Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Aaron Brooks

Mr. Endres,

I STRONGLY OPPOSE Segment B and Support Segment A. I am absolutely disgusted that this is even an issue still. Prosper should not suffer the negative consequences of McKinney's poor planning. As a resident of Whitley Place, Segment B will increase our noise and air pollution, we will lose value for our homes and it will negatively affect the educational facilities nearby, as well as the kids going to the new high school. Segment B will increase traffic, light pollution, and will be hurtful to persons with disabilities who are helped by Main Gait. Please please consider our Town and residents of Prosper, who had the foresight to build far from 380 when planning our neighborhoods and schools, and do NOT approve Segment B.

Thank you,

Aaron C. Cardwell

Subject: Feedback on Proposed Improvements to US 380 from Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Stephen Endres, P.E, and to all those concerned regarding the expansion and potential adjustments to the easement of traffic along TX US 380, thank you for listening to our feedback.

As a resident and homeowner in McKinney, and the adjunct community of Stonebridge Ranch which would be directly impacted by one of the segment selections, our family strongly opposes Segment-A. Segment A costs \$98.8 million more for taxpayers, impacts 57% more natural wetlands and wildlife, and requires significantly more relocation of homes, businesses and utilities.

The economic business and residential vitality of our community is best maintained by the Segment B option which protects the vibrant but serene community that currently exists here.

From our previous personal experience, the thought of having so many businesses, and homes relocated, as well as the overall impact of such a large highway erected right next to our home is upsetting. We have witnessed firsthand the impact such dramatic relation can have on businesses and homes, and in the case of the city we moved from (Atlanta, GA) when a large concentration of homes and businesses are relocated for roadway expansion, the lifeblood, and economic health of that area is never the same, which would be a horrible outcome for our community. While both options (Segments A and B) require a degree of relocation, the shorter, less expensive Segment B has the least impact, while achieving the project goals and should be selected.

We fully understand that with growth comes the need to expand (the vibrance and growth is part of why our family moved here) however we implore you to not allow this growth to come at the cost of what has made the community so desirable to begin with.

We thank you for taking the time to consider this feedback.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon Stephen,

I hope this email finds you well. I am reaching out to you in my capacity as Community Relations Manager of De La Vega development and also on behalf of Artemio De La Vega, regarding the TxDOT 380 Bypass Project and in particular FOCUS AREA at Custer Rd and US HWY 380 in McKinney.

As you may know, we are finally set to start work on development of our 52 Acre [West Grove](#) mixed use project totaling over 600,000 square feet of GLA. The project will include a Whole Foods Market, multiple restaurants, 420 residential units and Office. This is a public/ private partnership with the City of McKinney and as a beacon for much needed place making to the communities it serves. It would be tragic if Whole Foods or other key tenants were to terminate due to material changes to the access and traffic flow. As you know, this site is located at the corner of Custer and 380 and is at the front door to Stone Bridge with its 9K+ residential homes.

We strongly feel that "Option A" with the proposed improvements would impair the traffic flow and access to our West Grove project from Hwy 380.

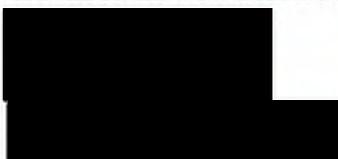

We would love the opportunity to sit down and go over why we feel "Option B" will have much, much better quality of life, with lower costs for; the environment, local businesses, and construction of the project as a whole.

Attached, please find a site plan and marketing deck on West Grove.

Best regards, Adam

Subject: Segment B, Stonebridge Ranch McKinney, TX. Home owner Adam Knoche

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen Endres,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Sincerely,

Adam Knoche

Subject: Protest against Segment B 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

I would like to add my input to the recent TxDot meeting that occurred in regards to the 380 expansion. As a parent of a child that attends Founders Classical Academy, I would like to protest the proposed "Segment B". I am concerned about the potential traffic, added accidents, and noise level that could negatively impact the students. Also, the safety of the students is a concern. Especially high school students who will be leaving the school driving and are not experienced enough to be on such a large-scale road.

Another area of concern is the impact to ManeGait Therapeutic horse farm. They provide services to the special needs population and there are concerns about the pollution, safety and noise level to their operation of the farm.

Please do not re-route 380 using the segment B option. I oppose it.

Sincerely,
Adam Stocking

Subject: Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Please approve segment B for the 380 bypass so 17 businesses are not shut down.

On April 10, 2022, the Dallas Morning News published a front-page article about the Project 380 bypass route. The article, focused on ManeGait, was well written but poorly researched as it only told half of the story. In the interest of fairness and complete reporting, the other side of the story should be told. These are the facts that were not reported:

There was no mention of the fact that back in 2019, the City of McKinney offered to acquire the current ManeGait property and move it to a newly constructed facility at no cost to ManeGait. They refused to consider this option even though they now say they may have to move and build a new facility. Interestingly, in the last few years, ManeGait was the recipient of several hundred thousand dollars from City of McKinney grant programs. Neither of those items were covered in the article.

Further, TxDOT has researched stakeholder concerns including those expressed by ManeGait. TxDOT updated Segment-B so that none of the ManeGait property is taken. TxDOT even researched other similar facilities in the state of Texas and found **no** ManeGait operational issues should be expected. That was not mentioned in the article.

There was no discussion of the seventeen businesses that will be destroyed if Segment-A is built versus none if Segment-B is built. The businesses to be destroyed are located on the North Side of 380 on both sides of Custer Road and the number will grow since more businesses are under construction today. Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a currently heavily developed area in McKinney. In McKinney's Tucker Hill, businesses that front on 380 also will also be impacted. Was there any discussion with any of these business owners?

The cost of Segment B is \$99 million LESS than Segment-A.

There was no reporting on the impact to Kensington Village which is directly in front of where the proposed Segment-A would enter 380. The proposed Segment-A interchange would greatly increase noise and pollution in that SRCA neighborhood potentially affecting the enjoyment and value of their homes. Were any of those property owners contacted for comment?

There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B will have minimal impact on homes and businesses.

Subject: I Support Project 380 SEGMENT-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon,

I'm writing in to voice my concerns with the Project 380 Segment-A. As a homeowner and citizen of McKinney, as well as an employee of a local business that will be effected by Segment A, **I STRONGLY SUPPORT THE PROJECT 380 SEGMENT-B** bypass alignment option. I live in a neighborhood in Stonebridge Ranch (near 380) and every day I take my short commute to work across 380 near Tucker Hill. I know if I need to get to my children's school quickly, Wilmeth Elementary, it's just minutes away. Having a quiet place to live that is safe for my children to walk home was a BIG reason we purchased a home in Stonebridge Ranch near their Elementary school. With Segment-A, this will disrupt our way of life. Stonebridge is already a busy street and I don't allow my children to cross the street without an adult and Segment-A will make this completely impossible altogether!

The Segment-B option is the least disruptive to businesses with no displacement, minimal impact on existing homes and families like mine, living in the neighborhoods along and adjacent to 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

Please take this all into consideration when making a final decision.

Thank you for your time.
Alaina Cordova

- *It will also cause the installation of water pipes (ducts) over 380.

- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Albert Streber

Lets use the KISS principle and not spend an extra \$100 million on option A . I live about 1.5 miles from the Ridge Rd /380 intersection and can hear road noise today. Any widening or elevating along with increased traffic will make noise pollution worse.

I vote for Option B.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Alexander McCool

TO: Mr. Stephen Endres, P.E.
4777 E. US Highway 80
Mesquite, TX 75050
stephen.endres@txdot.gov

Sir,

I am opposed to the building of a US Highway 380 By-Pass (Option B) that would cut through the eastern side of the Town of Prosper.

The original TxDOT proposal had a by-pass running north-south along the east side of the Tucker Hill community where it would then merge with the existing US Highway 380.

As I understand it, that east-side land is in a flood plain where no homes can be built. However, an elevated by-pass could be built there.

The following are the options that I would suggest be pursued:

- Build the by-pass east of Tucker Hill; or
- "Keep 380 on 380."

Thank you for your consideration.

Kindly,

Alexander Seguin

Subject: 380 final thoughts

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

It is my sincere hope that TxDOT will look long and hard at the facts in the choice between segment A and segment B rather than yielding to politics—which are louder than ever now. How ironic that Darling built the homes on Harvest Hill and in Wren Creek—one of the most affected neighborhoods by segment A. The worst traffic noise that is heard on my otherwise quiet neighborhood street is the truck traffic bringing construction materials to Prosper and back. And it wasn't that way always. McKinney should not have to pay the price for Prosper to continue to grow. Interstate 75 divides McKinney, and serves us well as a main artery to help us travel. Prosper can not only survive with a highway through their town, they will continue to flourish.

Our McKinney City Council said it best when they studied the facts learned by your TxDOT team:

based on the data provided by the Texas Department of Transportation at the March 22, 2022 public meeting for the US 380 (Coit Road to FM 1827) environmental impact statement (EIS) public meeting, it has been determined that in comparing Segments A and B, Segment B accomplishes the Purpose and Need with less centerline miles of freeway, less overall impacts to existing development, similar overall impacts to planned development, less overall impacts to environmental

features, and at a lower overall estimated project cost; and based on the Segment Analysis Matrix for Environmental and Natural Resources, the Texas Department of Transportation has determined that Segment B impacts approximately 61% fewer jurisdictional wetlands than Segment A, impacts less total acres of forest/praries/grasslands than Segment A, impacts 5 less acres of regulatory floodways than Segment A, and impacts no potentially hazardous materials sites compared to 11 identified sites in Segment A; and

The facts don't lie. Segment A truly makes no sense when looking at the comparisons across the board. And as a resident of Wren Creek on Harvest Hill, I beg you to lead this big TxDOT decision by the facts—pure and simple. **Segment B is the only choice.** Thank you so much for your leadership in this project. The facts are speaking—loud and clear.

Subject: US380 Expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres -

My name is Alison Denne and I am a homeowner in La Cima Haven in McKinney, TX. During last week's TxDOT meeting on the US 380 expansion, we learned one of the proposed options, A, will put a 25 foot elevated 8 lane highway at three intersections of Stonebridge and 380, as well as, Custer and 380. Previous renditions of the US 380 expansion from Custer to Stonebridge had this stretch below grade with Stonebridge and Custer being the overpasses. So, learning that the current proposal for Option A now includes a raised highway similar to the stretch of 75 from El Dorado to Wilmeth was shocking.

We strongly oppose Option A which will have a severely negative impact to La Cima and the other neighborhoods in it's alignment of Wren Creek, Tucker Hill, Kensington, and Ridge Crest before it veers north. The highway will be noisy, unsightly, and will completely disfigure our undisturbed nature preserves at the La Cima pond and adjacent green belt and preserved wetlands. It will also have the same negative impact on the upscale West Grove entertainment hub that Mayor Fuller and the McKinney City Council have worked so diligently to bring to our corner of McKinney.

We support the Option B alignment which has US 380 veering north about a half mile west of Custer. In reading through TxDOT's Segment Market Analysis, we noted that Option B is the less costly and least disruptive alignment. According to TxDOT's data, Option A's total cost is \$100M more than Option B. Option A also disturbs way more acres of wetlands, rivers/streams, and forests/prairies than Option B. With these types of statistics, we do not understand how TxTDOT could even be considering Option A.

We strongly urge you to choose Option B when deciding how to expand US 380 in Collin County.

Thank you.

Sincerely,

Alison and Ron Denne

Subject: 380 bypass proposal

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am opposed to Segment A as part of the 380 bypass. The construction of this segment will cost 99 million more than Segment B. It doesn't make financial sense nor it fiscally responsible. The construction of A along existing hwy 380 for 4 to 5 years will create massive safety and traffic issues. Tucker Hill neighborhood's only entry/exit is on hwy 380 and construction will inhibit response from emergency services and residents ability to enter and exit the neighborhood. The current design of segment A doesn't have adequate access to Hwy 380. Residents of Tucker Hill (post construction) would have to turn right and go to Custer and make a u-turn in order to go east on hwy 380. Segment A affects 17 businesses whereas B affects 0. Why would the choice be made to affect so many businesses and developed neighborhoods with Segment A in a highly populated area rather than Segment B running through undeveloped land.

Sincerely,
Allen Carr

Subject: I strongly SUPPORT the Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for considering this input. Please let me know if I can share this input in other appropriate forums.

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. As the finance manager at another PATH Premier Accredited Center, I cannot imagine the numerous safety issues created by such a major construction project that would arise – horses are prey animals by nature and the “predatory” nature of loud noises and large construction equipment for several years could potentially be catastrophic. Safety is first and foremost for our clients and for our equine partners. I sincerely hope you reconsider your new proposed project as it could be a terrible end result for an amazing facility such as ManeGait that does amazing work with the disability population.

1 April 2022

Select US 380 Segment B: More Reasons

Dear Mr. Endres:

Here are more reasons to **select US 380 Segment-B** because the proposed US 380 Segment-A will have significant negative impacts for years on schools, students, and their families. Use of neighborhood roads -- Lake Forest, Ridge Road, Stonebridge Drive -- as major arteries to access Hwy 121 and Custer will increase traffic, safety issues, noise, and air pollution. Attendance areas split by US 380 will be quite challenged.

These five schools will be most impacted by Segment-A (see attached MISD attendance maps):

McKinney Boyd High School (600 N. Lake Forest Drive; enrollment 2,742) -- Increased traffic and safety issues on Lake Forest, especially for high school drivers. School session is 7:30 a.m. - 2:37 p.m. Mornings are complicated by rush hour as well as student drivers entering the school parking lot or parents dropping-off students.

McKinney North High School (2550 Wilmeth Road; enrollment 2,142) -- Increased traffic and safety issues, especially because this school is located north of 380 and the attendance zone spans north and south of US 380. Many drivers including high schoolers drive to the school via US 380.

Dowell Middle School (301 S. Ridge Road; enrollment 1,108) -- Increased traffic and safety issues on Ridge Road including foot traffic especially during school drop-off and pick-up. Note that Dowell has arrangements with the YMCA (300 S. Ridge Road) directly across Ridge to use their parking lot for drop-off/pick-up. Thus, middle schoolers are walking across Ridge.

McClure Elementary School (1735 N. Ridge Road; enrollment 601) -- In addition to the increased traffic and safety issues especially during school drop-off and pick-up, the McClure attendance area is divided by US 380 so families living north must be able to cross US 380 morning/afternoon for student drop-off/pick-up.

Wilmeth Elementary School (901 LaCima Drive; enrollment 596) -- Located at the corner of LaCima and Stonebridge Drive, Wilmeth not only faces increased traffic but escalated safety issues since many students walk to/from school, crossing Stonebridge Drive (with crossing guards guiding foot and auto traffic).

For these reasons and others mentioned in prior communication, US 380 Segment-A must be rejected and Segment-B selected for the US 380 Bypass Alignment. Thank you and the TxDOT team for your continued analysis of these important decisions.

Sincerely,
Amanda Batson

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Subject: US380 Bypass Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

I live in La Cima Manor off of Stonebridge and US380. I selected this subdivision due to the beauty and convenience. I strongly **oppose** the Segment A bypass for the reasons below. I would very much like to protect the Stonebridge Ranch way of life and improve traffic flow and safety by **supporting** Segment B today!

If Segment-A is built --

- It will cost taxpayers 99 million dollars **MORE** than Segment-B.
- At least 17 businesses on 380 will be destroyed.
- 8 lanes of traffic plus four lanes of access roads (two on each side of the freeway) will be constructed near Tucker Hill at Stonebridge Drive.
- 11 sites with hazardous materials and 7 major utility conflicts will need to be addressed.

If **Segment-B** is built --

- It will cost taxpayers 99 million dollars **LESS** than Segment-A.
- ManeGait property will remain untouched.
- No businesses on 380 will be destroyed.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.

May God bless you today!

Best regards,
Amanda Winter

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments:

It is with a sense of dread and defeat that I even fill out this form. I have attended all of the forums and listened to all of the proposed options - yet the concerns raised by the residents and business owners along the proposed "C" route have not been thoroughly investigated. No one has done an environmental impact assessment with regards to my farm + livestock. I raise honey bees, hay and have a horse training farm. The proposed "C" route displaces my honey bees (which you cannot just pick up and move. They get disoriented and will loose their bearings and die). The proposed "C" route would take over all of our hay production acreage. It would also destroy my riding arena which the community uses, and which I use for horse training and horse therapy. The proposed "C" route would be steps away from our home and barn. The impact of an eight lane road would be catastrophic to our farm, our livestock and livelihood. While I would prefer 380 to stay on 380, I realize that is not long an option. I now

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

(over →

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Strongly recommend the "D" route. The land on the "D" route is undevelopable from the perspective that it is flood plain.

The farms, homes and businesses along the "C" route are some of the only prime agricultural, undeveloped land in the area.

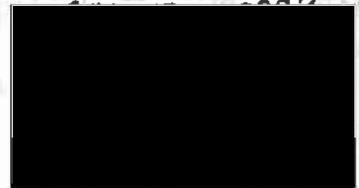

Our back pasture is a quiet oasis for monarch butterflies, cranes, turtles, herons, hawks... having an eight lane super highway cut through protected natural areas for wildlife and agriculture, homes, agribusiness is a travesty. At least with the "D" route the agribusiness and home impact is lessened, due to the large amount of undevelopable flood plain.

I strongly recommend the "D" route over the "C".

Sincerely,

Amber Block

Subject: Project 380 Bypass Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you
Amy Finley

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Amy Jones

Ana Herget - [REDACTED]

Hello,
my name is Ana Herget and I oppose the proposed HWY 380 Brown and Gold Alternatives (Segment B). These paths will impact the daily operations and special events held at ManeGait Therapeutic Horsemanship and the essential services provided to individuals with disabilities and children. I respectfully request that Segment B be removed from consideration due to the environmental impacts to ManeGait. ManeGait is a blessing to so many because of the services it provides not only to the riders, but to the volunteers as well. After years of volunteering at ManeGait I can say that my life has been changed, which is why ManeGait must remain unharmed and running. I have had the opportunity to witness the emotional, physical, and social changes that can occur within the riders as a result of attending lessons at ManeGait. I was even inspired to conduct a research paper focused on the effects of therapeutic horseback riding and acquire positive results that supported the claim that this form of therapy can be effective and successful. This form of therapy feels like magic because of the results it provides. This facility is a home to so many people, horses, and volunteers, please consider an alternative route.

Thank you for your time,
Ana Herget

Andrew Douthit: [REDACTED]

I'm writing this email to voice my strong opposition to HWY 380 Segment B because it will negatively impact, and forever threaten, the daily services of ManeGait. As an organization that serves two vulnerable and protected populations (the disabled and children), ManeGait's incredible work simply cannot be expected to continue with massive highway infrastructure within a stones throw. Additionally, since the highway project could last for several years, the participants at ManeGait (especially with disabilities that have sensitivity to over stimulation via noise, pollution, etc) will be forced to choose to either no longer participate in the life changing activities at ManeGait, or risk their health and well-being by participating that close to a major highway construction zone.

I understand that there is no simple solution with the HWY 380 project, and some population will be negatively impacted. However, since you must choose, I implore that you choose a path that does not rip away the life giving services provided by ManeGait to children and those with disabilities that already must overcome more than most have to deal with on daily basis. If we won't choose to stand with those that already struggle to stand for themselves then can we even say that we are pursuing positive progress with this project? Progress always comes with a cost, but sometimes the cost is simply too high to bear. Therefore, I sincerely hope you abandon the Segment B from consideration for the HWY 380 expansion project.

Kind Regards,

Andrew Douthit

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN

AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Andrew J. McCaffrey

Subject: Project 380, segment-B support

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: TxDOT Hwy 380 Improvement Project - Preferred Build Alternative

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres:

The New Hope Town Council discussed TxDOT's project to improve Highway 380 from Coit Road to FM 1827 at their Tuesday March 29 meeting, focusing on design schematics for the build alternatives under consideration. The Town Council is *in favor of segment D* which is part of both the purple and gold alternatives:

1. Segment D runs farther west across undeveloped flood plain and would have less impact on existing residential areas in New Hope.
2. Noise levels for residential areas would increase but not as dramatically on the Town's southwest border as they would if segment C were to be the chosen alternative.
3. Should the Spur 399 Extension Project be constructed, the new roadway would flow directly into the existing Airport Road. This seems like a logical and preferable choice for the Spur 399 Extension Project location.
4. Segment D would move traffic flow away from the FM 1827/Highway 380 intersection leading to increased safety and mobility for our residents as they travel to and from their homes.

The Town Council is *against segment C* which is part of both the blue and brown alternatives:

1. Segment C runs very close to the southwest border of our Town and would be right in the backyard and down the road from residential areas.
2. Noise levels for residential areas impacted by this segment would increase dramatically.
3. Should the Spur 399 Extension Project be constructed, there would be a large intersection of bridges and highways right at the entrance to our Town on FM 1827.
4. As we stated in our letter from November 25, 2020, the FM 1827/Highway 380 intersection is already a hazardous intersection with increasing traffic congestion, compromising both safety and mobility. We are against making this a larger intersection.

Noise from Highway 380 is already a problem for residential areas on the southern edge of New Hope and will only increase with completion of the TxDOT project to improve Highway 380. The New Hope Town Council asks TxDOT to consider noise mitigation measures, such as barrier walls near New Hope residential areas or below grade lanes near our southern border where possible, in any final build decision.

We would also request that TxDOT take into consideration the proposed trails documented in the Collin County Regional Trails Master Plan (May 2012) that cross the proposed Highway 380 corridor. Of particular concern to New Hope are those proposed trails that provide New Hope with trail connectivity to McKinney and surrounding communities.

Thank you and we appreciate your consideration in these matters.

Subject: Project 380 Comment - Support for Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am a homeowner in McKinney, Texas and writing to express my strong SUPPORT for Segment B of the Project 380 realignment. I am strongly OPPOSED to Segment A.

Segment B is nearly 20% less expensive, has significantly fewer impacts on existing businesses and residential properties, fewer utility conflicts, has 0 high risk hazardous material impact sites, and will minimize traffic increases on the arterial streets that run north/south in the area. The deeper into the established neighborhoods along 380 the new freeway runs, the more viable it becomes to skip the freeway and use the arterial streets to travel through McKinney.

Segment A has significantly broader impacts and is much more expensive. Particularly since the issues with Founders Academy and Maingait have been addressed since the initial feasibility study, it's hard to figure out what advantages that alternative holds.

For these reasons I am strongly in favor of Segment B.

Thank you for your work on this important project for our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I've become aware of TXDot's consideration of segment B of the proposed US 380 bypass at McKinney. Inasmuch as ManeGait Therapeutic Horsemanship – its grounds and support facilities – being well-established and acting as an invaluable community resource which provides very worthwhile services to disabled adults and disabled children and believing that the a years-long highway construction project - then traffic from a multi-lane highway in such close proximity to ManeGiat – would disrupt or even condemn operations there, I wish to voice my objection to the plan and request another route be drawn.

Respectfully Yours,

Andy Doyle

Good evening,

I am supporting 380 Segment B and opposing Segment A. I am a McKinney resident and a Navy Veteran - and member of the McKinney VFW. Segment B will cost less and disrupt fewer businesses and homes. It will not impact Main Gait's operations. Segment A is a terrible choice for residents and businesses. It will also divert too much traffic to residential neighborhood streets. Again, I strongly oppose Segment A.

Thank you,
Andy Hay

Attn Stephen Endres:

I have owned a home in Mckinney, Tx since 4-27-2012. My Ridgecrest Development runs parallel between Stonebridge Dr and Ridge Rd.

After reviewing the site: "keepitmovingdallas.com/US380EISPublicMeeting" I am IN SUPPORT OF PLAN B GOING THROUGH PROSPER, TX vs Plan A going through Mckinney,Tx.

There is no Doubt that PLAB B IN PROSPER, TX is much less in cost to develop than PLAN A IN MCKINNEY, TX. PLAN B does not effect near the loss of Businesses as Plan A and both are similar in Residential loss. There is way more expense in major utility cost using PLAN A; so PLAN B IS BY FAR THE BEST OPTION between the two.

I have read where it has been suggested for a NORTH OUTER LOOP that would not effect PLAN A OR PLAN B. Is that an Option? If not PLAN B HAS TO BE COMPLETED FOR LESS COST AND DISTURBANCE OF EXISTING PROPERTIES!

BOTTOM LINE:

SUPPORT PLAN B GOING THROUGH PROSPER, TX

OPPOSE PLAN A GOING THROUGH MCKINNEY, TX

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. My family personally will be effected. My son is 8 with sensory processing disorder. We have to fight every day to have him comfortable and welcomed in an environment. At mane gait he is safe, calm, collected and felt to be wanted. He doesn't hold his ears, he doesn't feel overwhelmed with life. Putting a freeway over pass so close will demolish this for him and all riders. This cannot happen.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper. As a resident of Prosper in Windsong Ranch, all future road development (ie. A bypass) from McKinney to Denton should take place NORTH of Frontier Road in Prosper through Mckinney/Celina/Aubrey/Pilot Point etc. The land is there to develop and commercial and residential properties are not as impacted as much as currently in the Town of Prosper. Celina is set to grow into the next Frisco/Plano and establishing that roadway there now will only bring quicker growth to that community.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN;

STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Angela Frazier

Dear Stephen Endres,

I am a homeowner in Stonebridge Ranch and I support the option for segment B and oppose segment A.

We have lived here for about four years and this is our first home. We moved away from a busy metro area full of noise and pollution. We chose McKinney because it was well-established from a development perspective but also mature landscape. We fell in love with the beautiful tree-lined streets. Our kids just started school this year. We frequently ride our bikes on all the beautiful paths by all the ponds and lakes. Our kids' favorite playground is right off [REDACTED].

Segment A will disrupt all of this. It will create noise and pollution right near our home and school. The neighborhood I live in already has development close by with three-story apartment buildings and a music venue. Segment A will further impact our living conditions. Segment A is worse for the environment and residents on top of being more expensive and destroying more businesses. Please do not pass Segment A.

Thank you,
Angela Haran

Subject: OPPOSE Option B - US Hwy 380 By Pass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

April 6, 2022

TO: Mr Stephen Endres, P.E.
4777 E. US Highway 80
Mesquite, TX 75050
Stephen.Endres@txdot.gov

As a Homeowner at Whitley Place, I have been very involved in learning about the 380 by pass options that are being proposed. I am steadfast in my opposition to the building of a US Highway 380 By-Pass (Option B) that would cut through the eastern side of the Town of Prosper.

My research of the situation with McKinney Mayor George Fuller, former County Judge Keith Self, and the McKinney community of Tucker Hill's collective push to have a by-pass go through Prosper wasn't even on the table until former County Judge Keith Self (who lives in Tucker Hill) asked TxDOT at a County Commissioners meeting to look at Prosper as an alternative route. He unethically used his position as the county judge to influence TxDOT to move the by-pass proposal away from Tucker Hill ("NIMBY – Not in My Back Yard"), and instead, build it in Prosper's backyard. How hypocritical of him.....

Per my understanding, the original TxDOT proposal had a by-pass running north-south along the east side of the Tucker Hill community where it would then merge with the existing US Highway 380. As I understand it, that east-side land is in a flood plain where no homes could be built anyway, but an elevated by-pass could be built there without depriving McKinney of potential tax revenue generated by new homes. That's when former County Judge Self wrongly opened his mouth to protect his own neighborhood.

In terms of "direct impact" on Prosper, Option B would obliterate the Ladera Prosper 55+ community being planned by the Delin brothers, just west of Custer Road, with the result that Prosper would be deprived of the taxes generated by these new homes. In terms of "indirect impact," Option B would create a negative environmental / ecological impact on:

- The Mane Gait therapeutic horsemanship program;
- The Founders Academy already built and in operation on the southwest corner of E. First Street and Custer Road;
- The existing small cemetery with plans for expansion on the west side of Custer Road;
- The Malabar Hill subdivision currently under construction on the south side of E. First Street;

Subject: US Hwy 380 - Oppose Option B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

April 9, 2022

TO: Mr Stephen Endres, P.E.
4777 E. US Highway 80
Mesquite, TX 75050
Stephen.Endres@[txdot.gov](mailto:Stephen.Endres@txdot.gov) (mailto:Stephen.Endres@[txdot.gov](mailto:Stephen.Endres@txdot.gov))

As a homeowner of Whitley Place in Prosper, I would like to voice my opposition to the building of a US Highway380 By-Pass (Option B) that would cut through the eastern side of the Town of Prosper.

I am saddened to learn that McKinney Mayor George Fuller, former County Judge Keith Self, and the McKinney community of Tucker Hill's collective push to have a by-pass go through Prosper which wasn't even on the table until former County Judge Keith Self (who lives in Tucker Hill) asked TxDOT at a County Commissioners meeting to look at Prosper as an alternative route. This is an unethical use of his position as the county judge to influence TxDOT to move the by-pass proposal away from Tucker Hill ("NIMBY – Not in My Back Yard"), and instead, build it in Prosper's backyard.

In terms of "direct impact" on Prosper, Option B would demolish the Ladera Prosper 55+ community being planned by the Delin brothers, just west of Custer Road, with the result that Prosper would be deprived of the taxes generated by these new homes. In terms of "indirect impact," Option B would create a negative environmental /ecological impact on:

- * The Mane Gait therapeutic horsemanship program;
- * The Founders Academy already built and in operation on the southwest corner of E. First Street and Custer Road;
- * The existing small cemetery with plans for expansion on the west side of Custer Road;
- * The Malabar Hill subdivision currently under construction on the south side of E. First Street;
- * The Walnut Grove High School now under construction on the south side of E. First Street.

In further regards to Mane Gait, Segment B places the 45-foot tall freeway within 50-100 feet of Mane Gait - even closer and more disruptive to operations than before. The path also cuts through property that is regularly used to support Mane Gait's operations. In

the March 22, 2022, public hearing (http://www.keepitmovingdallas.com/sites/default/files/docs/0135-02-065%20etc_%20US%20380%20PM%20PPT%20Script_FINAL_3.18.2022_0.pdf), TxDOT claimed they interviewed similar horsemanship facilities and the proposed highway does not pose an issue to operations. Fallacy of this claim: No other PATH Premier Accredited center in Texas the size of Mane Gait is located within 50-100 ft of a highway, and none have operated next to a 3- to 4-year highway construction project.

It is unreasonable and unsafe for 150 disabled riders and their horses to work 60 hours a week with the sounds, emissions, and vibrations of construction for 3-4 years. In the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway/traffic equivalent to US HWY75 towering over them and their therapy horse. Segment B will also result in land acquisition from property that is regularly used to support Mane Gait's operations.

These are just some of the reasons why Prosper's proper planning for the future should not be disrupted by Option B being pushed by the consortium of Fuller, Self, and Tucker Hill. The cheapest alternative is not necessarily the best alternative, nor is it ethically the best alternative. The lack of planning on McKinney's part (allowing homes and businesses to be built too close to the existing US Highway 380 when the city knew someday it would have to be improved and expanded) should not create an emergency for Prosper.

Our town has carefully planned for its future. Prosper does not tell McKinney where to build roads in its city planning; in the same vein, McKinney should not be telling Prosper at this juncture where to build roads in its town. McKinney at 200,000 population ought not to be bullying smaller Prosper with its 30,000 population – projected to build-out at 72,000. The Town of Prosper has maintained all along for several years that it supports "Keep 380 on 380."

The only acceptable options are:

- * To build the by-pass east of Tucker Hill; or
- * To "Keep 380 on 380."

The best way to accomplish the latter is to use TxDOT's own drawing called "Below Grade Main Lanes" with service roads at ground level. That design would put the noise factor below ground level in a "canyon." It would be similar in design as to how the expanded Central Expressway passes by the area of SMU in Dallas.

I urge TxDOT in the strongest terms possible to not cave into McKinney's demands and to pursue the ethical choice of not harming the Town of Prosper and its residents.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN

AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Angela Taylor

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern,

I have volunteered at ManeGait for the past 7 years. I have seen amazing things happen with the therapy provided. However, that therapy must have a safe and relatively undisturbed environment for both the children and horses. In fact, the noises of construction and then a highway would be devastating to the work and much needed therapy and quite dangerous.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Sincerely,

Angela Wolden

Subject: Strong SUPPORT for Project 380 *Segment-B bypass* alignment option

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

Wanted to let you know that I **strongly support the Project 380 Segment-B bypass alignment option** as the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the north side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
A Torres, PhD

Morning Mr. Endres,
My husband & I have been residents in Stonebridge Ranch since 2002. We love our community and fully understand with changes needing to be made due to the increase of population & traffic. After studying the various choices to improve traffic flow, we are absolutely in favor of Segment B; less disruption to businesses & neighborhoods, less expensive, along with ManeGait being untouched. ManeGait provides an amazing service to children with disabilities. Our dear friend has a son who is benefitting tremendously from this program. Thank you for your consideration of Segment B.
Ann Cason

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: I am in favor of Option B. I think it needs to go as far west as possible before rejoining 380. Going west of Custer before rejoining 380 would help with congestion on 380. I am glad that parks, community centers, churches and Main Gate are being avoided. I know there is no simple solution. Option B avoids more utility entities

I vote for Option B.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: Segment B 380 Bypass Opposition Comment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

April 5, 2022

Dear Mr. Endres,

I am opposed to the Segment B Bypass option that runs through Prosper.

I originally was a proponent of Fixing 380 on 380 throughout Collin County, but since that option is off the table I have had to consider the remaining options. I live in Walnut Grove where Segment A will run to the south of me and Segment B will run to the north of me. I have given this much thought, as both of these options are undesirable for our Walnut Grove neighborhood. However, after much consideration, I feel that Segment A is the better choice. It seems to me that Prosper has had the foresight to maintain appropriate setbacks off of 380 allowing room for future expansion of 380. I have also observed that there seems to be a rush by McKinney to build very near 380 as quickly as possible so there is no room for expansion without displacements. Prosper should not be penalized for the lack of foresight by McKinney. And, McKinney should not be allowed to dictate the route of 380 outside of their city limits.

TXDOT has stated that there is no negative impact to ManeGait. However, MainGait has stated that they have evidence to the contrary. Please reconsider your conclusions regarding the effect of the very noisy and noxious highway in such close proximity to the ManeGait property and adjacent therapeutic equestrian use area.

Regards,

Ann Lynette Lee Terrell

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I am a long-time resident of McKinney and share your concern regarding the flow of traffic along Hwy 380. Thank you for researching ideas and for asking for a community response from residents who travel this road daily. After looking at the options, I **STRONGLY RECOMMEND selecting SEGMENT B choice**. Segment B choice is \$99 million cheaper, AND it also protects the disruption of small businesses along the Custer, Stonebridge, Ridge corridor. I live in the Stonebridge development off of Stonebridge near 380 and want to protect our home values as well as reducing the traffic and noise in our neighborhood with two elementary schools located close by on Stonebridge and on Ridge. In regards to choices C or D, I believe that is a choice for the residents and businesses nearby and closely affected to decide.

Thank you for your time in reading my email and letting my voice be heard, after all that is what America freedom is and what I believe in.

Hope you have a blessed day.

Sincerely,
Ann Teese

Subject: 380 Bypass input

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

This is my input regarding the 380 bypass project.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Annette Payne

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I know that no matter what you do, someone will not be happy. What I pray for is sound minds and calm hearts to think and make the right choice not for business, or development or even me but for the kids and those in a protected class. Without prejudice these human beings get to be "normal" on a horse and feel a sense of independence, who are we to take that way. I also feel that having this right by a school is not a very wise decision. We need to do better at preparing and seeing the future and not jumping on things for a buck. Please know that we will be praying for you all as you make this choice. I pray that God gives you all the wisdom to do what is best.

God bless you all.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN

AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Anthony Lamar Tolliver

Subject: SUPPORT for the Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

When we moved to McKinney 3 years ago – we purposely steered clear of homes north of 380 that were adjacent to large greenways as we new there was some uncertainty as to where the 380 bypass would go. I thoroughly researched my options and settled on a home south of 380 in Stonebridge. However, with Option A – this is still right in my backyard! The amount of traffic it will generate a full developed, residential area that has been around for years does not seem reasonable or ideal. This is an area surrounded by homes, not commercial or industrial businesses.

For other drivers passing through, I think connecting the 380 closer to the tollway makes more logical sense and streamlines their driving experience.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Support for Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres

I am reaching out today in **strong SUPPORT OF SEGMENT B on Project 380**. I am a homeowner and citizen of McKinney and as such, pay both federal income and property taxes. It is inconceivable to me that Segment A can even be considered as the cost is almost \$100 million more. Texas has done so much amazing work to keep up with continued growth and it seems there must be a much better use of the tens of millions of dollars that would be saved by going with Segment B.

I also **strongly oppose Segment-A**. It should **NOT** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

***The cost of Segment-A is \$99 million more than Segment-B.**

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Segment B Choice Feedback

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also STRONGLY oppose Segment-A. It should NOT be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- *It will greatly affect emergency traffic to/from Baylor, Scott & White hospital for those of us living off Stonebridge Drive.

Segment B is the best option to improve traffic flow in our corridor, while also preserving the economic business and residential vibrancy of our community. PLEASE - the only and best option must be Segment B.

Thank you for your time,
Audrey Beth Hall

I understand the need for increased roads to account for traffic. As someone who drives for work, I am aware of the time spent and the annoyance of stopped traffic. However, I am baffled by the proposition to have a bypass go through a planned area of Prosper.

I would like to suggest that segment A be approved, and a reassessment of 380 throughout the portion in Prosper. The buildings are set back intentionally to allow for the expansion of the current route. Penalizing thoughtful planning does not make sense to me.

There are not many opportunities to make a morally good decision for a community, but this is your chance. It may seem like all roads and communities are equal, and I understand that nobody wants a bypass in their backyard, but a route that impacts an elderly community, school aged children, and disabled children and adults is not acceptable.

Subject: Committed Resident: STRONGLY Support Segment-B Alignment of 380 expansion from Coit to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

As a committed resident of Mckinney, I am deeply concerned and strongly OPPOSE SEGMENT A ALIGNMENT OPTION of the US 380 expansion from Coit Road to FM 1827.

I STRONGLY SUPPORT SEGMENT B ALIGNMENT OPTION.

As someone who has decided to make a long-term investment in the McKinney area by moving my family to Mckinney in 2020, I take this project very seriously and have invested the time in learning the pros and cons of each alignment option. With this in mind, I would like to outline the key factors in my decision to STRONGLY SUPPORT SEGMENT B ALIGNMENT OPTION.

- 1) Existing Businesses Impact:
 - a. Segment A displaces 17 businesses, while Segment B displaces zero
- 2) Existing Residential Impact:
 - a. Segment A would have a significant negative impact to existing neighborhoods and residents:
 - i. Noise pollution and interchange aesthetics resulting in lost property value, increased population turnover and negative tax base implications.
 - ii. Reduced access to Baylor Scott & White Hospital Emergency Services due to construction and ease of access to emergency services.
 - iii. Dangerous school children commute to and from schools as 380 is primary thoroughfare to 3 major high schools in Mckinney as well as many of the Elementary, Middle-School and Daycare facilities.
 - iv. Increased in-neighborhood congestion and danger during construction as commuters avoid 380 construction areas and turn to arterial streets that run through existing neighborhoods as they are the only roads south of 380.
 - b. Segment A does not come close to established Prosper Neighborhoods or emergency services, thus Segment B represents a reduced residential impact.
- 3) Financial Impact: \$99M higher Project Cost for Segment A vs Segment B:
 - a. Segment A is \$36M greater cost to relocate utilities than Segment B
 - b. Segment A is \$41M greater cost to acquire ROW than Segment B
 - c. Segment A is \$22M greater cost to design/construct than Segment B
- 4) Environmental Impact: 12.9 acres Greater Environmental impact: Segment A impacts 14.9 acres of wetlands, rivers/streams, forest and prairies, while Segment B only impacts 2 acres.
- 5) Overall length of commute is shorter when choosing Segment B over Segment A resulting in less maintenance costs, commuter fuel costs and improved commute times.

I trust that factual benefits and negative impacts will be weighed in the decision as the impact study clearly shows a FINANCIAL, ENVIRONMENTAL and SAFETY BENEFIT TO CHOOSING SEGMENT-B ALIGNMENT OPTION.

Emotional comments and feedback, whether organized and great in numbers or not, should give way to rational and factual based findings. I also trust that there is more weight given to the impact to residents who have made a commitment to the area, over housing developments and future plans for expansion in the Prosper areas.

Subject: I Oppose Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr Endres,

This letter is to inform you of my opposition to the building of Segment B as an option. Segment B will negatively impact the future of Prosper. It will cut through the heart of Prosper's economic corridor and disrupt Prosper's master plan. The alignment would directly impact over 360 future homes and thousands of residents and indirectly impact many more. Segment B will have a negative impact on Prosper ISD and Founders Classical Academy. It is in close proximity to existing and future schools including high schools impacting thousands of students. It would destroy ManeGait which serves two vulnerable and protected status populations -- the disabled and children. Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG).

The Town of Prosper has passed six Town Council approved Resolutions strongly opposing any proposed alignment for the widening of US 380 not located along the existing US 380 corridor.

Sincerely,
Autumn Leal
Prosper TX

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr Endres,

I am a resident of McKinney, specifically Wren Creek of Stonebridge located at Landon Ln.
I am writing you in to inform you:

I STRONGLY SUPPORT Project 380 Segment-B bypass alignment option.

It is:

1. The least disruptive to businesses with no displacements.
2. Has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380, especially ours at Wren Creek.
3. The least expensive option by nearly \$99 million when compared to the cost of the Segment-A Alignment.

I STRONGLY OPPOSE Segment-A and it should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the 380 and Custer intersection on the North Side.
2. The cost of Segment-A is \$99 MILLION more than Segment-B.
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive - all which have schools located on them directly off 380.
5. It will cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Barbara Dailey

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

We backup to [REDACTED] and do not want major changes on our Parkway that would eliminate our beautifully landscaped Parkway and add noise with the possibility of TX Dot having to install noise walls which will be expensive and decreasing our property values. Option B is less expensive and is a logical choice period.

Thanks for listening.

COMMENT:

MainGate is a North Texas treasure that offers unique and life affirming services to underserved and vulnerable protected populations in our community. The TxDOT design for the 380 overpass cuts through too closely and disruptively, as opposed to properly around this critical infrastructure and community landmark. I oppose the proposed HWY 380 Segment B because it threatens the daily operations, services and special events of ManeGait -- a key community resource, identified as such by TxDOT. These vulnerable and protected populations deserve a safe, high quality, accessible location to receive the world-class therapy programs at ManeGait. I really want to see TxDOT propose other options for U.S. 380 to protect this valuable resource.

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: I oppose Alignment B!!!
 I moved out of Dallas to get away from the traffic smog and noise around my home ⁵⁰⁰⁰ with Freeway about 1-2 miles from my home. Now you want to put an elevated freeway less than 1/2 mile from me. So much for your promises in 20-21 to respect our wishes in Prosper. Prosper has opposed B since it was "sprung" upon us a few years ago. It will ruin the integrity of our town, destroy property values, disrupt the very essence of the great atmosphere that is Prosper. Not to mention endangering children by putting a freeway beside several schools. Our quality of life will be greatly diminished. Prosper is a well planned town with strict guidelines which you will violate and disrupt with Alignment B.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting *— the contrary it will hurt me monetarily due to loss of property values*

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

To Whom it May Concern,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

First, I will address the evaluation process and criteria for the Segment Analysis. Next, I have several observations on the general comparison between Segments A and B. Finally, I have particular concerns with the Segment B design that are enumerated within.

Evaluation Process and the Criteria for Segment Analysis

The TxDOT analysis matrix is a useful reference for comparing the alternatives available, but invites several remarks and questions.

1. Topic: Comparison of Access Disruptions

Remark: Converting the existing U.S. 380 footprint to a managed access highway entails disrupting access to the roadway. While the stated objective of all Segment designs is to ensure that no community loses access, the quality of access varies significantly, forcing drivers to travel the opposite direction and make U-turns. For Segments that front existing developments, there are fewer options available to mitigate this than for future developments. A top-level review of the candidate maps reveals that some alternative Segments introduce substantially more awkward access points than others.

Question: How will the assessment team rate the difference in access disruption between alternative Segments?

2. Topic: Traffic Utility Analysis

Remark: The Segment Analysis Matrix presents a traffic modeling comparison between several alternatives that is useful, but seemingly reductive. Namely, each alternative is compared on the basis of through-travel traffic. The presented findings do not address the effect on substantial traffic patterns originating or terminating within the defined corridor, which could be positively or negatively affected by various alternatives. It would seem that a set of day-in-the-life studies would be an effective tool to compare alternative segments.

Question: What traffic use cases were used in the comparative analysis between Segments? Were any cases evaluated apart from through-traffic of the bypass?

3. Topic: Displacement comparison

Remark: Each Segment displaces various residences, businesses, and other structures, but the raw counts presented suggest more similarity between Segments than a map analysis supports. While Segment B displaces fewer buildings in total than Segment A, the size and significance of the structures underscores even further that Segment B is a less disruptive course of action.

4. Topic: Comparative Environmental Impact during build phase

Remark: The Segment Analysis Matrix compared the alternatives against each other at completion - but did not consider the different impacts each alternative would have during the construction phase. These include the areas affected by temporary sites for earth moving equipment, material staging, fill material, etc., along with the degree to which the 2-4 year construction period would impact congestion on U.S. 380. Segments involving less excavation of the existing U.S. 380 corridor would be much less disruptive to traffic than those requiring extensive Right Of Way growth, grade change, and excavation.

Question: Will the comparison between Segments include criteria for the different impact on the environment and congestion *during the construction phase*?

General Comparison Between Segments A and B

The objective of this project, as with any bypass, is to alleviate congestion. The Segment B route fulfills this much better than Segment A. While a mathematical analysis may suggest similar utility between the two, the 90 degree bend introduced by Segment A will disincentivize drivers to take this route - while the gradual diagonal of Segment B promotes a more natural, safer, traffic pattern.

Comparing the maps, the design team worked hard to develop a Segment A path that can integrate with the existing developments and address land issues (creek crossings, drainage, etc.), but the resulting plan is clearly more contrived, featuring extensive earthwork required, large changes in elevation over short runs, and risky workarounds to flood management. Moreover, the Segment A design has very little margin for growth or change. In essence, Segment A is only barely viable. By comparison, the Segment B design is straightforward, simpler, and much more tolerant to adaptations during the detailed design phase.

The elephant in the room in the comparison between these alternatives is the deep-pocketed special interest masquerading as a special concern for the ManeGait equestrian facility. The documented findings of the therapeutic benefit of this facility neatly dodge the fact that said benefit is entirely relocatable.

Question: What comparative rubric will TxDOT use to evaluate alternatives to ensure transparency in the presence of a widely understood pressure from Bill Darling?

Specific Feedback on Segment A Design

1. The summary of environmental impact tabulated in the report does not acknowledge the impact Segment A would have on an established beaver habitat on Wilson Creek that creates an ecosystem for additional wildlife in this area. If needed, I can supply current photos evidencing this habitat and active population.
2. The limited right of way available at the 380 & Grassmere crossing creates an access issue. The Segment A design forces the entire Tucker Hill neighborhood to access eastbound University via a right turn, turnaround, and offramp pattern. I know that many people in the neighborhood work in McKinney.

3. Planned development of additional phases in Tucker Hill, along with a multi-family development to the east, will exacerbate the access issues in this elbow bend area. With the constrained space, the engineering team has few options to alleviate this traffic pressure, which arises right at the crucial junction between the bypass and the continuation of University Drive.
4. The interchange from eastbound 380 to University Drive is woefully undersized - a natural outcome of the poorly conceived Segment A routing. As an example, Raytheon at University and 75 is a major employer in the affected region and has broken ground on a second additional building since the 380 bypass designs were conceived. This drives a large recurrent pattern of traffic from Frisco, Prosper, and west McKinney to that intersection. As the bypass does not address the resulting commuter traffic, all of the eastbound traffic with McKinney destinations will be forced through a chokepoint that worsens the congestion the bypass is intended to alleviate.
5. Segment A contains a roller coaster road design effort that connects a 30-foot depressed roadway to a 30-foot elevated water crossing in a half mile, through a 90 degree change in heading (east to north). This will have tremendous impacts:
 - a. Noise: vehicles climbing the grade and negotiating this turn will be changing gears, accelerating, and braking, all while elevated above the ground so that the resulting noise carries directly into homes at a very short distance. A cursory noise analysis of static highway-level sound does not suffice.
 - b. Viewshed: in order to cross Wilson Creek, the roadway will be elevated by a bridge and by significant earthwork identified in the plans presented at the public meeting. This will have a deleterious effect on the viewshed of my home and those throughout the neighborhood, in a sweeping corridor.
6. The water crossing through this area presents a serious concern to flood management. Numerous contrivances (e.g., elevated culverts, depressed roadways, and elevated grades) entailed to make the Segment A route "fit" result in a road design that is fundamentally at odds with the natural watershed of the area. By developing along these lines, while the broader area is increasingly paved, TxDOT would be compounding the risk of significant flooding events in the future. As Hurricane Harvey showed in Houston, modeling techniques and the siloed analysis of a series of independent projects do not adequately address the compound impact of simultaneous changes to the natural systems that remove rainwater from an area.

Summary

I highly encourage TxDOT to select Segment B rather than Segment A. The direct route encourages bypass use, disrupts far fewer existing homes and businesses, and is less risky. Moreover, Segment A contains several environmental impact effects that are not yet adequately rated. Finally, the Segment Analysis Matrix is a laudable step towards a clear comparison of alternatives, which can and should be improved both in substance and transparency during the final comparison and selection process.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. My Nephew, with Downs Syndrome, enjoys the experience and looks so forward to visiting there as often as possible. I hope you reconsider the hwy expansion .

Sincerely,
Becky Baker,

Our family at [REDACTED] support plan B.

It makes no sense for our beautiful city to spend far more money, destroy land and businesses for the bypass as layed out in plan A. Please support our communities overwhelming wishes and overall best economic interest with plan B.

Thank you

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I support the GREEN alignment between Coit Road and FM 1827 for the expansion of US HWY 380. It is the optimal and most efficient path for east-west traffic through the cities of McKinney and Prosper. A bypass is unnecessary and would scar the beauty of our community. GREEN alignment also preserves one of Collin County's most prominent nonprofit organizations, ManeGait Therapeutic Horsemanship. Both Red Alignment E and B, would have direct impact on ManeGait, leading to destruction of this exceptional property and displacement of their vital community services.

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I am a resident of Prosper who lives close to 380. I support Segment A as the best alternative. There fore any option that goes through Prosper would have a damaging negative impact on the environment more so than the current recommended Option A. Option B is in the direct conflict with the air quality guidelines per the North Central Council Governments.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Belinda Thompson

Subject: Revised US 380 Comments
Attachments: Route Comparison Rev. 4202022.pdf; US 380 Position Paper Rev. 4182022.pdf

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon Stephen,

Corrections to the papers I submitted earlier are attached.

The Route Comparison Paper revision is in My Key Takeaways in Environment and Natural Resources. The last line should read; "development within the Town of Prosper."

The first revision to the US 380 Position Paper is in the first paragraph under ManeGait's Protected Status. The first line should read; " *The US 380 Collin County Feasibility Study; Final Report and...*". The second revision is in the fourth paragraph under ManeGait's Protected Status. The paragraph should read; "ManeGait and the services it provides is an integral part of the community of adults and children with disabilities benefiting from its programs. For this reason, ManeGait should enjoy the protected status given to the community of people with disabilities it serves."

Please see that the revised papers are placed in the public record. If the original papers cannot be removed, please see that a note is placed with them noting that a revise paper has been received and filed in the public record.

Thank you,

Ben Pruett

US Highway 380 Route - Segments A and B Comparison Matrix

Screening/Evaluation Category	Segment A (McKinney-West)	Segment B (Prosper - Furthest West)	My Key Takeaways
Manage Congestion - - Travel Time - Average Moving Speed - Level of Service - Improve Safety	*****	*****	“Generally safety is not measurably better or worse on any one Build Alternative.” (TxDOT)
Meets Purpose and Need	*****	*****	“All Build Alternatives meet the project’s Purpose and Need. The results of the Traffic and Safety analyses demonstrate that these alternatives are very similar by comparison.” (TxDOT)
Engineering	The Double Diamond Interchange (DDI) proposed at Custer Road and U.S. 380 should be resigned to a traditional interchange for safe travel on Custer Road. The DDI could be considered for Stonebridge, West University Dr., Wilmeth Road, and the future Bloomdale Rd. Interchanges. At each of these interchanges, the travel speeds would be at or below the recommend maximum design speed for a DDI. (MO Experience with DDI, May 2010) The DDI at the three interchanges appear to reduce the Total Bridge Length requirement for Segment A.	*****	“At least two years of design and construction would be required for all build alternatives prior to taking existing utilities out of service.” (TxDOT) During this period the City of McKinney can build out Stonebridge Dr. north of U.S 380 providing an alternate, or second, point of ingress and egress for Tucker Hill residents. This point of ingress and egress was approved as part of the Tucker Hill’s development approval more than ten years ago. Improving Stonebridge Dr. north of U.S. 380 will not only address the issue of ingress and egress. It will also mitigate the public safety concerns Tucker Hill residents have expressed over the years and in their comments addressing Segment A.
Displacements	The Direct Business Displacement (DBD) in Prosper, west of Custer Road, should be weighed differently from east of Custer DBD where commercial property is required for the freeway right-of-way. The freeway right-of-way west of Custer would require a small strip of the commercial center’s property. It very likely the commercial center property owner will move quickly and plan with the Town of Proser the relocation of affected businesses to a new location within the existing commercial center. In addition, new development within the commercial center will likely move forward after being held up by the uncertainty of the improvements planned for U.S. 380.	It can be argued that Segment B will impose Property Induced Displacement caused by the introduction of air quality health hazards and negative environmental traffic noise impacts on ManeGait and the minority community of adults and children with disabilities it serves. Residential Displacements: Five residential displacements may be incorrect. It appears there are two additional properties that become landlocked or inaccessible after the freeway right-of-way is acquired, which would be Direct Property Displacement requiring inverse condemnation, or taking of the private property by TxDOT.	The business displacements in Prosper, west of Custer Road, should be weighed differently from other business displacements that condemn not just the business but also the commercial lot or property. Segment B may impose Property Induced Displacement on ManeGait which will deprive adults and children with disabilities of the therapeutic horsemanship therapy which may cause them to encounter a setback in learning or experiencing this unique life experience. The EIS must justify the displacement of ManeGait considering the American with Disabilities Act and President Executive Order 12898, Environmental Justice.

Screening/Evaluation Category	Segment A (McKinney-West)	Segment B (Prosper - Furthest West)	My Key Takeaways
Land Use and Development Impacts	<p>The City of McKinney is fast-tracking development (filing of Preliminary Plat Maps) in its Extra Territorial Jurisdictional (ETJ) area to create obstacles for the U.S. 380 bypass Segment A. The City's goal should be to seek out an alternative, including Segment A, that it can support in the interest of improving mobility for all of the City's residents.</p>	<p>There are several developments underway in the Town of Prosper at this time, or began around the time TxDOT published the U.S. 380 Feasibility Study Final - Report and Implementation Plan (March 2020). Several projects have been completed or are underway (in the pipeline). The Founders Academy, a Texas Charter School, opened in the fall of 2021. This caused the "adjustment" of Segment B to the south to avoid conflict and displacement of the school. This moved the alignment closer to ManeGait along with the proposed freeway's negative environmental impacts imposed on adults and children with disabilities.</p> <p>Other projects include the Direct Displacement of Ladera Prosper neighborhood, a senior community of 244 homes and more than \$2 million in amenities, that would be eradicated by the propose Segment B. The displacement of 244 homes translates to be close to 500 senior citizens. Many of the seniors that have or will purchased homes in this community would like to continue to enjoy the independence Ledera Prosper provides. The last thing this group of seniors would like to confront at this time in their lives is to be <u>forced</u> to endure the stress of seeking new housing.</p> <p>Segment B would also impact hundreds of additional single family homes in Malabar Hills (which has begun construction), and Wandering Creek and Rutherford Creek which have plat maps under review or approved.</p>	<p>It is unfortunate the improvement of U.S. 380 may likely encounter unnecessary delays for years, because the City of McKinney is unwilling recognize TxDOT's recommended alignment (Segment A), which was published in the U.S. 380 Feasibility Study, Final Report and Implementation Plane, March 2020. Unfortunately, withholding TxDOT's approval of Segment A will cause the city of McKinney residents to experience the negative effects of poor mobility and extended travel times, which will have a negative effect on businesses along the current U.S 380 corridor.</p>
Environment and Natural Resources	<p>Segment A has more Acres of Jurisdictional Wetlands, Total Linear Feet of Rivers/Streams, and Acres of Forest and Prairies/Grassland when compared to Segment B, which illustrates that Segment A has less land available for residential and commercial development. The two high risk Hazardous Materials sites should be addressed by Collin County and/or the City of McKinney. There may be Federal money available to clean up these two sites now that they have been brought to the public's attention.</p>	<p>Water Features analysis does not appear to include/consider Soil Conservation Service Site 1b Reservoir and the Rutherford Branch which feeds into Wilson Creek, and then into the Trinity River.</p>	<p><i>"Based on the 60% schematic design and the current hydraulic analysis, none of the Build Alternatives would require an Individual Permit (IP) due to each individual crossing impact being below IP threshold." (TxDOT)</i></p> <p>Segment A's total jurisdictional wetlands suggests minimal impact on current and planned residential development in the City of McKinney. Comparably, Segment B will have a significant impact on current and future residential development within the Town of Prosper.</p>

Screening/Evaluation Category	Segment A (McKinney-West)	Segment B (Prosper - Furthest West)	My Key Takeaways
Community Resources and Cultural Resources	<p>The suggestion that Segment A would create a potential barrier or separation between neighborhoods, should consider that Tucker Hill is currently separated from the Stonebridge Ranch neighborhood by U.S. 380, and isolated by undeveloped property to the east, north and west. The City of McKinney can mitigate this issue by building out Stonebridge Dr. north of U.S 380 to provide Tucker Hill residents with an alternative, or second, point of ingress and egress with a connection to new developments to the north. The Stonebridge Dr. point of ingress and egress was part of the initial development approved by the City of McKinney for Tucker Hill more than ten years ago. Improving Stonebridge Dr. north of U.S. 380 will also address the public safety concerns Tucker Hill residents have expressed about current and future alternate/secondary access for emergency vehicles, school bus routes, etc.</p> <p>Visual and Aesthetic Impacts for Segment A are mitigated from Station 1445 to Station 1480 where the freeway will be depressed thirty feet. This is the section located between Tucker Hill and Stonebridge Ranch communities.</p>	<p>Segment B will introduce a negative impact separating or creating a barrier that does not currently exist between neighborhoods and neighborhood services in the eastern portion of the Town of Prosper.</p> <p>Environmental Justice: The finding that the Segment B “does not intersect Low-income or minority block groups nor are there any displacements located in minority block groups” is incorrect. The analysis has failed to consider the negative air quality health hazards and traffic noise environmental impacts introduced to the minority community of adults and children receiving therapeutic services provided by ManeGait. The American with Disabilities Act (ADA) provides protections for people with disabilities, modeled after the Civil Rights Act, it extends to people with disabilities the same rights and protections as other minority groups.</p> <p>The Segment B visual and aesthetic impacts cannot be mitigated. Segment B will introduce negative visual and aesthetic impacts to the residential neighborhoods in east Prosper and ManeGait. The bridge or overpass required to cross Wilson Creek and Custer Road will be 20 feet above the current elevation between Station 1449 and Station 1430 as it passes along ManeGait’s property, and 30 feet above Custer Road’s elevation (adjacent to Founders Academy) at Station 1428.</p>	<p>Tucker Hill is already an isolated community located on the north side of U.S. 380. The City of McKinney can mitigate this issue by providing Tucker Hill residents with a second point of ingress and egress on Stonebridge Rd. The second point of ingress and egress was part of the Tucker Hill development approved more than ten years ago.</p> <p>Environmental Justice: People with disabilities are a minority group protected by the ADA and the right to fair treatment as provided by Environmental Justice. It is also important to note that Adults and children with disabilities were identified as protected class in the U.S 380 Feasibility Study - Final Report and Implementation Plan, March 2020 (page 60), but, for unknown reasons, disregarded in the material TxDOT presented at the March 22, 2022 public meeting.</p> <p>Visual and Aesthetic Impacts: Clearly Segment A follows the current U.S 380 alignment where noise and air quality impacts are mitigated. It is very likely a depressed Segment A will mitigate noise and air quality emissions below existing conditions. Segment B’s will introduce and impose negative air quality and traffic noise impacts on residential neighborhoods and PISD sites in the eastern portion of the Town of Prosper and ManeGait. Segment B visual and aesthetic impacts cannot be mitigated to current levels or existing conditions.</p>
Air Quality and Traffic Noise	<p>Depressing Segment A will help to mitigate the freeway noise to levels below current noise levels from U.S 380. As pointed out in comments submitted by email on March 28, 2022 and the attached Position Paper, air quality emission may be improved by Segment A as vehicles will no longer be required to stop at traffic lights and accelerate from stoplights up the hill in both the east and west travel lanes.</p>	<p>Segment B will introduce air quality health hazards and negative environmental traffic noise impacts that will prove impossible to mitigate to current levels or existing conditions. The air quality and traffic noise impacts will impact neighborhoods, schools and ManeGait which is a ADA protected minority community of adults and children with disabilities.</p>	<p>Refer to comments Ben Pruett submitted by email on March 28, 2022 and the attached Position Paper. Both discuss the air quality and traffic noise issues, along with the protected rights provided by the ADA and EJ. An EJ analysis of the air quality health hazards and negative traffic noise impacts Segment B introduces and imposes on the adults and children with disabilities, served ManeGait, is required to ensure fair treatment required by Executive Order 12898 (EJ).</p>

Screening/Evaluation Category	Segment A (McKinney-West)	Segment B (Prosper - Furthest West)	My Key Takeaways
Induced Growth Cumulative Effects	There appears to be several opportunities for induced growth with Segment A. The interchanges at Station 1490 (University and U.S. 380), at Station 1535 (Wilmeth Rd), and at Station 1574 (Future Bloomdale Rd West), the alignment the City of McKinney has chosen for Bloomdale Road West (Segment E), will likely provide inducement and opportunities for growth. Cumulative Effect may occur in with Segment A conjunction with the adjoining Segment E.	The growth opportunities presented by Segment B are minimal to none. The cumulative effects include the loss of revenues from property taxes for the Town of Prosper and the Prosper Independent School District (PISD). The Ladera Prosper neighborhood will not add to the student population in the PISD, yet the neighborhood of seniors will pay PISD an estimated \$1.5 million annually in property taxes. The property tax benefit to PISD will evaporate with Segment B, and it will be difficult for the PISD to replace the lost revenues. The Town of Prosper will also experience a significant reduction in future tax revenues from the Ladera Prosper neighborhood, as well as property tax revenues from Malabar Hills, Wandering Creek and Rutherford Creek.	The opportunities to induce growth and the cumulative effects of growth are minimal for Segment B when compared to the growth opportunities and cumulative effects which weigh heavily in favor of the City of McKinney, along with the economic benefits the City of McKinney will derive from Segment A. Growth opportunities for the Town of Prosper are limited and the cumulative negative effect of Segment B is the reduction of future property tax revenues for the Town of Prosper and the PISD. The significant reduction in future property tax revenues caused by Segment B will be impossible to replace.
Estimated Costs	*****	*****	The estimated right-of-way costs for Segment A may be overstated due to the large percentage of undevelopable land, including: 1.5 total acres in jurisdictional wetlands, 4,665 total linear feet of rivers and streams, 67 total acres of forests and 41 total acres of prairies/grasslands, 20 acres of floodplain, and 6 acres of regulatory floodway. As a result, the actual estimated total project cost is very likely the same for Segments A and B, or very close to being the same.

See Attachment:

Revised Position Paper
4/20/2022

Prepared By
Ben Pruett

POSITION PAPER

TXDOT Collin County US 380 Segment B

Background

The Texas Department of Transportation (TxDOT) is preparing the required Environmental Impact Study of Segments A and B (focus Area 1). TxDOT identified Segment A as the preferred route in the *U.S. 380 Feasibility Study; Final Report and Implementation Plan, March 2020*.

THE ARGUMENTS OPPOSING SEGMENT B AS A VIABLE LOCATION FOR THE PROPOSED U.S 380 FREEWAY.

ManeGait's Protected Status

- ~ *The US 380 Collin County Feasibility Study; Final Report and Implementation Plan, March 2020*, found “ManeGait to be a unique facility that helps children and adults with physical, emotional, cognitive, sensory, and behavioral disabilities.” In addition, “TxDOT considers the daily operation and special events held at this location to be services for at least two vulnerable and protected status populations - the disabled and children.”
- ~ The “protected status” for this minority community of adults and children with disabilities clearly references the Americans with Disabilities Act (ADA) which was modeled after the Civil Rights Act of 1964 and the Rehabilitation Act of 1973. The legislation prohibits discrimination and guarantees people with disabilities the same opportunities as everyone else to participate in the mainstream of American life.
- ~ Presidential Executive Order 12898 was issued in 1994 to address adverse human health hazards or negative environmental effects on minority populations. The Environmental Justice (EJ) mission is to promote nondiscrimination in federal programs, including federal highway projects. TxDOT must consider and give weight to the public comments speaking in support of the ManeGait community of adults and children with disabilities, a community where many cannot speak for themselves.
- ~ ManeGait and the services it provides is an integral part of the community of adults and children with disabilities benefiting from its programs. For this reason, ManeGait should enjoy the protected status given to the community of people with disabilities it serves.

Air Quality Impacts

- ~ There is a growing amount of literature available about the air quality health hazards freeway presented by near-highway pollutants (ozone) in motor vehicle exhaust. A TxDOT environmental assessment for Interstate Highway 35W (2012) found maximum concentrations of ozone beyond the freeway right-of-way. Collin County is marginal non-attainment area for ozone.
- ~ TxDOT's Segment Analysis (March 2022) includes conflicting comments regarding Air Quality. The analysis suggest air quality to decline for all segments, but the Key Takeaways states "The proposed project is also forecast to carry more than 140,000 vehicles per day in 2045, the threshold triggering detailed air quality analysis. TxDOT will evaluate how the project impacts air quality after the Public Meeting and provide results at the Public Hearing." However, the air quality negative impacts will occur when the freeway is open to traffic. Projected air quality data from 2035 or 2045 should not be used to determine negative air quality impacts that Segment B introduces and imposes on ManeGait and residents in the Town of Prosper.
- ~ TxDOT's air quality analysis does not consider Particulate Matter (PM2.5) emission rates caused by resuspended dust from brake and tire wear. A growing body of studies indicate PM2.5 can lead to adverse health effects.
- ~ "The most susceptible (and overlooked) population in the US subject to serious health effects from air pollution may be those who live very near major regional transportation route, especially highways." *Brugge, D., Durant, J.L. & Rioux, C. Near-highway pollutants in motor vehicle exhaust: A review of epidemiologic evidence of cardiac and pulmonary health risks. Environ Health 6, 23 (2007). <https://doi.org/10.1186/1476-069X-6-23>*

Environmental Impacts

- ~ The Segment Analysis Matrix states that traffic noise is yet to be determined. This is yet another environmental impact affecting the serene environment ManeGait provides for its community of adult and children with disabilities.

Summary

- ~ It is very unfortunate that there are people who do not understand the value and benefit of ManeGait's programs and services to the minority group of adults and children with disabilities. This is an example of why the ADA was adopted to protect their rights, along with Executive Order to ensure fair treatment.

Subject: U.S 380 COIT ROAD TO FM 1827, Collin County - Comments Following March 22, 2022 Public Meeting

Good Afternoon Stephen...

Please find attached, my comments on Segments A and B (Focus Area 1). My comments include two comparatively brief statements for Segment A when compared to the comments for Segment B. You will find that my Segment B comments focus primarily on the rights of adults and children with disabilities protected by the Americans with Disabilities Act and Executive Order 12898 (environmental Justice) which provide for the fair treatment of the minority community of adults and children with disabilities.

As stated in my concluding remarks in the attached comments, it would be an egregious error and violation of rights guaranteed by the Americans with Disabilities Act and Environmental Justice - Executive Order 12898 to exclude, from the EIS analysis and discussion, the negative air quality health hazards and the traffic noise environmental hazards imposed on the minority community of adults and children with disabilities that benefit from services provided by ManeGait. Unfortunately, many persons within this vulnerable community cannot speak for themselves to protest the impact the proposed Segment B will have on their ability to improve their quality of life and life experiences.

It is very unfortunate that there are people who do not understand the value and benefit of ManeGait's programs and services to the minority group of adults and children with disabilities. This is an example of why the ADA was adopted to protect their rights, along with Executive Order to ensure fair treatment.

Please please include this email along with the attached comments as part of the project's public record for the March 22, 2022 public meeting. Feel free to contact me with any questions regarding my comments.

Subject: 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

We spoke at the public meeting on Tuesday, you showed me the maps at Heather wood and the detail on the bypass going by Heather wood. Thanks for taking the time and answering my questions.

Obviously I am quite disappointed at the Bloomdale segment and the fact TxDot would not consider taking the road a little further north to cut down on the noise we can expect from a 8 lane highway so close to our neighborhood.

I would add I am not for the Prosper segment and would think the west McKinney segment is best for TxDot. I think cutting the East section of Prosper is devastating for many developments, existing homes, MaineGait and the Founders Academy and Prosper has already planned for the bypass on 380. The loss of revenue for Prosper would increase school taxes tremendously and with all the northern sections above 380 being effected most of those are in Prosper ISD. I would hate to see my school taxes go up due to less of a tax base due to TxDot putting an bypass cutting Prosper up in the East section of Prosper

Thanks again for taking the time and my home will be on the market in the next year to get out of the debacle of the bypass.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon,

I am writing in opposition of the proposed segment B 380 bypass through Prosper.

The Town of Prosper cannot have TWELVE lanes cutting through our town. Our town only has 27 sq miles to work with as it is. Everything about this is bad. Existing homes, schools and businesses will suffer. Future projects will suffer (or be eliminated). This is an untenable and unacceptable plan.

Thank you,
Bernadette Gerace
Prosper resident

Subject: Project 380 Bypass in McKinney, TX

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a military veteran, homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option.

This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly *\$99 million* when compared to the cost of the Segment-A alignment.

Moreover, I also **strongly oppose Segment-A**. It should *not* be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your time, your cooperation and making sure my comments and concerns are reported and shared with the decision makers!

V/r,

Bernard J. Noel

Dear Sir,

As a 16 year resident of Prosper I am horrified to see this option to split Prosper and put a major highway directly through a neighborhood and so close to the therapeutic Mane Gait Facility. It is disappointing that the work we did several years ago to oppose a similar plan was ignored. Please do not destroy the community of Prosper with this disruptive plan. Having the highway noise and pollution so close to Mane Gate will destroy their business and negatively impact a community in need of this type of therapy.

Thank you.

Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon, Mr. Endres!

As Realtors with Coldwell Banker Apex, Realtors in McKinney, TX we would like to comment on the proposed improvements to US 380 from Coit Road to FM 1827. Our office is located within Stonebridge Ranch at [REDACTED]. We live and work in McKinney and have numerous family members, friends, colleagues and clients in the McKinney community who will be impacted by the proposed improvements.

We understand and acknowledge that the projected growth of the population for Northern Collin County will require improvements and modifications to the US 380 corridor in order to accommodate for additional traffic. We drive on US 380 almost daily and have certainly seen the exponential growth and increased traffic congestion over the past 16 years that we have lived and worked here. That is why we would like to provide our feedback and comments regarding this important decision that will impact not only our own personal lives but also the lives of our fellow community members.

After reviewing the proposed options we wholeheartedly support the building of SEGMENT B. We believe that the reduced cost for building this option compared to other options, the reduced impact on area businesses, and the avoidance of impact on hazardous waste material sites makes sense.

Should you have questions or if you would like additional information please let us know.

Warmest regards,

Beverly & Glynn Wingard

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: It had been a dream of mine to own land and develop it into a farm that can be beneficial not only to myself and neighbors but also my own town. With so much focus and bene of locally grown food, having a highway going next to the farm won't be good for the organic farming. Also the declining bee population will be affected as I have multiple bee hives. As part of the reservoir of soil conservation, I get migratory birds during winter and have variety of endangered species of fish in the lake that will be affected. Route D or purple would be the most reasonable and least disrupt. I highly urge you to consider those two options.
Sincerely,

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Hello Stephen,
Sounds like you have met lots of our friends and supporters. Really appreciate the visit on site 2 weeks ago so the larger team could understand the unique properties that are at this location.

As you pointed out our home entry would be directly under the freeway and very distasteful to us. But again it hasn't been all about only our home as you know. This unique and beautiful 25 acres we call home is kept in a manner that is appreciative of Texas landscape. The joint use of our property for the enhancement of the ManeGait program is most important to Priscilla and myself. We have 50 year plans for ManeGait to serve the North Texas community of disabled children and adults as well as our veteran community. This piece of land plays a big part of the sensory trail rides and the serenity PTSD patients require.

So, please don't disrupt these adjoining properties that are used for certainly our personal enjoyment but for the healing of so many as we share this property with them.

Peace,

Bill Darling
Co-Founder

Bill Darling, President of the ManeGait Board of Directors
[REDACTED]
[REDACTED]

Hello Stephen,

Thank you and the team for coming out yesterday and identifying your findings in the latest statement made by TXDOT "... found that therapeutic horsemanship centers can function effectively with in a variety of physical and environmental settings " . I personally find this to be a very thinly veiled effort and is absolutely Apples to Oranges in comparison of operations. Tricia Nelson our Executive Director will refute this in detail but we listened and had done our own research on Texas centers near large freeways and found no program with the depth of service, size or inclusion of the overall community like ManeGait offers. We will fight this assertion vigorously and stand up for the protected class of children and adults with disabilities as well as the healing efforts of our veterans. Wedged in between a 6 lane Custer Rd. and a 12 lane freeway does not allow us to serve at this location. So, TXDOT's statement of not impacting ManeGait in 2019 is direct conflict with this new position.

In case it wasn't very clear and we recognize some of our communication references during construction we believe we made your team aware that after construction is just as impactful to our program.

We appreciate the time everyone took to understand the joint use of property and how valuable the trail rides for our disabled clients are in their therapy. They are outdoors in a gorgeous setting receiving needed therapy. ManeGait has used our personal property for 15 years for horse pastures, therapy trail rides, training of therapy horses and donor events to fund the annual budget of \$1,300,000 per year. None of this possible if Rt B is approved.

Please go back to TXDOT's 2019 statement and it's reference to the ADA Act and the Environmental Justice Executive Order 12898 as footnoted in your statement back then. Help us help those that have a hard time helping and speaking for themselves. Reselect Rt A for the region's transportation needs please.

Respectfully,

Bill Darling

Stephen,

For Option A or B, Please select Option B - I travel US 380 every day and the option B would be the best because of all the heavy traffic that currently is on 380 starting at Lake Forest to Coit Rd. The more traffic you can divert off of 380 Lake Forest to Coit the better.

As for Option C or D, I feel Option C would be the best, and help the people of New Hope more. Again, the more traffic you get off of US 380 the Better.

Thank you for your consideration,

NAME/ADDRESS:

COMMENT: How can you possibly consider a move that would endanger the special kids and veterans at ManeGait. Not only would segment B dangerously affect the attention of the riders but the noise factor would be unsettling to the horses that require rest and quiet after each session. I personally have lived well over a block from a major thoroughfare and there is always a noise factor and frequent emergency vehicle activity. ManeGait is about special kids and segment B would be extremely disruptive. I absolutely oppose Segment B.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I have been a homeowner in McKinney for 26 years. I am writing to express my support for the Project 380 Segment-B Bypass option. This option is the least disruptive to businesses with minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380.

I also strongly oppose Segment-A. It should not be considered.

Thank you for your attention.

All the Best,
Bill McMullen

Subject: 380 alignment community input

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Greetings Mr. Endres,

Thank you for taking a moment to read my family's input on the 380 alignment.

As a homeowner and citizen of over 20 years in McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

Greetings
*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Best Regards, Bill Short

Subject: Opposition to U.S. 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

NAME/ADDRESS:

COMMENT:

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations – the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).
- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.
- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.
- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.
- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of Billingsley 380 North, Ltd., I oppose Segment A for the reasons listed below. This partnership owns two major tracts impacted by this proposed loop. The tract this letter is addressing is 201.10 acres of single-family land that can house 663 homes.

Both alignments of the 380 bypass loop cross this property renders it largely undevelopable. The angle of the road, the width of the road, the width of our property and the setbacks needed to be able to build a single-family community all force this conclusion.

Segment B is projected to cost \$589,700,000 in total costs which is \$99,000,000 less than Segment A before the actual takings and before construction during 2022 and 2023 and before acknowledging damage to the balance of the properties beyond the taking itself. We expect these numbers in Segment A to grow in the hundreds of million dollars and in Segment B to grow considerably.

The Billingsley Partnerships in their entirety own 885 acres that are impacted by either Loop A or Loop B and is the single largest property owner in these takings.

We prefer that the 380 bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further we believe that the best alternative to is widen Bloomdale and existing other east west streets and look to the outer loop which will be in service before the 380 bypass can be in service.

Stephen,

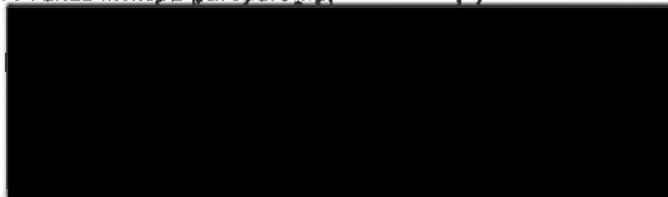

On behalf of Billingsley 380 North Ltd., I oppose Segment A. This partnership owns two major tracts impacted by this proposed loop. The tract this letter is addressing is 247.7 acres.

Segment B is projected to cost \$589,700,000 in total costs which is \$99,000,000 less than Segment A. Based on the value of the Multifamily land we believe the cost of Segment A will be far greater making Segment B more attractive.

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of CB Parkway Business Center XIV, Ltd. I oppose Segment A. Billingsley Company has seven partnerships which are affected by the 380 bypass in either Segment A or Segment B. We are damaged by both routes but the damage by Segment A is far greater and far more expensive for TX Dot. Segment A makes unusable most of our one hundred acres of multifamily property and has large, elevated sections which are both expensive and damaging to the remainder of the property. On the other hand, Segment B goes through single family land which has a lower value and less elevated structures.

We have 885.15 acres that are affected, and our vote would be for Segment B. An alternative would be to widen Bloomdale Road and look to the Outer Loop which will be in operation before the 380 bypass

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of Crow-Billingsley McKinney 380, Ltd., (Baker #1), I oppose Segment A for the reasons listed below.

The Chase at Wilson Creek is a 107.74 acre development for 1780 residential apartments and 4.72 acres for retail development.

The several designs of the 380 bypass as it crosses this property destroys all ability to build on any of the residential land. The freeways appear to have the width of either Central Expressway or 121 and the height approximating the gargantuan expressway interchanges. This cuts the land into pieces unusually shaped and landlocks portions making development not possible.

Residential displacements

Phase 1 of *The Chase at Wilson Creek* will have residents moving in 2023 and all 621 apartments will be available for residents by Q3 2024. This first community will house approximately 1,055 residents. Our development will deliver 1780 units when fully built housing approximately 3,000 residents.

Environmental impact

In addition to the 109.8 acres of wetlands, forest, and prairies and 4,665 feet of streams, and the wildlife mentioned in the TxDOT report, the nature of these forests needs to be addressed. With the alignment being shared overlaid onto our tree survey, it appears that there are 53 large and old trees in the proposed right of way. 31 of these are Heritage trees, many approximating 50 or more feet in height. These are Red Oaks, Pecans, Texas Ash, Cedar Elm and Hickory. Playing fields and barns may be moved and replaced but the oldest group of these trees, according to the Texas Forest Service are 150-200 years old. That is irreplaceable. Photos of these wooded areas are attached. They are not precise to the alignment as it also is not yet precise. This is a forest of grandeur that the public will enjoy for years to come on the Wilson Creek trail.

All freeways are noisy but the loudest are the raised freeways. As you can see in the attached exhibits, this freeway is very tall as it passes through our property in all three directions. With no ground level barriers, the noise is louder and travels further. Additionally, the lights of the traffic impact the adjacent properties. This is part of the reason why the single-family land brokers say that homes cannot be built within 400' of a freeway and even then they are negatively impacted and likely have to have a sound negating window systems.

Cost

The current TxDOT estimated cost for Segment A is \$688,500,000. This however does not include the value of *The Chase at Wilson Creek*. In today's market phase 1 is estimated to have a value of \$203,905,000. And the entire developed site of 1780 units would have a value approximating \$584,463,000. We know costs,

rents and cap rates change constantly thus we cannot predict what the cost would be at the time of taking. Further we know having multi-family zoning is a precious commodity and one that it takes years to obtain.

Alternatives:

We prefer that the 380 bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further we believe that the best alternative to is widen Bloomdale and other existing east west streets. Also important is the fact that the outer loop will be constructed and in use before this bypass is completed.

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of Henry Land Ltd., I oppose Segment A for the reasons listed below. This partnership owns 17 acres of single-family land that can house 56 homes. The alignment of the 380 bypass loop has such a close proximity to this tract as to devalue the quality of homes and the site itself. The traffic noise travels far and wide and denigrates the quality of a neighborhood from the very beginning and throughout its entire existence.

The Billingsley Partnerships in their entirety own 885 acres that are impacted by either Loop A or Loop B and is the single largest property owner in these takings.

We prefer that the 380 bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further we believe that the best alternative to is widen Bloomdale and other existing east west streets including the outer lop which will be in service before the 380 bypass thus lessening its value.

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of University Business Park Phase II, Ltd., I oppose Segment A for the reasons listed below. This partnership owns 49.84 acres of single-family land that can house 164 homes. The alignment of the 380 bypass loop as it crosses this property renders it undevelopable. The angle of the road, the width of the road, and the setbacks needed to be able to build a single-family community all force this conclusion.

TxDOT has considered this site to have a taking of approximately 17.66 acres but we believe the taking will need to be the entirety of the site, thus 49.84 acres. So, the cost factor for this purchase needs to be increased to 282% of the current value.

The Billingsley Partnerships in their entirety own 885 acres that are impacted by either Loop A or Loop B and is the single largest property owner in these takings.

We prefer that the 380 bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further, we believe that the best alternative to is widen Bloomdale and other existing east west streets.

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Stephen,

On behalf of Billingsley Cornell Capital, Ltd., I oppose Segment A for the reasons listed below. This partnership owns 127.44 acres of single-family land that can house 420 homes.

Segment B of the 380 bypass loop crosses this property and renders large portions of the property undevelopable. The noise and freeway light intrusion are major hindrances to the viability of a neighborhood.

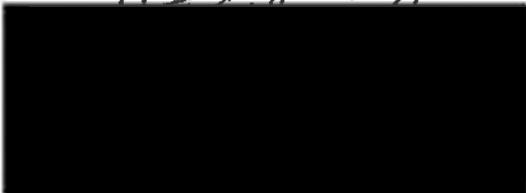

The Billingsley Partnerships in their entirety own 885 acres that are impacted by either Loop A or Loop B and is the single largest property owner in these takings.

We prefer that the 380 bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further we believe that the best alternative to is widen Bloomdale and other existing east west streets and look to the outer loop which will be in service before the 380 bypass can be in service.

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Billy Clay

Blake Hunter
[REDACTED]
[REDACTED]

I strongly oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait, who provides valuable services to needing populations. These vulnerable and protected populations deserve a safe and high quality location to receive the world-class therapy programs at ManeGait. Having a freeway so close to these horses and riders will jeopardize the services and experience. In addition this option would be dangerously close to schools and wetland areas

Bottom line is that this segment B option only expands the 380 issue to other areas of the community to satisfy one group of homeowners (who bought off a highway in the first place). Given that any solution will be disrupting someone's homes and businesses so why not keep 380 on 380 and reduce the impacted area to the highway itself?

Sincerely,

Blake Hunter

Message:

Good Afternoon,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,

Blake Ray

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: I Deeply OPPOSE any and all aspects of consideration of the B-Alignment of the Brown + Gold segment of the 380 Bypass.

Injustice Financially to the Town of Prosper as it negates years of possible tax base.

A Blatant disregard for children/students, as there will be ADVERSE NOISE POLLUTION, DOCUMENTED AIR QUALITY DEGRADATIONS and a plethora of SAFETY HAZARDS to

- A) Founders Academy - Prosper's Only Charter School.
- B) Walnut Grove H.S.
- C) Bloomdale H.S. (#4)
- D) Cockrell Elem.

Developments/Residential + Commercial will be aborted.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

It is clear that the most cost effective proposal is route B.

It has minimal disruption to existing businesses and the earlier rerouting to the north would be advantageous to traffic flow around McKinney for everyone.

Thanks...

Bob Drury

 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Subject: Project 380 Segment-B bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B bypass alignment option.** This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Botaria Enongene

[REDACTED]

We oppose the proposed HWY 380 Segment B for a variety of reasons:

- It threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT and an organization my wife and I support
- It threatens hundreds of existing and future homes that are planned for that side of Prosper
- It conflicts directly with the new Founders Classical Academy that was recently built

We do not understand how this option has been put back for consideration given it was struck down before. This is ridiculous. There is a perfectly good option that has minimal disruption along the existing HWY 380 corridor.

Thank you for your consideration.

Mr. Endres (TXDOT team)

I am a resident in McKinney on [REDACTED] in Stonebridge Ranch.

Not because "not in my backyard" for segment A, but how can one miss the fact the growth between Preston and the proposed cut thru at Ridge (seg A) is about to be huge and the slowdowns west of the seg A are about to be huge.

We support Segment B because it makes the most sense and will "actually bypass" future light that will come across 380 in Prosper, west of Lowes. It is also more cost effective for tax papers.

Thank you for your time

Brandon Strode

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I am against Option B due to many concerns.

① Air quality will be affected to Mansel Blvd which is for people with disabilities. Their rights are protected by the Disability Act and should be considered due to their health issues. Even moving them would be detrimental to their progress.

② Air quality at Saunders Academy & The New High School. I spoke with an air conditioning company (A.C. World) the units used will be bringing in polluted air from the traffic and it flows through intake into the regular systems. Outside air isn't better than inside air. Check for yourself.

③ Lastly, Cooper is a small town and it relies on the future tax revenue from the construction of tax generating properties you will be keeping from being built or destroying.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Steven from TXDot,

I thought they issued a resolution to expand 380 or build the bypass through Tucker Hill which is part of McKinney instead of a bypass running through Prosper and specifically the non-profit Main Gait. Main Gait has provided a resource for much needed therapy and volunteer opportunities for high school kids in the surrounding neighborhoods.

Mayor Fuller is lobbying for the 380 business of McKinney, when they are the ones who benefit financially from the increase in traffic. We ask that TXdot hear our plight and not put the bypass through Prosper option B. It will most definitely cause a decrease in our home values, an increase in air pollution and noise pollution. It will negatively effect the existing schools and the new highschool going in off First street and the non-profit Main Gait.

This is a McKinney issue, a result of poor planning and now they are trying to defer the negative results of this poor planning to Prosper! Many of the people of Prosper were not aware of this possibility when they purchased their homes.

Please keep this highway bypass from going through the town of Prosper and ruining our community.

Thank you,
Whitley Place Prosper Resident

Sir,
My wife and I reside in McKinney. We live in StoneBridge. I have reviewed the map that shows the possible bypass routes, Segment A & B, for 380. It would seem to me that the bypass needs to be extended as far as possible before reconnecting with 380. To be honest, I am disappointed it does not get to the DNT. I would recommend Segment B over Segment A for this reason alone. But, I can also see that Segment A requires 2 near 90 degree change of directions. I know your engineers can design, but that looks very expensive, and could cause for safety issues for drivers. A very gradual merge back to 380 makes more sense.

Thanks,
Brent&Becky Wilson

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Brett

Hello Stephen,

I am writing to express my concern over the potential choice of route A for the planned 380 construction. It seems irresponsible to spend more money, and displace more businesses by choosing this route. The only argument against Route B is from one business that appears to be trying to buy sympathy. Please choose the option that benefits the most people, lower budget, and lower impact.

Thanks for your time,

-Brett

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Brian & Sarah Clark

Subject: 380 Improvements Feedback

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hey Stephen,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Regards,

-Brian

TXDOT Dallas District
Stephen Endres, P.E.
4777 E US Highway 80
Mesquite, TX 75150

Dear Mr. Endres,

I am Brian de la Houssaye of McKinney. I understand TXDOT is receiving considerable input from citizens of Prosper who have moved to eastern Proper to enjoy a pastoral lifestyle. Well, we did the same when we moved to NE McKinney.

The proposed Bypass route opposed by Prosper (Option B) would begin roughly at 380 and Coit and go northeasterly through an area with a few homes already constructed and an area in which a developer has plans to build a number of new homes. The proposed route preferred by Prosper (Option A) would begin roughly at 380 and Stonebridge Parkway and go north past homes and neighborhoods already established in McKinney, cost approximately \$100 million more, together with having to go through a series of close proximity stop lights (Custer, Hilltop and Stonebridge) which would exacerbate the bottleneck issue prompting the bypass in the first place.

It appears the residents of Prosper want a solution that favors a few, punishes the majority, costs more and is not the best solution to relieve the congestion.

The best alternative is Option B. It avoids the most disruption to current residents of either area, costs the least and is the best solution to relieving the congestion along 380.

Respectfully,

A handwritten signature in black ink, appearing to be "Brian de la Houssaye", with a long horizontal stroke extending to the right.

Subject: 380 Bypass Support for Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., ***I strongly SUPPORT the Project 380 Segment-B bypass alignment option.*** This option, I feel, is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. **It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.**

I also strongly oppose Segment-A. As it causes the following:

1. \$99,000,000 more expensive!
2. It will move traffic farther East into McKinney. This causes more noise, pollution and reduces property value.
3. It will remove 17 small businesses off 380 and Custer!
4. We don't need an overpass over Stonebridge Drive and Custer Road OR installation of water pipes over 380.
5. A large interchange to be constructed at the intersection of Segment-A and 380. This will potentially depress home values!

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Hello,
I'm double-checking the city of McKinney's numbers that plan A will cost \$98M more than plan B.

I've looked everywhere on the documentation about it and I can't find anything that goes over costs. I've seen the schematics, I've seen the public hearing information, etc.

Do you know where those costs are on your site?

Thank you for your help,

Subject: 380 Bypass- strongly support SEGMENT B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should NOT be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your consideration.

Best,

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Brody Starks and Katie Starks

Subject: Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

I want to state my opposition to Segment B because it threatens key community resources. The fact that in 2020 the ManeGait area was seen as a valuable community reassured by TxDOT needs to be remembered. I know there are hard decisions to be made but I firmly believe that 380 should stay on 380 or move way further north.

Thanks,
Brooke Green

Subject: Input from US380 Project Public Meeting (Tuesday, March 22nd) - Proposal B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

After attending the meeting at Collin College, we are very disappointed that TXDOT is still considering the Route B option to put a major 8-lane bypass through Prosper, Texas; a small, 23 square mile residential community of upscale homes, schools, and ranches. The Town of Prosper has done a great job planning for its past, present and future development, with 380 staying on 380; and Route B would cause devastation to the community's prior planning and the safety/security of this community and its residents.

Proposal B:

This proposal would put an 8-lane freeway with frontage roads, merging with the current US 380 on the southeast corner of Prosper. This proposal represents a **significant** impact for Prosper, displacing residential and commercial properties on a major portion of the city's eastern gateway. The Town of Prosper and my family are opposed to this plan and continue to support planned current/future developments accordingly to the "keep 380 on 380" goal **throughout Prosper's jurisdiction.**

Proposal B of the proposed Gold/Brown alignment poses a significant impact to both existing **and future** residential and commercial developments planned within the Town of Prosper,

> This alignment would directly impact over 360 future homes and thousands of residents, and indirectly impact many more,

> This alignment will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG),

> This alignment runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus utilizing the planned, existing alignment within Prosper town limits,

> This alignment has a detrimental effect on ManeGait Therapeutic Horsemanship: a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities,

> This alignment is in close proximity to existing and future schools (including a high school), impacting student safety (motor vehicle and personal),

> This alignment would negate/void the planning performed by the Town of Prosper for future expansion of US 380 within town boundaries, affecting resident home values and effectively separating the southeast corner of Prosper from the remainder of the town.

We would request that TxDOT **not** ask the Town of Prosper to **modify its plans** for expansion of US 380 and **bear the associated safety/financial impacts**, to accommodate a lack of planning on the part of McKinney (to reserve sufficient right of way/space to accommodate expansion of US 380 on its current "footprint").

Respectfully,

Bruce and Jill Blackmon

To: Stephen Endres
Subject: Opposition to US HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres;

First, let me say I have been a resident of Prosper since 2012, and a volunteer at Mane Gait Therapeutic Horsemanship since 2013.

It is my understanding that early in the process of exploring where the proposed bypass/expansion of US HWY 380 should go (2020 US 380 Collin County Feasibility Study), Mane Gait was identified by TxDOT to be a “Key Community Resource” serving two protected status populations – the disabled and children. Due to this, TxDOT removed from consideration any alignment that impacted Mane Gait’s daily operations. More recently, a new “Segment B” was added to consideration which appears to violate the Americans with Disabilities Act and Executive Order 12898 on Environmental Justice.

It is unsafe and unreasonable for disabled riders and their therapy horses to work 60+ hours a week in close proximity to construction and operation of a major highway. The vulnerable and protected populations served deserve a safe, high quality, easily accessible location to receive beneficial therapy programs at Mane Gait. TxDOT reportedly interviewed similar horsemanship facilities, and from that claimed the proposed highway does not pose a problem for operations. It is doubtful any facilities were located near a major highway.

The alignment of Segment B will also detrimentally affect several schools in Prosper, and negatively affect the tax base and tax revenue of both the Town of Prosper and the Prosper Independent School District. It also poses a significant negative impact to existing and future residential and commercial developments planned within Prosper. This will disproportionately affect a smaller community’s tax base (as compared to the tax base of cities impacted by other alternatives).

The Town of Prosper made planning decisions many years ago to be able to keep the current alignment of US 380 where it currently is through the Town limits. Prosper should not have to bear the effects of a neighboring city’s (McKinney) lack of planning.

Sincerely,

Bruce Mueller

Subject: Hi Stephen, vote of support for Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

Thanks for taking a second to review my vote of approval for Project 380 Segment-B.

I have lived in McKinney in Stonebridge for 8 years. As mentioned, I do strongly approve Project 380 Segment-B. I feel this option is the least disruptive to existing businesses and people whose homes are along 380. And given that this option is approximately \$99 million less than segment-A, it only makes sense to move forward with Segment-B.

Segment-A is bad for several reasons:

- It eliminates or removes at least 17 small businesses west of the 380 and Custer intersection on the North side
- As mentioned, it costs approximately \$99 million more
- It will create an overpass on 380 over Stonebridge Drive and Custer, and no one wants that
- It will lead to other major construction pipes and infrastructure over 380
- It will negatively impact property values for all homes near Segment-A along 380

Segment-B is the BEST option, and would limit the intrusion into existing businesses and homeowners lives. This positive option has a much lower chance of TxDOT being involved in unwanted litigation due to the construction, lowered property values, and displaced businesses, than segment-A.

Thank you for your consideration in this matter and logging my vote in support of Project 380 Segment-B.

Have a great week.

Many families and their special kids depend on the difference making therapy at ManeGait. The construction and the after completion noise factors would be terribly disruptive and dangerous for it's riders and therapy horses. Shame on Txdot for pursuing 380 segment B and going back on your previous decision. It would be devastating on the activities at ManeGate. I oppose Segment b.

To: Stephen Endres
Subject: Vote for Option B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

1. Option B is almost \$100 million cheaper, but importantly, uses less materials (cement/steel) and cars/trucks travel less distance, creating less pollution.
2. To me, there is no comparison to the soft impact Option B has to the environment, residents and 0 businesses invested in the area.

Please choose OPTION B for less impact on our community.

Sincerely,
C. Denise McMillan
[REDACTED]

I am writing regarding proposed segment B option for expansion of US 380 in the Collin County. Segment B is an inequitable option for the Town of Prosper and its residents, businesses, and charitable organizations. Segment A is the vastly superior choice if a 380 bypass is needed.

The town of Prosper and its residents are strongly opposed to segment B. Segment B would do considerable harm to the Town of Prosper. For example, the proposed segment would displace a senior living community in development, go through other residential neighborhoods in development, pass in extremely close proximity to two schools and potential future schools, and impact many businesses along the proposed segment. In addition, ManeGait, an organization that provides therapy for children and adults with disabilities via the healing power of horses would be absolutely devastated. This proposed segment would run right up to the property of ManeGait, causing dire consequences for the charitable organization.

As a result, Prosper's development plan would be completely ruined. In addition, there would be severe economic hardships on the town. The tax revenues for the town (and Prosper ISD) would be severely diminished. Also, the Town of Prosper would have to pay for the policing and safety of that segment, with lower revenues.

Many residents also moved to the area directly affected by segment B to be away from the 380. This is especially the case when segment A was chosen a year and a half ago, giving current residents of Prosper the confidence to move into the neighborhoods that would be affected by segment B. Segment B seems even more inequitable when considering the potential conflict of interest by a local judge who is promoting that segment.

Given the harm to Prosper's future economic growth, the additional safety costs, the displacement of needed housing, the proximity to schools, the absolutely devastating effects on a wonderful therapeutic and charitable organization, segment B would be nothing short of a disaster for the Town of Prosper. If a 380 bypass is needed, segment A is the only logical choice.

Thank you for your consideration.

Subject: HWY 380 - OPPOSE Option A (support option B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a young adult living in and planning to raise a family in McKinney, TX, I **strongly SUPPORT the Project 380 Segment-B** (over option A) bypass alignment, and vehemently oppose option A.

Option B is the least disruptive to businesses with minimal displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I am shocked that TxDOT would overspend \$99 million to destroy the "Unique by Nature" look and feel of our beloved McKinney when there are clearly better options.

Additionally, I am shocked these are the only options to choose from when there's more open land further west and north. Why can't the bypass start west of Cross Roads and go north of the established towns and tie into 380 east of Princeton. Starting east of Coit Rd. is already too late. It needs to start further west because of the traffic increase.

I strongly **oppose Segment-A**. It should not be considered for the following reasons:

*It does NOT MEET the criteria of reducing accidents in already busy intersections. The intersection of Custer and 380 has many "near collisions" that go unreported. As the area grows, it is vital that TxDOT understands adding more burden between Coit and Stonebridge is unthinkable and irresponsible.

*Option A does NOT MEET the criteria to manage congestion. The congestion between Custer and Stonebridge is already increasing which option A will negatively impact. Option A would be a mis-management of congestion.

*Option A does NOT MEET the criteria to improve east-west mobility. The time saved for commuters between Stonebridge and 75 will only amount to about 15 minutes which should not qualify as significantly improving east-west mobility.

*Option A does NOT MEET the criteria to improve safety. By increasing traffic flow to Stonebridge which many will use as a "short-cut" instead of Custer, the safety of Stonebridge Drive will be significantly decreased for the families that daily walk and ride bikes along the beautiful pathways. There is a school zone where children's lives are at stake.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

Segment B is the best option to improve traffic flow and safety in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Caleb Madsen

Comments:

I live in Sucker Hill and Segment A would affect my neighborhood and the value of all our homes in Sucker Hill. Seg. A would pass directly in front of our neighborhood and loop up along our eastern property line. The value of our homes will be directly affected and with the noise pollution, air pollution as well. Another affect that we had no idea would happen is that with Seg A we would no longer be able to exit left out of our neighborhood. We would have to turn right drive a mile and make a U-turn. I am pleading with you to go with Segment B to avoid this direct negative impact on our community.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community. Many thanks for your consideration,
Candice Heinisch

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am a resident of Lakewood at Brookhollow in Prosper, TX, and am opposed to the Proposed B Option of the TXDOT plan for the US 380 bypass around McKinney. This Option B would greatly affect our property values since it would come within less than a half a mile from our residence. It would also limit our entrance/exit from our development to westbound only with no option to turn eastbound. I think the option A would be a better plan since this has been an issue for McKinney and not Prosper and should not penalize Prosper residents for poor longterm planning on McKinney's part. Option A would solve this traffic issue and keep the bypass in McKinney.

Regards,

Carlton Kupp

Subject: Opposition to HWY 380 Segment B

Dear Mr. Endress:

I am opposed to the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, including children and the disabled, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at [ManeGait](#). This organization was founded by my college friend Priscilla Darling, along with her family. They are passionate about their mission and have served countless children, families and veterans in the area.

I am asking TxDOT to reconsider this action. There is huge opposition to this in Collin County. Although I now live in Houston, my family is all in the Dallas area, along with many high school and college friends. I'm sure there is an alternative that is respectful of the constituents in this area.

Thank you.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I thank you for sharing the various alignments. In the past, FM roads cross a street were made for a better perspective. Including more specific location would have been helpful since our property is located off of 1827 (FM). Thank you for 1827 the new 380 by pass will end.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

- It is unreasonable and unsafe for 150 disabled riders and their horses to work 60 hours a week with the sounds, emissions, and vibrations of construction for 3-4 years.
- In the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway/traffic equivalent to US HWY 75 towering over them and their therapy horse.
- Segment B will also result in land acquisition from property that is regularly used to support ManeGait's operations.

Good Afternoon,

I am writing in opposition to the proposed Hwy 380 segment B. This threatens the daily services and special events of ManeGait.

Mane Gait is a key community resource as identified by TxDOT. They provide services to children and those with physical disabilities. These vulnerable and protected populations, deserve a safe, high quality, and easily accessible location to receive world-class therapy programs at ManeGait.

I have known many families who have been positively impacted by MainGait, and it would be a tragedy to put their therapy programs at risk. As a lifelong horsewoman, I can tell you that it would be very dangerous to have horses subjected to construction and highway noise. This could cause a flight response from the horse, which then could result in significant injury (fall risk) to already vulnerable, and at risk individuals. As a health care provider, I have seen first hand how equestrian therapy can positively impact those with medical issues and/or disabilities.

I urge you to place the highway in another location where ManeGait will not be affected, so they can continue to provide life changing services to vulnerable populations.

Thank you for your time.

Sincerely,

Carol M. Watson, MPA, PA-C

Subject: Project 380 /Segment-B Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

COMMENT:

We have been avid supporters of Mane Gait since from before it began. We have seen hundreds and hundreds of lives changed through the riding center. Not just the lives of the children and adults with disabilities, or the courageous men and women who have faithfully served our country in the Armed Forces, but the volunteers, the surrounding communities, the churches, and the organizations that have had the privilege of being a part of the healing that happens at Mane Gait. The current location of Mane Gait is paramount to the ability to provide services and healing to the vulnerable population it serves. I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Subject: Opposition to HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I oppose all of the US HWY 380 proposal that runs through Prosper, specifically Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT.

Really, this whole proposal is ridiculous. It will displace numerous families and businesses, and will wreck property values across the area. Prosper residents should not pay for the failure of other cities and governing bodies to properly plan for expansion. This is a tough situation, but TxDot needs to come up with a more creative solution than running 380 through established communities with no regard for the families living and working there.

Please keep 380 on 380.

Subject: Project 380 Bypass route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I am a nurse and have lived in my home which faces [REDACTED] for 19 years. Being single, I love my neighborhood and have felt safe here for many years. I am very concerned about the upcoming development of the 380 Bypass.

PLEASE know that Option B is the best option for many reasons:

This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380. **This is the part that worries me the most!**
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

On April 10, 2022, the Dallas Morning News published a front-page article about the Project 380 bypass route. The article, focused on ManeGait, was well written but poorly researched as it only told half of the story. In the interest of fairness and complete reporting, the other side of the story should be told. These are the facts that were not reported:

There was no mention of the fact that back in 2019, the City of McKinney offered to acquire the current ManeGait property and move it to a newly constructed facility at no cost to ManeGait. They refused to consider this option even though they now say they may have to move and build a new facility. Interestingly, in the last few years, ManeGait was the recipient of several hundred thousand dollars from City of McKinney grant programs. Neither of those items were covered in the article.

Further, TxDOT has researched stakeholder concerns including those expressed by ManeGait. TxDOT updated Segment-B so that none of the ManeGait property is taken. **TxDOT even researched other similar facilities in the**

state of Texas and found no ManeGait operational issues should be expected. That was not mentioned in the article.

There was no discussion of the **seventeen businesses that will be destroyed if Segment-A is built versus none if Segment-B is built**. The businesses to be destroyed are located on the North Side of 380 on both sides of Custer Road and the number will grow since more businesses are under construction today. **Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a currently heavily developed area in McKinney**. In McKinney's Tucker Hill, businesses that front on 380 also will also be impacted. Was there any discussion with any of these business owners?

The cost of Segment B is \$99 million LESS than Segment-A.

There was no reporting on the impact to Kensington Village which is directly in front of where the proposed Segment-A would enter 380. The proposed Segment-A interchange would greatly increase noise and pollution in that SRCA neighborhood potentially affecting the enjoyment and value of their homes. Were any of those property owners contacted for comment?

There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B will have minimal impact on homes and businesses.

Mr. Endres, please consider me and how Segment A will affect me. I am so close to retirement and would love to stay in my home, so please approve Segment B.

Thank you for your time,

*Sincerely,
Cathy Bebee*

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. Please do not, by any means, interrupt the operations of this invaluable service provided to our most vulnerable individuals.

Sincerely,

Cathy Cheatham

Suggested Wording for US 380 Comment Form

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the

also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

- *The cost of Segment-A is \$99 million more than Segment-B.

- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.

- *It will also cause the installation of water pipes (ducts) over 380.

- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres. Please consider the consequences of the proposed Segment B on the community of Prosper. First and foremost is the devastating impact on ManeGait. Then the elimination of almost 200 homes being built for seniors like myself. Also the prevention of almost 300 beautiful homes planned along the lake and creek and the apartments planned on 380 all which are directly in the proposed path of Segment B.

Prosper planned for the expansion of 380 on 380 and that is where it should stay. TXDoT initially approved Segment A before succumbing to political pressure to add Segment B for consideration. Please keep 380 on 380 thru Prosper by denying Segment B.

Thanks.

NAME/ADDRESS:
Charlie Weinberger

[REDACTED]
[REDACTED]

COMMENT:

I oppose the proposed HWY 380 Segment A; it threatens the value and daily quality of life of dozens of residential neighborhoods, businesses, nearby elementary schools and residents of all ages.

The additional traffic, noise, pollution and emissions will have a direct negative impact on all nearby residents far into the future. Negative impact on property values is a real concern, too.

Adjacent homes were built 20+ years ago as part of a planned HOA community with green spaces and community gathering areas. While growth and change is inevitable, a massive, elevated, multilane freeway looming overhead, and a greatly-widened local street (Stonebridge Drive) was never a consideration. These green spaces are essential to a healthy community, literally and figuratively.

Option B costs \$99 million less than Option A and is much less disruptive to current businesses and homes. Respectfully asking, how is Option A still in the running?

Thank you for considering your fellow Texas citizens.

Sincerely,

[REDACTED]

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Charmyne Crowe

Subject: Project 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon, Mr. Endres,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option.

There are many opinions about which option, A or B is best. And you will undoubtedly hear from many people, I hope that TXDOT will consider the facts and not the number of voices heard one way or the other. And the facts are indisputable.

Option B option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

Subject: Concerned McKinney Citizens & Stonebridge Ranch Residents - Supports Project 380 - Option B Bypass Route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

We have been residents of McKinney for more than 18 years and purchased our home in Stonebridge Ranch in 2011. The village we live in is Wren Creek, which backs up to 380 (.5 mile away) and runs parallel to [REDACTED].

One of the main reasons we purchased this home is because Stonebridge Ranch is a master-planned community and because our neighborhood is across the street from Wilmeth Elementary School (La Cima Drive and Stonebridge Drive) also about .5 miles from 380.

Our son has attended Wilmeth Elementary for all five years and has walked and biked to school during the early fall/spring. We can't imagine other kiddos in Stonebridge Ranch, specifically in Wren Creek or surrounding neighborhoods will be able to walk/bike to school if Project 380 - Option A is passed. Having the ability to walk to school enables our family to meet neighbors, build friendships, get exercise, and have a sense of comradery in our community.

Also, several small business owners live in our neighborhood and they frequently support Spirit Nights at our elementary school and other community events. Many of them managed to survive running independent businesses/restaurants during a C-19 pandemic and do not need to be impacted by the expansion of 380. In fact, it was brought to my attention that if Option A is selected more than 17 small businesses will be lost in McKinney. I encourage you to visit 11/17 or EJ Willis Gastro Pub to speak with them directly.

There are not many communities that invest in their community like Stonebridge Ranch does. Please think of the future elementary students and their parents and surrounding neighborhoods that will not have the ability to walk their kids to school, meet their neighbors and enjoy common grounds if Option A is chosen. I am sending you this email as an advocate for future McKinney residents to enjoy the same quality of life that we have today.

Beyond the lifestyle and businesses I mentioned above, there are other reasons to not select Option A

- Increased traffic, pollution, noise
- Decreased home values
- An overpass at 380/Custer/Stonebridge
- Required installation of water pipes over 380/Custer/Stonebridge
- And many more...

I ask you to please select Option B Bypass for the 380 expansion project as it is the best option to improve traffic in our corridor while also ensuring the economic and preservation of our community in Stonebridge Ranch.

Thank you for your time and consideration,

Chris & Makenzie Blythe

Subject: RE: US 380 Plan B proposal

Sure.

I'm curious what other determining factors need to be considered in determining the bypass route? Also, what is the earliest date that this project would break ground?

We have to consider all the items in the matrix qualitatively when making a decision. Different factors become deciding factor in in different studies. We have not made a decision at this time.
3 to 4 years would be the earliest.

If I need to share my feedback through another outlet or survey assuming public input is being accepted could you please send me that information?

Any method, comment form, email, mail or voicemail is accepted for comments.

Subject: US 380 Plan B proposal

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I live in the Stonebridge Ranch Community (Wren Creek) just south of Stonebridge and 380. I am in support of the Plan B Proposal for the 380 bypass addition.

I've lived in McKinney for 12 years now and witnessed first hand the surrounding areas grow and frankly I'm very proud of the economic development. That said my family moved to the Stonebridge Ranch Community HOA for several reasons most notably was stability. It stands to reason that a major project like this should consider the size and scale of the impact it will have on the largest population of citizens. The Stonebridge Ranch HOA alone has a larger population than the entire Town of Prosper. In addition the existing infrastructure in Mckinney was in place long before Prosper was really even established as a town. To that point Route B seemingly makes sense as it impacts a smaller population and far less established businesses.

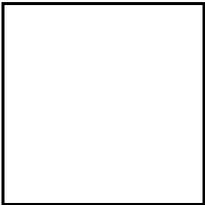

Please note the vast majority of children that live in my immediate community account for the majority of the student body of Cockrell Middle School and their route is Stonebridge to 380. In addition to that an equal amount of 16-18 year

olds drive themselves to Mckinney North Highschool using that same route. As a father of a pre teen and a 13 year old daughter I hope you can appreciate my concern if Plan A was approved.

I also understand the expense of Route B is 100 million dollars cheaper which seemingly makes good business sense. I'm curious what other determining factors need to be considered in determining the bypass route? Also, what is the earliest date that this project would break ground?

My family at [REDACTED] in Mckinney supports the US 380 Route B proposal and we are very much opposed to the Route A proposal. If I need to share my feedback through another outlet or survey assuming public input is being accepted could you please send me that information?

Thanks in advance for your response.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres:

I'm writing to express my opposition to the segment B option for 380. We recently spent a lot of money building a beautiful new home in Prosper set back a bit from the existing 380. If you go ahead with segment B, 380 will be considerably closer to my home and subdivision. Please reconsider this option and go with segment A.

Sincerely,

Chris Doyle

Subject: Hwy 380 EIS project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

Thank you for allowing comments on this project. I am a Prosper Resident that owns a home extremely close to the proposed "Bi-Pass" going through Prosper near [REDACTED]. For the record, I would like to comment that we need to "Keep 380 ON 380". I purchased my home years ago and bought in this area since I was north of 380 a long distance, as not to harm my property value due to proximity from Hwy 380. The people in McKinney in Stonebridge Ranch and Tucker Hill KNEW they were buying homes close to a major highway, but now they want to put a Bi-Pass in my back yard. I Strongly object and will do Everything in my power to stop this By-Pass from coming through Prosper at ANY point.

My understanding is that there is a gentleman who is a high-ranking government official living in Tucker Hill who want to keep this proposal alive. I thought this issue was decided some time ago, but I believe this one person is keeping this alive. He should have bought his home further away from Hwy 380 like I did many years ago. I know the City of Prosper has opposed this Bi-Pass from the beginning, and Every Prosper resident that I know refuses to allow this to happen. We ask for your good solid Common Sense to make this decision. People who purchased their home within 1/8 of a mile from a major highway should not be allowed to destroy My property value because they do not like a proposed highway change. I ask for your justice in making this decision and appreciate the opportunity for my input.

Best regards,

Chris Dugas

Subject: HWY 380 Alignment Comments

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

- *The cost of Segment-A is \$99 million more than Segment-B.

- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.

- *It will also cause the installation of water pipes (ducts) over 380.

- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

COMMENT:

Your research concerning ManeGait was fallible. No other PATH Premier Accredited center in Texas the size of ManeGait is located within 50-100 ft of a highway, and none have operated next to a 3- to 4-year highway construction project.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations, namely the disabled and children, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I also oppose this newly presented Segment B because of too close proximity to the newly opened Founder's Academy school to protect the children attending there and anywhere that encroaches in the Town of Prosper.

Thank you,

Christa Platt

Prosper land mass is not nearly as big as McKinney, Frisco and other surrounding areas. This is detrimental and egregious to put this on such a small town. McKinney should carry the weight.

Subject: US 380 Bypass Alignment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres;

As a homeowner and citizen of McKinney, TX **I STRONGLY SUPPORT the the Project 380 Segment B** bypass alignment option. This option is the least disruptive to business with no displacement, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 when compared to the cost of the Segment A alignment.

I strongly oppose Segment- A. It should not be considered for the following reasons:

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. The cost of Segment-A is \$99 million more than Segment-B. This alone should be enough to choose Segment A.
3. It will create an over pass on 380 over Stonebridge Drive and Custer Road.
4. It will cause the installation of water pipes ducts) over Hwy 380.
5. It will decrease traffic safety and increase traffic on Stonebridge neighborhood street arterial to Hwy. 380 such as Stonebridge Dr. Ridge Road and Lake Forest Dr., increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
6. It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
7. Hwy 380 as it exists will be demolished and moved North to be rebuilt to the South side of the new access road will be in the same location as the existing 380 is today.
8. Segment B is the best option to improve traffic in our corridor while also preserving the economic business and residential vibrancy of our community.
9. TX Dot's own study proved that the noise factor would not affect the therapeutic quality at Main Gate the horse farm as has been argued by others to support Segment A.
10. Selecting Segment A will create lengthy road closures for getting our kids to school at Cockrill Middle School, McKinney North & Boyd High School or teenagers there.
11. Segment A could result in traffic delays from Stonebridge Dr. when in need of ambulance or emergency travel to Baylor, Scott and White Hospital.
12. Having major detour traffic rerouted through our neighborhoods could affect pick up of our kids from Wilmeth Elementary.

I urge you to Select and Support the Segment B choice!

Concerned Stonebridge Ranch Citizen,

Christine Cawood

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I am for keeping 380 on 380 through Prosper. Custer Rd/West should stay on current alignment that has been planned for ~~FM~~ by Prosper.

The town has been opposed to B.

B will impact residents, businesses & school children.

B will impact ManGait - special needs facility.

Keep 380 on 380 through Prosper.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

To: Stephen Endres
Subject: Support of Project 380 Segment - B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Enders,

I have lived off US 380 for the last 13 years and I've seen the traffic levels and commute time increase until it has become unbearable. Last year I moved to McKinney to get off 380. Now as a resident of McKinney, TX that lives just south of Custer Road, these proposed changes will affect me daily. This is why I strongly SUPPORT the Project 380 Segment-B bypass alignment.

This alignment will be much more cost efficient and it will be the least disruptive to businesses in our area. There will also be minimal impact on existing homes and families living in the neighbors along US 380. This is a great area to live in and we are begging you to keep this way.

Thank you for your consideration in this matter.

Thanks,

Christy Erpelding

To: Stephen Endres
Subject: HWY 380 Bypass Project, McKinney -- YES to SEGMENT B Plan.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a Texas voter and resident of McKinney, I would like to register my strong **APPROVAL for the building of the SEGMENT B Plan** of the HWY 380 bypass project being constructed through the McKinney area. Choosing the SEGMENT B plan will cost Texas taxpayers far less, and be far less disruptive to both current residents and existing businesses that live and operate along HWY 380.

I strongly DISAPPROVE of the SEGMENT A plan, which represents a disregard for the residents and businesses affected by that route of construction. Such a disruption will be remembered and duly noted in the next state elections by the many (and growing number of) people who reside in the affected areas of McKinney.

Thank you for your consideration.

Regards,

Chuck Davis

Subject: US 380 Public Comment: Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good evening Mr. Endres,

Let me first start off by thanking TxDOT and those involved with the continued analysis for the US 380 Project Expansion. As TxDOT is well aware, US 380 sees a significant amount of traffic daily through the McKinney area and a solution is necessary.

I am a homeowner within the Stonebridge community located at Stonebridge Drive and US 380. I recognize that neither Option A or Option B may be ideal options and potentially there are other solutions. However, **I would strongly SUPPORT the Project 380 Segment-B** bypass alignment option over Segment-A.

Our family will be directly effected by the Segment-A bypass option. Daily our kids travel along US 380 to McKinney North High School and Cockrill Middle School. During the estimated construction timeline, we will have 3 student drivers traversing the construction area daily. I am concerned with a potential decrease in traffic safety and an increase of traffic on Stonebridge neighborhood streets such as Stonebridge Drive, Ridge Road and Lake Forest Drive. This will result in increased traffic, road noise, and vehicle tailpipe emissions in our neighborhoods.

I recognize that Segment-B bypass may not be the ideal option, but this option is the least disruptive to businesses with no displacements, and has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Segment-B bypass is also the least disruptive to the current flow of traffic on US 380 during the construction phase. Segment-B bypass is a lower cost option by nearly \$99 million (MM) when compared to the cost of the Segment-A alignment.

\$99MM is a significant amount of tax-dollars required for an option which has significant downsides. This is a component which should not be overlooked when making the final decision. As with all Federal regulatory programs, an economic cost assessment must be performed. The cost benefit analysis takes into account the social impact as well as the environmental impact. Segment-A is unfavorable in an economic cost assessment as well as an environmental impact.

In regards to the environmental impact, Segment-B bypass has a lower impact as presented in the Segment Analysis Matrix by TxDOT with less total linear feet of rivers/streams impacted (2,813 ft), significantly less forest land (32 acres) removed providing a higher CO2 reduction impact versus grassland, and a slightly lower acreage of wetland effected.

Segment-B looks to the future growth of north Texas and eliminates the routing of traffic back into a highly congested, fully developed area. Routing Segment-B as proposed, provides direct routing for future developments to access the DNT.

I would strongly SUPPORT the Project 380 Segment-B bypass alignment option over Segment-A.

It is not apparent whether or not TxDOT has considered moving the project even further north to the Collin County outer loop, eliminating the need to expand US 380 to the levels proposed. Pulling traffic north and connecting US 75 with DNT and potentially I-35 could shift traffic off of US 380. These projects should not be assessed in isolation but rather considered jointly.

Thank you for your consideration in this matter.

Sincerely,

Cinda Lohmann, PE

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I support Option A. Any other option that goes through Prosper will have a negative impact on environment. Option B would displace a much needed affordable community and adversely impact a protected class -
Any option other than A would bisect Founders Academy.
Option B is in direct conflict with the air quality guidelines.

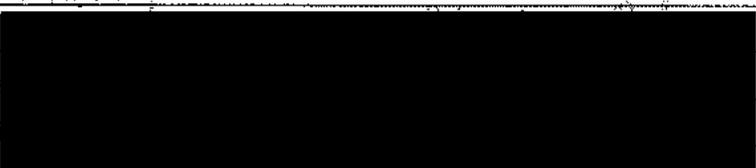

Please choose option A - Any other option has a negative impact on my Prosper community.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

I'm reaching out in regards to the HWY 380 Segment B proposal.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I personally know the family that owns this sacred operation and would like to add that should this segment be approved, the negative effects on the community will spread severely. These are good good people doing the work that MATTERS & means the world to so many vulnerable families. Without this facility, (and it's clear they will not be able to function should the segment be approved), so many with people with little to no voice in this world, will suffer greatly.

While it may not seem like a personal decision, it absolutely will be to these precious people. I urge you to take a look at some of the stories of families upon families that have been changed due to Mangaits services.

Thank you,

Claire Hollek

Subject: Project 380 Support for B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B**bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Clarke Drummond

Subject: Matt Shaheen's letter regarding 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I just read the letter written by this guy and have to say that it sure sounds like a politician with direct ties to developers. I bet if we look into his campaign finances we'll find that to be the case.

The bottom line on 380 A vs B is the EXISTING homes and communities impacted. They are complaining about open land being used and the loss in value with segment B, and one horse stable that can be moved to Pilot Point. I've lived here for a long time and this is the first time I've ever heard of the horse place.

The traffic that would be generated by trying to modify the existing lanes of 380 and putting high speed traffic and 30' overpasses on top of thousands of existing homes makes absolutely no sense. I'm sorry that Prosper envisions themselves as this premium retirement community, but those homes have not been built. People are not living on or near segment B. Moving 5 families impacts 10-20 people, but building down the throat of multiple existing communities impacts tens of thousands of people.

The developers in Prosper will still make money. Once that property is re-zoned it will be worth a fortune for commercial development. They just don't want to wait for that to play out and are trying to tip the scale in their favor by campaigning against the obvious right choice, to run the bypass on the proposed segment B.

Thanks
Claude West

As a parent of a child who utilizes Mane Gait, I hope you are listening to the feedback and how the expansion recommendations will negatively impact this program.

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations – the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).
- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.
- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.
- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.
- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Subject: You have my support for Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 **Segment-B bypass alignment option**. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for considering my feedback.

Sincerely,

Claudine Binando

Dear Mr. Endres,

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. In the 23 years that I have lived in McKinney, ManeGait has stood out as an irreplaceable service organization to this community and the vulnerable and protected populations that they serve. These populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. Thank you for your consideration of this strongly held conviction.

Sincerely,
Clint Leffingwell

Dear Mr. Endres,

I am writing to voice my strong opposition to the proposed HW 380 Segment B realignment option provided by TxDOT. Below are my reasons for opposition that I hope you will take into account, along with the other residents of Prosper who oppose this realignment option. I sincerely hope that TxDOT will take into account ALL the impacts of the 380 expansion and not only which option will keep traffic moving fastest.

1. The realignment has already been studied, reviewed, and discussed with the clear determination that Option A is the best route with the least impact financially and environmentally and has the least impact to the communities effected.
2. Prosper should not have to suffer economic or other negative outcomes due to Mckinney's poor planning. Prosper has long accounted for the expansion of 380 and made conscious decisions and efforts with this in mind. All these decisions have been made to keep 380 on 380. Please keep Mckinney's problems in Mckinney.
3. Option B would divide the town of Prosper. It would destroy several housing communities currently under construction that lie directly in the path of Option B. It would negatively impact Founder's Academy School and place those children in danger of air quality issues, noise pollution, and dangerous traffic due to this school not owning their own busses and requiring parents to pick up and drop off all their students. Again, these areas were planned long ago to be away from and safe from 380 expansion in Prosper city limits.
4. Option B would have a huge negative impact on the city of Prosper's tax base. Again, Mckinney's lack of foresight and planning should not impact Prosper's economic outcomes.
5. Due to our smaller size, it is easy to say that Option B would impact less people compared to Mckinney. I would argue the opposite. It may impact less total people, but will impact a much larger percentage of Prosper and its citizens compared to Mckinney. Due to Prosper's small size, removal of those lands for Option B and removing the planned communities and business that would have been there has a much larger impact on our overall economic strategy and tax base. It will have a larger impact percentage-wise compared to a city with a greater footprint and populace, such as Mckinney, that can better absorb such an impact.
6. Option B would endanger and destroy the facilities, land and abilities of ManeGait Therapeutic Horse Ranch and prevent the invaluable services of those who need it most. I personally have been involved with ManeGait for 5 years and have first hand seen the positive impacts this facility has in the lives of children, the disabled, and veterans with disabilities. This facility has world class facilities and treatment programs aimed to help those that have served us and those that are most in need. Contrary to TxDOT's recommendation, forty-five feet of distance between a highway as large as US75 and the facility will not

allow services to continue at ManeGait. This is not someone's backyard project who owns horses for fun. I encourage you to tour their facility if you have not already done so.

Thank you for your time and hopefully your strong consideration of these points.

Sincerely,

Clint Moss MD

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Clint Ory

Mr. Endres:

My wife and I live at [REDACTED]. We have been residents of McKinney, Tucker Hill since May, 2014. As homeowners and citizens of McKinney, Texas, **we both strongly support the Project 380 Segment-B** bypass alignment option. This option in our opinion is the least disruptive option to businesses with no displacements, minimal impact on existing homes and families living in the neighborhoods along and adjacent to US 380. It is also the least expensive option when compared to the cost of the Segment-A alignment. And, these are the specific reasons Segment-A option should not be considered:

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. It will create an overpass on 380 over Stonebridge Dr. and Custer Rd.
3. It will cause the installation of water pipes (ducts) over 380
4. It will decrease traffic safety and increase traffic on Stonebridge Dr., Ridge Road and Lake Forest Dr. increasing traffic, noise, pollution and reducing our property values during construction since these roads are the only roads leading South from 380.
5. It will also cause a large interchange to be constructed at the Intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 today.
7. The cost of Segment-A is \$99 million more than Segment-B.

All of this to say, Segment-B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community. We ask that you please consider all of our thoughts and choose Segment B bypass alignment option.

Very truly yours,

Clyde A. Seitz and Lynda C. Seitz

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: We need Segment A. Keep 380 on 380.

Segment B is clearly the route that has the most negative impact. Segment B runs right thru the only senior housing project under construction in Prosper. It also runs immediately adjacent to 2 schools, and 3 residential neighborhoods, a cemetery, and a Massage Coit Therapy center. Prosper planned for the 380 expansion and shouldn't be punished for the poor planning in McKinney.

No to Segment B.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

I have been a volunteer at ManeGait for a few years . I do love that charity, but I do not support the Plan A for the the widening of 380. I support Plan B which impacts less homes and business. Cost less , and as someone who pays \$12k a year in taxes, I expect TxDot to consider the most fiscally responsible answer to the project.

I am also concerned about the traffic congestion caused by construction to commuters . 380 is a dangerous highway as it is. I know too many people who have been involved in accident with serious injuries and even those who have lost their lives. Construction on 380 also makes it harder to get to Baylor McKinney from the west, which impacts not just McKinney residents, but also Prosper, Frisco etc.

I am not personally affected by the construction, but I do travel on 380 on occasion.

Please do not be influenced by the Prosper biased article in The Dallas Morning News. That article just played on the heartstrings for reader, seeing the evil TxDot vs the beloved nonprofit. ManeGate will survive no matter where 380 is built.

Regards,
Colleen McConnell

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE

TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS;
AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Cory Van Kleeck

Subject: Support Segment - B for Project 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning Mr. Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your time.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

We bought our home in 2020 for the specific location and neighborhood and creating this 8 lane highway so close to our home would create noise and traffic that we moved away from just 2 years ago. Please take these above reasons into consideration as it would be detrimental to our community. Thank you for listening to our concerns and really taking these things into consideration.

Dear Mr. Endres,

My name is Crystal Mikeman and I live at [REDACTED]. I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

We moved here in 1992 to escape large highways and noise. It doesn't seem right that our quality of living is being threatened. We did not choose to live near a huge highway for a reason. The people who live and do business along 380 chose to move close to a major road. Please keep 380 on 380 and not in my backyard.

Thank you for your consideration,

Crystal Mikeman

Cynthia Chase, [REDACTED]

COMMENT: Segment B will interrupt ManeGait's ability to serve two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Furthermore, I have an 8 yr old granddaughter who has been going to Mane Gait routinely for therapy. It has greatly influenced her abilities of awareness and motor skills. It's extremely sad and very thoughtless to value TXDOT advantages of more highway space above the mental, physical and emotional needs of our children and the disabled. I realize progress and expansion must take place to accommodate the public. I pray for an alternative solution. The general public nor TXDOT can understand how important places such as Mane Gait are until they experience the goodness and difference it brings to a loved one!!! Please re-visit the current proposal and vote "No". Make a better life for those who are not as fortunate to have what we take for granted every single second and everyday!! Maintain ManeGait as it is; keep this truly wonderful blessing!!

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Subject: 380 By-Pass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As I study the proposals for Segment A and Segment B regarding the 380 bypass, I am quite concerned regarding the impact that Segment A would bring to homeowners and businesses within the areas outlined, not to mention the 99 million dollars more that would be needed to complete Segment A as opposed to Section B. This amount would certainly create a financial burden to many McKinney taxpayers.

I do agree that a bypass is needed, but this is a poor option due to the impact on our densely populated neighborhoods with arterial traffic to and from the south side of 380, certainly causing the devaluation of our homes. Segment A will also cause the loss of at least 17 businesses, which will displace employees and decrease city revenues. Two of the arterial roads, Lake Forrest and Ridge Road, have large schools located on these roads south of 380. This would compromise the safety of our children, many of whom walk and bike to school, as well as create compromised car pool and bus lanes.

I am a homeowner and citizen of McKinney. I strongly oppose Segment A and would hope for you to see this option as a non-option in such a densely populated area that includes the largest HOA in Texas, Stonebridge Ranch.

Sincerely,

Cynthia Long

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

Hope you are having a good week. I'm a resident of Prosper and wanted to just quickly voice my opinion on the 380 bypass. It feels wrong that our Environmental sustainability study that identified a preferred path is not being selected. I think we all know about judge self and his opposition to the route selected by the environmental study. That fact will soon be heard to larger audiences, and it's frankly embarrassing as a tax payer we aren't moving forward with the first study.

I know it's unfair to point any of this to you, I just wanted to express that my family and I believe strongly option B is the wrong choice and would destroy a well planned town. If you were in our shoes and a politician tried to influence something that didn't make sense, I ask how would feel? The size of prosper pales in comparison to McKinney, and we need all the development we can get.

Have a good week, and good luck with the project.

Thanks!

Subject: Project 380 Bypass Route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen –

As a homeowner and a citizen of McKinney, TX, I strongly support the Project 380 Segment-B bypass alignment Option.

Understanding there are many items to consider collectively when deciding how to route this bypass option which is needed due to the considerable growth in the area, I struggle with the idea that consideration would not be weighted towards the least impact to taxpayers. Cost alone would be weighted towards the Segment B option and it would seem as well as disruption from a construction and utility standpoint (from my understanding) as well as the traffic impact (not to mention the detrimental impact to small businesses).

I'd strongly oppose the Segment A option as a result as well given its almost the inverse proposition to Segment B when you consider cost/construction/traffic impact.

Given the sizeable population difference between those located near Segment A option (McKinney) vs. Segment B (Prosper) is roughly (depending on census numbers taken) anywhere from 6-8x the population impact it would seem considerably short-sighted as well to opt for Segment A, disrupt the larger voting population vs. Segment B, as ultimately the choice should be made predicated on impacting the fewest individuals as possible at hopefully the lowest possible cost.

Thanks
Dan Duffy

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,
Dan Kennedy

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres,

I am writing regarding the proposed 380 bypass options as proposed recently by TXDOT.

As a citizen of the City of McKinney and one who resides near 380 I would like to strongly support Segment B as it will have the least adverse affect to those residential areas and businesses along or near 380.

In my opinion Segment A option would create another traffic issue similar to that where 380 and US 75 intersect where there is constant traffic congestion. Also it will destroy a number of small businesses along 380 near Custer Road. I heard of numbers as high as 17 small businesses that would be eliminated at their present location. On top of these it apparently is \$99 million dollars more than Segment B option. Lets start spending the tax payers money more wisely and for the benefit of all citizens of McKinney especially those living along this corridor.

Option A will increase traffic through all the north/south arterial roads going through single family neighborhoods in this area during construction. Increased traffic through these neighborhoods will create more traffic safety issues (there are a number of schools along these arteries), increased noise and lowered property values in these neighborhoods.

It is also my understanding that Segment A option will create a large interchange and flyovers at 380 which is near a large single family neighborhood which will without a doubt drive down their property values.

Again I want to strongly support Segment B which is the best option to improve traffic, preserve current economic businesses as well as control future growth and maintain McKinney as a livable, vibrant and safe city for all.

Sincerely,
Dan Phillips

Subject: Letter of Opposition to US Highway 380 By-Pass (Option B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

My family and I recently moved to Prosper last Spring after carefully considering many different areas around North Dallas. We spent considerable time visiting various towns and cities that we felt would be best for our family. In the end, we settled on Prosper in the wonderful Whitley Place community. Part of the appeal was the long term strategy of the township, the small town community and many other factors that just told us this was home.

We had heard the previous rumblings of a highway possibly coming to town, but that issue we were told had been put to rest 3 years ago (or so it seemed). Since that time, we have learned of Plan B of the Texas DOT, that might possibly move 380 right through the east side of our beautiful town. And practically in our backyard. As you might imagine, when you make a decision to move to a community and spend millions of dollars to do so, our hearts sank. We have also heard that perhaps there has been some possible impropriety involving a former County Judge who lives in the community of McKinney's Tucker Hill. We find that very disturbing and quite honestly unethical to say the least. I believe the original TxDOT proposal was scheduled to route the by-pass along the east side of the Tucker Hill Community. My understanding is that the east-side land involved was in a flood plain where no homes would be built or effected. As such, there would be no loss of potential revenue to the city of McKinney. Apparently the county Judge used his position of influence to try and protect his backyard by offering up Prosper as the sacrificial lamb.

Prosper is like the David and McKinney Goliath. We should not be bullied into having to accommodate something that should have been properly managed by the city of McKinney. At 200k+ residents, McKinney has grown exponentially with not much of a long-term vision or planning strategy. Prosper on the other hand has been very diligent and specific in addressing the long term planning needs of the town. Carefully and methodically addressing the necessary issues to successfully manage infrastructure and growth, while maintaining property values, educational needs, etc. It seems unfair to shift that burden to Prosper when McKinney could have done a better job of handling their cities growth issues.

Plan B directly impacts our town and the community of Whitley Place in many ways. Although we have been here less than a year, some of the areas we see as adversely effected, include the following:

- The Lasadera Prosper (55+) Community which I believe is being planned by the Delin Bros., would be in jeopardy and probably cancelled. The loss of tax revenue would be substantial not to mention the missed opportunity to provide quality housing to the 55+ community.
- The Mane Gait Therapeutic Program would lose the serenity and peaceful location that provides therapy to children and adults with disabilities
- The Founders Academy (which we can see from our backyard)
- The new Lighthouse Church (again a stone's throw from the cemetery beyond our backyard) would likely be abandoned.
- The small cemetery (again literally in our backyard) which is planning an expansion along the west side of Custer
- The Malabar Hill subdivision under construction on the south end of East First Street
- The Walnut Grove HS also under construction on the south side of East First Street
- Cockrell Elementary, Rogers Middle Schools
- Overall environmental impact of increased emission, noise pollution and poor air quality
- Decreased property values in the surrounding area (i.e. our home and all the million dollar homes of Whitley Place)
- And of course, the lost tax revenue to a town that depends on that for its future

Many of these are less than a mile from our new home and community in Whitley Place. And all of them directly affect the town of Prosper. How incredibly awful that would be for Whitley Place which includes not only the homeowners, but the institutions listed above, to endure the noise pollution, loss of property values (and certain future lawsuits), environmental and ecological impact that are just unnecessary.

In our opinion, the only options available should be:

- 1) Keep 380 on 380 (it works why change it) If traffic gets a bit busy during the work day thru McKinney, well they should have thought about some of those issues before they built all those residential neighborhoods, etc,; or
- 2) Stick with Plan A to build the by-pass east of Tucker Hill

We understand that you have an extremely difficult job. We respectfully request that you not make a decision that would seriously and adversely effect our small town of Prosper forever. We did not create this problem. The town's leadership is doing a masterful job with LT planning and strategic expansion that makes it the desirable town that it is. Please don't let Goliath win by pushing their issue to the little town of Prosper to the detriment of its 30k residents. Please hear our small voices and look for some other option (1 or 2 above) that would be a more fair and better alternative than Plan B.

I have also heard and agree with using the TxDOT's "Below Grade Main Lanes" drawing that keeps service roads at ground level, thereby limiting the noise element below ground in so called "canyons". As I understand that, it would be similar to the Central Expressway passes by the area of SMU in Dallas.

In closing, we urge the TxDOT to please not let Goliath and McKinney's questionable leaders force Prosper to suffer the consequences of plan B. We ask that you pursue the best option, ethically, economically, socially and environmentally and either keep 380 on 380 or use the original plan east of Tucker Hill. Our town of Prosper needs your help and support.

Best regards,

Dan

Subject: Proposed Improvements to US 380
Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I was reviewing the online presentation this evening with regards to the proposed improvements to US 380. Maps provided in the meeting materials were vague as far as what specific areas could be impacted. I live in McKinney off of County Road 338 [REDACTED]. We are currently outside of the city limits. There are custom homes, along with ours, with acreage on this road. Is my (and my mom's) home and surrounding homes being considered for this proposed 8 lane highway where we could be potentially displaced or have a frontage road running in front of everyone's home? I am disheartened that a major highway etc. is being proposed for this area. I moved from the city to live in the quiet, countryside. I love where I live and do not wish to have it turned into a city environment and all that comes with that. I am especially concerned about home value decreasing.

I appreciate your response and look forward to hearing from you.

Sincerely,

Dana Park

Subject: Project 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

I support the Project 380 Segment-B bypass

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Daniel Bentley

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments:

Recognizing the need to expand infrastructure on pace with population growth, it seems counter-productive to displace that population to do so! Segment "C" will pass right through the front pastures of myself and four of my direct neighbors. While this technically may not displace our physical homes, it will most certainly displace our lifestyle and income. We all grow hay, and in so-called "bumper-crop" years we sell the hay to others. Even in normal years the hay we produce saves us from having to buy hay from others. Hobby farming is a lifestyle that is incongruous with an eight lane highway. Segment "C" will displace me as I search for a new place to continue this lifestyle. At the very least, move Segment "C" westward over vacant land. More to the point

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT *choose Segment "D" which avoids more homes*
 I do business with TxDOT *and businesses.*
 I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Sent: Wednesday, April 6, 2022 2:08 PM
To: Stephen Endres
Subject: Hwy 380 - OPPOSE Option A (support B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a homeowner and tax-paying citizen of McKinney, TX, I **strongly SUPPORT the Project 380 Segment-B** bypass alignment, and vehemently oppose option A.

Option B is the least disruptive to businesses with minimal displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I am shocked that TxDOT would overspend \$99 million of our tax dollars to destroy the “Unique by Nature” look and feel of our beloved McKinney when there are clearly better options.

I strongly **oppose Segment-A**. It should not be considered for the following reasons:

*It does NOT MEET the criteria of reducing accidents in already busy intersections. The intersection of Custer and 380 has many “near collisions” that go unreported. As the area grows, it is vital that TxDOT understands adding more burden between Coit and Stonebridge is unthinkable and irresponsible.

*Option A does NOT MEET the criteria to manage congestion. The congestion between Custer and Stonebridge is already increasing which option A will negatively impact. Option A would be a mismanagement of congestion.

*Option A does NOT MEET the criteria to improve east-west mobility. The time saved for commuters between Stonebridge and 75 will only amount to about 15 minutes which should not qualify as significantly improving east-west mobility.

*Option A does NOT MEET the criteria to improve safety. By increasing traffic flow to Stonebridge which many will use as a “short-cut” instead of Custer, the safety of Stonebridge Drive will be significantly decreased for the families that daily walk and ride bikes along the beautiful pathways. There is a school zone where children’s lives are at stake.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and

pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

Segment B is the best option to improve traffic flow and safety in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Daniel Madsen

I strongly OPPOSE Segment A and I strongly support Segment B. Please take into consideration the cost, the businesses that will be affected and the HOMEOWNERS!!!

MaineGate is a wonderful organization but should not have the lions share of the voice in how the traffic solution will be handled. So many more people are affected with Segment A.

Please choose Segment B.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Subject: 380 Alignment: Support for B, Opposition to A

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

We are McKinney (Tucker Hill) residents strongly in support of option B. In both the short run (and especially during the actual construction phase) and also in the long run, option A limits emergency vehicle access and creates noise and air pollution detrimental to our growing neighborhood. Option A also impacts safety for local high schools, poses greater driving challenges in freezing weather, and (as a longer route) increases pollution for the area overall. Option A is far more disruptive to residences both during and after construction and businesses are far more heavily impacted with this option. Significantly, costs borne by taxpayers are nearly \$100 million greater with option A. We say YES to option B and NO to option A.

Stephen Enders
Transportation Engineer
Texas Department of Transportation
477 E. US Highway 80
Mesquite, Texas 75150

Good morning Mr. Endres,

My wife and I are **opposed to Option A** for the expansion of US 380 in the western portion of Collin County. We are concerned about the safety and well-being of the numerous children in our community (Tucker Hill) if option A is approved. Option B will put the new portion of the highway far enough away from our streets that our children won't be affected by the traffic and noise. With option B, the community of Tucker Hill and our neighborhood in general will enjoy the peace and quiet that we have come to appreciate, while the driving public will gain an improved, efficient traffic flow.

Thank you very much for your time and consideration.

Dave

Mr. Endres,

Some comments on the Highway 380 project through McKinney,

First, I would like to say that we appreciate what the TX DOT does. Planning major projects like this one is a really hard task.

We've lived in Texas for 50 years (18 in Plano and 32 in McKinney). We have witnessed amazing growth of these communities and thoroughly enjoy where we live. We can remember when Highway 75 through Richardson and Plano was 2 lanes each way and McKinney was a small remote community.

The growth has been phenomenal and doesn't appear to be slowing (AT ALL).

Given that the rapid expansion is likely to continue east to west and south to north around 380, I think it is prudent to select either Option Brown or Blue. If we don't make those expansions now, it will come back again in just a few years to reconsider.

Thanks again,

Dave Kimzey

Subject: 380 Option A

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen

We totally oppose Option A as a bypass route versus Option B due to the following reasons:

1. The unacceptable and additional costs of upwards to \$100 million.
2. The disruption and displacement of more businesses than Option B.
3. The negative impact to more homeowners, residential neighborhoods, schools and hospitals than Option B.
4. Option A will impact the local environment more than Option B.

For these reasons and more it becomes crystal clear that Option B is the best and only option that should be considered.

On a separate note, when we look at the bypass route we propose you keep it completely away from 380 and extend the route north of Prosper and straight west to the toll road. This will eliminate the potential impact along 380 and to businesses and residential neighborhoods in McKinney and Prosper.

And while you're at it, why not take the expressway straight west to I 35? This would provide an easy east/west route connecting Hwy 75 and I 35.

Thank you
David & Judy Cota

Subject: TEX-Dot McKinney 380 By-pass Proposal Citizens Comment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

TEX-Dot Project, McKinney Project Manager:

We as homeowners, David & Sara Lewis, [REDACTED], wish to supply our comments to the updated proposal for the 380 bypass. We strongly support the "Segment-B" bypass option for the Project 380 By-pass. This option is truly the best in that it allows for future regional residential growth without more disruption, and would be the least disruptive to existing and future businesses, which are needed in our community. We consider the "Segment-B" option to be the best forward-looking proposal, since we are already behind the curve; proper future planning somehow got missed years ago. We also believe that the \$99 million savings this option offers compared to the "Segment-A" proposal is beneficial to the city budget and the resident tax-payer, without losing the central focus of why this much needed by-pass is needed. \$99 million is a significant savings!

We are strongly opposed to "Segment-A" option due to the added cost, and the "A" plan's construction of an overpass on 380 over Stonebridge Drive and Custer Road which would be both unsightly, unnecessary and detrimental to local businesses. "Segment-A" option would decrease traffic safety and increase traffic in Stonebridge neighborhood streets as they flow into Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive. This would increase traffic, noise and pollution in our neighborhoods, and would likely reduce our property values during construction as those are the only roads leading South from 380.

"Segment-B" is the best option to improve traffic flow in our corridor, while also preserving the economic business and residential harmony within our area. Please do not accept the "Segment-A" option, and proceed with the "Segment-B" option for the sake of McKinney residents affected by this major TEX-Dot project.

Subject: SUPPORT for Project 380 Segment-B bypass alignment option

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Tucker Hill Input From David and Pam Sylvester April 6, 2022

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My wife and I are 10 year residents of Tucker Hill and we feel that Option B is the ideal solution as it has the hallmark of "Less Is More" which makes it the most "Ethical" of choices. A solid business ethic is the result of good people expressing wisdom and high purpose while making decisions that result in less harm to its citizens and the environment, all for the ultimate good of the community. Tucker Hill is fortunate to have sincere ethical leaders who have been consistently engaged and focused on obtaining a result that achieves the least harm and the ultimate good for Tucker Hill and the community.

Option B fulfills this:

Option B is less costly.

Option B has less business impact.

Option B has less home displacement.

Option B provides a more direct and expedient route and will be safer.

Option B has far less environmental impact.

Option B provides less disruption to Collin College and Baylor Hospital.

Option B benefits are many, detailed and support less is more.

Truly Option B is the most ethical, cost effective and beneficial - providing the least harm to its citizens and environment - all for the ultimate good of the community.

Most Sincerely, David and Pam Sylvester

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello.

McKinney has MORE than enough room to house this expansion without interfering with schools, businesses, and nonprofits, especially the ones here in Prosper.

The brown and gold build alternatives disrupt the new Prosper high school, the Founder's school, and the Mane Gait nonprofit organization that helps children with horse therapy. Either of them would go right by the new High school. We do not need 8 lanes of traffic running right by it especially with new young drivers, my children will be among them.

The green build would cause way too many business relocations.

My vote is for either the **purple** or **blue** option, which allows for McKinney to benefit from the 380 expansions but not infringe on the small town of Prosper.

Thank you

Subject: HWY 380 Proposed Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I am a Prosper resident and would like to STRONGLY oppose all routes that go through Prosper. I have carefully and objectively reviewed all of the material on your website and while I do see that route B is less disruptive, that is less disruptive NOW. When you look at how Prosper is growing and the planned or potentially planned things that will be coming into that section of Prosper, it really affects the town's future. Prosper, being small, already has the problem of being a neighborhood town, and a highway running through it will only limit the neighborhoods that come in. Commercial usually bypasses Prosper due to its size. So if plan B was done, it limits the potential use of the land you are looking at.

I am not sure why Prosper has to take the brunt of poor planning by McKinney. Prosper has made sure that the setbacks were correct for future 380 expansions, etc. Unfortunately, McKinney built things right on top of 380. Now they have to deal with the consequence of poor planning.

The bigger thing I don't understand is why dump the bypass into Prosper? At some point the 380 part in Prosper will need to be bypassed. You can only widen so much. So the DNT is only a mile or 2 farther west, why not connect this bypass into the DNT? Yes, I understand it goes a little further but it only makes sense that you bypass a large amount of traffic to another highway and not dump it into a town/city. I would highly recommend this solution be looked at which would be running the bypass to DNT that can handle the traffic. If the traffic needs to go further west, well then we can extend the bypass even further. Isn't that the way most of these "loops" got made in DFW?

Again, strongly oppose Plan B and encourage the team to look at other alternatives. Plan A coming straight down seems like a better plan than B as it gets right to 380 instead of going diagonal through a town like Plan B. But again, if I had another choice, I would run it to DNT.

Thanks
David Batty

*380 as it exists will be demolished and moved North to be rebuilt so the Southside of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

We bought our home in 2020 for the specific location and neighborhood and creating this 8 lane highway so close to our home would create noise and traffic that we moved away from just 2 years ago. Please take these above reasons into consideration as it would be detrimental to our community.

Thank you for listening to our concerns and really taking these things into consideration.

Subject: 380 expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am strongly opposed to Option A for the US380 expansion project for the following reasons.

Option A displaces a total of 17 businesses, Option B displaces ZERO

Option A cost to relocate utilities is \$61M, Option B is \$25M

Option A total cost to acquire ROW (right of way) is \$178M, Option B cost is \$137M

Option A total cost of design/construction is \$450M, Option B is \$428M

Option A total cost is about \$100M higher than Option B

Option A impacts more acres of wetlands, rivers/streams, and forest/prairies than Option B

Option A impacts 14.9 acres of Statewide Important Farmland, Option B only 2 acres

Option A's increase in noise would have a severe negative impact on the established Stonebridge Ranch neighborhoods. Option B does not come as close to any existing neighborhoods.

Option A would cause increased traffic on Stonebridge Ranch Dr & Ridge Rd which both have elementary schools very close to 380: Wilmeth Elementary and McClure Elementary.

Subject: TxDOT Project 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon Mr. Endres,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 **Segment-B bypass alignment option**. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Subject: Project 380 Bypass Route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres: as a citizen of McKinney, I would like to voice my support for the "Segment-A" proposal over "Segment-B" proposal for this Bypass.

It is my understanding that TxDOT has researched stakeholder concerns, including those recently expressed by ManeGait to the Dallas Morning News and that TxDOT updated Segment-B so that none of the ManeGait property would be taken. Further, 17 businesses may be destroyed if Segment-A is built versus none if Segment-B is built. These businesses are located on the North Side of 380 on both sides of Custer Road where even more businesses are under construction. Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a heavily developed area in McKinney.

It is further my understanding that the cost of Segment-B is \$99 million less than Segment-A.

If there is an expected 3-4 year construction cycle, it will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B should have minimal impact on homes and businesses.

I greatly appreciate your consideration and effort on behalf of the City of McKinney and of our State.

Rev. Dean Fleming, Ret.
McKinney, TX

does not adversely affect this protected class

- 4) Any option that bisects Prosper would be in immediate proximity to Founders Academy as well as new drivers attending Prosper's Walnut Grove High School (currently under construction)
- 5) Option B is in direct conflict with the Air-Quality Guidelines

Thank you.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side. This is unacceptable and detrimental to the economy. Many family-owned businesses will suffer and be destroyed.

Traffic is already hazardous. This will have a strongly negative impact on quality of life for hundreds if not thousands of persons living and traversing 380 and Custer. There are significant potential health risks, such as death by traffic, not only to residents but also persons entrusting their safety to the wise actions of TXDOT.

Additionally, the cost of Segment-A is \$99 million more than Segment-B. Taxpayers suffering from this Plan will help to fund this Plan.

Thank you for considering my input. Yours sincerely,

Deborah Anthony, Resident

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon,

Please choose Option B for the bypass in McKinney. That is the only viable option that maintains quality property values for residents near 380, including the charming Tucker Hill neighborhood, most of all. It's also \$99MILLION DOLLARS more cost-effective.

Please do not choose Option A. Much too disruptive.

Thanks and Best Regards,
Deborah Papatonis

Subject: US380 expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

Here are the reasons that Segment A is a poor option for the US380 bypass and should be rejected.

- Segment B costs \$99M less than Segment A (\$590M vs \$689M)
- Segment B displaces fewer existing structures 12 in B vs 31 in A
- Segment B requires \$40M lower right of way costs (\$137M vs \$178M)
- Segment B is safer due to less sharp corners than A
- Segment B requires fewer interchanges than A (5 vs 6)
- Segment B impacts less wetlands and forest
- Segment B has 0 hazardous material sites while Segment A has 11
- Segment B does not impact the Tucker Hill or Stonebridge neighborhood entry/exit routes

I am wondering why an outer loop option is not being considered as Segment A is terrible, B is better but routing further from either would seem to be a much better option. Hopefully the items above will help with a decision.

Thank you for your consideration in this important matter.

Subject: 380 By-Pass Project (Options A & B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I'm writing to provide my feedback on the 380 By-Pass Project for McKinney/Prosper.

Based on the information presented and the various options (as I do own a home in McKinney), I would support the Option or Segment B by-pass option. It clear to me (again my opinion and based on the data) this option supports the least amount of impacts to homeowners. Plus this option is a savings of \$99 million dollars when compared to option A. And as tax payer, I'm all for a option that cost less and is the best options (win-win).

And in reviewing what Option A provides, it looks like it will impact negatively impact 17 businesses, and cost \$99 million more then Option B. Then were other facts about traffic flow, a new overpass to be built, new interchanges to be developed etc,,,

So again, based on the options presented, it appears Option B is the best approach both from a build and cost perspective.

I hope you take the feedback and weigh all the options and choose Option B.

Thanks for your time,

Dennis Scott

Dear Steve,

I am opposed to Option A and in favor of Option B. Option B is much less expensive by nearly \$100 million and less disruptive to the community. Option A will create a hazardous situation for a considerable area of the community during construction and permanently decrease air quality. Option A will also prevent timely entrance and exits onto 380 for emergencies. My neighborhood only has entrance and exit via 380.

Maingate should not be the deciding factor when the studies prove Option B will not prevent them from operating as usual.

Thank you for your consideration and please support Option B as the best solution.

Sincerely,
Ugh

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

This so-called plan is an insult to all the voters in the Prosper/McKinney area and a waste of our taxpayer dollars. This is the plan from hell for the following reasons:

1. The new lanes will do nothing for traffic flow, because they funnel into the present 380, complete with traffic lights and no lane discipline, at both ends. We drive 380 solely to get to the businesses located along this road. What good is driving miles to the north when you have to come right back to go to Costco, a supermarket, a pharmacy, or a parts store?
2. When 380 was being increased from 2 to 3 lanes in each direction years ago, we looked forward to better traffic flow. It never happened, because drivers now drive in formation across 3 lanes instead of 2.
3. There has been no coordination with NTTA about their plans for a loop or bypass. No representatives we talked to at the meeting on March 22, 2022 were even aware of NTTA plans. The new bypass will be a few miles from what is being proposed by you. The 380 plans are not only redundant, but a waste of taxpayer dollars on studies, plans and fruitless consideration of 'options.'

So we would have to put up with years of construction, disruption of schools and neighborhoods for no net benefit. Stop wasting taxpayer dollars on inane studies! There are plenty of real road problems that need to be solved, such as Coit Rd and Custer.

Dirk J. Schroeter, Lt Colonel, USAF (Retired)

Regards,

Don and Cindy DeBoer

Hello! Our names are Miles & Diana Wooley and we are homeowners in La Cima, District 4.

During last week's TxDOT meeting on the US 380 expansion, we learned one of the proposed options, A, will put a 25 foot elevated 8 lane highway at the intersections of Stonebridge and 380, as well as, Custer and 380. Previous renditions of the US 380 expansion from Custer to Stonebridge had this stretch below grade with Stonebridge and Custer being the overpasses. So, learning that the current proposal for Option A now includes a raised highway was shocking.

We strongly support the Option B alignment that has US 380 veering north about a half mile west of Custer. In reading through TxDOT's Segment Market Analysis, we noted that Option B is the less costly and least disruptive alignment coming in at \$100M less than Option A. We have heard that one of Prosper's main concerns is the Manegait facility being disturbed. From what we can see on the map, the bypass does not affect Manegait. What are we missing?

We have heard that one of Prosper's main concerns is the Manegait facility being disturbed. From what we can see on the map, the bypass does not affect Manegait. What are we missing?

Another concern is also for the high school students that are driving to/from Boyd and McKinney North during all this construction. This is also a safety issue that needs to be considered

We strongly oppose Option A which will have a severely negative impact to La Cima and the other neighborhoods in it's alignment of Wren Creek, Tucker Hill, Kensington, and Ridge Crest before it veers north. The highway will be noisy, unsightly, and will completely disfigure our undisturbed nature preserves at the La Cima pond and adjacent green belt and preserved wetlands. It will also have the same negative impact on the upscale West Grove entertainment hub that the council have worked so diligently to bring to our corner of McKinney.

Sincerely,

Miles & Diana Wooley

Subject: Opposition to Highway 380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

We are writing regarding our opposition to highway 380 Segment B in Prosper. We strongly oppose segment B as it would greatly impact the Town of Prosper, and specifically, the neighborhood in which we live, Lakewood at Brookhollow. Not only would segment B bring a freeway much closer to our home, it would also greatly impact that access to our neighborhood and would likely increase cut-through traffic through our neighborhood. (Segment A would also alter the access to the neighborhood, and we oppose the access being altered in that option as well.). Adding this freeway as proposed in segment B would drastically change the Town of Prosper and the reason why so many of us have moved to this suburban area by significantly increasing the volume of traffic directly near our neighborhood. We respectfully and strongly oppose segment B in its entirety and the alteration that segment A would create at the entrance to our neighborhood and request alternate options be considered.

Thank you for your consideration,

Don and Jodie Rogan

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

Any chance the 380 by pass will also go around the city of Princeton? 380 traffic in Princeton is as bad as McKinney 380 traffic.

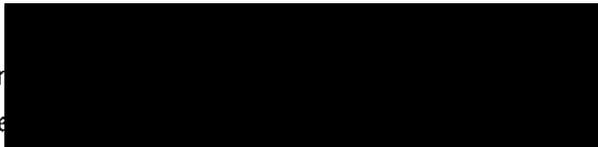

There are some TX DOT markers on CR 408. CR 408 is supposed to be 4 lanes some time. Is ~~that~~ CR 408 going to become a TX DOT road?

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Apartment:
City/State:

I believe that TxDOT has good intentions. This was made very evident in the TxDOT's 2020 US380 Collin County Feasibility Study proclaiming ManeGait a "key community resource" serving two protected status populations - the disabled and children. However the above plan shows that TxDOT is willing to force the closure of a "key community resource" due to unsafe conditions by placing a major thoroughfare too close to ManeGait.

It is unreasonable and unsafe for 150 disabled riders and their horses to work 60 hours a week with the sounds, emissions, and vibrations of construction for 3-4 years. In the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway/traffic equivalent to US HWY 75 towering over them and their therapy horse. Additionally, segment B will also result in land acquisition from property that is regularly used to support ManeGait's operations. Land that is not easily replaceable by a 501c3 Non-Profit organization in ManeGait's service area.

From one engineer to another, I welcome a dialogue on the data obtained by TxDOT, or even from a Texas Transportation Institute study/survey. If you are working with TTI, they can contact the Courtney Grimshaw Fowler Equine Therapeutic Program, a PATH Premier Accredited Center, that is a part of Texas A&M University College Station campus.

Thank you for your time on this matter.

Regards,
Don Rakow

Thanks Stephen. The new elevated recommendation is horribly invasive and not acceptable. A is a terrible option altogether in my opinion, but if it must be done the old rendering of depressed lanes is much better than the new renderings. Attaching old versus new, although I'm sure you have them.

Thanks again!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I am writing tonight regarding the US380 plan presented this week. I am opposed to Option A. The plan to build elevated lanes in front of SBR between Custer and Stonebridge Drive is concerning. The cost of A is much higher and will only continue to increase as development occurs over the next several years. In addition, in earlier presentations, depressed lanes were proposed in this section. I understand that the plan had to be altered due to LaCima Lake. Option A was already bad, but that reason should have been included in your environmental study, it categorically changed this proposal for the worse for SBR.

Option B is much less disruptive and should be considered or an alternative option with overpasses at major intersections only should be considered, like Preston and DNT in Prosper on 380, along with major changes at 75/380. Those changes would be much more affordable and accomplish much of what you are trying to solve for.

Option A is far too disruptive and should not be considered.

Thanks,

Donald Martinez

Subject: Support for 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen. I know you're getting bombarded with messages on all sides of this issue so I'll keep it short.

While I hate the overcrowding and increasing traffic congestion across North Texas and 380, it is the current state of affairs and must be addressed. As such, it now becomes a question of how can we best improve the situation. This is a shared problem with shared causes that extend beyond city or county lines. That is why it's clear to me that 380 Option B is far better for Collin County and North Texas in general than is Option A.

There will be drawbacks and negative impact for either option but the upside clearly lies most with Option B. As such I encourage you to do what is best for ALL of North Texas and support Option B for 380.

Thank you,
Doug Frucci

Subject: SUPPORT the Project 380 Segment-B
Date: Thursday, March 31, 2022 10:20:53 AM

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner in [REDACTED] and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 businesses.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: TX 380 bypass comment....

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I would like to voice my support for option B of the current plans under consideration. Below is the text that my HOA has asked me to send. But nevermind that. Option B is a better use of taxpayer funds and it impacts the fewest Texas residents and businesses.
Isn't that the mandate of a public servant? It seems like an obvious choice to me. I hope you agree. Best wishes as you make your decisions.

Option B is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A.
It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Opposition to HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I am vehemently opposed to the Hwy 380 Segment B route proposed by TXDOT. This route will directly impact ManeGait and future operations. I currently head up the ManeGait Veterans Program where I am directly responsible for the work we do with our Veteran community. The Veterans we serve come to us with various issues and deserve more from us. We need to be able to serve them and provide them the care they need when they suffer from PTS, TBI's, Sexual assault etc... We offer our Veteran community different types of services to allow them to deal with issues that plague them and we need to be able to have a tranquil environment to do so.

The proposed Route B, will directly and negatively impact these individuals who need a tranquil place to come, be one with nature and connect peacefully with their therapy horse.

It is not appropriate to ask our veteran community who have served our country valiantly to deal with 6,8,10,12 lanes of traffic as they are on site and trying to get away from stressors that impact their daily lives. They need a place to heal not a place to hear traffic.

We get several veterans directly from the Collin County Court system and these individuals have spent time in Afghanistan, seen things we can only imagine and because of that have gotten into some sort of trouble from having to try and cope with the horrors of war.

I kindly ask that TXDOT take our Veterans into consideration and not select Segment B that would negatively impact ManeGait our veteran community.

Thanks
Dwayne Minyard
Director, Veterans Recovery Program.

PS. I have been a volunteer at MG for over 11 years prior to joining staff, and I can tell you I am not the only volunteer that gets more out of being on property than our riders do. Any volunteer that comes out says the same thing. It is a place of tranquility and healing. I ask you as a long time volunteer to re-consider selecting the Segment B.

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

VIRTUAL PUBLIC SCOPING MEETING COMMENT FORM
Proposed Improvements to US 380 from Colt Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065 and 0135-03-053

The Texas Department of Transportation is seeking your comments on the US 380 project from Colt Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Friday, February 5, 2021 to be included in the formal meeting documentation.**

Comments:

I am a Prosper resident who lives close to Highway 380. I support Option A as the best alternative to connect to the E leg of the north bypass. Any option that goes through Prosper would have a negative impact on the environment. Increased traffic next to Mane Hatt Therapeutic Horseman's facility would have a detrimental impact on this special non-profit facility. Option A would not impact Ladera, an age-restricted community currently under construction while Option B would have a detrimental impact. Option B would bisect Prosper, and negatively impact the Founder Academy and disrupt attending Prosper's Walnut Grove High School (currently under construction).

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

Stephen,
I truly appreciate you sending this email confirming my comments about rejecting Plan A and supporting Plan B.

I think one of my biggest concerns is that the traffic is backing up on 380 starting at Coit and heading east. Thus, Plan B is the better option for continued growth west of Custer.

TxDOT Releases Latest Project 380 Bypass Information

Voice your support for Project 380 Segment-B by contacting TxDOT by April 6, 2022 with your comments (see below for instructions)

Message from SRCA Board of Directors:

The SRCA Board of Directors supports the Project 380 **Segment-B** bypass route. This option would route a US 380 bypass to connect WEST of Custer Road (see picture above). The SRCA Board **DOES NOT** support Segment-A for the reasons shown below. It will be very detrimental to our community.

Suggested Wording for US 380 Comment Form

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT** the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I recommend Alternative C
which does not run through flood
plain and does not affect the houses
on Woody Law Road.
The noise level will be
impossible to deal with due to the
elevated highway.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

My family and I would like to share our support for segment B as 380 is expanded. We moved to McKinney for the quiet and charm we live close to 380 and an expansion there would honestly make us consider moving. We have a young child and this could prove dangerous on numerous levels. We hope you'll take our thoughts into consideration moving forward.

Thank you for your time.

Elizabeth and Kevin Smith

Subject: Support for 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should NOT be considered as it destroys and removes 17 small businesses west of the 380 and Custer intersection. It will also decrease traffic safety and increase traffic on Stonebridge neighborhood streets that are arterials to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive (which runs behind my home).

Segment B is the **best option** to improve traffic flow in our corridor while also preserving the business and residential vibrancy of our community.

Thank you,

Ellen Heffner

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

Good morning. I am a resident of McKinney, specifically Wren Creek of Stonebridge located at [REDACTED]. I am writing you in to inform you I **STRONGLY SUPPORT** the Project 380 Segment-B bypass alignment option. It is:

1. The least disruptive to businesses with no displacements.
2. Has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Especially ours at Wren Creek.
3. The least expensive option by nearly \$99 million when compared to the cost of the Segment-A Alignment.

I **STRONGLY OPPOSE** Segment-A and it should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the 380 and Custer intersection on the North Side.
2. **The cost of Segment-A is \$99 MILLION more than Segment-B.**
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive - all which have schools located on them directly off 380.
5. It will cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Emily Selin

[REDACTED]
Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

We are 17-year residents of Collin County and Prosper and have continually worked for the betterment and best future of this region through the county and local nonprofit, community and service organizations. The recently proposed HWY 380 Brown and Gold alternative routes (Segment B) have terribly negative potential consequences for the Town of Prosper and arguably for the entire region.

We fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR

U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

It is extremely unreasonable to consider any alternatives to the Prosper Town Council resolution: US 380 has always been the major east-west artery through Collin County, and by far the most logical to expand to meet future needs: it is a straight shot through the county, readily expandable and the least impactful environmentally and community-wise overall. Anyone considering living or conducting business along 380 in the last 20+ years would reasonably expect this highway to continue to be our major artery, and as such expected to widen to meet traffic demands.

We request that you fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Thank you in advance for protecting the health and safety and futures of all the Prosper residents, businesses and community organizations you are entrusted to serve. Keep 380 on 380. It clearly makes the most sense!

Eric Nishimoto
[REDACTED]
[REDACTED]

Dear Mr. Endres,

We love Texas! Have lived in Collin County since 2005 and care about the future of this region. The recently proposed HWY 380 Brown and Gold alternative routes (Segment B) have extremely negative potential consequences - both immediately and long-term - to the Town of Prosper.

We fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

We request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Thank you in advance for protecting the health and safety, and futures, of the Prosper children, students, senior citizens, families, homeowners, non-profits and businesses you are entrusted to serve. Keep 380 on 380.

Subject: Opposition to HWY 380 Brown and Gold Alternatives (Segment B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

My name is Eric Smith and I live at [REDACTED]

I strongly oppose the proposed HWY 380 Brown and Gold Alternatives (Segment B). These paths will impact the daily operations and special events held at ManeGait Therapeutic Horsemanship and the essential services provided to individuals with disabilities and children. I respectfully request that Segment B be removed from consideration due to the environmental impacts to ManeGait.

Additionally, the proximity of the paths to planned public schools is concerning, given the high level of emissions from vehicles. Outdoor sports are such a big part of life for kids in Prosper, and building a highway with such close proximity is not what our community wants.

I moved to Prosper with my wife and two kids this year because of the incredible small town feel. Please do not bisect Prosper with a massive highway, forever negatively impacting ManeGait, our schools, and our small town feel.

Thank you for your consideration.

Best,

Eric Smith

Mr Endres,

I am writing to support plan B for the Hwy 380 expansion. I live near Custer and University and drive that section almost everyday. With the growth east of Custer on 380, any expansion east of Custer will be a temporary fix at best. If you are that close to Hwy 75 I doubt you will use the new road unless heading farther north on 75. I doubt that is a majority of the traffic.

If for no other reason B is \$100 million less than the other plans. That is a lot money where I come from. I guess if it tax money then maybe it doesn't matter.

I have little faith that these letters do any good but thank you for the opportunity to express an opinion.

Thank you for taking the time to read and listen.

Thank you,

Ernest Townsend

Subject: Project 380 Segment-B full support

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am a homeowner and citizen of McKinney Texas. I strongly support 380 Segment B. It is the least disruptive to the small business and residence of that area. It is also least expensive compared to Segment A. In these times of inflation that is a major interest to the taxpayers. I urge you to support Segment B.

Eva L Fasano

Subject: US 380 Improvements - Alternative Proposal and Five-Point Recommendation

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres:

My name is F. Craig Farrill, PE.

I live in Whitley Place in Prosper, TX near Custer Road and have five (5) points:

Point #1: The US 380 Segment B option should be eliminated from consideration.

The public interest is best served by the people of McKinney accepting responsibility for the zoning and permitting decisions made over many years and implementing **US 380 Segment A** in the City of McKinney. The people and Town of Prosper have not created the US 380 traffic problem and the 380 Bypass should not disrupt and take away a significant portion of Prosper, TX in any form or fashion.

The US 380 Segment B would be devastating in several respects. US 380 Segment B would:

- 1) Cut through and eliminate the 14-acre Mane Gait Therapeutic Horsemanship center, a non-profit organization serving hundreds of adults and children with disabilities and volunteer opportunities for over 2,000 North Texans.
- 2) Jeopardize the quality of peaceful, rural residential life for Whitley Place residents in its 554 home sites. Whitley Place would be the closest Prosper subdivision to the proposed US 380 Segment B.
- 3) Also come perilously close to the nearby historic Walnut Grove Cemetery (the oldest portion of which was established in 1852).
- 4) Come dangerously close to the two properties owned by the Prosper Independent School District, and planned for use to build two new high schools:
 - a. The property in the historic Rhea's Mill area to the east of Custer Road between Bloomdale Road and Frontier Parkway
 - b. The property along E. First Street between Custer Road and Coit RoadRecently, the new Founders Classical Academy at E. First Street and Custer Road was built and would be severely impacted.
- 5) From an economic standpoint, eliminate the possibility of the planned development of hundreds of high-quality, single-family residential homes on the south side of East First Street. Consequently, the Town of Prosper would be deprived of a significant future tax base. The Town of Prosper is only 27 square miles and must capitalize on the available land to keep the town attractive to new residents and to productively raise the tax base.
- 6) Provide virtually no benefits to the Town of Prosper, its schools, residential neighborhoods and residents.

For these and other reasons, B should be eliminated as an unacceptable and unworkable.

I reject US 380 Segment B for a 380 Bypass as unnecessary, ineffective, economically infeasible, and undesirable to the people of Prosper and people of Texas.

Point #2: I support US 380 Segment A as the second choice

The land to enable implementation of the **US 380 Segment A** comes from McKinney and is used to help McKinney solve its US 380 traffic overload problem. My professional opinion is that the ultimate economic and societal costs of the **US 380 Segment A** approach will be far less than Segment B.

Point #3: I support the "Expand 380 on 380" as the first and best choice solution.

The **“Expand 380 on 380”** Route:

- 1) **Properly recognizes that the origin and destination of US 380 traffic is to/from McKinney.** People are trying to drive to businesses, homes, schools and government offices in central McKinney along US 75, not to drive around McKinney. The Bypass Concept falsely assume that a large majority of drivers want to avoid central McKinney. The vast majority of traffic has McKinney as its origin or its destination; the small minority of traffic is passing through McKinney. Traffic data has not been presented that would validate that vast majority of traffic is “through” traffic. It is not reasonable to expect that drivers will use a Bypass which does not take them to or return them from their central McKinney destination.
- 2) **Can leverage advanced highway design techniques developed and successfully deployed by TxDOT in many high-traffic highways such as US 75.** Prosper resident Ben Pruett put together a proposal which has been provided to TxDOT. It offers the solution of a well thought design that would actually depress/lower US Hwy 380 in front of Tucker Hill making it virtually invisible from ground level. The access roads for east/west lanes would be at current grade level and would be cantilevered over the lowered US Hwy 380 providing easy access for those residents with no homes lost. Below grade, limited access highways with cantilevered service roads (or “advanced highway design”) have been widely used by TxDOT (e.g. US 75 near Highland Park) and NTTA and would work well for US 380. The **“Expand 380 on 380”** avoids the destruction of hundreds of homes and business along Bypass Option routes, minimizes the exercise of eminent domain for land necessary for right-of-way adjacent to the Tucker Hill and Stonebridge Ranch communities, and eliminates the need to purchase hundreds of millions of dollars of properties and land to support the Bypass routes.

In my opinion as a professional engineer, advanced highway design is the only viable solution for US 380 between the Denton county line and US 75.

- 3) **Provides the shortest highway route and provides the traffic load capacity where the capacity is needed** - - in a straight line from Denton to McKinney

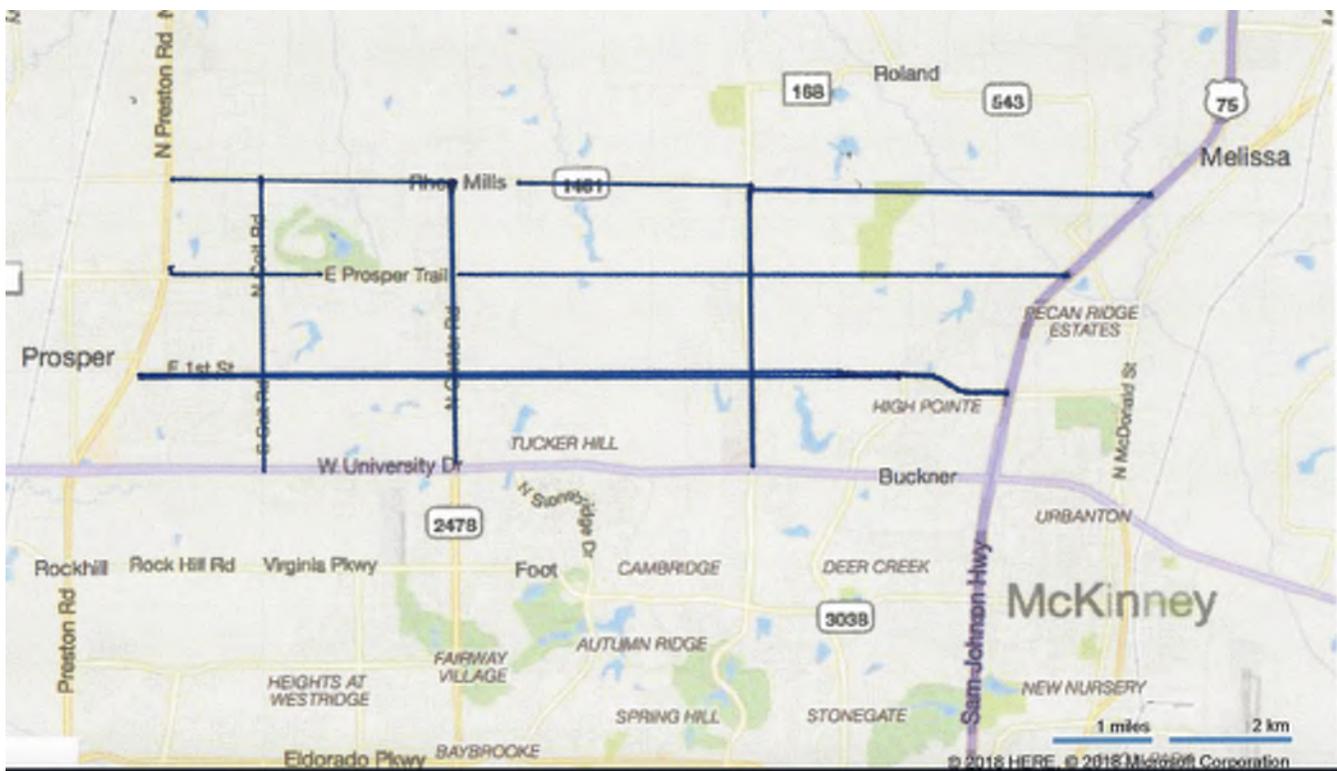

I believe we should keep US 380 on its current alignment - **“Expand 380 on 380”**.

Point #4: I recommend a better, faster, less complex and expensive traffic-shedding solution: Accelerated Surface Street Construction North of 380

Rather than build a limited access highway bypass highway north of US 380, I suggest TxDOT instead accelerate the construction of six-lane major thoroughfare surface streets north of US 380. By adding East-West six-lane roads, thousands of drivers could avoid US 380 altogether, thereby reducing the projected traffic load over the next 50 years.

I would suggest that TxDOT look at three such East – West six-lane roads:

- 1) **Expand E. First Street East** to six lanes from Prosper through McKinney to US 75
- 2) **Expand E. Prosper Trail East** to six lanes from Prosper through McKinney to US 75
- 3) **Expand Rhea Mills East** to six lanes from Prosper through McKinney to US 75

These surface street expansions could produce **18** East – West traffic lanes which could permanently remove hundreds of thousands of vehicle trips from US 380 in the future. Local McKinney and Prosper residents could and would avoid US 380 as the McKinney residents south of US 380 currently do.

(Today these residents are forced to go East – West on 380.)

Furthermore, I would suggest that TxDOT look at the accelerated construction of three (3) North – South six-lane connecting roads:

- 1) **Expand Coit Road to six lanes from US 380 to Rhea Mills**
- 2) **Expand Custer Road to six lanes from US 380 to Rhea Mills**
- 3) **Expand Lake Forest Drive to six lanes from US 380 to Rhea Mills**

The surface street expansions would produce **18** North – South traffic lanes which could permanently remove hundreds of thousands of vehicle trips from US 380 in the future. Local residents could and would connect with east-west roads and avoid US 380 as the McKinney residents south of US 380 currently do.

Accelerated East – West surface street construction north of US 380 would:

- 1) Support the existing long-term land use plans of Prosper and McKinney.
- 2) Have far fewer unforeseen and unexpected neighborhood impacts
- 3) Provide multiple east-west traffic detours from US 380 during its multi-year reconstruction
- 4) Improve access to the ManeGait Therapeutic Horsemanship center and allow it to operate and grow for years to come
- 5) Maintain the quality of peaceful, rural residential life for Whitley Place residents in its 554 home sites
- 6) Not disturb the historic Walnut Grove Cemetery in east Prosper
- 7) Enable the two properties owned by the Prosper Independent School District to be built out as high schools in accordance with the Prosper Land Use Plan
- 8) Allow the planned development of hundreds of high-quality, single-family residential homes on the south side of East First Street in the Town of Prosper, creating a significant future tax base. The Town of Prosper would be able to capitalize on the available land (only 27 square miles), to keep the town attractive to new residents, and to productively raise the tax base and provide services to the public.
- 9) Provide substantial traffic carrying benefits to the Town of Prosper, its schools, residential neighborhoods and residents for the next 50 years
- 10) Dramatically reduce the hundreds of houses and businesses needing to be destroyed and removed to allow the Red Option Bypass
- 11) Not divide up, isolate and permanently separate the dozen McKinney neighborhoods north of US 380 with a limited-access Bypass highway
- 12) Provide substantial traffic carrying benefits to McKinney, its schools, residential neighborhoods and residents for the next 50 years

Point #5: In conclusion: I recommend Accelerated Surface Street Construction North of 380 be done in addition to a less-costly expansion, modernization and improvement of US 380 on its current route and alignment.

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper. Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021, "...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE." I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,
Falyn Olney

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Good morning Mr Endres,

The reason for this email is to express my opposition to the proposed HWY 380 Segment B. I attended the public session last week, got all the information presented and the more I read it the more I see how much this proposal will impact the Town of Prosper: going against the Town thoroughfare plan, so close to schools, homes, ManeGait and the vulnerable population it serves.

I hope the voice of the community is heavily considered and expect TxDot to keep on communicating on a monthly basis about decisions, progress, etc on projects as important as this.

Best regards and all the best,

Francisco Martinez

MR.ENDRES/TXDOT,

We oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

We have long been supporters of the Manegait mission of giving high quality therapy to individuals through horsemanship. We are so very disappointed that you would even consider routing this highway in such close proximity to this valuable resource to the community.... and take land around it that is so supportive to this endeavor.

I implore you stop and think about these individuals who have benefitted so greatly from what Manegait is offering. It would be a tragedy to go forward with this plan.

Sincerely,
Frank and Nancy Hinckley

[REDACTED]

Mr Enders, I am sending this email to strongly support TxDOT US 380 Bypass Segment B option. Reviewing available information this seems like the obvious option to me. It is less expensive, has less negative impact on small businesses, and in my opinion is best for the area/ community overall.

I want to thank you for considering my comments in your decision making process.

Subject: Regarding Project 380 Bypass: Support Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Stephen Endres,

As a homeowner and citizen of McKinney, Tx, I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to business with no displacements, minimal impact on existing homes and families living in the neighborhoods along and adjacent to US 380. It also is the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A for the following reasons:

- 1) It will cause the installation of water pipes(ducts) over 380.
- 2) It will jeopardize traffic safety of people in the communities due to increased traffic on Stonebridge neighborhood streets arterial to Highway 380, such as Stonebridge Dr, Ridge Rd and Lake Forest Dr.
- 3) It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village.
- 4) 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- 5) It destroys the removes 17 small businesses West of the 380 and Custer intersection on the North side.
- 6) The cost of Segment-A is \$99 million more than Segment-B.
- 7) It will create an overpass on 380 over Stonebridge Drive and Custer Road, which will results in increased traffic and pollution that will in turn destroy the nearby naturally preserved environment where thousands of wild animals find home at.

Given considerations to cost efficiency, environmental protection, traffic safety for the mass population in the affected neighborhoods, plus many other factors, Segment-B is the Best and Most Sensible option to be utilized in order to improve traffic flow in our corridor while keeping the negative impact the Least upon the economic business and residential vibrancy in our community.

Your serious consideration of the pleas by residents in the affected neighborhoods will be greatly appreciated! Thank you very much!

Sincerely,

Frank Wang

Comments:

ANY OPTION THAT GOES THROUGH PROSPER WOULD INCREASINGLY NEGATIVELY IMPACT THE ENVIRONMENT THAN THE RECOMMENDED SEGMENT A. INCREASE TRAFFIC NEXT TO MANEGAIT THERAPEUTIC FACILITY AND FOUNDER'S ACADEMY WOULD CAUSE TRAFFIC NIGHTMARES ON A DAILY BASIS. OPTION B WOULD DISPLACE AN AGE RESTRICTED COMMUNITY UNDER CONSTRUCTION - LADERA. OPTION B IS IN DIRECT CONFLICT WITH THE AIR QUALITY GUIDELINES PER THE NORTH CENTRAL TEXAS COUNCIL OF GOVERNMENTS (NCTCOG). OPTION B WOULD REDUCE THE NUMBER OF RESIDENTIAL UNITS FROM WHICH PROSPER DERIVES ITS TAXES.

Subject: OPPOSE SEGMENT B and SUPPORT RECOMMENDED SEGMENT A

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I OPPOSE SEGMENT B and SUPPORT RECOMMENDED SEGMENT A.

- 1) ManeGait provides services to 2 ADA protected classes, children with disabilities and disabled veterans. Presidential executive order 12898 was issued in 1994 to address adverse human health hazards or negative environmental effects on minority populations, which are disabled veterans and children with disabilities. Segment B threatens the health of these two protected classes. Heavy load trucks and vehicles bypassing 380 on 12 lane Segment B will deposit diesel exhaust and particulates, harmful ozone, and air suspended particulates from tires and breaks onto ManeGait and Founder's Academy whose property is separated from the 12 lane Segment B by only 45 feet. Segment B steals the land used as riding trails by ManeGait for disabled veterans and children with disabilities, depriving these protected classes of their facility. The health of the service animals will also be harmed from air pollution from 12 lane Segment B.
- 2) Children's and teacher's health at Founder's Academy will also be harmed. Heavy load trucks and vehicles bypassing 380 on Segment B will deposit diesel exhaust and particulates, harmful ozone, and air suspended particulates from tires and breaks.
- 3) The 12 lane Segment B road endangers the safety of children, and their parents, attending Founder's Academy dropping and picking up children at Founder's Academy charter.
- 4) The noise pollution coming from 12 lane Segment B will harm the health of students and teachers at Founder's Academy, disabled veterans, children, and service animals at ManeGait.
- 5) In addition to Founder's Academy, the health and safety of students, parents, teachers at Cockrell Elementary, Rogers Middle School, and Walnut Grove High School will be harmed by 12 lane Segment B.
- 6) In addition to the TxDot analysis 5 residential displacements on Segment B is the real number of displacements including 111 residential displacements at Ladera, 8 residential displacements at Wandering Creek, and 201 residential displacements at Rutherford Creek, and Malabar Hills. The loss of these residential units represents a significant loss of tax revenue to the Town of Prosper, Collin County, and PISD. TxDot analysis is incorrect and misrepresented this number.
- 7) The Valvoline Oil Change store identified hazardous material site on Segment A is new construction, and NOT a hazardous site but entirely safe and easily displaced. KwikCar on Custer Rd supports the oil change needs of the community. Again, a misrepresentation in TxDot analysis.
- 8) The closed Cowboy store in Segment A is NOT a business displacement, since it's closed, much less a hazardous site. Again, a misrepresentation in TxDot analysis.
- 9) Business displacements are significantly less impactful than residential displacements. TxDot should have noted that on their analysis.
- 10) TxDot can no longer claim traffic criteria since TxDot is not considering Segment F, expanding 380 on its' current alignment, which is the fastest and shortest route for traffic.

In summary, the misrepresentations and omissions from the TxDot analysis are grounds for litigation from injured parties that would result from Segment B.

I support the recommended Segment A alignment and oppose Segment B.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres, I am a homeowner in Stonebridge Ranch and have been closely following the plans for the 380 bypass. Most of us have been attending meetings, signing petitions, etc. It seems we need to do more, however.

I am writing to express my fierce opposition to Segment A and my ardent support for Segment B. Segment A is so much more...more construction, more cost, more disruption to traffic and existing businesses. Segment B will be the least expensive for sure since it will not require \$40 million or so to relocate water.

One subject of concern for many of us south of 380 is that, under Segment A, our teenager drivers would have to deal with the detours and construction zones to reach the three high schools north of 380.

And many of us are concerned about disruption of the emergency room entrance to Baylor Hospital and the slow down should we require emergency ambulance service just because of detours.

Since plan B means zero business are displaced, I just don't know how this cannot be the best option. I appreciate your time, sir. Thank you for listening.

Subject: Support - Project 380 Segment-B bypass route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Thank you for your consideration,

Gary & Karla Haynes

Comments:

I vote Purple alternative. The gold & brown alternatives would be a disaster for Prosper residents. The options would destroy a 55+ housing community, the only such community in Prosper. Also gold & brown are too close to schools & MainHart Horse facility, a one of a kind facility.

I vote Purple ONLY.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34

passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

NAME/ADDRESS: Gay Ann Kiser, [REDACTED]

COMMENT: Dear Mr. Endres:

ManeGait is a facility that is unlike any other. I strongly recommend that you visit this facility and spend time with their staff members, as well as the horses that provide amazing therapy for riders who are challenged. We are their voices because many of the riders can't represent themselves. I urge you to oppose this move. If you've ever been around horses, you know how easily spooked they are by noise. This, of course, creates a great danger to the riders and those working with the ManeGait facility. There are so few operational facilities for the physical challenged. Please reconsider your decision.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Mr. Endres,

Respectfully, based on everything I've read and researched, the most logical path for the 380 bypass in McKinney is the proposed Segment B! Less taxpayer money will need to be spent, no businesses along 380 will be destroyed, and the health and well being of the residents in the area will not be affected by sites with hazardous materials. The only reasons I can see for choosing Segment A would be for political reasons or undue influence being exerted.

A concerned citizen,

[REDACTED]

SUBJ: Proposed US 380 Improvements

My wife and I want to express our strong opinions in favor of Option B of the relocation of US 380 and opposition to Option A.

Our home is located just East of the Stonebridge and Virginia intersection and borders on Stonebridge Lake across from the Adriatica subdivision. We have lived in this location almost 20 years, and have been very pleased with this location and its surroundings.

The impact of Option A is much more negative to us and our neighbors due to the likely increase in neighborhood traffic as well as the negative impact on many of the existing businesses along US 380 that will be forced to relocate.

Option B clearly resolves those issues and moves the increase in traffic west of Custer Road where there is much less impact on existing homeowners and businesses.

We sincerely hope you can see the more positive impact and results of selecting Option B for this important and necessary relocation of US 380 for the future. Thank you for your thoughtful approach and serious consideration of the impact on existing residents and businesses.

Thoughtfully Yours,

Gerald and Leslie Gantzer, proud residents of McKinney and Stonebridge homeowners.

[REDACTED]

COMMENT:

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).

- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.

- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.

- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.

- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.

- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Subject: 380 Expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Afternoon Mr. Endres

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

In conclusion, Option A will cost more and will disrupt more businesses and have huge negative impact on the residents of Stonebridge who live near 380 and Stonebridge. It will be devastating to open my front door to see a huge overpass, not to mention the traffic noise. I appreciate your due diligence in reviewing all options, but Option B is definitely the logical choice.

Thank you for considering our concerns.

Regards,

Gina Fuller

Subject: Response to Proposed Improvements to US380 from Coit Road to FM1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres:

I am writing regarding TXDOT's proposals for the rerouting of US380 from Coit Road to FM1827. I will be out of town for the public meeting on March 22 and will not be able to attend, so I am submitting this email to you to voice my opposition to the Brown and Gold alternative routes (Segment B) as currently proposed by TXDOT that would bisect the Town of Prosper. The immediate and long-term impacts of such a route to the Town of Prosper would be harmful to the Town and its citizens.

I am aware that the Town Council has passed at least six separate resolutions opposing the Segment B route, and I support the positions of Prosper expressed in those resolutions. Because the Town of Prosper is a small town in terms of its land mass, cutting off a major corner of its boundaries by this roadway will harm the businesses that currently exist in the area and the plans for future growth and development in the area. Other routes achieve the purposes and goals of TXDOT for the expansion of US380 without the need to route it through Prosper at all.

Thank you for your consideration of my opinion and input.

Regards,

Glen Blanscet

Subject: Opposition to HWY 380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper, Citizens, Students, Mane Gait (for therapeutic horseback riding for special needs persons- which I happen to have a child with Autism). The proposed alignment will impact several schools, neighborhoods and businesses.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Sincerely,

Glenn Messer

Subject: 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner for 10 years in Stonebridge Ranch (8 years in Ridgecrest also on 380) and citizen of McKinney, TX. for over 35 years, I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I **also strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Yes this is standard language you are receiving, but it says it as well as I can say it!

Subject: 380 bypass SUPPORT OF SEGMENT-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a 10 year resident of Stonebridge and an 8 year resident of Ridgecrest, with both locations being almost adjacent to 380, I am highly upset with the the Dallas Morning News article published on April 10 and **STRONGLY SUPPORT** the **SEGMENT-B** option for 380. The article did not provide a complete picture of the actions the City of McKinney has taken for MainGait and does not provide an accurate depiction of the situation. The \$99 million price tag alone should be enough to support Segment-B by TX-DOT. I'm providing below the complete information regarding MainGate and the City of McKinney.

In addition, I am sure there are some very rich people in Prosper (Haggard's) behind this - Segment-A goes through **UNDEVELOPED LAND** and Segment-A will lower the real estate values for everyone in Stonebridge, Tucker Hill and kill 17 businesses!

On April 10, 2022, the Dallas Morning News published a front-page article about the Project 380 bypass route. The article, focused on ManeGait, was well written but poorly researched as it only told half of the story. In the interest of fairness and complete reporting, the other side of the story should be told. These are the facts that were not reported:

There was no mention of the fact that back in 2019, the City of McKinney offered to acquire the current ManeGait property and move it to a newly constructed facility at no cost to ManeGait. They refused to consider this option even though they now say they may have to move and build a new facility. Interestingly, in the last few years, ManeGait was the recipient of several hundred thousand dollars from City of McKinney grant programs. Neither of those items were covered in the article.

Further, TxDOT has researched stakeholder concerns including those expressed by ManeGait. TxDOT updated Segment-B so that none of the ManeGait property is taken. TxDOT even researched other similar facilities in the state of Texas and found **no** ManeGait operational issues should be expected. That was not mentioned in the article.

There was no discussion of the seventeen businesses that will be destroyed if Segment-A is built versus none if Segment-B is built. The businesses to be destroyed are located on the North Side of 380 on both sides of Custer Road and the number will grow since more businesses are under construction today. Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a currently heavily developed area in McKinney. In McKinney's Tucker Hill, businesses that front on 380 also will also be impacted. Was there any discussion with any of these business owners?

The cost of Segment B is \$99 million LESS than Segment-A.

There was no reporting on the impact to Kensington Village which is directly in front of where the proposed Segment-A would enter 380. The proposed Segment-A interchange would greatly increase noise and pollution in that SRCA neighborhood potentially affecting the enjoyment and value of their homes. Were any of those property owners contacted for comment?

There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B will have minimal impact on homes and businesses.

Again, I support SEGMENT-B to protect current Stonebridge and Tucker Hill residents, along with those businesses on 380.

Thank you.

Glenna Lowe

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

We will be directly affected by the selection of segment C of the 380 Bypass Project. Segment C will take our house, shed, blacksmith shop, and garage. It will divide our land, leaving about 3 acres across the highway.

My biggest complaint about Segment C, is the way the drawings show existing county roads being cut off, leaving people on CR 338 unable to reach their properties and houses without using the loop and traveling miles out of their way to turn around and come back on the service roads.

Segment D avoids most of these problems.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Comments: As a high school senior at Prosper High School, I am so excited to see the development of schools in our area. These would be impacted by option B. Therefore I'm supporting option A for the bypass. I'm proud to live so close to main gate and would hate to see anything happen to it that might not allow them to help kids. We have so much to lose with option B. Thank you!

Subject: Comments - US380 Project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

For the attention of Stephen Endres, P.E.,

(Please confirm receipt)

Below are my comments and questions related to Sections A & B of CSJs: 0135-02-065; 0135-03-053; 0135-15-002.

We are residents of the La Cima area of Stonebridge Ranch and frequently use Stonebridge Ranch Drive. What I hadn't realized until I attended the 3/22/2022 public meeting was the massive scale of this project and the potential impacts to

the neighborhood in which I live. Specifically, the idea that 380 would be significantly expanded from its current 6 lanes to an 8-lane freeway with 4 access lanes.

1. Slide 3 of the Public Meeting presentation has a solid orange line that indicates the “Recommended Alignment from the Feasibility Study”, i.e., Segment A is preferred over Segment B. Does this leave open the A versus B decision or has it already been decided that A is preferred?
2. Slide 6 states the purpose and need for this project are to manage congestion, improve East-West mobility and to improve safety. I agree with these goals. What I think are missing are considerations related to North-South traffic: much of the traffic on 380 is associated with access to US75
 - a. What do studies indicate with respect to westbound traffic destined for southbound US75, and the reverse?
 - b. How will GPS algorithms and those on Google Maps, for example, influence the selected routes of through traffic? Can they be influenced to direct traffic along the recommended alignment? It would seem that speed limits along Segment F would need to be reduced. Please comment.
 - c. We have first-hand experience with safety issues on 380. With improved safety being a goal, this would be better facilitated by maximizing the bypass of grade-level intersections, i.e., Segment B would be preferred since it would divert traffic away from the busy Custer-380 intersection without having the expense of building a complex grade-separated interchange.
3. After reviewing the Segment Analysis Matrix, it seems clear that Segment B has a number of advantages over Segment A:
 - a. With one of the primary goals being to be to improve East-West mobility then reducing the time/distance to traverse the corridor would seem to be a heavy driver – this would favor Segment B with travel times under 4 minutes.
 - b. Fuel efficiency is better with Segment B: it is a mile shorter than Segment A.
 - c. Cost to relocate utilities indicates Segment B is preferred.
 - d. While there are displacements for both segments A & B the latter has a total of 12 versus 31 for A – clearly indicating a preference for Segment B.
4. La Cima Lake and its surroundings are a prime attraction for residents and visitors. The intersection at 380 & Stonebridge has the potential to significantly affect the aesthetics of the area. What considerations are there for minimizing noise and screening view of the overpass from the lake area?
5. The overall estimated cost for Segment A is \$688.5m versus \$589.7m for B. Based on cost alone, Segment B is the preferred option.

There are very few advantages to Segment A and many for Segment B as presented in the Segment Analysis Matrix. For this reason, I support Segment B as the preferred option and reject Segment A.

Thank you for your consideration,

Graeme & Angela Peart

Subject: No to Option B - 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

Our family has lived in Prosper for 17 years. This town, as you know, is only 9 miles x 3 miles. Option B, which would effectively bisect this tiny town is an atrocious idea. We are 100% against dissecting this little town and losing the tax revenue that would otherwise help support the growth of this community. Please vote against option B at all costs. Literally.

Sincerely,
Greg & Audra Bellon

Subject: Oppose 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing to let you know of my strong opposition to Segment B for the 380 bypass. I am a resident of Whitley Place in the Town of Prosper. The Town of Prosper has been opposed to Segment B because of the negative impacts on the Town. The Town of Prosper has planned for the potential growth and should not be negatively impacted by the lack of planning by the City of McKinney.

The City of McKinney should now bear the burden of that failure to plan. Bypass B would unduly punish the citizens and taxpayers of Prosper for the failure to plan by the leadership of a bordering municipality. The suggestion of building a 12-lane bypass in such close proximity to a charter school, elementary school and high school is unconscionable. The proposed Segment B would materially impact ManeGait and limit their ability to provide therapeutic services for disabled children and veterans. The Ladera Community, an active retirement community of 244 homes, would be demolished resulting in lost tax revenue for the Town of Prosper and Prosper ISD. Bypass B would require a massive utility relocation effort that are critical to Prosper's infrastructure. There would not even be a NEED for a bypass if McKinney had planned properly. McKinney caused this problem, so if there is a need for a bypass through McKinney because too many businesses were built too close to 380, then the bypass belongs in McKinney, not Prosper! Prosper supports widening 380 on 380 through its city limits. I oppose ALL Segment B options and support widening 380 on 380 through Prosper.

Thank you for considering my opposition to the Segment B option.

Subject: My Support for Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Villages, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am a resident living just south of Hwy 380 and Ridge road. I travel on Hwy 380 almost every day and will be moving my business to Hwy 380 and Auburn Hills in August of this year.

I am voicing my support for Option B, with the bypass connecting West of Custer Road. I understand the concept that everyone one wants a landfill, but they don't want it next to them and I don't want to come across that way.

My family and I appreciate the efforts of TxDot and the fine roads we have the privilege of driving on. My reasons to support Option B is that from what I am told, the cost is about \$99M less expensive. I live my personal life looking for value and providing my clients value for services.

In addition, the areas under section A are built up already with businesses and residences. The areas under Section B not as much, but will be soon. People will lose and gain based on the highway placement. I would see more gain for the community as a whole by choosing option B and let the community grown around the roadway, then changing an existing community that is established to accommodate the roadway.

Thanks

Greg Klement

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Greg Routen

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. Please pass my opposition on to your management and development team.

Regards-
Greg Schneider
[REDACTED]

- provide to children, veterans, and our disabled community members
-
-
- Substantial lost tax revenue to the Town and Prosper ISD
-
- Directly impacts these Developments: Ladera, Brookhollow, Rutherford Creek, Wandering Creek, Malabar Hills, North Dallas Cementary
-
-
- Massive utility relocations that are critical to Prosper's infrastructure
-
- Dangerously close to Founders Classical Academy
- Developments: Ladera, Brookhollow, Rutherford Creek, Wandering Creek, Malabar Hills, North Dallas Cementary
- Politics - George Fuller, Keith Self, & Tucker Hill — used personal influence to suggest Option B

SPECIFIC NEGATIVE IMPACT TO MANEGAIT:

ManeGait was designed to offer an atmosphere of solitude and peace. The students have sensory issues, which construction sounds, smells, and sights would negatively impact. Individuals with special needs on an incredibly large animal would offer a considerable safety hazard if the animal were to get spooked - which could easily happen if a freeway were in close proximity. Individuals with focus/attention disorders are also easily distracted and would be unable to undergo therapy in the way in which it was intended. Option B is NOT an option for the children and adults of ManeGait, and the overall program itself. Prosper supports ManeGait and the wonderful gifts it gives to its students, and Option B would render them unable to meet their goals and objectives.

Town of Prosper, Texas Government

Yesterday at 10:00 AM · 🌐

Prosper needs your help! Help us spread the word by sharing this with friends.

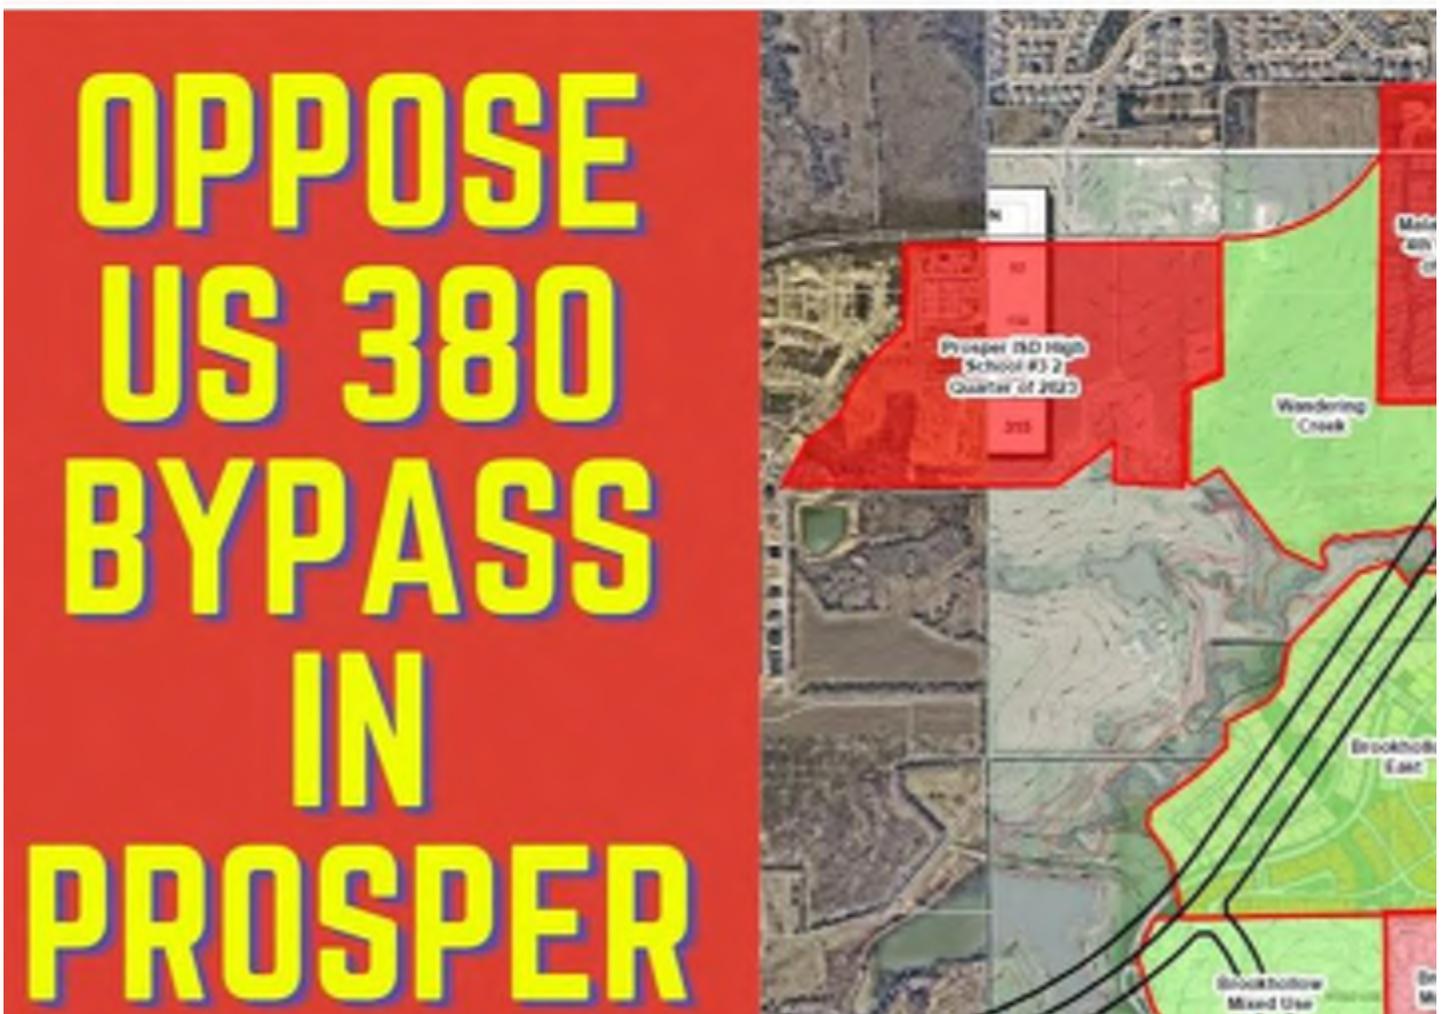

From now until April 6, residents are encouraged to provide TxDOT public input opposing the proposed 380 bypass (Segment B) from running through Prosper. The proposed bypass would run from Coit Road to FM 1827. A TxDOT Public Input Meeting is scheduled for Tuesday, April 5, 2022, at 10:00 AM. If you were unable to attend you can view the presentations and submit a public comment on the TxDOT website: <https://bit.ly/3DfesfY>

The Town has also created a webpage with information related to this proposed bypass of Segment B: <https://www.prospertx.gov/380bypass/>

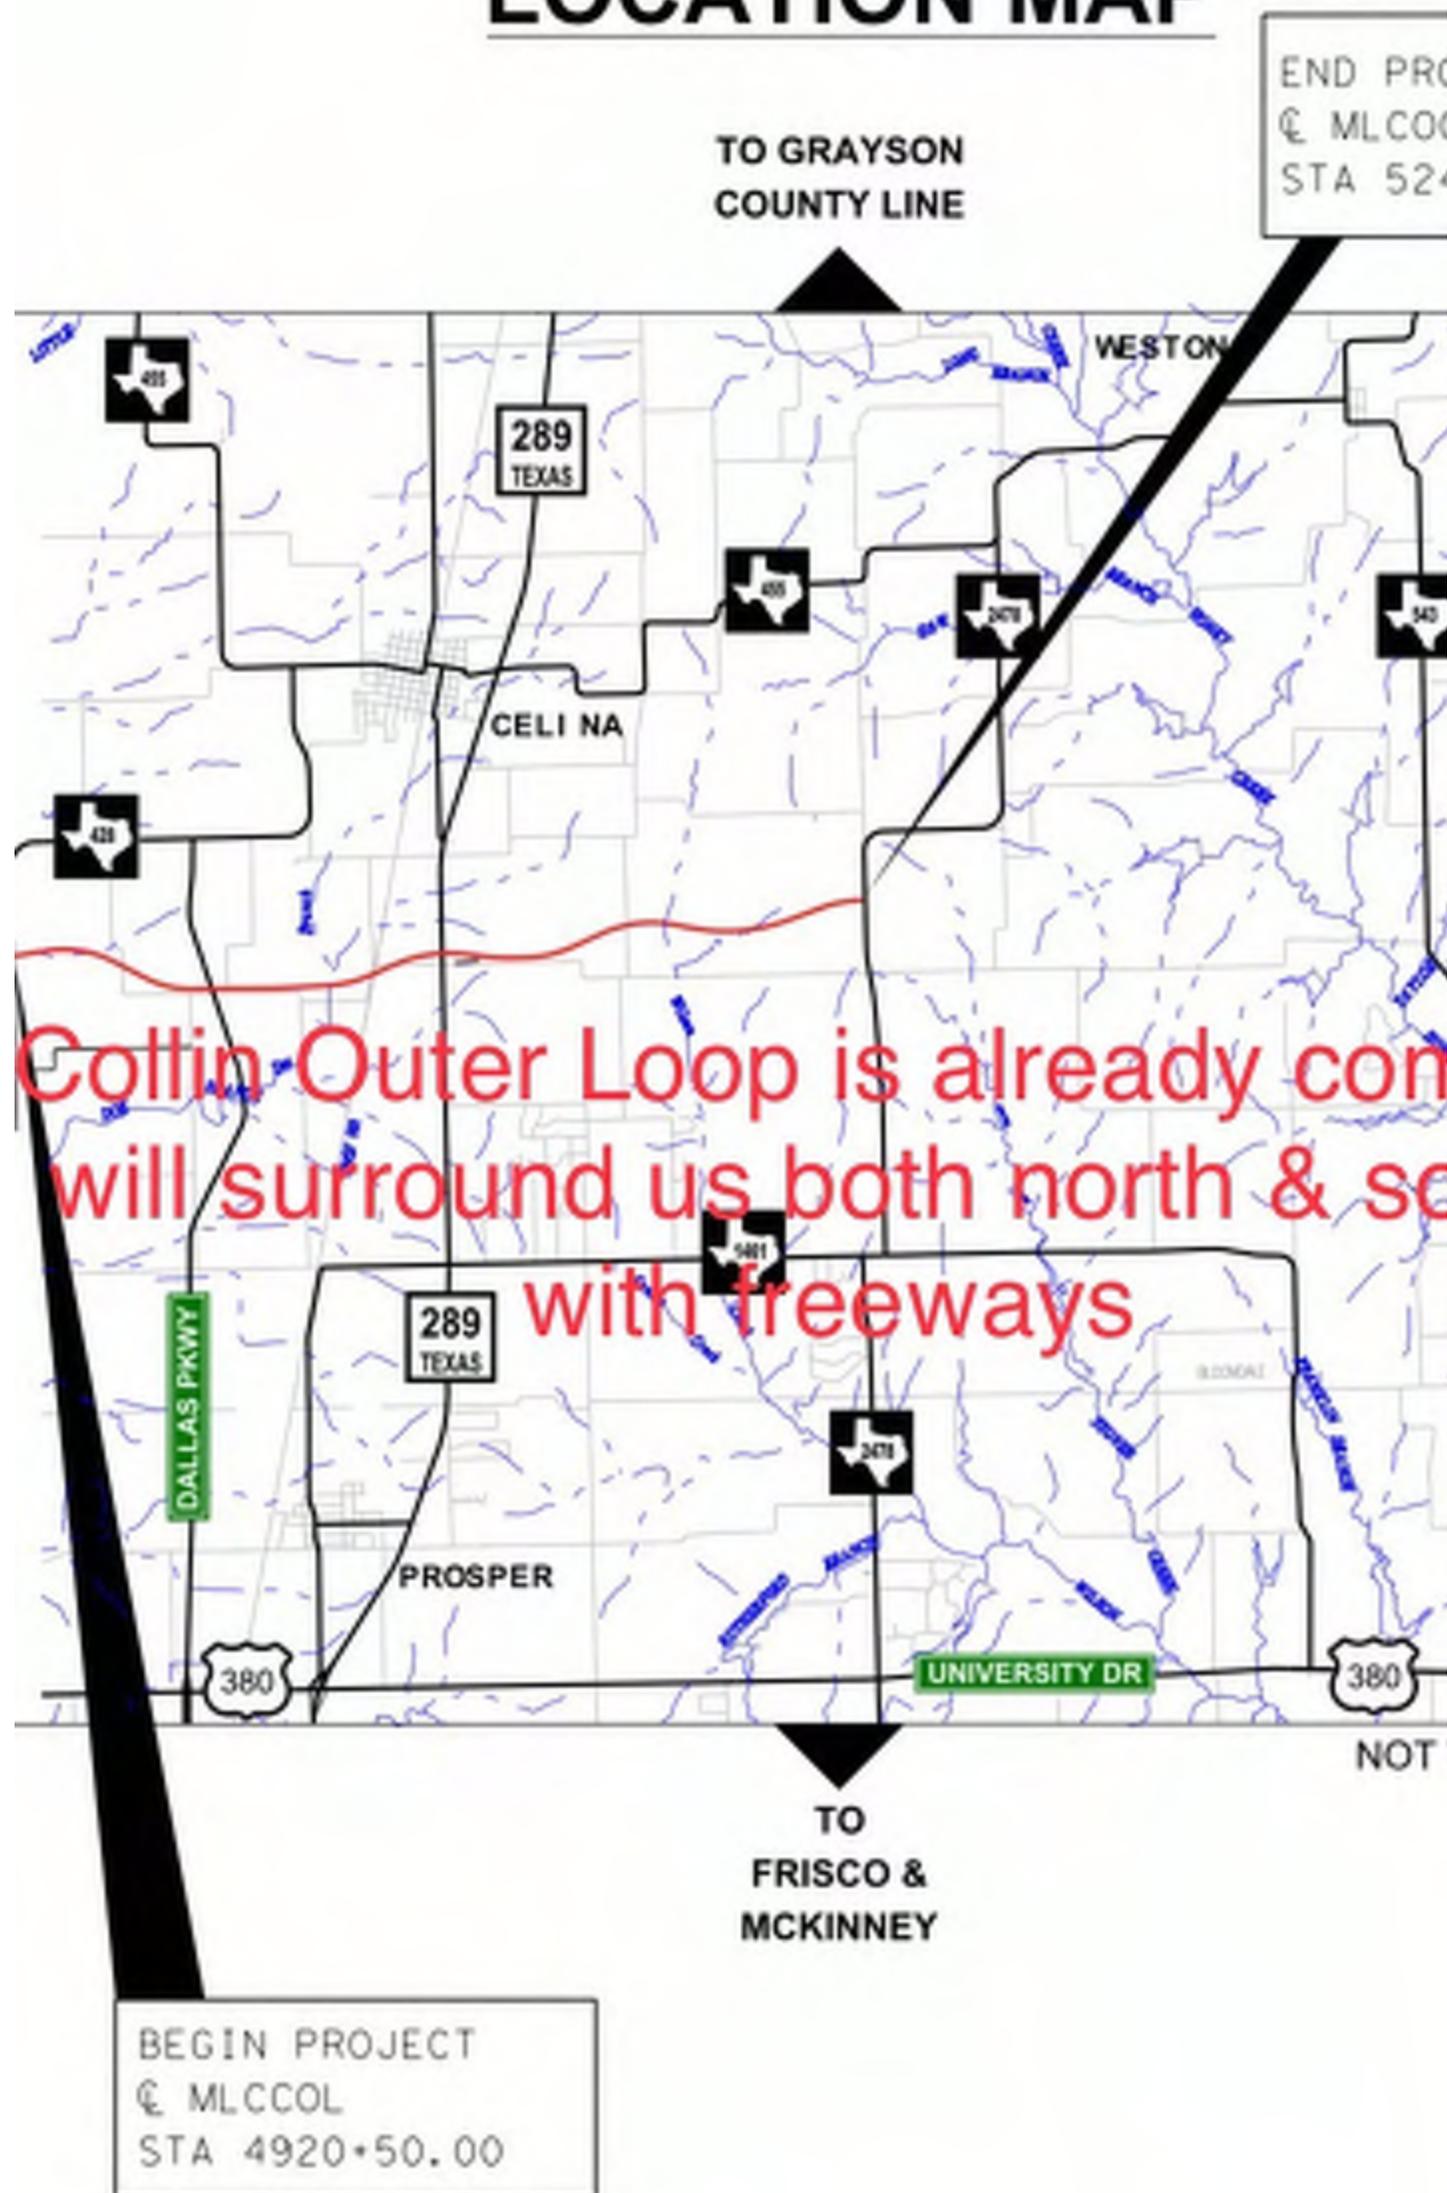

Comments must be submitted by 11:59 p.m. April 6 to be counted in the final TxDOT documentation.

➡️ ➡️ ➡️ Submit a public comment here: <https://bit.ly/3JSwMh6>

2400 Community Avenue
McKinney, TX 75071**

**Virtual Meet
Tuesday, March 22 at 5:30 p.m.
April 6 at 11:59 a.m.
www.keepitmovingdallas.com/US380**

Comments must be provided during the public comment period from 5:30 p.m. March 22 to 11:59 a.m. April 6. Below is a summary of the issues, which residents may use in submitting comments if they choose:

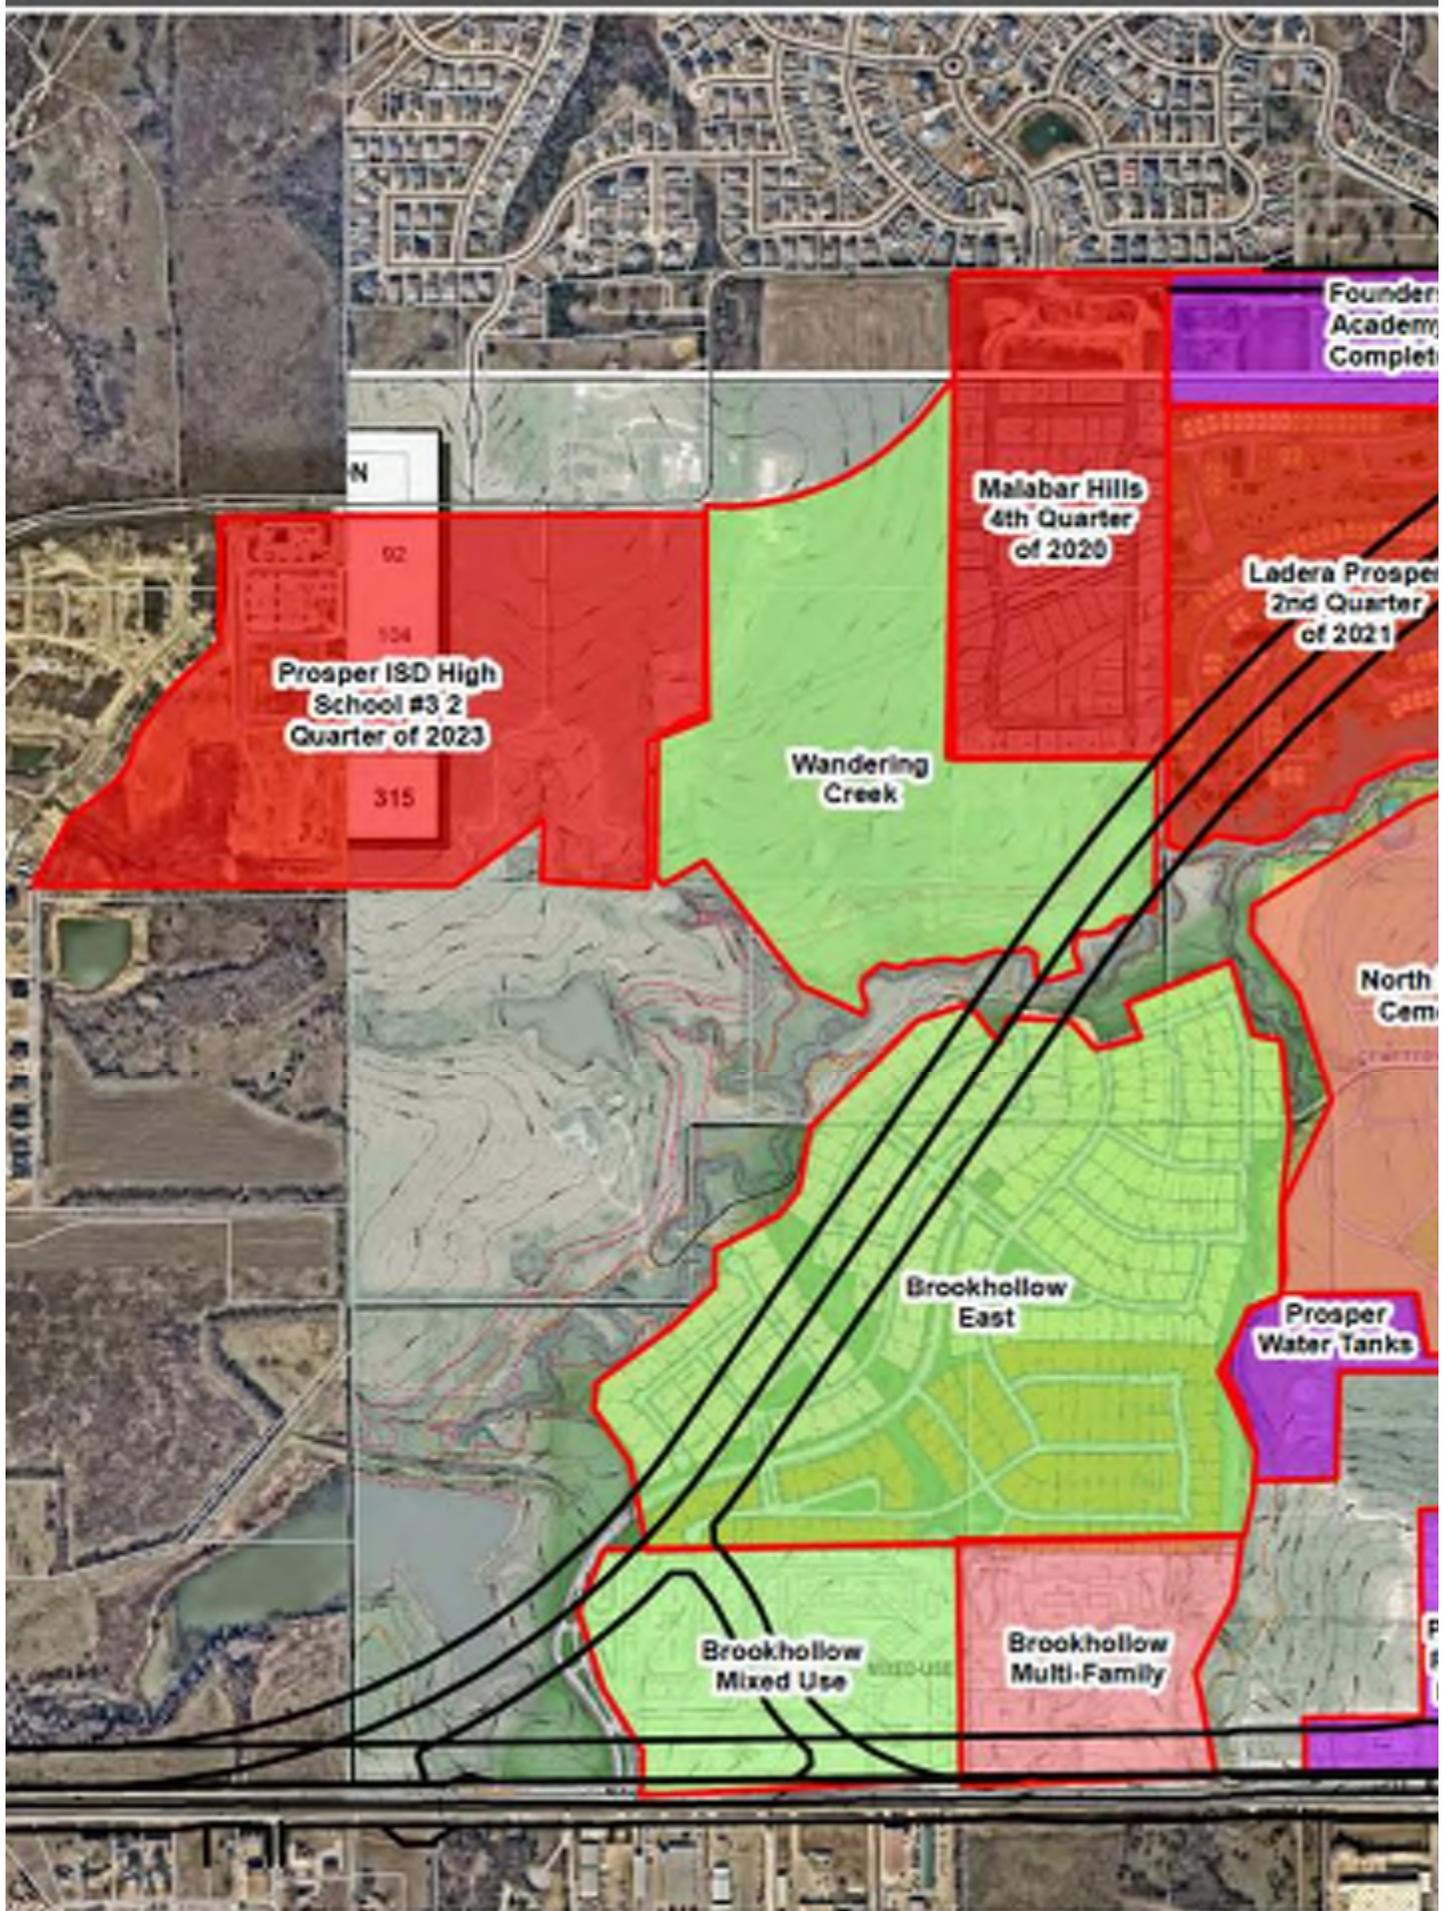

- The Town of Prosper has passed six Town Council approved Resolutions supporting a proposed alignment for the widening of US 380 not located along the existing alignment.
- Segment B of the proposed Gold/Brown alignment poses a significant, new impact on existing and future residential and commercial developments planned within the area that would directly impact over 360 future homes and thousands of residents and more;
- Segment B will increase ground-level ozone impacting at least two environmental facilities (ManeGait and Founders Academy) resulting in a conflict with the standards publicized by the North Central Texas Council of Governments (NCTCOG);
- Segment B runs directly through a quickly developing section of the Town of Prosper with significant environmental impacts on the human and natural environment. The proposed unplanned interstate through Prosper versus using the existing alignment with the current road width;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemen's facility providing equine therapy to hundreds of adults and children with disabilities;
- Segment B is in close proximity to existing and future schools including 10 schools and thousands of students.

You can access the virtual public meeting by scanning the QR code, or visit: <http://www.keepitmovingdallas.com/US380EISPublicMeeting>

On the reverse side of this page, you will find a Prosper Development Map that shows the projected impact a US 380 bypass would have on current and future development in Prosper.

Subject: Hwy 380 Bypass Input

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I am a homeowner and citizen of McKinney, and I am writing to express my **SUPPORT for the project 380 Segment B** bypass option.

This option is the least disruptive to businesses with no displacements, and it has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will negatively impact traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community and minimizing cost.

Thank you,
Gretchen Benner

Subject: 380 By Pass- Support For Segment B!

Dear Mr. Endres;

As a homeowner and citizen of McKinney, TX **I STRONGLY SUPPORT the the Project 380 Segment B** by pass alignment option. This option is the least disruptive to business with no displacement, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment A alignment.

I strongly oppose Segment- A. It should not be considered for the following reasons.

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. The cost of Segment-A is \$99 million more than Segment-B. This alone should be enough to not choose Segment A.
3. It will create an over pass on 380 over Stonebridge Drive and Custer Road.
4. It will cause the installation of water pipes ducts) over Hwy 380.
5. It will decrease traffic safety and increase traffic on Stonebridge neighborhood street arterial to Hwy. 380 such as Stonebridge Dr.Ridge Road and Lake Forest Dr., increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
6. It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
7. Hwy 380 as it exists will be demolished and moved North to be rebuilt to the South side of the new access road will be in the same location as the existing 380 is today.
8. Segment B is the best option to improve traffic in our corridor while also preserving the economic business and residential vibrancy of our community.
9. TX Dot's own study proved that the noise factor would not affect the therapeutic quality at Main Gate the horse farm as has been argued by others to support Segment A.
10. Selecting Segment A will create lengthy road closures for getting our kids to school at Cockrill Middle School, McKinney North & Boyd High School or teenagers there.
11. Segment A could result in traffic delays from Stonebridge Dr. when in need of ambulance or emergency travel to Baylor ,Scott and White Hospital.
12. Having major detour traffic rerouted through our neighborhoods could affect pick up of our kids from Wilmeth Elementary.

I urge you to Select and Support the Segment B choice!

Concerned Stonebridge Ranch Citizen,
Grisell Larsen

Mr. Endres,

I am a volunteer at ManeGait and have heard of the state's proposed plan to start construction that would intrude on ManeGait's land.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Please consider any other avenue in the state's proposal for this highway. There must be a better way to resolve this issue without impeding on the land that is used for such a great cause.

Sincerely,

--

Good afternoon, Mr. Endres,

thank you for such a thorough and readable presentation that I could view on the computer, since I could not make it to the meeting on Tuesday.

In 1980, the introduction of light industry, combined with the growth of the north Texas area, led to a comeback for Prosper. Today, Prosper is the home to more than 100 businesses and hundreds of new families. Prosper home values are nearly 20% more than McKinney homes.

Prosper is home to Dax Prescott and many DFW “celebs” who like the bedroom community. With Prosper? All this goodness is packed into just 25 square miles.

McKinney has MORE than enough room to house this expansion without interfering with schools, businesses and nonprofits.

As a Prosper resident, I have grave concerns about both the brown and gold build alternatives, as they disrupt the new Prosper high school, the Founder’s school and the Mane Gait (a one of a kind nonprofit organization that helps children with horse therapy). No school should have to contend with 8 lanes of traffic—especially with new young drivers, my children will be among them (we all know how 380 drivers drive).

I agree there needs to be assistance to the 380 corridor due to rapid growth and I see where the green build (although my preferred option) is not feasible due to business relocations.

But the environmental, social and emotional impact to the heart of Prosper, the schools and the nonprofit would completely dismantle the “sleepy” town that Prosper is to benefit the bigger city of McKinney.

I vote for either the **purple** or **blue** option, which allows for McKinney to benefit from the 380 expansion but not infringe on the small town of Prosper.

Thank you for your time.

Subject: Support for project 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

In an economy like this I simply don't know how it can be justified to spend 99 million more dollars on this and impact so many small businesses. We need to be better stewards of our resources and more accountable for the decisions made. Segment B is the only option.
thanks

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Heather Nelson Rattin

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

- The Town of Prosper has passed six Town Council approved Resolutions strongly opposing any proposed alignment for the widening of US 380 not located along the existing US 380 corridor;

- Segment B of the proposed Gold/Brown alignment poses a significant, negative impact to both existing and future residential and commercial developments planned within the Town. The alignment would directly impact over 360 future homes and thousands of residents and indirectly impact many more;
- Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG);
- Segment B runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities;
- Segment B is in close proximity to existing and future schools including high schools impacting thousands of students.

Warmest Regards,

Heather Powell

Dear Mr. Enders,

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

We have been financial supporters of ManeGait and know firsthand of the many families that have been so blessed with the services they provide. Disturbing and ultimately destroying this safe, therapeutic haven would be a loss felt by so many that care and are cared for at the amazing place that is ManeGait.

Please finally remove this proposed route from consideration once and for all.

Sincerely,
Hedy Schneider

I moved here from Austin a few years ago. I saw growth destroy the sanctuary of uniqueness of Austin. I hope and pray McKinney protect vital sanctuaries such as ManeGait. They are what make the world and this community a better place. Studies show the main indicator for people choosing to stay in and engage with their communities is outside resources. ManeGait is just that, a resource that provides outside space and activities for all walks of life. The disabled and veterans but also many events and volunteer opportunities for ALL to par take. Among MANY MANY other reasons for ManeGait to be protected.

Thank you,

Helen Fasken

PUBLIC MEETING COMMENT FORM

Proposed Improvements to US 380 from Coit Road to FM 1827

Collin County, Texas

CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: I am requesting an entry to my property from Community. I understand the existing access will be removed with construction of the bypass. If county road 201 access is removed, I will have to go past my house, take a left on the westbound service road, make a u-turn at Hardin Rd and come back down the east bound service road to get to my driveway. This is possible but absurd. To leave the existing road up to my driveway. I request consideration and an opportunity to discuss options.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

City governments and TxDOT must conduct traffic and engineering studies according to requirements outlined in TxDOT's publication, Procedures for Establishing Speed Zones, when setting a speed limit on the state highway system.

Usually speed limits on urban curbed frontage roads are 40 to 45 mph.

Subject: Opposition to HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Specifically, my son was given a terminal diagnosis at the age of 1. He is going to turn 13 this year. He has been going to therapy at ManeGait since 2013 and is stable. ManeGait has helped improve the quality of his life and he would not be doing this well if it weren't for their programs.

In addition, my son will likely attend the new Prosper ISD high school. At least three Prosper ISD schools would be directly impacted by a potentially 12 lane freeway. This is concerning for families (like ours) traveling to and from schools, student drivers and buses that will have to navigate this roadway. The Prosper ISD community NEEDS to be able to travel and learn in a safe environment. Segment B would be detrimental to our community.

Please reconsider Highway 380 segment B.

Thank you.

Subject: Opposition to the 380 Bypass - Prosper ISD Board of Trustees Resolution
Attachments: 380 Bypass.pdf

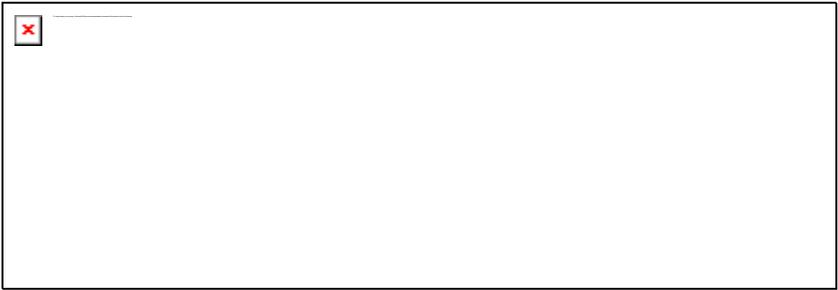

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good evening Mr. Endres and Ms. Schein,

I wanted to submit the Prosper ISD Board of Trustees Resolution signed on April 21, 2022. The Board unanimously passed the resolution with a vote of 7 to 0. Please be aware that Prosper ISD sits in a very unique situation in the fact that the District serves students who reside in Prosper, Texas, and McKinney, Texas. We want to make perfectly clear our beliefs regarding the 380 Bypass.

- 380 needs to stay on 380
- Prosper ISD strongly opposes Proposition B
- Prosper ISD would be in support, with strong hesitation, of Proposition A

Please let me know if you have any questions or concerns.

I am currently reading *Maximize Performance Creating a Culture for Educational Excellence* by Quint Studer and Dr. Janet Pilcher.

**RESOLUTION OF THE BOARD OF TRUSTEES OF
PROSPER INDEPENDENT SCHOOL DISTRICT**

WHEREAS, the Prosper Independent School District passed a resolution on July 19, 2021 in full support of U.S. Highway 380 as a Controlled Access Highway and in strong opposition of the proposed Segment A and B alignment; and

WHEREAS, Prosper Independent School District serves both The Town of Prosper and the City of McKinney, the District would be directly and substantially impacted by both Segment A and Segment B of the 380 Bypass; and

WHEREAS, Segment A of the 380 Bypass has the least impact on Prosper Independent School District; and

WHEREAS, the construction of a 380 Bypass would be much closer to District facilities and other property than if U.S. Highway 380 was a Controlled Access Highway; and

WHEREAS, the District property near the proposed 380 Bypass would include facilities designed for District students, teachers, staff, and administration, creating both a potential health and safety hazard and additional traffic near the facilities; and

WHEREAS, the proposed 380 Bypass would require the District to route buses and other transportation on the bypass, creating a potential health and safety hazard for bus drivers and children on buses; and

WHEREAS, traditional public schools in the State of Texas, including the District, are funded largely based on the property tax value of properties within the school district's boundaries; and

WHEREAS, the proposed 380 Bypass would be constructed much closer to other properties located within District boundaries, which is likely to drive down the value of those properties, thereby reducing the funding coming into the District, than if U.S. Highway 380 was a Controlled Access Highway.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE PROSPER INDEPENDENT SCHOOL DISTRICT:

RESOLVED, the Board of Trustees of the Prosper Independent School District strongly opposes the 380 Bypass in any form and strongly supports U.S. Highway 380 as a Controlled Access Highway; and if the 380 Bypass is constructed, supports Segment A.

PASSED AND APPROVED this 21th day of April, 2022 by the Board of Trustees for the Prosper Independent School District.

Subject: Resolution/Opposition to HWY380 Alternate Routes - Prosper ISD

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

In July of 2021, the Prosper ISD Board of Trustees approved a resolution in opposition to the 380 Bypass. Prosper ISD continues to be in opposition due to the negative impacts on our school community and any existing and future development within the southeast quadrant of the Town of Prosper. Our concern is with the potential for health and safety concerns that the 380 Bypass poses to our students, staff, parents, and community. On March 21, 2022, the

Prosper ISD Board of Trustees held a discussion regarding the concerns that are related to the 380 Bypass. Please be aware that Prosper ISD is in strong opposition to the 380 Bypass. Please feel free to reach out if you would like to discuss this concern further.

**RESOLUTION OF THE BOARD OF
TRUSTEES OF
PROSPER INDEPENDENT SCHOOL DISTRICT**

WHEREAS, on or around July 13, 2021, the Town of Prosper (“Town”) approved a resolution supporting U.S. Highway 380 as a Controlled Access Highway and strongly opposing the consideration of the New Gold or Brown Alternative Segment B alignments as presented by TxDOT in its US 380 EIS Schematic 30% designs submitted to the Town on May 3, 2021 (“380 Bypass”), due to the negative impacts on existing and future development within the southeast quadrant of the Town of Prosper since the alternative alignments are inconsistent with the Town’s Thoroughfare Plan and current alignment of said highway; and

WHEREAS, the construction of a 380 Bypass would be much closer to District facilities and other property than if U.S. Highway 380 were a Controlled Access Highway; and

WHEREAS, the District property near the proposed 380 Bypass would include facilities designed for District students, teachers, staff, and administration, creating both a potential health and safety hazard and additional traffic near the facilities; and

WHEREAS, the proposed 380 Bypass would require the District to route buses and other transportation on the bypass, creating a potential health and safety hazard for bus drivers and children on buses; and

WHEREAS, traditional public schools in the State of Texas, including the District, are funded largely based on the property tax value of properties within the school district’s boundaries; and

WHEREAS, the proposed 380 Bypass would be constructed much closer to other properties located within District boundaries, which is likely to drive down the value of those properties, thereby reducing the funding coming into the District.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE PROSPER INDEPENDENT SCHOOL DISTRICT:

RESOLVED, the Board of Trustees of the Prosper Independent School District hereby joins the Town of Prosper in supporting U.S. Highway 380 as a Controlled Access Highway and strongly opposing the consideration of the New Gold or Brown Alternative Segment B alignments as presented by TxDOT in its US 380 EIS Schematic 30% designs submitted to the Town on May 3, 2021.

PASSED AND APPROVED this 19th day of July, 2021 by the Board of Trustees for the Prosper Independent School District.

Subject: Opposition to U.S. 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

My name is Hope Merriam, and my address is [REDACTED] I oppose the proposed HWY 380 Segment B. It threatens the daily services and special events of ManeGait- a key community resource as identified by TxDOT.

It is unreasonable and unsafe for 150 disabled riders and their horses to work 60 hours a week with the sounds, emissions, and vibrations of construction for three to four years. Additionally, in the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway/traffic equivalent to US HWY 75 towering over them and their therapy horse. Segment B will also result in land acquisition from property that is regularly used to support ManeGait's operations.

The vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. No other PATH Premier Accredited center in Texas the size of ManeGait is located within 50-100 feet of a highway, and none have operated next to a three to four-year highway construction project.

I have been volunteering at ManeGait since 2013, and I can strongly assert that the proposed segment will be a detrimental threat to the program.

Thank you for your consideration,
Hope

Dear Mr. Endres, I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper. Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021, "...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE." I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments. Warmest Regards,

Howard Abrahams

Good Day....as my wife and I are residents of McKinney, just south of University, off Ridge Ave, I wanted to express my support for the Option B of the various proposed plans regarding Hwy 380. The reasons are many, including the overpass and many other changes that Option A would force to small business and congestion in the area.

Not sure how many folks you have heard from, but in my neighbor hood of Spring Hill, the few people I have spoken about this with all thought Option B was by best the preferable choice.

Please pursue Option B....thank you.

Stephen,

Please see the attached Resolution passed by the Prosper Town Council on March 29, 2022. The Resolution is being submitted to TxDOT for inclusion in the formal comments associated with the Public Meeting held on March 22, 2022 for the US 380 EIS between Coit Road and FM 1827. As always, it is the Town's goal to continue to be a partner with TxDOT while remaining clear and consistent with our support for the expansion of US380 on the existing alignment within the Town of Prosper.

Thanks,

Hulon T. Webb, Jr., P.E.

Subject: Project 380 Segment-B bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B bypass alignment option.** This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I think that the decision to eliminate the "Green Build Alternative" is appalling. The fact that it displaces business, homes and impacts neighborhoods and environmental justice communities is indicative of exceptionally poor planning on the part of McKinney residents and their leadership. Were they not aware of any future needs for transportation? Prosper leaders and residents had foresight enough to protect their interests should we now reward sloppy planning by McKinney and punish Prosper. This is abominable gerrymandering.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: HWY 380 - OPPOSE Option A (support option B)

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a young adult living in and planning to raise a family in McKinney, TX, I **strongly SUPPORT the Project 380 Segment-B** bypass alignment, and vehemently oppose option A.

Option B is the least disruptive to businesses with minimal displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I am shocked that TxDOT would overspend \$99 million to destroy the "Unique by Nature" look and feel of our beloved McKinney when there are clearly better options.

I strongly **oppose Segment-A**. It should not be considered for the following reasons:

*It does NOT MEET the criteria of reducing accidents in already busy intersections. The intersection of Custer and 380 has many "near collisions" that go unreported. As the area grows, it is vital that TxDOT understands adding more burden between Coit and Stonebridge is unthinkable and irresponsible.

*Option A does NOT MEET the criteria to manage congestion. The congestion between Custer and Stonebridge is already increasing which option A will negatively impact. Option A would be a mis-management of congestion.

*Option A does NOT MEET the criteria to improve east-west mobility. The time saved for commuters between Stonebridge and 75 will only amount to about 15 minutes which should not qualify as significantly improving east-west mobility.

*Option A does NOT MEET the criteria to improve safety. By increasing traffic flow to Stonebridge which many will use as a "short-cut" instead of Custer, the safety of Stonebridge Drive will be significantly decreased for the families that daily walk and ride bikes along the beautiful pathways. There is a school zone where children's lives are at stake.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

Segment B is the best option to improve traffic flow and safety in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Isaac Madsen

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am a resident of City of Prosper, my children attend Prosper ISD, I pay property taxes, and I drive US 380 daily. I am strongly apposed to B and A. The correct and most functional resolution to the current problem is to make the current US 380 a freeway from McKinney to Denton. TXDOT is angering the residence of McKinney and Prosper by giving us four bad choices. TXDOT is putting a bandage on a more serious problem. I drive US 380 from Prosper to Denton five days a week. Do you mean to tell me that TXDOT, means to displace residents, business owners, and inconvenience the motoring public by putting in "bypasses" from McKinney to Denton? The entire route is a mess with traffic, accidents, and construction delays. On the south-side of Dallas you have US 20 and US 30. On the north-side of Dallas you only have US 635. The George Bush is a paid toll road. With the center of the metroplex moving north, US 380 Freeway is the only logical solution. Voters remember, and when you attack tax payers who pay high taxes to begin with you make them angry. When you want to place "bypasses" near where they live and their property taxes is going up 10% every year, you get angry residents. Angry residents write letters to your Stake Holders, Governor, State Representatives, Congressman, and Senators.

Mr. Andres I've lived in Stonebridge for 28 years have seen so much growth since the population was about 28,000 in 1994. I've read Prosper does not like the Section B choice but Section A will cost so much more, disrupt many small businesses and will probably take longer to build since, I understand, an overpass will have to be built and create another mess when ice storms occur.

Thank you for the consideration.

Stephen Endres, P.E.
Texas Department of Transportation
4777 E. Highway 80
Mesquite, TX 75150

Dear Sir:

Although I live in a Stonebridge Ranch neighborhood within McKinney, whether the State of Texas selects the "A" or "B" bypass option on the Project 380 Bypass Route will have only a marginal direct impact on me. However, from a financial perspective, as well as the disruption of the community, the only clear choice is the "Segment-B" bypass.

The "Segment-B" option saves Texas taxpayers roughly \$100 million in construction costs. The "B" option does not result in a score of businesses being forced to close and long-term impact to more remaining businesses during construction. Nor does the "B" option create greatly increased traffic noise and general traffic for the homes that would be impacted if "Segment-A" is chosen. Indeed, it appears the only objection to the "Segment-B" option comes from a business that loses no land.

The "Segment-B" option costs less, has less negative environmental impact, less commercial disruption, and is far less harmful to the quality of life of McKinney residents. It is the better choice.

Yours,

Dr. Jack Marrion

I have been a home owner in the Stonebridge area of McKinney since 2001.

I support option B of the 380 expansion. Option A is too costly. The noise level would be unacceptable for option A and too many businesses and homes would be impacted.

Starting a new bypass from Preston would alleviate some traffic on 380. 380 between Preston and 75 is always backed up!

Prosper is only beginning to develop on 380. Don't tear down established areas for development that hasn't even progressed.

McKinney leaders need to be more mindful of keeping costs down. Our property tax is insane and only getting worse. We are getting taxed out of our homes as it is!

Subject: FW: 380 Bypass Project

Dear Mr. Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Project 380 McKinney

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As residents of McKinney, Texas, we strongly support the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

We, also, strongly oppose Segment-A. It should not be considered for the following reasons:

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. The cost of Segment-A is \$99 million more than Segment-B.
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
5. It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

Section B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,

James and Janice Byrom

Dear Sir; we are writing to request that you please note that, as residents of McKinney, we support the Alternate B route on the US 380 EIS project. While there is significant data regarding the exploding population growth in Collin County, the reality of this growth is most evident when traveling around the county. There are already numerous housing projects north of 380, and by the time the construction actually starts, these areas will already be built out. Therefore, Alternate A will not alleviate the congested traffic conditions which already exist. Choosing alternate B will provide better traffic solutions and can be completed for less cost, less economic and less environmental impact on the land, residents, businesses, and taxpayers of the area and state. Thank you for your attention to our comments. James and Sandra Foster

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

- James EuDaly

Subject: US 380 Bypass - Support for Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am writing to you on behalf of our company W3 Luxury Living in regards to the US 380 Bypass. Our company owns several communities sitting on over 400 acres that lie within 1.5 miles or less from the proposed Segment B & E sections of the 380 Bypass. Amongst the several communities we currently own 924 homes with an additional 2,104 homes under development. Given that our company will own 3,028 homes all within a 1.5 miles or less from the proposed bypass we wanted to reach out to you to express our strong support for the Segment B option. We believe that this option provides the best overall solution for the bypass and will provide the greatest benefit to the area as a whole.

Thank you,

Dear Sir, I am a resident of Stonebridge Ranch and have viewed the options many times over the last few years and cannot join my neighbors on their request to cut up Prosper with proposal B. It makes so much more sense to save our Equestrian Therapy charity and go with plan A. It is north of 380 and does not interfere with Stonebridge.

Save Mane Gait and go with the original plan A please. No current kids or vets will be able to move to Van Alystine or Munster or wherever, especially all the volunteers. There happen to be more volunteers than riders at Mane Gait. You will kill it with option B. Go with A!

Dear Mr. Enders:

As a nearly 20 year homeowners and voting citizens of McKinney, TX., we **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is significantly less expensive than Option A.

We also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. The cost of Segment-A is \$99 million more than Segment-B. It would be fiscally irresponsible to choose this option.
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will also cause the installation of water pipes (ducts) over 380. Think February, 2021, freeze.
5. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
6. It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is not necessary.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. There is a natural floodplain area to follow for Segment B that would not cause nearly the disruption to people and businesses as Segment A, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Segment B would additionally eliminate two 90° turns which seems to also be safer for drivers. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. One wonders exactly what the reasons would be for not choosing Segment B.

I strongly oppose Segment-A. It should not be considered for the following reasons:

- ❖ It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- ❖ The cost of Segment-A is \$99 million more than Segment-B.
- ❖ It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- ❖ It will also cause the installation of water pipes (ducts) over 380.
- ❖ It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- ❖ It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- ❖ 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

I live in Lakewood Estates and this 380 proposal would direct the traffic around the congested area at Mallory but I don't see the exit at my friend's house on Coit. Additionally, I will no longer be able to access Lakewood ~~at~~ without going down to Coit at Coit ~~at~~ ~~Coit~~. So, there is a better option than what is being proposed.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Stephen -

I'm a resident in Prosper, TX and live at [REDACTED] I would like to formally express my opposition to option B in TX DOT proposal for a Highway 380 bypass.

With option B cutting right next Founders Academy, it will not only make traffic and operations there worse, it will also drastically impact the quality of their campus and learning environment. Additionally, option B will negatively impact Mane Gait Therapy facilities, which serves 4,000+ disabled children and adults every year. This option B will eliminate their ability to expand their mission to serve more individuals and, even worse, will practically make it impossible to serve even those who they currently treat.

In light of the above considerations, I request that you also strongly oppose segment B in both gold or brown alternatives.

Thank you for your consideration and support!

Best,

Jamie Panganiban

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Jamie S Fitzgerald

Provide comment in support of ManeGait by April 6th!

US HWY 380 IMPROVEMENT PROJECT - IMPACT ON MANEGAIT

Dear friends,

Your comments saved ManeGait before! We need your voice to oppose U.S. HWY 380 construction that would threaten our mission!

Background

Thanks to the outpouring of support from ManeGait supporters, TxDOT's 2020 [US 380 Collin County Feasibility Study](#) identified ManeGait as a "key community resource" serving two protected status populations - the disabled and children. Citing the *Americans with Disabilities Act* and *Executive Order 12898 on Environmental Justice*, **TxDOT removed from consideration any alignment that impacted ManeGait's daily operations.**

New Threat to ManeGait

In a direct contradiction to the conclusions above, TxDOT introduced a new Segment B alternative.

- Segment B places the 45-foot tall freeway within 50-100 feet of ManeGait - **even closer and more disruptive to operations than before.** The path also cuts through property that is regularly used to support ManeGait's operations.
- In the [March 22, 2022, public hearing](#), TxDOT claimed they interviewed similar horsemanship facilities and the proposed highway does not pose an issue to operations.
- **Fallacy of this claim:** No other PATH Premier Accredited center in Texas the size of ManeGait is located within 50-100 ft of a highway, and none have operated next to a 3- to 4-year highway construction project.

What does it mean for ManeGait?

Segment B will interrupt ManeGait's ability to serve two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT).

- It is unreasonable and unsafe for 150 disabled riders and their horses to work 60 hours a week with the sounds, emissions, and vibrations of construction for 3-4 years.
- In the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway/traffic equivalent to US HWY 75 towering over them and their therapy horse.
- Segment B will also result in land acquisition from property that is regularly used to support ManeGait's operations.

How can you help ManeGait?

Please send an email to TxDOT by April 6, 2022:

1. **Click here to email:** Stephen.Endres@txdot.gov
2. **Subject:** Opposition to HWY 380 Segment B
3. **Include:** Your name and street address
4. **Example Comment:** *"I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait."*

Thank you for your continued efforts and your prayers!

We are grateful to God for the incredible community support and the glorious land He has provided to fulfill ManeGait's mission.

Blessings to you all,

Bill and Priscilla Darling
Zach and Landon Schneider
ManeGait Founding Family

" ManeGait is a unique facility that helps children and adults with physical, emotional, cognitive, sensory, and behavioral disabilities...Public comment has helped in identifying the facility as a key community resource. TxDOT considers the daily operations and special events held at this location to be services for at least two vulnerable and protected status populations – the disabled and children."

*Texas Department of Transportation
US 380 Collin County Feasibility Study
March 2020*

Our Mission:

At ManeGait Therapeutic Horsemanship, children and adults with disabilities move beyond their boundaries through the healing power of the horse and the dedication of a professional, caring community.

I am writing in opposition to Segment B. I have been involved in this for 5 1/2 years, attending countless meetings and sending countless emails. When your formal presentation was given in support of Segment A, the matter appeared to be settled. Your scientific evidence and reasoning was obvious. The environment has not changed.

McKinney's unethical politicians do not have the right to dictate the future of ManeGait, Walnut Grove, and Prosper! Please continue with your original plans for Segment B!

Sincerely,

Jan Clare

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

As a homeowner in Stonebridge Ranch for 18 years and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Prosper should not be penalized and have our towns land forfeited due to McKinney's poor planning. Our small town would greatly benefit from the revenue generated by homes, schools, churches, cemeteries etc. that are currently in process on that valuable land verses a noisy, pollution producing, non income generating (and an eyesore) freeway. Elevating the freeway above the vulnerable populations doesn't seem like the greatest idea either - for so many reasons.

We thank you for your consideration in removing Alignment B through Prosper from your future plans.

Warmest Regards,

Jana and Kevin Horowitz

Subject: 380 Bypass Project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

Please do whatever is necessary to select and implement the Segment B option for the 380 bypass. It is so much more cost effective, saving the local taxpayers 99 million dollars. \$99,000,000 could be used in so many more beneficial ways. You are well aware, I would think, that many businesses would be destroyed if Segment A is built. Please consider the benefits those businesses bring to our community, and please help save them from destruction.

There cannot possibly be a realistically sound reason to choose a plan that would require the need to address 11 sites with hazardous materials and 7 major utility conflicts.

Please, please allow intelligent thought, responsible financial judgement, and actual common sense to prevail.

If you practice those things , you can and you must select Option B.

Most sincerely,

Jane Adamczyk

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

Absolutely terrible! I am a Lakewood resident. My Neighborhood has 225 homes + 1000+ are under construction now. As this stands a major highway is positioned to be elevated at my Neighborhood. You are simply dumping traffic from McKinney into Prosper which has no problem what for? You need to solve the problem for the area not just shift it down. I will no longer be able to get out of my Neighborhood + go east w/o joining other neighbors waiting at a Coit light (w/ a school zone bottling up in the morning.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

A new high school is currently under construction behind us. It is a pathetic attempt at solving 380's problem

Hello Stephen. My name is Janell Pennington and I live in Stonebridge Ranch in McKinney. I would like to acknowledge the amount of work that you and your TxDot teammates have done on the 380 Bypass Project.

I have lived in Stonebridge for 12 years and love our community. I strongly urge TxDot to approve Plan B for the bypass. The other option of A would have major impacts to our community. The option A would impact the least about of people and businesses.

Please approve option B.

Sincerely, Janell and Steve Pennington

Subject: Project 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your time,
Janet

Subject: 380 Bypass Deadline Extention Until April 21

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

I would like to know if I can file additional comments now that the deadline has been extended until April 21. If I submit additional comments through the website will it overwrite my earlier comments? I want to know so that I keep my earlier comments and want to add to them based on new information I obtained by attending the McKinney City Council meeting last night. As you are aware, they have been silent on Options C&D up until now. However, they said they got an email from you extending the deadline, so they passed a resolution last night without listing it as an open item for public discussion. This was literally railroaded through by the City Council without any regard or opportunity for serious engagement by the citizens they claim to represent.

Also, they stated that their preference for C was based on the fact that they want TxDOT to choose the new option for the Spur 399 Bypass as they want to put in a new terminal on the East side of the airport. Thus, it is clear to everyone but TxDOT that the Spur 399 Bypass should be part of the 380 Bypass discussions and not have its own separate proceeding. Further, as Spur 399 Bypass is still on the table, its discussion period should be re-opened for further comments as well. In particular, TxDOT should reconsider the Spur 399 Bypass in its entirety so that the loop actually serves as a real East-West Bypass by joining 380 farther East at the Princeton loop on either the West or better yet East side of the loop to alleviate the traffic coming in from the bedroom communities in Princeton and Farmerville.

Lastly, as the comment period for 380 has been extended, I would appreciate an answer to my earlier email on traffic flows taking into account the removal of traffic by the Spur 399 Bypass and, as a result, how much less traffic 380 will experience between Spur 399 Bypass options to highway 5, which is the closest North-South route on the North side of 380. I doubt it will justify the \$700-\$850 million that TxDOT is considering spending on Options C&D. C&D is not an East-West Bypass for the traffic on 380 as it is being considered. It is a North-South Bypass that will have little impact. It would be a much better spend of taxpayer money to eliminate C&D and allow the 75 freeway to function as the East side of the City of McKinney loop and spend it on extending Wilmeth Road East to go through the South portion of the new wastewater treatment plant by NTMWD all the way East to Princeton or even highway 78.

I look forward to receiving your response on my questions posed in this email in a timely manner, so that I can submit additional comments by the April 21 extended deadline.

Sincerely,

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Good afternoon,

I just wanted to send in a quick comment opposing the proposed 380 bypass running through the Town of Prosper. I am sure you have received plenty on this matter and don't wish to take up much of your time. Please consider leaving 380 on 380 - if McKinney is unable to do this due to lack of prior planning, then the bypass should run through McKinney only as Prosper made proper prior planning allowing for room to expand 380. Prosper should not be punished for McKinney's poor/lack of planning.

Thank you!

This is an amazing facility that has helped so many children with their "special needs" challenges. My granddaughter rode there for almost 10 years and she has benefited greatly from those special years and now volunteers. Don't take this experience away from these children.

To whom it concerns,

I oppose the Segment B proposal ...keep US 380 on US 380...Please pass the Segment A option.... We spent a lot to buy into a non traffic, safe, and quiet area...it would decrease the value of this new community and change the entire attraction that drew us to this Lakewood community...Please use the Segment A option and keep this area the beautiful safe area it is... Do not use segment B please keepUS380 on Us380.

Sincerely,
Janis Hastings

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am the former 3-time Chairman of the McKinney Economic Development Corporation and operate Burress Law, PLLC. My firm has hosted a Willie Nelson style, family friendly picnic at ManeGait for 10 years, donating more than \$250,000 to ManeGait during this time. I also joined the ManeGait board last fall.

Though there are numerous reasons I oppose Segment B, the primary reason is because it will be very damaging to ManeGait, which is a beacon of hope to our community and beyond (I actually have a brother-in-law who is down syndrome and autistic and he occasionally rides at ManeGait). I believe those who are vulnerable need special protection and the safe, high quality, easily accessible location to undergo world-class therapy at ManeGait would be most easily attained if Segment B is not chosen.

Sincerely,

Jason K. Burress

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY

PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Subject: Project 380 Expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I **STRONGLY OPPOSE Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thanks,
Jason McClintock

There is construction happening where the new 7-11 and Taco Bell has gone in and I have noticed markers in the field behind my house in the area between loop 288 and my fence. My concerns or question is are they putting in a road behind my house or a service road? Poinsettia Blvd dead ends at my house so I have concerns about those markers. I hope you can answer my questions or forward this to who can and thank you for your time.

Mr. Stephen Endres, P.E.
Project Manager
TxDOT Dallas District Office
4777 E. US Highway 80
Mesquite, TX 75150-6643

Re: US 380 Project (Coit to FM 1827) Options A and B

Dear Mr. Endres,

We support improvements to U.S. Highway 380 through the implementation of Option A (and oppose Option B) for these reasons:

Setting a poor precedent

McKinney, unlike Prosper, failed to plan for expansion of the US 380 Corridor. Businesses and residents along U.S. Highway 380 should have reasonably anticipated widening to accommodate growth. Should TxDOT select Option B, what message would TxDOT be sending to leadership in other Texas communities whose cooperation will be needed in future projects?

Might makes right?

The Dallas Morning News and others have reported that McKinney and Collin County leaders have used questionable tactics to attempt to railroad Option B on Prosper, a town 1/7th the size of McKinney. A state agency of TxDOT's stature should discourage this behavior.

Adverse environmental impacts

The proposed Option B multi-lane highway would adversely impact schools, parks, lakes, a special needs facility, and cemeteries in or near its path.

Increasing pollution and noise in community parks

- Whitley Place Park, with 18 acres of nature areas, hike and bike trails, ponds, and wildlife (*less than 400 feet away from Option B*)

Creating noise and air pollution and increased traffic detrimental to nearby students, teachers and parents:

- Founders Academy K-8 charter school (*classrooms less than 150 feet from Option B*)
- Walnut Grove High School (2500+ students less than 1/5th of a mile away)
- Cynthia Cockrell Elementary School (700+ students less than 1/2 mile away)

Forcing a critical Special Needs facility to shutter operations

- ManeGait, a non-profit providing *therapeutic horsemanship for children and adults*, with physical, cognitive, developmental, sensory and/or learning disabilities and special programs to support the needs of *wounded military veterans*
- Despite the revised TxDOT assessment, ManeGait leaders have made clear that they cannot continue to operate if Option B is built so close to their facility

Adding noise pollution in adjacent, historic cemeteries

- Historic Walnut Grove Cemetery (with grave sites dating back to the mid-1800s) *less than 300 feet* from Option B highways)
- North Dallas Cemetery (*less than 100 feet away*)

Destroying property values and tax base

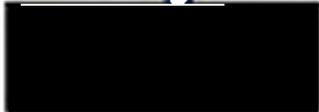

The proposed Option B multi-lane highway would cut through the heart of the east side of Prosper, harming the existing and future tax base critical for funding new schools and local fire, police, and other services

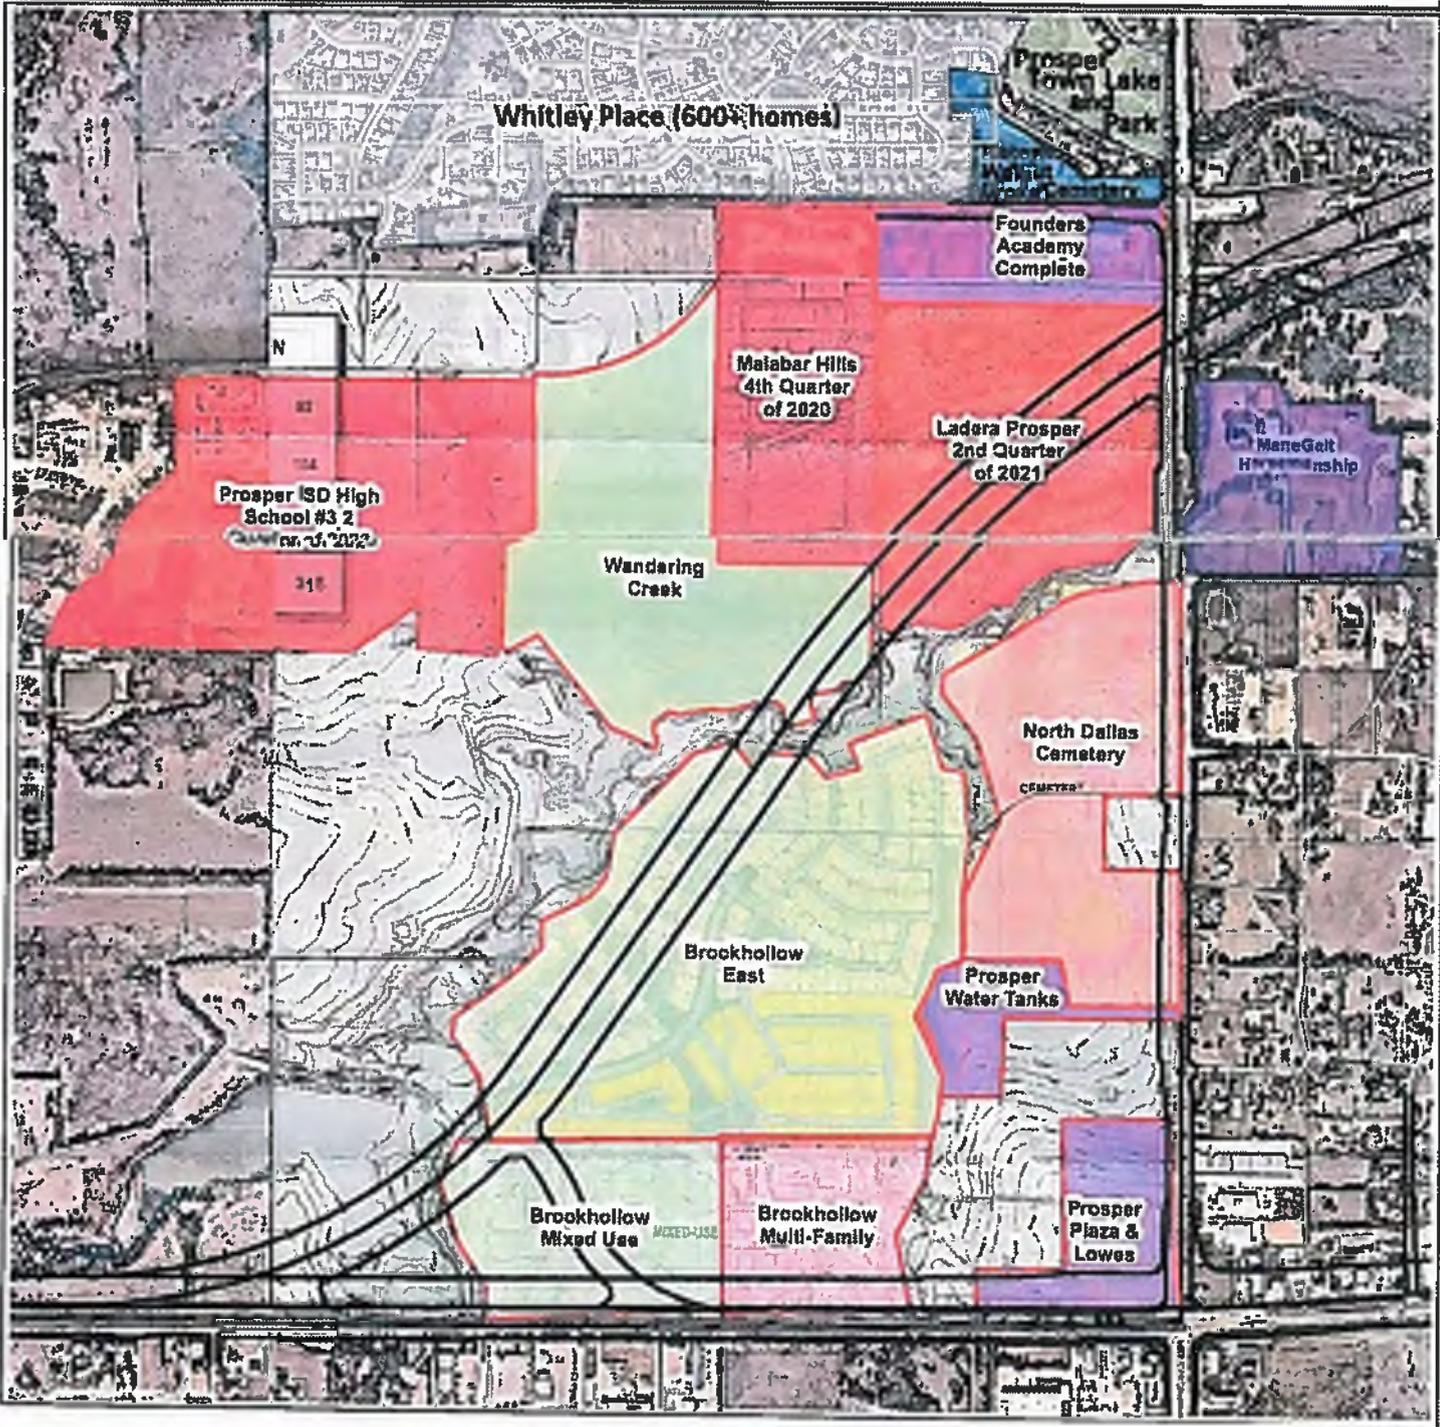

- Whitley Place, with over 600 homes and more than in \$400 million in property values that fund area schools and town services (*less than 500 feet away*)
- Latera housing development for seniors and Brookhollow East (both *right in the path of the proposed multi-lane highway*)
- The Malabar Hill subdivision now under construction on the south side of E. First Street (*50 feet away*)

Improving mobility across the 380 corridor is critical and we appreciate the vital and extensive work done by you and your staff. This improved mobility, however, should not come at the expense of a community that did the right thing by planning ahead for growth. For this and other reasons stated above, the correct option is Option A.

Sincerely,

Jeff Steel Corbin Steel

A Texas Department of Transportation message

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: I Strongly oppose any alignment that goes through Prosper, especially segment B of the proposed Gold/Brown alignment. This would have a negative impact on existing and future growth including Main Gait, Founders Academy, Prosper High School #3 and the 55 an older Landera development. The bypass would be in direct conflict with the Air Quality guidelines published by the North Central Texas Council of Governments. Being only 27 square miles, Prosper needs to keep and develop as much taxable land as possible. Please consider option A as the best option for the 380 bypass or option F as the best alignment for all municipalities involved. Let's keep 380 on 380.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

I support the option B to go future “possible business development in Prosper” over existing businesses, and homes in McKinney is criminal . Baylor McKinney hospital could be majorly affected, not only our high school students trying to drive to school! It will save millions, do you want to vote against saving millions, and not disrupt any retail or neighborhood ?

Respectfully,

Subject: 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

After looking at the US380 Bypass options that are being proposed and driving out near each route it is clear to me that option B makes the most sense. Progress means someone is going to lose their home, business, or property. I lived in a neighborhood that had to lose 12 homes in order to expand a major road. Each family was well compensated and that road was a blessing to all who drove it daily to work, school, or as a cut-through. So progress is needed, either option will hurt some property owners but if you choose option B it looks to me to hurt the least amount of homeowners and businesses already established along 380.

We are excited to get this project going after its been talked about for way too long. Progress needs to happen, unfortunately, someone's home will suffer as a result. Let's try to keep as many homes from being affected. I vote for option B.

Sincerely,
Jen Thomas

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Best Regards,
Jennifer Crawford

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: I support option A which is the alignment that was recommended by TxDOT and

strongly oppose option B for the following reasons. Segment B will introduce pollution from vehicle emissions. These emissions/ground level ozone will impact those that maintain services (Founders Academy & Prosper Walnut Grove High School) as well as the surrounding neighborhoods. Studies have shown that the pollution infiltrates the indoor air as well which involves both schools and our precious children. The increase in ground level ozone is in conflict with the Air Quality guidelines issued by NCTCOG. This pollution will impact and may take away opportunities for the persons with disabilities that Walnut Grove serves. This is a minority group and minority group protections should apply to this group. Another protected group the elderly will be either displaced or the neighborhood will not move forward as the proposed alignment B appears to run right through the Ladera Retirement Community. This development has already broken ground. Traffic from the proposed alignment B will endanger new inexperienced drivers with the close proximity to Walnut Grove H.S. as the parent of a new driver, I understand and feel this threat deeply. The town of Prosper strongly opposes any solution through Prosper besides keeping 380 on 380 through Prosper as documented by the 6 resolutions the Town Council has passed. Option B hinders development of our small town and takes away the opportunity so much needed.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

Continued

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT. My family and I have benefitted from MainGate and would hate to see it disrupted. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

General Comments/Feedback

Please provide your general comment here.

Hello,

My main concern with proposed route A is ingress and egress to a neighborhood with 350 existing homes with 270 more slated to be built. With the proposed route A, police, fire and EMS services will have a difficult time getting into the neighborhood in an emergency. Furthermore, with the flow of traffic exiting the neighborhood and no left turn onto 380 with proposed route A, all traffic would be directed to U Turn at Stonebridge Drive to go East bound on 380. This would create more traffic and the potential for increased accidents in making the U-turn.

Additionally, the impact to wetlands, wildlife and runoff with proposed route A is of concern.

A third concern is that many inexperienced, high school drivers would be re-routed driving to 3 different high schools during construction and they may not be able to safely navigate nor anticipate any driving issues that may arise because of the construction.

My 4th concern is the additional traffic that would be cutting through neighborhoods trying to escape the construction. The East/ West thoroughfares are already crowded enough and adding 18 wheelers on Virginia and Eldorado trying to go around the construction would be an absolute nightmare, not to mention the noise pollution and speed from the trucks.

Option A is 99 MILLION dollars more. Route B would allocate those tax dollars to be used elsewhere. Option B wouldn't impact the local businesses like option A will. Additionally, option B has 2 major utility conflicts versus option A's 7 conflicts.

Option B uses land not yet developed making the road more accessible for construction vehicles and it won't negatively impact traffic during construction like option A will. Option A displaces 12 homes and 17 businesses and that displacement means directly impacting 29 families concerning their homes and livelihoods.

In closing, option B makes the most economical, environmental and safety sense.

Thank you for your time.

Good afternoon Mr. Endres,

After carefully reviewing the map for proposed improvements, to me the only one that makes sense is Route B. Choice A would be far more impactful to home and business owners. Please choose Route B.

Respectfully,

Jerry L. Rice

Mr. Endres,

Please receive this email as a formal comment opposing Option B for the 380 bypass. This option will cause much disruption in the small town of Prosper and halt its growth. We have 3 schools in the direct route of that bypass, 3rd Prosper High school Walnut Grove, which will have many new teen drivers. Also Rogers Middle School and Founders Academy. The traffic would not be welcomed as well as the noise and pollution. Keeping 380 on 380 would be the way to go. Let Prosper have the land we need to grow with already many planned developments & residential communities in the direct area of proposed bypass.

Thank you for your time.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Jessica Joy Dolphin

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Hi Stephen,

As homeowner and citizen of McKinney, TX., I strongly support the project 380 segment-B bypass alignment option. This option is the least disruptive to business with no displacements, minimal impact on existing homes and families living in the neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- The cost of segment-A is \$99 million more than Segment-B.
- It will create an overpass on 30 over Stonebridge Drive and Custer Road
- It will also cause the installation of water pipes (ducts) over 380
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Laker Forest Drive, increasing traffic, noise, and pollution in our neighborhoods and reducing out property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Opposition to Option / Segment B HWY 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I have reviewed the Texas Department of Transportation Materials shared on March 22, 2022. Please accept the below statement as my comment on the project.

I, along with my Prosper Town Council, strongly oppose the Segment /Option B that depicts the placement of a bypass highway cutting through the west side of Custer Road, also known as FM 2478 into the Town of Prosper.

The Town of Prosper Leadership, Prosper ISD, and Prosper ISD's Leadership collectively stand opposed to suggested bypass routes that depict an unplanned highway crossing into the Town of Prosper's eastern boundary line, and cutting into the Town of Prosper, as these depictions directly violate our Town of Prosper's responsible planning for our shared future.

The Town of Prosper has meticulously planned for the future and the bypass is not congruent with Prosper's plans for the future. Prosper responsibly planned to accommodate 380's expansion from its current footprint, in the current alignment on the southern boundary of Prosper.

The geographic land size of Prosper is markedly smaller than that of the City of McKinney's geographic land size. Prosper's land area is roughly 25 square miles- in comparison the size of McKinney is nearly 70 square miles- McKinney is more than double, (and nearly triple) the size of Prosper in land area. The City of McKinney needs to stay in their lane and address their desires for 380's future within the geographic limits of the City of McKinney.

Do not ask the geographically smaller Town of Prosper that has gone through painstaking, responsible, thoughtful, collaborative planning for the future, to absorb issues of the much larger geographically sized City of McKinney. McKinney needs to address its wants and needs regarding the future of 380 within its City of McKinney boundaries.

The Town of Prosper Leadership have shared strong opposition to any bypass into the Town of Prosper. At the time of this writing (March 2022), the Town of Prosper has already had to respond multiple times to suggestions of an unplanned bypass highway route into its geographic boundaries. Each time, the response has been united and strongly opposed to the route suggestions of an unplanned bypass highway cutting into the Town of Prosper. Below are links to Resolutions against a bypass route into Prosper, and supporting 380's expansion in its current alignment, as has been planned:

- April 11, 2017: [Resolution 17-29](#)
- October 15, 2018: [Resolution 18-89](#)
- March 26, 2019: [Resolution 19-17](#)
- May 14, 2019: [Resolution 19-24](#)
- November 24, 2020: [Resolution 2020-87](#)
- July 13, 2021: [Resolution 2021-34](#)

Additionally, in 2020, Texas Department of Transportation supported keeping 380 and its expansion in the current alignment in Prosper.

The Perryman Group (TPG) 2017 study (funded by taxpayers) supported 380 staying in its current alignment for a multitude of logical reasons, including fiscal reasons (TPG, 2017).

Segment / Option B would negatively impact ManeGait, a therapeutic riding center which serves federally protected populations including: the disabled, children, and our veterans. I have served as a ManeGait volunteer since its opening, and know what an invaluable service it provides to the community. In addition to services provided to its riders, it also supports local university students from TWU and UNT in research on the benefits of equine therapy to children, the disabled, and veterans; and it proves a space for service projects for countless young people in Prosper ISD, McKinney ISD and beyond. In 2020, Texas Department of Transportation identified ManeGait as a “*key community resource*”. Citing the Americans with Disabilities Act (ADA) and the Executive Order 12898 on Environmental Justice, Texas Department of Transportation had previously removed from consideration any alignment that impacted ManeGait operations.

But now, Segment / Option B depicts the placement of a 45-foot-tall freeway within 50-100 feet of ManeGait- closer and more disruptive than earlier depictions of unplanned bypasses.

No other Professional Association of Therapeutic Horsemanship (PATH) Premier Accredited Center in the state of Texas the size of ManeGait is located within 50-100 feet of a highway, and none have operated next to a 3- to 4-year highway construction project. In fact, the City of McKinney cited disruption to the sensors at Raytheon in McKinney during potential construction as a reason not to expand 380 in front of the McKinney Raytheon facility- why would this impact then be acceptable in close proximity to federally protected populations of human beings including children, veterans, and disabled individuals, while they are riding a horse for therapeutic benefits? Do the right thing and remove Segment / Option B from consideration.

Our most vulnerable and federally protected populations deserve a safe, high quality, accessible location to receive the world-class therapy programs which ManeGait provides.

Negative impacts of the Segment / Option B depicted in Texas Department of Transportation materials are many and include a violation of our Town’s community vision, painstaking planning and goals, quality of life impacts such as safety issues, increased noise, and negative impacts to our environment and air quality.

Additionally, the Segment / Option B depiction,

- Wastes fiscal resources
- Deviates from recommendations and resolutions
- Stands in direct violation to Prosper's responsible planned future land use
- Erases the potential for ManeGait to continue providing world-class therapy services to our veterans, children, and individuals with disabilities- *federally protected populations*
- Negatively impacts the future of the Town of Prosper and its citizens

I support the 380 alignment in its current footprint as has been planned for; The shortest distance between two points is a straight line, and 380 serves us well in that way. The current alignment of 380 will have less impact on families, lives, planned developments, planned land use, planned roadways, current and future schools (private and public), community resources including ManeGait, and the environment; and finally, keeping 380 on 380 preserves the commitment and painstaking planning of the existing Town of Prosper plans.

I implore you to listen to the Town of Prosper Leadership, Prosper ISD, the ManeGait Community, and the residents of Prosper- we do not want a bypass cutting into the Town of Prosper- we have planned for the future, and are ready to grow 380 along its current alignment. If the City of McKinney is advocating for a bypass of 380 that deviates from its current alignment, then the City of McKinney needs to address the accommodation of this deviation within its own boundary- within its own City limits.

I, along with my Town of Prosper Leadership, strongly oppose Segment B, that depicts the placement of a bypass highway cutting through the west side of Custer Road, also known as FM 2478, into the Town of Prosper. The Town of Prosper has carefully planned for its future and will accommodate 380's expansion along its current alignment.

Subject: US380 Expansion Project - Opposed to Option A, and Supportive of Option B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

We are Jim and Kate Ryan and we are homeowners in the Stonebridge Ranch Community in McKinney. We are writing to you to ask you to please reject Option A, and vote for Option B on the Highway 380 Expansion Project. We strongly oppose Option A for many reasons we'll now explain. Option A will have a severe negative impact on Stonebridge Ranch and Tucker Hill with increased traffic and noise. There are 2 elementary schools and a daycare very close to 380 that would also be impacted by Option A. Option A will displace 17 businesses, while Option B won't displace any businesses. Our understanding is that Option A is more costly (about \$100 million) than Option B, to relocate the utilities, to acquire ROW, and for the cost of design/construction. Option A also impacts more acres of wetlands, river, streams, forest/prairies than Option B, and Option A impacts 14.9 acres of Statewide important Farmland, while Option B only impacts 2 acres.

In addition to the higher cost of Option A, please consider the impact to the value of our property and the impact to the businesses that will be displaced. During The recent TxDOT meeting on the US 380 expansion, we learned one of the proposed options = A, will put a 25 foot elevated 8 lane highway at the intersections of Stonebridge and 380, as well as, Custer and 380. Previous renditions of the US 380 expansion from Custer to Stonebridge had this stretch below grade with Stonebridge and Custer being the overpasses. So, learning that the current proposal for Option A now includes a raised highway similar to the stretch of 75 from El Dorado to Wilmeth was extremely concerning. Option B doesn't come close to any neighborhoods, so why consider an option that is more expensive, and will cause so much disruption to existing neighborhoods, citizens, and citizens' property values? It's very concerning to think that citizens who work so hard to acquire these properties, and maintain them, pay property taxes to the city and county, could have such a significant negative impact to their property and property values. We want to protect our property values because we have invested so much to live here! **Please consider the people that will be impacted by Option A.** Please vote to approve Option B.

Best Regards,

As a homeowner and citizen of McKinney, TX., I strongly **SUPPORT** the **Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

Subject: Project 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen, just a note recommending TXDOT to choose Segment B for the Project 380 bypass route. Because there are developments on the land running across segment B and the cost of Segment B is \$99 million less than Segment-A the decision should be easy for TXDOT to make. In addition, the Segment A choice will be adding a tremendous amount of additional noise to the already busy StoneBridge Ranch area.

Please choose the **Segment B** option.

Thank You,
Jim

COMMENT:

I oppose the proposed HWY 380 Segment B plan because it's very close proximity to ManeGait Therapeutic Horsemanship fails to protect the vulnerable populations (Special Needs and Youth) that it serves. ManeGait is a key community resource as identified by TxDOT. ManeGait should have it's property protected so that it can continue to provide a safe and high quality environment for the individuals receiving the world-class therapy programs that ManeGait provides.

Attention Mr. Endres,
I have read about the two option concerning the expansion of the 380 roadway. On the surface it appears that option A would cost more than option B, take longer to complete and cause addition disruption to the surrounding neighborhoods.

If the disruption, cost and length of time is greater under option A when compared to option B it would seem to be an easy answer to go with option B.

However, there must be several addition items that have not been provided that make option A an viable option.

So, can you please provide me (us) with this information so we can make an informed review of this project?

Thanks in advance for your help.

“For Segment B”

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. There is a natural floodplain area to follow for Segment B that would not cause nearly the disruption to people and businesses as Segment A, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Segment B would additionally eliminate two 90° turns which seems to also be safer for drivers. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. Also, the South East Corner of Custer and 380 has approved a Whole Foods Plaza to include a shopping center and apartments . . .just announced!! This adds another problem with traffic at that corner. Considering this, and the items below, one wonders exactly what the reasons would be for not choosing Segment B.

I strongly oppose Segment-A. It should not be considered for the following reasons:

- ❖ It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- ❖ The cost of Segment-A is \$99 million more than Segment-B.
- ❖ It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- ❖ It will also cause the installation of water pipes (ducts) over 380.
- ❖ It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- ❖ It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- ❖ 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy.

Regards,
Joan Dunbar

Dear Mr. Endres:

Please strongly consider Segment B for the following reasons:

Cost-Segment B is by far less expensive to tax payers. This reason in itself should be cause to select Segment B

Lives impacted- Segment B will create a safer driving situation for our high school age students since the area they drive to school will not be impacted whereas, Segment A would

Existing Businesses-established businesses and their employees will be affected with Segment A whereas Segment B has very little impact.

Hello Mr. Endres. We have lived in Stonebridge Ranch for over 12 years now. We moved here because of the amazing master plan this community was built on. We strongly OPPOSE the Segment -A bypass plan which will cause traffic, safety, and noise issues in our currently peaceful neighborhoods.

We are FOR Segment -B bypass plan which I understand is way less expensive and makes far more sense, not only economically, but because it is less disruptive to the existing businesses and would have less of an impact on homes and families living close to 380.

Segment - B bypass is clearly the best option all around. Please don't destroy the beautiful, tranquil living that so many 1000's of residents of the Stonebridge Ranch villages enjoy.

To be clear, we SUPPORT Segment - B bypass plan.

Thank you for hearing me out.

Respectfully,

Joanna Jestings Phillips

Good day Mr. Endres,

I am writing to voice support for the US 380 Segment-B bypass route.

If Segment-A is chosen, the traffic on Custer Road can only increase as drivers travel to the Sam Rayburn Tollway from US 380.

When we first moved here, Custer was a two lane road. There was only one stop sign during my drive between my home and Kroger. Today I pass through four intersections with traffic lights.

I do appreciate the traffic signals. During the morning and evening rush hours, I could not get from Cotton Ridge onto Custer if the stop sign were still there.

Sincerely,
Joe Closs

Subject: No to Option B on 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Mr. Endres,

I am writing to you to share my **STRONG** opposition to the bypass and Option B running through Prosper. I am a resident of Whitley Place and have been for the last seven years and disagree with the bypass running through Prosper for the following reasons:

- 12+ lanes going right through Prosper (8 lanes & 4+ access lanes on either side) with the magnitude equal to US 75, located just south of Founders Academy
- US 380 Bypass Segment B options + approved Collin Outer Loop (4-6 lanes) just north would sandwich NE & SE Prosper in between 2 major highway thoroughfares
- Directly affects and disruptive to numerous neighborhoods: Whitley Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, etc.
- Prosper properly planned for expansion (380 can be widened!). If other towns didn't plan this can't be put on Prosper
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Classical Academy and student drivers
- Increased Traffic and Noise
- Materially impacts ManeGait and the wonderful therapy they provide to children, veterans, and our disabled community
- Exorbitant costs of acquiring rights of way, adverse environmental impacts, wetland mitigation
- This design does not make for an acceptable proposal nor effective use of taxpayer money
- School buses having to go on a highway to take kids to school / young drivers for the high school having to deal with highways and high speeds
- Significant environmental impact: pollution, emissions, & poor air quality
- Safety of our citizens and students
- Decreased home values and overall desire of area
- Massive utility relocations that are critical to Prosper's infrastructure
- Substantial lost tax revenue to the Town and Prosper ISD

In closing, I highly oppose Option B and want 380 to stay on 380 or Option A to be considered.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

As someone who has watched all the meaningful development occur in Prosper, I am very much opposed to Segment B and am in favor of Segment A. I'm so happy to see the schools and retirement communities being developed next to Mansbrite, an organization that does so much good for the community. I would hate to see this progress set back. I would hate to see so much pollution (noise/fumes) be in proximity of children - it's not healthy. Please keep TxDOT's original pledges to stick with Option A. Thank you.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN

ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Regards

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

We oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait – a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. ManeGait is very special to us as our daughter has been a rider there for several years and it has made such a positive impact on her life.

To: Stephen Endres
Subject: Support for 380 bypass segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Respectfully,
John and Mary Reese

INTEGRITY GROUP

Developing & Building Dreams

April 20, 2022

Mr. Stephen Endres, PE
TxDot Dallas District Office
4777 East US Hwy 80
Mesquite, TX 75150-6643

Mr. Endres,

I am writing on behalf of the ownership team of Ladera Prosper and the future ~425 homeowners of the 244 homes which is now under development.

Ladera Prosper has completed, prior to the start of 2022, all requirements of TxDot to move it to the optimum color for TxDot's "heat map" which would have eliminated "Segment B" from consideration, much like when Founders Academy began construction and that option was eliminated. At the time of the purchase of this property in Sept 2021, Segment B was no longer on the table, and we considered this item closed. To find out only months later this has been brought back up is viewed as a "bait & switch" at best.

Besides the obvious opposition stated above, we additionally oppose for the following reasons;

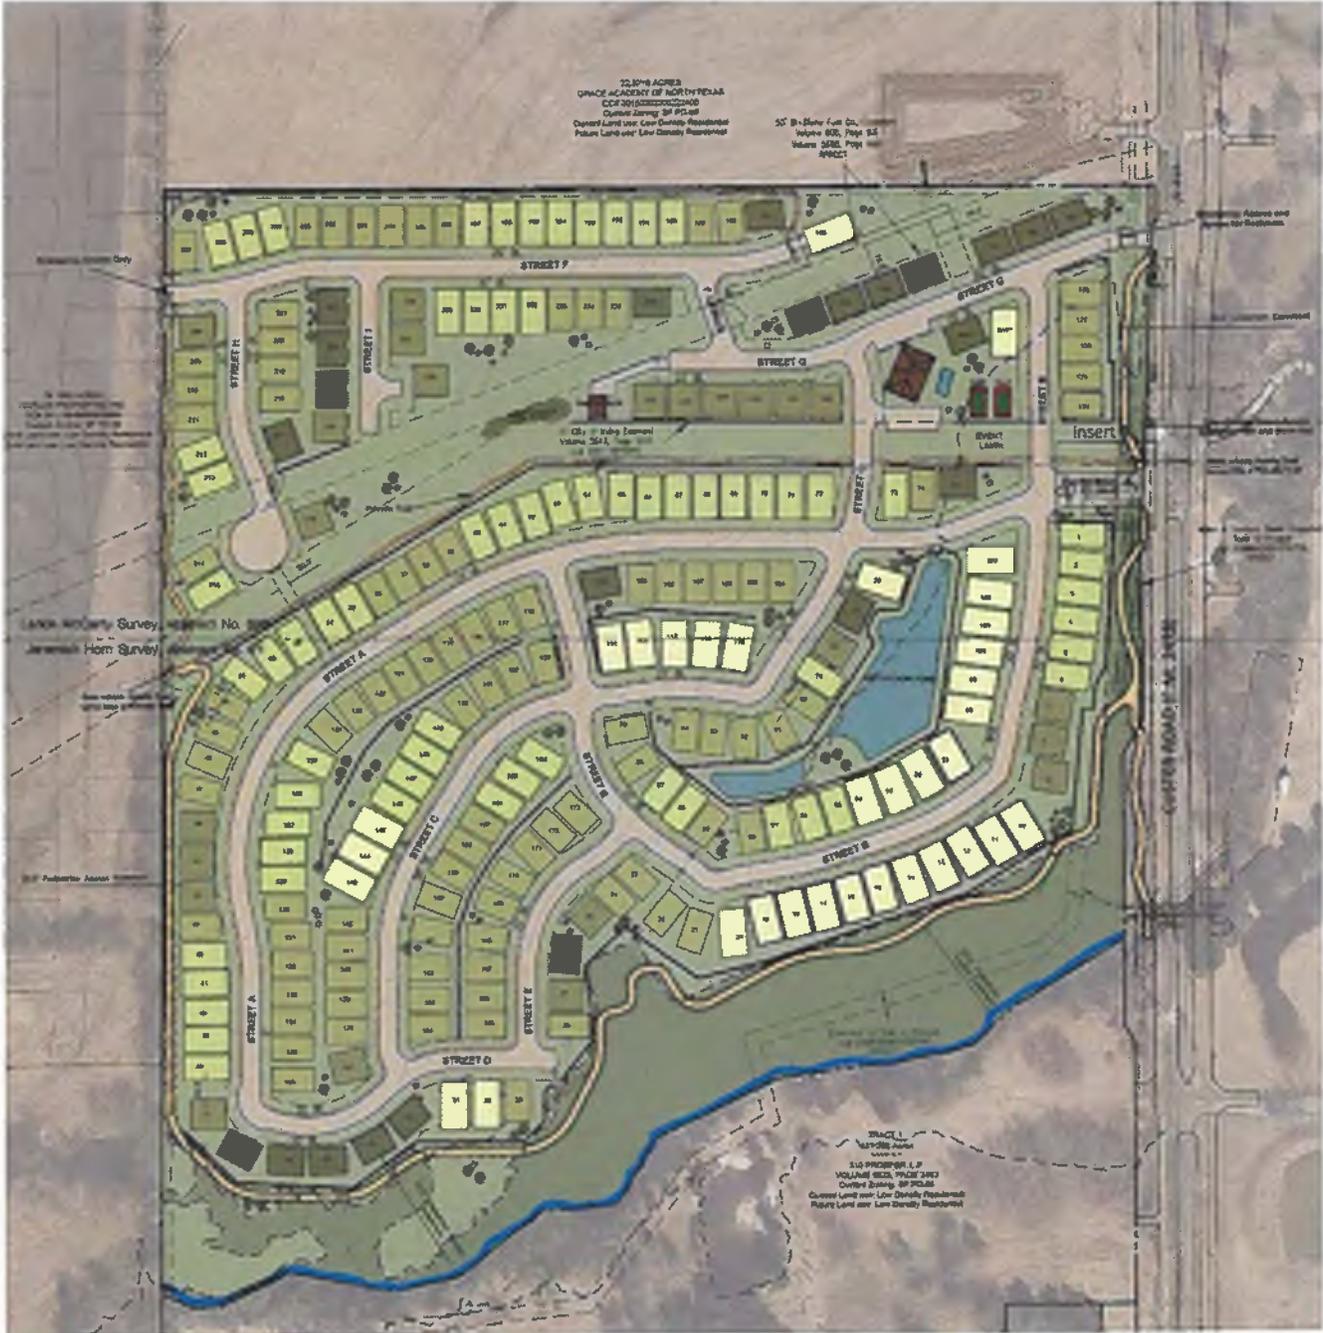

- 244 sf homes, valued conservatively at \$430,000/home or \$105,000,000, for AGE 55 & OVER, would be eliminated from Prosper, which is needed. It is a Condo Community, 1 lot.
- \$1,400,000+ of annual Prosper ISD tax dollars would be eliminated. Since NO KIDS are allowed, it's a double hit to the ISD.
- With anticipated home construction beginning this year and with 20-40 homes on the ground and some occupied by 1st quarter 2023, the impacted cost to TxDot rises dramatically.
- Segment B negatively affects the ManeGait property and most importantly their ability to help individuals with disabilities and children, both of which are protected by the American Disabilities Act. ManeGait should also be protected by Presidential Executive Order 12898.
- Segment B traverses some of Prosper's most strategic residential and commercial land which renders most of it invaluable to its intended and platted use. Additionally, it negatively impacts a Soil Conservation Site(Lake), 1b Rutherford and soon to be Park area.
- Segment B disregards the Town of Prosper's 7 resolutions opposing this alignment.
- Segment B disregards multiple developments whereas Segment A is mostly designed thru unplatted land.
- Segment B would eliminate over 4100 linear feet, over ¾ of a mile of the Prosper Trail and the park like setting it would meander thru, adjacent and part of Ladera Prosper.

We respectfully ask you to DROP Segment B altogether and seek a more viable option.

Regards,

John Delin, CEO

Thank you for your comments. The reason TxDOT does not post the materials before the meeting is because we are still developing the materials to be presented right up to the day of the meeting.

That is one reason we provide a 15 day comment period after the day of the in person meeting.

TxDOT is always available to answer questions over the phone after the public meeting.

The public meeting is an open house public meeting where we try to answer questions individually.

I hope this answers your question.

Mr. Endres,

We just received the letter from TXDot regarding this proposed project.

Please let me know why the materials to be reviewed at the 3/22 meeting will not be available until the meeting begins as stated on the web site.

I would think it would be a more informative Q&A if this information were available before the meeting begins. This way participants would be able to ask more intelligent questions about potential impacts to their businesses or residents.

Waiting to spring detailed information about this proposal to those impacted by this project at the last possible moment is not productive and hinders open discussion.

Thank you.

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

The new proposed segment B seems to be a much better alternative. There is less impact to communities and it is very evident you will get many more people using this route to avoid Custer/380 intersection vs the route A that was previously proposed. Route A is a bypass but will not get as many people using it - thus not making a significant improvement on traffic.

Thank you.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres, hopefully the subject of this email makes it easy for your team.

I live in La Cima, just a short distance from where Option A would put a huge disruption to our area. I'm sure you've heard many times from strong supporters of both options and I have no real additional facts to add to either argument. I think those are already apparent, but let me restate them briefly;

Option B is significantly cheaper

Option B will cause less disruption to existing, rather than planned, businesses and communities

Strong accommodations have already been made to reduce the impact of Option B, such as the movement reducing the impact on ManeGait and the charter school.

On the other hand, no real accommodations seem to exist to reduce the impact on our community of the greatly expanded US380 west of Ridge Road

For these reasons, please support and build Option B.

Thanks,

John Gossner

Subject: Hwy 380 Bypass McKinney, Tx - Comments

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen. Thanks for considering comments on the Hwy 380 Bypass plan. Mine exceeded the online form limit so here it is:

The Sam Rayburn Toll Road (SRT) was built in record time by the NTTA. Same with the President George Bush turnpike (PGBT) in North Dallas/Plano. Also, the LBJ Express project in North Dallas. These are great roads. I am in favor of tolling all public arterial roads. Consider that the Highway 380 congestion is not just localized to McKinney; Hwy 380 is difficult from Denton to Princeton and beyond. It is a 36 mile problem. Denton built loop 288 many years ago, which allows access both north and south to Hwy 35. We need a visionary plan to reduce the drive times throughout this area. Why not consider a limited access toll road on the original Hwy 380 ROW, either elevated or below grade. Operate it like all the other toll roads. I see a need for eventual rail down the centerline, serving Denton, McKinney, possibly over to Greenville and all points in between. The current plan to deviate north will require the purchase of very expensive right-of-way, and will be detrimental to Prosper and North McKinney. And the increased distance would be a deterrent to use, and not of much interest to drivers intending to go south on Hwy 75. The proposals I have seen are short-sighted knee-jerk reactions on the "just do anything" category of bad planning. Why not slow down and think big in creating solutions that will not be obsolete when the last concrete is poured? Consider asking the NTTA for their ideas.

Thanks for listening.

Subject: Keep 380 on 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My name is John Himel I live at [REDACTED]. I am absolutely against any plan to move US380 away from where it is at.

I moved from Frisco to Prosper because I love the small town feel and the schools. Any bypass would destroy that. My kids will go to the Walnut groove High school, or should go. It was a major reason why I moved to my home. I wanted to keep my kids away from 380 traffic.

I know that the Mckinney residents have there complaint's as do many people about 380 and the expansion. However, if you have bought into a niegbor hood off of US380 you knew that expansion was going to happen. To reroute this highway through our town will destroy so many of the reasons I picked Prosper, I would consider moving.

I love my town, please do not put a Highway running through Prosper.

Thank you
John Himel

Hi Stephen,

I am writing to support OPTION B in the 380 Bypass Project Proposal near McKinney, TX.

OPTION B allows for the proper offloading from COIT road to allow traffic to flow in/out of 380. Anything closer (like Ridge) is a big mistake and in my opinion will NOT reduce traffic on 380 where reductions are needed most.

I am a 23+ year resident in this area and wanted my opinions heard.

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Thank you,

Hello -

My name is Johnna Hensley and I am a Collin County resident at [REDACTED] I'm writing to voice my opposition for the proposed 380 Segment B project. As the mother of a special needs child, I am very aware of the risk to vulnerable populations. This proposed Segment B would interfere with the services that ManeGait provides to children like my son.

Thank you for your consideration,
Johnna Hensley

As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9461 residences and 36,000 residents of Stonebridge Ranch located in McKinney.

In a unanimous vote on March 24, 2022, the SRCA Board stands in agreement with and support of the City of McKinney's official position on its preferred 380 bypass route Project 380 Segment-B.

We hereby make an official statement to reaffirm our support of bypass Project 380 Segment-B and oppose bypass Segment-A.

Attached is a letter outlining our reasons for this decision. I trust you will take the time to read it.

Jon Dell'Antonia

April 4, 2022

To: Mr. Stephen.Endres@txdot.gov

As President of the Board of Directors of Stonebridge Ranch Community Association, I represent our Board of Directors who were elected to make decisions that are in the best interest of the 9461 residences and 36,000 residents of Stonebridge Ranch located in McKinney.

In a unanimous vote on March 24, 2022, the SRCA Board stands in agreement with and support of the City of McKinney's official position on its preferred 380 bypass route Project 380 Segment-B.

We hereby make an official statement to reaffirm our support of bypass Project 380 Segment-B and oppose bypass Segment-A.

Segment-B is the most viable, least expensive by \$99 million and least disruptive with no displacement of businesses and minimal displacement to homes along 380 when compared to Segment-A and since there is no encroachment on ManeGait property, that issue is no longer a consideration.

As to the detrimental impact on Stonebridge Ranch if 380 Segment-A were adopted, it would bring significantly more traffic to the area. In addition to the increased noise for the hundreds of homes in Stonebridge Ranch that abut 380 on the Northern edge of Stonebridge Ranch, there are three roads: Lake Forest Drive, Ridge Road, and Stonebridge Drive that go completely through Stonebridge Ranch and provide the only means between Hardin Road and Custer Road for getting to Virginia Parkway, ElDorado Parkway, Custer Road and Highway 121. These roads were designed for neighborhood traffic and not arterial connectors to other major roads.

If the proposed bypass Segment-A that enters Highway 380 East of Custer Road were implemented, in addition to the above traffic problems, there would have to be a major interchange built at the intersection of the new six lane bypass and existing 380 which is already six lanes. This interchange would be right above the

Stonebridge Ranch Community Association, Inc.

Northern edge of Stonebridge Ranch's Kensington Village just east of Ridge Road. Segment-A would have an extremely detrimental impact on Stonebridge Ranch beyond any other option by bringing a significant increase in traffic along with an increase in the air and noise pollution to our neighborhoods. Construction quality should be tested if Segment-A is selected due to the requirement for depression of the roadway and the addition of two overpasses. The air quality issues that would be present during the 3-4 year construction period would also create significant health and environmental problems for all citizens in the construction zone and beyond. Further the increased traffic congestion will create problems particularly for the teenagers who use 380 daily to drive to two of the high schools nearby and slow the response time for emergency service vehicles (ambulance and fire) during that period.

There is also no longer a need for Segment-A since Ridge Road is currently being extended as a four lane highway from 380 to what will be Segment-E connecting that part of the bypass to 380 less than a mile East of the proposed Segment-A route.

To reiterate, our Board, on behalf of our residents, has unanimously voted to **support** Project 380 Segment-B that crosses Custer Road North of 380 and enters Highway 380 West of Custer Road **and oppose** Project 380 Segment -A.

Thank you for taking the time to consider this letter and our position.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen

I am writing you personally to express my support for Project 380 Segment-B. You and your team did an outstanding job of evaluating this project with your segment analysis matrix. I looked at all 35 elements and after reading them, it is obvious that Segment-B is the correct choice.

My reasoning is based on the following key facts from your matrix:

1. It is the least expensive option by almost \$99 million when compared with Segment-A.
2. It saves 17 businesses (and more coming) from being destroyed (no displacements).
3. There is no impact to Mane Gait property or operations so that issue has been eliminated.
4. Ridge Road which is a mile East of the proposed Segment-A is currently under construction as a four lane highway connecting 380 to what will be Segment-E thus negating the reason for segment-A.
5. Construction time is expected to be 3-4 years which would create significant environmental and traffic issues for our community.
6. The tunneling and overpasses required to construct Segment-A would be unsightly and not fit in well with our community.

Finally, at the McKinney City Council meeting on April 5, 2022, the Council passed a resolution supporting 380 Segment-B and opposing 380 Segment-A. McKinney. That should reinforce and clarify their current position.

Subject: A different thought about Project 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen

I do not know if you have considered rethinking the 380 bypass project but seems to me that building the outer loop instead of the bypass would resolve a lot of issues.

It would improve traffic by providing a direct route between highways 35 and 75. We need another option like this.

It would end the issues between McKinney, Prosper and ManeGait.

It would be quicker to build and likely less expensive since a lot of the necessary right of way is undeveloped.

Just my thoughts for you.

We wish to lend our support in protesting the proposed path for Highway 380, which takes it dangerously close to **ManeGait Therapeutic Riding Center**.

The negative impact this will have on the disabled clients, and operations for the people they service is immeasurable.

We urge you to reconsider the path for this highway, we know there are no easy solutions or people it won't impact, but affecting and disputing the handicapped and disabled who receive therapeutic services from ManeGait and the community they service- *serves no one*.

Facilities for their operations are unique, they can't simply be replicated a few miles away, their clients are all special needs individuals. We hope there is some compassion in your thought process, and planning.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing to let you know of my strong opposition to Segment B for the 380 bypass. I am a resident of Whitley Place in the Town of Prosper. The Town of Prosper has been opposed to Segment B because of the negative impacts on the Town. The Town of Prosper has planned for the potential growth and should not be negatively impacted by the lack of planning by the City of McKinney.

The City of McKinney should now bear the burden of that failure to plan. Bypass B would unduly punish the citizens and taxpayers of Prosper for the failure to plan by the leadership of a bordering municipality. The suggestion of building a 12-lane bypass in such close proximity to a charter school, elementary school and high school is unconscionable. The proposed Segment B would materially impact ManeGait and limit their ability to provide therapeutic services for disabled children and veterans. The Ladera Community, an active retirement community of 244 homes, would be demolished resulting in lost tax revenue for the Town of Prosper and Prosper ISD. Bypass B would require a massive utility relocation effort that are critical to Prosper's infrastructure. There would not even be a NEED for a bypass if McKinney had planned properly. McKinney caused this problem, so if there is a need for a bypass through McKinney because too many businesses were built too close to 380, then the bypass belongs in McKinney, not Prosper! Prosper supports widening 380 on 380 through its city limits. I oppose ALL Segment B options and support widening 380 on 380 through Prosper.

Thank you for considering my opposition to the Segment B option.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

As a homeowner and citizen of McKinney, Tx., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- The cost of Segment -A is \$99 million more than Segment-B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- It will also cause the installation of water pipes (ducts) over 380.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Best Regards,

Jordan Parley

Subject: US 380 Project From Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am **STRONGLY** opposed to Option A for the US 380 expansion project for the following reasons:

1. Option A displaces a total of 17 businesses while option B displaces ZERO.
2. Option A cost to relocate utilities is \$61M, while option B is \$25M. Option B saves taxpayers and the county \$36M.
3. Option A total cost to acquire right of way is \$178M, while option B cost is \$137M. Option B saves taxpayers and the county \$41M.
4. Option A total cost of design/construction is \$450M, while option B cost is \$428M saving the taxpayers and the county \$32M.
5. Total **additional** cost of option A, using only the examples above, is **\$109M** versus option B. Option B presents a financially responsible alternative in an environment of rising home values, which lead to rising tax liabilities, and overall inflation depressing taxpayer free cash flow.
6. Option A impacts more acres of wetlands, rivers/streams, and forest/prairies than Option B and negatively impacts McKinney's motto: "Unique by nature".
7. Option A impacts 14.9 acres of Statewide Important Farmland while Option B only impacts 2 acres.
8. Option A increases noise volumes that would have a severe negative impact on the *established* Stonebridge Ranch neighborhoods. Option B does not come as close to any existing neighborhoods.
9. Option A would cause increased traffic on Stonebridge Ranch Dr. and Ridge Rd, both of which have elementary schools (Wilmeth Elementary and McClure Elementary) very close to 380 putting parents, staff, and, most importantly, children at risk to serious injury and/or death.

These are but a few reasons to oppose Option A but each has an important financial, environmental, aesthetic, and taxpayer *safety* impact that makes option B more than an appealing option. These simple reasons make option B a **responsible** option. Please note my strong opposition to Option A and **strong agreement with Option B!**

Sincerely,

Jose Rincon

Subject: RE: US 380 Project Brown and Gold Build Alternatives Outlined at 3/22/22 Public Meeting

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

The Brown Build and Gold Build Alternatives as outlined in the information provided at the 3/22/22 Public Meeting will have a disastrous impact on the Town of Prosper. These plans, and specifically, Segment B should not be pursued going forward for the reasons outlined as follows.

Generally speaking, Segment B will negatively impact the Town of Prosper and is unfair based on the much smaller geographic footprint Prosper encompasses compared to much larger communities e.g. the Town of McKinney. Segment B was previously eliminated as an option however (due to political pressure?) is now back in play? Truly a "David and Goliath" scenario and it is clearly evident in reviewing the alternatives that the Segment A Option will cause the least amount of disruption and environmental damage. My hope is TxDot will do what is right versus what is politically motivated. Some additional facts to consider:

- Prosper has passed six Town Council approved Resolutions strongly opposing any proposed alignment for widening of US 380 not located along the existing US 380 corridor;**
- Segment B poses a significant, negative impact to both existing and future residential and commercial developments planned within Prosper. The alignment would directly impact over 360 future homes and thousands of residents and indirectly impact many more;**
- Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by NCTCOG;**

- Segment B runs directly through a quickly developing section of Prosper causing significant environmental impacts on human and natural environments by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities;
- Segment B is in close proximity to existing and future schools including high schools impacting thousands of students.

I am confident the vast majority of Prosper residents concur with the aforementioned points.

Kindest regards,

Joseph Sain

To: Stephen Endres
Subject: US 380 By Pass Option B Concerns

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres

I am reaching out to you to express my opposition to the "new" US 380 option "B" configuration to the proposed US 380 By Pass.

My family and I chose to move into the Whitley Place neighborhood in Prosper, only after TXDot had removed the configuration placing the Bypass within a few hundred feet of Whitley Place. We would not have chosen to move into Whitley had we known there was still a possibility a bypass could be so close to our neighborhood, let alone our house.

The negative impacts that Option "B" would have on the community are enough to disqualify the Option "B" alignment. Option "B" would bring noise pollution, increased pollution, congestion and would devalue property values in Prosper. Founders Academy and ManeGait would be so negatively impacted, that I am concerned they would not be able to continue to provide the services they do to the community. Having hundreds of kids with-in feet of a 12-lane highway and a facility dedicated to therapy of some our communities most at risk residents, should again be a non-starter and disqualify Option "B". If you have a chance to visit the ManeGait facilities, you will notice how quiet and relaxing the area is. You would also understand how the great work that is done at ManeGait would no longer be possible as cars go rushing by on the corner of the property. The traffic in the area will cause problems for Founders to get parents and students onto campus and ManeGait will have issues transporting horses on and off campus.

These two facilities would not be located in their current locations, had there been a highway there before their construction. They do not deserve to have a 12-lane highway placed on the corner of their property just because of poor planning.

The Whitley Place, Malabar Hills and Ladera communities would not be in their current place either, had a 12-lane highway been place so close to where Option "B" is laid out. Instead of being able to sit out in your own yard or walking through the many green spaces would be interrupted by the noise of cars just a few hundred feet away on a 12-lane highway. Trash from passing vehicles will end up in our beautiful neighborhoods. Property values would be negatively impacted due to the proximity of Option "B". There would additional traffic from cars getting off the highway cutting through our neighborhoods and increased crime from cars getting quickly on and off the highway. Option "B" would rip right through a community of 55 and older (Ladera) that would destroy that brand new neighborhood.

These neighborhoods, schools and special needs facilities were placed where they are because there wasn't a 12-lane highway. They were also placed far away from US 380 to ensure any expansion wouldn't negatively impact their residents. Prosper has been out ahead to ensure right of ways and set backs were in place for the expansion of US 380. Because Mckinney did not plan, Prosper should not bare the negative impacts of 12 lane highway cutting through a great community.

Again, I strongly believe these reasons alone should disqualify Option "B". My family and the Prosper community strongly oppose Option "B" in any configuration through Prosper that is not on the current US 380.

Thanks for your time, should you have any questions or would like to follow up. Please don't hesitate to reach out.

Subject: 380 Proposed Improvement from Coit to FM1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I live in the Stonebridge Ranch community. I purchased my home in early 2016, and this community was almost completely built out at that time. We were promised the same quality of life that I now hear shouted by the brand new or not even yet built communities of Prosper.

Hwy 380 was already busy, especially traveling toward Denton; however, it had far fewer businesses & neighborhoods built along it than the current status. I had no idea of what traffic was coming. The business growth and the newer northern construction has made this highway almost impossible to travel. It is not only the residential use but also the big rigs going from west to east.

Per your map, **Option F** - the improvement to Hwy 380 is **IMPOSSIBLE**. This would have needed to be completed years ago! Currently there are too many businesses and homes already existing along this route with even more business locations under construction.

Option A is also a proposal whose time has already passed. Custer Road intersection to Hwy 75 is completely built out. You have MANY homes and neighborhood that are just as nice as those proposed in Prosper that are already firmly established. The residential streets of Stonebridge, Ridge, Lake Forest, etc are currently being used as cut-throughs to/from Hwy 380. They were built through neighborhoods with a 40 mph limit and are now used as "highway" with cars traveling 60+ mph and blowing through 4-way stops, even on school corners. There have been numerous accidents involving children & pedestrians.

The ONLY Workable and Fair proposal is **Option B (Coit) → E → D or C.**

Thank you for the consideration,
Joy Townsend

Subject: Support for Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I would like to express my **support for Project 380 Segment-B.**

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A.** It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Opposition to Gold and Brown 380 Bypass Options

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Segment B would run directly through a rapidly-developing section of the Town of Prosper, causing significant environmental impacts on the human and natural environment. It would add a new and unplanned interstate through Prosper, versus using the existing alignment within Town limits. Most notably, it creates noise, air pollution, and traffic impacts.

Segment B would increase ground level ozone impacting at least two environmentally-sensitive facilities (ManeGait and Founders Academy), conflicting with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG).

Segment B would have a detrimental effect on ManeGait Therapeutic Horsemanship (MGTH); a unique, nonprofit facility providing equine therapy to hundreds of adults and children with disabilities. People with disabilities have the right to a favorable environment to promote healing. The horses' safety and behavior will also be impacted. It would be unsafe to exist within proximity to that amount of noise and pollution.

At Whitley Place, one can even hear MGTH's once-a-year fundraising event, which produces less noise. That said, once-a-year for a good cause is perfectly acceptable to help those in need. Although, constant traffic noise is not.

Segment B would be near existing and future schools, impacting thousands of students. Noise would be impossible for learning and outside activities. Again, noise and ozone levels would be harmful.

Sincerely,

JS De Mattei

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Stephen Endres;

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Please accept my appreciation for the return call last Friday afternoon. I realize you are very busy fielding questions and concerns but yet you took the time to assist me with understanding Segments A and B for the 380 Project. Thank you.

Please know that after our conversation and further research, I am strongly supporting Project 380 Segment B. It has been brought to my attention that this option is the least disruptive to businesses with no displacements and minimal impact on existing homes and to the families living in the neighborhoods along and adjacent to US 380. As a resident, I am concerned with the fiduciary responsibility of protecting our highway funds as Segment B is the least expensive option when compared to Segment-A alignment. We must be good stewards of the financial aspects of this project.

I am a resident of McKinney, specifically Stonebridge Ranch. I moved here to be closer to family because of health issues. They, too, live in SBR. Segment B is the best option to improve traffic flow in our corridor during the construction phase and after. Segment B also preserves the economic business and residential strength along with the energy and life of our community.

Thank you for allowing me to voice my opinions.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Julia D Burns

Julie Cooper [REDACTED]:

COMMENT: I actually thought this had been decided about 4 years ago and am very disappointed that we have to go through this again. Not only will this Segment B cause a safety problem with ManeGait but also to the new Prosper High School being built on First Street and The Academy School that is already there. The students of these establishments should have security of knowing that they will be safe coming and going to the areas without the noise, traffic, environmental hazards that this Segment B highway would entail.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres-

I am a homeowner and resident in McKinney, TX., for the last 24 years and **strongly support the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning sir

I am writing as a citizen of McKinney with my desire regarding the Hwy 380 Bypass. We are asking to please utilizing route B for the western most entrance/bypass. This route is the most logical, it actually utilizes the most efficient design to move motorist around McKinney with the least amount of disruption to those who are living and doing business within McKinney.

Thank you for your work

Sincerely
Julie McGuire

Subject: Support for the Segment B Option for the US380 Expansion Project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I strongly oppose the Segment A Option for the US 380 expansion project and here is why:

If the **Segment A** Option is built --

- It will cost taxpayers \$99 million **MORE** than Segment B.
- At least 17 businesses on 380 will be displaced.
- Increased traffic congestion during construction would impact emergency vehicles at Baylor Hospital and the safety of children traveling to Wilmeth and McClure Elementaries and North and Boyd High Schools.
- 11 sites with hazardous materials and 7 major utility conflicts will need to be addressed.
- More acres of wetlands, rivers/streams, and forest/prairies will be impacted than with Segment B.
- 14.9 acres of Statewide Important Farmland would be affected.

I strongly support the Segment B Option for the US 380 expansion project and here is why:

If **Segment B** Option is built --

- It will cost taxpayers \$99 million **LESS** than Segment A.
- No businesses on 380 will be displaced.
- ManeGait property will remain untouched.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.
- Less acres of wetlands, rivers/streams, and forest/prairies will be impacted than with Segment A

- 2 acres of Statewide Important Farmland would be affected.

I feel the significant cost difference of Segment B (**\$99 million less than Segment A**) along with the more minimal impacts to existing businesses and to acres of wetlands, rivers/streams, forest/prairies and Statewide Important Farmland make the Segment B Option the best choice. Thank you for your consideration in the decision process for this project.

Sincerely,
Julie Murff

Hello,

I live in the neighborhood of Tucker Hill in McKinney. Based on what I am reading I think that option B would be my preference since it appears to turn north closer to Custer road and would avoid destroying our beautiful area. If you have ever visited that part of Custer road it is mostly open and would be ideal as opposed to bulldozing a nice area with parks, etc. I have lived here for 10 years and we moved here specifically for its parks, unique home builds, and proximity to schools, etc. Thank you.

As a homeowner, business owner (11|17 restaurant at 380/Stonebridge), and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Justin Jones

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Justin Piot

Subject: 380 Expansion From Coit Road to FM 1827 - Option A vs. Option B - Comments

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

I'm sure you have been bombarded with comments with respect to Option A vs. Option B from residents of McKinney and Prosper. I will try to keep my comments short and concise. I am an advocate for Option B as it (1) saves money and (2) fixes the traffic in 2 different ways. I am a real estate attorney by trade and I work with Cinemark Theatres based in Plano, TX. My comments here are not related to my company, but my experience as a real estate attorney allows me to understand the unique issues facing this expansion project better than some citizens. The first reason why Option B should be chosen is the financial savings it provides the State vs. Option A. You are obviously well versed on this, so I won't say much more beyond that. The second reason is that it solves the traffic issue along 380 in 2 different ways, (1) provides for a wider highway that is able to handle more vehicle and (2) it limits certain residential developments from going in in the future. Looking at the traffic numbers, the bulk of the increased traffic along 380 is due in large part to the recent boom in population in the Prosper area. McKinney, on the other hand, while having its own population increase, is not near the amount that Prosper has had. McKinney, for the most part, is settled land. Prosper, on the other hand, has grown considerably and looks to continue that growth in the coming years. Now when I was young, my parents always taught me that if I cause a problem, it is up to me to solve it and I should not burden others with the task of solving my problems. I think that lesson applies here. Prosper is the City that has significant growth and contributes the most toward the current traffic problem along 380. In fact, driving along 380, the traffic tends to slow down the closer you get to Prosper, no matter the time or day. However, the traffic along 380 in McKinney is hardly noticeable and during rush hour is hardly an issue. So in my view, and a lot of other McKinney citizens view, Prosper is the main culprit for the traffic problem, but yet somehow the solution for that problem falls onto the McKinney residents rather than Prosper. As much as Prosper would like Option A to pass, Option B not only makes more sense (from a financial perspective), but its also fair considering Prosper is a big reason for required 380 expansion. Don't punish McKinney residents for the issues caused by Prosper. Also, I know there has been a lot of discussion about Option B hurting development along those areas of Prosper, but I fail to see how that would necessitate Option A being the better option. If we are trying to reduce traffic and improve traffic flow along those portions of 380, then by limiting residential development you also achieve that. Yes, Option B may prevent some planned residential areas from being developed as originally planned, but that is not necessarily a bad thing as it will reduce the amount of people driving on 380, so in reality you kill 2 birds with 1 stone by going with Option B. Also, the developers of those planned developments will not be harmed. They are large companies with the ability to adjust the site plans at minimal cost and still achieve a good ROI on their investment. Plus they will be compensated for the loss in value for any land taken away. Also, those are future developments that may or may not happen, whereas the McKinney residents are here now. Shouldn't we be protecting and accommodating existing residents who have been paying their taxes, not future possible residents. I'll end it here, but my point at the end of the day is that the traffic issue along 380 is predominantly due to the actions of Prosper and therefore it should be Prosper that has to give up its land to solve the problem. Prosper needs to recognize its own problem and not burden McKinney with solving a Prosper issue. Thank you.

Best regards,

Justin Wheeler – Vice President, Real Estate Counsel

Subject: Comments to US 380 Expansion - Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Mr. Endres,

I write to you today to voice my concerns over the potential expansion of US 380 in McKinney. After reviewing the available material online, it is clear to me the best option for expanding US 380 is Option B through Prosper. McKinney is highly developed city with many existing residents. Stonebridge Ranch, which is a significant driver of real estate taxes for McKinney would be significantly impacted if Option A were chosen. While houses may not be displaced, you would effectively render a significant portion of Stonebridge undesirable due to its close proximity to such a major highway. By doing this, you will see a mass exodus of people and businesses out of that area of McKinney. On the other hand, Option B hardly effects existing residents. Option B may prevent some expansion or new developments in Prosper, but none of that has happened and therefore it disturbs far fewer people and businesses. Lastly, Option A costs way more money, \$100,000,000 more, which will likely be more by the time you factor in increased construction costs and buyouts from the businesses effected by Option A. The money savings alone should be a sufficient reason to choose Option B, but coupled with the fact that Option A will directly impact hundreds, possibly thousands, more homes than Option B, this shouldn't even be a discussion. TxDOT should do the right thing and save the money and go with Option B and instead expand US 380 into Prosper where it is currently undeveloped. Thank you.

Best regards,

Justin Wheeler

Subject: US 380 bypass beedback

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr Endres,

I'm sure you are receiving countless messages, but as a McKinney resident who lives in the Tucker Hill subdivision, *I must reject, as strenuously as possible*, the proposal of "Alternative A" as shared in the public meetings.

I, my family, and numerous neighbors, all **STRONGLY SUPPORT** "alternative B" as a solution to the western portion modification to US380 around McKinney. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US380. It is also the least expensive option by nearly \$100 million (without all costs even being tabulated) when compared to the costs of option A.

As mentioned above, I also **STRONGLY OPPOSE** Alternative A. It should NOT be considered for the following reasons:

- ALTERNATIVE A disrupts, relocates and potentially destroys 17 small businesses near the US380 and Custer Road intersection (primarily to the north).
- ALTERNATIVE A Costs \$99 million MORE than ALTERNATIVE B.
- ALTERNATIVE A will eliminate the stop light at Tremont Blvd and permanently disrupt the normal access and egress of the Tucker Hill development.
- ALTERNATIVE A will increase the unintended traffic into the Tucker Hill development, will likely decrease traffic safety and increase motor vehicle accidents and accidents with pedestrians. More traffic in a small, single access neighborhood will also likely increase the noise and pollution in our neighborhoods and often leads to increased crime statistics in the neighborhood.
- ALTERNATIVE A has a high likelihood of reducing the property values of Tucker Hill and other major neighborhoods such as Stonebridge Ranch, Kensington Village, Auburn Hills, and many other adjacent neighborhoods due to the large interchange to be constructed at the intersection of Alternative A and the current US 380.

We, as truly directly- affected residents, would greatly appreciate all available support in removing ALTERNATIVE A as a viable option.

We unequivocally SUPPORT ALTERNATIVE B.

Thank you,

Justin White.

Subject: Project 380 bypass

Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Stephen,

I strongly OPPOSE the Project 380 Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

As such, I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,

Mrs. K Williams.

Hi,

We live right off [REDACTED].

I am only just now learning of this proposed project.

It's frightening to think anyone in their right mind would even suggest such a thing.

Brand new homes, nice quiet community, open land, mane gait, New schools, horses, farm animals.

We love it here and live in one of the older communities.

This road would destroy this entire side of Prosper!

It makes zero sense!

We have 5 young grandchildren. This would destroy our home our neighborhood and our home value.

Please please,
DO NOT APPROVE THIS!

We want to stay here in our forever home. Never in our wildest dreams or nightmares would we think a highway like this would be suggested.

Those who chose to live on or near 380 like Tucker Hill, must be aware and understand this could be a possibility for something in their future.

But not those of us in a newly developed town away from such busy roads.

I pray for those who've suggested this terrible idea - I pray their hearts are enlightened and softened and they recognize the impact this would have on so many of us.
It shouldn't even be an option to consider.

I pray politicians who support such a disaster are removed from office.
They will loose all support.

Thank you, I hope you understand what how much harm this would cause to those of us affected.

Thank you,

Karen and John Rellos

To Whom it May Concern,

Please don't build a freeway near Manegait Therapeutic Horsemanship in McKinney. The atmosphere would be completely ruined! Manegait is for disabled people to enjoy some time in the fresh air, while getting much needed therapeutic (horse)riding. It's a very peaceful and pleasant place for my son. He doesn't like loud noises, such as construction equipment and traffic. He is medically fragile, and the fumes from the freeway traffic would have a negative effect on his health. The freeway would be a horrible visual blight on the beautiful setting of Manegait. Also, the horses deserve to have a natural, quiet, peaceful place to live and work, because they do a great service to the disabled community.

I very strongly oppose the proposed Hwy 380 segment B, and ask you to please, please reconsider!
Thank you.

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the following meeting documentation.

Comments: [redacted] is currently being excavated by NTMWD for double 48" sewage pipelines. We are already sustaining large land use and economic loss as more than 1/3 of our farm

can't be used to graze our cattle or grow hay. Our prime highway frontage land is now hugely devalued for any future sale or use. The bypass C segment would take most of the rest of our frontage, coming about 150' from our house. It would take out more trees + fencing, more pasture, and an old 1800s hand-dug rock-lined well. Our land use will be further restricted (we have already been forced to take cattle to market because of sewer line project. The C path takes out a string of lovely working farms, homes, and small ranches. It impacts water lines and crosses the new sewage plant pipeline system. It will further reduce habitat for monarch butterflies and the families of hawks that lived here. The noise level will skyrocket and the night sky's stars will no longer be visible. PLEASE APPROVE SEGMENT D. It allows this area of working farm designated agricultural greenspace to continue to produce and thrive. FM 2933 + CE 3 will be able to continue functioning as designed to transport agricultural equipment and products safely. D affects the fewest residents + does not inhibit future development

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)). Please preserve

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

this jewel of McKinney's dwindling farmland by approving segment D

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: Hwy 380 Expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Thank you for taking the time to read my comments. I am a Stonebridge Ranch residence that has lived in the LaCima neighborhood for 16 1/2 years. We love this location for many reasons and are extremely concerned that this expansion may impact our neighborhood. We are very much in support of option B. Option A will really distract from our nature areas, one reason that we choose this home not to mention the others as follows:

- Option A displaces 17 businesses Option B displaces zero**
- Option A cost to relocate utilities is \$61 M vs \$25 M**
- Option A total cost to acquire right of way is \$178M Option B cost \$137 M**
- Option A total cost of design/construction is \$450M Option B is \$428M**
- Option A total cost is about \$100 M higher than Option B**
- Option A impacts more acres of wetland, rivers/streams and forest/prairies than Option B (THIS IS A BIG DEAL TO ME)**
- Option A impact 14.9 acres of Statewide important farmland. Option B only 2 acres**

The list above only mentions a few of the statistics from TXDOT's Segment Analysis that really does SHOW that Option B is less expensive and the least disruptive alternative. Option A's increase in noise to our neighborhood would really have a negative impact. Option B does not come as close to any other existing neighborhoods.

Once again as a concerned resident of the LaCima Neighborhood, please take note of these reasons to choose Option B when deciding the new 380 expansion.

**Thank you again!
Karie Bell**

NAME/ADDRESS: Karin Grant, [REDACTED]

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Please keep 380 on 380 - prosper has limited real estate as it is.

Thank you!
Karin.

Subject: 380 Highway Alignment.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

It is my understanding that McKinney Engineering Director Gary Graham said on April 5 that "Segment B is 18% shorter, requires approximately \$41 million less in right-of-way acquisition and would require 73% fewer combined business and residential displacements." He also stated that "the overall cost of Segment B is about 14% lower than that of Segment A."

I assume that these figures are verifiable and if accurate, I would expect that it would be the duty of the TDOT to act in its proper fiduciary obligation, to the taxpayers of the state of Texas, and choose "Segment B".

Sincerely,
A concerned citizen for fiscal responsibility,

Karle Kispert

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Kasaundra White

Subject: support for Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. I truly believe segment B is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly **\$99 million** when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A.

It should not be considered for the following reasons:

It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

The cost of Segment-A is \$99 million more than Segment-B.

It will create an overpass on 380 over Stonebridge Drive and Custer Road.

It will also cause the installation of water pipes (ducts) over 380.

It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Thank you for your time and attention.

Kassie Howe

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen,

Additionally : TXDOT previously announced its PREFERRED ROUTE, which is Option A – The “B” route that was proposed through the Town of Prosper was requested AFTER the announcement of the “A” preferred route by TXDOT, and furthermore, it was requested by a former member of the court who lives in an affected community. This alone should put Option B out of consideration.

Thanks,
Kate

On Apr 20, 2022, at 12:30 PM, Kate Casper [REDACTED] wrote:

Dear Stephen,

As one of the Task Force organizers for the rally on March 31st opposing Option B through Prosper, a proud resident of NE Prosper, a parent of 2 young children in Prosper ISD, and a local business owner, I would like to submit my formal comments via email **opposing Option B** in the 380 Bypass Plan. I will also be completing the requested TXDOT comment survey before 4/21.

It makes ZERO sense to approve Option B through Prosper. It negatively impacts our residents, businesses, ManeGait, Prosper ISD schools, Founders Classical Academy Prosper, and our future growth and development. It also negatively impacts the reason most people moved to Prosper in the first place — to escape the rat race of the city for open spaces, solitude, and a small town feel. We have the support of the Town of Prosper, Prosper ISD, local business owners, landowners, parents, and students - who are all unified in our stance that we **OPPOSE OPTION B** in all forms.

SPECIFIC WAYS OPTION B NEGATIVELY IMPACTS PROSPER:

-
-
- 12+ lane FREEWAY
- dividing Prosper (8 lanes & 4+ access lanes on either side) with the magnitude equal to US 75, located just south of Founders Academy
-
- US 380 Bypass Segment B options + approved Collin Outer Loop (4-6 lanes) just north would sandwich NE & SE Prosper in between 2 major highway thoroughfares
-
-
- Significant environmental
- impact: pollution, emissions, & poor air quality
-
-
-
- Directly affects
- neighborhoods: Whitley Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, etc.
-
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Classical Academy

[Bisnow.com - https://www.bisnow.com/dallas-ft-worth/news/commercial-real-estate/town-of-prosper-local-developers-say-millions-of-dollars-are-on-the-line-is-state-approves-a-proposed-bypass-of-us-380-112397](https://www.bisnow.com/dallas-ft-worth/news/commercial-real-estate/town-of-prosper-local-developers-say-millions-of-dollars-are-on-the-line-is-state-approves-a-proposed-bypass-of-us-380-112397)

Please REMOVE Option B (in all forms) from consideration, and Keep 380 on 380. McKinney's FAILURE TO PLAN does not constitute Prosper's PROBLEM or EMERGENCY.

Subject: *URGENT* US380 Bypass - NO to OPTION B in Prosper!

Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr Stephen Endres,

As a member of the Task Force organizers for the rally on March 31st opposing Option B through Prosper, a proud resident of NE Prosper, a parent of 2 young children in Prosper ISD, and a local business owner, I would like to submit my formal comments via email **opposing Option B** in the 380 Bypass Plan. I will also be completing the requested TXDOT comment survey before 4/6.

It makes ZERO sense to approve Option B through Prosper. It negatively impacts our residents, businesses, ManeGait, Prosper ISD schools, Founders Classical Academy Prosper, and our future growth and development. It also negatively impacts the reason most people moved to Prosper in the first place — to escape the rat race of the city for open spaces, solitude, and a small town feel. We have the support of the Town of Prosper, Prosper ISD, local business owners, landowners, parents, and students - who are all unified in our stance that we **OPPOSE OPTION B** in all forms.

SPECIFIC WAYS OPTION B NEGATIVELY IMPACTS PROSPER:

-
-
- 12+ lane FREEWAY dividing Prosper (8 lanes & 4+ access lanes
- on either side) with the magnitude equal to US 75, located just south of Founders Academy
-
- US 380 Bypass Segment B options + approved Collin Outer Loop (4-6 lanes) just north would sandwich NE & SE Prosper in between 2 major highway thoroughfares
-
-
- Significant environmental impact: pollution, emissions,
- & poor air quality
-
-
- Directly affects neighborhoods: Whitley Place, Whispering
- Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, etc.
-
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Classical Academy
-
-
- Increased Traffic and Noise
-
- Negatively impacts the safety of student drivers with high speeds
- Overall Safety of our citizens and students
-
-
- Decreased home values and overall desire of area
-
-
-
-
- Materially impacts ManeGait and the wonderful therapy they
- provide to children, veterans, and our disabled community members
-
-
-
- Substantial lost tax revenue to the Town and Prosper ISD
-

- Directly impacts these Developments: Ladera, Brookhollow, Rutherford Creek, Wandering Creek, Malabar Hills, North Dallas Cementary
-
-
- Massive utility relocations that are critical to Prosper's infrastructure
-
- Dangerously close to Founders Classical Academy
- Developments: Ladera, Brookhollow, Rutherford Creek, Wandering Creek, Malabar Hills, North Dallas Cementary
- Politics - George Fuller, Keith Self, & Tucker Hill — used personal influence to suggest Option B

SPECIFIC NEGATIVE IMPACT TO MANEGAIT:

ManeGait was designed to offer an atmosphere of solitude and peace. The students have sensory issues, which construction sounds, smells, and sights would negatively impact. Individuals with special needs on an incredibly large animal would offer a considerable safety hazard if the animal were to get spooked - which could easily happen if a freeway were in close proximity. Individuals with focus/attention disorders are also easily distracted and would be unable to undergo therapy in the way in which it was intended. Option B is NOT an option for the children and adults of ManeGait, and the overall program itself. Prosper supports ManeGait and the wonderful gifts it gives to its students, and Option B would render them unable to meet their goals and objectives.

LOCATION MAP

Notice of Public Meeting

Proposed Improvements to US 380 from Coit Road to FM 1827

TxDOT will hold Public Meetings for the proposed improvement to US 380 from Coit Road to FM 1827.

**In-person Meeting Tuesday,
March 22, 5:30 - 7:30 p.m. Collin
College Central Park Campus
2400 Community Avenue
McKinney, TX 75071**

**Virtual Meeting
Tuesday, March 22 at 5:30 p.m. through Wednesday,
April 6 at 11:59 p.m.
www.keepitmovingdallas.com/US380EISPublicMeeting**

Comments must be provided during the public comment period from 5:30 p.m. March 22 through 11:59 p.m. on April 6. Below is a summary of the issues, which residents may use in submitting their own comments if they choose:

- The Town of Prosper has passed six Town Council approved Resolutions strongly opposing any proposed alignment for the widening of US 380 not located along the existing US 380 corridor;
- Segment B of the proposed Gold/Brown alignment poses a significant, negative impact to both existing and future residential and commercial developments planned within the Town. The alignment would directly impact over 300 future homes and thousands of residents and indirectly impact many more;
- Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG);
- Segment B runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities;
- Segment B is in close proximity to existing and future schools including high schools impacting thousands of students.

You can access the virtual public meeting by scanning the QR code, or visit <http://www.keepitmovingdallas.com/US380EISPublicMeeting>

On the reverse side of this page, you will find a Prosper Development Map that shows the projected impact a US 380 bypass would have on current and future development in Prosper.

Subject: Highway 380 Bypass McKinney, Texas

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I have lived in Stonebridge Ranch since 1999. In the last 22 years, I have observed the City of McKinney work well with Stonebridge Ranch as far as the city's transportation plan has been concerned. This cooperation has made the Stonebridge Ranch Community a delightful place to live.

I strongly SUPPORT Segment B of the Highway 380 Bypass, and I strongly OPPOSE Segment A. My reasons include that the Segment B option is the least disruptive to homes and businesses and our Homeowner's Association also says that Segment B is less expensive than Segment A.

Segment A will dump too much traffic in our neighborhoods and overload our 4-Lane Divided Arterials with wide landscaped medians. These boulevards (Ridge Road and Lake Forest) enhance Stonebridge Ranch and were never meant to carry more than neighborhood traffic.

Please select the Segment B option for the bypass. I appreciate your consideration.

Best regards,

Katherine Brewer

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN

THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Kathleen A. McCarthy

Good morning Mr. Endres,

Thank you for taking the time to read this email. I realize you are very busy fielding questions and concerns regarding US 380 proposed improvements.

I am strongly supporting Project 380 Segment B. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and to the families living in the neighborhoods along and adjacent to US 380. As a resident, I am concerned with the fiduciary responsibility of protecting our highway funds as Segment B is the least expensive option when compared to Segment A alignment. Segment B requires 73% fewer combined business and residential displacements than Segment A and requires approximately \$41 million less than A for estimated right of way costs. It also requires approximately \$36 million less than Segment A for relocation of major water utilities.

I am a resident of McKinney, specifically Stonebridge Ranch. Segment B is the best option to improve traffic flow in our corridor during the construction phase and after. Segment B also preserves the economic business and residential strength along with the energy and life of our community.

As one who is concerned with our environment, Segment B impacts approximately 61% fewer jurisdictional wetlands than A. It also impacts less total acres of forest-praries-grasslands than Segment A.

i am strongly opposed to Segment A. Thank you for allowing me to voice my opinions.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

*I realize Collin County is growing.
 TxDOT has done a great job of looking
 to the future of our transportation needs*

*I am sorry this has become a contentious
 issue. That being said my husband
 and I loved Tucker Hill when we chose
 our home in Whitley Place as our home.*

*As the former Mayor of Frisco (1996-2003) and a
 member of the Transportation Leadership in
 the Dallas Area - I chose Whitley Place in
 Prosper because I did not want to live on
 a US Highway. I'm sorry the people in*

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

*Fucker Hill chose to live on a
 US Highway*

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

*Please do not move the poor planners
 of one city
 into another
 city - It's plain wrong & breaks trust between
 local government & TxDOT*

Subject: Segment A Comment for 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning,

I live in McKinney just off 380, and wanted to voice a quick comment on the upcoming project. I oppose Segment A. The character and uniqueness of our city is held in some of the most charming neighborhoods. Segment A will highly effect the businesses and neighborhoods of Tucker Hill and Stonebridge. There is no other neighborhood like Tucker Hill. A quick drive through it will transport you to the south. Segment A will have a massive negative impact on this neighborhood and its businesses. It would be a tragedy.

Segment B has 75% less displacement for businesses. It also costs the taxpayers 98% less! I highly encourage/ vote for Segment B.

Thank you for your time,
Katie Rivera

Subject: US 380 Bypass Segment B support

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen Endres
TX DOT Project Manager 380

Dear Mr. Endres,

We live at [REDACTED] the Woodhaven Village of Stonebridge Ranch in McKinney TX and have been residents since 2004.

As a homeowner and citizen of McKinney TX, I **strongly support the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment – A alignment.

I also strongly oppose Segment -A. This option should not be considered for the following reasons:

- It will destroy and remove 17 small businesses West of the 380 and Custer Rd intersections on the North side.
- The cost of Segment-A is \$99 million more than Segment-B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- Because of the topography, it will cause the installation of water pipes (ducts) over 380.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values of that neighborhood.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today. That will cause years of traffic disruption.

In summary, Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thanks for your consideration.

Comments on Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135-15-002

As a homeowner and citizen of McKinney, Texas, I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- The cost of Segment-A is nearly **\$100 million** more than Segment-B.
- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road, a heavily populated business and residential area.
- Impacts more acres of wetlands, rivers/streams, and forest/prairies than Segment-B.
- Lengthier Morning and Evening rush hour commute times than Segment-B
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

Two of these neighborhood streets (Stonebridge Drive and Ridge Road) have elementary schools very close to 380 – Wilmeth Elementary and McClure Elementary

- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Respectfully submitted,
Keith Harber

Good afternoon. I am writing on behalf of myself to express concern with the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait, which is a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

My son receives horse therapy at ManeGait, and I believe the proposed highway segment (and its construction) would disrupt operations at ManeGait, including therapy lessons.

Please consider all alternatives, and oppose Segment B of Highway 380.

Many thanks,
Kelley Mindrup

Mr. Enders,

I STRONGLY OPPOSE Segment B and Support Segment A. I am absolutely disgusted that this is even an issue still. Prosper should not suffer the negative consequences of McKinney's poor planning. As a resident of Whitley Place, Segment B will increase our noise and air pollution, we will lose value of our homes and it will negatively affect the educational facilities nearby, as well as the kids going to the new high school. Segment B will increase traffic, light pollution, and will be hurtful to persons with disabilities who are helped by Main Gait. Please please consider our Town and residents of Prosper, who had the foresight to build far from 380 when planning our neighborhoods and schools, and do NOT approve Segment B.

Thank you,
Kelly Cardwell

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Kelly Dieterich

Mr. Endres,

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource PREVIOUSLY identified by TxDOT. The vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. My daughter is a disabled rider and has been receiving therapy there for over 11 years. The thought of a highway overpass less than 100 feet from the arena is inconceivable to me. With her sensory issues, her therapy would be stressful and ineffective. Not to mention the constant noise stressing the therapy horses. Please, let's apply common sense here. Our disabled residents and veterans deserve better consideration than this.

*Sincerely,
Kelly Waterman*

Subject: Citizen Communication | 380 Bypass Project, Support of 380 Segment-B Alignment Option

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,
My wife and I are residents of Wren Creek Village in the Stonebridge Ranch community of McKinney, Texas, on [REDACTED]. I am writing to express our **strong support of the Project 380 Segment-B bypass** alignment option. Our home is directly adjacent to 380 and this matter is of great importance to us as homeowners and citizens.

We **strongly oppose Segment-A** and it **should not be considered** for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side
- The cost of Segment-A is \$99 million than Segment-B
- It will create an overpass on 380 over Stonebridge Drive and Custer Road
- It will cause the installation of water ducts/pipes over 380
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment-B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community. It is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380 such as ours, **Wren Creek Village, specifically Harvest Hill Lane**. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

Thank you for hearing our **strong support of the Project 380 Segment-B bypass alignment** and our **strong opposition of Segment-A option** that is being considered. We entrust that you will give an abundance of thoughtful consideration to the impact any option other than **Segment-B** would have on us as fellow citizens.

Thank you for your consideration and time to review our firm position in this matter.

Good evening,

I have lived in my neighborhood for almost 20 years. The best thing I like about it is that all of our neighborhood streets are not major pass throughs. Some of the proposals presented would decimate that peace:

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B**bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

All the stats point to option B.

Thank you,
Ken and Allison Yanniello

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Stephen,

I live in Prosper, TX and I "DO NOT SUPPORT" TxDot's Segment B Bypass thru Prosper:

- This Segment B Bypass makes NO SENSE, COSTS significantly MORE money to construct and is OPPOSED by the citizen's of Prosper;
- The Town of Prosper has passed six (6) Town Council approved Resolutions strongly opposing any proposed alignment for the widening of US 380 not located along the existing US 380 corridor ----- Why won't you LISTEN and ABIDE by what the citizen's of Prosper desire? REMEMBER, YOU WORK FOR US!!!!;

- Segment B of the proposed Gold/Brown alignment poses a significant, negative impact to both existing and future residential and commercial developments planned within the Town. The alignment would directly impact over 360 future homes and thousands of residents and indirectly impact many more;
- Segment B runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities; and
- Segment B is in close proximity to existing and future schools including high schools impacting thousands of students.

PLEASE LISTEN to the citizen's of Prosper PLEASE LISTEN to the Town Council of Prosper and PLEASE ABANDON THIS LOSING, Segment B Bypass which makes NO SENSE and COSTS MORE MONEY!!!!!!

Thank You.

Subject: Support for Project 380 Segment-B Alignment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom it may concern: We have lived just off of [REDACTED] Virginia Parkway for nearly 30 years and am expressing our wishes to oppose the Segment-A alignment and our support for the Segment B alignment. We fear the "A" alignment will negatively impact the safety along Ridge Road as it has many curves, several school zones, and almost exclusively single family and apartments and virtually no commercial properties especially on the north end near 380. It is not designed to be a street that would safely relieve traffic from Highway 380.

Thank you for consideration of our thoughts on this issue.

Kendall J Kelly

Subject: SUPPORT FOR SEGMENT B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Stephen and TXDOT,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

I additionally will soon have school age students and the increased traffic through stonebridge ranch past several schools causes me worry for the safety of my child and others with high speed cars racing down the streets.

Sincerely,

Kendra Goldade

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. Please stop trying to put highways and major roads so close to ManeGait, I understand the need for infrastructure, but this program helps so many people be able to be independent in life and to be able to do task that seem normal to people like you and me, for example getting a job. Not only does it help those who are disabled and children, but they also have programs for veterans! And from personal experience, without this program I would have killed myself long ago. This program gives so many volunteers a purpose and helps so many people live a normal life!

Good Morning Mr. Endres,

Our family lives in the Stonebridge Ranch community. We are in support of **Segment B** for the US 380 Bypass Coit Road to FM 1827. We are in support of Segment B for the following reasons:

If **Segment-B** is built --

- It will cost taxpayers 99 million dollars **LESS** than Segment-A.
- ManeGait property will remain untouched.
- No businesses on 380 will be destroyed.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.

Thank you for your consideration.

March 30, 2022

TO: Mr Stephen Endres, P.E.

[REDACTED]

[REDACTED]

Stephen.Endres@txdot.gov

As the immediate past president of the Whitley Place Homeowners Association, I was heavily involved in the TxDOT hearings prior to the Covid pandemic of 2020. I am steadfast in my opposition to the building of a US Highway 380 By-Pass (Option B) that would cut through the eastern side of the Town of Prosper.

My recollection is that McKinney Mayor George Fuller, former County Judge Keith Self, and the McKinney community of Tucker Hill's collective push to have a by-pass go through Prosper wasn't even on the table until former County Judge Keith Self (who lives in Tucker Hill) asked TxDOT at a County Commissioners meeting to look at Prosper as an alternative route. He unethically used his position as the county judge to influence TxDOT to move the by-pass proposal away from Tucker Hill ("NIMBY – Not in My Back Yard"), and instead, build it in Prosper's backyard. How hypocritical of him.....

As I recall, the original TxDOT proposal had a by-pass running north-south along the east side of the Tucker Hill community where it would then merge with the existing US Highway 380. As I understand it, that east-side land is in a flood plain where no homes could be built anyway, but an elevated by-pass could be built there without depriving McKinney of potential tax revenue generated by new homes. That's when former County Judge wrongly opened his mouth to protect his own neighborhood.

In terms of "direct impact" on Prosper, Option B would obliterate the Ladera Prosper 55+ community being planned by the Delin brothers, just west of Custer Road, with the result that Prosper would be deprived of the taxes generated by these new homes. In terms of "indirect impact," Option B would create a negative environmental / ecological impact on:

- The Mane Gait therapeutic horsemanship program;
- The Founders Academy already built and in operation on the southwest corner of E. First Street and Custer Road;
- The existing small cemetery with plans for expansion on the west side of Custer Road;
- The Malabar Hill subdivision currently under construction on the south side of E. First Street;
- The Walnut Grove High School now under construction on the south side of E. First Street.

These are just some of the reasons why Prosper’s proper planning for the future should not be disrupted by Option B being pushed by the consortium of Fuller, Self, and Tucker Hill.

The cheapest alternative is not necessarily the best alternative, nor is it ethically the best alternative. The lack of planning on McKinney’s part (allowing homes and businesses to be built too close to the existing US Highway 380 when the city knew someday it would have to be improved and expanded) should not create an emergency for Prosper. Our town has carefully planned for its future. Prosper does not tell McKinney where to build roads in its city planning; in the same vein, McKinney should not be telling Prosper at this juncture where to build roads in its town. McKinney at 200,000 population ought not to be bullying smaller Prosper with its 30,000 population – projected to build-out at 72,000. The Town of Prosper has maintained all along for several years that it supports “Keep 380 on 380.”

The only acceptable options are:

- To build the by-pass east of Tucker Hill; or
- To “Keep 380 on 380.”

The best way to accomplish the latter is to use TxDOT’s own drawing called “Below Grade Main Lanes” with service roads at ground level. That design would put the noise factor below ground level in a “canyon.” It would be similar in design as to how the expanded Central Expressway passes by the area of SMU in Dallas.

I urge TxDOT in the strongest terms possible to not cave in to McKinney’s demands and to pursue the ethical choice of not harming the Town of Prosper and its residents.

//s//

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Kent Hoffmann

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

It appears based on all of Stonebridge research option A is not a reasonable solution and the obvious choice is option B. I am happy and proud that Stonebridge is supporting the B option and has expressed reasonable reason why option B is best for everyone.

I live just a few blocks from [REDACTED] have live in my house for 17 years. I see no reason that would justify tearing up that entrance especially if it is going to cost \$99M more.

Make the right decision and lets build something that improve the quality of life and not disrupts it.

Thanks

Kevin

TxDOT Releases Latest Project 380 Bypass Information

**Voice your support for Project 380 Segment-B by contacting
TxDOT by April 6, 2022 with your comments (see below for
instructions)**

Message from SRCA Board of Directors:

The SRCA Board of Directors supports the Project 380 **Segment-B** bypass route. This option would route a US 380 bypass to connect WEST of Custer Road (see picture above). **The SRCA Board DOES NOT support Segment-A** for the reasons shown below. It will be very detrimental to our community.

Suggested Wording for US 380 Comment Form

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Contact the TxDOT project manager Stephen Endres, P.E. to ask questions or comment about the project at Stephen.Endres@txdot.gov or (214) 320-4469.

Detailed updated information about the 380 bypass project can be found at:
<http://www.keepitmovingdallas.com/US380EISPublicMeeting>.

Subject: Project 380 Segment-B Option

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

Good morning. I am a resident of McKinney, specifically Wren Creek at [REDACTED]. I am writing you in to inform you I STRONGLY SUPPORT the Project 380 Segment-B bypass alignment option. It is:

1. The least disruptive to businesses with no displacements.
2. Has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380, especially ours at Wren Creek.
3. The least expensive option by nearly \$99 million when compared to the cost of the Segment-A Alignment.

I STRONGLY OPPOSE Segment-A and it should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the 380 and Custer intersection on the North Side.
2. The cost of Segment-A is \$99 MILLION more than Segment-B.
3. It will create a disruptive overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive - all of which have schools located on them directly off 380.
5. It will cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,
Kevin Gaughan

I strongly suggest that you not move forward with the new Segment B plan for the HWY 380 bypass. It would truly be unconscionable for txdot to disrupt the lives of our most vulnerable people. For some of these individuals ManeGait is the only highlight in their lives. Please show some empathy, and reconsider your proposal. It's the right thing to do!

Cordially,

Kevin J Carley

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

As a McKinney resident, I oppose the proposed Segment A section of the Project 380 Bypass, as this segment costs millions more for taxpayers than Segment B; impacts more natural wetlands and wildlife than Segment B; and negatively impacts many more neighborhoods and businesses along U.S. 380 than Segment B.

As a result, I support Segment B because this segment requires fewer business and residential displacements; avoids costly reconstruction of the intersection at U.S. 380 and Custer Road; and is 14% shorter than the proposed Segment A, thus saving time, money, and excess pollution.

I appreciate your time and consideration to this matter. Please feel free to contact me with any questions.

Thank you,

Kevin LaMarca

Subject: Opposition to HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

My name is Kevin Stafford and my Wife and I are building at [REDACTED]. I would like to register my opposition of the proposed HWY 380 Segment B because it threatens the daily services and special events of MainGait and would destroy one of the remaining, actual "unique" features of McKinney.

The operation at MainGait is and has been a Texas State, Collin County and McKinney Community key resource as identified by TxDOT. As I understand it, Segment B will have significant impact on the livestock and ability for those animals to continue helping those with disabilities. That is the definition of "Unique", which I thought was McKinney's motto. "Unique by Nature" should not mean "let's do something that destroys the nature. Please be aware that the MainGait is an operation that serves many individuals, both previously and non-previously military with significant problems such as PTSD as well as children with variable types of medical and mental disorders. These vulnerable and protected populations are extremely sensitive in many ways and deserve a safe, high professional quality and easily accessible location that can receive the world-class therapy programs at MainGait.

My family has been fortunate to have use of facilities similar to MainGait in New Mexico for my Niece, who has significant disabilities and the services she has received have been extremely important in her physical and mental wellbeing. None of the therapy areas that she has received the services in Equine Therapy are located close to any facilities, roads or highways that could offer a distraction to the patients or animals. Any distraction to the animals (horses) such as the proposed Segment B could pose tremendous safety issues to the individuals being treated at MainGait. This would result in potential liability issues that should be considered.

Again, I respectfully submit my opposition to the proposed HWY 380 Segment B and truly hope both Prosper and McKinney come to a resolution that will keep this facility safe.

Thank You for your consideration.

Hi Stephen,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with minimal displacements and minimal impact on existing homes and families living in neighborhoods adjacent to US 380. It is also the least expensive option by nearly \$99 million compared to the Segment-A alignment cost.

I also strongly oppose Segment-A and in our opinion it should not be considered for the following reasons:

- It displaces 17 small businesses West of the 380 and Custer intersection on the Northside.
- The cost of Segment-A is \$99 million more than Segment B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- It will impact safety by increasing traffic on Stonebridge neighborhood streets arterial to Highway 380, such as Stonebridge Drive, Ridge Road, and Lake Forest Drive. Whereby Increasing traffic, noise, and pollution in our neighborhoods and reducing our property values.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be moved North and rebuilt, so the Southside of the new access road will be in the same location as the existing 380 is today.
-

Segment B is the best option to improve traffic flow in our corridor while also preserving our community's economic business and residential vibrancy.

I am writing to ensure that my voice is heard in supporting Project 380 Segment B and I am opposing Segment A. As Segment B displaces fewer businesses and impacts fewer residents while costing nearly \$100 million dollars less with less disruption to wetlands and wildlife, it is certainly the earned choice. As a resident and proud Texan, supporting an additional \$100 million dollar spend and with severe disruptions noted, Segment B is the sensible, fiscally responsible and overall responsible option. As most of us who have worked our entire lives, paid a great deal in taxes and invested in our homes, we must know that you and the department will move forward with the decision with the least impact.

Thank you.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,
Kimberly Hanna-Rutledge

OFFICIAL POOL BUILDER OF

From: Kimberly Ryan
Sent: Monday, April 4, 2022 8:06 PM
To: Stephen.Endres@txdot.gov
Subject: Support of HWY 380 by-pass Segment B (West of Custer)

On behalf of my family, which includes my 20-year-old son, who has autism, **I support by-pass segment B** (West of Custer) and **oppose segment A.**

We live in Tucker Hill and use HWY 380 daily for work commutes.

We also use 380 daily to transport my son to/from 29 Acres, which is an adult support community for the neurodiverse. 29 Acres is located just south off 380 in Crossroads, TX. I personally drive my son round trip 5 days a week. I am in and out of the neighborhood four times a day just for his drop off/pick up, plus several times for my work.

After reviewing TxDOT's Segment Analysis Matrix, Option B is the rational choice for the below reasons:

ManeGait:

My son participated in "Hippo therapy" (therapeutic riding) for 6 years in NJ. This type of service typically takes place IN THE ARENA NOT on trails. It is extremely frustrating that ManeGait continues to exploit my sons peer group, "protected individuals" (i.e., individuals with special needs and children).

ManeGait continues to use the term "therapy" in the context of serving individuals with disabilities. As previously discussed, ManeGait DOES NOT provide "essential services" or therapies. This type of service is not even covered by insurance companies. It is not essential like

physical therapy, speech therapy or occupational therapy. ManeGait is closed for 7 weeks in the summer, so disruption in services is a non-issue and they could have accepted the land swap that was offered in the past.

- There is no credible data to suggest that their operations will be disrupted, and they will lose Path certification. Custer is already expanding and has not disrupted services.

Disruption and safety during construction (3-5 years):

- Prosper continues to state that “option B will dissect the city”, yet option B only runs 1.14 miles through the city of Prosper and uses undeveloped land.
- Option B makes roads more accessible to construction vehicles and less disruptive to existing neighborhoods and businesses.
- Entrance into and out of Tucker Hill is limited. Construction will only make this more dangerous and be a physical and/or time barrier to enter or exit for residents and emergency services.
- Increased noise and air pollution will be a health hazard since Option A is adjacent to Tucker Hill on 3 sides resulting in major air quality and noise concerns during construction (and after).
- Option A renders the Tucker Hill Community Pool useless, no longer a place of sanctuary for our community and my family. My son is sensitive to sounds and the pool is our escape. Having 380 so close to our amenity center is of grave concern due to sound and air pollution.

Safety and Engineering:

- Option A will require excessive time and distance to enter and exit Tucker Hill. This is more than an inconvenience over our lifetime. It remains a safety issue with sharp turns rather than a gradual route.
- Option B avoids the significant problem of option A; limiting access and increasing time for the first responders trying to reach homes in Tucker Hill, Stonebridge, and area businesses.
- Option A surrounds Tucker Hill, which increases exposure to noise and pollutants.
- Option B is safer given the more gradual design, which will be important when considering severe weather conditions. It is unclear how cars and trucks traveling at 70+ mph would navigate two very sharp turns present in option A.
- Option A will disrupt the daycare at Ridge and 380 which serves children.

Economic:

- Taxpayer’s money matters. **Option B costs \$99 Million (current projection) less than option A** (\$589.7M vs. \$688.5M).
- Option B has just 2 major utility conflicts vs. 7 in option A, for a significantly lower cost of relocation
- Option B displaces 12 homes, businesses, and other barns/sheds/outbuildings vs. 31 in A
- Option B requires \$40 Million lower right of way cost (\$136.8M vs \$177.8M)

Hello,

The purpose of this email is to inform you that I oppose the proposed HWY 380 Segment B. This proposition threatens the daily services and special events of ManeGait as well as the safety and well-being of riders with special needs including sensory disorders -- ManeGait is a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

ManeGait services are essential for my daughter who is sensitive to sounds. The environment proposed will impact her focus and sound sensitive body. Please reconsider this due to the negative impact it will have on many families and disabled members. Thank you.

Dear Sir,

I am a professional horsewoman.

I am writing you: Please not approve the Proposed HWY 380 Segment B that would disrupt the safety of the operation of the horse facility known as, **ManeGait**, who's primary function is to assist in the rehabilitation of those in need.

Facilities, such as **ManeGait**, are rare and very valuable to the community and of immeasurable comfort to the disabled, be it mental or physical. With horses, there is a delicate balance between a safe and effective atmosphere and that of dangerous consequences. Horses are "flighty and sensitive" by nature and the horses at **ManeGait** could easily be disturbed by the inevitable noise and activity of a major HWY close by.

It would be a tragedy to disrupt such an asset to the community as is found with the **ManeGait** facility. These kind of facilities are far and few between. Please consider the immeasurable value and respect this rare treasure, known as, **ManeGait**.

Thank you for your consideration.

Respectfully,

Kit Calafato, retired USEF Judge

Subject: US 380 Bypass Coit Road to FM 1827

Importance: High

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

My name is Kris Carelli and I am a resident of the Stonebridge Ranch Community since 2010.

I am sending you this email as a request to PLEASE consider Option Segment B over option Segment A.

Much like the points outlined below, I am happy to speak with you in person should you need to,

Thank you in advance for your consideration.

Sincerely,

Kris

=====

US380 Bypass Coit Road to FM 1827: Did you know...

If Segment-A is built --

- It will cost taxpayers 99 million dollars **MORE** than Segment-B.
- At least 17 businesses on 380 will be destroyed.
- 8 lanes of traffic plus four lanes of access roads (two on each side of the freeway) will be constructed near Tucker Hill at Stonebridge Drive.
- 11 sites with hazardous materials and 7 major utility conflicts will need to be addressed.

If **Segment-B** is built --

- It will cost taxpayers 99 million dollars **LESS** than Segment-A.
- ManeGait property will remain untouched.
- No businesses on 380 will be destroyed.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.

Protect our Stonebridge Ranch way of life **and** improve traffic movement and safety by supporting Segment-B today!

April 21 is last day to comment!

Contact the TxDOT project manager Stephen Endres, P.E. to ask questions or comment about the project at Stephen.Endres@txdot.gov or (214) 320-4469.

Detailed updated information about the 380 bypass project can be found at:

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Krista Anderson-Pisz

To: Stephen Endres
Subject: 380 segment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner in Stonebridge Ranch right off [REDACTED] in McKinney, I **strongly SUPPORT the Project 380 Segment-B**ypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: TX DOT 380 Project - Select Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning, Stephen,

As a long-time resident of both Stonebridge Ranch and McKinney, I am writing in support of Segment B for the US 380 Bypass project. At this time, I avoid 380 when possible. It is a traffic nightmare and frankly quite dangerous. I will have new drivers in my household in 5-4-5 years and am not looking forward to them having to navigate the speedway that it is.

In looking at the proposed options, Segment B makes the most sense for me on many fronts.

- 1) It is projected to cost \$99 million dollars less than segment A, which less face it, by the time they get around to building this bypass, could be even more.
- 2) No businesses on 380 will be destroyed. This is a huge plus as business are the backbone of our community providing jobs as well as a tax base.
- 3) As many studies have shown, ManeGait will remain untouched. What makes this one business any more important that the 17 that would be destroyed should option A be selected? In fact, the City of McKinney has offered them a land swap and the owners are not interested. Their business can continue just like the other 17 that are on Segment A.
- 4) If Segment A is built, it will dump 9 lanes of traffic plus 4 lanes of access roads near Tucker Hill at Stonebridge drive. With options available that protect current neighborhoods and neighborhood side streets, Option B should be the only one considered.
- 5) There are no hazardous materials and only two major utility conflicts that need to be address with Segment B versus 11 (hazardous materials) and 7 (major utility) conflicts with segment A.

And finally, look at the map, the shortest distance between two points is a straight line...why would you make a bypass that causes everyone to make a right angle turn? That is not saving any one time or fuel as they sit at a light waiting to turn right to finally start their time saving trip to Hwy 75?

Something needs to be selected fast so businesses and neighborhoods will know where to build and they can get moving on this project.

Thank you for your attention in this matter,

Kristen Jones

We live in Whitley place and strongly oppose option B!! Prosper Economic Development has a list of impacts it would have on Prosper and our neighborhood and surrounds. Our family and our community say NO to B!!!

HOW DOES IT IMPACT US?

- 12+ lanes dividing Prosper (8 lanes & 4+ access lanes either side) with the magnitude equal to US 75, located just south of Founders Academy
- US 380 Bypass Segment B options + approved Collin Outer Loop (4-6 lanes) just north would sandwich NE SE Prosper in between 2 major highway thoroughfares
- Directly affects current and future planned neighborhoods: Whitley Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek Amberwood, Ladera, Wandering Creek, Malabar Hills Rutherford Creek, etc.
- Materially impacts ManeGait and the wonderful therapies they provide to children and adults with disabilities
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Academy
- Impacts student drivers
- Increased Traffic and Noise
- Significant environmental impact: pollution, emissions, poor air quality
- Safety of our citizens and students
- Decreased home values and overall desirability of area
- Massive utility relocations that are critical to Prosper infrastructure
- Substantial lost tax revenue to the Town and Prosper

Thank you,
Kristi Bluj

Subject: Concerns about Option A for Project 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

Good morning. I am a resident of McKinney, specifically Wren Creek of Stonebridge Ranch. I am writing to inform you I STRONGLY SUPPORT the Project 380 Segment-B bypass alignment option. It is:

1. The least disruptive to businesses with no displacements.
2. Has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Especially ours at Wren Creek.
3. The least expensive option by nearly \$99 million when compared to the cost of the Segment-A Alignment.

I STRONGLY OPPOSE Segment-A and it should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the 380 and Custer intersection on the North Side.
2. The cost of Segment-A is \$99 MILLION more than Segment-B.
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive - all which have schools located on them directly off 380.
5. It will cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community. Please be conscious of the environmental impact, the financial impact, and the community impact that Segment B has.

Thank you for your time.

Subject: Support for Highway 380 Segment B Solution

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a homeowner and citizen of McKinney, TX for 20 years., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. I further believe that SEGMENT B will improve the overall safety of Highway 380 diverting more traffic away multiple MISD school campuses. Highway 380 can be a challenging road to navigate for school buses, novice drivers, and vehicle operators not accustomed to stop lights on this type of road; by diverting more of the traffic away from Mckinney proper we will provide a safer driving environment for everyone.

I am strongly oppose Segment-A. This option should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

I appreciate your attention to this matter and encourage you to make Segment B a reality for progress and safety.

Have a good week,

Good morning,

I am a Stonebridge resident and I just wanted to leave my comment about this overpass flowing over into our community and residential neighborhoods. I do not like it or support it, unfortunately. Our kids need the space to be kids and grow in a safe and open community. Thank you. Have a nice day.

COMMENT:

I ride at ManeGait and don't want a highway ruining the beautiful property, scaring the horses and stopping us from helping other kids to need therapy. My grandparents are the founders and have worked so hard the last 15 years to build this program to help others. Even I can see how important it is and I'm only 8 years old. Surely you can see that too.

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

My prayer is that TxDOT is reminded by the many ManeGait supporters what a beacon of hope and healing ManeGait is for the surrounding community. We fight for a population that is left behind. As servants in Christ, we are called to serve the "least of these," and that is exactly what ManeGait does EVERY SINGLE DAY. Not to mention the volunteer opportunities and what a beautiful part of the city it is - aligning directly with the city of McKinney's slogan "Unique by Nature." It would be an absolute shame to destroy this land and the lives that get so much from God's ministry that is ManeGait.

We look forward to seeing all of you again next week and pray that your eyes are opened and perspective shifts to what truly makes a community great and what matters in life. That you too choose to stand up for those that quite literally cannot stand for themselves.

Make the right choice. Serve the least of these. Keep our land and community preserved and choose the route you already decided on once before, Route A.

We have never given up on a rider at ManeGait. We fight to serve them no matter what. Please know we will NOT give up. Ever.

In Christ's Hands,
Landon Schneider

The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Frankly I oppose Segments B and A and strongly urge TX DOT to find a better solution then creating bypasses that come anywhere near existing subdivisions in Prosper, Celina and McKinney.

Use Preston or NDT to divert traffic traveling north/south then explore undeveloped land allowing east/west travel. To bi-sect Main Gate and the City of Proper is insane and I fear Segment B as planned will negatively impact the value of my home in Mustang Lakes.

Simply stated, there has to be a better route and as a citizen of Texas who pays taxes, state inspection fees and state registration fees for my vehicles I urge TX DOT to do better!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am writing with a concern about the leopard 380 bypass running through prosper Texas. I agree with the leaders of Prosper and do not want the bypass to come through our town for the reasons they've expressed. In addition to those reasons, I feel that it will also place our kids at risk with the proposal being so close to the new Highschool. North Texas teens are at high risk for sec trafficking and having a freeway so close to a school is dangerous. Please do not put a bypass through our town!

Have a fabulous day!
Lara A. Ross

I just wanted to reach out to share that I am firmly against the 380 bypass running through the town of prosper for all the same reasons that the city council and mayor are against it. I would also add my concern that one proposal puts the bypass near a new highschool and I have concerns regarding that as well. With North Texas being a sex trafficking area, to me having a major freeway or bypass right next to a highschool is dangerous for our kids. Please reconsider.

Sincerely,
Lara Ross

To: 'Stephen.Endres@txdot.gov' <Stephen.Endres@txdot.gov>
Subject: US 380 Coit to FM1827 Virtual information.

Sir,

The virtual information did give a lot of information, but I am curious what the Green Highlight on my home at [REDACTED] McKinney, TX means as I see it on another neighbor's house as well, but not on the home of the neighbor between our two homes? Also, I have over 2 acres here & is only shown in Brown so that means nothing at all I take it, is that correct? Bottom line what are you (TxDot) talking about in relation to my home & land, especially the LARGE majority of land that is shown as unaffected. I'm just trying to find out what your (GREEN) color coding means to me & my family.

Finally also noticed that to south of the frontage Road showing coming thru my lot that there is a section of **Existing-US 380 Existing County Road 330** that is cross hatched out in RED, is this really just unused land as does not make sense to incur cost of relocation & condemning peoples homes when existing HWY land is NOT fully utilized. That same piece of existing US Hwy 380 could resolve another issue that current plan suggest you may not be aware of. Specifically, there is a water main running right under the increased encroachment into my property that was avoided with the Initial design layout as previously presented with respect to this project. Keeping the Highway & Frontage road to the south of the water main would reduce the impact to three of the houses in the area as well as avoid the extra expense of ensuring the water main stays free & maintaince accessible without need of shutting down new Highway in case of leaks. To avoid the water main would require a shift of about 50' south of the frontage north side (West Bound) as now being presented, & again looks like idle land identified as the cross hatched existing US 380 would afford that amount of buffer to move the road south by that much & keep the water Mian free from impact zone of road work as well as reducing impact & to three (3) personal residences, including mine.

Please let me know if you have any questions, comments or need any additional information regarding this.

Sincere thanks for your time & response to this issue.

To: Stephen Endres
Subject: US 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

As homeowners and citizens of McKinney, TX., we **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

We also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thanks for your consideration,
Larry & Darlene Burner

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Please accept the following public input to the realignment of Collin County Hwy 380.

Support Segment A – Oppose Segment B

Although the matrix analysis between Segment A and Segment B shows Segment B being slightly more efficient, the negative impacts of Segment B on the community of Prosper are significant, both immediate and long-term. After decades of planning, the Town of Prosper and landowners in the affected area have spent tremendous effort and financial investment developing the evolution of the dynamic community it is today. Utilizing Segment A allows for a continuation of Prosper’s city planning, organized growth, and viability of its tax base with without disruption. On the other hand, Segment B undeniably isolates an entire section of the community, upsets the continuity’s decades of planning, and negatively affects the Town of Prosper’s tax base.

With a great foresight, the Town of Prosper planned for the potential expansion of Hwy 380 by creating setbacks for all buildings along its path. However, Segment B had no such planning. The Town of Prosper should not be penalized by the toxic ramifications of others’ lack of planning, bring forth consideration of the unacceptable Segment B alignment isolating the Town of Prosper’s south-east corner. This isolation by 12+ lanes of traffic will cause well established, highly desirable businesses to relocate, diminish the viability of planned residential communities, and negatively impact schools and humanitarian activities. In addition, years of disruptive road construction of Segment B will cause multitudes of further unanticipated detrimental effects upon the citizens of the Town of Prosper. I urge the decision makers to select Segment A for the new Hwy 380 realignment. Thank you.

Comments that apply to you (Texas Transportation Code, §201.811(a)(5)).

Subject: Collin County, Hwy 380 realignment

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

Please accept the following public input to the realignment of Collin County Hwy 380.

Support Segment A – Oppose Segment B

Although the matrix analysis between Segment A and Segment B shows Segment B being slightly more efficient, the negative impacts of Segment B on the community of Prosper are significant, both immediate and long-term. After decades of planning, the Town of Prosper and landowners in the affected area have spent tremendous effort and financial investment developing the evolution of the dynamic community it is today. Utilizing Segment A allows for a continuation of Prosper’s city planning, organized growth, and viability of its tax base with without disruption. On the other hand, Segment B undeniably isolates an entire section of the community, upsets the continuity’s decades of planning, and negatively affects the Town of Prosper’s tax base.

With a great foresight, the Town of Prosper planned for the potential expansion of Hwy 380 by creating setbacks for all buildings along its path. However, Segment B had no such planning. The Town of Prosper should not be penalized by the toxic ramifications of others’ lack of planning, bring forth consideration of the unacceptable Segment B alignment isolating the Town of Prosper’s south-east corner. This isolation by 12+ lanes of traffic will cause well established, highly desirable businesses to relocate, diminish the viability of planned residential communities, and negatively impact schools and humanitarian activities. In addition, years of disruptive road construction of Segment B will cause multitudes of further unanticipated detrimental effects upon the citizens of the Town of Prosper. I urge the decision makers to select Segment A for the new Hwy 380 realignment. Thank you.

Kindest Regards,

Larry Jackman

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Thank you,
Laura Camilleri

Project: US 380 Collin County Feasibility Study Reason for contacting us: Other
Message:

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community. We live just a mile from the 380 and Stonebridge Ranch intersection and already have seen an increase in traffic and speed related issues in our neighborhood - Segment B is the best option!

I cannot approve and totally oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I hope you'll hear our voices. Please vote no!

Subject: Project 380 bypass - McKinney TX

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen Endres,

My family and I support of Segment-B.

On April 10, 2022, the Dallas Morning News published a front-page article about the Project 380 bypass route. The article, focused on ManeGait, was well written but poorly researched as it only told half of the story. In the interest of fairness and complete reporting, the other side of the story should be told. These are the facts that were not reported:

There was no mention of the fact that back in 2019, the City of McKinney offered to acquire the current ManeGait property and move it to a newly constructed facility at no cost to ManeGait. They refused to consider this option even though they now say they may have to move and build a new facility. Interestingly, in the last few years, ManeGait was the recipient of several hundred thousand dollars from City of McKinney grant programs. Neither of those items were covered in the article.

Further, TxDOT has researched stakeholder concerns including those expressed by ManeGait. TxDOT updated Segment-B so that none of the ManeGait property is taken. TxDOT even researched other similar facilities in the state of Texas and found **no** ManeGait operational issues should be expected. That was not mentioned in the article.

There was no discussion of the seventeen businesses that will be destroyed if Segment-A is built versus none if Segment-B is built. The businesses to be destroyed are located on the North Side of 380 on both sides of Custer Road and the number will grow since more businesses are under construction today. Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a currently heavily developed area in McKinney. In McKinney's Tucker Hill, businesses that front on 380 also will also be impacted. Was there any discussion with any of these business owners?

The cost of Segment B is \$99 million LESS than Segment-A.

There was no reporting on the impact to Kensington Village which is directly in front of where the proposed Segment-A would enter 380. The proposed Segment-A interchange would greatly increase noise and pollution in that SRCA neighborhood potentially affecting the enjoyment and value of their homes. Were any of those property owners contacted for comment?

There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B will have minimal impact on homes and businesses.

Thank you for considering all the points explained above,

Laura Martinolich

Subject: HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

My name is Lauren Palmer and I live at [REDACTED]. I 100% oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait—a key community resource as TXDot themselves recognized in 2020. Segment B places the 45' tall freeway within 50-100 feet of ManeGait...even closer and more disruptive to operations than your previous proposition. As a born and raised Texan, contributing member to society, and on the most basic level, a human, I do not understand this type of blatant contradiction.

The children and adults with disabilities served by ManeGait deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. In the March 22, 2022 public hearing, TXDot claimed they interviewed similar horsemanship facilities and the proposed highway does not pose an issue to operations. This claim is a fallacy. No other PATH Premier Accredited center in Texas the size of ManeGait is located within 50-100 feet of highway, and none have operated next to a 3-4 year highway construction project. How disappointing to see such blatant untruths come from such a powerful company who should be leading the way in honesty and integrity among governmental businesses.

Please consider my words and request to eliminate this proposition. Do not allow your expansion to prey on the vulnerable (and protected!) populations that ManeGait serves.

Sincerely,
Lauren Palmer

Subject: US 380 Bypass Options - Support Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres & TXDOT,

I write you to ask that as you consider the best option for a US 380 Bypass supporting either Segment A or B, that you not be influenced by the propaganda, media or hype surrounding this matter, but to consider only the facts as evidenced by your own research and studies.

Segment A:

Segment A is currently estimated to be \$98.8 million dollars more costly and does not yet include estimates for the relocation of main lines from water pump stations

Segment A impacts 31 entities (17-businesses, 2-homes, 12-other structures), Segment B impacts only 12

Segment A has 7 noted major Utility impacts compared to only 2 in Segment B

Segment A has 11 Hazardous sites, Segment B has 0

Segment A does not provide direct access into or out of Tucker Hill and will impact timeframes for emergency vehicles and lifesaving services

Segment B:

Segment B does not impact existing Businesses (0), or other structures (0) and has impact limited to 5 residences

Segment B minimizes impact to the Custer Rd. And US 380 intersection, a major thoroughfare in the area

Segment B has less overall environmental impacts

Segment B indicates better flow through timing and speeds for transit

Segment B - ManeGait (Research indicates it is possible for therapeutic horsemanship facilities to function effectively in a variety of physical and environmental settings).

Segment B is the most economically favorable as it requires less funding and conserves at least \$98.8 million dollars

Please support Segment B and prove that TXDOT operates fairly using fact based decisions and economic reasoning.

Sincerely,

Laurie Smith

Subject: Support for 380 Bypass Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As citizens of McKinney, TX, we voice our support for **Segment B** of the 380 ByPass Project. We strongly agree with the opinions of less business disruption and less impact on existing homes with **Segment B**. In addition to those concerns, the cost factor should be a considerable consideration in favor of Segment B. With the inevitable cost overruns, it seems plan A would likely cost at least \$100 million more than the more desirable **Segment B**.

Having lived in McKinney since 2005, we have followed the many discussions of the proposed 380 Bypass routes. Even from our east McKinney location, we observed the development and increase in traffic at the intersection of 380 and Custer. Through all the various alternate bypass routes, It has always made more sense to us that west of Custer would be the wisest choice to connect the bypass with 380.

We hope you will share our concerns with TXDOT and that **Segment B of the Project 380 Bypass** will be the choice for improving 380 traffic and north Collin County traffic in general.

Thank you for your support,
Lee and Jill Moore

As a homeowner and citizen of McKinney, TX., I strongly **SUPPORT** the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly **oppose** Segment-A. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

- *The cost of Segment-A is \$99 million more than Segment-B.

- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.

- *It will also cause the installation of water pipes (ducts) over 380.

- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Lee-Ann Elliott

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments:

To Mr. Endres

hello - I live in a neighborhood just off of 380 and this idea of choosing Option A is extremely concerning to me on so many levels. First, the cost factor is Option B. Almost 100 million difference??!! What a poor poor stewardship of money for our city. The displaced businesses etc. But the biggest concern I have is if option A were chosen - the massive disaster 380 would be in the ensuing years - how would emergency vehicles get to various destinations along 380 in a timely manner? Respectfully this makes no sense to me to choose this

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

Please CHOOSE OPTION B

Thank you

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Leisa Morgan

Subject: 380 Bypass Project - Segment B Support

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Mr Endres,

Writing this note as I'll like to share my position in regards of this TXDoT project.

As a homeowner and citizen of McKinney, I strongly support the Project 380 Segment-B bypass alignment option given this one will be the least disruptive one to businesses and residents alike, ensuring no displacements and a minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380 in terms of quality of life

It is also be the least expensive option by ~100 MUSD when compared with Segment-A alignment, plus option A will also have a negative impact to the community in terms of:

1. Small businesses (It will destroys/remove 17 SME West of the 380 and Custer intersection on the North side)
2. Unnecessary overpass on 380 over Stonebridge Drive and Custer Road damaging the neighborhood livability
3. Decrease traffic safety and increase traffic flow on Stonebridge neighborhood streets such as Stonebridge Drive, Ridge Road and Lake Foretraffic, generating additional noise pollution and overall contamination for the neighborhood which will ultimately translate into a property value reduction for the houses in construction proximity

Based on the facts from above, is why in my opinion Segment B will be the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community

Hope this note serves for the TXDoT when deciding on the best option for the neighborhood, McKinney and the DFW area

Best,
Leonardo Cova

Dear Stephen,

My husband and I bought a brand new home in [REDACTED] Prosper, TX, in May, 2021. We love our home, our neighborhood, and our town. Segment B in the proposed 380 project would negatively impact our neighborhood and nearby neighborhoods as well as the new Prosper High School (currently under construction) and Founders Classical Academy. We wish to strongly discourage Segment B as an option in the proposed 380 project.

Sincerely,
Linda & Dennis Racey

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres, I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper. As a Recreation Therapist I also fully support ManeGait Therapeutic Riding Center, understanding the need for a quiet and calm environment for both the safety of the animals, and the adults and children with different sensory needs. As a mother of a child with attention and auditory sensory challenges that in turn affect his behavior, it would make ManeGait a loud environment and my child would not be able to safely participate in their amazing program. This 380 bypass would clearly impact them and therefore, I strongly opposed this.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Linda Hunter

Subject: OPPOSITION TO 38 BYPASS GOLD/BROWN

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

- I oppose the Gold/Brown alignments of the proposed 380 bypass for the following reasons.
-
-
- Town of Prosper has passed six Town Council approved Resolutions strongly opposing any proposed alignment for the widening of US 380 not located along the existing US 380 corridor; The TEXDOT study recommended alignment A.
-
- Segment B of the proposed Gold/Brown alignment poses a significant, negative impact to both existing and future residential, including a senior facility, and commercial developments planned within the Town. The alignment would directly impact over 380 future homes and thousands of residents and indirectly impact many more .
-
- Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG);
-
- Segment B runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits, most notably noise, air pollution and traffic impacts.
- - Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities. People with disabilities have the right to a favorable environment to promote healing. The horses safety and behavior will also be impacted.
 - It will no longer be able to safely exist in such proximity to that amount of noise and pollution. They have a once a year fund raising event that produces less noise and we at Whitley Place, quite a distance away are able to hear that. Once a year for a good cause is perfectly acceptable to help out those in need. Constant truck and car traffic is not.
- Segment B is in close proximity to existing and future schools including an existing charter school and a high school. impacting thousands of students. Noise will be impossible for learning and outside activities. Again, noise and ozone levels will be harmful.

Sincerely,
Linda Louise White De Mattei

Subject: Project 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

Over the years, I have come to admire the efforts that ManeGait's owners, staff, and volunteers make to serve vulnerable and protected populations through their therapeutic horseback riding program. I have enjoyed hearing about their successes and know that their hearts are passionately invested in these activities. It takes special people to devote the resources and energy that they continually invest in serving those in need. Not many with similar desires have been as successful as ManeGait. What a shame it would be to have results of their hard work and investment over so many years come to an end due to the subject proposed highway expansion.

Thus, I wholeheartedly oppose the proposed U.S. Highway 380 Segment B because it threatens the daily services and special events of ManeGait. Indeed, I understand that TxDOT acknowledges that ManeGait is a key community resource. The vulnerable and protected populations served by ManeGait deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait. Thank you for your consideration and support.

Sincerely,
Lisa Griffith

Good Morning,

I am opposed to the proposed HWY 380 Segment B.

It not only threatens services and special event of Mane Gate, it will create an extremely dangerous environment for both the horses, and more importantly, the riders.

These riders suffer from debilitating disabilities. Expanding the highway so close to this very important therapeutic facility would not only put stress on the horses causing illness and possible death, but could lead to possibly fatal accidents.

Highways and horses do not mix. Highways and children with disabilities can be deadly!

Please reconsider any highway expansions of HWY 380 near Mane Gate.

Thank you for your time.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Lisa Rogers

Because the city's (Mckinney/Princeton) have waited until the growth of this area of Collin County is out of control they have not looked at the disadvantages and implications this is causing. HWY 380 should have been fixed 10yrs ago. The business on 380 should be taking the brunt of 380 expansion not the homes and NOT ManeGait! I have a niece who is getting therapy from ManeGait that has improved her life and continues to enhance her quality of life. I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Subject: Highway 380 Expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I am a resident of StoneBridge Ranch housing area. I OPPOSE Option A and I am in FAVOR of Option B. My reasons are the following:

1. Option A will displace current business (some recent)
2. Hugh increase in cost for relocation of utilities and acquisition of ROW (right of way)
3. Environmental impact of wetlands, rivers and streams are more severe than Option B.
4. Neighborhoods of Stonebridge will be sharply affected with noise and construction.

I agree that McKinney is growing fast and traffic and congestion will increase. So let's push it OUT and away from neighborhoods and NOT inside. Option B makes sense, it SAVES the environment, established businesses and neighborhoods. Also, it saves money.

Thanks for your time,

Lolo Wong

Hi there,

My name is Lori Charles at [REDACTED] in Dallas. I just wanted to write in to say while I am far south of the area in question, ManeGait is a crucial part of our metroplex and should not have its ability to serve those with special needs threatened because of a new road. While I understand the metroplex is constantly working to improve transportation this would truly be a disservice to our citizens. Going through with the idea of the proposed road that would cut through that area would hurt the citizens of Dallas Fort Worth and absolutely should not be done.

Let me know if you have any questions about my opposition. Thank you for your time.

Lori

RE: CSJs: 0135-02-065, 0135-03-053, 0135, 15-002

Dear Stephen:

On behalf of CB Parkway Business Center XIV, Ltd. I oppose Segment A for the reasons listed below. This partnership owns two major tracts impacted by this proposed loop. The tract this letter is addressing is 134.33 acres of single-family land that can house 940 homes.

The angle, length, the width of the road, bifurcates the property and the future residential community. The setbacks from a freeway so massive before one can have a home or a community destroy much of the zoning and render large areas undevelopable. The noise and freeway light intrusion are major hindrances to the viability of a neighborhood. The homes which are not able to be built in this area will just have to be built further north thus creating more traffic and pollution.

The taking by the freeway ROW is estimated to be 18.55 acres. We expect due to damaging the remainder of the property for buildability and quality of what can be built that the damage to the remainder is considerable, and those costs need to be added to the overall estimate. Segment B is currently projected to cost \$589,700,000 in total costs We expect these estimates for both Segment A to grow in the hundreds of million dollars and in Segment B to grow considerably.

The Billingsley Partnerships in their entirety own 885 acres that are impacted by either Loop A or Loop B and is the single largest property owner in these takings.

We prefer that the 380-bypass loop not be built at all. If it has to be built, we believe that Segment B is the only logical choice. Further we believe that the best alternative to is widen Bloomdale and other existing east west streets and look to the outer loop which will be in service before the 380- bypass can be in service.

Environmental impact in Segment A only

In addition to the 109.8 acres of wetlands, forest, and prairies and 4,665 feet of streams, and the wildlife mentioned in the TX Dot report, the nature of these forests needs to be addressed.

With the alignment being shared overlaid onto our tree survey, it appears that there are 53 large and old trees in the proposed right of way. 31 of these are Heritage trees many approximating 50 or more feet in height. These are Red Oaks, Pecans, Texas Ash, Cedar Elm, and Hickory.

Playing fields and barns may be moved and replaced but the oldest group of these trees, according to the Texas Forest Service are 150-200 years old. That is irreplaceable.

Photos and videos of these wooded areas are attached. They are not precise to the alignment as it also is not yet precise.

This is a forest of grandeur that the public will enjoy for years to come on the Wilson Creek trail.

Sincerely,

Lucilo A. Pena

As a homeowner I support project 380 B bypass alignment option.
This option has minimal impact on existing homes and businesses.
Less traffic flow on Stonebridge Ranch,Ridge,Lake Forest.
Do not want over pass with water pipes.
Segment B does not cost as much.

Thank you

Lucinda Peeples

April 19, 2022

TO: Texas Department of Transportation

RE: Proposed Improvements to US 380 from Coit Road to FM 1827

I am writing to communicate my opposition to the 380 Bypass Options A and B. These options will destroy the properties they bifurcate and the potential that these properties have for future development. Further, the bypass will require the cutting down of many trees including Heritage trees that range in age between 150-200 years old. It would be a horrible shame to so unilaterally destroy such a rich area that would otherwise become neighborhoods families could enjoy.

Option A particularly destroys the CB Parkway Business Center XIV, Ltd. property and whatever potential that it has. The bypass will bifurcate the property and render unusable such a large portion that what is left will have significantly less value and potential. The aesthetic of a massive freeway, the bright lights at night and the noise that accompanies it will make having residential communities or even commercial nearby a major challenge.

I encourage TXDOT to study this further to find a better long-term solution to address the population growth in that part of the region.

Sincerely,

Lucy Burns

Subject: 380 Bypass project- concerned TX citizen

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My name is Lynda Morrison ([REDACTED]). I live in Stonebridge Ranch just south of 380 between [REDACTED]. I moved to the area 5 years ago and have watched the area grow. I am very concerned about TxDot building a bypass connecting 380 to 75 less than a mile from where I live. My neighborhood is a beautiful planned community and I'm afraid Segment-A would greatly affect the quality of life that me and my neighbors enjoy. Long term the noise and pollution from more traffic will affect our property values. **Please choose SEGMENT-B for Project 380.** Thank you, Lynda Morrison

Subject: Oppose Segment B in Prosper

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Stephen,

My husband and I are residents of the very rapidly growing Lakewood at Brookhollow community in Prosper. We access US 380 eastbound via the Lakewood Drive intersection each morning and evening to commute to and from work. If this access to US 380 is closed off, the only way for us to access US 380 is to exit the subdivision from Coit Drive and turn *left* onto US 380. The traffic light to turn left onto US 380 from Coit is on a very short timer and currently creates heavy traffic during the morning rush hour. Blocking an alternative way to access US 380 would in turn create more traffic on Coit Road. As I iterated previously, this community is rapidly growing. Our household currently avoids adding more traffic during the morning rush hour by exiting the subdivision via Lakewood Drive. Therefore, I strongly **oppose** segment B as I believe that this will in turn create more unnecessary traffic for our entire community. Please consider my thoughts and comments on behalf of our community. Thank you.

Kind regards,
Lynda Nguyen

[REDACTED]

COMMENT:

I oppose the proposed HWY 380 Segment A; it threatens the value and daily quality of life of dozens of residential neighborhoods, businesses, nearby elementary schools and residents of all ages.

The additional traffic, noise, pollution and emissions will have a direct negative impact on all nearby residents far into the future. Negative impact on property values is a real concern, too.

Adjacent homes were built 20+ years ago as part of a planned HOA community with green spaces and community gathering areas. While growth and change is inevitable, a massive, elevated, multilane freeway looming overhead, and a greatly-widened local street (Stonebridge Drive) was never a consideration. These green spaces are essential to a healthy community, literally and figuratively.

Option B costs \$99 million less than Option A and is much less disruptive to current businesses and homes. Respectfully asking, how is Option A still in the running?

Thank you for considering your fellow Texas citizens.

THANK GOODNESS, THERE'S A PLAN B!

Sincerely,
Lynne Weinberger

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Why should Prosper residents and taxpayers be burdened by McKinney's failure to adequately plan and provide for the eventual expansion of US 380? **I am totally opposed to Segment B being** enacted and if the existing right of way for US 380 cannot be totally utilized by an upper deck (as in Austin) or otherwise, in my opinion, Segment A is the only option that makes sense...

Dear Mr. Endres,

I work in Special Education and know unknown sounds/surroundings instill fear in certain individuals with conditions and creates a situation were the person may or may not be non-verbal and can only communicate through noises and being physical prompting an avoidable what we call episode which can cause injury to themselves/worker/animal. I implore you to reconsider this action as it could have detrimental effect to individuals with special needs here. I should also add that the population here seems to be very litigious and do not hesitate to bring legal action if they deem it necessary or when injury happens. I pray there is another option to consider outside of this route. I know the growth is exponential and change is necessary to accommodate it and aide in traffic flow. Thank you for your time.

Sincerely,
Maddalen Downes

Subject: Expansion of 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Enders,

Hope you are doing well!

I'm the resident of Kensington village and recently moved to this community. Lately, I'm hearing there is an expansion to the 380 and it affects our neighborhood with noise, pollution and traffic.

There was no reporting on the impact to Kensington Village which is directly in front of where the proposed Segment-A would enter 380. The proposed Segment-A interchange would greatly increase noise and pollution in that SRCA neighborhood potentially affecting the enjoyment and value of their homes.

There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment-A is built. Segment-B will have minimal impact on homes and businesses.

So, as a resident and owner of the house in Kensington village, I would request you to consider option B rather A.

This will help us not to move or search other homes and we are suffering with traffic noise all the time today.

Mr. Endres,

As a homeowner and citizen of McKinney, Texas, I strongly SUPPORT the project 380 SEGMENT B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes, and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly 99 million when compared to the cost of the segment A alignment.

Good Afternoon,

I'm voicing my opinion for plan B. It makes a lot more sense to build the bypass this way. It doesn't destroy as many small businesses and I believe it should be further down. If we don't quit arguing over this we're gonna need 2 bypasses possible 3 if this doesn't get started asap.

Thank you for your time and please consider the future and our need today asap. Your not going to make everyone happy. The project just needs decided on asap and started on asap.

Best Regards,
Mae Magee

Subject: I strongly SUPPORT the Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Mr. Endres,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

TEXAS

OPPOSE HWY 380 SEGMENT B to SAVE ManeGait!

by: [ManeGait Therapeutic](#)
recipient: TXDOT, Collin County Commissioners, McKinney and Prosper Reside...

We, ManeGait riders, volunteers, donors and advocates, respectfully petition TXDOT to eliminate Segment B from the Highway 380 expansion project. The proposed Segment B will prevent ManeGait from serving two vulnerable and protected populations -- the disabled and children.

ManeGait cannot safely operate between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380) for the following reasons:

1. Many ManeGait riders have sensory issues, and some veteran participants suffer from PTSD. Traffic noises, sirens, and emissions will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
2. Traffic noises and vibrations can likewise scare horses, which threatens the safety of ManeGait riders, volunteers, staff, and equines.
3. There is a risk of losing accreditation and insurance coverage should safety issues be encountered, which cannot be mitigated.
4. The proposed route also runs directly through adjoining property regularly used for trail rides, fundraising events, and horse

[site feedback](#)

I am against Bypass Option B for many reasons. One specific reason being that it would devastate ManeGait. Bypass Option B would cause chaos to ManeGait, and would destroy the outstanding work they do for disabled children, adults, and for our military veterans. ManeGait is such an incredible gift to the entire local area! It must be treasured, and protected from negative influences such as a bypass. The noises, traffic, vibrations, pollution, and distractions would be harmful to the horses, the riders, and to the overall efforts of ManeGait. Thus, this would negatively impact the lives of so many - and of our most vulnerable! ManeGait is unique! It is in a beautiful setting that cannot simply be replaced. There are other more suitable, and more appropriate options, where a bypass can be built. Bypass Option B is not the answer! Save ManeGait and stand up for is right!

James N.

Texas

2 days ago

I am against Bypass Option B. Preserving ManeGait should be a top priority and their mission should not be disrupted in any way. Bypass Option B would destroy ManeGait. We, as a society, need to make every effort to protect and enhance the lives of those most vulnerable by allowing services like ManeGait to thrive rather than to jeopardize all their wonderful work by a highway project that could be placed in a much more feasible location.

Doug V.

Texas

2 days ago

This would impede on a critical organizations mission of helping the disabled and children

Shirley V.

Texas

2 days ago

It's important to me because it's important to the community particularly the disabled and the children. It's sad that this is even being considered as an option. When society puts commuter traffic above the priorities of those who are vulnerable, that says something about the selfishness and depravity of man.

Julie B.

Texas

2 days ago

MainGait provides amazing services and is a big asset to our community. While growth is inevitable, having 380 negatively impact Texas values and a valued community horse property should not be tolerated. Find another way and direction to route 380 that does not impact ManeGait.

I believe ManeGait provides vital services to our community and beyond.

[site feedback](#)

US HWY 380 IMPROVEMENT PROJECT - IMPACT ON A KEY COMMUNITY RESOURCE

ManeGait Therapeutic Horsemanship is a prominent North Texas nonprofit that provides comprehensive equine therapy and brain-building programs for children and adults with disabilities and military veterans. As a beacon of hope and healing for over 14 years, ManeGait serves 150 rider families with 2,000 active volunteers. ManeGait is also a knowledge center for industry professionals and a community center touching the lives of 4,000 volunteers and supporters annually.

Background

In late 2018, the Texas Department of Transportation released route alternatives for the future expansion of HWY 380. One of the options routed the highway at the corner of ManeGait's southeast border.

Thanks to an outpouring of comments from ManeGait supporters, TxDOT's [US 380 Collin County Feasibility Study](#) identified ManeGait as a "key community resource" and removed from consideration any alignment that impacted this facility.

Excerpt: "TxDOT considers the daily operations and special events held at this location to be important services for at least two vulnerable and protected status populations – the disabled and children. TxDOT avoided selecting any alignment impacting ManeGait because of potential impacts to the community facility and the services it provides to vulnerable populations."

Sources cited in TxDOT's conclusion:

- Executive Order 12898 on Environmental Justice for Low Income and Minority Populations (1994)
- The Americans with Disabilities Act (1990) as amended in 2008 (42 USC 126)

New Threat to ManeGait

In a direct contradiction to the research and conclusions above, TxDOT introduced a new alternative as part of the 380 Environmental Impact Study. **This alignment is even closer and more disruptive to ManeGait's operations than the path previously rejected by TxDOT.** The proposed Segment B places a 45-foot tall freeway within 50-100 feet of ManeGait **and** cuts through the adjacent property that is regularly used to support ManeGait's operations.

SEGMENT B & CUSTER ROAD

In the [March 22, 2022, public hearing](#), TxDOT provided an update on the environmental impact statement (EIS) process, which included this assertion related to ManeGait and Segment B:

"We conducted interviews with staff of similar therapeutic horsemanship facilities in Texas. Staff interviewed at these facilities noted nearby infrastructure (such as highways) did not pose an issue to their operations. Ultimately, it was found it is possible for therapeutic horsemanship facilities to function effectively in a variety of physical and environmental settings."

Fallacy of this Claim

There is no evidence of any "similar" facilities in this situation. ManeGait called and collected data from therapeutic horsemanship centers in Texas that are located in proximity to major thoroughfares. In comparing ManeGait's situation with others, **three key questions** must be asked:

1. Does the center offer the same scope and scale of service as ManeGait? Are they truly similar?
2. Is the center as close as ManeGait is to the proposed highway?
3. Did the center operate during highway construction?

Results of this analysis (see chart on next page):

- ✗ ManeGait's services are more comprehensive in size and scope than other centers in this comparison.
- ✗ **No other PATH Premier Accredited center in Texas the size of ManeGait is located within 2500 feet of a major highway – nowhere near the 50-100 ft proposed by TxDOT.**
- ✗ The only center to operate during highway construction was located 1.49 miles away.
- ✗ One center was forced to move to a new location due to the noise of an adjacent highway.
- ✗ The one center located next to an airport is less than half the size, operates only in the AM, and hosts 150 guests to their center each year versus 4,000 at ManeGait.

Conclusion

The proposed Segment B will interrupt ManeGait's ability to serve two vulnerable and protected status populations: the disabled and children.

- ✗ It is unreasonable and unsafe for 150 disabled children and adults, 27 therapy horses, 10 certified instructors, and 285 volunteers to work 60 hours a week with the sounds, emissions, and vibrations of construction for 3-4 years as estimated by TxDOT.
- ✗ In the future, it is unreasonable and unsafe for these riders to receive therapy with a roadway and traffic equivalent to US HWY 75 towering over them and their therapy horse.
- ✗ The project will also result in right-of-way acquisition from adjacent property that is regularly used to support ManeGait's operations.

Moreover, ManeGait has plans for a major site renovation, which will double capacity and serve the waitlist of 400 families. Yet the threat of highway construction is leaving them unable to move forward, unable to grow, and unable to serve the unmet needs of these protected groups.

The Segment B alternative must be permanently eliminated because it absolutely threatens the daily services and special events of this key community resource as identified by TxDOT. **These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.**

Comparing Texas Equine Therapy Centers in Proximity to Highways

Center	1. Scope and Scale compared to ManeGait							2. Proximity	3. Construction
	PATH Premier Accredited Center?	60 hours+ per week?	150+ Riders /week?	Waitlist?	27+ Horses?	Additional Therapy Programs?	4000+ guests /year?	Within 100 ft of a major highway?	Operated during highway construction?
ManeGait – McKinney, TX	YES	YES	YES	YES (400)	YES	YES (Brain-Building)	YES	50-100 ft Proposed	
Healing with Horses – Manor, TX	YES	YES	NO	NO	NO	NO	NO	2000 ft with arena on the opposite end of the 40-acre	NO
Inspiration Ranch, Magnolia, TX	YES	NO	NO	YES	NO	NO	YES	2700 ft	NO
Saddle Light, San Antonio, TX	YES	NO	NO	YES	NO	NO	NO	1.49 mi	YES - had access issues
Born2Be – Sanger, TX	YES	NO	NO	NO	NO	NO	NO	3.29 mi	Relocated here due to noise of adjacent hwy.
Refuge Services – Lubbock, TX	NO	NO	YES	NO	NO	NO	NO	.5 mi	NO
Dream Catcher – Spring, TX	NO	NO	NO	NO	NO	NO	NO	No highway, but 1,500 feet from airport	NO

(excerpt)

12. How did TxDOT compare the red alignment options in and between Prosper and west McKinney? Why did you recommend the red A alignment?

TxDOT considered many alignments in this area. There is no alignment in this area without impacts. Red alignments A, B and E were ones that had the least amount of impacts.

All three alignments avoid directly impacting the neighborhoods of Tucker Hill, Stonebridge, Heatherwood and Whitley Place; Erwin Park; several cemeteries; and existing and planned schools.

The red A alignment is the only alignment that does not affect ManeGait Therapeutic Horsemanship and its ability to function. ManeGait is a unique facility that helps children and adults with physical, emotional, cognitive, sensory, and behavioral disabilities. ManeGait also provides therapy programs to support wounded military veterans. The facility serves 150 riders per week and has 1,400 active volunteers that complete 4,500 hours of service each year. Public comment has helped in identifying the facility as a key community resource. Over 10% of comments received during the comment period in October 2018 referenced concerns about impacts to this facility. TxDOT received even more comments related to ManeGait at the March 2019 meeting with affected property owners. TxDOT considers the daily operations and special events held at this location to be essential services for at least two vulnerable and protected status populations – the disabled and children. See more about ManeGait in question 13.

The red A alignment affects fewer acres of planned development than the red B alignment. This is an important consideration by TxDOT because often challenges arise after an alignment has been determined and developments continue to be built in areas designated as future right-of-way.

Impacts on a community, including how a transportation improvement physically affects residential neighborhoods, commercial centers, and public facilities is given consideration during the environmental phase of the study.

TxDOT considered that the red A alignment does not run through any existing neighborhoods. It does run alongside the north side of the Stonebridge neighborhood and south side of Tucker Hill where the existing US 380 currently is. It runs along the floodplain on the east side of Tucker Hill and as the new location alignment travels north.

Red B & E alignments would impact a significant community resource in ManeGait. The red B alignment would separate an existing commercial area at Custer Road and US 380 and the red E alignment would impact a portion of the Walnut Grove neighborhood.

13. Why was ManeGait Therapeutic Horsemanship a factor in TxDOT's decision-making?

TxDOT evaluated the current ManeGait facility and did an initial environmental review of impacts to this community facility. TxDOT considers the daily operations and special events held at this location to be important services for at least two vulnerable and protected status populations – the disabled and children. TxDOT avoided selecting any alignment impacting ManeGait because of potential impacts to the community facility and the services it provides to vulnerable populations.

More in-depth analyses and documentation will be completed for the existing and anticipated social and environmental impacts during environmental studies, which also includes opportunities for public input.

TxDOT policy is informed by - and designed to comply with - several Federal statutes, regulations, executive orders, and policies that guide the department's actions as a recipient of federal funds. Those applicable to community impact assessments as listed in the Federal Highway Administration's, "[Community Impact Assessment: A Quick Reference for Transportation](#)" include:

- National Environmental Policy Act of 1969 (NEPA) (42 USC 4321-4335)
- Sections 174 and 176(c) and (d) of the Clean Air Act of 1970, as amended in 1977 and 1990 (42 U.S.C. 7504, 7506(c) and (d) and 40 CFR part 93)
- Uniform Relocation Assistance and Real Property Acquisition Policies Act (1970, referred to as the "Uniform Act,") as amended in 1987
- 23 CFR 771, Environmental Impact and Related Procedures (1987)
- Federal surface transportation authorization laws from the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) onward
- Executive Order 12898 on Environmental Justice for Low Income and Minority Populations (1994); U.S. Department of Transportation Order 5610.2(a), FHWA Order 6640.23A, and FTA Circular 4703.1 on Environmental Justice (updated 2012)
- Farmland Protection Policy Act (1981), as amended in 1994 (7 USC 4201-4209)
- Americans with Disabilities Act (1990) as amended in 2008 (42 USC 126)
- Section 504 of the Rehabilitation Act of 1973
- The Older Americans Act (1965), as amended (2016) (42 U.S.C. 6101)
- Executive Order 13166 on Improving Access to Services for Persons with Limited English Proficiency (2000)

Concerning the 380 Bypass Information,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,
Marcia Carson

Dear Stephen,
Please support Segment B.

I moved to McKinney in 1994. The town has changed a lot since that time. Highway 380 has become a very dangerous road and it has been that way for quite a while. The speed of the traffic coming from Denton to McKinney was the biggest problem long ago. People didn't slow down as they came into town. Now with the businesses, there is even more traffic. Please do not build more roads right in the area with all the businesses and bring in more traffic. We need to take the traffic that does not want to go to the stores away from the area. Another big problem with 380 is that at certain times of the year when going west, you are driving right into a setting sun which is blinding. I believe this has also caused many accidents especially from Hwy 75 to Stonebridge Dr. You can hardly see the traffic lights or tail lights of the cars ahead of you. Please do not put more cars going directly west on that section of road. I think that will create more accidents. Most people I know in McKinney young and old always said to stay away off highway 380 and to not buy a home near 380 because it is so dangerous which is so sad. Please help make this road safer by taking traffic away from the area, lowering the speed of the road further out, and putting in more lights to help people slow down. I do not know why McKinney decided to put so many stores along that road since it was dangerous before the stores, but please help us with a solution to take traffic away from the area.

Please support Segment B.

Marcia Simon
McKinney resident

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

STEPHEN,

THANK YOU FOR THE OPPORTUNITY TO VOICE MY SUPPORT FOR THE CURRENT RECOMMENDATIONS SEGMENT A. IN REVIEW OF BOTH OPTIONS, SEGMENT A DOES NOT ADVERSELY AFFECT MARIGAT, A PERSONS WITH DISABILITY THERAPEUTIC RIDING FACILITY FOR THE AIR QUALITY FOR CHILDREN OR HORSES. I HAVE CONCERNS WITH ANY ROUTE OTHER THAN THE RECOMMENDATIONS SEGMENT A. PROSPER HAS PLANNED FOR THE GROWTH ALONG 380 AND PROVIDES AMPLE SETBACKS TO ACCOMMODATE THE EVENTUAL EXPANSION. A HUGE CONCERN I ALSO HAVE IS THE PROXIMITY TO FORTBESS ACADEMY AND WINDRIP GRADE HIGH SCHOOL WITH MY DRIVERS. OPTION B IS IN DIRECT CROSSING CONTACT WITH THE AIR QUALITY GUIDELINES PER THE NCTCOG. WITH THE CONSIDERATION OF SEGMENT B, SHOULD THIS BE CONSIDERED, THIS ROAD WOULD ROUTE THROUGH LAUREA WHICH IS AN AGE RESTRICTED COMMUNITY CURRENTLY UNDER CONSTRUCTION. ANY OPTION THAT GOES THROUGH PROSPER HAS AN INCREASINGLY NEGATIVE IMPACT ON THE ENVIRONMENT. THANK YOU FOR YOUR CONSIDERATION AND OPPORTUNITY TO SHARE MY CONCERNS. IN REVIEW, TxDOT'S CURRENT RECOMMENDATIONS OPTION A IS THE

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)). *Best option for this road. Thank you!*

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my **opposition** to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Thank you,
Marcus Fly

Mr. Endres - I strongly oppose this initiative and implore TxDot to reconsider a plan which will not affect ManeGait's world-class therapy programs we serve to the disabled and children.

I serve as a volunteer at MainGait and know that the disruptions of construction and final road development will be highly disruptive to the riders who we try to help. Many of the children are non-verbal and easily distracted, so this initiative would hinder their therapy.

Please help protect our children.

Tuesday, April 19, 2022

 TEXAS DEPARTMENT OF TRANSPORTATION 

SEGMENT MAP

US380 Bypass Coit Road to FM 1827: Did You Know...

If Segment-A is built --

- It will cost taxpayers 99 million dollars **MORE** than Segment-B.
- At least 17 businesses on 380 will be destroyed.
- 8 lanes of traffic plus four lanes of access roads (two on each side of the freeway) will be constructed near Tucker Hill at Stonebridge Drive.
- 11 sites with hazardous materials and 7 major utility conflicts will need to be addressed.

If Segment-B is built --

- It will cost taxpayers 99 million dollars **LESS** than Segment-A.
- ManeGait property will remain untouched.
- No businesses on 380 will be destroyed.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.

Protect our Stonebridge Ranch way of life and improve traffic movement and safety by supporting Segment-B today!

April 21 is last day to comment!

Subject: US 380 expansion - Segment C & D

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good evening,

I am writing to strongly oppose the building of Segment C & D expansion of the 380. I am a first-time homeowner who just months ago bought a House in the Willow Wood community. I am shocked that my reward for my economic input is a loud concrete jungle next to my front door.

I am very worried about the noise. I have a small child, I am very worried about the pollution. Once the 2 segments are built there will be no way to control the noise - i bought this home for the quiet serene suburban surroundings. I am very upset and don't know what to do to be honest. We have invested over 600K to this city and I would like to know that our needs are being protected.

Is there anything you can do to help?

Thanks,
Maria George

Hello Mr. Endres, my name is Maria Paz Cepeda Prosper resident since July 2021. I hope you can help me or point me in the right direction to understand what this project means. Just saw what seem to be possible construction routes, most of which would impact my home value and would make it extremely uncomfortable to live here... I'd like to get involved, understand the options and ways in which I can express my concerns, can you please let me know your thoughts?

Kind regards,
Maria Paz Cepeda

I have no conflict of interest with TxDot

I OPPOSE Option A and SUPPORT Option B

As a McKinney, Tucker Hill resident, I OPPOSE Option A most importantly because of the enormous fiscal cost of the widening the 380 in front of our neighborhood. I have attended the meetings regarding this \$100 million dollar expense that is proposed for Option A versus Option B and the amount of taxpayer money that would be saved by building Option B could be utilized for other projects.

Option A would be built very close to the homes on Tremont Blvd as you enter Tucker Hill as well as Stonebridge on the other side of 380 [REDACTED]. From what has been shared with us, Tucker Hill would lose its access leaving the development in that we would not be able to make a left hand turn out of the neighborhood.

Residents would also have to bypass the neighborhood all the way to Custer and make a U-turn in order to reenter the neighborhood. That is concerning especially in an emergency situation considering that police/fire/ambulance would waste precious time getting into Tucker Hill in a timely manner. Also, consider the younger teenage drivers that will be trying to navigate leaving the neighborhood while trying to reach their schools. (I am so glad I don't have teenagers that are driving age!)

And finally, one last concern is that if Option A is considered, there are the two very sharp curves that are proposed. Drivers would need to navigate those curves at 70 miles per hour. Living near the 380 now has its share of problems with high profile vehicles unable to stop in time and frequent accidents. Drivers coming upon these curves will sure to be problematic. Option B provides a more gradual route without the sharp curves that the above Option A proposes. Again, a MAJOR safety issue.

Thank you for your time and consideration.

Subject: Hwy 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Thank you

We strongly oppose Alignment A for the 380 Bypass!!

We have been residents of Tucker Hill for the past 8 years. We love our home and feel the bypass would ruin our neighborhood and devastate our property values.

It is our understanding, this option would cost significantly more than Option B, would displace many new businesses, and cause a lot of traffic, noise, and pollution to both Tucker Hill and StoneBridge Ranch.

In addition the construction would be a nightmare and cause significant access issues for our residents, school buses, and emergency vehicles.

I have seen a list of all the comparisons between Alignment A and Alignment B. It doesn't make any sense at all to go with Alignment A.

We are opposed to Alignment A!!!

Regards,

Mark and Debbie King

COMMENT:

Mr. Endres, although I realize that whatever route Hwy 380 takes it will impact people, property and traffic. However, I strongly oppose the proposed HWY 380 Segment B. The Horse is a special animal that forms a bond with its rider(s). They do not react well to loud noises that will be common place in a construction zone, and the serenity of a child or disabled veteran riding and getting beneficial treatment will be ruined by ongoing traffic noise and vehicle exhaust. I implore you to consider these factors and find another route that will be less impactful to ManeGait and the citizens they serve. We oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I am writing to voice my opposition to the recently proposed extension/on 380 that would negatively impact the ManeGait facility-

This place holds a near/dear spot to our family, as our son was one of the first riders at MainGait more than a decade ago. This is a special place, and I would encourage you and those that are making the proposals to so negatively impact this facility spend a couple hours out at the facility to see the incredible work that is being done there.

There are so many firsts that occur there...First words, first steps, first expressions... I have had the privilege of watching my son who was a part of the ManeGait show team go from a young man that had difficulty verbalizing, to a young man who graduated from trade school with honors, and now works as a recruiter in the trade area, talking to candidates all day long... This is largely attributable to the miracles that take place at this amazing facility every single day.

Disney claims to be the happiest place on earth...there are more smiles and accomplishments done at this facility than anywhere else in the state of Texas- Do not be responsible for taking this magical place away from families that are at the end of their rope...and hope...

I would be happy to share our personal story from ManeGait and help you to understand the amazing things this facility accomplishes for individuals with disabilities and our veterans every single day.

Please feel free to call at your convenience.

Stephen,

I STRONGLY OPPOSE Segment B and Support Segment A. I am absolutely disgusted that this is even an issue still. Prosper should not suffer the negative consequences of McKinney's poor planning. As a resident of Whitley Place, Segment B will increase our noise and air pollution, we will lose value for our homes and it will negatively affect the educational facilities nearby, as well as the kids going to the new high school. Segment B will increase traffic, light pollution, and will be hurtful to persons with disabilities who are helped by Main Gait. Please please consider our Town and residents of Prosper, who had the foresight to build far from 380 when planning our neighborhoods and schools, and do NOT approve Segment B.

Subject: Opposition to Hwy 380 proposed Bypass Segment to B and ManeGait Therapudic Facility

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

My name is Mark Wakeland, and writing you as a very concerned citizen and Board Member of ManeGait in Prosper. In short, I am strongly opposed to the Segment B proposed alignment which effectively places 16 lanes of noisy, intrusive traffic across much of the northern border of ManeGait's property. As you are aware, ManeGait is a world class facility, serving disabled children (many severely disabled), veterans with PTSD, and a host of others. Our therapy has been proved to work as shown in a scientific, multi-year study by TWU University. In addition, we have a waiting list of over 400 families, further proving ManeGait's effectiveness in using the horse, trained personnel, and science to help those families in great need of help.

The therapy is simple: Riding a horse, in a quiet and serene setting on our beautiful acreage, with trained staff and volunteers. Coming to ManeGait is also a break for the parents as they enjoy some quit time and watch their kids get better and heal every time they ride. However, can you imagine a young child with autism on a horse and having to listen to 16 lanes of traffic, 18-wheelers, sirens, horn-honking, smelly and loud exhaust noise, the loud revving engines of racing motorcycles, etc, in the background while trying to focus? It won't work.

There was a recent public statement by TxDot that claimed TxDot staff had interviewed other staff of similar facilities in Texas and noted nearby infrastructure (such as highways) did not pose an issue to their operations. I have questions on if these "similar facilities" were, in fact, similar. ManeGait has over 4,000 visitors a year, the proposed "infrastructure" comes within 50 to 100 feet of a substantial portion of our northern property line, and the "infrastructure" includes over 16 lanes of traffic in what will no doubt be one fo the busiest highways in Texas if not the U.S.. Were the other facilities really similar to ManeGait? Did any of them have to move because of the construction noise and disruptions? Were they within 100 feet of 16 lanes of traffic?

Mr. Endres, TxDot has other options for the Hwy 380 Bypass. TxDot has already shown and proven other alignments will be just as effective.

We are respectfully requesting that TxDot choose wisely and not destroy ManeGait. Please select another alignment option.

Most Kind Regards,
- Mark Wakeland

p.s. Mr Endres, please email me back that your received this email. Thank you. - MW

Subject: 380 Bypass Comments - Segment B Support

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning Mr. Endres,

While I know this bypass is going to affect land, home, and business owners no matter what pathway is selected as the final option, I wanted to share my support with the Segment B option on the west side of the bypass. Living in the area and traveling that section of 380 often, I believe the transition of Segment B onto the existing 380 road will be more effective at reducing the traffic on 380. I know there are numerous other factors that go into Txdot's decisions on this and I'm sure you are being inundated with emails, but wanted to just share my support for Segment B really quickly.

Thank you,

Mark Whittaker

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

NAME/ADDRESS: COMMENT: I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Specifically: - ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380). - TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway. - Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait. - Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers. - The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture. - If Segment B is chosen, ManeGait will be forced to relocate or suspend operations. These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Respectfully,
Marla Young

Stephen, I would like to express my opinion on the above project. I strongly feel Segment-B of the proposed project is highly preferential to Segment-A. I believe this for the following reasons:

(1) Segment-A is projected to cost taxpayers like me nearly 100 million dollars more than Segment-B due to higher utility conflicts, hazmat sites to address and costs associated with displaced businesses etc.

(2) When you weigh the significant cost savings and considerably less disruption to commerce and transportation flows in this key corridor from McKinney (highway 75) to I-35 the proposed Segment-B is the only one that makes sense for the greatest number of Texans.

thanks

Sir,

I have reviewed the two proposals (options "A" and "B") to provide traffic alternatives for HWY 380,

Option "A" requires significant disruption to the local areas and increased costs over option "B"

Option "B" to me is the easier of the two alternatives, less costs, less requirement to obtain acreage and significantly less disruptive to the community as a whole.

Please consider my recommendation of "Option B" as the best solution to the current traffic alternatives.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Signed;
Mary and Jim Monroe

Subject: Letter of Opposition to US Hwy 380 By-pass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr Endres,

Thank you for the opportunity for residents to express their opposition to proposed alignments to the improvement of Hwy 380.

As a resident of Whitley Place neighborhood in Prosper, I am STRONGLY OPPOSED TO OPTION B.

As I understand it, the idea of cutting through Prosper was never a consideration by TxDOT before Tucker Hill resident and former Judge Keith Self unethically used his political sway to attempt to steer TxDOT away from Option A by suggesting a pathway through Prosper. His opposition to a route near Tucker Hill should have no more sway than any other citizen.

Consideration to existing homes

I completely understand why the residents of Tucker Hill and the northern section of Stonebridge Ranch would oppose the bypass Option A. However, these areas are ALREADY on a major highway. If a person does not wish to live adjacent to a highway, I'm not sure why they would already be living adjacent to 380.

Residents of Whitley Place have chosen their location several miles from any major artery, never dreaming that such would ever be considered.

Much of Option A (Tucker Hill affected) shows the main lanes of the highway as **30' below grade**, which will do much to help with noise control and visual considerations from homes there. Option B presents no such benefit and would result in Whitley Place residents being subject to unabated highway noise and views of **elevated** highway.

This City of McKinney has failed to plan appropriately for growth along 380. The Town of Prosper has shown more care and should not be made to pay for McKinney's lack of foresight.

Effects upon Mane Gait Therapeutic Equestrian Center

I've read that TxDOT has researched and found that such facilities can operate in a range of environments. I would ask that TxDOT please consider the sensitive nature of the clients of this facility. Currently Mane Gait offers a rural, pastoral setting for healing and development for adults and children challenged with a range of disabilities, including PTSD, autism, and sensory integration issues. If Mane Gate finds itself now in the shadow of a major elevated highway, the additional sights, sounds, and particularly NOISE (which can be both constant or sudden and jarring) will be immeasurably detrimental to the population that Mane Gate serves. And this is to say nothing of the disruption that the construction phase would cause. I imagine that horses, which need to remain calm and confident in such a therapeutic setting, may also be affected by these detrimental stimuli. I pray that this would not create an unsafe situation for horse, rider, and staff.

Founders Academy

In your Development Data (dated 1/31/22) in the presentation available to citizens, Founders Academy appears to be under construction. However, as I'm sure you know, the school building is already constructed and is currently in use. Like Main Gate, Founders Academy would also find itself in the shadow of a major elevated highway. The additional pollution and noise generated will be detrimental to the health of students and staff.

Continued development

Per TxDot's Development Data (dated 1/31/22), the north-south section of Option A shows development plans only in the very early stages of approval.

Option B, would entirely obliterate Ladera Prosper 55+ community, which is schedule for immediate construction, if it has not already begun. To stop this development at this stage, or even to cause homes to be demolished in a few years, would displace more homeowners and deprive Prosper of the taxes generated on these homes.

In addition to the aforementioned Latera, Whitley Place, Founders Academy, and Main Gate, the following areas would be "indirectly impacted" negatively:

Walnut Grove High School, currently being constructed on the south side of E. First St.

Malabar Hill Subdivision currently under construction on the south side of E. First St.

A small cemetery and planned expansion, west side of Custer.

In summation

Along with the Town of Prosper, I urge TxDot to improve and expand 380 along its current path. As it seems that TxDot is no longer considering that option, then I must urge TxDot to use Option A.

McKinney Mayor Fuller and former Judge Self should not be pressuring TxDot to foist off the results of McKinney's lack of planning onto the residents and the Town of Prosper. Prosper is doing what it can to handle growth responsibly. That McKinney has not done so is not Prosper's problem to deal with.

You will be getting many letters from residents of Prosper and McKinney. While the population of McKinney is much larger than the population of Prosper, the number of homes directly affected by the two options is comparable. And the net effect on residents near Option B is much worse than the net effect upon residents near Option A.

Thank you for your time and consideration,

Mary and Michael Epner

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Sir:

As a homeowner and citizen of McKinney, TX. for 19 years, **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Thank you for your consideration.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Mary Catherine Patenaude

Re: 380 By-Pass and ManeGait Therapeutic Horsemanship

Mr. Endres,

I'm writing to support ManeGait Therapeutic Horsemanship in their efforts to re-locate the proposed path of the 380 by-pass. Born 2 Be Therapeutic Equestrian Center was located right on the frontage road of I-35 and Lone Oak Road. Born 2 Be moved away from I-35 this past March. The noise from the highway was just too much to deal with any longer. Many riders have sensory processing disorders and, as such, they are extremely sensitive to noise. Many are diagnosed with Autism. Scientists found that children with autism had stronger autonomic reactions than typically-developing children when they heard noises. We couldn't even teach in the arena unless we used a microphone. Born 2 Be was ready to leave and once we knew the highway was going to come even closer, it was a decision made for us. Safety was also a huge concern for us. On one occasion, a car left the highway, rolled over and went through the front pasture fence. The two-way frontage road was an issue but that was minor compared to the noise and safety issues presented by being so close to the highway.

ManeGait is extremely concerned about the proposed by-pass. So much more important since they own the property and it's not so easy to just move somewhere else. ManeGait was founded in 2007. Their client base is in McKinney and they are the only therapeutic horsemanship program in that particular area. That by-pass would affect all riders, volunteers, staff and horses. I sincerely hope that there is a way to re-route the by-pass so it doesn't affect ManeGait. I firmly believe it would put them out of business. It would have put Born 2 Be out of business if we had to stay there and finding another location was not an easy task..

Feel free to contact me if you need to discuss further.

Mary Gwinner

Please build the highway on what is already known as 380. Any business or neighborhoods in the path of the development knew there would be a high possibility that 380 would become a highway, but they built anyway. Keeping 380 on 380 makes the most sense.

Subject: Opposition to U.S. 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

I am opposed to the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, including children and the disabled, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at [ManeGait](#). This organization was founded by my college friend Priscilla Darling, along with her family. They are passionate about their mission and have served countless children, families and veterans in the area.

Additionally, I served as Executive Director of MADD North Texas for over 8 years and Mane Gate was very kind to many victims of drunk driving and their families providing key therapeutic services. Mane Gait made life changing differences for many who were severely injured.

I am asking TxDOT to reconsider this action. There is huge opposition to this in Collin County. I'm sure there is an alternative that is respectful of the constituents in this area.

Thank you.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am in favor of Option B with the 380 Expansion Project and respectfully outline the rationale.

- *Option B displaces no businesses while Option A displaces 17
- *The cost of Option A is extremely greater than that of B, on many levels
- *Option A impacts a significant amount of more Statewide Farmland acreage than B
- *Option A impacts a significant amount of more forests, prairies, wetlands than Option B
- *Option B does not come close to any neighborhoods while Option A impacts not only my neighborhood (La Cima) but several others

Respectfully submitted,
Mary (Patty) Laster

Subject: 380 By Pass- Support For Segment B!

Dear Mr. Endres;

As a homeowner and citizen of McKinney, TX **I STRONGLY SUPPORT the the Project 380 Segment B** by pass alignment option. This option is the least disruptive to business with no displacement, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment A alignment.

I strongly oppose Segment- A. It should not be considered for the following reasons.

1. It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
2. The cost of Segment-A is \$99 million more than Segment-B. This alone should be enough to choose Segment A.
3. It will create an over pass on 380 over Stonebridge Drive and Custer Road.
4. It will cause the installation of water pipes ducts) over Hwy 380.
5. It will decrease traffic safety and increase traffic on Stonebridge neighborhood street arterial to Hwy. 380 such as Stonebridge Dr. Ridge Road and Lake Forest Dr., increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
6. It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
7. Hwy 380 as it exists will be demolished and moved North to be rebuilt to the South side of the new access road will be in the same location as the existing 380 is today.
8. Segment B is the best option to improve traffic in our corridor while also preserving the economic business and residential vibrancy of our community.
9. TX Dot's own study proved that the noise factor would not affect the therapeutic quality at Main Gate the horse farm as has been argued by others to support Segment A.
10. Selecting Segment A will create lengthy road closures for getting our kids to school at Cockrill Middle School, McKinney North & Boyd High School or teenagers there.
11. Segment A could result in traffic delays from Stonebridge Dr. when in need of ambulance or emergency travel to Baylor ,Scott and White Hospital.
12. Having major detour traffic rerouted through our neighborhoods could affect pick up of our kids from Wilmeth Elementary.

I urge you to Select and Support the Segment B choice!

Concerned Stonebridge Ranch Citizen,

Thank you
Mary Lou Balcer

Hi Stephen,

I'm writing to advocate for option B in the planned 380 expansion. My house is approximately 1/2 mile from the Stonebridge/380 interchange, and I'm worried about the impact that this expansion would have. The Stonebridge Ranch group of neighborhoods is beautiful, and having a major interchange bordering it would detract from the beauty of the area. In addition, I'm concerned that our property values will go down significantly with the addition.

Thanks for listening.

Subject: Project 380 Bypass Input - McKinney Resident

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom it Concerns,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 **Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- The cost of Segment-A is \$99 million more than Segment-B.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

Thanks for your consideration.

Matt R. James

TEXAS HOUSE *of* REPRESENTATIVES

Matt Shaheen

District 66 • Collin County

April 12, 2022

Stephen Enders
Transportation Engineer
Texas Department of Transportation
4777 E. US Highway 80
Mesquite, Texas 75150

VIA Email: Stephen.Endres@txdot.gov

Dear Mr. Enders:

Regarding the two segments under consideration for the expansion of US 380 in the western portion of Collin County, this letter is to inform you that I, along with Collin County Commissioner Susan Fletcher, support Segment A, the preferred route originally proposed by TxDOT. Additionally, we oppose Segment B, which would cut through the heart of the Town of Prosper's economic corridor and disrupt a large portion of the town's master plan, which is already under construction.

As the County Commissioner and State Representative who represent the majority of the constituents impacted by both segments, it is clear to us that Segment A should be chosen. The reasons include the fact that landowners impacted by Segment B are unanimously opposed to the proposed segment, and it is our understanding that they are not interested in selling their property for this road alignment under any circumstance. Their strong opposition to Segment B results from the fact that the road alignment would displace an age-restricted community currently under construction, would disrupt other important residential and commercial developments and would also severely impact a very special organization called ManeGait. The ManeGait organization provides a therapeutic facility for children and adults with disabilities by using the proven healing power of horses, and they have recently expanded their therapies to include a Brain Institute with proven therapies for those with traumatic brain injuries (TBI). Their facility is making a significant difference in our community, not only for special needs adults and children, but also for our veterans and individuals with brain injuries.

Other important items that impact our decision to support Segment A and oppose Segment B is the fact that the Town of Prosper covers a small 27 square miles compared to the City of McKinney, which has a much larger footprint. Given this fact, Segment B would do considerable harm to future tax revenues for the Town of Prosper, Prosper ISD, as well as the community itself, given the residential and commercial development planned on Segment B. Additionally, we are uncomfortable with the proximity to existing and future schools with the alignment of Segment B due to safety reasons.

Those who have homes and businesses along the current 380 corridor built and moved there knowing that they were moving onto a US highway. Those that moved off of the current 380 corridor did so for a reason as well. We believe that we owe it to our constituents to keep as much of the new route on the original corridor as possible. It simply does not make sense to unnecessarily cut through an area of the Town of Prosper, when there is a perfectly good alternative to take the highway back down to the original corridor with Segment A which is simply adjacent to a neighborhood.

Thank you for your time giving our concerns consideration as we work to represent our constituents.

Matt Shaheen
State Representative
District 66 - Collin County

Susan Fletcher
County Commissioner

The Honorable Susan Fletcher
Collin County Commissioner, Precinct 1
2300 Bloomdale Road, Suite 4192
McKinney, Texas 75071

Dear Representative Shaheen and Commissioner Fletcher:

Thank you for your letter dated April 12, 2022, regarding the US 380 project between Coit Road and FM 1827. We have added your letter to the other comments we've received and will address all comments once responses have been prepared.

TxDOT is diligently working on evaluating each of the segments presented at the March 2022 public meeting and will take all the comments we've received into consideration as we complete that evaluation. We anticipate presenting the preferred alternative at a public hearing in early 2023.

Please feel free to contact me with any additional questions or concerns.

Sincerely,

Mohamed K. Bur, P.E.

Hello,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should NOT be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your consideration.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

My name is Matthew Storey. I live in Stonebridge Ranch just South of 380 and just east of Custer. My address is [REDACTED].

I want to let you know I strongly support Segment B, bypass route. Segment B is the best option to improve traffic flow while also preserving the economic business and residential vibrancy of our community. I am also very concerned about the negative impact on our environment that the A bypass will cause. The noise pollution, along with the pollutants coming from all the vehicles on the road could have a long term negative impact on everyone along the A route.

It is for these reasons that I am urging you to vote your approval for the Segment B, bypass route.

Thanks for your consideration.

Regards,
Matthew Storey

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Stephen,

I'm a homeowner and citizen of McKinney, TX who lives close to Stonebridge Drive.

I urge you to adopt the Project 380 Segment-B bypass alignment option. This option has minimal impact on existing homes (unlike other options) and will be the least disruptive to existing businesses along 380.

I strongly oppose the Segment-A option. When the Stonebridge Ranch community was created, the master plan was intentionally designed to handle the amount of traffic commensurate with the neighborhoods. Segment-A would unfairly divert traffic into our neighborhoods—decreasing traffic safety and increasing noise, pollution, and congestion.

Additionally, my understanding is that the ***Segment-A option would displace more existing homes and businesses and cost \$99 million more*** than the Segment-B option.

I recognize there is a lot of emotion surrounding this issue. However, I believe the facts speak for themselves. Adopting **Segment B is the clear winner:**

- Less impact on existing homes
- Less impact on existing businesses
- Less cost

Thank you for your time and consideration.

Sincerely,

Maureen Dudley

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a on the North side of Stonebridge Ranch and 20 year citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. I cannot see how we would want to needlessly spend \$100 million for option A.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
 - *The cost of Segment-A is \$99 million more than Segment-B.
 - *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
 - *It will also cause the installation of water pipes (ducts) over 380.
 - *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
 - *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
 - *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.
- Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you Maury Herod

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: *I am opposed to B. Plan A is better but not great. My reasons are as follows:*

- 1. The residents of Prosper should not be penalized by the poor planning of the people living in the Tucker Hill area and the influence of government residents in McKinney (who should have used more wisdom when purchasing their homes)*
- 2. Churches, schools, and charitable organizations will suffer if Plan B is enacted. The presentation says otherwise, but ~~community~~ *community* ~~data~~ *data* ~~shows~~ *shows* they will be affected*
- 3. The safety of the students in the future Prosper High School will be impacted tremendously by plan B*

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

I am employed by TxDOT

I do business with TxDOT

I could benefit monetarily from the project or other item about which I am commenting

and those entities were established before this plan came to be. The Tucker Hill area was established along 380 ^{years} ago. what they were dealing with.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this so they project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30-20DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest regards

Mayra Pinos

RESOLUTION NO. 2022-04-050 (R)

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MCKINNEY, TEXAS, PROVIDING SUPPORT AND OPPOSITION OF VARIOUS US HIGHWAY 380 CONTROLLED ACCESS FREEWAY ALIGNMENT ALTERNATIVES BETWEEN COIT ROAD AND FM 1827 RELATED TO THE TEXAS DEPARTMENT OF TRANSPORTATION US 380 COLLIN COUNTY FEASIBILITY STUDY AND ASSOCIATED ENVIRONMENTAL IMPACT STATEMENT

- WHEREAS**, the Texas Department of Transportation completed the US 380 Collin County Feasibility Study in 2020 in order to analyze potential roadway alternatives for US 380 through Collin County, Texas to support projected long term growth and mobility within the county and the region; and
- WHEREAS**, through the efforts of the feasibility study, the Texas Department of Transportation provided a recommended freeway alignment between Coit Road and FM 1827 which identified a "bypass" freeway alignment generally north of existing US 380; and
- WHEREAS**, the City Council of the City of McKinney, Texas approved a resolution in October 2019 (Resolution No. 2019-10-128R) which supported the goals of the US 380 Collin County Feasibility Study while opposing any alternative that converts the existing US 380 into a limited access roadway and providing guiding principles for alternatives which provide "bypass" alignments from existing US 380; and
- WHEREAS**, following the completion of the US 380 Collin County Feasibility Study in March 2020, the Texas Department of Transportation initiated the environmental impact statement (EIS) phase of the project between Coit Road and FM 1827 in order to further evaluate the impacts of various freeway alignment alternatives considered during the feasibility study based on additional environmental factors and more thorough technical design/analysis and field data; and
- WHEREAS**, the environmental impact study (EIS) phase between Coit Road and FM 1827 by the Texas Department of Transportation is anticipated to be completed in Spring 2023 and will provide a preferred alignment alternative at a public hearing expected to occur in early 2023; and
- WHEREAS**, since the initiation of the environmental study (EIS) phase, the Texas Department of Transportation has developed detailed schematic designs for four Build Alternatives including the Purple Build Alternative (Alignment Segments A, E, and D), the Blue Build Alternative (Alignment Segments A, E, and C), the Brown Build Alternative (Alignment Segments B, E, and C), and the Gold Build Alternative (Alignment Segments B, E, and D); and
- WHEREAS**, the City Council of the City of McKinney, Texas approved a resolution in October 2020 (Resolution No. 2020-10-147R) which provided support of a US 380 freeway alignment generally between Future Ridge Road and Community Avenue ("Segment E", shown in all considered Build Alternatives) along with guiding principles; and
- WHEREAS**, the City Council of the City of McKinney, Texas approved a resolution in December 2020 (Resolution No. 2020-12-192R) which provided support of Segment B as providing a higher value over Segment A in managing congestion and improving east-west mobility; and
- WHEREAS**, the Texas Department of Transportation hosted a public meeting for the environmental impact statement (EIS) phase of the project from Coit Road to FM 1827 on March 22, 2022 which included detailed design schematics for the four Build Alternatives and a Segment Analysis Matrix for Alternative Segments A, B, C, D, E, and No-Build Alternative; and

- WHEREAS,** the Segment Analysis Matrix provided by the Texas Department of Transportation on March 22, 2022 includes an evaluation of Purpose and Need, Engineering, Displacements and Right-of-Way Requirements, Land Use and Development Impacts, Environment and Natural Resources, Community Impacts and Cultural Resources, Air Quality and Traffic Noise, Induced Growth Cumulative Effects, Cost, and Stakeholder, Agency, and Public Input; and
- WHEREAS,** based on the Segment Analysis Matrix related to Purpose and Need, the Texas Department of Transportation has determined that all Build Alternatives meet criteria for managing regional congestion and improving safety; and
- WHEREAS,** based on the Segment Analysis Matrix for Engineering, the Texas Department of Transportation has determined that Segment B provides a freeway route approximately 18% shorter than Segment A, requires one less interchange than Segment A, and requires approximately \$36 million less than Segment A for relocation of major water utilities; and
- WHEREAS,** based on the Segment Analysis Matrix for Engineering, the Texas Department of Transportation has determined that Segment C requires approximately half the total bridge length of Segment D and requires approximately \$52 million less than Segment D for relocation of major water and wastewater utilities; and
- WHEREAS,** based on the Segment Analysis Matrix for Displacements and Right-of-Way Requirements, the Texas Department of Transportation has determined that Segment B requires approximately 73% fewer combined business and residential displacements than Segment A and requires approximately \$41 million less than Segment A for estimated right-of-way cost; and
- WHEREAS,** the Texas Department of Transportation has determined that Segment B would avoid direct impacts to ManeGait, and that based on research of similar therapeutic horsemanship facilities could continue to function effectively in a variety of physical and environmental settings; and
- WHEREAS,** based on the Segment Analysis Matrix for Displacements and Right-of-Way Requirements, the Texas Department of Transportation has determined that Segment C requires fewer combined business and residential displacements than Segment D and estimated right-of-way costs for both Segments C and D are comparable; and
- WHEREAS,** based on the Segment Analysis Matrix for Land Use and Development Impacts, the Texas Department of Transportation has determined that both Segments A and B will have comparable future development impacts; and
- WHEREAS,** based on the Segment Analysis Matrix for Environmental and Natural Resources, the Texas Department of Transportation has determined that Segment B impacts approximately 61% fewer jurisdictional wetlands than Segment A, impacts approximately 2,800 linear feet less than Segment A of rivers/streams, impacts less total acres of forest/prairies/grasslands than Segment A, impacts 5 less acres of regulatory floodways than Segment A, and impacts no potentially hazardous materials sites compared to 11 identified sites in Segment A; and
- WHEREAS,** based on the Segment Analysis Matrix for Environmental and Natural Resources, the Texas Department of Transportation has determined that Segment C impacts approximately 50% fewer jurisdictional wetlands than Segment D and impacts 49 less acres of regulatory floodways than Segment D; and
- WHEREAS,** based on the Segment Analysis Matrix for Community Impacts and Cultural Resources, the Texas Department of Transportation has determined that Segments A, B, C, D, and E do not directly impact any community facilities

including parks, places of worship, community centers, or other neighborhood services and facilities; and

WHEREAS, based on the Segment Analysis Matrix for Air Quality and Traffic Noise, the Texas Department of Transportation has determined that regardless of Segment, Mobile Source Air Toxics are expected to decline significantly in the future due to federal regulations on vehicles, fuels, fleet turnover, and the increased use of electric vehicles; and

WHEREAS, based on the Segment Analysis Matrix for Cost, the Texas Department of Transportation has determined that Segment B would cost approximately 14% less than Segment A including right-of-way costs, utility relocations costs, design costs, and construction costs; and

WHEREAS, based on the Segment Analysis Matrix for Cost, the Texas Department of Transportation has determined that Segment C would cost approximately 18% less than Segment D including right-of-way costs, utility relocations costs, design costs, and construction costs; and

WHEREAS, the Texas Department of Transportation has provided an objective environmental impact statement (EIS) segment analysis methodology and level of detail for analyzing alignment alternatives which allows a direct comparison of Segment Alternatives; and

WHEREAS, based on the data provided by the Texas Department of Transportation at the March 22, 2022 public meeting for the US 380 (Coit Road to FM 1827) environmental impact statement (EIS) public meeting, it has been determined that in comparing Segments A and B, Segment B accomplishes the Purpose and Need with less centerline miles of freeway, less overall impacts to existing development, similar overall impacts to planned development, less overall impacts to environmental features, and at a lower overall estimated project cost; and

WHEREAS, based on the data provided by the Texas Department of Transportation at the March 22, 2022 public meeting for the US 380 (Coit Road to FM 1827) environmental impact statement (EIS) public meeting, it has been determined that in comparing Segments C and D, Segment C accomplishes the Purpose and Need with less overall impacts to environmental features and at a lower overall estimated project cost; and

WHEREAS, Segment C provides the most direct interchange and connection to the planned Spur 399 Extension Orange Alternative which has been previously supported as being less disruptive to existing development and best supporting both regional mobility and long-term economic development by the City of McKinney, Texas City Council (Resolution No. 2019-10-128R) and through a letter from the City of McKinney, Texas to the Texas Department of Transportation dated November 3, 2021; and

WHEREAS, the City of McKinney, Texas encourages the Texas Department of Transportation to place a high emphasis during the remainder of the US 380 environmental impact statement (EIS) study phase from Coit Road to FM 1827 on fair and objective evaluations of freeway alignment segment alternatives through neighboring jurisdictions which seek to reduce disruptions on existing development while shortening and improving the overall corridor route serving long-term regional mobility needs.

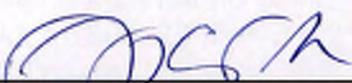

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MCKINNEY, TEXAS, THAT:

Section 1. The City Council of the City of McKinney, Texas, hereby acknowledges and supports the alignment and footprint for a US 380 limited-access freeway generally between Coit Road and (Future) Ridge Road, depicted as "Segment B" on "Exhibit A-1".

- Section 2. The City Council of the City of McKinney, Texas, hereby acknowledges and opposes the alignment and footprint for a US 380 limited-access freeway generally between Coit Road and (Future) Ridge Road, depicted as "Segment A" on "Exhibit A-1".
- Section 3. The City Council of the City of McKinney, Texas, hereby acknowledges and supports the alignment and footprint for a US 380 limited-access freeway generally between State Highway 5 and FM 1827, depicted as "Segment C" on "Exhibit A-1".
- Section 4. The City Council of the City of McKinney, Texas, hereby acknowledges and opposes the alignment and footprint for a US 380 limited-access freeway generally between State Highway 5 and FM 1827, depicted as "Segment D" on "Exhibit A-1".
- Section 5. The City Council of the City of McKinney, Texas, hereby acknowledges and supports the overall build alternative for a US 380 limited-access freeway between Coit Road and FM 1827 depicted as the "Brown Build Alternative" on "Exhibit A-4".
- Section 6. The City Council of the City of McKinney, Texas, hereby acknowledges and opposes the overall build alternatives for a US 380 limited-access freeway between Coit Road and FM 1827 depicted as the "Purple Build Alternative" on "Exhibit A-2", the "Blue Build Alternative" on "Exhibit A-3", and the "Gold Build Alternative" on "Exhibit A-5".
- Section 7. This Resolution shall take effect immediately from and after the date of passage and is so resolved.

Subject: Opposition to Alignment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Please see and consider my opposition to alignment b, which slices through my community and where my children go to school. Creating this highway in my backyard would be detrimental for these reasons:

- Segment B of the proposed Gold/Brown alignment poses a significant, negative impact to both existing and future residential and commercial developments planned within the Town. The alignment would directly impact over 360 future homes and thousands of residents and indirectly impact many more;
- Segment B will increase ground-level ozone impacting at least two environmentally sensitive facilities (ManeGait and Founders Academy) resulting in a conflict with Air Quality guidelines publicized by the North Central Texas Council of Governments (NCTCOG);
- Segment B runs directly through a quickly developing section of the Town of Prosper causing significant environmental impacts on the human and natural environment by adding a new and unplanned interstate through Prosper versus using the existing alignment within Town limits;
- Segment B has a detrimental effect on ManeGait Therapeutic Horsemanship; a unique nonprofit facility providing equine therapy to hundreds of adults and children with disabilities;
- Segment B is in close proximity to existing and future schools including high schools impacting thousands of students.

Sincerely,
Meagan Daniel
Whitley Place, Prosper

Subject: Opposition to HWY 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

My name is Meagan Kraatz and I have been a part of the Collin County community for five years now. During that time, I have attended nursing school and have become a health care professional for the area. These opportunities introduced me to ManeGait, and I have happily been a part of this family for the past couple of years. With that being said, I **oppose** the proposed HWY 380 Segment B because it **threatens** the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Please consider this opposition by myself, the ManeGait community, and the people we serve in and around Collin County. This opportunity is not a widely available resource to our targeted population and would be a devastation to those who benefit from equine therapy.

Thank you,

Meagan Kraatz, BA, MS

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Megan Dold

Subject: Notice of Public Meeting: US 380 from Coit Road to FM 1827

[View this email in your browser](#)

The Texas Department of Transportation (TxDOT) is proposing to construct a project to improve US 380 in Collin County from Coit Road west of McKinney in the Prosper/Frisco area to FM 1827 east of McKinney. Alternatives being considered include new location alternatives around the north side of McKinney (approximately 15 miles long). This notice advises the public that TxDOT will be

conducting an in-person meeting and an online virtual public meeting on the proposed project. **The same information will be available at the in-person and virtual meeting.**

In-person Meeting

Tuesday, March 22, 2022, 5:30 p.m. to 7:30 p.m.

Collin College Central Park Campus

Conference Center

2400 Community Avenue

McKinney, TX 75071

Virtual Meeting

Tuesday, March 22, 2022 at 5:30 p.m. through

Wednesday, April 6, 2022 at 11:59 p.m.

www.keepitmovingdallas.com/US380EISPublicMeeting

The in-person meeting will be held from 5:30 p.m. to 7:30 p.m. in an open house format where the public may come and go at their convenience and staff will be available to answer questions. The virtual meeting can be viewed Tuesday, March 22 starting at 5:30 p.m. through the end of the comment deadline on Wednesday, April 6 at 11:59 p.m. Materials will be posted to the project website at www.keepitmovingdallas.com/US380EISPublicMeeting and will include a pre-recorded presentation with audio and video components, along with exhibits and an interactive map. **The virtual public meeting is not a live event.** If you do not have internet access, you may call (214) 320-4469 between the hours of 8 a.m. and 5 p.m. Monday through Friday, to ask questions and access project materials. **Please note the materials will not be available until March 22, 2022 at 5:30 p.m.**

An update will be provided on the environmental impact statement (EIS) process including presentation of available environmental findings and design schematics for the build alternatives under consideration. The proposed project would provide an eight-lane freeway with frontage roads to manage congestion and

east-west mobility, connectivity, traffic operations, and safety. The proposed project would, subject to final design considerations, require additional right-of-way and potentially displace residences and non-residential structures.

Relocation assistance will be available for displaced persons and businesses. Information about the TxDOT Relocation Assistance Program and services and benefits for those displaced and other affected property owners, as well as information about the tentative schedule for right-of-way acquisition and construction, will be available at the in-person public meeting, the project website, or can be obtained from the TxDOT district office by calling (214) 320-4469. All meetings will be conducted in English. If you need an interpreter or document translator because English is not your primary language or you have difficulty communicating effectively in English, one will be provided to you. If you have a disability and need assistance, special arrangements can be made to accommodate most needs. If you need interpretation or translation services or you are a person with a disability who requires an accommodation to participate in the meetings, please contact the TxDOT Public Information Office at (214) 320-4480 no later than March 15, 2022. Advance notice is required as services and accommodations require time to arrange. Comments from the public regarding the proposed project are requested and can be submitted at the public meeting, online at the project website, by email to Stephen.Endres@txdot.gov, or by mail to Mr. Stephen Endres, P.E., TxDOT Dallas District Office, 4777 East US Highway 80, Mesquite, Texas 75150-6643. Verbal comments may be submitted by leaving a voicemail at (833) 933-0440. **All comments must be received or postmarked before Wednesday, April 6, 2022.** If you have any general questions regarding the proposed project or the public meetings, please contact the TxDOT Project Manager, Mr. Stephen Endres, P.E., at (214) 320-4469 or Stephen.Endres@txdot.gov.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

TxDOT Dallas District
4777 East US Highway 80
Mesquite, TX 75150

Subject: I SUPPORT SEGMENT B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Please consider the families in McKinney. We moved here to a gorgeous planned community for a reason. Segment A would destroy the integrity of this community and is exactly what we moved here to avoid.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Hello,

We received the written notification by mail and also attended the meeting on 3/22/22 regarding the plans for road construction very near our home.

Our initial concern was/is the status of our physical home and property being disrupted. Multiple representatives at the meeting assured us that the road and construction would not affect the Willow Wood community, its' hundreds of homes, community pool, basketball courts or trails in any way. While we are so glad and fortunate for that, I will list our other concerns below because I believe it's important that these things are considered:

1) What will be our quality of life impact? When we moved into this house and community, the main reason we did so was to remove ourselves from the metroplex enough to still be close to anything we needed but also have peace, quiet and safety. We both chose to work over an hour from our home to remove ourselves from this hassle. What will be the added air pollution? Will there be health consequences because of all the extra traffic so close to our homes and trails? What will be the added noise pollution? While it is quiet now, how loud will it be with so many extra lanes of traffic? What about our site view? Will this be affected? Instead of trees and nature out our back door, will we see a giant elevated multi-level freeway? Will this also cause added safety concerns with so much more traffic so nearby?

2) We are avid birders and wildlife and plant lovers and protectors. We believe it is important to protect these creatures as they do not have a voice to be heard in this setting. We love watching the deer, birds and other wildlife that visit us in our backyard and on our trails and the forest behind. The hummingbirds and butterflies depend on us and the environmental setting we provide to protect them during their migration and we also get the pleasure of having them live here during the spring and summer months. The joy of our birds all year long and the monarchs and hummers arriving in the spring is always something we cherish and look forward to. With this major roadway and all the construction that will continue on for months/years, will we lose this special part of our community and neighborhood? Will their habitats and food sources be protected? How many trees and green areas will be removed?

I simply hope you will all take the time to consider the quality of life changes that will certainly affect us all as we contemplate why we moved to this area in the first place.

Thank you!

Melissa Jones and Ryan Sikorski

Subject: Opposition to U.S. 380 Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello -

This is a VERY DISTURBING idea being proposed by people who just might not understand the delicately balanced environment needed for our special vulnerable populations And the highly trained - sensitive animals that change their lives forever.

My name is Melodie King [REDACTED] .

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

If you had a loved one that finally smiled and connected with you after receiving loving, highly specialized therapy at ManeGate -you wouldn't be voting for this.

I urge you to STOP AND THINK ...so you can still wake up and look in the mirror every day. And feel no regret . Not be ashamed. It's these decisions along your life's path ... that you will look back on later.

Blessings for your reconsideration .

Melodie King

Voicing our opinion to the Hwy 380 Options A!

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

As a Stonebridge Ranch resident in the La Cima neighborhood adjacent to to Highway 380, **I STRONGLY OPPOSE the Segment "A" proposal outlined in the project proposals referenced above.** This would not only lower property values CONSIDERABLY throughout the area but would also disrupt the flow of traffic and negatively impact local businesses for years to come within the construction zone(s).

Segment "B" (Brown or Gold Alternative) is the ONLY acceptable option we would support in order to reach the intended goal. If adjustments are to be made, they can be made further north where it affects far fewer individuals and businesses rather than running a major highway through several well established residential neighborhoods where tens of thousand of people reside. This also creates the least amount of negative impact to our community, property values and is the most cost effective for those who are paying for it.

Lastly, the comments made at the Public Scope Meeting dated April 26, 2022 stating that "TXDOT cannot reasonably foresee which of these impacts will impact the value of the subject property in a negative or positive way" is beyond comical! Typical for a governmental entity with absolutely no regard or exposure to the potential negative impacts the proposal may create for those directly affected by the change.

Regards,
Michael A. Letourneau

Subject: Project 380 Segment B bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

As a homeowner and citizen of McKinney, Texas., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. The option is less disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I strongly oppose Segment A. It should not be considered for the following reasons:

It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

The cost of Segment A is \$99 million more than Segment B.

It will create an overpass on 380 over Stonebridge drive and Custer road.

Thank you for your consideration.

April 19, 2022

TxDOT Dallas District
ATTN: Stephen Endres, P.E.
4777 E US Highway 80
Mesquite, TX 75150

As homeowners and citizens of McKinney, Texas, we **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. In addition, ManeGait property will remain untouched and no businesses on 380 will be destroyed. Also, zero sites with hazardous materials and only 2 (vs. 7) utility conflicts will need to be addressed.

We also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- The taxpayer cost of Segment-A is \$99 million **more** than Segment-B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road, near Tucker Hill at Stonebridge Ranch.
- It will also cause the installation of water pipes (ducts) over 380.
- 11 sites with hazardous materials and 7 major utility conflict will need to be addressed.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Thank you for your time and favorable consideration for Segment B as it is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Michael and Sandra Mayo

Subject: 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner for 15 years in 2 different residences in Stonebridge Ranch and citizen of McKinney, TX. for over 23 years, **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

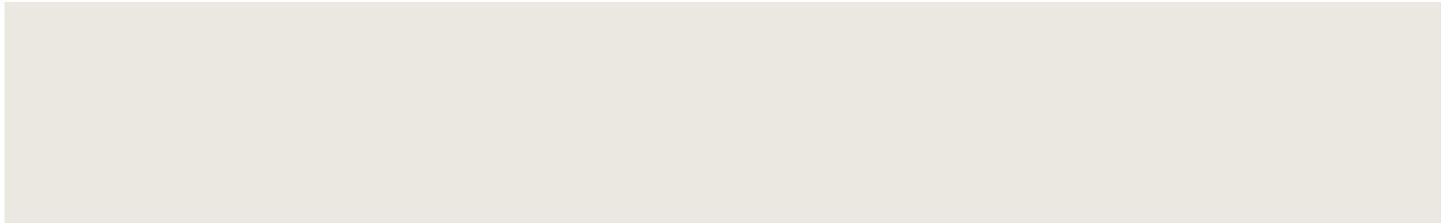

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

In general, Segment-A will decrease home values in Stonebridge and cost \$99 million more. Segment-B runs through a less populated area.

Thank you,
Michael Pawlish

████████████████████
████████████████████
████████████████

I support segment A and oppose B

My main points:

1. McKinney P&Z missed the boat and these items should not be passed to us in Prosper. Especially after investments have been made by residents of Whitley Place to move here with all indication from TxDOT that the road was to go through Tucker Hill. I would not have moved to Whitley place in 2020 had I known the bypass location option was suddenly going to move.
2. My daughter will attend this new high school off of First Street and near Custer and have to deal with pollution, noise, traffic, additional driver concerns and more. I should not have to transfer her when again we planned for this school and how it would minimize her items to deal with. She is 8 currently and she doesn't have a voice in this to say she doesn't want it.
3. Between the persons with disabilities (on McKinney side), over age 55 housing and large areas of homes being removed from business profits and the tax base being removed from Prosper. How will the city recoup property tax losses (by raising my taxes more for McKinney's mistake?), how will these home builders not have financial dilemmas from the Bypass being added and the fact this surprise Segment B option bisects the city of Prosper suddenly.
4. I feel for the residents of Tucker Hill having this come through the neighborhood area but had those that now opposed Segment A going through McKinney done their homework and elected better officials to guide their future they would have seen this was the main plan for at least the last several years if not more and chosen a different place to live. I found several articles on the planned location and an NBC5 exclusive from 2019 showing it going through Tucker Hill. It should not be a surprise to the residents of McKinney that this was the plan. Unfortunately, too many people don't take the time to see the forest for the trees until the forest is being cut down.
5. My home value (well over \$1M) will likely take a hit from this happening near my home. The tranquility of my back yard area will not only now receive a larger Custer Rd Noise (that I had planned for and noted) but additionally become more than double the loudness that no number of barriers can prevent it from ruining. How am I to be compensated for the unknown future real estate loss due to the misleading proposals of the past not showing for the last several years Segment B to a truly viable option along with media reports showing it going through McKinney as well.

In conclusion, McKinney did not plan accordingly and those of us that do our research and planning should not suffer last ditch efforts to have a road moved to another city (our city of Prosper) because past leaders of McKinney did not realize how to plan this out. I have lived my entire life in the North Texas area and have found for the last 20 years as a real estate investor that the 380 segment from Hwy 75 and West to Custer to be less than adequate. If this planning had occurred as others cities perform often 15 to 20 years in the future this bypass dilemma could have been entirely avoided and planned before communities, businesses and education facilities were built out to the current degree. With Segment B your asking for all those who prepare to suffer and help a city (McKinney) to get out of its predicament it self-created....I understand Segment A residents may not like this outcome however they are part of the city that caused this mess and quite frankly they had the ability/opportunity to see where the plans were pointing if they had just researched like others of us had. McKinney missed it and Segment A is what should be done for the greater progress of the area.

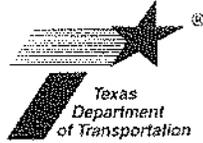

Sincerely,

Michael Payne

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments: The US 380 bypass initiative is a regional mobility issue and should be evaluated as such. A series of hard turns just to keep a road in one jurisdiction and out of another is ridiculous. Alignment B through Prosper represents a better, more logical alignment for the region. This should not be a political issue. Please do what's right and abandon alignment/segment A.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Mr. Endres,

As a homeowner, business owner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option.

This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to SH 380.

It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the SH 380 and Custer intersection on the north side of the roadway.
- 2. Again, the cost of Segment-A is \$99 million more than Segment-B.**
3. It will create an overpass on SH 380 over Stonebridge Drive and Custer Road.
4. It will also cause the installation of water pipes (ducts) over SH 380.
5. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway SH 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading south from SH 380.
6. It will also cause a large interchange to be constructed at the intersection of Segment-A and SH 380, which is directly above Kensington Village, potentially depressing home values in that area.
7. SH 380 as it exists will be demolished and moved north to be rebuilt so the south side of the new access road will be in the same location as the existing SH 380 is today.

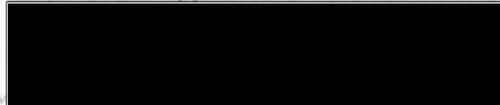

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,

Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: Strongly opposed to Segment B!! In favor of Segment A.

Prosper planned for the expansion of 380 on 380 requiring all businesses to have the proper setbacks for expansion. The residents and town of Prosper should not be impacted by essentially bifurcating the entire city because of a lack of planning by neighboring cities.

Secondly you are planning to put a 12 lane freeway right by a high school with new young drivers. It completely unsafe to have that level of traffic by schools!!

Not to mention the long term effects of breaking our City into two completely different sides impacting noise, traffic and property values.

In Favor of Segment A - Vehemently opposed to Segment B!!

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

Prosper planned for the expansion of 380 on 380 requiring all businesses to have the proper setbacks for expansion. The residents and town of Prosper should not be impacted by essentially bifurcating the entire city because of a lack of planning by neighboring cities.

Secondly you are planning to put a 12 lane freeway right by a high school with new young drivers. It completely unsafe to have that level of traffic by schools!!

Not to mention the long term effects of breaking our City into two completely different sides impacting noise, traffic and property values.

In Favor of Segment A - Vehemently opposed to Segment B!!

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: Highway 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Evening,

Thank you for taking the time to read the comments of the residents impacted by the 380 bypass. I believe I spoke to you a few years or more ago, when the sound barriers along 380 went up, as my street didn't get a barrier. The bottom of our cul-de-sac is very close to 380 and when I called to see why we were passed over, I was told that there is a creek there, that would not allow for the construction of a barrier wall. You can imagine what that sounds like at certain times of the day. 380 is easily seen from the top of our street in the winter, when the trees don't have any leaves. And the parents of children on the street have to be careful, as the lure of all that traffic is hard for little boys to resist.

I want to express my support for Segment-B, as it's the least destructive to the families and businesses along our corridor of 380. It would preserve well established neighborhoods and businesses and it is less expensive by almost \$100 million than the Segment-A option. We have all worked hard to build our neighborhoods, property values and businesses and Segment-A option, specifically, would destroy that for all who live and work along our corridor of 380.

I am strongly opposed to the Segment-A option. This option would have a significant negative impact on the property values of the homes in the neighborhoods along our corridor, as well as destroy 17 businesses in this same area. It would put an interchange directly above the Kensington neighborhood and put a tremendous strain on arterial the roads, Stonebridge, Ridge, and Lake Forest. These streets will become the detour route during the lengthy construction, increasing traffic volume to a level for which they were not designed. This will be less safe, very noisy and congested and negatively impact countless neighborhoods along these roads.

Thank you for taking the time to read and consider my comments. I appreciate the opportunity to share my thoughts with you about this matter.

Best Regards,

Michelle Michelson

Subject: Good Morning

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning Mr. Endres,

I hope this email finds you well and you take a moment to consider my opinion. I live very close to the proposed site of the Segment-A alignment. My husband and I put all of our money into buying our house in a great neighborhood with great schools for our young children. Our intention is to stay here for many, many years to come as this is our home. With the proposed Segment-A, it would drastically change our neighborhood. This is not what I envisioned when I bought our house. We would not be able to sell as house prices have skyrocketed and we wouldn't be able to purchase anything else. As a homeowner and a mother in McKinney, TX., I'd rather not see any more growth and development in this city. It's already changed so drastically. But I'm old fashioned and tend to think bigger isn't always better. Since growth and development will inevitably take place, I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. I know big projects like these are just thought of in dollars and cents. But this affects more than bank accounts. This disrupts our life.

Sincerely,
Michelle Norfleet

Subject: Support Segment A - US 380 expansion

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Support Segment A – Oppose Segment B

Utilizing Segment A allows for the continuation of Prosper’s city planning, organized growth, and viability of its tax base without disruption. The City of Prosper and residents of Prosper, should not be penalized for a lack of planning for US 380 expansion on the current 380 route because of other neighboring cities lack of foresight. Segment B undeniably isolates an entire section of the community, upsets decades worth of planning, and negatively affects Prosper’s tax base. In addition to these reasons, the proposed Segment B would be placed directly next to the new high school. It’s completely unsafe to expect new novice drivers to deal with entering and exiting on an expanded 380. Allowing Segment B would diminish the viability of planned residential communities, and negatively impact schools and humanitarian activities for the City of Prosper. We ask that you please consider all of the long-term ramifications and move forward with Segment A.

Kindest Regards,

Michelle Wood

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Regards,
Miguel A. Chaidez

Mikayla Nairn - [REDACTED]

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Dear Mr. Endres,

We recently reviewed the 380 bypass plans. While we understand the dire need to divert through traffic off 380, we think it would be better to consider routes further out of the developed area. As you've seen in just the past few years, things are growing considerably. May we humbly suggest you consider the Collin County Outer Loop that is already under construction. We realize that is further out, but for through traffic it seems like a logical, cost effective solution.

We appreciate your time and consideration.

Subject: TXDOT 380 Project Feedback

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

After reviewing all the information and video regarding the possible 380 alternatives, I am writing to strongly encourage TXDOT to choose Alternative B vs. Alternative A. Alternative B is projected to cost \$589.7M vs. Alternative A costing \$688.5M which is a savings of \$98.8M. In addition, Alternative B has less business displacements.

Starting the 380 Bypass before Custer Road (Alternative B) and routing the traffic away from 380 going North makes the most sense and is the best spend of the state's dollars.

Sincerely,

Mike Harding

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. These neighborhoods and businesses have been in place for over 10 years. Had the traffic on 380 been foreseen at that time, businesses and neighborhoods would have been able to plan accordingly. To disrupt 17 businesses and several established neighborhoods now is not considering citizens of Collin County. In addition, the cost is almost 100 million dollars more. The streets in the neighborhoods affected by Plan A would become more crowded and devalue land and property.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Please consider the citizens of Texas in spending tax dollars, the citizens directly affected with traffic, home values, safety, the wildlife and natural habitats affected, the 17 businesses affected.

Subject: US 380 Coit Road to FM 1827 Comments

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen:

My properties are located at [REDACTED] and all would be directly impacted by segment "C." Therefore, I want to reiterate a strong recommendation for the **"Feasibility Study Recommended Alignment" from 2020. This would be the route segment "D" - "E" - "A."**

Couple of other considerations:

- segment "D" and "C" cannot be considered independently of the spur 399 route options. For that reason, I have included my comments on Spur 399 below.
- If segment "D" is chosen, that would mean Spur 399 West of the airport; if segment "C" is chosen, that would mean Spur 399 East of the airport.
- Taken as a whole this is why ***I recommend D.*** Why?
 - Total combined cost of segment "D" with Spur 399 West would be approx. \$1.4B compared to about the same for segment "C" with Spur 399
 - Morning and evening rush hour times are less for segment "D" than "C"
 - Fewer total grade separated interchanges for segment "D"
 - Fewer residential displacements for segment "D"
 - Fewer "other" displacements for segment "D"
 - Cost of new ROW is lower than segment "C" at \$158.5M
 - Segment "D" has less disruption of future development potential because of floodplains and floodways
 - Segment "D" has half the total acres of forest land and one quarter the number of acres of prairies and grasslands
 - Segment "D" has fewer hazardous material sites
 - Segment "D" does not impact any protected lands or parks (Section 4(f) and 6(f)) or any chapter 26 properties

All these points lead to the conclusion that ***segment "D" is the right choice.*** Thank you for your consideration -

Mike Swim
[REDACTED]

My comments on the Spur 399 extension:

I'll begin by stating my strong recommendation for the **initial Spur 399 alignment or Purple route to the West of the airport.** Why?

- It aligns with the initial May, 2019 recommended alignment
- It is a **shorter route** - 4.8 versus 6.25 miles for Orange

- Requires **fewer grade separated interchanges** - 2 versus 3 for Orange
- Costs **\$105M less** than the orange route - \$601M versus \$706M for Orange
- Significantly **fewer acres of ROW** necessary - 117 versus 233 for Orange
- Requires **ZERO residential displacements** versus **EIGHT** for Orange
- Requires **only one business displacement versus 3** for Orange. Note that the one required here is the Amazon delivery station - a national "behemoth" that has the capital necessary to move anywhere versus the Airport center, boarding kennels or locally owned Doc's plumbing.

I would also submit the following:

- Page 12 of the presentation draws a conclusion that "the orange alternative better serves regional northbound and southbound traffic" Even though "mobility and capacity" are very similar with each route - 133.3k to 137.6k vehicles per day. This conclusion is not logical given the facts and considering the balance of the bypass route has yet to be established.
- Page 14 states that "Purple Alternative is closer to low-income and minority neighborhoods." This should be considered "a positive" as the real estate along the proposed frontage road would become significantly more valuable than it is today.
- Page 14 also states "Purple Alternative could be perceived as a barrier between neighborhoods and parks." This is true for either route and in fact for any major freeway necessitating 350 - 400 feet of right away. These issues are easily solved with walking / biking paths over the new freeway structure.
- Page 16 is also concerning. Despite facts that support a less expensive, less intrusive Purple Alternative, the Cities of McKinney and Fairview support the Orange Alternative. This is clearly due to business interests and the creation of additional commercial tax base, completely disregarding the needs of the impacted local businesses / homeowners AND costing the taxpayers an additional \$105M!
- Page 16 also states that Collin County prefers the Orange Alternative to enable a northern expansion of the McKinney Airport runway. This is illogical as neither route impacts the ability to expand the runway further north.

Finally, I believe it is deceptive to consider the Spur 399 Extension without considering the two bypass alternatives to the north. A decision for the Purple Alternative will result in one northbound route and a decision for the Orange Alternative another. Those impacted by the northern routes need to have a say in this as well.

Again, with most facts in its favor, I strongly **recommend the initial Spur 399 alignment or Purple route to the West of the airport.**

Thank you for your consideration -

--

Subject: Opposition to HWY380 Alternate Routes

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Mitch Phillips

Subject: 380 Bypass Project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,

Monique Miller

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

We would like to let you and those in positions to make decisions that we strongly oppose Option A for the US380 expansion.

It costs more than twice Option B costs for utilities relocation.

Option A's total cost is approximately \$100m more than Option B.

We can not imagine the increased noise in residential areas with Option A.

It appears there is not one good reason to approve Option A unless it is to appease those that do not care about the incredible increased costs and noise and displacement of established businesses.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Nancy Billetz

From: Nancy Brockman [REDACTED]
Sent: Thursday, March 31, 2022 11:34 AM
To: Stephen Endres
Subject: Opposition to HWY 380 Segment B proposal

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I oppose HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a critical community resource, already identified by TxDOT. The vulnerable and protected populations deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I know people who volunteer at ManeGait who have said it changed their lives. I know families served by ManeGait that have seen such a difference in their family members. ManeGait offers loving and professional services to two marginalized communities in Collin County: the disabled and our children. ManeGait offers a chance for many to be active in a body that won't work for them. The horses are gentle and loving with their riders.

To take land away from their support system is unacceptable. Putting in a loud highway (after several years of construction first) is detrimental to the services ManeGait provides and it is cruel to the riders and their horses. You made the decision two years ago to shield ManeGait. Has something changed since then that has made ManeGait less critical?

I urge you to consider the vulnerable people and families that ManeGait supports and make the kind and compassionate decision to protect them.

Thank you for your time,

Nancy Brockman

Subject: 380 Bypass Comments

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

This is being written to express opposition to **All Segment B Considerations** for the 380 Bypass.

The construction and presence of the Segment B option will condemn hundreds of students of the Prosper Independent School District (ISD) and the Founders Academy to hours of exposure to noise and toxic air pollution each day. This exposure would have a further outside affect on those students with learning disabilities and chronic health problems, such as allergies and respiratory afflictions.

Furthermore, the Segment B option will also make it impossible for ManeGait to continue to conduct its charitable and therapeutic activates in support of children and adults with disabilities. In particular, the Segment B option will greatly affect the recovery of our wounded and disabled military veterans suffering from PTSD.

There are many other options, other than Segment B, that will not materially harm so many children and disabled adults. It is suggested that those alternative be actively considered and not Segment B.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello. I am voicing my strong support for Proposal B. I feel that Proposal B is best for the future of the entire North Dallas area. I am quite aware of the heated struggle between the cities of McKinney and Prosper. I am actually baffled why the future of 380 was not better planned for. I fully understand why Proposals A and B have caused such anger and divisiveness between these neighboring cities. Additional proposals should be put forth and on the table to help promote a better harmonious path forward for expanding 380. However, as the proposals currently stand today, I will strongly continue to support Proposal B.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: I am writing today to tell you my thoughts about the 380 expansion, plan A + B. #1 380 truly needs fixed. #2 I lived in Prosper for 8 yrs before moving to Junker Hill. I too did stay of Prosper but I didn't know the facts - Fact 1 - plan B would ^{not} be through the \heartsuit of Prosper - It's @ the corner of Custer area and would be built through open field Fact 2 - Prosper ISD states they want to protect the students - Junker Hill IS Prosper ISD! protect all students. Fact 3 - Plan B is 99M less than plan A. Fact 4 - I'm concerned about emergency vehicles + the safety of all people here. Our exit would only allow to turn A - make a U turn @ Custer to get back to our near hospital.

These facts alone point you to the most economical road

- Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).
- I am employed by TxDOT
 - I do business with TxDOT
 - I could benefit monetarily from the project or other item about which I am commenting

* 99M less
 * PISD - protect
 * Safety for T. and allowing 17 sm business to stay.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Thank you for your time ears.

Vote "Plan B" please

Subject: Project 380 Segment-B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option.

This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380.

It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Subject: Strongly OPPOSED to Option A for the 380 Expansion!!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Mr. Endres,

I am strongly opposed to Option A for the US380 expansion project for the following reasons. • Option A displaces a total of 17 businesses, Option B displaces ZERO • Option A cost to relocate utilities is \$61 million, Option B is \$25 million • Option A total cost to acquire ROW (right of way) is \$178M, Option B cost is \$137M • Option A total cost of design/construction is \$450M, Option B is \$428M • Option A total cost is about \$100M higher than Option B • Option A impacts more acres of wetlands, river/streams and forest/prairies than Option B

- Option A impacts 14.9 acres of Statewide Important Farmland, Option B only 2 acres

- Option A's increase in noise would have a severe negative impact on established Stonebridge Ranch neighborhoods. Option B does not come as close to any existing neighborhoods. Also, with Option A there would be considerably increased traffic on Stonebridge Ranch Dr & Ridge Rd which both have elementary schools close to 380: Wilmeth and McClure.

Thank you for listening!

Natalie McShane

Subject: 380 Bypass, Support of Option A

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I am writing this letter in support of Option A for the planned 380 bypass. I live with my family in Prosper and Option B will have a significant impact on our town. Option B will affect future businesses as well as communities that our town has carefully planned for based on the current location of Highway 380. Our town is a small town compared to McKinney. While option A will negatively impact the town of McKinney as option B will negatively impact Prosper, McKinney will be able to absorb that impact much easier than Prosper. The tax dollar impact by losing businesses in Prosper will affect the quality of education in Prosper ISD as our community continues to grow. Again, McKinney has a much larger business community and tax base to absorb that kind of impact versus our smaller town.

Another significant reason to oppose option B is the negative impact on ManeGait. ManeGait is a unique facility that helps children and adults with physical, emotional, cognitive, sensory, and behavioral disabilities. ManeGait also provides therapy programs to support wounded military veterans. ManeGait is a wonderful organization that provides a unique service that will be negatively impacted by option B.

Thank you for your time in reviewing my email.

Option A impacts more acres of wetlands, rivers/streams, and forest/prairies than Option B

Option A impacts 14.9 acres of Statewide Important Farmland, Option B only 2 acres

Option A's increase in noise would have a severe negative impact on the established Stonebridge Ranch neighborhoods. Option B does not come as close to any existing neighborhoods.

Option A would cause increased traffic on Stonebridge Ranch Dr & Ridge Rd which both have elementary schools very close to 380: Wilmeth Elementary and McClure Elementary.

Subject: Hyw 380 Bypass Project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road and this will affect our community and my home value.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area. I live in this village and I don't think that you would like for your home to loose value, would you? I didn't think so.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Neil Parikh

Subject: 380 bypass Options

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Mr. Endres,

Please accept my response/opinion to the impending 380 expansion. I am not 100% inline with the SBR HOA association "recommended" response, but wanted to share my thoughts with you.

I have been a homeowner and citizen of McKinney, TX., residing in Stonebridge Ranch, for over 22 years. I strongly support a 380 Segment Bypass project, as I have come to loathe and avoid the road as much as I possibly can due to the traffic, lights and congestion.

In my opinion, the McKinney planning board has failed the area, allowing businesses to expand to a point that it is virtually impossible to expand 380 without displacing businesses and causing grief to someone. There are no winners.

That said, I am torn as to which option is the best. Our HOA thinks option B is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. They also believe it is the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

However, I believe the SBR association's interest is solely for their own and does not take into account the greater community. All of the reasons they are broadcasting its residents to respond to TxDot seem to ignore the impact on the greater community. Below are my comments to their cut and paste answers:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side. - **There is no way an expansion will NOT impact businesses, however, I do not think it will "destroy" them, only cause them to move. Option B WILL destroy Maingate, a facility that is very important in rehabilitation to those in need.**

*The cost of Segment-A is \$99 million more than Segment-B. - **In the grand scheme of things, \$99M is minimal, and the final cost will mostly likely exceed estimates anyway.**

*It will create an overpass on 380 over Stonebridge Drive and Custer Road. - **Sounds like a good plan to me.**

*It will also cause the installation of water pipes (ducts) over 380. - **So?**

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380. - **How could this possibly create more traffic than is already caused by the current 380 limitations?**

***It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area. - I don't think home values are an issue right now.**

I know this is a difficult decision to make, but please don't cater to the SBR association. The fact they are spending our HOA dues to propagate their agenda disgusts me.

Subject: NO TO OPTION A HWY 380 EXPANSION

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

I'm a life-long Texan growing up in Denison and I have been a Stonebridge Ranch and McKinney resident for 16 years. I have witnessed the rapid growth and expansion of the area and like most of the residents agree that the current structure of Highway 380 is not big enough to support the increasing traffic. I've studied the options, talked to my neighbors, and have done my own research.

My conclusion is that Option A is more disruptive, more expensive, and will have a greater negative impact on our community than the other options. Residents and businesses will be displaced. Local establishments will lose customers potentially causing them to fail just as they recover from the severe damage from COVID 19. The Stonebridge area will be inundated with excessive noise and pollution. There is a severe environmental and ecological negative impact. Consider the nearby lakes and natural habitats to Stonebridge. We have two children who will be at McKinney North High and J.B. Cockrill Middle School. The commute to the schools will be practically impossible during the build and I'm afraid that construction will not be complete before my students as well as many others have graduated. The reroute will increase traffic hazards and accidents. The impact of the Option A commute to and from school not only affects the students of Stonebridge but the parents, bus drivers, and neighboring communities. The Stonebridge homes affected by Option A have existed since 2007-2008. From a longevity and historical perspective it makes no sense to harm these residents in favor of newer developments in Prosper. Option A is more costly. We're all taxpayers and we do not support excessive and inefficient budgeting. Please consider all of the costs associated with Option A in addition to construction budgeting. My rough math calculates Option A as ~\$100M more expensive.

I'm aware of Prosper residents supporting en masse for Option A and I'm sure that you have been presented with a lot of emotional and misleading information. Please take a hard look at the facts and support the best option. Option A is inefficient. It creates more disruption and environmental consequences. Finally it is more expensive. Please review the numbers and take a practical look. Dismiss Option A.

Thanks very much for your time.

Regards,
Nevin Marr

ATTN: Stephen Endres, P.E.
4777 East US Highway 80
Mesquite, TX 75150
Stephen.Endres@txdot.gov

Dear Mr. Endres:

The New Hope Town Council discussed TxDOT's project to improve Highway 380 from Coit Road to FM 1827 at their Tuesday March 29 meeting, focusing on design schematics for the build alternatives under consideration. The Town Council is *in favor of segment D* which is part of both the purple and gold alternatives:

1. Segment D runs farther west across undeveloped flood plain and would have less impact on existing residential areas in New Hope.
2. Noise levels for residential areas would increase but not as dramatically on the Town's southwest border as they would if segment C were to be the chosen alternative.
3. Should the Spur 399 Extension Project be constructed, the new roadway would flow directly into the existing Airport Road. This seems like a logical and preferable choice for the Spur 399 Extension Project location.
4. Segment D would move traffic flow away from the FM 1827/Highway 380 intersection leading to increased safety and mobility for our residents as they travel to and from their homes.

The Town Council is *against segment C* which is part of both the blue and brown alternatives:

1. Segment C runs very close to the southwest border of our Town and would be right in the backyard and down the road from residential areas.
2. Noise levels for residential areas impacted by this segment would increase dramatically.
3. Should the Spur 399 Extension Project be constructed, there would be a large intersection of bridges and highways right at the entrance to our Town on FM 1827.
4. As we stated in our letter from November 25, 2020, the FM 1827/Highway 380 intersection is already a hazardous intersection with increasing traffic congestion, compromising both safety and mobility. We are against making this a larger intersection.

Noise from Highway 380 is already a problem for residential areas on the southern edge of New Hope and will only increase with completion of the TxDOT project to improve Highway 380. The New Hope Town Council asks TxDOT to consider noise mitigation measures, such as barrier walls near New Hope residential areas or below grade lanes near our southern border where possible, in any final build decision.

We would also request that TxDOT take into consideration the proposed trails documented in the Collin County Regional Trails Master Plan (May 2012) that cross the proposed Highway 380 corridor. Of particular concern to New Hope are those proposed trails that provide New Hope with trail connectivity to McKinney and surrounding communities.

Thank you and we appreciate your consideration in these matters.

The Town Council of the Town of New Hope

Subject: OPPOSITION TO ALL SEGMENT B OPTIONS HWY 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres:

Thank you again for taking time out of your day to review my concerns regarding the development plans for Highway 380. I have communicated with you before regarding this issue and my passion in this subject matter continues. My husband and I relocated our family from Dallas to Prosper to avoid the issues that will arise should Segment B option be approved. I am writing in opposition to ALL SEGMENT B options. The reasonings behind this opposition are numerous and outlined as follows. The magnitude of this option would equal that of US 75 placed just south of Founders Academy. A new school to the Prosper area that would significantly impact the environmental safety of the children and faculty at this school due to pollution, emissions and poor air quality surrounding such a huge traffic area. It would also have the same negative environmental impacts to ManeGait which is a vital therapy source for adults and children with disabilities in addition to the surrounding neighborhoods such as Whitely Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, Wandering Creek, Malabar Hills, Rutherford Creek all which have elementary and middle schools affiliated with them that will increase the risk of compromise our children's health and safety with Segment B options. The Segment B options will most certainly decrease home values and overall desire of the area with resulting lost tax revenue to the town of Prosper and Prosper ISD. The construction of this area will also result in massive utility relocations that are critical to the infrastructure of Prosper. Thank you for your time and consideration of just a few of the important reasons listed above to OPPOSE SEGMENT B options of the 380 bypass project.

Kind Regards,

Nichole Johnson, MD, FACP

Subject: US 380 Bypass Alignment - Supporting Option/Segment B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

My name is Nicholas Heilig and I am a resident of Stonebridge Ranch in McKinney, TX (specifically the Kensington neighborhood). I am writing to support Option/Segment B for the alignment of the upcoming US 380 bypass.

I know the TxDOT team has a difficult decision to make and that both options will have an impact on existing homes and businesses, but based on what I can tell in the TxDOT-supplied documentation, Option B is far superior in terms of minimizing these impacts. I think my biggest concern of going with Option A is the safety of everyone maneuvering through the construction for the next several years. Specifically, it seems that most travelers will likely utilize roads like Stonebridge Ranch Drive and Virginia Drive to detour the multi-year construction - which brings with it a lot of safety concerns for the residents of Stonebridge Ranch. The core of the construction tying the new bypass to the existing 380 footprint for Option A seems like it will be in a much more populous area than Option B. So, in addition to Option B being a more cost-effective option for the taxpayers, it also seems to be the safer option while in development since most of the area where Option B would tie into is largely undeveloped land at this time.

I sincerely appreciate you taking the time to read my feedback on this project. Please let me know if you have any questions.

Thank you!

Nick Heilig

Mr. Endres:

I'm writing to **oppose** Option A.

Reasons as follows:

The lives of people in the "established" communities.

The livelihoods of the people who own and work in the 17 businesses this project will impact.

The total cost of option A COSTS are extremely HIGHER.

Seems the local MEDIA is showing how this will affect "future development" in Prosper.

Future development is only land, not "lives" which have established roots here in the neighborhoods and community of Mckinney/Stonebridge. Developers/home builders ALWAYS find land to develop.

Maine Gait is well connected within the Mckinney Community. Many of the people in Mckinney, in the past years WERE who supported them. They will find Land to continue their charity work I believe.

Subject: Opposition 380 highway and Lakewood at Brookhollow access points

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am writing to oppose opposition B as I live in prosper in Lakewood at Brookhollow and this will have a detriment to our community as this will basically be right next to it and have a lot of other environmental impacts on my home.

Also I want to state that option B and a both are going to eliminate our access on 380 to turn east and west out of our property. This is going to make more traffic through one entrance and it's going to make it harder for me to have direct access to my hospital at Cook children's where I am a physician on on-call and have built my house to have easy access to 380 to get to children on call when they need to be seen immediately and this is going to hamper our access and lengthen the time that I need to get to the hospital to see patients in emergencies.

There needs to be a discussion and how to create an option so we actually have an entrance off of 380 and these segments either one should have a better option to not severely impact our neighborhood and our access points.

Thank you

Nicole Pitts, DO

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I, Nikki Schittone residing at [REDACTED], oppose the proposed HWY 380 Segment B because:

- It threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.
- Segment B directly affects and is disruptive to numerous neighborhoods: Whitley Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, etc.
- Prosper properly planned for expansion (380 can be widened!). If other towns didn't plan this can't be put on Prosper
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Classical Academy and student drivers
- Materially impacts ManeGait and the wonderful therapy they provide to children, veterans, and our disabled community
- Exorbitant costs of acquiring rights of way, adverse environmental impacts, wetland mitigation
- This design does not make for an acceptable proposal nor effective use of taxpayer money
- School buses having to go on a highway to take kids to school / young drivers for the high school having to deal with highways and high speeds
- Significant environmental impact: pollution, emissions, & poor air quality
- Safety of our citizens and students
- Massive utility relocations that are critical to Prosper's infrastructure

Subject: Keep It Moving US380 - Support for Option B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

April 3, 2022

I would like to express my SUPPORT for the project 380 segment B bypass alignment option.
I strongly OPPOSE option A. Option B is the least disruptive to both homes and business and saves taxpayers almost 100 million dollars. Option B is also safer for drivers during and post construction.

Specifically, my reason for supporting option B:

Option B uses land not developed, providing significantly less construction related driving risk, disruption to businesses (including the emergency room to Baylor Scott & White); seconds matter for several emergency room visits including strokes and heart attacks

The almost 100 million dollars saved by option B can be used for other projects

Option B displaces less than 14 homes, business and other buildings compared to over 30 in option A

Option B requires \$ 40 million lower right of way cost

Option B has 2 major utility conflicts vs 7 conflicts in option A

Option B is safer for drivers, with its gradual route, vs the sharp driving conditions in A

Option B makes teenagers driving to the area schools more dangerous

Option B has zero hazardous material site impacts, option A has 11

Option A is duplicative of the Ridge Road development, wasting even more money

Option A significantly impacts the entrance to existing neighborhoods, adding miles to a commute and to existing businesses, option B allows for neighborhoods and businesses in future developments to plan for the bypass.

Regards,
Noemi Garcia

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT' S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN' S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Warmest Regards,

Noll and Mindy Saunders

Subject: 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Regards,
Omar Vargas-Chavez

NAME/ADDRESS:

COMMENT:

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).
- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.
- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.
- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.
- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Thanks, Ouida Boyd

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Endres,

We are homeowners and citizens of McKinney, Texas. We STRONGLY support the Project 380 "Segment- B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to 380. It is also the least expensive option by nearly \$99 million when compared to the cost of Segment-A alignment.

We also STRONGLY oppose Segment-A. It should NOT be considered for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- The cost of Segment-A is \$99 million more than Segment-B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- It will also cause the installation of water pipes (ducts) over 380.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive increasing traffic, noise, and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large intersection to be constructed at the intersection Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

SEGMENT-B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for all the work and time you have spent on this project.

Hello Mr. Endres,

My name is Pam Hatch and I currently live in Frisco, TX at [REDACTED]
[REDACTED] (I was a McKinney resident 2005-2015)

I again (see July 2021 email below) express my opposition to the proposed HWY 380 Segment B solution. This solution jeopardizes the daily operations, services and events at ManeGait.

It had been my understanding that the Segment B option had been taken off the table – but recently I became aware it is again/still being considered – thus this email.

Should TXDOT go forward with this solution it is my understanding that ManeGait, located at it's current site, will not be able to exist with this solution – the program will need to be moved to a new location where such noise and pollution will not be in their back yard. This likely means a location that will be less accessible for the community of riders and volunteers.

Such a move would be a very major undertaking and a huge loss to the community at large. ManeGait is a very unique and special program that would no longer be easily accessible to serve the vulnerable and protected populations it now serves.

Thank you for again considering my request.
Pam Hatch

Subject: Opposition to HWY 380 Brown and Gold Alternatives (Segment B)

Hello Mr. Endres,

My name is Pam Hatch and I currently live in Frisco, TX a [REDACTED]
[REDACTED] (was a McKinney resident 2005-2015)

It came to my attention recently that the discussion regarding HWY 380 upgrades has been reopened. I found this surprising since there had been long discussions and studies for a solution and I had thought it was a "done deal". I was pleased with the original decision as it preserved the ability for the ManeGait Therapeutic Horsemanship organization to continue it's special and important work and mission in our community. Now this is again at risk.

My understanding is that the proposed Gold and Brown Alternatives (Segment B) now being discussed will greatly impact the daily operations and special events at ManeGait. The essential services ManeGait provides to individuals of all ages would be disrupted and the encroaching noise and pollution would have negative impact on the environment, persons and horses.

ManeGait is a very special place! I became involved with it when it first began in 2007 and served as a volunteer until I retired in December 2019. I spent many hours in that special place filling a variety of roles and in those years saw many miracles of all sizes and types for the riders and their families (and the volunteers!). ManeGait fills a special need for individuals with disabilities and their families who are helping them to continue to grow beyond their boundaries. The location is perfect as it is reasonably close and accessible to many in the immediate community who serve as volunteers and those who take partake of the services offered.

I respectfully request the Segment B be removed from consideration due to the negative impacts it would have on the operations and mission of ManeGait. ManeGait is a special jewel that should be preserved.

Thank you for your consideration of my request.

Pam Hatch

[REDACTED]

Mr. Endres,

As you are aware, TxDOT's 2020 [US 380 Collin County Feasibility Study](#) identified ManeGait as a "key community resource" serving two protected status populations - the disabled and children. Citing the *Americans with Disabilities Act* and *Executive Order 12898 on Environmental Justice*, TxDOT removed from consideration any alignment that impacted ManeGait's daily operations.

In a direct contradiction to the conclusions above, TxDOT introduced a new Segment B alternative. Segment B places the 45-foot tall freeway within 50-100 feet of ManeGait - **even closer and more disruptive to operations than before**. The path also cuts through property that is regularly used to support ManeGait's operations.

At the 3/22/22 public hearing, TxDOT claimed they interviewed similar horsemanship facilities and the proposed highway does not pose an issue to operations. This claim cannot possibly be true, as no other PATH Premier Accredited center in Texas the size of ManeGait is located within 50-100 ft of a highway, and none have operated next to a 3- to 4-year highway construction project.

It appears that TxDOT does not recognize the disabilities outlined in the March 2020 U.S. 380 Feasibility Study, nor does it identify the disabled adults and children with disabilities at ManeGait as a minority group within the greater Collin County community of persons with disabilities. The current proposed Option B is in violation of the ADA.

I STRONGLY oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. The vulnerable and protected populations, deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Also, my recollection is that McKinney Mayor George Fuller, former County Judge Keith Self, and the McKinney community of Tucker Hill's collective push to have a by-pass go through Prosper wasn't even on the table until former County Judge Keith Self (who lives in Tucker Hill) asked TxDOT at a County Commissioners meeting to look at Prosper as an alternative route. He unethically used his position as the county judge to influence TxDOT to move the by-pass proposal away from Tucker Hill and instead build it in Prosper.

The original TxDOT proposal had a by-pass running north-south along the east side of the Tucker Hill community where it would then merge with the existing US Highway 380. As I understand it, that east-side land is in a flood plain where no homes could be built anyway, but an elevated by-pass could be built there without depriving McKinney of potential tax revenue generated by new homes. That's when former County Judge Self introduced a new bypass route going through east Prosper.

In terms of "direct impact" on Prosper, Option B would obliterate the Ladera Prosper 55+ community being planned by the Delin brothers, just west of Custer Road, with the result that Prosper would be deprived of the taxes generated by these new homes. In terms of "indirect impact," Option B would create a negative environmental / ecological impact on:

- The Founders Academy already built and in operation on the southwest corner of E. First Street and Custer Road;
- The existing small cemetery with plans for expansion on the west side of Custer Road;

- The Malabar Hill subdivision currently under construction on the south side of E. First Street;
- The Walnut Grove High School now under construction on the south side of E. First Street.

These are just some of the reasons why Prosper's proper planning for the future should not be disrupted by Option B.

Thank you for taking my comments into consideration.

Subject: US 380 Bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Afternoon,

I would like to share my preference for Option B of the bypass proposals. The traffic congestion and safety of HWY 380 has consistently worsened over the past 17 years I have been a resident of North Stonebridge. Option B allows for a longer stretch of HWY 380 to experience a reduction in through traffic which positively affects those of us that live, shop and work here. Furthermore, the more traffic you can offload from 380, the safer it is for the transportation of students via bus, parent or student drivers. I raised 3 boys here and having to utilize 380 to get my boys back and forth to McKinney North for a total of 8 years of my life, was stressful. With the population growth projections, this area will always be congested and busy but the more you can bypass of HWY 380, the better.

Thank you,

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Thank you,
Pamela Niessink

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Stephen Endres,

I'm a bit upset about how McKinney's officials have treated Prosper regarding this expanding of 380. Anybody who grew up around all this knows well that McKinney allowed commercial businesses right up to their road in recent times in hopes that maybe the 380 widening issues could be left up to the town of Prosper. Put the problem of 380 Highway off on somebody else.

My home in Prosper is right across First Street at the corner of Custer Road. We are neighbors to the Founders Academy. We love the sounds of the children as they play outside during their recesses. This school and the ManeGait Therapeutic Center should not have a new elevated highway running right next to them just to try and resolve the bad decisions of McKinney.

My question is, "Why should these facilities and the town of Prosper be pushed into what McKinney should have done years ago and should do today"?

I support Option A and Oppose Option b.

Sincerely,

A Texas Department of Transportation message

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

**Thank you for considering my input,
Pat Norton**

Subject: US 380 bypass options

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am writing to express my opinion about the proposed 380 bypass options. As a homeowner and citizen of McKinney, TX., I STRONGLY SUPPORT the US 380 Project segment-B bypass alignment option. In addition, my home is in the Stonebridge Ranch community, located very near the intersection of 380 and Stonebridge Drive. This option is the least disruptive to the residents of Stonebridge Ranch and all along 380, and to businesses in the area with no displacements. It is also the least expensive option by nearly \$99 million when compared to the cost of the segment-A option.

I also STRONGLY OPPOSE the segment-A option, as it will cost much more, and will destroy and remove many businesses along 380. It will also be very disruptive to the many residents in the area.

Segment-B IS THE BEST OPTION to improve traffic flow in our corridor while also preserving the business and residential vibrancy of our community.

Thank you,
Pat Storey
McKinney, TX.

Message: I am strongly against Plan B through Prosper! The Plan B route would put it 45' from Manegait property, a facility serving the handicapped.

School busses would enter and exit the proposed 8 lane road. Plan B would have a detrimental effect on a senior living facility and several subdivisions with lights, noise and air pollution. The loss to the Prosper tax base would be enormous! Traffic on Custer Rd - heavy now - will be a nightmare. Prosper planned for the expansion of 380, McKinney did not. Now they want to foist their problem off on Prosper. Keep 380 on 380!!!!!!!!!!!!

Dear Mr. Endres,

I am writing regarding my opposition to HWY 380 Brown and Gold alternative routes (Segment B) due to immediate and long-term impacts to the Town of Prosper.

Therefore, I fully support the Prosper Council Resolution 2021-34 passed on July 13, 2021,

"...CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE NEW PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED IN TXDOT'S US 380 EIS SCHEMATIC 30% DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE."

I request that you also fully support this Resolution by strongly opposing any proposed alignment changes, including the new Gold and Brown alternative segment B alignments.

Sincerely,

Patricia C. Sparrow

NAME/ADDRESS: Patricia Jackson, [REDACTED]

My horse serves the clientele at Manegait. She and I are both happy to be able to contribute to the equine therapy community in North Texas. This non-profit facility provides opportunities for volunteers, horses, and clients in a location convenient to a large geographic area that is growing as fast as any other in the nation. Please do not deprive this North Texas region, so convenient to metropolitan Dallas and Fort Worth of a fine and worthwhile rural respite from the roar and angst of a high-volume roadway.

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).
- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.
- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.
- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.
- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Sincerely,
Patricia Jackson

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am writing you to express what should be completely evident to anyone that reviews the pro and cons between Segments B and A for the Highway 380 bypass.

In April 2009 I purchased my home at [REDACTED] McKinney. I had the chance to purchase a home that backed up to the then four lane highway 380 or another home that was further away from highway 380. I purchased the home that was further away from highway 380 because I like to sleep with my windows open when the weather was nice and did not want to hear the road noise. Then highway 380 was made into six lanes and sound barriers were erected to hinder the road noise travel. I still enjoy sleeping with my windows open

No offense intended but I was here first. If I wanted to live next to a highway I had the chance to, but I chose not to in 2009.

Now you want to build a bypass, Segment A, that will most likely be elevated without barriers to obstruct the vehicle noise, introducing higher volumes of vehicles, displacing 17 businesses, subjecting existing home owners to increased noise pollution, decreased property values, and costing tax payers \$99 million more than Segment B.

Please spend tax payer money as if it was your own money and select the less impactful and \$99 million cheaper Segment B option.

Let people make a decision to build a home next to an eight lane freeway and do not impose an eight lane freeway on those that bought their homes prior to the Segment A being proposed.

Please select Segment B.

Respectfully,
Patrick & Andrea Szlachtowski

Dear Project Manager Endres,

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Please support Segment-B for the cost, traffic, and minimal disruption to businesses and homes in the area.

Thank you for your time and attention to this matter—my family and I appreciate your thoughtful consideration!

Best,
Patrick Dennis

Subject: 380 bypass proposed site

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Why would we ever be considering proposal B?

1. Why should we be :

Causing business to be removed and causing that much traffic at a site where there is an elementary school close to there on Stonebridge Drive and on Ridge Road. Lots of school buses and parents bringing children to school and more dangerous for children who walk to school.

2 increase in noise and congestion at a large family Oriented development. Remember Mckinney's motto ".McKinney, Green by Nature"..... not cement or asphalt.

3 The traffic flow in McKinney is unbelievable. If the purpose of this project is to divert traffic around jMcKinney, it should be diverted as early as possible, which makes sense to use propositions A.

4 The new developments on the property at 380 and Custer S.E. Corner will be creating a lot more traffic at the intersection at Stonebridge Drive.

We strongly believe that Proposition B is the best plan and will be a better traffic flow for safety and quality of life.

Respectfully,
Paul and Margaret Smith

Subject: 380 Expansion West Of 75

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear sir,

As a homeowner and resident of McKinney, TX, I strongly **SUPPORT** the project **380 SEGMENT B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to University Blvd/local 380. It is also by far the least expensive option, \$99M less expensive than option A.

I strongly **OPPOSE** option **A**.

Option A should not be considered and option B should be chosen or better still another option to be determined should be proposed further north.

Here are my reasons why option B is the preferred option for economic, engineering, environmental and safety reasons:

At a time when property taxes are high and the area continues to grow and thrive Option B costs \$99M less, saving valuable taxpayer dollars for other infrastructure needs.

Option B has only 2 utility conflicts (v 7 in option A) which lowers relocation costs.

Option B displaces 12 homes, businesses, barns, sheds and buildings versus 31 in Option A.

Option A requires engineering 2 large aqueducts near residential areas. This is not required with option B.

Option Bs route uses undeveloped land making it more accessible to construction vehicles and far this disruptive to thousands of residents of existing neighborhoods and businesses.

Option B avoids the significant problem whereby option A limits access to the local and fire and police departments trying to reach homes and businesses.

Option B impacts far fewer acres of forest (35 v 67 in option A). Trees takes decades to establish, provide character to the landscape and host precious animal populations.

Option B has no hazardous material site impacts, while option A has 11.

Ridge Road is also under development as a main arterial road that will serve the same purpose as the ramp proposed in option A. Therefore option A creates duplicative waste.

It makes no sense to me to choose an option as disruptive and damaging as option A. Tucker Hill is a charming (and unique for the area) neighborhood. Option A would significantly change the character of our neighborhood, removing our main entrance and require us to travel 10 minutes out of our way via multiple turns further along the option A route to enter or exit our neighborhood.

Faithfully

Subject: Project 380 Segment-B bypass route.

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should not be considered for the following reasons:

- *It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- *The cost of Segment-A is \$99 million more than Segment-B.
- *It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- *It will also cause the installation of water pipes (ducts) over 380.
- *It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- *It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- *380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor **while also** preserving the economic business and residential vibrancy of our community.

Subject: NO to US 380 Bypass Segment B!

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello, Mr. Endres,

I feel like I know you because I have written to you so many times in the last 9 years about how bad the US 380 Bypass Segment B would be for me, my family and my town, Prosper.

But here we are, fighting as strong as ever to keep this monstrous plan from happening.

Sixteen years ago our family of 6 moved to Prosper. We've been Texans for 38 years, but finally we were able to find that perfect acre and a half of land in a nice, quiet, friendly neighborhood, Rhea Mills Estates. We built our dream home with the intent to never move again. We have thoroughly enjoyed raising our children here, away from the chaos of the big cities.

However, now that reality is in danger from a proposal to build a 380 bypass within sight of our house! This outrageous plan must be stopped! Our small town feel would totally disappear with such a monstrosity invading our peaceful community. Also, I am very concerned that our resale value would be negatively impacted.

Fix 380 on current 380 by making it controlled access, as planned in the master thoroughfare plans of McKinney, Prosper and Frisco. Any bypass that encroaches on Prosper should not be allowed any consideration, and should be rejected in the strongest terms! NO BYPASS IN PROSPER!

Negative impacts of US 380 Segment B:

- 12+ lanes dividing Prosper with the magnitude equal to US 75, located just south of Founders Academy.
- Segment B + Collin Outer Loop would sandwich NE and SE Prosper (AND MY HOUSE!) between 2 major highway thoroughfares.
- Directly affects 10+ current and future neighborhoods, along with my neighborhood, Rhea Mills Estates.
- Materially impacts ManeGait and the wonderful therapy they provide to children and adults with disabilities.
- Directly impacts multiple schools in Prosper, especially Founders Academy & 2 future high schools, one of them on First Street adjacent to the proposed bypass.
- Dangerously impacts student drivers .
- Increased traffic and noise.
- Huge increase in pollution, emissions, poor air quality.
- Safety of our citizens & students.
- Massive utility relocations that are critical to Prosper's infrastructure.
- Substantial lost tax revenue to the town and Prosper ISD.
- Loss of Prosper's cherished small-town feel.

Please stop Segment B! Keep 380 on 380!

Respectfully,

Paula Ford

Good Afternoon-

I hope this finds you well. While no decision regarding 380 and the bypass is going to appease everyone, I do understand the difficult situation you all are in trying to decide. I moved out of the Kensington neighborhood because of the unknown with the by pass. We were fearful that our property value would plummet and everything we worked so hard for would be gone with one road. Did we know 380 was there when we bought? Of course! But who on earth thinks or plans that the road is going to expand to such a great extent? We have moved further into Stonebridge but still are in support of not having the 380 bypass put on 380. As a tax payer spending \$99 million more is irresponsible.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements and minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road, and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by **Wednesday, April 6, 2022** to be included in the formal meeting documentation.

Comments:

I am a 75 year old widowed lady living alone at the address below. My back yard fronts up to 4.5 380. My home is [redacted] to 980 in Stonebridge Ranch. There are several senior citizens living on my street. We do not want to move at our age or cannot afford to move because of 4.5 380 problem. We cannot live in our home with 8 lanes of traffic in our back yard. There is no "noise barrier" that could possibly reduce the noise of all the traffic so close to our home. I would suggest starting at Segment "B" (Coit Rd) at Prosper (TX) which they have had homes on 380. If Tx-Dot does not approve Segment "B" I hope Tx-Dot will have enough money to buy our home at market value.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: Comment on Project 380 Bypass Route

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres, I'm writing to express my strong support for the Segment B option of the Project 380 Bypass Route. I've been a resident of McKinney and Stonebridge Ranch since 1994.

Segment A is projected to cost \$99M more than Segment B. In addition, Segment A goes through a currently heavily developed area of McKinney, while Segment B only goes through currently undeveloped land in Prosper. There is an expected 3-4 year construction cycle that will impact many current businesses and homes with noise and traffic disruption if Segment A is built. Segment B will have minimal impact on homes and businesses.

Since Segment B offers the most economical and least disruptive alternative to both businesses and residents, it is clearly the most logical and responsible option. Please consider my input as you make your decision in the coming days. Thanks.

COMMENT:

My daughter began her therapy at Manegait at age 8 and is now returned to be a volunteer there at at 21. There is no doubt in my mind that Manegait strongly influenced her development and growth over the years.

We have spent countless hours at that facility and are very familiar with the horses and the methodology of how therapeutic horseback riding works.

Putting a highway near this facility will endanger the children.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait - a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

I am in opposition to the 380 bypass segment B for several reasons. I think Maingait is a wonderful rehab facility that works with numerous facets of the North Texas community. Helping young disabled and Veterans of our armed forces. It is my opinion that the Veterans need and deserve our commitment to helping them get back into the main stream of our community. Loud noises and distraction from traffic so close to the facility would deter a therapudic experience and prolong their time needed in rehab. Also the horses need rest also to maintain safety for all worker volunteers and riders which needs a low decibel environment. Please help our Veterans and stop the 380 bypass B plan.

Thank you
Phillip Wildman

Subject: Project 380 Bypass - FOR SEGMENT B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To: Stephen Endres

As a homeowner and citizen of McKinney, TX., **I strongly SUPPORT the Project 380 Segment-B** bypass alignment option. There is a natural floodplain area to follow for Segment B that would not cause nearly the disruption to people and businesses as Segment A, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Segment B would additionally eliminate two 90° turns which seems to also be safer for drivers. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment. One wonders exactly what the reasons would be for not choosing Segment B.

I strongly oppose Segment-A. It should not be considered for the following reasons:

- ❖ It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- ❖ The cost of Segment-A is \$99 million more than Segment-B.
- ❖ It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- ❖ It will also cause the installation of water pipes (ducts) over 380.
- ❖ It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- ❖ It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- ❖ 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Good afternoon,

As a homeowner and citizen of McKinney, TX., I strongly SUPPORT the Project 380 Segment-B bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also strongly oppose Segment-A. It should not be considered for the following reasons:

- It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.
- The cost of Segment-A is \$99 million more than Segment-B.
- It will create an overpass on 380 over Stonebridge Drive and Custer Road.
- It will also cause the installation of water pipes (ducts) over 380.
- It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.
- It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.
- 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you for your consideration and support of Segment B!

US380 Bypass Coit Road to FM 1827: Did you know...

If Segment-A is built --

- It will cost taxpayers 99 million dollars **MORE** than Segment-B.
- At least 17 businesses on 380 will be destroyed.
- 8 lanes of traffic plus four lanes of access roads (two on each side of the freeway) will be constructed near Tucker Hill at Stonebridge Drive.
- 11 sites with hazardous materials and 7 major utility conflicts will need to be addressed.

If **Segment-B** is built --

- It will cost taxpayers 99 million dollars **LESS** than Segment-A.
- ManeGait property will remain untouched.
- No businesses on 380 will be destroyed.
- Zero sites with hazardous materials and 2 major utility conflicts will need to be addressed.

Protect our Stonebridge Ranch way of life **and** improve traffic movement and safety by supporting Segment-B today!

Hello Stephen and Chelsey,

Bill and I wanted to make you aware that our largest donor at ManeGait, The Rees-Jones Foundation, has unfavorably had to put on hold our largest Beacon Project expansion ask of 2 million dollars due to the disruption of Route B by TXDOT. They are very interested in the decision date so they can proceed.

Blessings,
Pris and Bill Darling

Hello Chelsey!

Tricia said you have been collecting data, so I thought I would share this with you. I did send to Stephen in a letter today as well.

ManeGait's largest onsite event is this SAT April 23. Around 2,500 folks will attend. It's a family event - ManeGait Live. Featured in the Dallas Morning News thanks to our sponsor New York Life. The community looks forward to it every year. This week in preparation for the event, all ManeGait riders trail ride on the adjoining use property that we own. We would have to cancel classes if we did not have this property adjoining ManeGait. I have a cute video of another class too, but the file is too large to send.

Blessings, Pris Darling

COMMENT:

Hello Stephen,

Thank you again for the time you all spent with us recently. It is very appreciated by all.

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

While there are no specific PATH accreditation standards with regards to proximity of highways - there are very specific safety requirements and if the center is unable to maintain those safety standards because of traffic or construction noise then the center will lose their PATH accreditation.

Of the 8 centers on the TXDOT list:

- 4 were not accredited centers (Pinnacle, Stable Strides, Dream Catcher Stables, Texas Therapeutic Riding Center) - they are merely PATH center members (does not require any site visits by PATH and no proof of safety standards are required). This includes the center located near the airport.
- 1 of the centers on the list has since gone out of business. (Pinnacle)
- 1 of the centers has since moved from that location because of the noise and traffic (Born2Be)
- 3 are not in close proximity to large highways (Equest, SIRE and Saddle Light)
- Equest is the only center on the list that is close to the size and scope of ManeGait.

On a more personal note, my life continues to be touched and fulfilled watching the ManeGait riders trail riding on our adjoining property with their devoted volunteers and our world class instructors. With spring and the wonderful weather, it has been a daily occurrence that makes me so thankful that we can give them this kind of freedom and give them a gift of being the children God has called them to be.

Blessings,
Pris Darling

Hello Dan!

It was good to meet you a couple of weeks ago. Enjoyed our horsemanship discussion.

While I realize that TXDOT has a thorough environmental study of properties, I thought I would share this with you. In 2015, a representative from Austin, Texas did a survey of our property. A main interest was the creek. Here is some information from the study report:

“Rutherford Branch, a creek that runs year-round, serves as the northern boundary. Rutherford Branch feeds into Wilson Creek, which delineates the eastern

boundary. The property contributes positively to the local watershed as part of the East Fork Trinity sub-basin, which feeds into the Trinity River. It lies on the Trinity Aquifer."

"One of the main hydrological features on the property is a year-round creek, Rutherford Branch, which marks the north extent of the tract. Rutherford Branch feeds into Wilson Creek located along the eastern creek, another hydrological feature on the property. Both creeks are perennial in nature, and provide excellent habitat for aquatic species along with water for wildlife." In addition to our 2 ponds: "water availability for wildlife on the property is excellent." "The tract has excellent water availability and consists of habitats in very good health."

While they speak to Custer being our west boundary, obviously Rutherford Branch runs there too as you observed. I remember the representative being thrilled as an environmentalist that there was no man made pollution in the creek. He stated that it was 100% perfect for wildlife inhabitants and natural growth.

Blessings,
Pris Darling

COMMENT:

I oppose the proposed HWY 380 Segment B because it threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

ManeGait is a calling and answer to a 3 1/2 year prayer for our family. God called us to partner with Him and serve His children in this ministry here on Earth. Recently, NBC aired twice on their own accord my words of exactly what ManeGait is: God's Property. Anyone involved with ManeGait will tell you that His presence is abundant every day.

We look forward to seeing all of you again next week and pray that your eyes and hearts are opened and perspective shifts to what truly makes a community great and what matters in life. That you too choose to stand up for those that quite literally cannot stand for themselves.

Make the right choice again. Keep God's land and community preserved and choose the route you already decided on once before, Route A.

"TxDOT considers the daily operations and special events held at this location to be essential services for at least two vulnerable and protected status populations – the disabled and children ... TxDOT avoided selecting any alignment impacting ManeGait because of potential impacts to the community facility and the services it provides to vulnerable populations."

We have never given up on one rider at ManeGait, and please know we will not now.

In Christ's Hands,

COMMENT:

I oppose the proposed HWY 380 Segment B because it will prevent ManeGait from serving two vulnerable and protected status populations -- the disabled and children (as identified by TxDOT). Specifically:

- ManeGait operations cannot safely operate wedged 50-100 feet between 16 lanes of traffic (4-lane Custer Road and a 12-lane HWY 380).
- TxDOT's comparison of ManeGait with other riding facilities is based on centers smaller in size and scope, and NONE operate this close to a major highway.
- Many ManeGait riders have sensory issues. Construction noise, traffic, and sirens will negatively impact these individuals and disrupt the therapy services they receive at ManeGait.
- Traffic and construction noises and vibrations can scare horses, which poses a direct threat to the safety of ManeGait riders and volunteers.
- The proposed route also goes directly through the land that ManeGait uses for trail rides, fundraising events, and horse pasture.
- If Segment B is chosen, ManeGait will be forced to relocate or suspend operations.

These children and adults with disabilities and military veterans deserve a safe, high-quality, easily accessible location to receive the world-class therapy programs provided at ManeGait.

Our largest onsite event is this SAT April 23. Around 2,500 folks will attend. It's a family event - ManeGait Live.

Featured in the Dallas Morning News today thanks to our sponsor New York Life.

The community looks forward to it every year. This week in preparations for the event, all ManeGait riders trail ride on the adjoining use property that we own. We would have to cancel classes if we did not have this property adjoining ManeGait.

RE: Proposed 380 Bypass

Mr. Endres:

On behalf of the Prosper Economic Development Corporation staff and Board of Directors, please accept this letter as written opposition to the proposed 380 bypass routed through Prosper. In addition to our formal statement, you will be receiving numerous comments from a multitude of concerned citizens. We fully expect them to be seriously considered and ultimately result in the selection of either the **current 380 alignment** or the alternate corridor **east of Prosper**.

Prosper possesses a 25.45 square mile footprint as opposed to McKinney's land mass of 67.7 square miles. Our population count is 31,416 with an anticipated build-out of 75,000. The 2021 Census reports McKinney's population being 206,654 with anticipated growth reaching nearly 350,000. Combining these basic facts with the exorbitant costs of acquiring rights of way, adverse environmental impacts, wetland mitigation, purchase of existing homes and businesses, engineering, and design, **does not** make for an acceptable proposal nor effective use of taxpayer money. In addition, it is preposterous to state that the eight (8) lane expressway accompanied by frontage roads will lend itself to economic development opportunities. To the contrary, the corridor **will destroy** and **prohibit** economic development and growth in our Town.

It appears that because of our population and land mass the route may be *dictated* to our community. We respectfully beg to differ. Unlike some communities adjacent to Prosper, we have spent an inordinate amount of time investing in the planning and implementation of our transportation corridors, one specific consideration has been setbacks along 380. Our Comprehensive Plan demands that those setbacks be implemented by all developers.

Every means available will be utilized to challenge a force feeding of a project which will devastate Prosper. It is this organization's recommendation, on behalf of our residents and businesses, that TxDOT select another route more suitable and advantageous to the efficient movement of traffic.

Respectfully,

David F. Bristol

President, PEDC Board of Directors

David Blom, Chad Gilliland, Don Perry, Jordan Simms, Mayor Ray Smith, Roger Thedford, Director Mary Ann Moon

A RESOLUTION OF THE TOWN COUNCIL OF THE TOWN OF PROSPER, TEXAS, SUPPORTING U.S. HIGHWAY 380 AS A CONTROLLED ACCESS HIGHWAY; CONTINUE SUPPORTING THE TXDOT RECOMMENDED ALIGNMENT AS PRESENTED ON MAY 6, 2019, FOR U.S. HIGHWAY 380 WITHIN THE CORPORATE LIMITS OF THE TOWN; STRONGLY OPPOSING ANY PROPOSED ALIGNMENT CHANGE, INCLUDING THE PROPOSED GOLD OR BROWN ALTERNATIVE SEGMENT B ALIGNMENTS AS PRESENTED AND PART OF TXDOT'S U.S. 380 EIS PUBLIC MEETING ON MARCH 22, 2022, VIRTUAL PUBLIC MEETING FROM MARCH 22 THROUGH APRIL 6, 2022, AND THE SCHEMATIC DESIGN AND WITHIN THE CORPORATE LIMITS OF THE TOWN OF PROSPER; OPPOSING SAID ALIGNMENTS BECAUSE THEY ARE IN CONFLICT WITH EXISTING AND FUTURE DEVELOPMENT ALONG SAID ALTERNATIVES, AS MORE FULLY DESCRIBED IN THIS RESOLUTION; FINDING THAT SAID ALIGNMENTS ARE NOT CONSISTENT WITH THE TOWN'S THOROUGHFARE PLAN AND CURRENT ALIGNMENT OF SAID ROADWAY; AND HARMFULLY DISRUPT THE COMMUNITY COHESION OF PROSPER; MAKING FINDINGS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, since October 2018, the Texas Department of Transportation ("TxDOT") has held numerous public hearings and to consider the feasibility study of expanding U.S. Highway 380 in Collin County to a Limited Access Roadway, or more commonly referred to by TxDOT as a Controlled Access Highway; and

WHEREAS, TxDOT's initial public meetings did not include a bypass option for U.S. Highway 380 within the Town's corporate limits while later plans did include a bypass option within the Town's corporate limits; and

WHEREAS, the Town of Prosper has adopted six (6) prior resolutions in support of the current alignment of U.S. Highway 380 expanding to a Limited Access Roadway (LAR) within the corporate limits of the Town; and

WHEREAS, the Town's Thoroughfare Plan, adopted after multiple public hearings and intensive citizen input, depicts U.S. Highway 380 along its current route; and

WHEREAS, TxDOT presented the TxDOT Recommended Alignment for U.S. Highway 380 in Collin County at a public meeting on May 6, 2019; and

WHEREAS, the TxDOT Recommended Alignment for U.S. Highway 380 in the Town is consistent with the current alignment of U.S. Highway 380 and the Town of Prosper's Thoroughfare Plan.

WHEREAS, TxDOT finalized the US 380 Collin County Feasibility Study Final Report and Implementation Plan in March 2020, including the Recommended Alignment for U.S. Highway 380 along the current alignment within the Town; and

WHEREAS, TxDOT held an Overall Project Update Meeting on October 12, 2020, and then a more detailed Agency Scoping Meeting on October 29, 2020, for the U.S. Highway 380 Environmental Impact Study (EIS) from Coit Road to FM 1827 and at that time introduced Gold and Brown Alternative Segment B Alignments within the Town limits; and

WHEREAS, in Resolution No. 2020-87, approved by the Town Council on or about November 24, 2020, the Town Council specifically and explicitly opposed the Gold and Brown Alternative Segment B alignments because they "negatively impact[ed] existing and planned future developments within the Town"; and

WHEREAS, in Resolution No. 2021-34, approved by the Council on or about July 13, 2021, the Town Council again specifically and explicitly opposed new Gold or Brown alternative Segment B alignments as presented by TxDOT on May 28, 2021, to the Town; and

WHEREAS, TxDOT held an in-person US 380 EIS Public Meeting on March 22, 2022, from 5:30 to 7:30 pm to share the design of and optional alignments in Prosper and seek public comment from the community; and

WHEREAS, the Gold or Brown Alternative Segment B Alignments shown as part of the TxDOT Public Meeting are and remain incongruent with all prior Resolutions adopted by the Town, including the most recent Resolutions No. 2020-87 and No.2021-34, as well as the Town's Thoroughfare Plan approved by Council; and

WHEREAS, the Gold or Brown Alternative Segment B Alignments shown as part of the TxDOT Public Meeting continue to negatively impact both existing and planned future residential and commercial developments within the Town, as more fully described herein and as previously outlined in all prior Resolutions adopted by the Town; and

WHEREAS, the Gold or Brown Alternative Segment B Alignments shown as part of the TxDOT Public Meeting could significantly increase ground-level ozone that would impact at least two (2) environmentally sensitive facilities, as more fully addressed in this Resolution, in conflict with Air Quality guidelines promulgated by the North Central Texas Council of Governments; and

WHEREAS, the Gold or Brown Alternative Segment B Alignments shown as part of the TxDOT Public Meeting fully and wholly, harmfully disrupt the community cohesion of the Town by disjoining a section of the Town's jurisdiction through the proposed rights-of-way take and potential construction of the Segment B alignment; and

WHEREAS, the Town Council further declares its opposition to any alignment of U.S. Highway 380 in the Town that is not consistent with the current alignment of U.S. Highway 380.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF PROSPER, TEXAS, THAT:

SECTION 1

The findings set forth above are incorporated into the body of this Resolution as if fully set forth herein.

SECTION 2

The Town Council of the Town of Prosper, Texas, supports U.S. Highway 380 being a Controlled Access Highway.

SECTION 3

The Town Council hereby continues to express its strong support for the TxDOT Recommended Alignment presented by TxDOT at the May 6, 2019, Public Meeting and as included within the U.S. 380 Collin County Feasibility Study Final Report completed in March 2020 for the section within the corporate limits of the Town of Prosper, thereby acknowledging that the future expansion of U.S. Highway 380 will remain in its current alignment within the corporate limits of the Town, consistent with the Town's Thoroughfare Plan.

SECTION 4

The Town Council expresses its strong opposition to any alignment that is not consistent with the current alignment of U.S. Highway 380 in the Town.

SECTION 5

The proposed Gold or Brown Alternative Segment B Alignments will result in a controlled access highway within very close proximity to ManeGait Therapeutic Horsemanship Rehabilitation Center (ManeGait) and the location on its property where activities are conducted for children and adults with disabilities through the healing power of equine therapy.

SECTION 6

The proposed Gold or Brown Alternative Segment B Alignments will result in a controlled access highway that comes in close proximity to Founders Classical Academy (FCA), a charter school that opened to students in August 2021, the residential communities of Wandering Creek, Malabar Hills, Brookhollow East, Brookhollow Multi-Family, and Prosper ISD High School #3.

SECTION 7

The proposed Gold or Brown Alternative Segment B Alignments will result in a controlled access highway that is within close proximity of a cemetery scheduled to begin construction no later than Summer 2022.

SECTION 8

The proposed Gold or Brown Alternative Segment B Alignments will result in a controlled access highway that will bisect Ladera, an age-restricted senior community in the Town that is currently under construction and anticipated to have homes by the end of the year.

SECTION 9

The proposed Gold or Brown Alternative Segment B Alignments could significantly increase ground-level ozone that would impact at least two (2) environmentally sensitive facilities, FCA and ManeGait, both of which serve children and/or individuals with disabilities and said Alignments would be in conflict with Air Quality guidelines promulgated by the North Central Texas Council of Governments (NCTCOG). Moreover, the Town Council strongly recommends that a risk assessment related to ground-level ozone should be undertaken to determine compliance with NCTCOG's regional initiative to reduce ozone emissions.

SECTION 10

Moreover, the Town Council hereby expresses its strong opposition to any proposed alignment consideration of the Gold or Brown Alternative Segment B Alignments for U.S. Highway 380 within the corporate limits of the Town of Prosper that are not consistent with the Town's Thoroughfare Plan within the limits of the Town.

SECTION 11

Moreover, the Town Council hereby expresses its strong opposition to any proposed alignment consideration of the Gold or Brown Alternative Segment B Alignments for U.S. Highway 380 within the corporate limits that fully and wholly harmfully disrupts the community cohesion of the Town by disjoining a section of the Town's jurisdiction through the proposed rights-of-way take and potential construction of the Segment B alignment.

SECTION 12

The Town Council hereby directs Town staff not to coordinate with TxDOT or any other entity related to the preservation of right-of-way for the expansion of U.S. Highway 380 as a Controlled Access Roadway while there exist alternative options for U.S. Highway 380 within the corporate limits of the Town of Prosper other than on its current alignment.

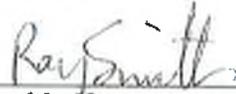

SECTION 13

Any and all resolutions, rules, regulations, policies, or provisions in conflict with the provisions of this Resolution are hereby repealed and rescinded to the extent of any conflict herewith.

SECTION 14

This Resolution shall be effective from and after its passage by the Town Council.

DULY PASSED AND APPROVED BY THE TOWN COUNCIL OF THE TOWN OF PROSPER, TEXAS, ON THIS 29TH DAY OF MARCH 2022.

Ray Smith, Mayor

ATTEST:

Michelle Lewis Sirianni, Town Secretary

APPROVED AS TO FORM AND LEGALITY:

Terrence S. Welch, Town Attorney

SECTION 10

Moreover, the Town Council hereby expresses its strong opposition to any proposed alignment consideration of the Gold or Brown Alternative Segment B Alignments for U.S. Highway 380 within the corporate limits of the Town of Prosper that are not consistent with the Town's Thoroughfare Plan within the limits of the Town.

SECTION 11

Moreover, the Town Council hereby expresses its strong opposition to any proposed alignment consideration of the Gold or Brown Alternative Segment B Alignments for U.S. Highway 380 within the corporate limits that fully and wholly harmfully disrupts the community cohesion of the Town by disjoining a section of the Town's jurisdiction through the proposed rights-of-way take and potential construction of the Segment B alignment.

SECTION 12

The Town Council hereby directs Town staff not to coordinate with TxDOT or any other entity related to the preservation of right-of-way for the expansion of U.S. Highway 380 as a Controlled Access Roadway while there exist alternative options for U.S. Highway 380 within the corporate limits of the Town of Prosper other than on its current alignment.

Subject: Support segment B for US380 project

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi, Mr. Endres

As a McKinney resident, I strongly support Segment B plan for the US 380 project and oppose Segment A.

Segment-A will cost taxpayers 99 million dollars MORE than Segment-B.
At least 17 businesses on 380 will be destroyed.

Plus, in McKinney's Tucker Hill, businesses that front on 380 also will also be impacted.
Segment-A interchange would greatly increase noise and pollution in Kensington Village which is directly in front of where the proposed Segment-A would enter 380

Segment-B has no big turn as Segment-A, which makes the highway much safer.
Segment-B only goes through currently undeveloped land in Prosper while Segment-A goes through a currently heavily developed area in McKinney.
ManeGait property will remain untouched.
No businesses on 380 will be destroyed.

The US380 issue should have been addressed years ago, not until this area has developed.
TXDOT shouldn't resolve an issue and create a much worse problem for people living in this area. We hope you can take people's response into consideration.

Thank you!

Qi Yu

Jawid M

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.

Comments: Please consider Purple or D Route. It has the least disruption and will not disturb natural habitat of various birds like Canadian geese that are present every year to lay eggs and egrets as well. We bought this property a decade ago and have spent countless hours and resources to improve the soil as well as pasture so we can be farmers to grow organic produce and have bee hives. McKinney does not have too much of land left so please consider route D or purple.

Thank you,

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Stephen,

You probably already know why I am writing to you and may ignore this email, but I believe I offer some good input. I have been a McKinney resident for the majority of my life and love the community that it is. I recently moved to Stillwater where I had the time to get involved in therapeutic riding. As an equestrian for over 18 years, horses simply can not thrive in a heavily car trafficked and construction environment. This does not even mention the riders that will be affected by this. The proposed HWY 380 Segment B will distract riders and can even be a danger to them. I oppose the proposed HWY 380 Segment B as it threatens the daily services and special events of ManeGait. I would love to talk to you more about this if you would like and offer insight from a long term McKinney resident and a therapeutic riding instructor. I also recommend that you view a riding session at ManeGait if possible, as it will give you a true understanding of the importance of this program.

Thank you,
Rachel Martin

Rachel Royston
[REDACTED]
[REDACTED]

As an Executive Director of a therapeutic riding center with 14 years in this industry, and a fellow PATH International Region 8 colleague, I oppose the proposed HWY 380 Segment B.

It threatens the daily services and special events of ManeGait -- a key community resource as identified by TxDOT. These vulnerable and protected populations deserve a safe, high quality, easily accessible location to receive the world-class therapy programs at ManeGait.

Not only does it endanger vulnerable and protected populations, but it is highly detrimental to the welfare of ManeGait's equine partners.

Thank you,
Rachel Royston

Subject: Public Meeting US 380 project Coit Road to FM 1827

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

I am not employed by TXDOT/I do not do business with TXDOT and I cannot benefit monetarily from the project or other item about which I am commenting.

I am very much opposed to the Blue Route "C" as it will adversely affect homeowners along with small farms/landowners. For my family, It will take approximately half of our front pasture that is utilized for hay and grazing - which we cannot afford to lose. In addition, the increased traffic will negatively affect the valuation of our ranch. I do not find this acceptable.

The property owner on the [REDACTED] across from us does not reside on their land. On that side [REDACTED], there are no occupied homes - just open pasture.

We prefer that TXDOT go with route "D" as it is in a flood plain and cannot be developed and that route would have the least amount negative of negative impact on the existing homeowners and thier farms/land.

We appreciate your consideration in this matter.

PUBLIC MEETING COMMENT FORM
Proposed Improvements to US 380 from Coit Road to FM 1827
Collin County, Texas
CSJs: 0135-02-065, 0135-03-053, 0135,15-002

The Texas Department of Transportation is seeking your comments on the US 380 project from Coit Road to FM 1827 in Collin County, Texas. Please use the space provided, attaching additional pages as necessary, and mail the form to the address below. This form can also be emailed to Stephen.Endres@txdot.gov. **Comments must be received or postmarked by Wednesday, April 6, 2022 to be included in the formal meeting documentation.**

Comments:

As a concerned Prosper resident,
 I strongly oppose Alignment B
 and support Alignment A
 through McKinney.

As a resident of Whittier Place,
 I have written several email letters
 indicating our opposition to B. These
 refer to them. Property values, noise,
 Maingate + Charter school are too close
 for this.

I SUPPORT Alignment A!
 only

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

- I am employed by TxDOT
- I do business with TxDOT
- I could benefit monetarily from the project or other item about which I am commenting

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Subject: NO to bypass option B

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mr. Endres,

I am writing to you to share my STRONG opposition to the bypass and Option B running through Prosper. I am a resident of Whitley Place and have been for the last seven years and disagree with the bypass running through Prosper for the following reasons:

- 12+ lanes going right through Prosper (8 lanes & 4+ access lanes on either side) with the magnitude equal to US 75, located just south of Founders Academy
- US 380 Bypass Segment B options + approved Collin Outer Loop (4-6 lanes) just north would sandwich NE & SE Prosper in between 2 major highway thoroughfares
- Directly affects and disruptive to numerous neighborhoods: Whitley Place, Whispering Farms, Brookhollow, Christie Farms, Rhea Mills, Gentle Creek, Amberwood, Ladera, etc.
- Prosper properly planned for expansion (380 can be widened!). If other towns didn't plan this can't be put on Prosper
- Directly impacts multiple schools in Prosper ISD: Cockrell Elementary | Rogers Middle School | Walnut Grove High School and Founders Classical Academy and student drivers
- Increased Traffic and Noise
- Materially impacts ManeGait and the wonderful therapy they provide to children, veterans, and our disabled community
- Exorbitant costs of acquiring rights of way, adverse environmental impacts, wetland mitigation
- This design does not make for an acceptable proposal nor effective use of taxpayer money
- School buses having to go on a highway to take kids to school / young drivers for the high school having to deal with highways and high speeds
- Significant environmental impact: pollution, emissions, & poor air quality
- Safety of our citizens and students
- Decreased home values and overall desire of area
- Massive utility relocations that are critical to Prosper's infrastructure
- Substantial lost tax revenue to the Town and Prosper ISD

In closing, I highly oppose Option B and want 380 to stay on 380 or Option A to be considered.

Comments must be received or postmarked by **Wednesday, April 6, 2022** to be included in the formal meeting documentation.

Comments: Please consider Purple or D Route. It has the least disruption and will not disturb natural habitat of various birds like Canadian Geese that are present every year to lay eggs and egrets as well. We bought this property a decade ago and have spent countless hours and money to improve the soil as well as pasture so we can be farmers to grow organic produce and have bee hives. McKinney does not have too much of land left so please consider route D or purple.

Thank you.

Please select each of the following that apply to you (Texas Transportation Code, §201.811(a)(5)).

To: Stephen Endres
Subject: Project 380

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Thank you,
Rancie Bernal

Subject: 380 Alignment / McKinney, Texas

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

I am a resident in Mckinney currently living in Tucker Hill. My wife and I have lived here for almost 10 years.

We have experienced tremendous growth and we have enjoyed it very much.

I reaching out to you regarding the 380 Alignment in McKinney. I very much favor Option "B" and for the following reasons:

Safety- If Option "A" is chosen I am very concerned about safety at the construction site but primarily for the neighborhoods impacted by the construction in particular Tucker Hill. The ingress / egress for Fire, Police, etc., will be greatly affected.

Cost- I am a business man and I watch my cost. Option "A" is almost 100 million more in cost than Option "B"!

That is very significant for Tax Payers to have to carry the burden.

I appeal to TX Dot to select Option "B".

Thank you!

RE: Proposed 380 Bypass

Mr. Endres:

On behalf of the Town of Prosper and Economic Development Corporation staff and Board of Directors, please accept this letter as written opposition to the proposed 380 bypass routed through Prosper. In addition to our formal statement, you will be receiving numerous comments from a multitude of concerned citizens. We fully expect them to be seriously considered and ultimately result in the selection of the alternate corridor east of Prosper.

Prosper possesses a 25.45 square mile footprint as opposed to McKinney's land mass of 67.7. Our population count is 31,416 with an anticipated build-out of 75,000. The 2021 Census reports McKinney's population being 206,654 with anticipated growth reaching nearly 350,000. Combining these basic facts with the exorbitant costs of acquiring rights of way, wetland mitigation, destruction of existing homes and businesses, engineering, and design, does not make for an acceptable proposal nor effective use of taxpayer money. In addition, it is preposterous to state that the eight (8) lane expressway accompanied by frontage roads will lend itself to economic development opportunities. The corridor will destroy and prohibit economic development and growth in our Town.

It appears that because of our population and land mass stature, assumptions are being made that this route may be dictated to our community. We respectfully beg to differ. Every means available will be utilized to challenge a force feeding of a project which will devastate Prosper. It is this organization's recommendation, on behalf of our residents and businesses, that TxDOT select another route more suitable and advantageous to the efficient movement of traffic.

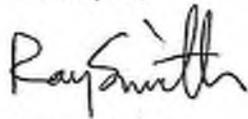

Many of our residents purchased a home after researching the comprehensive plan which includes future right-of-way, parks, school sites and possible zoning changes.

www.prospertx.gov

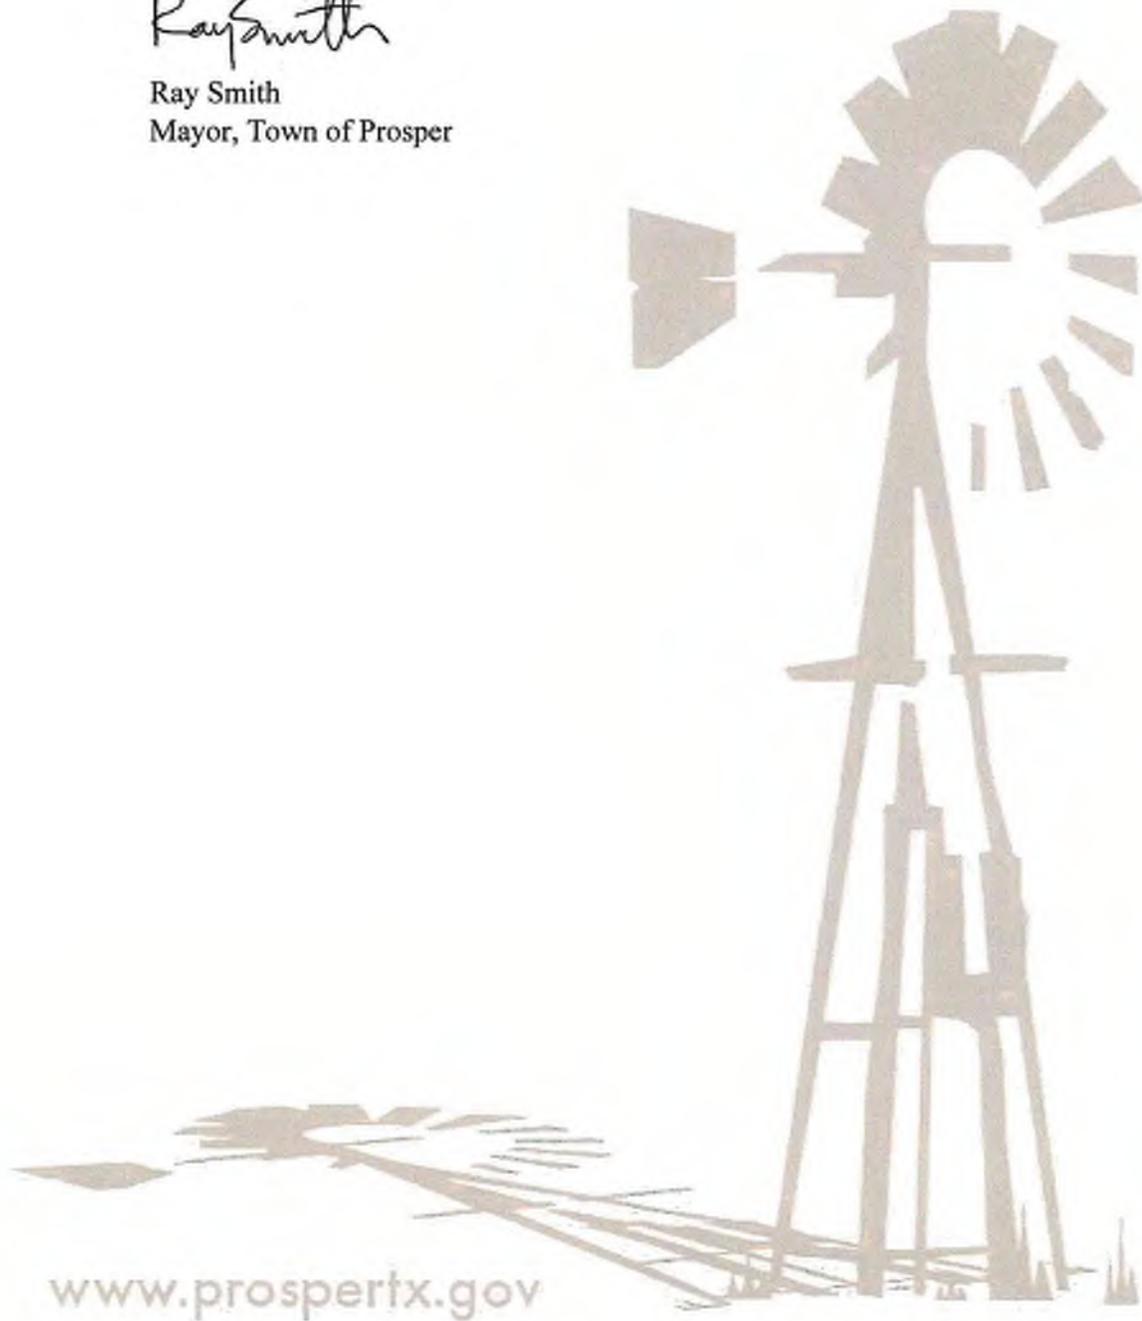

They expect and have a high quality of life and the proposed right-of-way will diminish their expectations if constructed through Prosper.

I urge you to keep the bypass alignment in McKinney!

Thank you,

Ray Smith
Mayor, Town of Prosper

To: Stephen.Endres@txdot.gov
Subject: Support of Option B US 380 project

I am In support for Option B for the 380 project for multiple reasons. Option B costs \$99 Million less than option A (\$589.7M vs. \$688.5M) and saves valuable taxpayer dollars that can be spent on other projects

Option B does not require engineering 2 large aqueducts near residential areas vs. A.

Option B's route uses land not yet developed, making the road more accessible to construction vehicles and less disruptive to existing neighborhoods and businesses

Option B diverts long haul trucker and long distance travel traffic away from local use of University Boulevard/local 380 west of 75, engineering a viable option for both local and long distance traffic and allowing more regional mobility

Option B avoids the significant problem of option A limiting access to the local hospital and fire and police departments trying to reach homes and businesses

Option B does not require displacement of water resources and the local water supply. The 2 aqueducts required for option A would not be necessary with option B

Option B impacts substantially less wetlands, rivers and streams (0.7 acres of wetlands, 1,852 linear feet vs. 4,665 linear feet in option A)

Option B impacts fewer acres of Statewide important farmland (2 vs. 14.9 in option A) Ridge road is also under development as a main arterial road that will serve the same purpose as the ramp proposed in option A. Therefore, option A creates duplicative waste. There would be no easy access to the Tucker Hill neighborhood with option A. Residents would need to travel up to 10 minutes out of their way via multiple turns further along the proposed option A route to enter or exit the neighborhood. Hundreds of families live in this unique and charming local community. Its front porch peace and quiet would be destroyed with option A having a multilane freeway wrapping along the east side of the community and 150 feet from its front doors.

Thank you
Rebecca Brubaker

I am not employed by TXDOT/I do not do business with TXDOT and I cannot benefit monetarily from the project or other item about which I am commenting.

I am opposed to the Blue Route ``C" as it will affect homeowners and small farms/landowners. Personally, It will take 1/2 or our front pasture that we use for hay and grazing not to mention the traffic and devaluation of our ranch.

The property owner on the west side of FM 2933 across from us is absentee. There are no houses that are occupied on that side of 2933. It is nothing but open pasture.

We prefer that TXDOT go with route "D" as it is in a flood plain and cannot be developed and that route would be the least impacted on existing homeowners and farms.

We appreciate your consideration in this matter.

Subject: 380 bypass

This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Stephen,

Good morning. I am a resident of McKinney, specifically Wren Creek of Stonebridge located at [REDACTED]. I am writing you in to inform you I STRONGLY SUPPORT the Project 380 Segment-B bypass alignment option. It is:

1. The least disruptive to businesses with no displacements.
2. Has minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. Especially ours at Wren Creek.
3. The least expensive option by nearly \$99 million when compared to the cost of the Segment-A Alignment.

I STRONGLY OPPOSE Segment-A and it should not be considered for the following reasons:

1. It destroys and removes 17 small businesses west of the 380 and Custer intersection on the North Side.
2. The cost of Segment-A is \$99 MILLION more than Segment-B.
3. It will create an overpass on 380 over Stonebridge Drive and Custer Road.
4. It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive - all which have schools located on them directly off 380.
5. It will cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in the area.
6. 380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

Sincerely,
Rebecca Longmire

As a homeowner and citizen of McKinney, TX., I **strongly SUPPORT the Project 380 Segment-B** bypass alignment option. This option is the least disruptive to businesses with no displacements, minimal impact on existing homes and families living in neighborhoods along and adjacent to US 380. It is also the least expensive option by nearly \$99 million when compared to the cost of the Segment-A alignment.

I also **strongly oppose Segment-A**. It should **not** be considered for the following reasons:

*It destroys and removes 17 small businesses West of the 380 and Custer intersection on the North side.

*The cost of Segment-A is \$99 million more than Segment-B.

*It will create an overpass on 380 over Stonebridge Drive and Custer Road.

*It will also cause the installation of water pipes (ducts) over 380.

*It will decrease traffic safety and increase traffic on Stonebridge neighborhood streets arterial to Highway 380 such as Stonebridge Drive, Ridge Road and Lake Forest Drive, increasing traffic, noise and pollution in our neighborhoods and reducing our property values during construction as those are the only roads leading South from 380.

*It will also cause a large interchange to be constructed at the intersection of Segment-A and 380, which is directly above Kensington Village, potentially depressing home values in that area.

*380 as it exists will be demolished and moved North to be rebuilt so the South side of the new access road will be in the same location as the existing 380 is today.

Segment B is the best option to improve traffic flow in our corridor while also preserving the economic business and residential vibrancy of our community.

COMMENT:

Surely, there is another way to provide HWY 380 Segment B than going through ManeGait, a service to people who have specific needs due to the life challenges they face. With all the land available, why would any organization, public or private, do anything to harm vulnerable people further?

Please rethink the proposed plan and creatively develop one that meets the highway needs AND the needs of precious lives and the people dedicated to serving others. Everyone should work to enhance their lives and support organizations dedicated to improving lives.

Thank you for caring and putting people before pavement.

Rene Townsend

p.s. In case you are wondering why I am writing, I have two miniature horses who do therapy for people in special circumstances, so I know first-hand the positive impact of horses have on vulnerable people. Roads do not do that, only people and trained animals can do that. Roads can be anywhere; these programs cannot.

Stephen,

Can you give a quick call. I am trying to figure out where route B will actually go. I have few lots with mobile homes on Easy Lane. [REDACTED] and I also own Easy Lane. I am wondering how it will affect my property. I cant tell by the exhibits online. Wont let me zoom in and I don't see any details.

Thanks

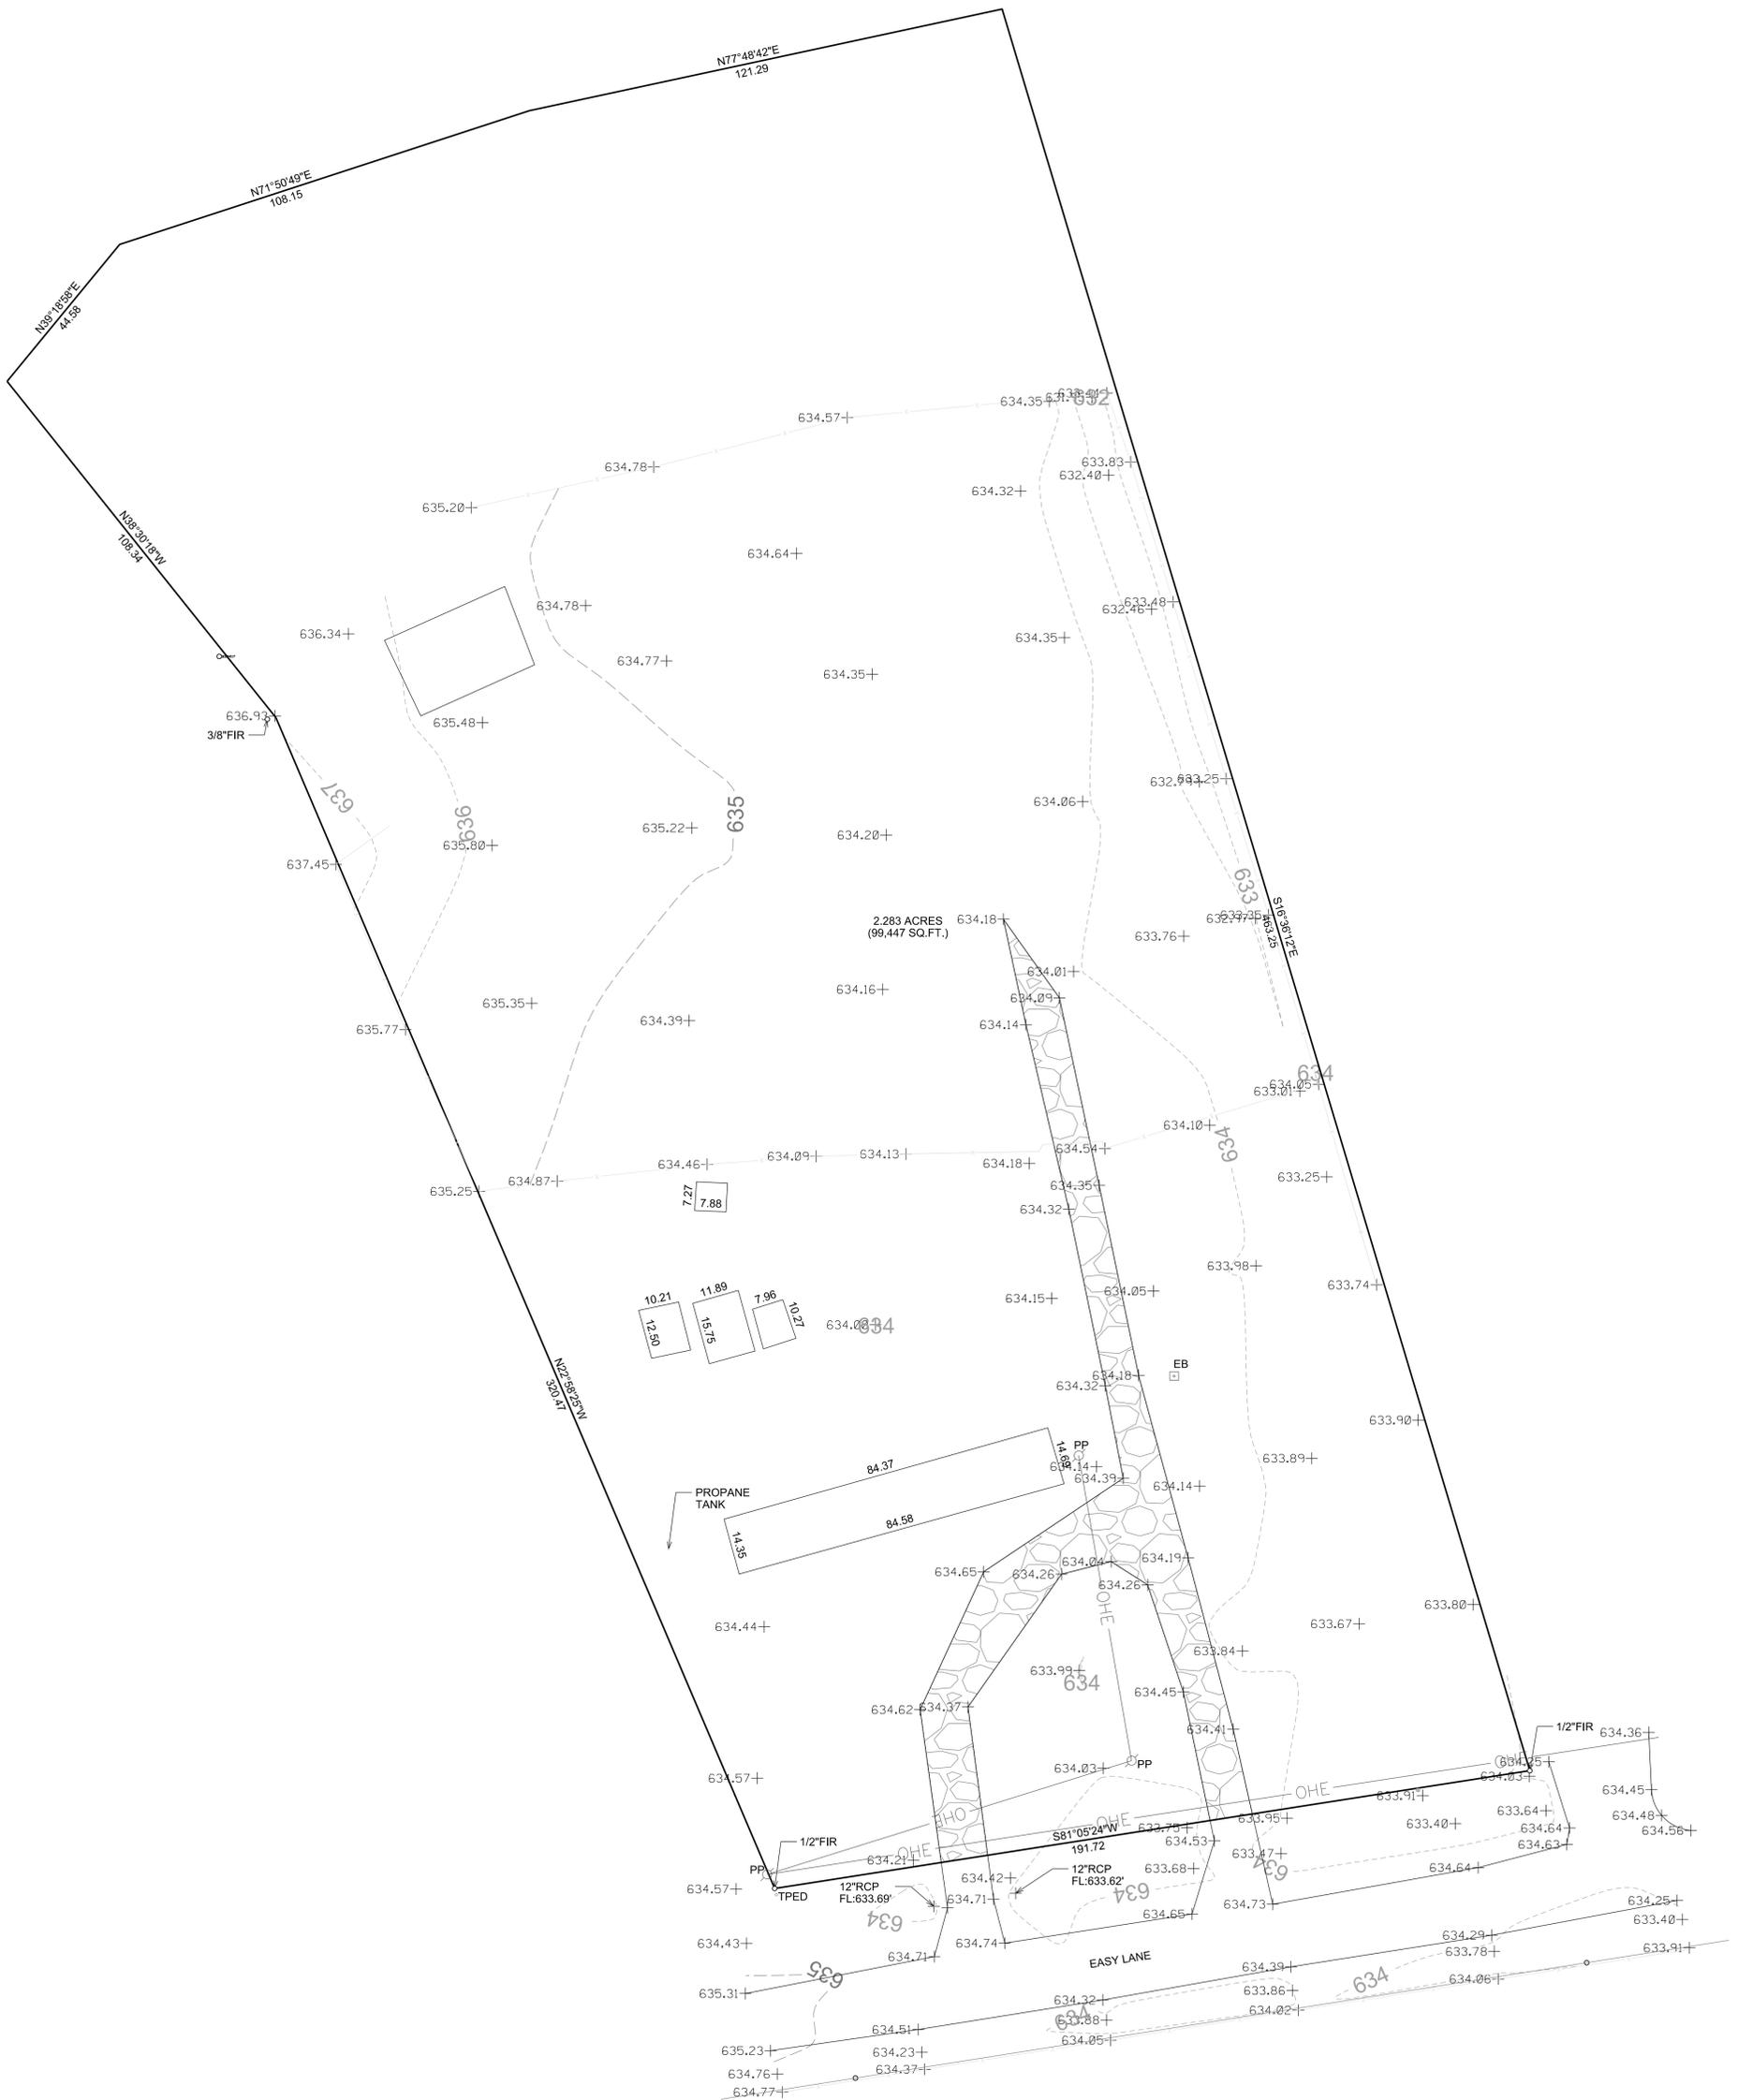

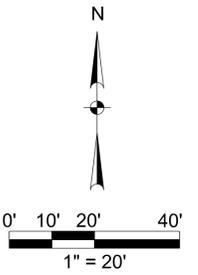

Reno

TOPOGRAPHIC SURVEY
2.283 ACRES
8838 EASY LANE

LEGAL DESCRIPTION OF LAND (PER TITLE):

TRACT 1:

SITUATED In Collin County, Texas, in the John Crutchfield Survey, Abstract No. 206, being a resurvey of part of the 45 acres of land described in a deed from O.F. Cooper to J.L. Neal and wife, Iva Neal, dated May 21, 1943, recorded in Volume 339, Page 72 of the Collin County Deed Records, and being more particularly described by metes and bounds as follows:

COMMENCING at a point in the center of a concrete bridge on Farm Road No. 2478 over the center of Wilson Creek, in the West line of said John Crutchfield Survey, at the Northwest corner of said 45 acre tract;

THENCE SOUTH 88 degrees 43 minutes 43 seconds East passing an "X" marked in the top of the east curb of said bridge at 12.00 feet and continuing in all 45.03 feet to a point in the center of Wilson Creek and in the East Right-of-Way line of said Farm Road No. 2478;

THENCE South 01 degrees 05 minutes 10 seconds West, 313.02 feet along said East Right-of-Way Line of Farm Road No. 2478 to an iron rod set for corner at a power pole used for a fence corner the POINT OF BEGINNING;

THENCE North 01 degrees 05 minutes 10 seconds East along the said East Right-of-Way line of Farm Road No. 2478 to an iron pipe found for corner at 43.49 feet said iron pipe also being the Southwest corner of a 1,000 acre tract of land out of the said 45 acre tract as surveyed by G.M. Geer, Registered Professional Engineer No. 6653, on the 21st day of April, 1977;

THENCE North 86 degrees 41 minutes 26 seconds East 167.82 feet along the South line of said 1,000 acres to an iron pipe to and for corner at its Southeast corner;

THENCE South 84 degrees 08 minutes 21 seconds East 112.01 feet to an iron rod set for corner in an existing fence at the North side of a wire gate;

THENCE along the meanderings of said existing fence as follows:

North 21 degrees 27 minutes 23 seconds East, 157.89 feet to an iron rod set for corner;

North 43 degrees 26 minutes 39 seconds East 205.41 feet to an iron rod set for corner;

North 12 degrees 45 minutes 44 seconds East 44.60 feet to an iron rod set for corner;

North 37 degrees 01 minutes 04 seconds West 32.55 feet to an iron rod set on the South bank of Wilson Creek;

THENCE NORTH 37 degrees 01 minutes 04 seconds West, 75.79 feet to a point in the center of Wilson Creek for corner;

THENCE along the center meanderings of Wilson Creek as follows:

- North 40 degrees 48 minutes 12 seconds East, 44.58 feet;
North 73 degrees 20 minutes 03 seconds East, 109.15 feet;
North 79 degrees 17 minutes 56 seconds East, 127.53 feet;
South 84 degrees 37 minutes 36 seconds East, 106.44 feet;
South 57 degrees 44 minutes 20 seconds East, 104.98 feet;
South 69 degrees 09 minutes 37 seconds East, 192.07 feet;
South 61 degrees 41 minutes 27 seconds East, 128.35 feet;
South 85 degrees 46 minutes 57 seconds East, 110.03 feet;
South 85 degrees 03 minutes 43 seconds East, 88.81 feet;
South 61 degrees 23 minutes 42 seconds East, 175.81 feet;
South 54 degrees 31 minutes 53 seconds East, 80.63 feet;
South 45 degrees 34 minutes 30 seconds East, 54.88 feet;
South 27 degrees 31 minutes 40 seconds East, 10.94 feet;

THENCE South 82 degrees 34 minutes 38 seconds West 85.59 feet leaving Wilson Creek to an iron rod set under an existing fence on the East bank and continuing another 529.40 feet to an iron rod set under an existing fence in a field and continuing in all 1336.00 feet to an iron rod set under an existing fence for corner;

THENCE North 88 degrees 47 minutes 20 seconds West 305.68 feet to the POINT OF BEGINNING; and, containing 10,000 acres of land more or less.

SAVE AND EXCEPT that portion of subject property conveyed to the State of Texas recorded in Deed ccf# 20180208000161810, Real Property Records, Collin County, Texas.

SAVE AND EXCEPT that portion of subject property shown as Tract 2 herein.

SAVE AND EXCEPT that portion of subject property conveyed to Joe Thomas Bolin, Jr. and wife, Linda Joyce Bolin recorded in Deed in Volume 1345, Page 459, Real Property Records, Collin County, Texas.

SAVE AND EXCEPT that portion of subject property conveyed to David Lee Hamill and wife, Kathryn Ann Hamill recorded in Deed in Volume 1401, Page 101, Real Property Records, Collin County, Texas.

SAVE AND EXCEPT that portion of subject property conveyed to Gerald W. Hummell recorded in Deed in Volume 1416, Page 677, Real Property Records, Collin County, Texas.

SAVE AND EXCEPT that portion of subject property conveyed to Thomas Dan Goddard and wife, Cathy E. Goddard recorded in Deed in Volume 1405, Page 145, Real Property Records, Collin County, Texas.

SAVE AND EXCEPT that portion of subject property conveyed to John T. Kelly Sr. and wife, Delores S. Kelly recorded in Deed in Volume 1384, Page 794, Real Property Records, Collin County, Texas.

TRACT 2:

BEING a 1.24 acre tract of land situated in the John Crutchfield Survey, Abstract No. 206, Collin County, Texas, same being that tract of land conveyed to Richard L. Mowry, by deed recorded in Volume 3173, Page 738, Deed Records of Collin County, Texas, and being more particularly described by metes and bounds as follows:

COMMENCING at a 1/2 inch iron rod found corner, said corner being on the East line of F.M. Highway No. 2478 (variable width right-of-way) and the Southwest corner of that tract of land conveyed to William Scott Mays as President and Treasurer, under Pet Heaven, LLC, a Texas limited liability company, by deed recorded in Instrument No. 2011123001271410, Official Public Records of Collin County, Texas;

THENCE North 86 degrees 22 minutes 51 seconds East, along the South line of said Pet Heaven, LLC tract, a distance of 167.69 feet to a 1/2-inch iron rod found for corner;

THENCE South 83 degrees 20 minutes 42 seconds East, continuing along the South line of said Pet Heaven, LLC tract, a distance of 112.09 feet to a 1/2 inch iron rod found for corner, said corner being the Southeast corner of said Pet Heaven, LLC tract and the POINT OF BEGINNING of the tract herein described;

THENCE along the Southeast line of said Pet Heaven, LLC tract, the following 3 courses and distances;

North 22 degrees 14 minutes 12 seconds East, a distance of 158.01 feet to a 1/2-inch iron rod found for corner;

North 43 degrees 03 minutes 20 seconds East, a distance of 204.35 feet to a 3/8-inch iron rod found for corner, from which a 1/2-inch iron rod found bears South 28 degrees 26 minutes 06 seconds East, a distance of 0.95 feet for witness;

North 10 degrees 53 minute 28 seconds East, a distance of 44.42 feet to a 1/2 inch iron rod found for corner, said corner being on the West line of that tract of land conveyed to Reno Marsh, by deed recorded in Instrument No. 20070216000219220, Official Public Records of Collin County, Texas;

THENCE South 21 degrees 42 minutes 49 seconds East, along the West line of said Marsh tract, a distance of 320.78 feet to a 1/2-inch iron rod found for corner;

THENCE South 82 degrees 36 minutes 27 seconds West, departing the West line of said Marsh tract, a distance of 324.35 feet to a point for corner;

THENCE North 83 degree 20 minutes 42 seconds West, a distance of 4.76 feet to the POINT OF BEGINNING and containing 53,897 square feet or 1.24 acres of land.

METES AND BOUNDS (AS-SURVEYED)

BEING a 1,349 acre tract of land situated in the John Crutchfield Survey, Abstract Number 206, Collin County, Texas and being all of that Access and Utility Easement, as recorded in Volume 4266, Page 1065 of the Official Public Records of Collin County, Texas, (O.P.R.C.C.T.), and being more particularly described by metes and bounds as follows:

COMMENCING at a 1/2-inch iron rod found for the northwest corner of said Access & Utility Easement on the old east right-of-way line of F.M. Highway 2478 (a variable width public right-of-way);

THENCE North 85 degrees 13 minutes 12 seconds East, along the north line of said easement, a distance of 81.40 feet to a 1/2-inch iron rod with a yellow plastic cap stamped "GEONAV" (hereinafter referred to as "with cap") set for the POINT OF BEGINNING of the herein described tract;

THENCE North 85 degrees 13 minutes 12 seconds East, continuing along said north line, a distance of 86.42 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 85 degrees 45 minutes 26 seconds East, continuing along said north line, a distance of 116.63 feet to a 1/2-inch iron rod with cap set for corner;

THENCE North 81 degrees 03 minutes 17 seconds East, continuing along said north line, a distance of 907.09 feet to a 1/2-inch iron rod with cap set for the point of beginning of a non-tangent circular curve to the right having a radius of 40.00 feet, whose chord bears North 68 degrees 06 minutes 54 seconds East, a distance of 75.30 feet;

THENCE Northerly, continuing along said north line and along said curve, through a central angle of 140 degrees 31 minutes 34 seconds, an arc distance of 98.11 feet to a 1/2-inch iron rod with cap set for the most easterly northeast corner of said easement;

THENCE South 48 degrees 22 minutes 41 seconds West, along the east line of said easement, a distance of 40.00 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 08 degrees 59 minutes 27 seconds East, continuing along said east line, a distance of 45.99 feet to a 1/2-inch iron rod with cap set for the southeast corner of said easement;

THENCE South 81 degrees 03 minutes 42 seconds West, along the south line of said easement, a distance of 779.22 feet to a 1/2-inch iron rod with cap stamped "TXDOT" found for the most easterly southeast corner of that tract of land described as "Parcel 26" in deed to TXDOT, as recorded in Instrument Number 20180208000161810, O.P.R.C.C.T.;

THENCE North 17 degrees 25 minutes 29 seconds West, along the east line of said Parcel 26, a distance of 1.26 feet to a 1/2-inch iron rod with cap set for the most easterly northeast corner of said Parcel 26;

THENCE South 81 degrees 49 minutes 53 seconds West, along the north line of said Parcel 26, a distance of 81.39 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 80 degrees 46 minutes 47 seconds West, continuing along said north line, a distance of 57.65 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 85 degrees 15 minutes 50 seconds West, continuing along said north line, a distance of 13.69 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 84 degrees 22 minutes 06 seconds West, continuing along said north line, a distance of 4.84 feet to a 1/2-inch iron rod with cap set for corner;

THENCE South 89 degrees 28 minutes 44 seconds West, continuing along said north line, a distance of 170.68 feet to a 1/2-inch iron rod with cap set for corner;

THENCE North 45 degrees 27 minutes 04 seconds West, continuing along said north line, a distance of 68.62 feet to the POINT OF BEGINNING AND CONTAINING 58,745 square feet or 1,349 acres of land, more or less.

SCHEDULE B NOTES:

The following affects Tract 1.

(10e). Access and Utility easement created in those warranty deeds filed 02/20/1981, recorded in Volume 1345, Page 459; filed 08/17/1981, recorded in Volume 1419, Page 889; filed 06/2/1981, recorded in Volume 1401, Page 101; filed 08/07/1981, recorded in Volume 1416, Page 677; filed 10/25/1983, recorded in Volume 1761, Page 226; filed 04/17/1995, recorded in ccf# 95-0025587; filed 03/23/2007, recorded in ccf# 20070323000391840; filed 07/09/1981, recorded in Volume 1405, Page 145; filed 10/27/1983, recorded in Volume 1762, Page 469; 07/02/1993, recorded in ccf# 93-0052989; filed 05/15/1981, recorded in Volume 1384, Page 794; filed 07/24/1987, recorded in Volume 2676, Page 153; filed 10/05/1998, recorded in Volume 4266, Page 1065 and filed 09/29/2014, recorded in ccf# 201409290001056730 Real Property Records Collin County, Texas. (Does affect, as shown on survey)

(10f). Easement granted by Roy G. Roberts, Jr. and wife, Nancy Roberts to City of McKinney, filed 04/05/2019, recorded in ccf# 20190405000360380, Real Property Records, Collin County, Texas. (Does affect, as shown on survey)

The following affects Tract 2.
