

Proposed Typical Section – US 380 to CR 400 (Myrick Lane)/CR 452

- The proposed FM 982 roadway between US 380 and CR 400 (Myrick Lane)/CR 452 would consist of 10.5 to 11-foot-wide lanes, two in each direction, with a raised 16-foot-wide concrete median.
- A 10-foot-wide shared use path would be constructed along the northbound side of the roadway and on the southbound side a six-foot-wide sidewalk would be constructed which would transition to the shared use path south of CR 400 (Myrick Lane)/CR 452.
