding neighborhoods will be devastating. There are 50 homes just in my neighborhood who's backyard will be less than 50' from the proposed path. For the specific alignment options, A, B or E, all of those have a devastating impact. The most devastating impact will be to Mane Gait Therapeutic Non profit. This non profit serves a great need in our community and statewide. There are VERY few places like Mane Gait in the entire State of Texas. Options B and E specifically would destroy their ability to perform their services and force them to shut their doors. Additionally, a bypass option is unnecessary as it falls far below the minimal optimal spacing between highways, with some points being approximately 1 mile from the current footprint of 380. Expending funds to overhaul 380 in its current footprint is the most fiscally responsible use of funds. Bypass or no bypass, 380 will need to be fixed. Why not fix it and fix it right? In summary, please accept this as support for the GREEN alignment of keeping 380 on 380.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

502	Jerry & Rita collum	3/28/2019	Comment Form	<p>From: JERRY AND RITA COLLUM PLEASE FIND ATTACHED OVR COMMENTS REGARDING 380 BYPASS AS REQUESTED. I WILL MAIL THIS AND ALSO ATTEMPT TO SEND TO YOU BY EMAIL.</p>	<p>Comment noted.</p>

503	Jerry & Rita Collum	3/28/2019	Letter	<p>Walnut Grove is a completely built out community of single family residential homes featuring an established rural family residential ambiance. Walnut Grove is a community of middle class families living the all American dream of having a place of raising their families in a healthy, wholesome and safe environmental culture. People here have for many years worked diligently together to maintain such a community culture. Until now this has been a highly successful endeavor. Now our life's effort, our dreams, are being seriously threatened by political forces reaching beyond our ability to control or yet it seems, beyond our ability to influence. Comments here are seeking to reach the conscience and good will of those who will ultimately make the 380 Bypass routing decisions. This is a plea that our political and governmental representatives consider the positions of those directly and substantially affected most, be held more favorable to those represented by the more powerful political forces at play here, that appear to be representing remote considerations. Particularly, the residents of Walnut Grove will be deeply affected both financially and emotionally by uprooting their homes, their community culture, their deep rooted personal dreams, and for many, years of hard work promoting and maintaining a unique life style. Whereas, outsiders such as the MainGate promoters who do not live in this community will not have their lives, their homes and their endeared dreams uprooted nor will they be affected and any way, other than possibly moving their activities to another horse pasture. To the political involved: Put yourself, your family, your personal effort to build a home, a community, a wholesome and safe life for your family (as they may apply) in our position. Show us you seriously care. Truly be the peoples representative. Stand up, be counted. On a personal basis, Rita and I have already been seriously impacted by the Bypass project. We have actually been trying to sell our property and home for nearly two years. As soon as potential buyers learn of the uncertainty of how the Bypass will impact property values they disappear. We have reduced the sales price by more than \$100K, based on assessments of local property sales (i.e. prior to Bypass speculations), and buyers just walk away. The same loss of property value is surely impacting all of our neighbors. In our case, investment in this property represents a substantial amount of our retirement. I suspect this the case for many others. To the tax payers of Prosper: wake up, if the Bypass cuts across the corner of empty pastures within your city limits, it will bring improved property values, it will bring merchants that will be helping pay much of your taxes. And it will no be uprooting family homes and destroying wholesome communities and new established businesses. To the City Council of Prosper: Your argument for trying to prevent the Bypass from cutting through corn fields and pastures in favor of uprooting family homes and newly established businesses at additional costs of hundreds of millions of tax payer dollars defies logic and is frankly embarrassing. To Texas State Government, city and county councils and planners, and the people of all cities and communities north of and around Hwy 380: Clearly the reason we all find ourselves with this devastating highway traffic overload is that we are caught unprepared in handling the massive regional growth in this area. And unless we get mobilized behind building the proposed "North Texas Outer Loop" history will repeat. The Outer Loop project must get going now before the area is populated with homes, communities and businesses that will need to be similarly uprooted. As we all hear, north Texas is touted as one of the fastest growing region in the country. This is Boom Town country and our state and local planners have not kept up with infrastructure demands. To the Texas State Government officials and planners: This is clearly in need of leadership. Hello Governor Abbot, look north, you are badly needed here. Particularly, the cross country eighteen wheelers and ground traffic needs routes around the fast growing cities of north Texas. We must get mobilized behind this fast growing problem. A couple notes of recognition: First, in reverence to the very good of work of ManeGait supporters, and not to derogate your efforts; your facilities can easily be relocated, and with little planning and cost could be significantly improved. The affected property will be paid for by 'purchase of right of way'. To restate the previously presented fact, 'you don't live here,' your homes and families will not be affected no matter what is decided. On balance with the impact to families resident in Walnut Grove, there is no comparison. Have a heart. Be fair. Back down with your objections. Second, to the efforts of TxDOT engineers, planners and others who have developed the comprehensive 'impact study': We commend your effort and good work comparing the hit on families and businesses and tax payers for various proposed bypass routes. Each of us have our own biases and desires which present numerous difficulties, but the impact study puts clarity, fairness and logic in the decision making process. On examination it clearly reveals that the proposed Route B will by far have the least impact on all. The logic presented by the study is clear and overwhelmingly compelling. So if logic prevails in the final route selection, Route B will be selected; otherwise, the selection will be based on purely political overberance; and we all know how unjust that becomes. Therefore, among the proposed Routes A, B or E, our vote is for Route B. More credibly, some serious consideration is hereby proposed to route 380 Bypass north of and parallel to Hwy 380 through unpopulated pastures and corn fields, with multiple interconnections, all the way to Hwy 35 north of Denton.</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
504	Jerry D Brown	3/28/2019	Comment Form	<p>I am opposed to this proposed project! The roads passing through Walnut Grove will <u>eliminate</u> retirement homes! "Widen 380" You <u>cannot make</u> someone go from point A to point B I have lived in Walnut Grove 34 yrs - some longer than me. ? If the wish is to lighten traffic on 380 - why Cosco? ?Kroger, the move and lots of other new business?</p>	<p>Comment noted.</p>
505	Jerry Harris	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

508	Jerry Sweet	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 518	Jill Kopinsky	3/28/2019	Comment Form	<p>Yes to either Red B works. Red E is very nice and might please many also Red E utilizes custer which needs to be widened. Its so narrow& dangerous in its current state! I tell my kids to stay off it. I like Red E the best. No to Red A 380 widen.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted.</p>

519	Jill Nugent	3/28/2019	Comment Form	Fix 380 on 380. <u>NO Bypass</u> through Prosper. <u>NO Bypass</u> through Walnut Grove. Fix 380 on 380. The earlier taxpayer feasibility studies confirmed that a 380 LAR is what is best for businesses, and Frisco, Prosper, and McKinney have all had 380 in its current footprint in all planning. As a Prosper resident, I stand with the Town of Prosper Council and Prosper ISD against any route going through Prosper. I am opposed to any route that impacts the Walnut Grove neighborhood. McKinney is roughly ~63 sq mi in land area – Prosper is roughly ~ 23 sq mi in land area – McKinney is 3 times the land area size than Prosper and should not be passing on their lack of planning the Town of Prosper. Fix 380 on 380	Comment noted.
520	Jill Thompson	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
521	Jill Workman	4/5/2019	Email	I am writing you in hopes of expressing my support in the GREEN ALIGNMENT for the HWY 380 Expansion. For a number of reasons, the GREEN ALIGNMENT is the most optimal proposal for this highway running through the beautiful cities of McKinney and Prosper. We do not need another new and major highway/bypass leaving it's mark on these beautiful communities. As a homeowner in Heatherwood living community, I support the GREEN ALIGNMENT as I do not want to see a major highway just hundreds of feet from where my children play each and every day. The GREEN ALIGNMENT also preserves one of Collin County's most notable nonprofit organizations, ManeGait Therapeutic Horsemanship. This incredible facility provides community services to the people - men, women and children - in not only McKinney and Prosper, but the entire surrounding area. We need ManeGait to keep its doors open for the good for this amazing community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
522	Jim & Pat Norton	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road.</u>
525	Jim Fossier	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

526	Jim Kiser	4/4/2019	Email	<p>I support the Green alignment for the expansion of US Route 380. It is the optimal and most efficient path for east-west traffic through the cities of Princeton, McKinney and Prosper. In that regard, I am not in favor of either Green spur A or B as a connector of 121 with 380. Instead, I would favor using the existing routing onto 75 and then providing an improved connector between 75 and 380 to provide this connection.</p> <p>West of 75, I continue to favor the Green alignment. The Red Loop Alignment would scar the beauty of our community and threaten the ability of ManeGait Therapeutic Horsemanship, a prominent Collin County non profit organization, from providing their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
527	Jim Kohl	4/4/2019	Email	<p>1. support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. 529	Jim Smith	3/28/2019	Comment Form	<p>Red Option B Seems to be the most logical choice with minimal impact upon Residential & commercial. Decisions should be made that would best benefit the community @ large and not 1 vocal group over the other.</p>	<p>Comment noted.</p>
530	Jim Welch	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 531	Jimmy & Carla Walker	4/12/2019	Email	<p>I know that you have been inundated with calls, emails and letters regarding US 380 improvement which should show you how important your (and TxDOT) decisions impact the citizens of Collin County. Whatever happens could majorly impact the lives and livelihoods of many people. With that in mind, I would like to go on record that we support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. A 380 alignment along its current route is the most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and will NOT alleviate the traffic on 380 in McKinney. There is already a Collin County Loop in the works no more than 5 miles north of the proposed 380 bypass. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
532	Jimmy & Carla Walker	3/28/2019	Comment Form	<p>The only acceptable option to/for us is Red option A. This is the only option that honors the City of Prosper's position <u>NOT</u> to allow the Hwy 380 by-pass to go through <u>any</u> portion of the City of Prosper. It appears to us Red Option A will have the least impact to the businesses and residents on and along Custer north of Hwy 380. This by-pass will negatively stunt the commercial & residential development of this area. In addition any other option than option Red A will lower property values on & along Custer are north of Hwy 380. My opinion now and in the future is keep Hwy 380 on Hwy 380</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
533	Jimmy Estes	4/1/2019	Email	<p>I have lived in Stonebridge Ranch in McKinney for nearly 20 years. I believe that reworking of US 380 needs to be done via the Green Option. I do not believe in choosing neighborhoods. People who purchased homes near 380 should have recognized the potential for expansion. Again improvements to US 380 need to be aligned with the current highway.</p>	<p>Comment noted.</p>
534	Jimmy Le	4/8/2019	Email	<p>I am a homeowner in McKinney and I strongly SUPPORT Red Option B as well as Red Option E. These options cause the least disruption and destruction of current homes and businesses as well as have the least cost of all the options. Especially compared to the green OR Red Option A. We as a community should be using a solution that has the least negative impact on all parties located our city.</p>	<p>Comment noted.</p>

535	Joan Underwood	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 538	Joanne Thompson	4/10/2019	Email	<p>I understand that areas on 380 will need to be reconstructed no matter the recommended alignment. There are intersections and definitely areas that need to be addressed sooner rather than later.? What I am thoroughly confused about is why one non-profit, Main Gait, is garnering so much attention when there are 3 more non-profits along 380 which are slated to be destroyed by its widening to a LAR yet no one is talking about them or adding bypass options to save them. While Main Gait provides an important service so does Life Path which is the only mental health facility in Collin County. Inn Style supports the Samaritan Inn serving poor families in need of housing and financial support. Cornerstone Ranch provides housing for adults with special needs and is one of the only facilities that administers to this group. All of these businesses are just as import as Main Gait yet they don't have the voice of a multimillionaire backing them. Spending the time and resources on an alternate route (Red Option E) has proven to be futile as it not only destroys 12 businesses (Lowe's, L'arte nails, a supplement business, Dickeys, Firestone, Starbucks, Popeyes, UPS, Sherwin Williams, Burger King, Taco Bueno and Team Mobile) to save Main Gait but in Bill Darling's own words it is the worst possible option for his business as it surrounds it by thoroughfares. Mr. Darling states in a letter to Main Gait supporters that having a thoroughfare or a thoroughfare and a bypass through and near his property "compromises the SAFETY of our riders, horses, volunteers and staff and they will be unable to provide therapy services in this location and would be forced to relocate".? This statement from Main Gait's owner indicates that once Custer is widened into the arterial road or thoroughfare as? it is slated to be in the near future it will run right through this property in too close of proximity for them to conduct therapy services in a safe environment. My question is then why are we bothering to focus our attention on a business that will ultimately move once Custer is widened anyway? Mr. Darling clearly has the means to move his business to a more suitable and safe location while the other non-profits do not.? My hope is that this wealthy millionaire's use of sympathy for those that utilize this business and his millions of dollars will not lessen the importance of the services that the other 3 non-profits provide Collin County and they? as well as the other businesses along 380 will be given just as much attention and consideration as Main Gait has been awarded.? Another point of confusion is how wide Red Option A will be as its location is right next to Ridge which will already be a lane arterial (making 12 lanes of roadways in that area) and also why is it being considered given it poses the greatest environmental impact on the city. It will ultimate destroy my neighborhood of Tucker Hill as this option will surround i by an arterial to the west (Stonebridge) as well as a LAR to the south and east completely isolating it from the rest of the city and destroying our "front porch" living neighborhood due to the noise and pollution that being surrounded on 3 sides by large roadways is sure to bring.? No other neighborhood will have to sustain this much of an impact in any of the other options. This option will also impact Stonebridge Ranch and Auburn Hills as well as it will force thousands of cars to travel into these and surrounding neighborhoods when 380 gets too crowded which poses a significant safety threat. This option will also take away the easy access that those west of Baylor Hospital currently have and could potentially cut us off from those services in the event of an emergency along 380.? At the very least it will? impact thousands of citizens west of the hospital who benefit from quick access by emergency response vehicles that the current road provides unlike an LAR with limited access which? poses a huge impact to timely response times. This limited access can literally mean the difference between life and death. 2 As I have stated before Red Option B is still the most viable option as it keeps the traffic flowing, communities safe, it keeps our businesses which provide a much needed tax break and as well as thousands of jobs. ? It also provides the town of Prosper an opportunity to expand their business corridor along their southeastern border (not destroy it as it is slated when 380 is widened) while providing Collin County with another road choice besides 380 to travel on when it is congested and also in case of an emergency shut down as well.? The growth is slated for the north and that is where the bypass needs to be in anticipation of this growth and is the best possible choice for the county.? You have the opportunity to do what no one else has up to this point and that is to plan for the growth before it happens and not just react to it once it is here. Forcing the northern growth onto one already too heavily traveled road south of them makes no sense as it will not be able to handle the 2 million people that are projected to move in along with additional business traffic.? Splitting that traffic growth between two roads closer to where it is projected makes the most sense and will benefit the flow of traffic of all roads in the future. Instead of being like the short-sighted road planners of the past only seeing what is immediately in front of them and hoping that one road will handle all of the traffic we can plan for this growth and be ahead of it. As I mentioned in an earlier email I grew up in California where big business and shortsightedness dictated road placement and that lack of planning ended up in continued constant traffic while forcing the use of toll roads. The same can be said for McKinney if anything but Red Option B is chosen. Please let all of us be heard not just the wealthy businessmen as we all travel on this road and very much want it to be a smooth, uncongested ride not one filled with the overwhelming burden of not just McKinney's but the entire east-west counties traffic as it is currently. Thank you for your continued consideration of Red Option B. I prefer Red Option B. LOWEST PROJECTED COST. KEEPS NEW LOWE'S INTACT.</p>	<p>Comment noted. Public input is used to help guide the study. There were nearly 600 comments from the Fall 2018 Public Meetings requesting that ManeGait not be displaced.</p> <p>LifePath has another location in East McKinney. There are 2 plots of undeveloped land adjacent to this property where the Crisis Center could be relocated.</p> <p>INN Style is Samaritan Inn's resale store, not the shelter itself.</p> <p>TxDOT will further analyze possible options for the impacts to the Cornerstone Ranch property.</p> <p>The Red E alignment displaces only a total of 5 businesses between the comparison limits of Red A and B.</p> <p>The Red A alignment does not extend to the existing Ridge Rd. Drawings of the typical sections being considered are available in the public meeting boards posted on Drive380.com.</p>
539	Joe Closs	3/28/2019	Comment Form	I prefer Red Option B. LOWEST PROJECTED COST. KEEPS NEW LOWE'S INTACT.	Comment noted.

I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 550	John Hurlbut	3/28/2019	Comment Form	To whom it may concern, In light of the finalization of solving the traffic on 380. the best remedy is still to fix the highway at its source. A bypass option will not solve traffic patterns on 380. Therefore, fore both short and long term inability, it is necessary to widen 380 in a creative & cost effective manner to improve mobility in the 380 corridor both north both now and in the future.	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.
551	John Jefferies	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
552	John MacDonald	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. 555	John Nugent	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both the Red Alignment E and B, would have a direct negative impact on ManeGait and the surrounding properties, leading to destruction of this exceptional property and displacement of MainGait's vital community services. I would like to note that there are also studies that indicate when one develops the confluence of 3 major arteries at a near single point, accidents increase dramatically. Presently it is taking me 10 minutes or more to exit our Walnut Grove neighborhood onto Custer RD during rush hour. And it is getting worse every day. Moreover, our Walnut Grove neighborhood has no curbs or sidewalks. Hence, many community members walk in the street, often with their children. Bringing more traffic to our area with the Red options will only increase danger by encouraging more traffic to cut through our neighborhood - something it was not designed for.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
556	John Nugent	3/28/2019	Comment Form	This bypass proposal along Custer is a travesty. First, Custer Rd is already overburdened. Placing this by-pass along Custer north of 380 will only exacerbate this growing traffic problem, and will create a traffic quagmire at 380 & Custer moreover, this by-pass along Custer will drive traffic into the Walnut Grove neighborhood which has no sidewalks or curbs. Many children play on these neighborhood country roads. So your proposal will also endanger many children. But more south bound traffic merging onto Custer will be a travesty. Keep 380 on 380	Comment noted. Alignment options are still being evaluated and any future improvements will be designed to enhance safety.

557	John Powell sr	4/5/2019	Letter	This is somewhat of a rebuttal to the attached protest/blanket letter. Everyone has an opinion; however they should at least put their name on it when asking neighborhoods to support their position. This attached protest misses a few points. All the property south and east of McKinney Airport is planned Manufacturing or commercial all the way to East Fork of the Trinity and south from FM 546 to Old Mill Road or Wilson Creek. The purpose of the east loop, is to get traffic thru McKinney, around McKinney not too McKinney. The Airport has to have access to the East side, If McKinney doe's not continue to develop the airport FAA will ask for a refund of the millions of dollars in grant money. I question the argument about property values, currently the indecision has put a serious burden on land owners that are considering selling because now one knows what is to happen, but once the decision is made values should increase regardless of zoning. The proposed connection to Airport Blvd. on the south end is currently being closed off due to building development. There are few actual residences that would be further impacted by Hwy 5 east if the design is done correctly. In fact from Country Lane east and south then north much of the property is absentee land lords, of course the distance from the new road would have an impact on noise and traffic in the neighborhood. I'm sorry but choosing to live in a County that is one of the fastest growing areas in the nation is going to get crowded if you are going to grow you have to have water, electricity, road. My family did not ask for this much growth we have been here since 1928. So yes we have had to endure a lot of changes I have no objections to contributing to the success of the County but it has to be even handed. All government agencies have to be honest with the folks. Those that benefit have to compensate those that giving up their way of life. Those concerned about the collateral effect of growth should petition of their local governments to stop issuing building permits. Thank you.	Comment noted.
558	John R Wood	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. 563	John worley	4/7/2019	Email	<p>The image below was taken from the TXDOT presentations on the possible realignments for US380 through Denton and Collin Counties. In Denton County, the multiple possibilities shown represent the early stages of the project. In Collin County, the routes still being considered are shown. The image below is the same image with the shortest TXDOT route highlighted (in red) and my proposed route (in blue).The primary difference between the 2 routes is that the TXDOT route returns to use portions of the existing US380 in 4 places while my proposal uses a (mostly) new route. In order to convert existing US-380 to a Limited Access Roadway, the entire roadbed would need to be removed and replaced, at a much higher cost and longer schedule. The image below left shows the differences through Denton. The TXDOT route is 1.26 miles longer than my proposal (8.68 miles), and uses 5.32 miles of existing US-380. The image above right shows the differences across the county lines. The TXDOT route is 3.03 miles longer than my proposal (14.35 miles), and uses 12.41 miles of existing US-380. The image below shows the differences in eastern Collin County. The DOT route is 1.7 miles shorter than my proposal (24 miles), and uses 7.34 miles of existing US-380. An alternate route (shown in dashed pink) is 25 miles long, but only uses 17.5 miles of new roadway. Returning to the image with the shortest TXDOT route highlighted (in red) and my proposed route (in blue), my proposed route is 71 miles long while the TXDOT route is 2.6 miles longer and uses 25 miles of existing US-380. The Differences Between the Routes in Collin County The TXDOT route does use 25 miles of existing US350 Right of Way, whereas my proposal uses very little existing Right of Way. However, the TXDOT route still requires 68% as much new Right of Way purchase (48.6 vs. 71 miles) as my proposal. And, as noted earlier, in order to make the existing sections of US380 that are planned to be reused into a Limited Access Roadway, those entire sections would need to be completely torn out to be upgraded. During construction of the TXDOT route, along the existing sections of US380 that are planned to be reused, as well as the connection points to the new sections on the ends of those existing sections, traffic along US380 would be significantly disrupted. My proposal would not effectively impact any existing traffic during construction. The TXDOT route has 8 connection points with the existing traffic flow where slowdowns will occur anyway after completion. The existing sections to be reused have the longest traffic tie ups currently. Traffic originating in a section of existing US380 that is bypassed and/or traffic terminating in those sections will be required to merge and exit from the traffic flow of the new roadway, adding to the congestion there. There are no effective alternate routes for them in the TXDOT route. John Worley April 7, 2019 US-380 – Denton and Collin County Page 3 Grade Separated Intersections (shown above) will improve traffic flow some, but the traffic entering or exiting the stream in those locations will still cause tie ups. The tie ups will be furthered by traffic entering or exiting the businesses along the exiting US380. Unless these sections are upgraded to a Limited Access Roadway (at additional cost and traffic disruptions as noted), the traffic flow improvements proposed will not be realized. Additionally, the entry and exit lanes will require removal of all businesses currently on all 4 corners of the intersection. In my proposal, existing US380 becomes US380 Business and would carry traffic that wants to flow less than 5-10 miles, while the new route would carry traffic that wants to flow more than 5-10 miles. Besides carrying the US380 through traffic, my proposed new section of US380 in eastern Collin County (south of US380 Business), along with the Spur 399 Extension, and the Lake Corridor Thoroughfare, provides a good route for all of the traffic in the Lake Corridor to reach US75/SH121. With the proposed improvements to FM1378, a new, short, section of roadway could connect from the corner where FM1378 turns southerly, east of the Heard Museum, to the new US380/Spur 399 Extension interchange, allowing N-S flow. Additional traffic along the Lake Corridor Thoroughfare ties into FM1378 in Parker. My potential new road in eastern Collin County (north of US380 Business) would serve the residents of Blue Ridge and Farmersville if the population increases as projected to 750,000 The need for roadways is based on population projections. Original projections of Collin County were 2.1M; then 2.5M; then 3.44M; and now 3.8+M. The chart below shows the required Annual Growth Rate experienced in the past and that required in the future based on population projections. Note that Plano, McKinney, and Allen have never exceeded a 10% AGR, while Farmersville, Blue Ridge, and Celina must not only exceed 10% AGR for over 25 years, but must reach 25% AGR. Using a more realistic AGR, the Collin County population would remain below 2.2M until well after 2050. The chart below left came from a Freese and Nichols presentation representing a population of 3.44M. The chart below right came from the most recent TXDOT presentation representing a population of 3.8+M. In both charts, each yellow dot represents 250 people. However, the higher population chart (on the right) has a notably lower density of dots. In my opinion, the population projections are way out of line. I do believe the TXDOT population density chart above right, in that the population in the eastern third of Collin County will be as light as shown, and on its own, doesn't justify all of the new roadways proposed by NCTCOG. US380 needs to be improved without closing all but 1 lane each direction over the 25 miles across over a 5-8 year construction period (as will happen with the TXDOT plan). The planned 3rd lane of US380 (Business) in eastern Collin County should handle local traffic if a new US380 is built for through traffic. Using the route planned for the</p>	<p>Comment noted. The scope of this study is through Collin County. TxDOT is currently conducting a similar but separate feasibility study in Denton County.</p> <p>Initial traffic analysis does not indicate that both a bypass freeway alignment and a freeway along the existing US 380 will be warranted.</p> <p>TxDOT makes every effort to minimize impacts during construction of its projects. This includes lane closure during construction.</p>

564	Joji Sakai	4/4/2018	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p><u>There is not a 4 level interchange proposed near Ridge Road</u> Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>

567	Jon Dell'Antonia	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 568	Jon Dell'Antonia	3/28/2019	Comment Form	<p>I am <u>opposed</u> to widening 380 because it will destroy about 10 businesses and the subsequent property & sales tax to the city along with the elimination of thousands of jobs. I support Red Option B or E as the bein the least expensive offering the least impact to businesses and homes!</p>	<p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
569	Jon Dell'Antonia	4/7/2019	Email	<p>As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9417 residences of Stonebridge Ranch and its 36,000 residents who live in McKinney. In a unanimous vote, we stand in agreement along with the 381 residences in the Tucker Hill Homeowners Association and its 900 residents, Harvard Park, and several hundred verified business owners who wish to preserve our city's economic health and commercial corridor. We hereby make an official statement in support of either bypass Red Option-B (our preferred option) or Red Option-E and oppose bypass Red Option-A or the green alignment of widening 380 or converting it to a limited access freeway. Options B or E are the most viable, least expensive and least disruptive to businesses and homes along 380 when compared to widening 380 (the green option). If Highway 380 (the green option) were implemented, according to TxDOT's own numbers, it will destroy nearly 200 businesses and homes along the 380 commercial corridor including all of the existing businesses on the four corners at the intersection of Highways 380 and 75, and impact the historic and empowerment zones in McKinney. This will result in a significant reduction in the sales and property taxes to the City of McKinney along with bringing an increase in traffic and noise to the already developed housing subdivisions that abut 380 with more to come. As to the detrimental impact on Stonebridge Ranch if 380 were widened, it would double the width of the current highway and bring significantly more traffic to the area. In addition to the increased noise for the hundreds of homes in Stonebridge Ranch that abut 380 on the Northern edge of Stonebridge Ranch, there are three roads: Lake Forest Drive, Ridge Road, and Stonebridge Drive that go completely through Stonebridge Ranch and provide the only means between Hardin Road and Custer Road for getting to Virginia Parkway, ElDorado Pkwy, Custer Road and Highway 121. These roads were designed for neighborhood traffic and not arterial connectors to other major roads. That is the reason for our opposition. If the proposed bypass (Red Option-A) that enters Highway 380 East of Custer Road were implemented, in addition to the above traffic problems, there would have to be a major interchange built at the intersection of the new six lane bypass and existing 380 which is already six lanes. This interchange would be right above the northern edge of Stonebridge Ranch just east of Ridge Road. It would have a very detrimental impact on both Stonebridge Ranch and Tucker Hill by bring a significant increase in traffic along with an increase in the air and noise pollution to our neighborhoods beyond any other option. On the subject of impacts to non-profit organizations that would be affected, if 380 were widened (the green option), three non-profit organizations in McKinney would be destroyed: Life Path Crisis center which is Collin County's only in-patient mental health facility, INN STYLE which is the store that provides funding for the Samaritan Inn homeless shelter, and Cornerstone Ranch that houses adults with special needs. No one is speaking up for them. Since they are not backed by individuals with financial resources, they do not have the funds to mount a campaign to save themselves. It would be a tragedy to lose them. Ask yourself; is MainGate (who would not be destroyed) more important than these three entities who serve more individuals? We also support business owners who have invested in our city and employ our citizens. We support preserving and growing our much needed tax base, and we support minimizing home and business displacements and preserving the jobs of the thousands of workers that would be eliminated if 380 were widened (the green alignment option). To reiterate, our Board, on behalf of our residents has unanimously voted to oppose the proposals to widen Highway 380 or convert it to a limited access freeway and support either of the alternative bypass route options North of Highway 380 that cross Custer Road and enters Highway 380 West of Custer Road known as Red Option-B or Red Option-E Thank you for taking the time to consider this letter and our position.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
570	Jon Dell'Antonia	3/28/2019	Comment Form	<p>I support Red Option - B or Red Option -E. I <u>oppose</u> the widening of 380 (The green alignment) You Need to be aware that these are been \$1.2 Billion in property value adres to the city of McKinney in the past 12 months. Most of it has come from the realignments at Hardin and 380. The core of that property and sales tax dollars would be significant to the city. That would happen if the Green alignment were selected. The bypass B and E avoid this problem.</p>	<p>Comment noted.</p>
571	Jordan Huffer	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
572	Jordan Reiley	4/8/2019	Email	<p>I am writing this email on behalf of the my family (the Reilly's) that lives at ██████████ in McKinney. In January 2018, while living in Stonebridge Ranch, my wife and I began to look for our dream property as we were getting ready to welcome our first child into this world. We had a few requirements:</p> <ol style="list-style-type: none"> 1) We wanted to raise our children on multiple acres to resemble the semi-rural lifestyle that my wife enjoyed growing up in Missouri 2) We wanted to stay in the McKinney area as we have loved every second of living here due to the family culture, the people, and the living conditions. 3) We wanted to stay close to our church (First McKinney) as we are the Young Married Life Group directors of over 20 young couples that live in McKinney and I (Jordan) currently serve as a Deacon in the church. As you can imagine, this was not an easy find and one that took much prayer and searching. We found this property in April and closed on it in August 2018. It was a huge blessing for our family for many reasons. It has everything that we were looking for: amazing neighbors, beautiful property, close to everything that McKinney offers, and we are able to continue to serve in our church and in our community (we love serving the less fortunate through Samaritan Inn and Grace2Go). I (Jordan) was born and raised with humble beginnings in Detroit, Michigan and moved to Texas to work with IBM soon after graduating from the University of Michigan. I now run Global Sales for a Silicon-Valley based technology startup and it has provided the means to give our family the living arrangements of our dreams. However, if the 380 bypass is approved, all of this will sadly be for naught as it will run directly through our house. We ask that you strongly consider keeping 380 on 380. We are one of the many families that would be directly impacted in a negative way if the bypass is approved and it breaks our heart as we have spend our entire professional careers saving for this property. It seems that every couple we speak to in our community or at our church is strongly opposed to the bypass. We love this city, and pray that you and our other leaders would continue to do what is right for our community. We ask that you <u>oppose the 380 bypass</u>. 	<p>Comment noted.</p>

573	Joseph Huffman	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at
574	Joseph Ross Callaway	3/28/2019	Comment Form	I live 600 feet from Bloomdale Road (cr 123). When we bought our house, the city plans showed Bloomdale becoming a b lane road with a speed limit of 45 MPH. We were not expecting to have an 8 lane Highway with a speed limit of 75 MPH. There are a lot of homes right off Bloomdale that are in the same situation that my family are in. I think that it makes sense to fix the problem on the problem which would be US highway 380 and to start the construction of the collin county outer loop.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
575	Josh & Falon Searle	4/5/2019	Email	COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
576	Josh Brown	3/30/2019	Email	I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TXDOT should do bypass option A that originates in McKinney. The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion. I hope TXDOT does not bow to special interests again and honors the VAST MAJORITY of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, expanding FM 1461 to 75, and completing the Outer Loop. connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
577	Joshua Lake	3/28/2019	Comment Form	The revised alignment presented does not save Maingate. Maingate is a staple to the area and should not be destroyed due to poor planning in this area. 380 should stay on 380 as that was and is the central arterial roadway in the area. Traffic noise, construction and increased volume does not allow therapeutic horses in their native environment. 380 should stay on 380.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
578	Joshua Renberg	8/5/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
579	Joy Bralfore	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. There is not a 4 level interchange proposed near Ridge Road.

580	Joyce Sakai	8/4/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. There is not a 4 level interchange proposed near Ridge Road.

584	Juan Cortez	3/28/2019	Comment Form	I am against the 380 bypass. Driving on 380 it is easy to see the communities that took 380 into account and set their communities far back enough from the highway. The fact that City official allowed businesses to continue to build so close to 380, is not a reason for a bypass. Homeowners along the bypass route took 380 into account before buying/building their homes. Expanding the already planned outer loop would make more sense. Instead of having to fight homeowners at every city bypass along 380, as well as business, we should look at the outer loop.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.

586	Judson Jones	3/28/2019	Comment Form	Keep 380 on 380. The bypass options disrupt areas that property planned for development. Homeowners in Prosper should not have our home values negatively impacted, nor should we lose valuable tax revenue in the town of Prosper.	Comment noted.
587	Juli Westcott	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
588	Julianna Brown	3/29/2019	Email	I am strongly against any bypass option, especially one starting west of Custer Road and going through Prosper (red alignment option B and option E). Prosper has limited Commercial opportunities, and to build a Bypass freeway through some of our few Commercial land plots or to eliminate the Lowes that brings about \$750,000 per year in sales tax to the Town of Prosper would be a huge cut to Prosper's future income earning ability. The results of the Fall 2018 Survey (obtained through a public information request) show an overwhelming 62% of survey respondents prefer the green alignment to fix 380 on 380 (see below), compared to only 21.3% that prefer the red alignment bypass option B through Prosper. That is almost triple the amount of people that prefer the green option versus the red alignment option B through Prosper. Since the City of McKinney failed to plan for their future growth, if a bypass option is absolutely needed TxDOT should do bypass option A that originates in McKinney. The residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway. The residents of Prosper paid a premium when we purchased our homes to live in a nice and quiet area far away from a highway. It is not fair that Tucker Hill residents are trying to shift the economic burden caused by their own poor planning to the residents of Prosper. Please do not cave in to a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion. I hope TxDOT does not bow to special interests again and honors the VAST MAJORITY of respondents in their desire to make 380 a limited access freeway. To help ease 380 congestion, please widen East-West roads north of 380 between Custer and 75 to 3 lane roads each way. This would include pushing Prosper Trail/Bloomdale Road through to 75, connecting First Street to Wilmeth Road to 75, expanding FM 1461 to 75, and completing the Outer Loop. Thank you for your time and attention on this matter. I hope to hear that TxDOT is moving forward with the overwhelmingly supported green option of fixing 380 on 380 when it presents its final alignment option for 380 this Spring.	<p>Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
589	Julie & Joe Lichter	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 591	Julie Belk	4/4/2019	Email	<p>COMMENT: I support expansion of 380 into a highway with no bypasses. Think through what should be built now that could later be part of a highway system. I am particularly against the Red Alignment B and E bypasses to the north because they would compromise a model therapeutic program, Manegait. This program is a national model engaging the community as volunteers and healing patients outdoors with incredible results for neural path development after traumas like a stroke or traumatic brain injury. Making 380 a highway would not compromise the program; building bypasses near or through it would ruin it. If building the Green Alignment or Red Alignment A could jumpstart making 380 a proper highway, those would be acceptable.</p>	<p>Comment noted.</p>
592	Julie Me	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. 597	Kaitlyn Stroud	4/9/2019	Email	<p>I am writing in support of the Green Alignment. It is the best option to ensure that the entirety of 380 can handle the future growth both residential and commercial. Driving down 380 from Preston to Hardin there is still a vast amount of undeveloped land zoned for both residential and commercial. Once that land is built out, the internal traffic along 380 will only get worse. More cars will travel to these locations, and more traffic lights will be placed which will result in significantly more congestion. The bypass will not fix the issue with people traveling to those businesses or homes. Fixing 380 now is the best option to handle that inevitable growth. It will absolutely save time and money in the long run and ensure that both Prosper and McKinney's future growth is guided in the appropriate manner. Fix the issue now where it needs to be fixed, rather than wasting time and money on a bypass that is severely limited in value.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

602	Karen Graham	3/28/2019	Comment Form	Red Option A would seem to be the least impactful as far as residential communities. Red Option B & E should NOT be chosen as these would have a greater effect upon the residents of McKinney on the east side of Custer & the noise that it would bring to the resident of Whitley Place. The best option would be to keep 380 on 380 & expand it. I feel that any of the proposed routes would probably not be used. Few drivers are going to want to drive that far north.	<p>Comment noted. Red Option B has the least residential property impacts and displacements.</p> <p>Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
603	Karen Newton	4/12/2019	Email	I do not understand at this late date why we are now considering different alignments. Based on my current knowledge I am in favor of the following: The GREEN Alignment that would expand 380 on the existing US. 380. This would not affect myself or the well established community I live in. Red Alignment A as a bypass highway. In addition to myself, this would also ensure the preservation of Mane Gait which supports a population that is in need of these services. TXDOT has already taken part of my property for the expansion of Custer which is in need of widening. I do not understand how any bypass next to Custer can possibly make any sense--two heavily congested roads practically on top of each other? I appreciate in advance your review of this information,	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>

610	Katherine Clark	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 616	Kathy Lamb	4/5/2019	Email	<p>COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Although I live in Plano I frequent the city of McKinney weekly for horseback riding for our special needs daughter, church, family visits, restaurants and shopping. Thank you for your consideration on this very important matter.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
617	Kathy Seei	3/28/2019	Comment Form	<p>380 has been a U.S. Highway since 1952. People who chose to build their homes along a highway that has been slated on its current alignment on all the transportation/thoroughfare plans for the cities of McKinney, Prosper & Frisco. A little research by the homeowners on 380 would have informed them that it would one day be expanded. Continued consideration of two bypasses through the Town of Prosper even though keeping US Highway 380 is currently documented in the comprehensive thoroughfare plans of Frisco, Prosper and McKinney (updated less than a year ago). Since I am a politician not an engineer I can only imagine the reasons for the last minute addition of these two by-passes through the Town of Prosper that have not been fully evaluated: 1. Powerful elected leaders (former and current) who are personally impacted or whose political and powerful friends are impacted by improvements to the current alignment. 2. Threat of political retribution for elected leaders at the ballot box if they support keeping 380 on 380. Please restore my faith that TxDOT is run by engineers not politicians. Do a fair comparative analysis or better yet just eliminate the by-passes from consideration and Keep 380 on 380 as all the affected municipalities thoroughfare plans dictate.</p>	<p>Comment noted.</p>

618	Kathy Seei	3/28/2019	Letter	My name is Kathy Seei. My husband Bob and I have been citizens and homeowners in Collin County for over forty years. We currently reside in Whitley Place neighborhood in Prosper just north of the two proposed by-passes through the Town of Prosper. Ray Perryman was hired to complete an economic impact study and environmental impact studies have been completed for improving US Highway 380 in its current alignment through McKinney (land mass of 62 square miles). None of these professional evaluations have been completed for the two remaining proposed by-passes through the Town of Prosper (land mass of 28 square miles). The Town of Prosper has passed resolutions opposing both by-passes through Prosper. The first by-pass cuts through land zoned for single family residential on large lots and includes wetlands and cemeteries. The second by-pass eliminates \$8 million dollars in tax revenue for the Town of Prosper with the destruction of a Lowes Home Improvements Store and several other businesses. Without thorough economic and environmental impact studies, we can only project the total economic and environmental impacts to the Town of Prosper and our neighborhood just north of both proposed by-passes through Prosper. For Prosper residents to be treated fairly, full financial and environmental impact studies need to be completed for the by-passes through Prosper BEFORE the decision is made on a final alignment of US Highway 380. Only then can a fair decision on the true impacts of these new alignments to the Town of Prosper and its citizens be made. If the by-passes through Prosper are not serious contenders, please do not waster precious transportation dollars on these studies. Simply eliminate the suggestion of any by-pass through Prosper as the Town Council has made known through resolutions and use those savings to mitigate impacts to keeping 380 on 380. IMPACT STATEMENT: Loss of Trust in TxDOT. My three brothers are all engineers - if I had been born 10 years later I would probably be an engineer. Engineers by nature stick with the facts and are resolute in championing the best solution. I am a politician by default. My impact statement today - a potential loss of trust in TxDOT. Reasons for loss of trust: 1: Both by-pass options have been formally opposed through resolutions by the Prosper Town Council by remain as alternatives to keeping 380 on 380. 2: Both by-pass options have not been evaluated for economic benefit. 3: Both by-pass options have not been evaluated for environmental impacts. 4: Continued consideration of two bypasses through the Town of Prosper even though keeping US Highway 380 on 380 is currently documented in the comprehensive thoroughfare plan of Frisco, Prosper, and McKinney (updated less than a year ago). Since I am a politician not an engineer I can only imagine the reasons for the last minute addition of these two by-passes through the Town of Prosper that have not been fully evaluated: 1: Powerful elected leaders (former and current) who are personally impacted or whose political and powerful friends are impacted by improvements to the current alignment. 2: Threat of political retribution for elected leaders at the ballot box if they support keeping 380 on 380. Please restore my faith that TxDOT is run by engineers and not politicians. Do a fair comparative analysis or better yet just eliminate the by-passes from consideration and Keep 380 on 380 as all the affected municipalities thoroughfare plans dictate.	Comment noted. The purpose of the feasibility study is to analyze potential roadway alternatives, for US 380 through Collin County. Based on feasibility study factors presented at the public meetings, TxDOT determined that when all alignment options were compared that the proposed alignment segment through Prosper is a viable option that should be further analyzed.
619	Kathy Spagnolo	4/6/2019	Email	Please read .. I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I have been a volunteer at ManeGait for several years. PLEASE do not approve a bypass that would disrupt their mission. I have seen so many blessings take place at this wonderful ministry..	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
620	Katie Callaway	3/28/2019	Comment Form	I support fixing 380 on 380 and strongly oppose any bypass options. All of the current bypass options go down Bloomdale Rd (R23) which will have a heavy residential impacts. In particular, Heatherwood and Bloomridge are sitting directly nest to the proposed bypass. Our home is less than 600 feet away. We moved to McKinney to start a family and bought a house within walking distance of a school we didn't move here to be near traffic and experience the other negative consequences of a 75 mile per hour bypass feet from our house. Although construction wouldn't start for years, the property values impacts our neighborhoods would be immediate and it would likely be more difficult for individual citizens to relocated versus a business. Additionally, per the survey results, McKinney, Prosper and Frisco residents preferred to perform the work on 380. The current problems on 380 will not go away with a bypass within the added growth as well as continued commercial option, even more traffic will be heading down 380 on 380 in addition to building the outer loop and expanding arterial roads. Please do not choose to impact a larger number of McKinney home owners by building an unnecessary bypass.	Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. Both the red and the green alignments presented were viable when traffic analysis was conducted.
621	Kay Centofonti	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Please vote GREEN!	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
622	Kay Prindwille	3/28/2019	Comment Form	380 should stay at its present roadway. The bypass options all impose on the town of Prosper & it takes the brunt of the proposed hardship for business & property owners. Money would be better spent completing the outer loop	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
623	Kaye Franks	4/3/2019	Email	Dear Mr. Endres As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>
631	Kelly Parra	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. 632	Kelly Patterson	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. There are 2 miniature horses that we raised and taught to drive a cart that were taken in by MainGait to be used in their program. They are thriving so well there, doing what they love. This program is extremely important to many families with children and some adults with disabilities and should not be disrupted in ANY way. We are friends with the founders (whom also have 2 more of our miniature horses) and their home and the horses they own would also be forced to move as they reside directly beside ManeGait. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

639	Kenneth E Seguin	4/3/2019	Email	<p>FROM THE FACEBOOK PAGE "Fix 380 on 380?" Interesting question and two responses I just read: Question: "If Option B (or E) goes through would the loss of the tax revenues from those businesses be enough to affect the PISD bond repayment? PISD is holding a bond election in May. Response: PISD Bonds are repaid thru the residential property taxes. So yes a dip in those or decrease in the projected revenue would affect all of the bypass areas that are zoned for Prosper ISD. INCLUDING HOMES/LAND IN MCKINNEY if they are a part of PISD. PISD supports fixing 380 on 380. Would it prevent it from being repaid, no. But it would definitely restructure the investments and land use for schools etc. PISD charges the maximum tax amount allowed in the state of Texas so no reduction is expected and no increase to the amount is allowed. Like with the stadium PISD is frugal in its usage of the Bond funds, like waiting until the high school was at capacity before building the one at Rock Hill, so repayment will be greatly considered before spending or building new schools. Unlike Frisco that built while it has the right to and then schools sit empty for time until they can fill it. Response: It will cost the school district a large amount in having to sell the land slated for the third high school and acquiring new land at today's market. They can't possibly build that school if the bypass goes in.</p>	<p>Comment noted. None of the proposed alignments take any land from an existing school, land owned by ISDs for future schools, or land for known planned schools that have not yet acquired land.</p>
640	Kenneth E Seguin, President – HOA Whitley Place	3/28/2019	Comment Form	<p>(1)One has to question the integrity of this process when the majority of Frisco, McKinney and Prosper residents voted to improve US Hwy 380 and that seems to be ignored. Additionally, Prosper Town Council and Prosper ISD passed resolutions opposing any by-pass. Bill Darling of Mane Gait took a public position against a by-pass. Then TXDOT appears to do an "end run" around Prosper Town Council, PISD and Mane Gait by coming up with Red Option "E". Why is TxDot ignoring Prosper's sovereign rights as a Town? (2) How does TxDOT justify proposing Red Option "E" to wipe out Lowe's, Taco Bueno, Popeye's, Burger King (which generate \$4 million in tax revenue), along w/the planned Kroger, in order to please Tucker Hill and Stonebridge Ranch? (3) These by-pass options reek of bending to political pressure brought by former Collin County Judge Keith Self (a Tucker Hill Resident) who told TXDOT to investigate a Prosper by-pass and it was not a decision of the entire Commissioners Court. What pressure is also being brought by former Plano Mayor Jack Harvard (owner of Palios Pizza next to Tucker Hill) and who was convicted in Federal Court of fraud? What about Stonebridge Ranch HOA President John Delltonia who is the president of the Stonebridge Business owners association? Simply put, "Fix 380 on 380" and listen to the residents forming the majority.</p>	<p>Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p>

644	Kevin Atherton	4/9/2019	Email	<p>I support the Green alignment proposed VS the other options.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p>
645	Kevin Carley	4/4/2019	Email	<p>Dear Mr. Endres, My name is Kevin J Carley and I live at [REDACTED]. I am writing to you in support of either the 380 Green Alignment or the Red Alignment A. My main reason for supporting either of these two options is that the other plans would have a major and catastrophic impact on ManeGait Therapeutic Horsemanship. This non-profit organization does amazing work for our community and changes the lives of children who otherwise are lost in mainstream America. The work they do in order to make children as well as adults feel that they are important and can ACHIEVE is immeasurable. I know this because I have a 42 year old son who has Cerebral Palsy and has been riding at ManeGait since it's opening. His life and that of many other riders revolve around that one hour lesson every week. He feels part of something special, not to mention the medical benefit he receives from the therapy. You may say that they can move and adjust to a new location. Yes, they can. However (and I don't expect anyone to understand this, unless they have a child in the program) there is something magical about their current location. The peaceful tranquility is unmatched. The mature trees that surround the property, the open fields the livestock next door, and especially the familiarity these kids have come to latch onto. Sounds trite, but to ask some of these children to adjust to a new location could be devastating for them. In summary, I hope you consider some of my points and choose the plan that will preserve a very very special place for some very very people.</p>	

646	Kevin Smith	3/28/2019	Email	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
648	Kim Carmichael	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. 652	Kim Williams	4/4/2019	Email	<p>I have been a McKinney resident for 18 years and have been a volunteer at ManeGait for approximately 5 years. With the exception of a brief stint living on the west side of central expressway, I have always lived in the historic district. McKinney is special, both the downtown area and the city as a whole, since it still retains its small town feel, while growing at a rapid pace. I understand that Collin County is projected to grow by another 2 million residents in the next 25 years, and with that comes the need to expand our infrastructure and roadways. I support the GREEN alignment plan between Coit Road and FM 1827 for the expansion of US Hwy 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community; a community that is truly Unique by Nature. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on MainGait, leading to destruction of this exceptional property and displacement of their vital community service.</p> <p>Much appreciation for your consideration of this request.</p> <p>Take care.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

659	Kristi Contreras	3/28/2019	Comment Form	<p>Please keep 380 on 380. Our family has special needs children & moved from California to Prosper, TX after finding it a great place to help calm our aggressive son's autistic behaviors. The noise from a freeway previous caused our family extreme distress. We carefully selected Whitley Place based on land development plans for the town to provide lower density housing – minimizing nearby noise & congestion. We used 10 years savings to make this possible. It has been life transforming. Please don't destroy this child's refuge.</p>	<p>Comment noted. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.</p> <p>I also very STRONGLY OPPOSE Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road - right in the backyard of thousands of homes. The Green Alignment and Red Option-A will depress home values in that area. If this option were implemented, it would have a detrimental impact on both Stonebridge Ranch (with 10,000+ homes) and Tucker Hill. It would require that a large interchange be constructed at US 380 on the northern border of Stonebridge Ranch, creating an eyesore for adjoining neighborhoods and decreasing the home values of neighbors in our community.</p> <p>Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p> <p>It's unfortunate that a few homes and properties may be lost with bypass options, but widening 380 and putting in interchanges in the middle of thousands of homes and businesses will destroy home values, tax revenue and jobs in our city. It makes no sense for the future of our community.</p>	<p>Comment noted. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road.</u></p>
667	KT Wasson	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM1827 for the expansion of US HWY 380. It is the optimal and most efficient path for the east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would asar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, MainGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on MainGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
668	Kyla Smith	3/28/2019	Comment Form	<p>Keep the Direct & only useful route 380 on 380. The Northern loop provides the alternative route around traffic. Properly fix expand and use 380! McKinney can not bully their poor plans onto the taxpayers of Prosper! MainGate Hourse farm will not be useful with a loud freeway bypass next to it. Autistic kids cant handle that noise! Our small towns tax base needs Lowes!</p>	<p>Comment noted. 672	Lainie Evans	3/28/2019	Comment Form	<p>From a monetary standpoint, option B or E makes sense. However, this is only true due to McKinney's horrible lack of foresight in allowing businesses and communities to be built so close to 380. Or perhaps they have "won the game" since they are to this day approving businesses and communities to be built on 380. They beat Prosper to poor development so Prosper and its residents are getting screwed. "Existing development" takes precedence over future development". So by screwing up, McKinney wins and gets to put a bypass through Prosper, past my backyard, past my daughter's school. I feel betrayed and aghast at the poor planning on McKinney, Collin County and TXDot.</p>	<p>Comment noted.</p>

677	Larry and Martha Garske	4/8/2019	Email	<p>My husband and I (Larry and Martha Garske) support the GREEN alignment option between Coit Road and FM1827 for the expansion of US Hwy 380. The Green alignment preserves Colin County's most prominent nonprofit organization, ManeGait Therapeutic Horsemanship. Both Red alignments E and B would have direct impact on ManeGait, leading to the destruction of this exceptional property and the displacement of the vital community service it provides for special needs people. Our grandson, Gabriel Roberts, is a 19 year old with disabilities. He is non-verbal and cannot walk. The main activity outside of his home that gives him pleasure, is the Therapeutic Riding Program at ManeGait. His confidence, as well as muscle strength, balance and social skills have improved greatly because of this program. The love and care given to Gabriel by his instructors is very heart-warming and exciting for his family. The environment at ManeGait is fun and enriching for Gabriel. My husband and I have been with Gabriel at ManeGait several times. We see his enjoyment of this wonderful opportunity. We have a serious concern regarding plans for the US Hwy 380 expansion and the potential impact on ManeGait. We pray that this beautiful land and caring community will be able to continue its mission to provide for the needs of all special needs people. We ask that ManeGait be able to continue the services provided for our children and grandchildren for many years to come by choosing the GREEN alignment option.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. 684	Laura Cortez	3/28/2019	Comment Form	<p>I am against the proposed 380 bypasses. When we moved to McKinney from Dallas, we knew that 380 was not going to be able to handle the growth. We knew to look for our home away from 380. This was almost 10 years ago. If we knew this, the city had to know this as well. Citizens should not be losing their homes, playgrounds, schools because of the city's poor planning. I do not want to see a concrete jungle from my window, I do not want to see smog as I walk my son to school. A bypass is a bandaid. It will not fix/cure congestion 380 will have to be expanded – just do it now! Build out the outer loop. Fix arterials keep 380 on 380 it's the right thing to do</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
685	Laura Eubanks	4/8/2019	Email	<p>Please consider my support for the GREEN alignment between Coit Rd. and FM 1827 for the expansion of HWY 380. It is the most efficient path for east-west traffic through the cities of McKinney and Prosper. The bypass is unnecessary and would have many negative consequences concerning our community. Green alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. An environment that brings health and healing to children and adults with special needs. Both Red alignment E and B, would have direct impact on ManeGait, leading to destruction and displacement of this vital and much needed community service</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
686	Laura Froelich	4/6/2019	Email	<p>Proposed Wording for US 380 MAPO Comment Form As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 701	Leslie Allcorn	3/28/2019	Comment Form	I am writing to express my strong support of the Red Bypass B. I am a longtime McKinney resident and am very aware of the dire need for more traffic options for the ever-growing population of Collin County and the surrounding areas. The Red Bypass B disrupts the fewest homes and businesses and offers a great additional option to the 380 highway. If 380 was widened to a LAR it would eliminate my home and also my business. Please consider my plea in favor of the Red Bypass B.	Comment noted.
702	Leslie Banks	4/5/2019	Email	COMMENT: I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
703	Leslie Burkett	4/6/2019	Email	I and my family say NO to the Red Route. We have lived here for 18 years and would hate to see anymore of our beautiful land taken away. Again, I say NO to Red Route!	Comment noted.
704	Leslie Fossen	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road</u>
705	Leslie Tillisch	4/12/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services." Here is why: 1. I have lived in this area for almost 25 years. I opened the first Target store on the East side of 75. When that store was open in 1994, 75/380 was a nightmare back then. You have allowed McKinney to grow without looking at the future. I believe that McKinney should have to figure out what to do with 380. 2. Taking away Mane Gait from these riders and volunteers would be devastating. My daughter has been riding out there since the second session. The programs that Mane Gait provides help kids and adults feel normal even if it is for an hour or a few hours. Even being a parent taking her out there makes me feel less stressed and I can have a watch her ride and compete like a normal person. If either Alignment E or B ends up being the final option, you will not only displace the residents and business, but you will also displace many riders who thrive out at Mane Gait. An easier way to ease some traffic along 380 would be finishing building out Wilmeth and Bloomdale. Most traffic from the north are using these back roads anyway. And why would traffic cut through go north to east and west as bypass? It does not make sense.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
706	Lewis W Pollok	4/5/2019	Email	I support the Green alignment & oppose Red alignments B & E for US Hwy 380 expansion. I have been a volunteer for 12 years & miracles happen at Mane Gait.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.

707	Lilly Tu	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. 708	Lily Golondzimier	3/28/2019	Comment Form	<p>The new option along custer that takes out Lowe's still impacts Mane gate Farm & the beautiful ponds. It runs along Custer for a long way & then cuts over to Lowes. There will be a lot of traffic back up in peak hours sending lots of polluted air to Whitely Place & homes around which right now have minimal traffic impacts & pollution. Please give up this idea of cutting thru Prosper. The tax revenue loss to Prosper will be significant. There is an area that totally by passes Mane gate futher to the south & would effect only a corner on 380 & Custer & leaves Lowes in tact. To run along Custer it will be elevated? Ruining our peaceful area. Keep 380 on 380.</p>	<p>Comment noted. Option E would be elevated. Typical sections showing the alignments are available on www.Drive380.com.</p>
709	Linda Beene	4/3/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. 714	Linda Pritchard	3/29/2019	Comment Form	<u>for Red Bypass</u> Red Option B I live at [REDACTED] As part of Walnut Grove I'm FOR A Bypass. Unlike the Very wellhear vocal group that has flooded the meetings & news. To keep 380 on 380 would not be the Best for the most! You need to Start North of McKinney (Red line) and make a loop. Widening 380 is not the answer. How can you move traffic and Build what is expected with our total grid lock. A loop would allow a flow as you build.	Comment noted.
715	Linda Ray	4/4/2019	Email	we are completely supportive of the "Green Alignment"-don't mess with the Main Gate environment!-	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
716	Linda Woods	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. We have personal connections with ManeGait. Having grown up with Priscilla Lewis Darling, co-founder, we also have volunteered with our therapy miniatures for many years at events. ManeGait now is home to two of our miniature horses and this possible move would affect them as all the horses to readjust to different surroundings, which in turn would affect how the horses react with the many people with disabilities that attend and depend on the interaction with the horses. Please do not choose a way that would displace ManeGait or put them in harms way. This facility has been and continues to be a vital asset to McKinney and surrounding areas. Thank you for your time and listening to a desperate plea to help save ManeGait.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
717	Lindsay Williams	4/4/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. 725	Lorri Deems	4/5/2019	Email	<p>Dear Mr. Endres and the TXdot committee, I have been a donor to ManeGait located in McKinney, Texas for years. My family personally knows multiple families who have loved ones that have greatly benefitted from the therapy ManeGait provides. This specialized therapy has been life changing for so many individuals. Therefore, I am in support of the Green Alignment which will preserve ManeGait's ability to continue to help countless individuals (Veterans and children and adults with special needs). The Green alignment between Coit and FM 1827 for the expansion of US Highway 380 is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. Green alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment B and E would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. For those making the final decision, please allow ManeGait to continue the healing of their riders in an uninterrupted atmosphere... lives are counting on it.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

726	Lou Phillips	4/1/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option A.</p> <p>I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area.</p> <p>Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>

731	Lydia Gober	4/6/2019	Email	<p>My name is Lydia Gober. I am a resident of McKinney at [REDACTED]. I live near Hwy. 380 and I hear it's noise and see the high traffic. Expansion of this roadway may help traffic, but it could destroy beautiful small farms and this very important resource of ManeGait. Many have moved north and west only now to hear that it could all be interruptive to a hoped-for scenic living experience. As the least disruptive expansion, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

732	Lynette Terrell	4/5/2019	Comment Form	<p>My name is Lynette Terrell. I live in WALNUT GROVE at [REDACTED]. I am adamantly opposed to any bypass. Every time TXDOT has asked for comments I have always said that I enthusiastically support keeping 380 on 380. I remain steadfast in my belief that the GREEN alignment is superior to any bypass options you have suggested. 380 already has a very large footprint. It seems only logical to expand 380 in its current alignment. Creating a bypass would destroy homes, divide neighborhoods, and create a maze of concrete going through the Northwest Sector. Not only my neighborhood, but MANY other neighborhoods would be affected. Even though property may not be "impacted" by your definition, the quality of life of having a LAR literally feet from your door is devastating. I am particularly am opposed to the Red options that that come into my neighborhood, Walnut Grove. The Red B option destroys MainGait, which is a wonderful facility serving many. Red B is also just a few hundred feet from me and directly impacts and displaces at 2 of my neighbors. The Red E option is even more invasive. It destroys Lowe's, enters Walnut Grove, and proceeds north while destroying several homes and properties in its wake. Even though it barely misses MainGait, it still has its effects of notice and pollution on the facility. As the bypass leaves the MainGait are, it destroys more, long-established homes in Walnut Grove. From my northwest property line, I would be approximately 100 feet from the edge of Red E (please see attached map). It seems with every new potential alignment introduced, more homes and properties are compromised. I notice that Red E ROW has been reduced to a narrower footprint. Since this engineering doesn't seem to be objectionable to TXDOT, why not apply the same concept in front of Tucker Hill and Stonebridge. I know you are already considering it on the GREEN alignment. By adopting the GREEN alignment, you would be GOING BY neighborhoods, not THROUGH them. Any objections by Tucker Hill and Stonebridge could be mitigated by landscaping, berms, noise abatement design, cantilevering etc. It wouldn't take much extra ROW to make that work. This seems a far better option than cutting across Walnut Grove, a neighborhood that has been established for well over 40 years, I, myself, have been here since 1978. I went back and listened to the McKinney City Council Work Session, April, 30,2018 and was rather taken with the words of Councilman Rogers while addressing Mr. Endres during a presentation of bypass options looping above the existing 380. I quote, "One other quick question, the loop that goes out, to me, that's where McKinney is growing and if you've ever driven out there, have you personally driven out there? That is magnificently beautiful property and land through there. To me, if you take a limited access highway going through that pristine beautiful land there, I think it devalues everything that it goes around. Limited access highways do not bring commercial stuff in that area. I look at the limited access around Denton; there are some schools, an old nasty highway, I picture that going through the north pristine side of McKinney, and that is the jewel of McKinney going forward to be able to build that and I don't see that even as an option when you look at where McKinney is growing and how it should grow. That's why my thought, as my good friend on the council, La' Shadion, says, the best way to get somewhere is a straight line. So, that's the other thing I'd like you to consider, the kind of damage you will do to some of the rolling hills and beautiful areas of McKinney." At this point Mayor Fuller interjects, "and Walnut Grove." One of Mr. Roger's statements particularly resonates with me regarding the fact that an LAR devalues everything that it goes around. This is so true especially in Walnut Grove. Please don't change the character of our neighborhood. One last thought- please encourage McKinney to build out the arterials, particularly east and west. Currently, there are no arterials that connect Custer to Highway 75. there are three east/west arterials in the works but they really need to be build ASAP. If the north/south arterials were also expediated, traffic would be greatly relieved on 380 IMMEDIATELY!</p>	<p>Comment noted. The green alignment would displace more homes than any red alignment.</p> <p>None of the proposed alignments divide an existing neighborhood.</p> <p>Red E can use a reduced ROW section only in the area adjacent to Custer Rd, because Custer would act as the frontage roads. This is not something that can be done at other locations.</p> <p>The alignment between Tucker Hill and Stonebridge have a reduced ROW because the frontage roads can be removed for short segment. Drawings of the typical sections being considered are available in the public meeting boards posted on Drive380.com.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
733	Lynn Canavan, MD	4/9/2019	Email	<p>As a physician at Baylor Medical Center of McKinney, I support Green alignment for access to our hospital. I also support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
743	Madison Gilmore	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. Furthermore, I would like to add that I was a volunteer for a few years at ManeGait and the impact ManeGait has on both the riders and the volunteer members is truly amazing. I would really hate to see the original location be torn down, especially for the risk of the business shutting down completely. Seeing the love these children have for the horses and all of the hard work people do to give back is inspiring and heart warming! Giving special needs children the opportunity to enjoy learning something new and enjoy the outdoors is incredibly important for them and this is such a special environment. So much time and care is put into training the animals and the people and maintaining this wonderful place and I would hate to see it uprooted from where it all began!</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
744	Manuel Gonzalez	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.</p> <p>I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 745	Marcia Harding	3/28/2019	Comment Form	<p>Please say 'NO' to 380 Expansion. Please choose Option Red B as the bypass route to 75. The numbers, in terms of actual cost (\$192M) alone should be reason enough (as compared to Red A & Red E). The disruption along 380 (if it is chosen) would be horrendous, expensive and really, long term, how would any expansion of 380 beyond this development ever be practical??? As a resident of Stonebridge Ranch in McKinney, I DO NOT want to experience increased traffic noise, most especially decreased property value, if 380 is expanded. A BYPASS would not only allow for improved traffic flow on 380 but would save taxpayers millions of dollars, both at completion and in the distant future when inevitable development & traffic would necessitate further infrastructure development. Respectfully, Marcia Harding.</p>	<p>Comment noted. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 752	Mark Bunker	3/28/2019	Comment Form	<p>I like the original Red option B over E, but either of these are better than the other alternatives. I am in favor of a bypass route instead of focusing on 380 because of the lower overall impact, lower cost, and the additional throughput that a bypass provides through the county. Please don't let the "NO BYPASS" supporters make your decision. They want the 380 only option just to keep the freeway out of their backyard. The west bypass routes, B or E, are the least disruptive overall.</p>	<p>Comment noted.</p>

758	Mark Johnson	4/9/2019	Email	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. Thank you.	<p>Comment noted.</p>
759	Mark Jones	3/28/2019	Comment Form	With the outer loop on the near horizon, has sufficient study been applied for the long-term benefit and VALUE of a bypass? More effort should be focused on enhancing 380 for local traffic. The transportation traffic will be attracted to the outer loop. There is a high probability the bypass will not serve its intention once the outer loop is built and will become expensive maintenance in 10 years	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
760	Mark Wilson	3/28/2019	Comment Form	Just keep 380 on 380. If you didn't think 380 would be the next 635, Bush, or 121 your not very bright. Nothing else will work.	<p>Comment Noted</p>
761	Marla Bishop	3/28/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. The other options for alignment would shut down this organization that is extremely valuable to our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

764	Martha Castleberry	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at</p>
765	Martha DeAnn Pruett	3/28/2019	Comment Form	<p>I support the 380 on 380 (Green) alignment. While construction costs may be more to upgrade the current 380, it does not disrupt people's lifetime homes or have the environmental impact that the by pass options threaten. It (the green option) is certainly going to impact business on 380, but history and statistics tell us that businesses will return bigger and better within a very short period of time. Please consider that the same is not true of the environment or individuals' homes and lives! Please vote for 380 on 380 (Green) option!</p>	<p>Comment noted. From County line to County line, the green alignment is estimated to displace more homes than the red alignment.</p>

766	Martha Wells	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 772	Mary Nugent	3/28/2019	Comment Form	You can tell from my address that I am one of those affected property owners with the new red option E. I and my husband strongly oppose any bypass north of 380 at least from Prosper to 75. I understand this is viable and want this to be your focus going forward. Why do you want to destroy my neighborhood (Walnut Grove) that has existed for decades? Please keep 380 on its current path solving the transportation issue with your engineering genius I know you have.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.

773	Mary Sutherland	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 776	Matt Holmes	3/28/2019	Comment Form	<p>The Bypass (if needed) must stay far from Windsong Ranch. This community is full of children. Safety to our children must be out #1 priority.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. Alignment options are still being evaluated and any future improvements will be designed to enhance safety.</p>

777	Matt Kieffer	4/11/2019	Email	I support the GREEN alignment between Coit Road and FM1827 for the expansion of US HWY 380. It is the optimal and most efficient path for the east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent non profit organizations ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. We attend the Gala at the Gait every year and see how much good this facility does for the people that use its services. My daughter also volunteered there and it helps kids see they can make a difference in other people's lives as well.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
778	Matt Lear	3/28/2019	Comment Form	I'm a fan of Red E or Red B. Less impactful to my neighborhood. Tucker Hill, but also less impactful to commercial along 380 east of Custer. It seems like a no-brainer to champion the least impactful choice.	The current proposal under consideration for the green alignment between the Tucker Hill and Stonebridge neighborhoods is for a depressed/compressed segment with an average right of way of 240 feet wide. At this ROW width, the segment would not have access ramps. Between the two neighborhoods in this segment, there are two impacts to business properties, zero impacts to residential properties, and zero residential or business displacements.
779	Matt Ludwick	4/4/2019	Email	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 783	Matthew Hayes	3/28/2019	Comment Form	Please fix 380 on 380. Prosper is opposed to a bypass of any sort the current new alignment B going through Prosper would be detrimental to Prosper's tax base by removing numerous businesses at 380 and Custer. Tax revenues of \$4 million would be lost through this alignment. Countless employees of those companies would be displaced. Additionally, the bypass will not be utilized by commuters as expected as it will take drivers out of their way. Fix 380 on 380.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
784	Matthew J Gingerich	4/10/2019	Email	As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
785	Matthew Storey	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocated in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. 786	Maureen D. Dudley	4/8/2019	Email	<p>Hello, I recently moved to the McKinney area. As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option- A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road right in my neighborhood. The Green Alignment and Red Option-A will depress home values-- including mine--in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. Please enact one of those two options.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. 788	Megan Gordon	4/9/2019	Email	<p>I have read about the proposed alignments the Texas Department of Transportation is considering between Coit Rd. and FM 1827. I support the GREEN alignment for the expansion of US HWY 380. I believe it is the most efficient path for traffic through the cities of Prosper and McKinney, as well as the optimal choice. I believe a bypass is unnecessary. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Which provides services to children and adults with disabilities as well as veterans and first responders. Both Red Alignment B and E, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p> <p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
789	Melaine Giordano	4/4/2019	Email	<p>COMMENT: "I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services." 795	Michael & Brenda Istre	4/4/2019	Email	I am writing to say that any bypass route that comes through or near Man Gait will be doing a large disservice to the area. They provide a much needed service to veterans, autistic children and adults and others that benefit from the therapeutic horsemanship facility. The noise level would be detrimental to the people using the facility. Due to this I prefer the green option or Red alignment A. McKinney wants a bypass so keep it in McKinney.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

797	Michael Blair	4/5/2019	Email	Stephen, for the life of me I cannot understand why we are considering building a road into the countryside as a bypass. Such a waste of land and negative impact on our properties. Maybe you are in Austin and don't realize that this area the state wants to build into is beautiful private property. You have got to be kidding me. Someone in Austin who thinks this is a great idea doesn't live up here and has no idea the impact; it just looks interesting on paper. DO NOT DO THIS. It brings traffic and highway noise into new areas of the community! All of us who live here chose it because it is at the end of the metroplex and has a great feel – running highways through that area is STUPID. There is no other way to say it. Just build an overpass on an existing road like EVERYWHERE ELSE in Dallas. What are we getting "creative" out here?? I am STRONGLY petitioning for the GREEN ALIGNMENT which expands 380 onto the existing 380 corridors. You can call me anytime to discuss – [REDACTED]	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
798	Michael Cusick	3/28/2019	Comment Form	Thank you for all your time and effort on the 380 bypass issue. I recommend bypass option B, west of Lowes, as the least disruptive and least costly alternative. It will also be the least disruptive to houses and access to major neighborhoods. The financial impact of the City of McKinney if 380 was to be widened from Custer to US75 is unimaginable, but significantly higher than all other options. PLEASE KEEP THE BYPASS WEST OF CUSTER.	Comment noted.
799	Michael Galli	3/28/2019	Comment Form	My name is Michael Galli and I own & live at the home located at [REDACTED] in Erwin Farms McKinney. I just invested hundreds of thousands of dollars to get away from a highway so that my family can be safely away from noise and air pollution while resting peacefully in Erwin Farms for many years to come. I made my investment in my family's future based on these facts, and now an intrusive alternate bypass option threatens that. Please think about the millions of dollars residents like me invested in this area based on these assumptions. Now please realize that the residents & businesses on US380 made these same respective investments and assumptions, but accepted doing so on 380. Im in support of an alignment that stays on the current footprint as planned.	Comment noted.

800	Michael Helton	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 801	Michael Hennig	3/28/2019	Comment Form	<p>The new alignment 'E' still encroaches on the property of existing residential and future residential sites. The total disruption of future growth by moving 380 off of Hwy 380 has a greater negative impact on future growth and division of property. Expanding 380 on the existing Hwy 380 allows for cities to use the land that is being proposed for 380 realignment paths to benefit their future planned town growth. In summary Expanding Hwy 380 on the existing Hwy 380 is the best option for all involved.</p>	<p>Comment noted. It is impossible to avoid impacts to residential property and residential displacements due to the amount of existing development.</p>
802	Michael Johnson	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>

805	Michael L. Crowder	4/5/2019	Email	I hope that TX DOT will strongly co sided the Green Route or Option A as I don't want to affect the great work that Mainegate Therpeutic Horsemanship does for the local community. I also don't want major disruptions to my community for the benefit of only the residents and people who work in McKinney. I think it makes no sense to destroy existing businesses or lower property values in the Prosper area for the sake of convenience.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.
806	Michael L. Green	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least expensive options when compared to the cost of the Green Alignment and Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses- including those located at the intersection of US 75 & US 380. 815	Michael Zimmerman	3/28/2019	Comment Form	380 is a great major road that allows traffic to flow. Do not re-direct traffic off 380. This does not improve traffic flow. The enhancements made @ Preston & the North Dallas Toll Road are much more effective – efficient ways to move traffic.	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.</p>
816	Michele Huiatt	4/5/2019	Email	COMMENT: I support the Green Route of expansion of 380 on 380. It is the most efficient way to go east/west bound through the cities of Prosper and McKinney. Nobody wants to travel further out of their way, a straight shot on 380 is the most efficient of everybody's time. It would also preserve the beautiful land that people moved here for and save the ManeGait facility which is extremely beneficial in the community.	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

822	Mike Allcorn	3/28/2019	Comment Form	<p>I am strongly in favor of the Red Bypass B. It is the option that offers the fewest disruptions to residential and commercial properties and makes the most financial sense. It is obvious to me that a bypass is essential to maintain the homes and businesses along 380 and also provide an alternate to 380. The city of Prosper is trying to not compromise any property at all but we know that this a regional issue not a city one and the Red Bypass- B offers the fewest casualties. Please consider my plea- Red Bypass B!</p>	<p>Comment noted.</p>
823	Mike Bell	3/28/2019	Comment Form	<p>Perfer Red option B only. No to Red option E. No to Red option A - overloads 380. And just adds to the Custer/380 intersection mess</p>	<p>Comment noted.</p>
824	Mike Bundick	4/1/209	Email	<p>Thanks for your consideration</p>	<p>Comment noted.</p>

825	Mike Bundick	4/1/2019	Attachment	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
826	Mike Grayson	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. 830	Mike Shepard	3/28/2019	Comment Form	<p>Please expand the Highway on 380 and do not create a bypass. I understand that there are businesses that will be affected and they will be able to relocate. There are hundreds of homeowners that purchased their house for their families. They chose a location and to have a 6 lane freeway in their backyard & vicinity will affect their values & lifestyles. Homeowners that purchased in Tucker Hill & the North side of Stonebridge were aware there are close to a highway when they made the decision. Staying on 380 is the best, most economical alternative.</p>	<p>Comment noted. 832	Mike Wiles (Cindy)	3/28/2019	Comment Form	<p>We live in Walnut Grove on Custer Rd and <u>do not want any bypass</u>. Option "E" would wipe out my house and property value and those of my neighbors. Widening 380 on 380 is the best-long term, would take out businesses short term, but would provide far greater benefits long term.</p>	<p>Comment noted. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
833	Mikka James	4/7/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
834	Mitch Phillips	4/12/2019	Email	<p>I support the green alignment in Prosper and McKinney. I live in Whitley Place and purchased my house in the neighborhood because we knew where they proposed the highways to be. The green option is the fastest from point A to B. Also, McKinney's lack of planning on 380 should not make Prosper suffer. Thirdly, some of the alignments would affect schools that Prosper ISD has planned for. Fourthly, the bypass options would effect Main Gait, a prominent non-profit. The bypass options also affect the distance between highways when the new Collin County loop is built(not being the suggested 5 miles apart). In summary, the green route through Prosper and McKinney makes the most sense.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>

The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
843	Nancy Ball	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A.</p> <p>I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. 845	Nancy Evelyn	3/28/2019	Comment Form	<p>We are very concerned about the bypass running too close to Whitney Place. The noise disruption to our development, not to mention the increased crime that a freeway brings is not acceptable to us. We therefore must say we don't think the new segment you've proposed (E) solves the problem. It only causes problems for us. We ask you to keep 380 on 380.</p> <p>Nancy Evelyn</p>	<p>Comment noted.</p>

There is not a 4 level interchange proposed near Ridge Road

853	Nancy Stogsdill	3/28/2019	Comment Form	380 should be fixed on 380 in its current alignment. The entire "ByPass" idea makes no sense to most because the green alignment (fix on 380) scores higher from a safely aspect, most drivers are headed south to get to 75/south and wont take a ByPass going in the opposite direction is outrageous. The town of Prosper will never agree to this. Please fix 380 on 380. It only makes sense.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.

856	Neeraji Chaurasia	4/15/2019	Email	Dear Stephen, I am Neeraj Chaurasia, living in Robinson Ridge (North). I would like to share my view on proposed two 380 alignments. I bought this house around 2 years back and selected this area so that i can live at a peaceful place with out traffic noise and lots green space. After looking the proposed 380 bypass option it looks like that highway will pass just 100-200 meters from my house. It will be very difficult to live in this noisy environment. Also I feel that in case of 380 bypass there will be lots of hops (Not straight road), which will increase commute time/distance. 380 bypass will also affect many families and communities living in affected arias then improving existing 380. I would also like to add that due to 380 bypass my house prices will go down and I will be in loss once 380 bypass will be constructed. To conclude, I would like to register my vote for improving existing 380 alignment and not to go for 380 bypass.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.

857	Nelson Smith	4/4/2019	Email	<p>Though I am a resident of Stonebridge Ranch, I do not agree with their proposals. SRCA has spent a lot of money, money taken in from dues that I pay, to lobby for different routes. Several of their suggestions are not taking into account the impact it will have on other communities and non-profits. They have a selfish goal, and quite frankly I don't believe their concerns of a negative impact on Stonebridge Ranch are founded.</p> <p>Though I know it is more costly and will impact businesses that have built out close to the current 380 HWY, I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. To me it is a more optimal street, and quite frankly provides access to the new HWY to more individuals. The Red paths to me really provide little improvement in traffic since it in essence bypasses a good section of HWY that already has heavy traffic. The green path is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p> <p>BR/ Nelson Smith</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

859	Nicholas Pitts	4/11/2019	Email	<p>I am sure you have had a wonderful time sifting through the emails related to each proposal for the potential bypass. I am a resident of northern McKinney (StoneBridge Ranch) & would like to cast my vote/opinion. I vote for Red Alignment B It has the least impact on home/business owners and bypasses the largest chunk of HWY 380. Not to mention, this option should reduce the daily headache of commuters once construction starts. I wish you the best of luck!</p>	<p>Comment noted.</p>
860	Nick Abbott	4/10/2019	Email	<p>Stephen, for the life of me I cannot understand why we are considering building a road into the countryside as a bypass. Such a waste of land and negative impact on our properties. Maybe you are in Austin and don't realize that this area the state wants to build into is beautiful private property. You have got to be kidding me. Someone in Austin who thinks this is a great idea doesn't live up here and has no idea the impact; it just looks interesting on paper. DO NOT DO THIS. It brings traffic and highway noise into new areas of the community! All of us who live here chose it because it is at the end of the metroplex and has a great feel – running highways through that area is STUPID. There is no other way to say it. Just build an overpass on an existing road like EVERYWHERE ELSE in Dallas. What are we getting "creative" out here?? I can tell you from my experience in Utah that getting creative in these Rural parts just creates more headache. Stick with the plan that works. I am STRONGLY petitioning for the GREEN ALIGNMENT which expands 380 onto the existing 380 corridors. You can call me anytime to discuss – [REDACTED]</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.</p>
861	Nick Nordman	4/12/2019	Email	<p>Stephen I know we have talked on the phone and also thru email throughout the 380 process. Wanted to send this email to further state my position on the last meeting. I am in support of the green route as this will save not only the viability of the north west corner as a much need tax base for the city of Prosper. Prosper does not have the population nor the land for a commercial tax base that the city of Mckinney does. This will be detrimental to the tax base and tax burden for the residents of prosper not to mention Prosper isd. Also the bypass routs B and E take out Maingate. While you might say E does not take them out it truly does and they will not be able to offer their services to the people who need it most. This is not just a building that they can relocate they need the land to make their mission work.</p>	<p>Comment noted.</p>

862	Nicole Middleton	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
863	Nicole Murphy	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. 872	No Name	3/28/2019	Comment Form	<p>1st Option: Widen 380 No traffic on 380 will exit to a bypass through Walnut Grove! If you really want to make a difference. 2. Recommendation: Connect to Prosper Trails at Coit Rd with (4 lane) East Past Custer Rd on Bloomdale Rd. all the way to 75 by the Court House. 3. Recommendation: Widden Frontier Pky (FM 1461) (4 lane) from 289 around to connect with Bloomdale Note: Recommendations 2 and 3 would take most if not all Prosper Traffic, Calivar traffic and a lot of Rural Denton Country traffic off of 380 to mckinney. also Recommendation 2 would service the 145 acres at (CR 123 + 124) scheduled to be covered with apartments. also would service all of Aikman property on North side of Bloomdale Rd also scheduled for multiple family housing. It would also service the future Prosper High School Campus already purchased from Aikman Property. Thanks for reading.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p> <p>Initial traffic analysis has shown that an alignment as far north as Frontier Pkwy will not satisfy travel demand based on projected populations.</p>
873	No Name	3/28/2019	Comment Form	<p>Please don't count the sea of red shirts as impacted citizens. The meeting is intended for property owners within 1000' of 380</p>	<p>Comment noted.</p>
874	No Name	3/28/2019	Comment Form	<p>When will there be a public hearing on the new proposal? So the only chance is a sharper turn to Custer so it now "only" goes through Lowes corner in Prosper. Why do you think this a better option. This is intended to be a bypass for McKinney so why go through Prosper at all? And why do we need a bypass anyway? The outer loop is only a couple of miles further north. What is wrong with 380 and the outer loop as the bypass for 380? Don't understand the need except Judge Self is doesn't want anything passing by his house. Judge Self is a jerk and TXDOT is in his pocket. How much does TXDOT contribute to his reelection campaign??</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>This project is currently in the feasibility phase. After the feasibility study ends, the project will progress to schematic design and environmental study. A public hearing will be held near the end of the environmental study. The timeline for holding the hearing has not yet been determined.</p>
875	No Name	3/28/2019	Letter	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 876	No Name	3/28/2019	Comment Form	<p>The interchange at 289 / tollway seems to work well wow the project is complete. The tollway as an exit makes a great deal of sense. It seems logical that the same concept would be beneficial all along 380 going east from the tollway particularly at 75. Each major road (ie lake Forest) could be an exit and some of the current 380 could function as a service road in order to continue to access the businesses along 380 easily.</p>	<p>Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.</p>

877	No Name	3/28/2019	Attachment	<p>On Saturday and Sunday I drove US 380 to US 75 and there was a minimum number of cars on road compared to traffic on Monday thru Friday. The individuals living in the communities West of Collin County are trying to get to US75 to go to work in Dallas. Instead of trying to increase the size or the number of roads going West to East why do we not increase the roads number of roads going North to South from Denton County. This would resolve the problem West to East and fix the North to South problem. This may be accomplished by increasing the size of the North Dallas Toll Road or tunneling under the Toll Road. If another loop is needed we may need to do what has been done in the past. Beltline was the loop around Dallas and five other counties, then 635 loop across the North Dallas expanding northward then five miles North the Bush increased our northern direction, and in another 5 miles we now have 121 which extends from one side of Dallas to the other, but 380 five miles North of 121 was a main highway between Denton and Greenville to connect 30 and 35. If we need a new loop it should be at least five miles North of Denton, McKinney, Princeton, Farmersville, and Greenville or somewhere North of these cities and South of 82.</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>North/south route studies are being led by the North Central Texas Council of Governments as part of the Collin County Strategic Roadway Plan.</p>

These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road.</u></p>
879	Nolan Kipp	4/12/2019	Email	<p>I strongly prefer the green alignment and building a freeway on the existing road. I understand that McKinney needs a concrete plan for current 380 highway, but a bypass seems like a short term solution for a long term problem.</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
880	Norm Hedrich	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 884	OJ Tastesgood	4/4/2019	Email	<p>My name is Piper Fakkell and I am a rider at ManeGait. I live at [REDACTED] in McKinney. It takes about 10 minutes to drive to my therapy from there. ManeGait is most convenient time wise in the location that it's in. With that being said, I fully support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of the community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p> <p>Please don't move the location of my therapy at ManeGait!</p>	<p>Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

886	Pam Hatch	4/4/2019	Email	<p>I am compelled to add my voice to this significant debate about the potential options for routing the growing volume of traffic through the cities of McKinney and Prosper. I used to be a McKinney resident but now live in Frisco. I travel US HWY 380 on a regular basis to The Samaritan Inn and ManeGait Therapeutic Horsemanship where I volunteer. As I look at the various options I want to voice my support for the GREEN alignment. Certainly there is some personal interest because ManeGait has been an important part of my life for the last 11 years – I have witnessed many minor to amazing miracles with the families and riders served by this program. I also have grown to love the open spaces and beauty of the open country around the communities along this corridor. It seems to me that using the path already established by 380 is by far a better choice versus adding yet another ribbon of highway through that open land and the likely commercialism that will follow. And of course I like the GREEN option because it preserves ManeGait and it's amazing program within easy reach of the surrounding cities and neighborhoods.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

888	Pamela Nishimoto	3/28/2019	Comment Form	<p>We have been PROUD Texans for over 15 years – choosing to move to a rural community and being part of the positive efforts for years to make Prosper and Collin County and North Texas the DESIRED destination it has become. The Future of North Texas is at stake – not only our Town! Keep 380 on 380 as was intended when the thoroughfares were mapped out in the planning of this region. Every homeowner or business who's chosen to live on/or near 380 knew what they were getting. DO NOT negatively impact the generations of residents and business owners who believe your plans were truth. #Keep Main Gate #Keep Walnut Grove #Keep Lowes #Keep Prosper #Keep 380 on 380 suggested your plans encroach on ALL of our lives. The only noble option is keep 380 on 380.</p>	<p>Comment noted.</p>
889	Pamela Nishimoto	3/28/2019	Comment Form	<p>The violently <u>dangerous vehicular accident today</u> on 380 is one <u>more</u> reason to keep 380 on 380. Do not move the masses of traffic to bulldoze through small communities, established businesses, thriving neighborhoods, local schools, non-profits like MANEGAIT. We do <u>not</u> want increased dangers. Spend the time and money making your <u>existing</u> 380 less of a deathtrap. I've lost <u>several</u> friends already on 380. Respectfully – keep 380 on 380.</p>	<p>Comment noted. Any future improvements will be designed to enhance safety. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
890	Pamela Sherry	3/28/2019	Comment Form	<p>I strongly support improving 380 (as it is in need of improvement whether or not a bypass occurs). Fixing 380 only (no bypass) aligns with the current footprint as planned in McKinney, Prosper, and Frisco and has significantly less impact on residential homes and families. NO BYPASS !</p>	<p>Comment noted.</p>
891	Pat & Ron Justice	3/28/2019	Comment Form	<p>I live in Prosper. We are still in our infancy while McKinney has tons of commercial builds. You hurt Prosper by trying to take our future commercial lands. McKinney has a lot of ETJ that can be used. They should have done something about 380 long ago. Instead, they allowed businesses & home developments to build almost right up to 380. Please do not punish Prosper for McKinney & Tucker Hill developers bad decisions. Thank you -</p>	<p>Comment noted.</p>
892	Patricia DeLeon	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>
899	Paul Riddle	4/8/2019	Email	<p>Dear Sir, I am writing as a Collin County resident and business owner who has for the last decade supported the mission of ManeGait. Please consider the Green Alignment for the 380 Project, expanding the existing 380 corridor as it currently exists, with no bypass through the ManeGait property. ManeGait has made a huge impact in our community through their empowerment of children and people with special health needs, and it would be a huge shame to see their work destroyed. Thank you for your consideration.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
900	Paul Scheibe	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX , I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 902	Paula Bodine	3/28/2019	Comment Form	<p>Unfortunately, the proposal of yet another ByPass alignment (Option E) indicates that TXDOT is not listening to their own October survey where the <u>majority</u> of respondents said Fix 380 on 380. Prosper Town Council opposes any option thru Prosper, and I personally oppose <u>any</u> bypass option. 380 will still require improvement, regardless of a bypass option and should be factored economically into the cost estimate of all Bypass solutions. How does the Outer Loop impact usage of any Bypass ?</p>	<p>Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
903	Paula Browning White	4/4/2019	Email	<p>I support the GREEN alignment between Coit Rd and FM 1827 for the expansion of HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
904	Paula Murdock	4/3/2019	Email	<p>My neighborhood and home will be effected by widening 380. While it is true we purchased a home near 380 never in our wildest thoughts did we think it would end up being a freeway. With the city and the area growing why would the freeway not be placed where more homes and businesses will be going?</p> <p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p>There is not a 4 level interchange proposed near Ridge Road.</p>
915	Rachel Kinder	3/28/2019	Comment Form	<p>The new bypass option will go through Prosper, Texas. The Prosper city council has voted against this. Additionally, the new bypass option will demolish Lowe's, a major business tax contributor of Prosper as well as a business that supports our veterans. TxDOT continues to favor McKinney Mayor Fuller & the residents of Tucker Hill and Stonebridge Ranch and fails to acknowledge other communities along 380. It is very interesting that Mayor Fuller is the President of Stonebridge Ranch Commercial Association and is using his role as Mayor of McKinney to benefit his financial interests and investments with the help of TXDOT. The TXDOT bypass options are leaving citizens to conclude that the 380 conclusion will be reached based on politics/financial interest of politicians and not based on what is best for Prosper, McKinney, Princeton, etc.</p>	<p>Comment noted.</p>
916	Rachel Nichols	3/28/2019	Comment Form	<p>Running the proposed bypass down 123 will naturally change my neighborhood, Heatherwood. Via noise, pollution, light pollution and cut off the neighbors to the north as well as affecting access to the new Prosper High School. Keep 380 on 380</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>The red alignment option B is approximately 0.3 miles away from the property line of the proposed Prosper high school north of Prosper Trail, and approximately 0.5 miles away from the property line of the proposed high school west of Custer Road.</p>
917	Ravi Kacker	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. 918	Ray Paul	4/4/2019	Comment Form	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US Highway 380. It is in my mind the optimal and most efficient way to route traffic through McKinney and Prosper. I feel a bypass is unnecessary and scar the beauty of the community. The GREEN Alignment will also help preserve a vital nonprofit organization in Collin County, ManeGait Therapeutic Horsemanship. This organization is so beneficial to many special needs people in the area. Both RED Alignments E and B will have a direct negative impact on ManeGait and lead to the destruction of their property and displace many users of this vital community service. Thank you for your consideration. Ray Paul</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
933	Richard A Price	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>There is not a 4 level interchange proposed near Ridge Road.</p> <p>Comment noted. 934	Richard Clare	4/8/2019	Email	<p>My name is Richard Clare and I live at [REDACTED] in Walnut Grove Estates. I am writing in opposition to either of the Red Bypass options, specially Option E which would completely change my neighborhood. If Red Bypass Option E is chosen, it will mean the destruction of many upscale homes on beautiful acreage and the displacement of many families. If a bypass were to be built, it would cause the loss of beautiful and irreplaceable land, native trees, and a variety of wildlife. It would also destroy ManeGait Therapeutic Horsemanship which is just 1/2 mile down the hill from my house. ManeGait serves special needs children and adults as well as military families and first responders. The turmoil of the construction of a bypass would affect the entire north west sector of McKinney. Years of dirt haulers, rock haulers, cement trucks, graders, and other heavy equipment would be lining up on McKinney streets and highways and creating excessive noise and pollution. The length and cost of construction almost always surpasses initial estimates. In the long run, the widening of Highway 380 would be quicker, less expensive, less destructive to the natural environment, and would save many family homesteads. Both Collin County Commissioners Fletcher and Hale, who represent and understand the areas that would be drastically changed by any bypass, have publicly stated that they are for fixing 380 on 380. According to the Perryman study which Collin county had done, fixing 380 would have huge financial benefits to both the city of McKinney and McKinney ISD. This is the logical solution and will enable the city of McKinney to fulfill its master plan. I realize and appreciate the fact that US Highway 380 needs improvement. I adamantly support an alignment that stays on the current footprint as planned in the master thorough fare plans of McKinney, Prosper and Frisco. Keeping 380 in its current footprint has less substantial impact on families, lives, and children. I am NOT employed by TxDOT I do NOT do business with TxDOT I could NOT benefit monetarily from the project or other item about which I am committing</p>	<p>Comment noted. TxDOT makes every effort to minimize impacts during construction of its projects.</p> <p>From County line to County line, the green alignment is estimated to cost more to construct than the red alignment, impact more businesses and displace more homes and businesses than the red alignment.</p> <p>The Perryman study completed January 2017 analyzed potential economic effects of converting portions of the the existing US 380 corridor into a freeway. The study did not analyze economic effects of new location alignments.</p>

935	Richard Glew	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 937	Richard Laskiewicz	4/5/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. I have personally seen the tremendous value of what ManeGait does for children and adults with special needs, as well as veterans with PTSD.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

938	Richard Moore	4/1/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 940	Richard Thrasher	3/28/2019	Comment Form	<p>Despite the absolute majority opinion that 380 fix should remain on 380 & no bypass should be created. I am frustrated by TxDoT's continued efforts to create bypass options in an effort to solicit less opposition. As a homeowner & as a business owner whose properties will both be affected by the changes to 380, regardless of what they are, I am concerned that the desires of residents have been put as a secondary concern to the whims of a retiring judge & other politicians who stem to benefit by circumventing what I believe should be a question of democratic process. I will do everything in my sphere of influence to hold those responsible for ignoring the desires of the residents so clearly already voiced.</p>	<p>Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.</p>

941	Rick Chattrn	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 946	Rob Stogsdill	4/11/2019	Email	<p>NAME/ADDRESS: Rob Stogsdill - [REDACTED]</p> <p>COMMENT: I support the green alignment from Coit Road and FM 1827 for the expansion of US HWY 380. The alternative options Red E and Red B would cause safety concerns with multiple schools, directly and irreparably impact ManeGait to the point they would no longer be able to provide services to the disabled and would cause significant negative impacts on the natural landscape and wildlife that currently live in that area. I implore you to not select Red B or Red E, but instead select the Green option for the 380 expansion. Thank you.</p> <p>Rob Stogsdill</p>	<p>Comment noted. The red alignment option B is approximately 0.3 miles away from the property line of the proposed Prosper high school north of Prosper Trail, and approximately 0.5 miles away from the property line of the proposed high school west of Custer Road. The red alignment option E is even further away. There is not a set distance that a freeway must be from a school. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>
947	Roben Closs	3/28/2019	Comment Form	<p>I prefer Red Option B. It extends the by-pass nature of the road. Further west might be even better, but it is better than A or E</p>	<p>Comment noted.</p>

948	Robert Carter	3/28/2019	Comment Form	I live in Walnut Grove. My choices I prefer to expand 380 in place. 2nd best option for bypass: Red Option A 3rd best option for bypass: Red Option B 4th best option for bypass: Red Option E	Comment noted.
949	Robert Danielson	3/28/2019	Comment Form	Do not like any version of bypass west of 75 as bypass will be too close to Erwin Park. This is used by cyclist, runners, etc. and a bypass this close to the park will upset the serenity. The bypass will kill a lot of dreams purchased years ago to get away from the constant sound of freeways and speeding cars. Not fair to current residents and future. Not to mention the lowering of property values and future commerce in Prosper, TX. Tax rolls will be impacted severely. Keep 380 on 380 Please!	Comment noted. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed red alignment option is adjacent to the southern property line but does not cross into the park. Any future improvement projects would include assessment of the potential impact on the human and natural environments. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.
950	Robert Donley	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. They are also the least expensive options when compared to the cost of the the Green Alignment or Red Option-A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road.</u>
951	Robert Guido	4/5/2019	Email	I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. My son, has been attending ManeGait for the past 9 years on the medical advice of his physician and physical therapist. It is an integral part of his therapeutic routine and life. It is a therapy that he actually enjoys and looks forward to every week! Personally, I can't imagine not being able to enjoy the peace and quiet of the country while he takes his lessons. It is therapeutic on another level for us parents. I am in favor of the GREEN Alignment / opposing the Red Alignment B & E.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
952	Robert Seal	3/28/2019	Comment Form	As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. These options are the least disruptive to existing businesses and homes and the families living in neighborhoods adjacent to US 380. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to US 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option-A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design. Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way. <u>There is not a 4 level interchange proposed near Ridge Road.</u>

953	Robert Sholtry	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX, I strongly SUPPORT either the Red Option-B or Red Option-E bypass alignment option. 956	Robin Pounds	3/28/2019	Comment Form	No 380 bypass! The high view point does not make sense when zooming out. Please consider building out all arterial roads (Bloomdale, Frontier 1461, 289, and outer loop) before deciding on this initiative. Consider bypassing via 289 upto the outerloop. Who will travel north to inturn go south to DFW? I purchased my home away from 380 because I have an immune deficient child. Pollution would hurt him. The \$\$ of Tucker Hill shouldn't override common sense. Please put this decision on hold for 5 years while the town is built out w/arterial roads.	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>

961	Ron Justice	3/28/2019	Comment Form	<p>I am opposed to all 3 bypasses because 380 does not get fixed in the process. It appears politics is too involved in the process for TXDOT to reach the best decision. Collin County commissioners Court Judge, Keith Self, inserted himself in the decision making process which is a clear conflict of interest since he lives in Tucker Hill. This caused TXDOT to shift their emphases from 380 on 380 & the Tucker Hill bypass to 2 Prosper bypasses. Mayor Fuller McKinney also has a conflict of interes due to his position on Stonebridges commercial company.</p>	<p>Comment noted.</p>

962	Ronald Berteotti	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, Texas I strongly support red option B. It is obvious that the other options would be more disruptive to existing infrastructure including business and residential properties. Red option B is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. Red option B is the least expensive option when compared to the cost of the green alignment or red option A or E. If red option B is not selected then red option E would be my preferred secondary choice. I strongly oppose the proposal to widen US 380 (the green alignment option) or converting US 380 to a limited access freeway. These costly options will destroy empowerment and historic zones along US 380 and 200+ existing and future businesses including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose red option A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The green alignment and red option A will depress home values in that area. Red option B or red option E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. They provide a wider buffer for future planned expansion and clearer separation between businesses and residential areas and the transportation corridor. Thank you for your time and consideration regarding this matter and your continued service to Texas citizens.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. 987	Sarah Reyna	3/28/2019	Comment Form	I support and say yes to Red B and Red E. I do not support and say no, to Red A and Green alignment. They are both too expensive and too distructive.	Comment noted.
988	Sarah Schwartz	3/28/2019	Comment Form	You don't ruin a city to create a freeway, you use the corridors that are already there and expand them (380) Traffic on 380 will need to be alleviated regardless so why spend the \$ twice? McKinney failed to plan properly years ago to the detriment of the community, please don't do it again. Widen 380! It's the option that makes the most sense!	Comment noted. Both the red and the green alignments presented were viable when traffic analysis was conducted.
989	Sarah Van Trump	3/28/2019	Comment Form	I am in favor of fixing 380 on 380. My husband and I bought property well north of 380 to avoid any issues with our countys growth & expansion of 380. I do not want a bypass of any sort. In addition to it putting a highway between my home & my childrens elementary, it would have a negative impact on our property & our way of life. Please fix 380 on 380. The quickest way from point A to point B is a straight line. No one would drive north to go south. In all my years, I have never used them Denton bypass (289) to go south on 35. Please fix 380 on 380. Don't ruin our great Texas landscape that is north of 380.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.
990	Sathu Subbiah	3/28/2019	Comment Form	No Red Option E. No Red Option B Go for Red Option A or Keep 380 on 380	Comment noted.
991	Scott & Cori Allan	4/4/2019	Email	We support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. Both the red and the green alignments presented were viable when traffic analysis was conducted.
992	Scott Brown	3/30/2019	Email	I would like to voice my objection to the ongoing discussion of the 380 expansion going through the Town of Prosper. It was stated in the town council meeting on July 24, 2018 by Stephen Endres that TXDOT rarely goes against the wishes of a town. So now we find out about new Bypass options B and E cutting through Prosper. From my understanding this was mainly due to the pressure of a politician living in Tucker Hill. Why when the residents of Tucker Hill received a discount when purchasing their homes because of their location close to a highway and residents of Prosper paid a higher price for our homes to live away from a highway, is this option even being considered? It seems reprehensible that Tucker Hill residents are trying now to shift the consequences brought by their own poor planning to the residents of Prosper. I hope that you have the integrity to see through the call of a few vocal people that don't want to face the consequences of their own decisions to buy homes close to a highway that was slated for future expansion, one of them a politician. It would seem that there should be questions asked when a politician, who has been involved with any sort of community development, should have been prepared to accept the consequences of his home purchasing decision but now seems to be steering the debate so that he can take advantage of lower purchase pricing on his home and then use his position to try to influence change so that he can profit personally by rewriting the rules now. I am opposed to any bypass option that starts west of Custer Road and passes through Prosper. I'm aware that the politician in question has used the argument that widening 380 east of Custer would impact business along 380 by eliminating parking at those businesses. He's used this as justification to route 380 through Prosper. Of course doing this would limit commercial development in Prosper. Also, in his statement, he failed to mention the fact that if 380 is rerouted, these same businesses that he's so keen to protect will be adversely impacted by the reduction in drive-by traffic. So either way the businesses in McKinney along 380 are likely to be adversely impacted. Perhaps the City of McKinney should have done more future planning and anticipated growth instead of trying to make the neighboring towns pay the price for their poor preparation. My hope is that TXDoT will follow the will of the majority of people surveyed on this issue and make 380 a limited access freeway. Other roads parallel to 380 should also be improved to help reduce congestion on 380. Thank you for your consideration on this issue.	Comment noted. Public input is one of the many factors that goes into TxDOT's decision making process in regards to this study.

993	Scott Call	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, Texas I strongly support red option B. It is obvious that the other options would be more disruptive to existing infrastructure including business and residential properties. Red option B is the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. Red option B is the least expensive option when compared to the cost of the green alignment or red option A or E. If red option B is not selected then red option E would be my preferred secondary choice. I strongly oppose the proposal to widen US 380 (the green alignment option) or converting US 380 to a limited access freeway. These costly options will destroy empowerment and historic zones along US 380 and 200+ existing and future businesses including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose red option A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The green alignment and red option A will depress home values in that area. Red option B or red option E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community. They provide a wider buffer for future planned expansion and clearer separation between businesses and residential areas and the transportation corridor. Thank you for your time and consideration regarding this matter and your continued service to Texas citizens.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
994	Scott Crawford	3/28/2019	Comment Form	<p>Although no options are perfect and have no impact on residents, some options are clearly worse than others. Options B & E specifically target the residents and town of Prosper to carry an undue share of burden. Option E will displace many existing high-revenue stores. This will have a significant negative impact on quality of life for prosper residence. As those are always very busy. Those businesses (Lowes, Firestone, etc..) contribute millions of dollars of Tax revenue to Prosper. After being forcibly removed from their relatively new locations, they wont return causing prosper to lose MILLIONS of tax base- a HUGE blow to a small town! Option B is almost as bad except instead of evicting existing revenue-generating and quality of life businesses, it will consume space to prevent them from ever moving in - stunting Prosper's growth. Options B & E force prosper to pay for McKinney's unmanaged growth problem. Option A forces the instigator of the problem to bear the majority rather than the small neighbor fix 380 on 380</p>	<p>Comment noted. There is not a 4 level interchange proposed near Ridge Road.

1000	Shannon Blake	3/28/2019	Comment Form	I am opposed to all 3 bypass options. The city of Prosper has passed 3 resolutions stating that they <u>do not</u> want a bypass in their city. McKinney is pushing their problems into other cities + county residents. The businesses on 380 need 380 to be improved + need the foot traffic in order to survive. The bypass options <u>all</u> lead into environmental habitats that would be destroyed by a highway. The wetlands of the northwest sector of McKinney would remain the only green space after this area is built out because of the floodplain in the area. Please save the natural habitats + also preserve businesses along 380.	Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.
1001	Shannon Gumaer	4/10/2019	Email	I support the green Alignment for 380 and firmly believe that any fix of US 380 needs to stay on 380. I am against the red B alignment because of its negative impact on ManeGait and Prosper's east side. 1013	Shaun and Winona Alsobrook	4/8/2019	Email	<p>I would like to give my input on the Hwy 380 expansion. I support the GREEN alignment between Coit and FM 1827. I believe that route to be the optimal and most efficient path through the cities of McKinney and Prosper. A bypass is unnecessary and would hurt our community. The GREEN alignment also preserves a very necessary organization, ManeGait Therapeutic Horsemanship. This organization is a vital part of our community and the people that it serves. I oppose both Rote B and E. Thank you.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

1014	Shaun Jackson	4/11/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option -A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>
1015	Shawna Nevins	3/28/2019	Comment Form	<p>Please consider the large impact the bypass would have on the Heatherwood community and the Baker Elementary School. Safety and environmental impact are a large part of my concern. My concern focuses on the young children that attend Baker Elementary and the amount of traffic that will be brought so close to the school. In addition I feel that a bypass so close to the elementary school can make it a larger target, as schools have been targets recently that have major roads & bypasses/highways near them. We, Heatherwood, have a large amount of young school walkers and a bypass is simply not safe or desirable near our neighborhood. Please, consider the impact on safety in our neighborhood and at Baker Elementary. Thank you for your time.</p>	<p>Comment noted. Alignment options are still being evaluated and any future improvements will be designed to enhance safety.</p>
1016	Shelby & Drew McMurte	4/5/2018	Email	<p>My name is Shelby McMurte, my husband Drew and I are residents of Prosper, Texas where we are currently raising two kiddos (and have one on the way). We are extremely proud of our community and the contentedness we feel living within such an amazing little town. With that, I am writing in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. The GREEN alignment is the most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass would unnecessarily scar the beauty and quaint nature of our community-- aspects that, despite our understanding of the growing county, drew us from Frisco, Texas to plant our roots in Prosper. The GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services. ManeGait offers exceptional services as well as opportunities for service and involvement-- my family has not only volunteered at ManeGait, but we have also attended numerous functions in support of this organization's important cause. The GREEN alignment is the most logical avenue for the expansion of 380 and the alleviation of through traffic.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p><u>There is not a 4 level interchange proposed near Ridge Road</u> Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p>
1031	Stacy Eubank	3/28/2019	Email	<p>I am in support of the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east -west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p><u>There is not a 4 level interchange proposed near Ridge Road</u> Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>

1032	Stacy Jacobson	3/28/2019	Comment Form	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red Option - A. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. 1034	Stan Ullom	3/28/2019	Comment Form	<p>US 380 needs to be improved all the way into McKinney, so why not save the money by <u>not</u> building any bypass. Otherwise, There will be a duplication when the outer Loop is constructed in that it will be closer than 7 miles. The economic detriment to Prosper is not worth the bypass construction. Most of the Eastbound traffic on 380, entering McKinney turn to the South at 75. Why bypass this traffic to the North of McKinney Keep 380 on 380</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
1035	Stanely & Margie Youngblood	3/28/2019	Comment Form	<p>We are absolutely opposed to all bypass options but particularly option B, E, & A in west McKinney/Prosper. All of the bypass options introduce unacceptable environmental, noise, & safety issues into rural, residential zoned areas of Collin County. Numerous residential neighborhoods are affected adversely. The optional bypasses are in violation of Prosper, McKinney and Frisco Transportation plans. More over, city of Prosper passed a resolution opposing all bypass options. Fix 380 on 380! McKinney has approved commercial & residential development that has caused the congestion, not not through traffic! Do the traffic count analysis do the environmental impact studies for the proposed bypasses!! Wake up TXDOT: Listen to majority of affected citizens</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

1037	Stanley Lagroue	3/28/2019	Comment Form	<p>keep 380 on 380 DO NOT Like B and E</p>	<p>Comment noted.</p>
1038	Stella Frances Van Tassell	3/28/2019	Comment Form	<p>I attended the March information meeting. I learned little new in formation, other than TX DOT now openly admitting that 380 will be a freeway. I trust that the representative was truthful when he stated that expansion impacting Red Bud Estates will be on the north side of 380, along that section. If that is true, it avoids taking more of my property, as well as other estates homes and near by businesses. Increasing to four freeway lanes per side plus four frontage lanes will have a major negative impact on my home, where I've lived 23 years. Please preserve our properties!!</p>	<p>Comment noted.</p>

1039	Stephanie Diener	4/3/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. 1040	Stephanie Johnson	3/28/2019	Comment Form	<p>Thank you for thoughtfully addressing concerns brought forward regarding the Red A & B alignments. Although the new Red E alignment does not change the impact to my residence or community, (Tucker Hill) I do favor the Red E alignment due to its reduced impact on manegait, the environment and on future development. Between all 3 red alignments, Red E and B are both highly preferred cost, as well as removing the damage / impact to Tucker hill and to homes in Stonebridge that back up to 380. Red option A and all green option are not acceptable due to business and residential impact and greatly increased cost</p>	<p>Comment noted.</p>
1041	Stephanie LaGrone	3/28/2019	Comment Form	<p>I oppose bypass B&E bypasses. I support keeping 380 on 380. Too many families will be displaced by either of these bypasses. Maingate would suffer and it could disrupt wetland areas.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p>

This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. I also strongly oppose Red Option-A. It requires a large, unsightly interchange to be constructed at US 380 between Stonebridge Drive and Ridge Road. The Green Alignment and Red Option -A will depress home values in that area. Red Option-B or Red Option-E are the best options to improve traffic flow in our corridor while also preserving the economic and residential vibrancy of our community.</p>	<p>Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>The project team is conducting preliminary noise analysis that will be presented at the Spring 2019 Public Meetings. Additional traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Changes in property values are driven by value associated with site specific factors such as accessibility, safety, noise, visual amenities, proximity to shopping, community cohesion and business productivity. TxDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way.</p> <p><u>There is not a 4 level interchange proposed near Ridge Road</u></p>

1052	Steve Spencer	4/9/2019	Email	<p>As a homeowner and citizen of McKinney, TX., I strongly SUPPORT either Red Option-B or Red Option-E bypass alignment options. These options are the least disruptive to businesses, existing homes and families living in neighborhoods along and adjacent to US 380. They are also the least expensive options when compared to the cost of the green alignment or Red OptionA. I strongly OPPOSE the proposal to widen US 380 (the Green Alignment option) or convert US 380 to a limited access freeway. These costly options will destroy Empowerment and Historic zones along US 380 and 200+ existing and future businesses—including those located at the intersection of US 75 & US 380. This could lead to a permanent loss of those businesses if they do not relocate in our city, thereby reducing sales and property taxes in McKinney and eliminating thousands of jobs. Encouraging more traffic along the US 380 route with added lanes is likely to decrease safety on neighborhood streets arterial to Highway 380, increasing traffic, noise and pollution in our neighborhoods and reducing our property values. 1055	Stevie Ceccarelli	4/4/2019	Email	<p>I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.</p>	<p>There is not a 4 level interchange proposed near Ridge Road Comment noted. Any future improvements would include assessment of the potential impact on the human and natural environments. Both the red and the green alignments presented were viable when traffic analysis was conducted.</p>
