

Need:

The proposed improvements are needed because the existing two-lane FM 1777 roadway between the intersections of SH 66 and FM 6 in Collin County is inadequate to meet future traffic volumes, resulting in congestion and reduced mobility, and is a risk to motorist safety because of roadway design deficiencies.

Purpose:

The purpose of the proposed project is to meet local and regional future travel demand by increasing capacity of FM 1777; upgrade the transportation infrastructure to meet current FHWA and TxDOT design standards for interstates, bridges, and frontage roads; and improve the safety of the roadway by correcting access conflicts.
