1649	Jennifer Sedwick	4/26/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: I usually go south to Virginia/Idledorado and over</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: I think the outer loop needs to be finished to see how that impacts the traffic. And the main east west corridors finished out to the wider lane, but slower traffic. I believe it will greatly ease the congestion.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No not regardless of alignment. I think the alignment is important. Taking it through peoples homes and backyards should not be an option. Now is the time to obtain the land that is still land, therefore negatively effecting the least amount of people.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p>	<p>Comment noted.</p> <p>Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p>
				<p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>
1650	Jennifer Segui	5/18/2018	Electronic Survey	<p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Major roadway through the heart of residential areas with major trucks and congestion</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Stonebridge, Custer, Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: From NT Toll, start the bypass BEFORE Custer and have it run over Commercial areas and AWAY from residential areas...</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Red</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue, Yellow</p> <p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Traffic congestion, safety</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Hardin north from my neighborhood to Wilmott to access 75. If I need to go West, there is no "time saving" alternative route</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Overpass style Hwy (like Tollroads) that don't have stoplights except on access roads.</p>	<p>Comment noted.</p>

				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: I do NOT support a freeway along the pink or green routes on the north side of Wren Creek neighborhood, the current US 380 is just behind our house. The sound barriers and current easement are much appreciated. A freeway built along the pink or green routes would be obnoxious for sight and sound and lower our property value. We recently moved here and paid a premium to live in this great neighborhood and the very desirable master planned community of Stonebridge. If a freeway is built, I strongly request the BLUE or YELLOW route to expand away from current residents. Thank you for requesting community input!	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Construction and congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 1st St/Fishtrap	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More lanes and fewer lights.	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A:	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.

			Q: Do you have any concerns with the existing US 380?	A: No answer provided.
			Q: If US 380 is congested, what alternative routes do you take?	A: No answer provided.
1660 Jenny Little	5/14/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Stay away from Erwin Park!	Comment noted. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: traffic volume and flow; Traffic fatalities, traffic volume, inconsistency in observed speed limits, inability to enforce speed limits, overall poor driving skills.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: County Roads to the north	Comment noted.
1661 Jenny Machalicek	5/16/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Full fledged freeway; I'm all for the freeway! McKinney has thrived building around the existing US 75. Why would current municipalities think they are any different? In fact, this is a case that obviously many residents will be unhappy (NIMBY) but those are the same people that will complain about congestion/wrecks/fatalities...build it. They will come to love it.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes; Abso-freaking-lutely. And, in case you are wondering, I am 52 years old and not afraid of change.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. Very congested/dangerous road.	Comment noted.

				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: 380 is absolutely terrible. Try to stay below 380 any chance I can get. Occasionally we visit Aubrey, Prosper and commute to McKinney weekly. This is one of the most dreaded drives I take due to traffic and the number of accidents on that road.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: limited access freeway or widen the current lanes. As the population expands we have to increase this infrastructure.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes, and if it involves eminent domain with regards to my property I want lots of money.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No concerns west of Hardin.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: I do not support a bypass. I would suggest additional lanes or converting to a freeway with ultra-narrow design in certain spots.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, alignment is the most critical part. I support making a freeway with a much narrower ROW where desired. There are places where a 400' wide ROW (right of way) is not a problem. In front of Tucker Hill is not one of those places. I propose a 200' ROW max in front of Tucker Hill starting from the existing sound wall on the south side. See the intersection of Dallas North Tollway and Bellline road. That ROW is 205' including 3 lane service roads and a turning lane. A 400' ROW is unacceptable in front of Tucker Hill.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, it's too congested.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't have many except east/west streets in McKinney like Virginia or White Street.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build a bypass around the north of the city.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: I'm against every route that would dump traffic directly into Stonebridge Drive. I'm also against any route that will alter Erwin Park in any way.	Comment noted. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDot attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia, Lake Forest, Wilmett, White St. It all depends on where I'm going.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I would be most supportive of 380 becoming a freeway but I feel that TxDot is 10 years behind already.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support 380 becoming a freeway as long as the alternative options 1 & 2 are not pursued any further to dump major amounts of traffic directly into my neighborhood directly on Stonebridge Dr. where we become the major thoroughfare.	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
1692	2018-04-26 10:00:00	Survey	Q: Do you support the building of a freeway regardless of alignment?  A: I do not really support placing a highway where US 380 currently goes through McKinney. A bypass loop would impact less established neighborhoods and businesses, but I understand that there will be a future need to do something  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
1693	2018-04-28 10:00:00	Survey	Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow  Q: Which alignment(s) do you prefer in Farmersville? A: Blue  Q: What is your interest in this study? A: Property Owner  Q: How often do you drive on the existing US 380? A: Daily  Q: Do you have any concerns with the existing US 380? A: Congestion beginning at Hardin and going east  Q: If US 380 is congested, what alternative routes do you take? A: Virginia  Q: What solutions would you suggest in the US 380 Corridor? A: Slower speed Q: Do you support the building of a freeway regardless of alignment? A: No  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway  Q: What is your interest in this study? A: Property Owner  Q: How often do you drive on the existing US 380? A: Daily  Q: Do you have any concerns with the existing US 380? A: Safety - People crash in front of our neighborhood every few weeks it seems. It's scary to wait to turn into our neighborhood at the light, while cars and trucks drive fast me at 60+ mph, striking the car! Q: If US 380 is congested, what alternative routes do you take? A: I can live with the congestion or take and neighboring roads Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted. Comment noted. Any future improvements will be designed to enhance safety Comment noted.
1694	2018-05-14 10:00:00	Survey	Q: Do you support the building of a freeway regardless of alignment? A: No. We need a solution to please all which is safe.	Comment noted.

			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident, And mother	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes! Too many large trucks that throw rocks and other objects damaging cars. I have children and I am nervous taking them on this road. I purposefully go the long way to avoid 380. Also turning out from the businesses along 380 is risky, not to mention trying to get all the way across. It causes many car to sit in the middle. Example is the Walmart and Lowe's area at Custer. Very unsafe!	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Stoneridge Preston Trail Custer	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Service road access. Not combining turning lanes all the way down. People get confused who is turning where. Example by chic filia at 380 and 75. Also an example of not a safe way to get out on 380 and too many cars sitting in the middle like at Custer and 380.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I am not sure that I am educated enough on this to give an answer. I will definitely continue to read and follow this information. I will also review the link attached.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

No answer provided. No answer provided. Comment noted.
1706	Jill	5/15/2018 Electronic Survey	Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink Q: What's your interest in this study? A: Property Owner, McKinney Resident Q: How often do you drive on the existing US 380? A: Monthly	Comment noted. Comment noted. Comment noted. Comment noted. Any future improvements will be designed to enhance safety.
			Q: Do you have any concerns with the existing US 380? A: Very dangerous and too much traffic. Needs to be rebuilt as limited access thoroughfare with out service roads. Q: If US 380 is congested, what alternative routes do you take? A: There are none but Eldorado, Virginia is under construction.	Comment noted.
1707	Jill Alcantara	5/17/2018 Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted. Comment noted. Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly, A couple times a year	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested what alternative routes do you take? A: Whatever google maps tells me to take	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widen the highway, but keep it where it is!	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The worst congestion is usually the I-75 interchange. During commute hours the turn from westbound 380 to Airport is bad and the turns at New Hope and Bridgefarmer going East.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Airport to 121 or Eldorado going South or West, 5 to Wilmethe going North.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: like the blue options off the existing path, with the addition of the yellow section at New Hope and either of the freeway connections down to the I-21 interchange which keeps commuters out of the middle of town.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes, something has to be done. I prefer the options that impact the fewest homes and businesses.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

1712	Jill Helms	5/17/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: The traffic between Princeton and McKinney is ridiculous. It is backed up every morning and every afternoon. The speed limit is also too fast (60 mph) and there is at least one accident a day, some have been fatal.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: From Princeton to McKinney, take Simpson Road, to County Road 400 to S. Bridgefarmer Road to FM 546 to Airport Road to Industrial to Hwy 54 McDonald Street. (I work by Medical City McKinney Hospital.)</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: It needs to be widened, but we need to have a viable option to commute on while it is being widened. I am concerned that the "cure" will be the "killer" for a really LONG time.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Not really, but I don't know what else would really work.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Turn in to Tucker Hill. Just that we only have one entrance to Tucker Hill. That apparently won't be fixed by this matter.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: There is no other entrance.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Please do the bypass as far west as possible. PLEASE consider turning up Custer. It will need to be widened in the near future anyway as Preston Rd. was. People who live off Custer expect it to get larger. All 3 of the plans tonight run Tucker Hill. One even takes the land for building phase. You could also follow the powerlines from Coit to Custer, nobody wants to live under those.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No. I know it will be needed, but when we bought in the area we avoided Preston, Coit and Custer understanding they would expand.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too much traffic, too many lights</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p>	<p>Any future improvements will be designed to enhance safety. Suggestion for lower speed limit has been noted. Speed limits are based off of measured speeds.</p> <p>Comment noted.</p> <p>No answer provided.</p>

1715	Jill Kunde	5/13/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No - just speeding of gravel trucks &amp; construction vehicles</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Wilmet Rd &amp; Frontier Parkway</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill. Better Timed stoplights, truck lane</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Blue, None</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue, I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Congestion especially at 75</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Freeway? Timed traffic lights.... Really timed based on traffic at the time not just random times</p>	<p>Comment and suggestions noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p>

1715	Jill Nugent	5/4/2018	Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes, but no tolls we have enough.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No. The Outer Loop will be coming.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: N/A</p>	<p>Tolling is not being considered as an option for funding.</p> <p>Comment noted.</p>
1717	Jill Nugent	5/4/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Fix 380 on 380- Build above 380 if/where needed.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No- I only support adding levels to the current footprint of 380, no additions, no bypass.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Widen 380</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>Comment noted.</p> <p>The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.</p>
1718	Jill Price	5/6/2018	Electronic Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Only if the alignment stays away from Erwin Park.</p>	

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, I'm concerned someone is going to build a freeway through my neighborhood. Put it further North where there is still open space. Turning 380 into a freeway will just add to traffic not relieve it. I was 380 to stay the way it is through McKinney, I drive it every day and it's not bad at all! Once the light at the tollway is finished it will be much better.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is congested, what alternative routes do you take? A: I don't have an alternative, the only exit from my neighborhood is on to 380. If there is traffic then I try to make my way over to Virginia.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: No, I previously submitted a survey saying I would but that was before I realized that all options would go through my neighborhood in one way or another. Ignore my previous response, I do not support a freeway.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
1719	Jill Schurr	5/13/2018 Electronic Survey	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident, Runner	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
1720	Jim & Karen Rose	N/A Comment Form	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident, Runner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widen 380, leave the neighborhoods alone	Comment noted.

			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Slow moving lots of traffic	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: No real alternatives	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Limited access highway. Fewer stop lights.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes access to 380 during rush hour is some time suicidal	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: None - Just like with it.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Build a freeway	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Reroute truck traffic.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway or Eldorado	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Do what you're doing and work on a bypass.	Comment noted.
1726	Jim Grounds	5/10/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes.  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Pink  Q: Which alignment(s) do you prefer in Princeton? A: None  Q: Which alignment(s) do you prefer in Farmersville? A: None  Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident  Q: How often do you drive on the existing US 380? A: Daily  Q: Do you have any concerns with the existing US 380? A: Congestion is already a problem. This project should have been begun years ago. My primary point of interest is the segment between Custer Rd and SH 5.  Q: If US 380 is congested, what alternative routes do you take? A: If Eastbound, Virginia Pkwy or Wilmeth Rd. If Westbound, either Virginia Pkwy/Rockhill, Southbound Custer Rd, or Northbound Custer Rd.	Comment noted.  Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.  Comment noted.  Comment noted.  Comment noted.  Comment noted.  Comment noted.  Comment noted.  Comment noted.  Comment noted.
1727	Jim Healer	5/7/2018  Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Elevated thoroughfare, definitely interested in realigning northward from just west of Custer Rd round the north side of current development through less populated areas to avoid heavy negative impact to homes and businesses along the existing alignment. On the segment for which I am most concerned (Custer to SH5), I would like to try to soften the impact on existing neighborhoods between Custer and Lake Forest as well as prevent the significant disruption of businesses along the existing alignment such as the new businesses being built on Hardin and 380.  Q: Do you support the building of a freeway regardless of alignment? A: Yes. However, if no realignment, then make it elevated between Custer and SH5. I would prefer realignment northward. In order of preference, focusing on the segment between Custer Rd and SH 5: 1) Blue or Yellow (except modify the northward turn by starting it just west of Custer Rd to make it shallower, curve) 2) Red 3) Green, or Pink  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Blue  Q: Which alignment(s) do you prefer in Princeton? A: None  Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.  Comment noted.  Comment noted.  Comment noted.

1735	Jim Smith	5/15/2018	Electronic Survey	<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: None</p> <p>Q: What is your interest in this study?  A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: -Rate of Speed -Number of accidents @ 380 and Tucker Hill entrance -Lack of warning signs approaching subdivisions that enter 380 L</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Custer Rd Ridge Rd Hardin -before new businesses congest that area</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughput; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.</p> <p>Q: Do you support or building of a freeway regardless of alignment? 			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The lights are not synchronized which causes traffic jams and back ups all along this road. I also feel that large trucks should not be allowed on this road and should be moved further north where it is less populated and less developed.	Comment noted.
			Q: If US 380 is congested what alternative routes do you take? A: none as I live right off of 380 and both entrances to my subdivision are off of 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: The 380 corridor should go through Prosper and Celina on either N. Preston Rd. or the North Dallas Tollway as these roads are already built for heavy traffic. This would completely bypass McKinney and have the least impact to businesses and homes that are already here. It doesn't make any sense to tear down businesses that are currently being built right now on 380 to tear them down in 10 years. It also doesn't make sense to ruin home values of existing properties when Prosper/Celina don't have anything but open land that could be used for this bypass. Preston or the North Dallas Tollway could easily meet up with the outer loop and alleviate the heavy traffic that already exists on 380.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: I would support the building of a freeway if it completely bypasses McKinney. It can easily be done West and North of McKinney as there is plenty of wide open land there and this area will have the least impact to current property and business owners.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Preston to Rockhill to the DNT	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Speed and congestion	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No. Park land should not be sacrificed for the freeway.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Any future improvement projects would include assessment of the potential impact on the human and natural environments. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

				Q: Do you have any concerns with the existing US 380? A: None	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia & El Dorado are parallel with multiple cross streets	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build the Collin County Loop	Comment noted. Alignment options are still being evaluated.
1765	Joe McKee	5/10/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: It is absolutely unnecessary. Blue/Red/Yellow go thru floodplains. The Collin County Loop is still in play. That makes 2 roads within miles of each other.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
1766	Joe Mirabella	5/11/2018	Paper Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Extreme safety concerns. Feels like major accidents almost daily from lake forest to cluster	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: bypass that runs parallel to 380 to the north and actually extends at least to Preston anything short of that just dumps traffic back in to an already congested and dangerous roadway	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.

1770	Joe Seguin	5/5/2018	Electronic Survey	<p>Dear Mr. Endres,</p> <p>(We would like to let you know our family and neighbors on the southern part of CR 338 in Collin County prefer the blue alignment. The pink and green alignments using the current 380 seem non-feasible (though a better option for us) because as your study emphasizes, they do nothing to minimize future congestion expected from growth.</p> <p>The yellow alignment (from your small map) appears to go through or next door to the new planned water resources recovery/sewage facility. <a href="https://www.nntnw.com/projects/new-regional-water-resource-recovery-facility/">https://www.nntnw.com/projects/new-regional-water-resource-recovery-facility/</a> This could possibly be unpleasant for drivers on the new freeway.</p> <p>Please keep us informed as progress continues as this will greatly affect our current rural way of life.</p>	Comment noted. Members of the public can sign up for project updates at Drive380.com.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Current construction. Everything seems to be moving along nicely, but just the usual construction delays are my only current concerns.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Preston or Coit to travel North/South	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I would like to see several additional loops north of 380 to remain a slower thoroughfare with stoplights, max speed limit 45 or 50 to support all of the businesses along the route. By having several loops in the area, businesses can grow around each loop, and we all avoid having multi-lane highway veins with blighted areas immediately adjacent...	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No. I support creating multiple East-West thoroughfares to avoid one high traffic road that will cause blight to its immediate surroundings.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Road is too small to hold current traffic and definitely will be overly congested once new establishments are in place west of 75.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: either go through Stonebridge or select a secondary shopping venue in Frisco or Piano	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widening the lanes, adequate timed traffic lights, better egress from residential housing. Leaving Ridgecrest subdivision you cannot go west on 380, you must go East and make a U turn at the light after crossing 3 lanes of traffic. Totally absurd and dangerous.	Any future improvements will be designed to enhance safety. Traffic light timing noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

				Q: If US 380 is congested, what alternative routes do you take? A: El Dorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Go North where growth is occurring	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not through McKinney as it currently travels. Look at the growth north of 121 after it was created	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: What is your interest in this study? A: Other (please specify). Doesn't let me select all that apply. Nearby resident, commuter	Comment noted.
John Bodilly 1783	4/26/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: On my daily route I have no alternatives because I work at Raytheon which is on 380 and there are no east-west routes north of 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: City needs to build out east-west arterials. There are NO options north of 380. Expand 380 in its current alignment to a freeway. Consider alignments further north than CR-123 (Blondale) that don't run directly adjacent to an existing neighborhood.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No. Three of the proposed alignments pass directly adjacent to my neighborhood (Heatherwood). I DO NOT support building a freeway on one of those alignments.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: White, Virginia, El Dorado	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I prefer a bypass to the north or thru traffic	Comment noted. Alignment options are still being evaluated.
John Brittigan 1784	5/11/2018	Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
			Given the proposed growth of Collin Co., I agree that improvements to US 380 are needed and I support the project. I do NOT support to Pink & Green alignments along the existing corridor. There has been so much development along both sides of University and more being started every day. It would seem that ROW acquisition alone would be cost prohibitive and would do nothing but increase congestion through town. I do support a bypass to the north. The ROW should be less expensive due to less development and gives thru traffic an opportunity to avoid the local traffic. Given the druthers, I prefer the Blue or Yellow alignments. I'm not particularly thrilled with where the Red alignment lies back into the existing corridor. It seems so soon.	Comment noted.

			Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It needs fixing in some areas.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: take a chill pile and relax. Traffic will move and stop being in a rush.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Slower traffic needs to stay in the right lane and move over to let others pass. People need remember that the roads do not belong to them only. They need to share it and respect others.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No, not it's destroying the Erwin Park!	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

1789	John Colarouteo	5/3/2018	Comment Form	<p>I do not support the freeway option. I realize Collin County needs more thoroughfares.</p> <p>Proposed Option #1: create MORE loops to the North of 380. Additional East-West routes will allow businesses to populate those routes, and avoid the possibility of blighted areas immediately surrounding a 350-400' wide highway system. Look at the blighted areas of downtown Dallas to see the effects of multiple high-rise highway systems.</p> <p>Proposed Option #2: put it all underground, much like the "big dig" in Boston. I realize this is even more expensive, but might has largely been removed from areas that were once full of raised &amp; wide highways. Thank you</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p> <p>Comment noted.</p>

				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
1795	John Donnelly	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: the rapid growth of retail along 380 coupled with the always growing population of Collin County will only lead to increased traffic congestion on this major artery	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia St or Eldorado in McKinney	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: a limited access bypass for commuters (not shoppers) to be able to quickly move between cities in Collin County	Comment noted.
1796	John Duease	5/7/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
1797	John Fernandez	5/22/2018	Electronic Survey	<p>Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Blue</p> <p>Q: What is your interest in this study? A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: Yes, the congestion is only getting worse.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: McKinney is lacking infrastructure, thus, our only options are Prosper Trail/Bloomdale and Frontier Trail/FM 1461.</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: McKinney is behind the 8-ball and needs to half further development along US-380. Their actions are ultimately killing options for an alignment away from our home, and Howell/Frontier Parkway/FM 1461 seems to be a more viable option than effects less homes that are already built. BUILD OUT, WILMETT, BLOOMDALE, FRONTIER TRAIL, and get local commuters to use other roads besides US-380. The city current actions are to wait for developers to upgrade infrastructure piece-by-piece, rather than accomplishing this upgrade before its truly needed. When fully developed and upgraded, a Bypass along Bloomdale will be redundant with all other roads including the Outer Loop and other major arterial roads.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: No-a few alignments put a freeway less than 100 feet from my home. (Grove Cove Drive, Heatherwood HOA, McKinney)</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow</p> <p>Q: What is your interest in this study? A: Commuter, Property Owner</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: Congestion surrounding the 380 / Hardin intersection. Seems to be too much on those four corners</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: Only alternative would be Virginia to 75</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Complete the road work further west on 380 first. Thoughtful planning needs to be given to the access of the new businesses surrounding the 380/Hardin intersection. do not feel that widening the road would make an appreciable difference</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink</p>	<p>Comment noted.</p>

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. Noise level. This generated by speeding high performance vehicles w/loud exhaust systems, motorcyclists thinking they are on a major cross, and/or truckers using Jake brakes.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Have NOT experienced congestion that would justify spending \$100's of millions on HWY 380 modifications : Take indirect routing.	Comment noted.
1799	5/17/2018	John girdzus Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Not a traffic engineer. But, would recommend leaving HWY 380 AS IS. Would focus on developing an outer loop/HWY/Bypass north of 380 connecting north Dallas Tollway eastward to HWY 75 and slightly east, then southeas with the purpose of connecting to HWY 121. DEFINITELY would NOT have the connection point at the junction of Stonebridge DR. That junction needs to further west for many many reasons. As a minimum, re-locate the segment between HWY 75 and the North Dallas Tollway further north. The noise and speeds of some vehicles is a nuisance and disturbance to residents residing in the northwest corner of the Stonebridge HOA area and other neighborhoods as well. The local police/Mckinney jurisdiction have done little to curb or limit the current problem. Their response has been ... You can expect it with the rapid growth. From our residence/inside our home, we hear the commercial trucks using their Jake brakes, speeding motorcyclists thinking they are doing a motor cross, high performance autos speeding like they racing at Indy, etc. Checkout the number of accidents between Stonebridge Ranch Dr and Custer Dr. on 380.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: NO!!!!	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Pink, Blue, None	Comment noted.

				Q: Which alignment(s) do you prefer in Princeton?	A: No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville?	A: No answer provided.
				Q: What is your interest in this study?	A: Property Owner, Nearby resident Comment noted.
				Q: How often do you drive on the existing US 380?	A: Daily Comment noted.
				Q: Do you have any concerns with the existing US 380?	A: Congestion, noise & capacity to handle future growth. Comment noted.
				Q: If US 380 is congested what alternative routes do you take?	A: - Custer & Colt down to 121 - Going East/(word illegible) take Virginia Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?	A: Support the idea of a freeway BUT must make sense to existing properties. Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: None Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?	A: None. Need to connect alignment to immediate west of Custer in Prosper Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	A: None. Need to connect alignment to immediate west of Custer in Prosper Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	A: Blue Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	A: Blue Comment noted.
				Q: What is your interest in this study?	A: Property Owner, Nearby resident Comment noted.
				Q: How often do you drive on the existing US 380?	A: Daily Comment noted.
				Q: Do you have any concerns with the existing US 380?	A: Some congestion and future growth impact; Too much congestion, traffic, accidents, and speeding. Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?	A: Custer or Colt down to 121 for work.; None, there are no alternatives. It's the only way in and out of our community. Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?	A: The current alignments do not consider the option of aligning to the immediate west of Custer. This is a currently undeveloped area that would not impact existing home owners. As a resident of Tucker Hill, all of the current alignments directly incur on our existing and planned development.; Bypass to divert traffic or build up roads that run parallel to 380 so it's not the only artery for east/west. Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?	A: Only if the alignment is reasonable. No Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: None, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	A: None, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	A: None, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	A: None, I Do Not Support Building a Freeway Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
		Comment Form	I am a resident of Tucker Hill in McKinney. All of the current alignments through McKinney directly impact the current or planned residential community. I fail to understand why no alignments presented include consideration of a route beginning immediately to the west of Custer and continuing North. There are no current developments in this area. This needs to be strongly considered as opposed to building a highway within 100 feet of existing residential homes. This also would be less expensive as the environmental impact is lower and less cost for right of way.	Comment noted. Alignment options and roadway configurations are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		A: Business Owner	Q: What is your interest in this study?	Comment noted.

1821	john powell sr	5/10/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor? A: Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; NOT on or bordering Tucker Hill.</p>	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.

1823	John Reynolds	5/10/2018	Comment Form	<p>We are against all current alignment proposals that have been recently proposed. There would be the probable loss of homes and devaluation of our neighborhood as a whole. There would surely be health and adverse environmental implications as well. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right of way and noise pollution by means of cantilever access lanes a depressed throughway and SOUND BARRIERS. In addition, if any bypass option is chosen, it must be located AS FAR WEST OF TUCKER HILL AS POSSIBLE WEST OF FUTURE STONEBRIDGE ROAD, not on or bordering Tucker Hill. Please submit my comments into the record.</p>	<p>A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A:	No answer provided.
			Q: How often do you drive on the existing US 380? A:	No answer provided.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
1833	John Wood	NA	Q: What solutions would you suggest in the US 380 Corridor? A: We are against all current alignment proposals that have been recently proposed. There would be the probable loss of homes and devaluation of our neighborhood as a whole. There would surely be health and adverse environmental implications as well. If any freeway construction occurs on ten existing 380 footprints adjacent to Tucker Hill, it must impose minimal right of way and noise pollution by means of cantilever access lanes a depressed throughfare and SOUND BARRIERS. In addition, if any bypass option is chosen it must be located as far west of Tucker Hill as possible west of future Stonebridge Road, not on or bordering Tucker Hill. Please submit my comments into the record.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with Federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barrier would be shared with the community before preparing the final design.
		Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident, Comparison to NCTCOG and Collin County studies	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: 3 agencies appear to be trying to resolve the congestion on US380 without the knowledge of each other	Comment noted. TxDOT has been working with local municipalities as well as regional partners such as NCTCOG to develop solutions to address the need to improve US 380.
			Q: If US 380 is congested, what alternative routes do you take? A: FM982 to FM546 to FM3286 to FM1378	Comment noted.
		Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: The NCTCOG Spur 399 Extension, tied to the TxDOT US380 west of the Airport and Farmersville Bypass	Comment noted.
5/4/2018			Q: Do you support the building of a freeway regardless of alignment? A: Of course not. The alignment, whether through homes or riverbeds, is the most important aspect.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.

1834	John Worley			<p>Q: Which alignment(s) do you prefer in Princeton?  A: None  A: Blue</p> <p>The latest TxDot US380 Study Plan for US380 through Collin County Plan is shown below. This drawing does not include roadways currently being planned by NCTCOG.</p>	Comment noted.
		5/1/2018	Position Paper	<p>The additional roadways under study by NCTCOG will have a significant effect on the traffic flow for US380.</p> <p>•It appears (to me) that NCTCOG is trying to resolve the traffic congestion problems on US380 east of McKinney without touching US380. (See map and discussions on the next page.)</p> <p>Is there a lack of coordination and/or communication problem between the two groups? Would it be more efficient if TxDot and NCTCOG (analyzed and) communicated about the same roadways</p> <p>I laid the (scaled) TxDot plan over the latest NCTCOG plan in the drawing below. Note the complexity of options under consideration in the TxDot plan over the latest NCTCOG plan. My home is located where the Red Star is shown. I will be directly affected if I will be up front about this. I marked my home over the TxDot plan. The drawing below is an expanded version of the TxDot and NCTCOG plans overlaid. It might be a little congested, so I also added numbers to identify the location of the issues I have enumerated.</p> <p>1 The latest NCTCOG plan has moved the eastern part of the Outer Loop west, to follow the SH78 ROW.</p> <p>2 The NCTCOG plan includes the Spur 399 Extension (blue dashes). This roadway will absorb the massive traffic flow that uses US380 to Airport Road to FM546 to SH5/SH12/US75.</p> <p>•The Spur 399 Extension might take enough of a load off US380 between Airport Road and Princeton to reduce the need to widen US380.</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: congestion, especially with new development, especially in McKinney at Hardin and at Tollway</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Virginia Parkway, or Eldorado My son drives to UNT for school; there is no alternate route</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: bypass to north</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: not sure of question</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment, The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: What is your interest in this study?  A: Business owner, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p>	<p>TxDOT and NCTCOG are working closely together on this feasibility study. TxDOT is using NCTCOGs travel demand model to project future traffic volumes. NCTCOGs model contains all future roadway plans in Collin County. The model matches the Metropolitan Transportation Plan which NCTCOG develops for the DFW region. The travel demand model uses future demographic projections, roadway capacity, and travel time calculations to project future volumes on all roads. TxDOT is fully aware of NCTCOGs planning study and vice versa. The USACE will not allow for a new location bridge across Lake Lavon. We are proposing to widen US 380 in same location with frontage roads which would provide alternative routes if general purpose lanes are closed for an incident.</p>

		5/15/2018	Email	<p>Stephen:</p> <p>I am under contract on a home in the Tucker Hill community located on 380 just east of Custer Road. I have recently seen the proposed alignments. The alignments that improve 380 in its current path seem to show that the Southern portion of the neighborhood would be within the right of way, is this accurate? Do all the "blue" alignment impact the Southern entrance to Tucker Hill?</p> <p>Also, once alignment is selected, what is the anticipated timing of the actual improvement project?</p> <p>Thank you,</p> <p>Jon Bolen 214-386-6903</p>	<p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p> <p>It will most likely take 10 to 20 years before most of the projects are constructed. It is possible that the highest priority areas could start construction in 6 to 9 years.</p>
				<p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: It's getting busier</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p>

1845	Jon Dell'Antonia	5/17/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: Virginia Pkwy or White avenue, El Dorado Pkwy, Hwy 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Move the blue or red route west past Custer road to enter Hwy 380 West of Wainhart at Custer and 380. Do NOT attempt to widen 380. The disruption to homes and businesses would be enormous. Building an interchange at 75 and 380 would be a huge undertaking removing many businesses. Concentrate on alternative routes like Bloomdale road which has much less impact on homes or businesses. , Build the outer loop now and see what impact that has on 380 traffic.; Yellow alignment appears to be the most economical and least disruptive to current residential homeowners.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment, None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue, None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Blue, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Yellow, I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: I live on US 380, and am concerned about how future loads will affect area traffic.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: I live on US 380, and there is no direct alternative. When there are accidents, I route to Virginia or up into Prosper</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Bypass at least two miles north of the current 380. Changing 380 itself east of Custer would severely damage countless businesses and neighborhoods such as Tucker Hill, which has been an example of how to build traditional neighborhoods in Dallas suburbs.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink, Blue, Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink, Blue, Yellow</p> <p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Yes, the center turn lanes are unsafe and four lanes isn't enough to handle the traffic during rush hour.</p>	<p>Comment noted.</p>
1846	Jon DeShazo	5/18/2018	Electronic Survey	<p>Q: What alignment(s) do you prefer in Farmersville?  A: Green, Pink, Blue, Yellow</p>

			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: I travel daily between US75 and 2nd st and si/4th st. Too many people are travelling on 380 now. With the added stop lights it has added more congestion. The center turning lane is used by impatient drivers to pass traffic causing more accidents. Driving on 380 is like having stop lights in the middle of a busy freeway. Going from 60mph to dead stop because of traffic lights and congestion. And there is other optional route to take once stuck in the middle of traffic. No regular streets and cross streets leading away from 380 like a preston, custer, colt etc. The speed limit is too high for this busy roadway as it is right now.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Only option for me is to take the winding FM roads from airport dr that lead to bridgefarmer. Or I go out of my way and take bethany past lake lawn and come out past my house by 2th street. Nevermind the 2 times 380 was completely shut down for hours due to fatality, and we could not get home.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: East of US75 380 still isn't as big as 380 going into mckinney. So, speaking of where I live on 380 I think 2 options would work. 1- Keep its current alignment and make it bigger 6 total lanes with normal sized medians with Dedicated turning lanes. Just like it is in McKinney. Lower the speed limit to 45 mph, add more traffic signals Especially at community entrances my Cypress Bend Community still does not have traffic signal. And make more cross streets and cross roads. These are not small country towns any more so it needs more roadways everywhere. All the while making an additional major freeway/highway either north or south of 380 or east/west traffic and major freeway running north/south. I saw on the news this is the plan anyways, for 4 more major freeways. 2 - do whatever you want. I know whatever will happen will happen regardless of what input we have.	Comment noted. If the decision is made to construct improvements, TxDOT does make every effort to minimize impacts to traffic flow during construction of its projects.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Public input is important to shaping this feasibility study. Comment noted.
1864	Joseph Delarosa	5/15/2018	Electronic Survey

			<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p>	Comment noted.
			<p>Q: What is your interest in this study?  A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Traffic is overwhelming. No flow and constantly backed up. Speed limit is too high with so many traffic lights. Dangerous with lots of accidents</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: No alternatives available</p>	Comment noted.
1876	Joshua Strain	5/15/2018 Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A: Turn into Highway</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Not sure what that means</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green</p>	Comment noted.
			<p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: It's congested in certain points, mostly East of US 75.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Wilmett between US 75 and McDonald. Otherwise, I use 380.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Pink and Green alignments only. ... improve 380 on 380. Don't build a highway through people's homes. There are so many terrible parts to DFW, 380 doesn't have to be a flawless route. Widen it up East of US 75, build an overpass over Hardin, Lake Forest, Custer, and Coit, and you will solve many of the issues.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No. Building the bypass using the Red, Blue, and Yellow alignments will hurt our property values. Please reconsider these routes and just improve 380 as it was placed when EVERYONE bought these homes.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p>	Comment noted. Alignment options are still being evaluated.  Any future improvement projects would include assessment of the potential impact on the human and natural environments.
1877	Josiah McDaniel	5/6/2018 Electronic Survey		Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: What is your interest in this study? A: Commuter	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: Eldorado	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Fix 380 on 380	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No bypass	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes I drive ever day to my daughter's house and she lives off 380. The speed limit is already too fast. Making it a freeway would just increase the speed and make me have to cross more traffic to get where I need to go. I do not want a freeway.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: None, the only entrance to the neighborhood I'm going to is off 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Build the freeway further North where there is open space not through the middle of our town.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No, I do not support building a freeway. Local people do not need it and we don't want it through our neighborhoods.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.

1895	Judy Glazer		NA	<p>I am writing in reference to the proposed expansion of 380 in Collin County. I own a farm that sits directly on the path of the red alternative, and within a quarter mile of the yellow option. I am an organic farmer raising food for my family and other customers since 1981. I was among the first class of certified organic farmers in Texas and the first certified organic farm in Collin County. The red and yellow options for expansion of 380 would place an undo burden on my property in the name of growth. Please consider my situation as you make plans for the future of Texas.</p> <p>Dear Mr. Endres:</p> <p>Thank you for the opportunity to express our concerns regarding the proposed improvements to US 380 from Denton County Line to Hunt County Line in Collin County. My family appreciates the time and effort that you and others are putting into researching the best option to solve the congestion and build to accommodate future growth while considering the least impact on land owners. For 35 years, I have owned and framed 350 acres northeast of McKinney. Our farm specializes in strict organic methods reclaiming land that had fallen fallow from years of cotton. When I established The Little Farm in 1981, it was well before the interest and demand for organic foods came around. From the very beginning I had the farm officially certified as organic which was the first of its kind in Collin county and among the first in Texas. Over the years, I have raised organic chicken, cattle, pigs, bees, sheep, turkey, and pecans. Additionally, my gardens and orchard produce a wide variety of organic vegetables and fruit. Our farm not only provides food for our family, but is also provides for other families and customers as well.</p> <p>The Red Option being considered for the US 380 expansion would divide the property and destroy the farm as it exists, leaving it impossible to farm. Currently situated on the farm are several barns and three houses all of which would be negatively impacted. We know of at least one of those houses would be completely taken out.</p> <p>Likewise, the Yellow Option would bring the new construction very close to one of the houses which is currently occupied. This, too, would have a negative impact on farming the land as we have done for so many decades.</p> <p>This farm has been in our family for three generations and I have worked hard to build the organic farm into what it is today. We would like to meet with you and any other TxDOT officials to visit in more detail about our concerns. We would like to meet with you and any other TxDOT officials to visit in more detail about our concerns. We would be very interested in looking at the maps together and discussing other alternatives or combinations of the various options that you may be considering.</p> <p>Thank you for considering our request. We look forward to meeting with you in the near future.</p> <p>Very truly yours,</p> <p>Judy Glazer</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A:</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A:</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A:</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A:</p>	<p>Comment noted. Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The backup of traffic between 75 and Skyline, where we live.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Wimlett	Comment noted.
1901	Julia	5/16/2018 Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Traffic light sync	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Unsure	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many businesses were allowed to build right up to 380 not leaving any room for service roads. It is nicknamed death 80 for a reason. Most dangerous road ever, especially for young drivers trying to commute to UNT.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: take Eldorado and pay the toll to get to 135 and take that North to Denton.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: It needs to move. This plan should have been completed years ago and businesses should not have been allowed to be built next to a road that is suppose to be a highway!!!	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No!!! My son is a Boy Scout I do not want this to go through Erwin park!!!!	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Other (please specify). Homemaker. I'm all over town, shopping, running errands, and going to meetings.	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. It can be hazardous trying to exit business parking lots in McKinney.	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: As a road with speed limits 60+mph, the route needs to have right-hand turn lanes. Suddenly stopping from a high rate of speed to make a right-hand turn invites accidents from inattentive drivers. Additionally, the speed limit is too high.	Any future improvements will be designed to enhance safety. Suggestion for right turn lane and speed limit noted.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
1908	5/14/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: I am not opposed to the bypass with any of the current alignments. Opposed to any change in the proposed alignments that brings the bypass west of Custer Road as it reconnects to 380. Please consider the impact of the proposed bypass on First Street, Prosper Trail and Frontier Parkway in Prosper due to "cut through" traffic to connect with the proposed bypass versus expanding the current alignment of 380	Comment noted.
Julie Bomgren	5/14/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow, None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: what about the current homes, and what about the home values. Or other traffic that you will be causing closer to residential areas	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is congested, what alternative routes do you take? A: It is never that bad the big highways like 75, 635, and 35 and so on are worse	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Speed limits, Traffic light readjustment, median	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes if it would be in the interest of homeowners and the current community that is there	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: too crowded now	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: freeway	Comment noted.
1921	June Smith	5/4/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Erwin park Mountain bike trail	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Mostly the frequent lights on the west side of 75	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: There really aren't many that I know of.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: If a "bypass" is made, I would like to request that it avoids the Erwin Park trails and parks area. This is a fantastic attribution to the McKinney area. Would hate to see it go due to a road...	Any future improvement projects would include assessment of the potential impact on the human and natural environments. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
1922	Justin	5/15/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Not really... To be honest... I think if eminent domain is necessary for this to happen, I would disagree entirely.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

1925	Justin Gemmell	5/6/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: White, Virginia, El Dorado</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: An elevated bypass system on 380 from a few miles east of 75 to a few miles west of 75, similar to what Austin has done on I-35/Hwy 290. You maintain the original ground level 380 so there is not loss of business to those, but allows parties doing business a few miles down the road to not have to travel miles out of their way on a bypass or sit through all the traffic lights in the 380/75 area. This limits the amount of new land purchased as well as minimizes the disturbance to the existing residential areas or the beautiful countryside north of 380.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: only is it stays on the existing 380</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Monthly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A:</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A:</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p>	<p>Comment noted.</p>
1926	Justin Hicks	5/7/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Commuter</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Heavy traffic flow. Cars travel within CTWIL at speed when traffic backs up; causing dangerous conditions for cross traffic.</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

1930	5/19/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident, Conserve Erwin park	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congested, slow moving traffic through McKinney, too many accidents happening; too many lights	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia, Hardin, Eldorado, White	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Less traffic lights, more lanes, less lights	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: 75 to Custer Road getting too congested. Businesses are being added without road improvements.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer Rd.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make 75 to N. Tollway a freeway.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes, except do not create a bypass. Fix 380. Make McKinney responsible.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Commuter, Business Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Increasing traffic volumes	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I do not have any. live right off 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge drive; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
	K. Scott Williams, DDS	5/13/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Tucker Hill's position & my position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge drive; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Lights timed horribly. Terrible traffic on 380. Time consuming to get anywhere. Accidents.	Any future improvements will be designed to enhance safety. Suggestion for synchronized traffic lights noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Side streets. Virginia and Louisiana. I'll take anything to avoid 380 if it's contested.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: For the most part	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

				Q: What solutions would you suggest in the US 380 Corridor? A: Complete and improve the north/south roads. Build the Outer Loop for the projected growth to the north. Would love to get trucks off of 380 and slow the speed. Create more turn lanes at major north/south streets. 380 could be like Northwest Highway is in Dallas on either side of 75. It has traffic lights and is not a freeway but traffic moves along satisfactorily. Q: Do you support the building of a freeway regardless of alignment? A: No!! 380 does not need to be a major highway. The Outer Loop needs to be developed with Hardin, Lake Forest, Ridge and Custer becoming wider connectors.	Comment noted. Alignment options are still being evaluated.
1959	Karen Karch	5/16/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Please don't mess with Tucker Hill! All your proposals for 380 relief would destroy this rare neighborhood that truly epitomizes McKinney as "Unique by nature." We "joyfully" open our community to the entire city with Brunchfest, Pumpkinville etc and these events will be hurt if a by-pass or 380 major freeway turns our neighborhood into an enclosed p erased by concrete walls! Emotion aside, spending millions to widen 380 when the major growth will be north makes no sense. I believe funds would be more wisely used to expand and improve [existing roads - Custer, Ridge, Lake Forest, Hardin and build Stonebridge Dr - to connect to the [word is illegible] thinking Outer Loop. Improve 380 safety by 1) lowering speed limit to 45; 2) better time traffic lights; 3)add more turn lanes at major intersections, especially Hardin east; and 4) remove truck traffic or "at" east limit it to one lane on 380. If you totally disregard our pleas then at the very least, 1) if 380 "must" be widened then depress it in front of Tucker Hill and complete Stonebridge Drive so we have a "better" exit. It is less than ideal to have school buses and emergency vehicles entering a major "highway" 2)if a by-pass is the chosen option then place it as far west of Tucker Hill as possible. The current planned path would completely halt further development of our neighborhood "and" create noise, pollution and unsightly views for many existing homes.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.

			WHAT'S UNIQUE about a PARKWAY? A parkway MINIMIZES the amount of land required. The access to a parkway is very very limited. Interchanges are efficient and aesthetically nice. Landscaping maintains the park-like beauty that makes this a VERY UNIQUE option There are no frontage roads. I repeat - there are no frontage roads!!! <b>WHAT ABOUT INTERCHANGES</b> Here's where it gets interesting. I know in Texas we're all about huge overpasses and major interchanges. However, I propose considering alternatives. I've attached photos of two different type of interchanges - both of which I've experienced and seen firsthand the IMPROVEMENT it has made in previously congested areas. The first is a ROTARY interchange. I like this one most because it maintains a complete thoroughfare on the "Parkway", while allowing the access via an elevated roundabout. (a Note on roundabouts: I come from an area where we made the conversion from regular traffic signal controlled intersections (with huge traffic back-ups and accidents) to Roundabout replacements. The difference is ASTONISHING. The backups at rush hour almost completely disappeared! Traffic moved slower at the intersections but generally keep moving. The only issue we observed was the number of crashes, instead of being the major T-bone wreck, were more low impact crashes with folks driving too fast around the curves (the curves DO make you slow down). A similar design of the curves could be used.	Comment noted.
NA	Email		By having the Roundabout OVER the main thoroughfare - the "bypass" traffic keeps moving. The second is a "Diverging Diamond interchange". This exists at the intersection of 166 and US Rt. 15 in Prince William County Virginia. It has taken a while to get used to - and it does mess with your head a bit. I've seen still SOME back up at rush hour - but it is far less than it was before. I like this option less because it's not very aesthetic - just looks like a scrambled overpass. So - to summarize... THINK OUT OF THE BOX - if you're going to create a bypass (which it increasingly looks like you will) - gather some design proposals from engineers for the option of building a UNIQUE Parkway. The interchanges could be at the Bloomdale Road intersection (north of Tucker Hill), at Lake Forest and at Hardin (and of course US 75) Building out Lake Forest, Wilmette, Hardin and Stonebridge and Custer to their maximum lanes would allow for the movement of traffic within the neighborhoods and feed up to the Parkway that way. The main parkway could still be designed to be 6 lanes (utilize the landscaped median until it needed to be expanded) No frontage roads!!! (which require more land and beg for commercial development) Landscape design it to make it beautiful and quiet (install tree and hedge covered berms between the road and the subdivisions to control noise and pollution and eye-sores) Make it LOOK like a park - <b>MAKE IT UNIQUE BE NATUR[E]!!</b> I think you can "sell" this idea much easier than what's on the table now. Please let me know what you think. Sincerely, Karin Kerby 5236 Pinewood Dr 703-728-7059 ps...maybe this would be a cheater, and have \$S left to IMPROVE 380 as well! :)	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: trucks not stopping, congestion, turn lanes (not enough)	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Wilmette to 75	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: More turn lanes, over (or under) roads at some intersections	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.

			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Q: What solutions would you suggest in the US 380 Corridor? A: Heavy traffic, car accidents, traffic flow	No answer provided.
			A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway; and sound barriers.; Upgrading it to support more traffic, WITHOUT destroying residential communities; Road improvement to handle high volume traffic Q: Do you support the building of a freeway regardless of alignment? A: Yes; No, prefer alignment to the south where Tremont intersects 380	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
1975	Katherine Morgan	5/10/2018	Electronic Survey Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, None, I Do Not Support Building a Freeway	Comment noted.

			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: Please do not infringe upon Erwin Park	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid/minimize impacts to parks as much as practicable.

1986	Kathy Dellinger	5/14/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: We need a lower speed limit from us before Harden to Custer on 380. If the speed limit can be 45 closer to 75 highway then it should be adjusted up to Custer because of all the subdivisions along that path. Turn in lanes... traffic is going so fast, most speeding it gets to be very dangerous trying to turn into ones subdivision. More stoplights, they may be close together but it's been done in Denton. Definitely need more lighting, very difficult to see at night when it's so dark. And you get the glare from the oncoming traffic, very dangerous. I we had sidewalks from Prosper to 75 we can definitely cut down traffic by walking... especially now that 380 is getting shops and theaters, we can walk to those destinations!</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: As long as it is not in a McKinney residential area!</p>	<p>Comment and suggest for lower speed limits, turnlanes, and additional lighting noted.</p> <p>Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p>
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p>	Comment noted.
				<p>Q: What is your interest in this study?</p> <p>A: Commuter, Nearby resident</p>	Comment noted.
				<p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p>	Comment noted.
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too many large tractor trailers and commercial vehicles which make unsafe for commuters.</p>	Comment noted.
				<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: There are not really many east &amp; west in the mckinney area.</p>	Comment noted.
				<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Create a commercial route to move all the big trucks off existing 380 or vice versa. Create multiple east- west 4 lane options, but still separate commutes and passenger vehicles.</p>	Comment noted.
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: To grow and be able to drive, we have to! For anyone misplaced give them FMV PLUS 35%. It's not just the \$\$\$ cost, but memories and intangibles that you cannot ever put a price on.</p>	Comment noted.
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A:</p>	No answer provided.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A:</p>	No answer provided.

				<p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	Comment noted.
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: The concrete medians are way less safe than the open center lanes were. We have people making crazy u turns and darting across the highway now. Plus? Nowhere to break down!</p>	Comment noted.
				<p>Q: If US 380 is congested what alternative routes do you take?</p> <p>A: I live ON 380 so I have no alternative</p>	Comment noted.
1987	Kathy L. Smith	5/15/2018	Electronic Survey	<p>I am very concerned about the lack of improvement proposed for the intersection at FM 1385 and Hwy 380. Between this whole project this intersection is the one that backs up traffic the most substantially during morning rush hour going east and afternoon rush hour going west. There are 5-6 large subdivisions north of 380 that use that intersection. These neighbors are mostly new and growing quickly.</p>	<p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p>
1988	Kathy Lawson	NA	Comment Form	<p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p>	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
1989	Kathy Mitchell	4/29/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?            A: Bridges to bypass busy intersections like the bypass for the 289 and SH 122 intersection.</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?            A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A: Blue</p> <p>Q: What is your interest in this study?            A: Property Owner</p> <p>Q: How often do you drive on the Existing US 380?            A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?            A: Absolutely. In the last month there has been an accident weekly at our neighborhood intersection due to improper timing of stop lights, traffic speed, and distracted drivers. The amount of traffic is overwhelming and unbelievable.</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: Eldorado runs parallel to 380 all the way from Hwy 5 west to the Eldorado bridge in Little Elm. Other roads I use to navigate around 380 are: Weston Road, Stonebridge Road to alma, Ridge, Custer north to 1st or frontier in Prosper and then west.. sometimes linking to Fishtrap road if I'm headed further west. When driving 75/central 'I Haven' exited at 380 in almost 2 years. I take the Bloomdale road exit or Virginia and then make my way over to lake forest or ridge to get to Tucker Hill which is right on 380.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?            A: NOT in front of Tucker Hill. Please route the traffic, especially the 18 wheeler traffic that is so dangerous NORTH of 380.</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: No; no freeway through McKinney on 380. I would only support a freeway NORTH in the rural and undeveloped areas.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?            A: Blue, Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A: Blue</p> <p>Q: What is your interest in this study?            A: Property Owner</p> <p>Q: How often do you drive on the Existing US 380?            A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?            A: Too much traffic &amp; accidents</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: There are none</p> <p>Q: What solutions would you suggest in the US 380 Corridor?            A: Widens and build under passes</p>	<p>Comment noted.</p>
1990	Kathy Moore	4/26/2018	Electronic Survey	<p>Q: What is your interest in this study?            A: Property Owner</p> <p>Q: How often do you drive on the Existing US 380?            A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?            A: Fewer traffic lights has been noted.</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: None</p>	<p>Any future improvements will be designed to enhance safety. Suggestion for fewer traffic lights has been noted.</p> <p>Comment noted.</p>

			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many lights	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Prosper Trail Eldorado	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Not informed enough to say	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily - Often 5-10x/day	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes - traffic backup-racing thru it, in difficulty accessing 380 - lit not favorable to neighborhood	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: The alternate routes are community Taylor, Burk to 75, or cutting thru Wilmett, and Bloomdale	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: That's a real problem-take in commercial property is one, claiming public domain for farmlands, or decking - all hard choices. I am opposed to taking in farmland - we're running out!! I am adamantly opposed to decking for multiple reasons: [word illegible] huge safety issues, in cars landing in my house. Widening would encroach on our homes as would decking-A viaduct at Custer and Stonebridge and Hardin would allow for better traffic flow-I am opposed to decked bridges. They are dangerous and in especially in winter and heavy rains	Any future improvements would include assessment of the potential impact on the human and natural environments and would be designed to enhance safety. Roadway configuration suggestion noted.
			Q: Do you support the building of a freeway regardless of alignment? A: It was a freeway until all the lights were installed! Before that it was a country road with no shoulders! Absolutely opposed to decking-that is right at my back door!	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
2002	Katie Cooper	4/26/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380?	A: No Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?	A: 380...certain times of day there are a lot of cars, but traffic seems to still move through pretty quickly. Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?	A: Creating an overpass for those going east over the 75 would elevate the only real issue which is the cluster at the 75/380 signal. Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?	A: No Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	A: I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	A: I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	A: I Do Not Support Building a Freeway Comment noted.
				Q: What is your interest in this study?	A: Property Owner, Nearby resident Comment noted.
				Q: How often do you drive on the existing US 380?	A: Weekly Comment noted.
2003	Kalle Ebrahimi	5/7/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380?	A: It's manageable for the most part. I have bigger concerns with a massive overhaul and the impact on the community. Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?	A: A variety depending on time of day, but mostly stay on 380 Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?	A: Alternative routes to lessen the congestion. Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?	A: Absolutely not. Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: The Yellow Alignment, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	A: Blue, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	A: Blue, I Do Not Support Building a Freeway Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	A: Blue, I Do Not Support Building a Freeway Comment noted.
				Q: What is your interest in this study?	A: Commuter Comment noted.
				Q: How often do you drive on the existing US 380?	A: Daily Comment noted.
				Q: Do you have any concerns with the existing US 380?	A: Crazy drivers Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?	A: That's the only way to go. Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The traffic lights at 380/community to 75 are timed poorly. One turns green and the next immediate one is red.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Lake forest to 121, Hardin to Virginia to 75.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
Katie Nicholson	5/15/2018	Electronic Survey		
Katie Schroeder	5/7/2018	Electronic Survey		
				Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area US 380 would still experience a failing level of service for congestion and delay.

2019	Kayla	5/16/2018 Electronic Survey		

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: biggest concern is the lack of structure within center turn lanes. entering businesses on opposite sides of the roadways can be difficult without structured and protected turn lanes. having medians and turn lanes on 380 inside princeton city limits specifically could dramatically reduce crashes in my opinion.	TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018. In addition, TxDOT is currently developing a project to widen US 380 from Airport Road in McKinney to 4th Street in Frisco from 4 lanes to 6 lanes.
			Q: If US 380 is congested, what alternative routes do you take? A: 982 south toward Lucas	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: besides medians to control traffic flow, underground roadways similar to ones at spring valley and us 75 in Richardson would be a possible alternative. allowing traffic that needs to flow through from McKinney to Greenville to still utilize the route but without impeding the residents of frisco county traffic and other routes are not utilized they don't directly intersect the heart of a town.	Roadway configuration and restrictions on 18 wheelers noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no, peoples homes and property need to come first. I believe adding a freeway through princeton isn't the answer. I am happy to see growth and development to the city and understand traffic has to go somewhere, what is needed is to make a strategic route for drivers to go from Greenville to Denton that isn't tolled and allows as little disruption or inconvenience to homeowners as possible.	Comment noted. Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted. Tolling is not being considered as an option for funding.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.

2024	Kayte Ghaffar	5/15/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Having a highway or lanes that don't stop at lights as I have seen many accidents from drivers not stopping . Also no solutions that go through Erwin Park	Any future improvement projects would include assessment of the potential impact on the human and natural environments. Any future improvements will be designed to enhance safety. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.

2028	Keith and Rhonda Piyor	5/13/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: I will go south to FM 548 or North to 1827. Then around to either 2933 or back down to 380.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: I think building the highway is the only option. My wife and I support the yellow plan the most because it seems to disrupt fewer people during construction.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: We are not sure we support an alignment regardless of its path but we DO support building a freeway. We believe it's the only viable option to make the area safer for travel.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue, Yellow</p> <p>Q: What is your interest in this study?  A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Monthly</p> <p>Q: Do you have any concerns with the existing US 380?  A: To many lights. Takes to long to travel.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Make existing 380 road a freeway with no lights and build in side frontage roads do local traffic.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: What is your interest in this study?  A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: Need to be expanded to handle future traffic influx.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: 121 or Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Widen the existing 380 and make an interchange at 75 with continuous lane(s) to tie into 121 toward Bonham.</p>	<p>Comment noted.</p>
2029	Keith Debes	5/15/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Make existing 380 road a freeway with no lights and build in side frontage roads do local traffic.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? 	Commenter Name	Date Received	Source	Comment Topic	Response
2000	Rebecca	Survey		<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No. I support the improvement of the existing 380 only.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p>	Comment noted.
				<p>Q: What is your interest in this study?</p> <p>A: Property Owner</p>	Comment noted.
				<p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	Comment noted.
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Traffic gets very heavy at certain times plus people speed quite a bit.</p>	Comment noted.
				<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p>	No answer provided.
				<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Somewhere north of 380 would have the least impact.</p>	Comment noted. Alignment options are still being evaluated.
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No</p>	Comment noted.
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Blue Alignment</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Blue</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue</p>	Comment noted.
				<p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p>	Comment noted.
				<p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	Comment noted.
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: The speed limit is too high.</p>	Comment noted.
				<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia</p>	Comment noted.
				<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Unfortunately I don't know</p>	Comment noted.
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: NO we live directly off the 380. This would severely effect our lives and property.</p>	Comment noted.
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: I Do Not Support Building a Freeway</p>	Comment noted.

2037	Kelli Jeffrey	5/10/2018	Electronic Survey	<p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: It is slow and congested at times and at other times it flows just fine.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Eldorado</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Trucks in the right lane only. The trucks is what makes it so slow. Move them to the right lane only and the other two for passing lanes. Or build bridges up over the existing lanes so you have cars moving on top and bottom. Maybe do this only in spots of congestion or large growth</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Nope - not unless you don't want to impact any residents</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville? 			Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Safety. Entering and exiting while traffic on 380 travels at a high rate of speed. Traffic on west bound 380 going from Preston to the Dallas North Tollway to go south into Frisco. It can often take me 10-20 minutes to get through the short distance and the stop light due to congestion.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Rockhill from DNT to Preston. It is the best new road completed recently!	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: A freeway with access roads and limited entrances. Businesses and maybe some homes will need to be moved and their land purchased. It's a part of growth. More people will be impacted if it is not done.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes, but I have a preference in alignment.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The number of lights impedes traffic flow and creates dangerous situations.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: Creating a freeway instead of divided highway as the population has exploded and will only increase.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I don't even understand this question. Work on your wording for the general public as I have 2 masters degrees and this is unclear.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Accidents at 350 and Tremont are more frequent	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: White Ave	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed roadway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering, Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident, Baylor Scott and White Health	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion, danger in traffic. It must be expanded into a freeway	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: There is no other option than to take it given where I live and work.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: It would not be wise to simply expand the current footprint. This means that a bypass to the north of McKinney is a necessity. The wisest place to turn north is not offered in any current path. It needs to turn north to the west of Custer Rd through the LandPlan property, then cross Custer on the south side of the Walnut Grove Cemetery. After this adjustment, the Yellow plan makes the most sense.	Comment and alignment suggestion noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: Do you have any concerns with the existing US 380?  A: Yes, there are too many big trucks driving too fast on this road. And there are many new residential neighborhoods now, and the speed limit is too high. There are too many large trucks traveling the roadway, which causes the traffic to increase. There are only 2 lanes in each direction, which also leads to more congested traffic.	Comment noted.
2052	KELLY ROBINSON	5/18/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take?  A: Take Wilmett when I can, but I drive to Princeton every day and there are not any good alternate routes.; There are no alternative routes available for most of my traveling, which leads to much of my aggravation.  Q: What solutions would you suggest in the US 380 Corridor?  A: I would like to at least see a bypass for the big trucks, and widening of the existing 380 between 75 and the Hunt County line; More lanes on the current 380 path, a bypass for large trucks to keep them out of the main traffic, and fewer lighted intersections to keep traffic moving at a better pace.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?  A: No, I do not think a freeway should go through the middle of the city of McKinney.	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?  A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?  A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?  A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?  A: Blue, Yellow	Comment noted.
				Q: How often do you drive on the existing US 380?  A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380?  A: unsafe with no center median and the speeds people travel on this road. Easy accidents.	Comment noted. Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take?  A: Frontier, 1st street to coit,	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?  A: More lanes and a center median	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?  A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?  A: Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?  A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?  A: Do Not Support Building a Freeway	Comment noted.
				Q: How often do you drive on the existing US 380?  A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380?  A: Lots of trucks and heavy traffic. It's a dangerous road, weekly accidents!	Comment noted. Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take?  A: Virginia Parkway	Comment noted.

				Q: What solutions would you suggest in the US 380 Corridor? A: Focus on the existing feeder roads for possible expansion as alternate routes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Nearby resident, Concerned about Erwin Park.	Comment noted. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic and accidental cross over from other lanes.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Convert 380 to a freeway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, will not be sufficient to handle traffic caused by population increase.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway or Eldorado.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Implement expansion into a freeway with service roads (Pink or Green route). Next choice would be Red route by pass.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				1.) I like the idea of a US Hwy 380 Freeway with access roads to reach businesses along the 380 corridor.	Comment noted.
				2.) If a ByPass is built, "red" in McKinney is preferred and "blue" in Princeton.	Comment noted.
				3.) No ByPass route should go through Prosper which only has 27 square miles. Prosper's 380 corridor needs to be developed into a commercial tax base	Comment noted.
				4.) No By-Pass should cut through the LISD property for a future high school that will be east of Custer Road and North of Prosper Trail in the Rhea's Mill area.	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Leave it the way it is	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				After looking at all 5 alternatives, east of Hwy 5 the least effected routes would be Green & Pink - There would not be anyone's property except those who have property on #380. "My choice" Pink or blue would also make sense with the routing following the river going around the Northside of McKinney. Please do not choose the yellow route. The farm land effect would catastrophic for a number farmers (including my family). These people have no interest in having this highway in their front yard and/or through their productive fields.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2074	Kenneth Wayne Browder	NA	Comment Form	Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much traffic going too fast. People running lights and causing accidents. Rock haulers and construction traffic makes the roadway so dangerous.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: FM546	Comment noted.
	KERRIE L BEAVERS	5/11/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Restrict heavy equipment traffic. Physical median instead of the turn-lane median. Loop around outside of cities.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Dangerous, lots of accidents. High speeds for a road with traffic lights & heavy traffic.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: There are no good alternatives for 380.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turning it into a bypass highway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: moved out of New Hope last year because of how bad 380 is, but still have to travel it on occasion.	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly, Monthly	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, primarily just west of 75. Alternative entrances to shopping areas needed. The current traffic light just west of 75 seems to create more problems than it helps.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Wilmeth, county road to Lake Forest.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Elevated offramps	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Would not prefer it, but better than displacing home owners.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Pink, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Pink, Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Heavy congestion & traffic safety.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Generally none.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Either widening or adding double decking for express lane travel. Which will also maintain support for existing businesses along the highway while preserving outlying farm land & rural buildings.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes,	Comment noted.
2087	Kevin Caddell	5/12/2018	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

## Comment Response Matrix

				Q: Which alignment(s) do you prefer in Princeton?	A: Green, Pink
				Q: Which alignment(s) do you prefer in Farmersville?	A: Green, Pink
				Q: What is your interest in this study?	A: Property Owner
				Q: How often do you drive on the existing US 380?	A: Daily
				Q: Do you have any concerns with the existing US 380?	A: NO
				Q: If US 380 is congested, what alternative routes do you take?	A: Ridge, Lake Forest, Hardin
				Q: What solutions would you suggest in the US 380 Corridor?	A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.
				Q: Do you support the building of a freeway regardless of alignment?	A: NO
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: None

			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
Kevin Lumberson	2017-07-07	Paper Survey	I support the Red alignment in general. With the Blue options to bypass Farmersville & Princeton. Green alignment through center of McKinney would be a disaster, very opposed. Very concerned about the intersection at RTS/Stewart Rd Sound protection, lights, etc. Elevation the potential impact on the human and natural environments, including noise impacts

			Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney?  A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton?  A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville?  A:	No answer provided.
			Q: What is your interest in this study?  A: Property Owner, My home directly impacted with 3 of 5 Bloomdale alignments	Comment noted.
			Q: How often do you drive on the Existing US 380?  A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380?  A: Specifically 380 and 75 need the improvements; 380/75 is the major issue. I don't see the congestion of great concern east of 75 or west of 75. Appreciate the need to accommodate "anticipated" growth, but if 380 is the issue...then the focus should be exclusively on 380; I reside on Bloomdale Road. Seems 3 of 5 alignments would put my family out of our home.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take?  A: Many east/west arterials and wish we had a few more. Outloop, Wilmeth, Laud Howell; Wish Collin County would improve the arterials instead of 380. In doing so congestion would organically be removed from 380. I believe County plans exists.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor?  A: Finally build the already approved and planned for Outer Loop. Much 135 north traffic would use the Outer Loop taking significant pressure off 380 for freight transit. This option better supports the northwest sector growth which is a major growth contributor for McKinney. How does a bypass returning traffic to 380 help the growing NW sector? Build the Outer Loop; Address 380 itself. The businesses that would be TEMPORARILY impacted would ultimately receive a benefit from these improvements. To displace families from their homes is PERMANENT and will meet strong resistance. See above. Always knew Bloomdale/CR123 would be improved. Why build a bypass 1.5 miles north of the problem area. Further, why return the bypass traffic to Custer and 380 creating another bottleneck? Why would this project not be aligned north through undeveloped land and of equal importance...connect to the DNT? Returning traffic to 380 and Custer is extremely short sighted.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		Electronic Survey	Q: Do you support the building of a freeway regardless of alignment?  A: Fix 380 on 380. The impact the business is temporary. History shows infrastructure improvements like this ultimately benefit those businesses. You cannot displace homeowners permanently.; Improve 380. It is the problem. It should also own its own solution.; Northern alignment through undeveloped land makes the most sense. This is common across the mid west and disrupt communities for a "by pass" only 1.5 miles above 380 is nonsensical. The problem is 380 so FIX 380.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink	Comment noted.
Kevin Voigt	5/10/2018		Good evening. My name is Kevin Voigt, V-o-i-g-t, 6290 County Road 123, McKinney, 75071. My comments would have to do with, 380 is the problem and so the solution should be focused on 380. The pink and green options would require temporary disturbance of business owners. Business owners would get to go home every night, and studies have shown that this type of infrastructure and improvement ultimately benefits those same business owners. So a temporary disturbance and inconvenience ultimately delivers a net benefit to those business owners. Conversely, and like myself, I fall under three of the five alignment options. We would lose our home, as would hundreds of others. The impact of families and communities from three of five suggested alignments are permanent outcomes. And so I would advocate, and I believe many would, including the County and the City, to focus on the pink and green alignments, understanding those business owners would have a temporary inconvenience and net benefit at completion; whereas homeowners like myself would permanently be displaced.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		Comment Provided to Court Reporter	Q: What is your interest in this study?  A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380?  A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380?  A: Too narrow and too many stop lights that slows down traffic	Comment noted.

2100	Kevin Washa	5/15/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: It depends on where its congested. If your near Prosper or Cross Roads your out of luck. That part of 380 is the absolute worst and there aren't any alternatives.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Construct a fly around loop to the north.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes. Our community isn't getting any smaller</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: How often do you drive on the Existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Only that the exit lane from 75 northbound off to 380 back up even on non-peak hours which is a bad design of both the exit off the freeway and whole intersection that need a redesign, but otherwise No - there are rarely times that there is any traffic back ups or delays of concern comparative to others like it around the DFW area.</p> <p>Q: What solutions would you suggest if US 380 is congested, what alternative route do you take?  A: I may cut over an intersection on two, but usually only if there is a wreck blocking more than one lane when this occurs which has been only twice in four years living in the North Frisco, McKinney, Prosper and Celina area...</p> <p>Q: What solutions would you suggest if the state really feels they have to do something to enhance the existing 380 pathways and design.  A: Only enhancements I could suggest if any commutes is offset nearly one to one for additional traffic it draws. I am fully convinced that the negative There certainly could be an upper deck level built with lanes with limited exit ramps for non light traffic between 75 and DNT kind of thing...allowing for some more traffic capacity and faster commute through area for longer/further commuters that are really just passing through. But essentially only enhancing the existing 380 path.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Only if it is along the existing 380 path otherwise no. After evaluating and considering the negative impacts on the community and research on the building of additional and new highway impacts I can not. While I appreciate that traffic and population migration may be inevitable it is not ok to continue to urbanize farming and ranch land and destroy nature areas and their iconic Texas landscape views, nor contribute to their demise by adding emissions through them, or ruining both the quiet and safety of communities and neighborhoods just for the sake of saving someone (who usually is just passing through and does not live in those neighborhoods impacted) literally only a few minutes of commute time - is an injustice and insult. Studies have shown that increasing the highways does not actually effectively fix or resolve congestion issues and that actual savings time for any commuters is offset nearly one to one for additional traffic it draws. I am fully convinced that the negative environmental and community cost to any kind of bypass or expansions to a full blown "highway" beyond the existing 380 path and route at least between 75 and DNT (as this is the area in which I am most familiar, live and travel through) has anywhere near the offset of benefits I am really hoping this is not just another case of a government land grab move and tax money spend as it is just not sustainable to continue to do this to our land ecosystems and agricultural productivity as well as communities for the very people you might claim some of this "progress"</p> <p>destroy our land properties and structures will hurt the land and those who live there, not and work is for. Consideration should also not just be for the land and property itself that will be taken and used, but also then any of the adverse impacts of the development and changes to the remaining land, property and communities surrounding it. By continuing to build out "bypass" paths and roads, the state only continues to encourage urban sprawl that is destroying land and quiet communities as well as discouraging use of, and development of alternative transportation options. We should not contribute to induced demand in this area as it struggles already with flooding and drainage issues. Adding this additional traffic and structures will hurt the land and those who live there, not improve it. Past benefits of investing in this kind of new "infrastructure" may have been seen or considered beneficial in the past, but certainly does not mean that it will now or in the future as recent research has found that the economic benefits of newer highways built are typically negligible. Tax money is best spent fixing the existing 380 roads and pathways and not expanding off of it.</p>	<p>Comment noted.</p>

			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The speed limit and no light at album hills subdivision.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Eldorado	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I'm not sure what can be done now. I've been saying for years that something needs to happen but it seems the cities involved have missed out and have allowed development where R.O.W.s could have been properly salvaged. Now it looks like some neighborhoods will have a highway running through their backyards and I am not in favor of that.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No. It is too late for that. I am not in favor of neighborhoods losing value due to a freeway being in their sight lines.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes the large volume of traffic and the number of accidents are rapidly increasing.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Depending on where I am trying to get to I will either go south to Virginia/Eldorado, sit in traffic on 380 or try and take back county roads.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: McKinney needs to build out the east/west roads north of 380. If roads like Wilmett, Bloomdale, or Laud Howell were completed to 75 it would reduce traffic on 380. This should have been done when all the new neighborhoods started getting approved.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No! I do not support any type of bypass. If the current alignment can't be changed to a freeway another solution is needed. All options that bypass 380 run 3 blocks behind my house in Heathwood. The increase in traffic and noise would cause issues.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Business Owner. Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Areas with turnlanes could be safer and the speed limit should be slowed.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Eldorado, Virginia.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: My position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding that recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Standardridge; not on or bordering Tucker Hill.	Comment noted. Alignment options are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: Absolutely not. The worst stretch of 380 is near the toll road and near 75 the area in between isn't even overly congested and when traffic loads everyday at rush hour, and do not have an issue where the proposed freeway is being suggested.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.

2119	Kimberly Ryan	NA	Comment Form	Tucker Hill's position is NO to all alignments due to: 1) potential loss of homes 2) devaluation of our neighborhood as a whole 3) adverse environmental and health implications. Notwithstanding our NO recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-ways and noise pollution by means of cantilevered access lanes, a depressed roadway, sound barriers, and extensive landscaping for aesthetics. NO bypass option is acceptable! TxDOT must incorporate the City of McKinney's overall plan into their analyses and building timeline before further decisions are made. The 380 project appears to be an independent project from the outer loop and expansion/widening of other East-West roads (e.g., Wimberth, Bloomdale, Frontier). Without a comprehensive plan in close coordination with McKinney, the current 380 options are shortsighted and may even worsen the problem.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.

			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: commercial traffic and accidents due to speed; We live in Tucker Hill. Too much traffic at high speeds. Wrecks occur daily on this road. I'm terrified for my family when I here sirens. My kids will start driving in a couple years and I'm worried they will be killed trying to get in and out of the neighborhood.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is congested, what alternative routes do you take? A: custer rd, preson rd or coit rd to 121; I have no choice, it's the only way in and out of the neighborhood	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution means of cantilevered access lanes, a depressed highway, sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible, west of future Stonebridge; not on or bordering Tucker Hill.; Additional traffic needs to be routed off of this road. Widening it would only exacerbate the problem	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: NO; No, .the alignment greatly concerns me as I'm afraid that TXDot will believe the widening the road across the front of the neighborhood will somehow help congestion	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.

2126	Kirby Jones	5/18/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: Depending on where I am going I take 121 or county roads typically headed west</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Of the options provided my suggestion would be to maintain it on the existing 380, which is the green/pink alignment. In the event this option is not viable my recommendation is to build the bypass along future Laud Howell Parkway. This option is further out and farther ahead of the development cycle. The blue, yellow, or red options negatively impact property that is in the current building cycle and has a negative impact on property owners and home owners. The Laud Howell option provides much needed infrastructure and accelerates those properties becoming viable development options.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: I am adamantly opposed to the yellow, red and blue options. I support staying on existing 380 and an option on future Laud Howell Parkway. I am not sure why that plan did not make it as one of the final five options.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: None</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the Existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: Starting to be too congested already. This survey should have been started 4 years ago when this area was already being built up at a rapid pace. By the time the problems with 380 are ironed out years from now, it will be too late. And like everything else TXDOT and the Politicians do, they will be years behind construction instead of planning, AND PREPARING, for the future.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: El Dorado. It's pretty sad since there is no REAL alternative within close proximity to where I live that traffic will flow fairly unimpeded.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Widening by adding lanes NOW, not 6 months or 2 years from now are needed. At the rate construction moves, it will still be too late to adequately handle the traffic load within 6 months from now.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: YES!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: The only thing that concerns me at times is the timing of lights and the high speed.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: I must use 380 because my neighborhood entrance is located on 380.</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted. Alignment options are still being evaluated.</p> <p>Comment noted.</p>

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Eldorado pkwy	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widen it	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes - no median, cross traffic making turns, congestion, speed	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
			Q: If US 380 is congested, what alternative routes do you take? A: lots of back roads but very inconvenient	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: -By-pass; not redoing the existing road - The bypass would not interfere with existing traffic - less homes affected by the by-pass - If they do fix existing road, they need to figure out traffic and the length of time for construction because it will be a nightmare!	Comment noted. Alignment options are still being evaluated.
		Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A: yes to some degree	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
2143	Kristen Hoar	5/14/2018

				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue; Red	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No other than its busy	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 75 to 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen it or expand it	Comment noted.
2144	Kristen Johnson	5/7/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: I support, not disrupting nature at Erwin Park	Any future improvement projects would include assessment of the potential impact on the human and natural environments. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many trucks	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Google Maps	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Creating a loop around that area so the trucks can bypass around this area	Comment noted. Alignment options are still being evaluated.
2146	Kristi	5/3/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The intersection at 380/75 where the Chic fil A is very busy and congested during work days and weekends. Also the intersection across from Race Trac and bed bath beyond is very busy you have to use the parking lot to get around it.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Community or the service roads.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make better intersections or larger roads but don't cut into people's homes to do it. Sorry don't really have a good answer for this issue.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes and no. I do want to see improvements in roads to lessen the traffic issues but not if it forces people to move out their houses or causes residents issues.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It's seemingly a death trap! That's more about the people I suppose, and not the road itself. The area is being over populated too quickly and therefore is leading to too much congestion. 380 was busy 6+ years ago and it's only gotten worse.	Comment noted. Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: I honestly avoid it as much as I can. So I'll take Virginia and Eldorado as Far East or west as needed and then head north.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Honestly, slow down development! There is too much going up too quickly. I can't imagine making more lanes, that would be even worse to cross but the more that's built on 380, the more cars on the road. Maybe lower the speed limit in the area where it's higher; people don't pay attention to those turning. People jet out in front of cars going 55+ miles per hour. With as many turn offs and stop lights as there is, the limit really shouldn't be over 45!	TxDOT does not determine the pace of development. Suggestion for lower speed limit has been noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I'm guessing at some point it's going to be needed. But I'd honestly prefer it to be north of 380.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Member of community interested in smart growth and infrastructure development	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: There are too many traffic lights. It is extremely dangerous and congested.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Main Street and Preston	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Turn it into a limited access highway. This will bring more growth to the area and improve land values regionally.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No. There should not be a bypass option. The freeway should be built on the existing road.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The community has outgrown it and it needs to be a highway with at least 3 lanes each way. The biggest concern with that is it will take years to build correctly.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Rockhill; Eldorado; Panther Creek; In Prospect - fish trap; first street was n prosper.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I suggests that it be turned into a four lane highway each way with access roads that are minimum of three lanes wide. Do not make it another toll road.	Comment noted. Tolling is not being considered for this project.
			Q: Do you support the building of a freeway regardless of alignment? A: I do support the building of a freeway not a toll road.	Tolling is not being considered as an option for funding.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

2160	John Farmer	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment		Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green		Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green		Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green		Comment noted.
			Q: What is your interest in this study? A: Business Owner, Property Owner, Nearby resident		Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily		Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Absolutely - traffic is already relatively congested and there too many accidents on 380 today.		Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I still primarily take 380		Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I think a bypass makes the most sense given the amount of existing business on 380 between 75 & Custer in McKinney. Additionally, lots of residential communities would be negatively impacted by the expansion of 380.		Comment noted.
Paper Survey	Kyle Armstrong	N/A	Q: Do you support the building of a freeway regardless of alignment? A: A freeway is needed, no question - I can't support the green alignment due to its encroachment onto the hospital campus.		Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment		Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue		Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: N/A		Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: N/A		Comment noted.
			As a business leader (president of 3510 McKinney) on 380, my preference would be for a bypass solution although I'm not [word is illegible] with any of the proposed bypass alignments and had hoped one possible alignment would drop further west, closer to Custer. That bias is primarily tied to my residence (I live in Tucker Hill). I do think turning 380, as is, into LAR creates major problems given the number of businesses now along that corridor. From the hospital's perspective, the worst alignment is the "Green" one that expands existing 380 to the North.		Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident		Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily		Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The amount of accidents that occur is the main concern.		Comment noted.
Comment Form	Kyle Slaton	5/1/2018	Q: If US 380 is congested, what alternative routes do you take? A: Take the back roads around the airport in McKinney to go east to Princeton.		Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Lowering the speed limit starting at Monte Carlo and through Princeton.		Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes		Comment noted.

			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Increasing traffic problems	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 982 to 546	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Diversion of traffic around "town" areas	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Only if it does not come directly through Princeton	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No concerns with US 380.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Most of my driving in North/South and not East/West	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Keep it as is. The position of our neighborhood, Tucker Hill, is NO to all alignments due to potential loss of homes and devaluation of our neighborhood along with adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing Hwy 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughput, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, and not on or bordering existing or future neighborhoods of Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: No, I feel that Hwy 380 is no different than Northwest Hwy, in Dallas and think the future growth of Collin County would be better served by another route running North/South as opposed to East/West since the outer loop will be built.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.

				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too much traffic, trucks traveling at high speeds. Congestion at 380/75 interchange, it is just very poorly planned. The trucks driving at fast speeds makes it very dangerous. Also, because there are no other major roads north of us, it's the only option for commuters, so when an accident happens, everyone is stuck; Too much traffic on 380 and too many accidents due to this traffic and high speeds. We've had 7 accidents just outside our gates in the last four months. Without alternative roads and bypasses, it's the only option people have and will just become more congested and dangerous.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I have no other options. I would love to take anything other than 380.; None, there are no other real options at this point. We need other roads to be built out.; I don't have a choice, the only way into and out of our community is US 380. There are no other options right now.	Comment noted.

2176	Lan Hy	5/7/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Development of other arterial roads to relieve the stress placed on 380. Bloomdale and further north to be exact. Build our Stonebridge and Cluster going north. Two major developments are being planned in the northern part of McKinney and they need the roads to support it. It makes absolutely no sense that 380 is the only major road. When an accident occurs, as it often does, I've found myself stuck with no other options because there are no alternative roads I can take. Build out east/west roads north of 380. More dedicated right turn lanes. Better timing of lights. Keep the trucks off or slower speed. Fix the intersection at 380/75. It's the only part of 380 that gets congested.; Bypass to get traffic off current 380 route for commuters just trying to get through. Development of roads north of 380 that currently run parallel to it.</p>	Comment and suggestion to improve other roads noted.
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No</p>	Comment noted.
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Blue Alignment, None, Do Not Support Building a Freeway</p>	Comment noted.

			Q: If US 380 is congested, what alternative routes do you take? A: Take back roads when 380 is congested (I21 through Melissa)	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I would recommend the BLUE route	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes too much traffic, not safe, son got killed on it	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: All the back roads in the County	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Raised thru lanes in town, use of undeveloped (farm) land	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

2190	Larry Price	5/6/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Widen 380</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Only if it means widening 380</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p>	<p>Comment noted.</p>
2191	Larry Richardson	5/11/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yeah it's crowded but a majority of traffic is due to new residential &amp; commercial construction.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: The biggest point I want to make is I believe that a big % of traffic on 380 (morning &amp; evening) is due to construction workers/vehicles traveling up from South Dallas and then heading over to new residential/commercial construction in Frisco/Prosper/Mckinney. So these vehicles are coming up North on 75, then going West on 380. So any northern loops (alignment 3 &amp; 4) to me wont solve 380 traffic, as none of these vehicles will go out of the way to travel further North on 75 (out of the way).</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: I see a freeway/loop to help 380 being a must but feel like it needs to be further North like Frontier Rd.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes. Not designed to handle current traffic levels. Very bad congestion at 380 and 75, and 380 and FM982 in Princeton.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: FM982 N going South. Also Airport to Industrial.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Turn it into a freeway.</p>	<p>Comment noted. Alignment options are still being evaluated.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

			<p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Member of Sky High RC Club</p>	Comment noted.
			<p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p>	Comment noted.
			<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No</p>	Comment noted.
			<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia Parkway</p>	Comment noted.
			<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: I'm sure an expansion of some sort is warranted because of long term population growth. The research and efforts TxDOT is doing are the right approach to figure out what the best alternative is.</p>	Comment noted.
			<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes, unfortunately think it is necessary.</p>	Comment noted.
			<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	Comment noted.
			<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green</p>	Comment noted.
			<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p>	Comment noted.
			<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p>	Comment noted.
			<p>I have 2 distinct concerns about the US 380 expansion project:</p> <p>1. I would rather not hear any noise from traffic on 380. I'm sure many people share this concern with me. Of course my biggest issue is with noise at my house (8009 Saint Clair DR, McKinney, TX 75071). I don't know if there are plans to elevate the roadway or if any are near my home, but I would expect noise to carry further anywhere the road is elevated. Perhaps opportunities could be taken to lower the roadway instead of raising it to reduce the noise propagated from it. I would support any sound reducing measures taken (especially near my home).</p> <p>2. I am a member of the Sky high RC (remote control) Club along with approximately 80 other local members and our flying field borders on the Red, Blue, and Yellow routes, the address of the field is: [REDACTED] It is part of Erwin Park and the entrance to the field is on CR 1006. There are 2 potential issues with the proximity of our field and the highway, a) AMA regulations &amp; safety concerns. Our field is currently sanctioned by the AMA (<a href="http://www.modelaircraft.org">http://www.modelaircraft.org</a>), the governing organization for remote control flight hobbyists in the U.S. I don't know if the highway threatens our status as a sanctioned field or not. However, if it does, then the highway represents an existential threat to our club. I do know that the AMA recommends a 250' minimum buffer between fields and major roadways to reduce safety risks. So, if the road was moved at least 250' south where it passes our field, that would probably ensure that we would not be impacted. That is speculation on my part and would need to be confirmed. b) Noise. It's a beautiful, peaceful spot right now and that could shattered by noisy traffic. Perhaps noise control measures would help reduce that impact.</p>	<p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p> <p>A traffic noise analysis is generally conducted during the environmental study stage of project development. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers are shared with the community before preparing the final design.</p>
			<p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Nearby resident</p>	Comment noted.
			<p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p>	Comment noted.

			Q: Do you have any concerns with the existing US 380? A: Over congested and too many signal lights.	Comment noted.
2205	Laura Heinrichs 5/17/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Hwy 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: 380 needs to be expanded to 'fly over' busy intersections to keep traffic moving.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No, am concerned about the alignment.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Computer	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Dangerous and too much traffic	Any future improvements will be designed to enhance safety
			Q: If US 380 is congested, what alternative routes do you take? A: T20	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: expanding to make more lanes and a safer Left turn lanes	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Computer, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, it is horribly accident-prone. I am terrified for my children to drive it someday.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Frontier Parkway or Eldorado	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many lights make it too long to get to 75	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Wimeth as I live near Wimeth.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Lane that provides access to 75 without stopping at all the lights for the businesses.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No, I do not support a freeway on several of the alignment options.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Highway 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Keep 380 on 380 – NO bypass	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support the building of a freeway on the pink and green alignments only	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It is congested sometimes.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I take 380 anyway, sometimes I go south to white.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make 380 a true highway. The city and businesses are built up around it being the main highway. So many new businesses are banking on it. And it doesn't ruin other more beautiful parts of mckinney with another highway.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I support it, but not at the cost of McKinney residents who have chosen where they want to live relative to the current 380, and whose property values would go down with many of the other alignments. So, I do not support regardless of alignment.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

2214	Lauren Burnside	4/26/2018	Electronic Survey	<p>Q: What is your interest in this study? A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: There need to be more right turn lanes so people in the right lane do not have to slow down behind people turning. It's dangerous if people behind a car are not paying attention or going too fast.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: The only other west-east option is taking CR 943. I live in the northwest sector and there are no straight west-east road options north of 380.</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Connecting Wimberly road between Hardin and Lake Forest would keep me off 380 daily. Connecting the road would provide the best alternative solution to driving on 380. We don't need a huge bypass bringing traffic through our neighborhood or covering current home or valuable farmland.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Absolutely not!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink</p> <p>Q: What is your interest in this study? A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: No. Traffic flows fairly easily at the moment, and generally there is not too much congestion on the McKinney side. Once you hit the construction closer to the Frisco border and Preston Rd, traffic does get bottlenecked.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway/Rockhill to DNT</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Widen lanes, remove some of the traffic lights.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Yes!</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink</p> <p>Q: What is your interest in this study? 2219	Laurie	5/17/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes, the traffic on this road has increased exponentially since we purchased our property three years ago (we literally back up to 380). There is SO much road noise all night long that we can't sleep at night. Engine breaking. Speeders. Motorcycles revving their engines.</p> <p>\Weeks. It's ridiculous.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virgins or Eldorado</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: It needs to be redirected AWAY from Stonebridge Ranch properties. We are a very large community contributing heavily to the tax base in McKinney.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Something has to be done to REDUCE traffic on the existing 380 corridor. That DOES NOT mean we want to see that corridor expanded or shifted in its existing space. It needs to be REDIRECTED.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Blue Alignment, The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue, Yellow</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: There is too much traffic and accidents on the stretch between McKinney and Farmersville. Don't like the center turn lane.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: FM 546 or East Lucas Road</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Synchronize the lights, have actual turn lanes instead of center turn lane, widen it.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No, I think the alignment matters.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment, The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink, Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink, Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink, Blue</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily, Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes</p>	<p>Comment noted.</p>

			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Multiple side roads to get to 75 or the freeway from Custer Road area.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Limited access freeway with 3 lanes in each direction so as not to disrupt and homeowners and business owners.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: 100% against the by-pass options. Limited access on existing 380 foot print with minimal impact on Tucker Hill since it is the narrowest part.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer to Virginia Pkwy, Stonebridge to Virginia Pkwy	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Run Blue Route via Stonebridge. This is an already existing road/annex and will be widened anyway. Do not route road directly adjacent to West side of Tucker Hill subdivision.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NOI	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
2226	Laurie Sweet	5/18/2018 Electronic Survey	Q: Do you have any concerns with the existing US 380? A: It is very dangerous with all the construction trucks on the highway. They do not want to stop at any light and often run red lights.	Any future improvements will be designed to enhance safety.
2227	LuVorise R. Dahman	5/11/2018 Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A: I Do Not Support Building a Freeway	Comment noted.

			Q: What is your interest in this study? A: Commuter, Frequent user of Erwin Park	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: If heading to Frisco for work, Airport road to 121. If heading to 35 to go North (OK/KS) I will take hwy 69 to Hwy 82 to Gainesville.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: It is converted to a FWY that it follows the existing 380 route.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No-very much opposed to any alignment that goes North of existing HWY380 in McKinney.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Please do not reroute the highway or interstate through Erwin Park. We have such a small part of nature left. McKinney is "Unique By Nature". Please leave this park alone.	Any future improvement projects would include assessment of the potential impact on the human and natural environments. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway, which alignment do you prefer? A: No	Comment noted.

2232	Lea Anne McCormick	5/17/2018	Electronic Survey	<p>Q: How often do you drive on the existing US 380? A: A couple times a year</p> <p>Q: Do you have any concerns with the existing US 380? A:</p> <p>Q: If US 380 is congested, what alternative routes do you take? A:</p> <p>Q: Do you support the building of a freeway regardless of alignment? A:</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:</p> <p>Q: Which alignment(s) do you prefer in McKinney? A:</p> <p>Q: Which alignment(s) do you prefer in Princeton? A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A:</p> <p>Q: How often do you drive on the Existing US 380? A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380? A: It is dangerous due to unprotected driveway entrances into facing retail locations and very short protected left turn lanes that over fill during peak driving. Traffic lights are NOT syncro for optimum traffic flow. Additionally, reflective paint and signage not used to identify islands/travis turning a slower process as drivers need to educate themselves on the fly as each turn is sharp and inadequately flagged. Curbs should be painted with white reflective paint for easy sight and avoidance. Islands at drive way entrances should be set back into the throat so wide turns can be accommodated. Drive ways into retail establishments should re-routed to become side entrances as much as possible to minimize unexpected braking and near rear end collisions can be avoided. I think best practices from other high growth areas should be leveraged in evaluating the best way forward for correcting 380 congestion challenges. I think outside the box thinking is required such as smart technology to improve traffic flow.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: Panther Creek, Eldorado Parkway</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: I want 380 to be improved with the various suggestions that make it a viable with on ramps and off ramps and a combination of my above suggestions. I don't like a double decker approach as I have seen the property value and cut off from community challenges.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: I think the plan should include the immediate planning and implementation of the Outer Loop. I have lived in Los Angeles and I know first hand what real traffic congestion looks like. I also know that you will do some "crazy" thing like drive 11 miles north out of your way if it saves you time. In LA you learn that time is money and if driving a little out of your way is actually faster you do it. You don't measure your commute in miles in LA you measure it in drive time. Let's get the Outer Loop going so we can leverage our opportunity to get cheap land and before we encounter the outer edge of growth and can actually plan a optimum route! In addition fix the existing all be it an imperfect 380 to our very best. I don't support a "By Pass" for 380 in any shape.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, None</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Pink</p>	<p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

2236	Leandra Crum	5/8/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Middle lane is a game of chicken during rush hour traffic between McKinney and Princeton. Monte Carlo/380 EB in the evenings are the worst for those trying to get in the middle lane to turn onto Monte Carlo from 380. It is hard to transition from the main lane of 380 navigating the light, and trying to gauge when it is ok to enter the turn lane. Some people get in the turn lane far back and some people merge closer to the light. All the while dodging those trying to turn left out of the gas station.</p> <p>A: If US 380 is congested, what alternative routes do you take?</p> <p>A: Take the New Hope/Woodlawn</p>	<p>Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.</p> <p>Comment noted.</p>
				<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Medians, limited access.</p>	<p>Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.</p>
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: YES-in every way shape or form.</p>	<p>Comment noted.</p>
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	<p>Comment noted.</p>
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink, Reed</p>	<p>Comment noted.</p>

2247	2018-05-07	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Q: If US 380 is congested, what alternative routes do you take? A: Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2248	2018-05-03	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Q: Which alignment(s) do you prefer in McKinney? A: Q: Which alignment(s) do you prefer in Princeton? A: Q: Which alignment(s) do you prefer in Farmersville? A: Q: How often do you drive on the existing US 380? A: Daily	No answer provided.
			Q: Do you have any concerns with the existing US 380? A: I'm concerned about the safety of the existing US 380 as it crosses in front of Tucker Hill. I don't understand why so many accidents occur at the Tremont intersection at 380 at the neighborhood entrance. Q: If US 380 is congested, what alternative routes do you take? A: Cut through Stonebridge Ranch via Stonebridge Rd or Ridge Rd Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2249	2018-05-18	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.

2256	Leslie Fossen	5/9/2018	Electronic Survey	<p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: People drive too quickly and, especially trucks, are unable to stop in time at lights, causing accidents. Increased commercial businesses mean that there are more people turning and switching lanes suddenly, again leading to accidents and near misses. Hills in McKinney can make backups at traffic lights hard to see.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Lower speed limit between Custer and Hwy 5 to 45. Add more lights and turning lanes for streets and business entrances. Build a freeway further north.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Yes but I think it would be better to the north where construction will cause less disruption.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Green</p> <p>Q: What is your interest in this study? A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: Yes! Too many people speeding.</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: More police presence.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville? 2260	Leslie Roddy	5/10/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Even the road in the low visibility areas turning onto 380 after an incline/hill. Allow for longer ramps to merge onto 380 at the hills where visibility is low, widen it to at least 6 lanes (3 on each side), make turning lanes longer and more accessible to merge into before having to slow down to turn, slow speeds down and keep them uniform through the areas of high concentration of stop lights. Post more traffic signals where stop signs are, especially at the top or after the decline of a hill and place lights up high so people traveling up the incline can see, post more warning signs through the stretch of 380 being considered for construction.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p>	<p>Comment and roadway configuration and traffic signal suggestions noted.</p> <p>Comment noted.</p>

2265	Lewis L. Issacks	NA  Comment Form/Letter	<p>Please see letter dated May 17, 2018 from Saunders, Walsh, &amp; Beard on behalf of the North Texas Municipal Water District.</p> <p>Dear Mr. Endres:</p> <p>Our firm represents the North Texas Municipal Water District and submits the following comments and objections to possible routes proposed by TxDot on the above project.</p> <p>North Texas Municipal Water District ("NTMWD") is a water conservation and reclamation district created under Article XVI, Section 58 of the Texas Constitution pursuant to Chapter 62. As such, NTMWD is a political subdivision of the State of Texas. NTMWD provides water, wastewater treatment and solid waste disposal services to approximately 1.7 million residents of North Texas. NTMWD has purchased 1,047 acres in the vicinity of the proposed US380 Realignment in order to construct a facility primarily to serve the needs of the northern portion of its service area. NTMWD is in the process of developing site plans and obtaining permitting for this public works facility.</p> <p>NTMWD objects to the currently-proposed Yellow route. The NTMWD master plan for this public works facility requires the use of all NTMWD acreage lying south of an east-west line running from the intersection of FM 1827 and CR 988 and running west to FM 2933. Any realignment of US 380 to lie north of this east-west line could be feasible, but it is of paramount importance to the NTMWD and its public works project that no such alignment of US 380 cross south of that line, as doing so would fatally impair NTMWD's ability to effectively utilize its previously-purchased real property for its intended purpose.</p> <p>In addition to the conflict with a above-referenced 1.047 acres, please be advised that NTMWD is the permit owner responsible for the 30-year post-closure care of the closed McKinney Landfill. Post-closure care began June 18, 2014 and will continue until at least 2044. Each of the five US 380 realignments (Red, Blue, Green, Pink, and Yellow) proposed by TxDOT include takings which would be within the permit boundary of the closed McKinney Landfill. Please be advised that any alignment of US 380 or its access roads within the permit boundary would violate the permit, TCEQ regulations and environmental laws of the State of Texas. It is of paramount importance that TxDOT take no actions which would violate the existing permits for the McKinney Landfill.</p> <p>Sincerely, Lewis L. Issacks</p>	<p>Comment noted. TxDOT plans to work with NTMWD to work through these issues.</p>
2266	Leyda Mendez	5/14/2018  Electronic Survey	<p>Q: What is your interest in this study? A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380? 2271	Survey		Q: Do you support the building of a freeway regardless of alignment? A: No  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway  Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway  Q: What is your interest in this study? A: Nearby resident	Comment noted. Comment noted. Comment noted. Comment noted. Comment noted. Comment noted. Comment noted.
2272	5/13/2018	Electronic Survey	Q: How often do you drive on the existing US 380? A: Daily  Q: Do you have any concerns with the existing US 380? A: The congestion and traffic backup is horrible during peak travel times. Any accident turns the road into a gridlock nightmare.  Q: If US 380 is congested, what alternative routes do you take? A: Eldorado or Virginia  Q: What solutions would you suggest in the US 380 Corridor? A: expand roads, build thoroughfares	Comment noted. Comment noted. Comment noted.
Linda Backlund	5/13/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes as long as it isn't a tollway again. There are too many tollways.  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink  Q: Which alignment(s) do you prefer in Princeton? A: None  Q: Which alignment(s) do you prefer in Farmersville? A: None  Q: What is your interest in this study? A: Business Owner, Property Owner  Q: How often do you drive on the existing US 380? A: Daily  Q: Do you have any concerns with the existing US 380? A: No, I have lived in McKinney 25 years. I consider it to be a good east-west street within the city. Plus many of my merchants/restaurants are located on this street.	Tolling is not being considered as an option for funding. Comment noted. Comment noted. Comment noted. Comment noted.
2273	5/13/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A:  Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.  Q: Do you support the building of a freeway regardless of alignment? A: No! I live in Tucker Hill, and it would severely impact our neighborhood.	No answer provided. Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
Linda Beene				Comment noted.

			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Hwy 380 has become extremely frustrating with all the truck traffic, but I know that is a product of the tremendous development in McKinney, Prosper and points west. My main concern is that the danger will be increased as steps are not taken to control traffic better. More enforcement of speeds and elimination of "death-trap" intersections like CR 852 & 380. The crossover should have been at 856 where the grade is conducive to highway entering and visibility is 1000% better making for safer entances. GR 952 is a nightmare intersection to 380.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: While improving 380 is a noble endeavor, the current plans for a bypass are short-sighted at best. Prosper is developing along 380 at alarming rates. A bypass that starts near Custer Rd will only push the bottleneck west to Prosper. Any bypass should start near Hwy 289, or NDT. Making 380 into a larger, possibly limited access road makes the most sense.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

## Comment Response Matrix

2289	Lindsey Cole	5/18/2018 Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Only on each far end. Example Dallas North Tollway and 380 gets congested and 75 and 380 gets congested. Other than that my travel is good daily on 380.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Preston or Custer Rd. ; Custer to Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: To provide a few turn lanes on the current 380. To also widen or support better traffic flow at 75/380 and the DNT/380 intersections only Sync the lights. Also limit 18 wheelers and dump trucks to one lane. The trucks cause lots of congestion. ; Have lights synced so travel would not get so congested.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, None, Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow, None, I Do Not Support Building a Freeway	Comment noted.

2293	Lindsey Rodriguez	5/10/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Not enough lanes to allow for the growth that's here and definitely not good enough for future residents. Which could chase away potential residents and frustrate or perhaps cause people to sell. Also I think it might increase accidents and car insurance as well as general unhappiness in an already hellish commute.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: 720, 423, 288 or Preston any road going south as this is where all the stuff and jobs are.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: I am not sure I have any as my background isn't in city planning but I hope there are some methods of relief. Perhaps expandin turn lanes going to south bound roads so those staying on 380 aren't bottlenecked by those trying to exit.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: I haven't read about it but I suppose I could when I could read more info</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: to congested, dangerous</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Preston (US 289), Custer Rd</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: elevated highway that goes from county line to county line</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too many lights makes getting into McKinney from Princeton difficult. 380 is our only route that is most efficient so if there is one wreck it shuts everything down.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Bridgewater or Monte Carlo I will also go over lake lavon.</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>No answer provided.</p> <p>No answer provided.</p> <p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>Comment noted.</p>

2317	Lisa Hammond	5/15/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?            A: A freeway situation with exits to access the numerous neighborhoods that have been developed along this corridor. There is also a new large school on 380 - it is unsafe for children to attempt to cross 380!! A freeway with exits would provide greater safety to this school and the neighborhoods.</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: Yes!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A: Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?            A: Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A: Pink</p> <p>Q: What is your interest in this study?            A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?            A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?            A: It does get congested on the small portion I drive it</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: I normally avoid and stick to 75 and 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?            A: I live in MD, PA and VA and I have seen bypasses go in that are not horrible 4 lanes no lights with traffic circles to keep cars moving</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: No I am worried about having a 6 lane major highway in my backyard in pecan ridge and the noise and property values of my home</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A:</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A:</p> <p>Q: Which alignment(s) do you prefer in Princeton?            A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A:</p> <p>Q: What is your interest in this study?            A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?            A: Monthly</p> <p>Q: Do you have any concerns with the existing US 380?            A: It's usually very congested. I miss the days when it was more of a highway instead of broken up by so many lights as it is now.</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: none</p> <p>Q: What solutions would you suggest in the US 380 Corridor?            A: overpass for traffic (similar to the one in Austin) for those trying to go from McKinney to Denton with no stops in between</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A:</p>	<p>Any future improvements will be designed to enhance safety.</p> <p>Comment noted.</p> <p>No answer provided.</p>

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: congestions	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: freeway with alignments	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Too many fatal wrecks. Speeding cars.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: A center median that can't be crossed over – do away with the suicide lanes. Slower speed.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It is very dangerous and the speed is too high. Maybe lower it to 40 mph?	Any future improvements will be designed to enhance safety. Suggestion for lower speed limit noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia to 75	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2324	Lisa Lazar	5/18/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No. My children's school is off of Ridge Rd. Elementary age children walk daily down Ridge Rd to get to school. Please do not make Ridge Rd a 6 lane highway right by an elementary school. The safety of parents and children are at stake. There is not enough parking at McClure Elementary. At all events, cars need to park on Ridge Rd. This would be very dangerous on a 6 lane Hwy.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.

Liz Wolff	5/15/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380? A: No</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: 380 is my option, haven't had need to use an alternative</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: N/A</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: NOI</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink</p> <p>Q: What is your interest in this study? A: Commuter</p> <p>Q: How often do you drive on the existing US 380? A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380? A: Congestion, safety, rock haulers everywhere, speed demons, not 'expandable' enough for anticipated traffic.</p>	Comment noted.
LK Lyle	5/8/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take? A: Fishtrap Road/1st Street in Prosper, or 121 to Bus 121 to I-35</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Go farther north and build a loop road (think of what PGBT is to 635, with Beltline between: 380 could eventually be a "Beltline").</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: No. A new freeway should not take small acreage homes. It should be farther north - maybe between Celina and Prosper tiers.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Blue</p> <p>Q: What is your interest in this study? A: Commuter. Nearly resident. Fiance' owns property</p>	Comment noted.
2340			<p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: Very few.</p>	Comment noted.

2341	Lloyd Brim	5/3/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A: Perhaps use tunnels in high traffic sections.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No, absolutely not.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue, None</p> <p>Q: What is your interest in this study?  A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: Many accidents with high speed limit. It's a main highway for trucks AND a local road for residents.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A:</p>	<p>Comment noted.</p> <p>Any future improvements will be designed to enhance safety.</p> <p>No answer provided.</p>
2342	Lobelia Miller	5/15/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A: Northern loop for highway traffic</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: What is your interest in this study?  A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A:</p>	<p>Comment noted.</p> <p>No answer provided.</p>
2343	Logan	5/15/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A:</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No, Keep Erwin Park right where it is</p>	<p>The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjusted to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.</p>

			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: NOI	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too much traffic	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: White Street	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Alternative highway North of 380	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No, I do not. Go north.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Well it is becoming more congested lately and turning it to a freeway seems the best option.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: The alternate from 380 is Virginia or Eldorado which is not much faster. 380 is still the best option	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I think making it a freeway where there are less lights, would speed things up a bit	Initial traffic analysis does show that travel times would likely be reduced should a freeway be constructed and traffic signals eliminated. However, if TxDOT opts to not move forward with constructing a freeway, we will continue to find ways to enhance safety and improve traffic flow.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Local residents' homes, Erwin Park	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
				Q: If US 380 is congested, what alternative routes do you take? A: Preston to Chote Road	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: No	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.

				Q: What is your interest in this study? A: Nearby resident	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
2350	5/17/2018	Electronic Survey	Q: Do you have any concerns with the existing US 380? A: The magnitude of the building in the area will cause a particular problem with the access to the hospital. Left turn lanes in the middle of oncoming traffic is already somewhat problematic. Q: If US 380 is congested, what alternative routes do you take? A: If at a particular time of day, Virginia Parkway to Hardin then north White across to 75	Comment noted.
Lorene Teed			Q: What solutions would you suggest in the US 380 Corridor? A: Frontage or access roads such as 75 has	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes, if the development of the area with increased population is the speculation.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. The mix of commercial traffic and no other alternatives for residents is lethal. Build a huge loop and pull this traffic out of the mostly residential paths!!	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Don't add patches of bypass! Build a huge loop see loop in El Paso). No tolls, this is not Houston!! We can't afford to pay more tolls. Again, see El Paso's loop. Heading northbound, the loop should exit 75 around the I21 exchange at Fairview, and circle behind the Heard museum, around the airport (great access to the airport), cross 380 around New Hope, cross 121/75 in Melissa, through the farmlands and connect with the DNT in Prosper. Think of the future expansion of the North area! Don't just patch the situation! Build the loop!!	Comment noted. Alignment options are still being evaluated.
2351	5/9/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
Loretta English			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

Alignment options are still being evaluated.</p> <p>Comment noted.</p> <p>Comment noted.</p>

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Insufficient stop lights through McKinney. Not enough right turn lanes, causing cars to turn right with high speed traffic coming from behind.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Ridge/Stacy to 121, Custer, Eldorado to DNT, White to 75	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: If working with the existing 380, build up rather than expand. Create more feeder roads for back ways to major highways.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I don't have enough info at this time.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Going west I use DNT or Eldorado. Going east or south I drop down to Virginia or Eldorado or take Alma all the way down past 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I like any of the options except for the red one.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Not the red option. Horrible for homeowners just east of stonebridge.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue	Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
2363	Lou Ann Jackson	4/27/2018  Electronic Survey	Q: Do you have any concerns with the existing US 380? A: noise from traffic  Q: If US 380 is congested, what alternative routes do you take? A: none. I live directly off 380	Comment noted: A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.  Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: retaining walls to protect home owners from noise level of traffic.	Comment noted: A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.  Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: I don't mind travelling 380 to the tollway or 75. If I were travelling further to the west, I would choose an alternate route	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 121, Virginia Pkwy, or North on Custer then east or west	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Bigger Better east/west roads in Prosper and McKinney north of 380	Comment noted.
2364	Lou Gehm	5/10/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: no	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: none	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: upper lanes for thru traffic	Comment noted.
2365	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Elementary school on Ridge Rd, just off 380 would be unsafe. Stonebridge is main neighborhood thoroughfare and which has a city playground & elementary school. Custer Rd. is already a busy road with businesses and gas stations.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Extensive money already invested in widening Virginia Pkwy. which is a good alternative.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It is a very dangerous highway. Have witnessed at least two fatalities in 7 years.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Try to never to be on 380 during peak times.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widen 380 and build overpass over 75.	Comment noted.
2367	Louise Daley	5/10/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The lack of enforcement of the speed limit– until people stop going 75 in a 55 zone and swerving in and out and cutting people off (and until law enforcement actually starts enforcing the speed limit), 380 is always going to be a dangerous drive. The speed limit should definitely be much lower. I hate sitting in the left turn lane at Ridge Rd in McKinney and having my car ramble as trucks rush past going 75.	Any future improvements will be designed to enhance safety. Enforcement of traffic laws is the responsibility of local police departments.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia, tollway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Put in turn lanes, lower the speed limit, think before building new retail. McKinney is quickly becoming another Plano with all the building, which I don't like. It's no longer "unique by nature". The grade separated intersections could be okay - would need more info. I like traffic lights, because it at least forces people to slow down once in awhile.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
			Q: Do you support the building of a freeway regardless of alignment? A: No. I do not. Freeways in Texas are the worst. Too many people speed, and too many people cut you off trying to get to their exits last minute. People merging in don't have enough space, and it's hard to let them in. I can't count the number of times I've almost died on 75 or the tollway-- and I've only lived here for a year. It is also way too costly to build a freeway.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.

2378	Lynette Terrell	5/11/2018	Paper Survey	<p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: can be congested during peak hours</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: usually just stay on 380 if I have business on 380. Otherwise I go south to Virginia Parkway</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: - make turn lanes to help traffic keep moving - use over or under passes for through traffic - widen 380 where you can - encourage McKinney or whoever is responsible to build out the northern routes, Bloomdale &amp; Wilmett. We have no easy, local choice to the north of 380, this would help tremendously to ease the traffic on 380</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: no, absolutely not Please do not destroy neighborhoods!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment, Please spare the neighborhood on Bloomdale</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A:</p> <p>Q: What is your interest in this study?  A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: Yes, too congested, too much commercial traffic, need outer loop to be built for thru traffic.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Virginia, White, Wilmett, Eldorado</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Get plans for outer loop done to compliment 380 solution, pull thru traffic out. Freeway is preferred for safety and flow.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p>	<p>Comment noted.</p>
2379	Lynn Ballard	5/15/2018	Electronic Survey	<p>Q: What is your interest in this study?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

	Commenter Name	Date Received	Source	Comment Topic	Response
2380	Lynn Bender	5/9/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: It's dangerous. There are so many accidents.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A:</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Make 380 into a highway with a service road.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: I'm not sure what this question is asking. What does "regardless of alignment" mean?</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: sit through just like I used to do in Los Angeles. They widened the 10 to 12 lanes. All it did was provide an additional lane beyond the 5 they already had for cars to sit. Sitting in traffic is a way of modern life.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: None. It's a little to late. As people move out beyond east McKinney they should be more cognizant of allowing businesses so close to the road. Purchase easements so it doesn't become a future problem.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Trick question. A freeway is necessary but NOT at the expense of Stonebridge Ranch. We will pay in lost property value, our beautiful medians and trees will be cut down. We homeowners pay for the beauty in OUR neighborhood. Some commuter speeding down our streets has no vested interest in the community therefore, their needs should not be met at OUR expense!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p>	<p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted. The question is trying to ask whether construction of a freeway would be preferred over improvements that do not construct a freeway.</p> <p>Comment noted.</p>

			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I don't	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Not down Bloomdale	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, None, I Do Not Support Building a freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, None, I Do Not Support Building a freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Hardin to 75	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
2400	James Thompson	5/1/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes traffic congestion.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Eldorado Parkway	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bypass arteries north of 380 or east of 75.	Comment noted.
2407	Marci Williams	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Not on the existing 380. There is still plenty of farmland north of 380 to build a freeway.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion during peak commuting hours. Need light at Cypress Bend neighborhood entrance.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 407	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widening.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not sure	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
2408	Marcia Jones	5/2/2018	Electronic Survey

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes - not traffic controlled - to many cars.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: 546	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: More traffic signals - lower speed limit - extra lanes.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights, lanes, and lower speed limit has been noted.
2420	Mari J Echavarria	5/15/2018	Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A: Possibly	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Highway 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Finish widening of 380 to DNT Traffic lights synchronization	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: NO definitely not.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Not really - since I travel from Custer to DNT, Prosper and Frisco have planned appropriately and are managing the congestion well. It is only McKinney that has failed to plan.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer to I-21	Comment noted.
2422	Maria Mercer	5/22/2018	Q: What solutions would you suggest in the US 380 Corridor? A: Absolutely NO ByPass! Right turn lanes (Between Lake Forest and 75, there are 24 right turns eastbound and 31 right turns west bound, including none at Trade Days.) • Build out E/W arterial roads • Build over and under at intersections, similar to the new overpass at Preston and 380 where possible • Widen 380 where possible • These improvements may result in less congestion on 380 as people divert to the arterial roads and the Outer Loop	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I do not support building a ByPass that causes people to lose their homes. Specifically, the Blue and Yellow alignments are horrible. Right turn lanes (Between Lake Forest and 75, there are 24 right turns eastbound and 31 right turns west bound, including none at Trade Days.) • Build out E/W arterial roads • Build over and under at intersections, similar to the new overpass at Preston and 380 where possible • These improvements may result in less congestion on 380 as people divert to the arterial roads and the Outer Loop	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: no	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
2423	Maria Snyder	5/19/2018	Q: What solutions would you suggest in the US 380 Corridor? A: I am ok with it but hope there will be a service road. There is a lot of commercial zones and they will continue to be increased Q: Do you support the building of a freeway regardless of alignment? A: Unfortunately 380 has become a major access road with the increase of population in the area. There is a lot of truck traffic therefore I see the need for a highway there. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

				Q: Do you have any concerns with the existing US 380?	Comment noted.
				A: Yes	
				Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
				A: n/a	
				Q: What solutions would you suggest in the US 380 Corridor?	Comment noted. Any future improvement projects would include assessment of environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; not on or bordering Tucker Hill.
				Q: Do you support the building of a freeway regardless of alignment?	Comment noted.
				A: No	
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
				A: None, I Do Not Support Building a Freeway	
				Q: Which alignment(s) do you prefer in McKinney?	Comment noted.
				A: None, I Do Not Support Building a Freeway	
				Q: Which alignment(s) do you prefer in Princeton?	Comment noted.
				A: None, I Do Not Support Building a Freeway	
				Q: Which alignment(s) do you prefer in Farmersville?	Comment noted.
				A: None, I Do Not Support Building a Freeway	
				Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: How often do you drive on the existing US 380?	Comment noted.
				A: Weekly	
				Q: Do you have any concerns with the existing US 380?	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				A: 380 is dangerous, and congested most of the time. The middle lane, aka. suicide lane is horrible.	
				Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
				A: FM 546 and/or CR 406	
				Q: What solutions would you suggest in the US 380 Corridor?	Comment noted.
				A: Add more lanes, and existing corridor.	
				Q: Do you support the building of a freeway regardless of alignment?	Comment noted.
				A: Build a freeway, use existing corridor.	
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
				A: The Green/Pink Alignment	
				Q: Which alignment(s) do you prefer in McKinney?	Comment noted.
				A: Red	
				Q: Which alignment(s) do you prefer in Princeton?	Comment noted.
				A: Green	
				Q: Which alignment(s) do you prefer in Farmersville?	Comment noted.
				A: Blue	
				Q: What is your interest in this study?	Comment noted.
				A: Commuter, Property Owner, Nearby resident

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: We need to finish other roads and build the outer loop sooner	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: None. We need to finish other roads north of 380	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses. Fixing 380 at 75. A bypass would not relieve enough traffic. The fastest way from point a to b is a straight line. Not driving miles out of the way.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
2428	Marilee evans	5/18/2018 Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No. We need to finish the other roads so we have other options so all the traffic is not on 380	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes traffic is outrageous	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: there are no alternatives	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: highway around the town like in austin	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No. It's busy but the traffic flows nicely.	Comment noted.
2439	Mark Blain	5/9/2018  Electronic Survey	Q: If US 380 is congested, what alternative routes do you take?  A: Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make it a freeway with side roads on the existing path	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Only if it's on current routes. No bypass	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: not really - congested nearing US 75	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: east-west roads to the North or South	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Referring to the study conducted in August 2016, I vote for making intersection improvements and Not turn it into a freeway with access roads. Instead, focus on the east/west and North/south roads to the north of 380 in McKinney, which is where the growth is. Note: Please delete my previous survey as I was not informed at that time. This is my current stance.	Comment noted. Alignment options are still being evaluated.
2440	Mark Bunker	5/7/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No. In my opinion, it is too late given all of the development along US 380 through McKinney. I have done a lot of road trips throughout Texas and the U.S. and very few towns allow a divided highway to go right through their town. If done, it needs to be a depressed highway to minimize the impact to the surrounding communities.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
		5/3/2018  Comment Form	I live in Tucker Hill, McKinney and it is frustrating to see all five routes, impacting us. We can probably support red, pink, or green if the impact to the front of our neighborhood can be greatly minimized.	Comment noted. Alignment options and roadway configurations are still being evaluated.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic flow near larger intersections is not only subject to significant congestion, but can also be perilous especially during peak volume drive times. As the city (s) develops around 380 it should be treated as an infarct roadway rather than a freeway.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Smaller city streets to the south since little east / west routes are available to the north.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I oppose enlarging the current route in any manner due to the impact that would have on existing development around the current route. Realizing there is a need for improved traffic flow, I am more in favor of another route to the north where future development can be planned around the new route.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. A freeway through McKinney where the is already substantial existing development is not the right answer. Other cities would also be affected, but McKinney would be the most negatively affected by a freeway aligned along the current route. It would not only hurt current property owners it would hurt future growth along the current route by creating a dividing line in the what will be the heart of the city as expansion continues north.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A: Nearby resident	Comment noted.
				Q: What is your interest in this study? A: Weekly	Comment noted.
				Q: How often do you drive on the existing US 380? A: Yes	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: No alternative	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Freeway aligned with existing 380	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: There was a 380 shutdown near Princeton where we took side and back roads that were north of 380 to get around.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Accident analysis to determine greatest areas of consistent traffic challenges and then insure that there are detours to deal with them. In terms of road development, understanding where the greatest number of residents could be negatively impacted and weighing against the potential benefits. Right now, we can't tell which option would provide the greatest benefit and the least negative impact.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: We appreciate that you are evaluating this prior to it becoming a crisis and where open land is still available. We agree it needs to be addressed if growth happens at forecasted rates, however we are concerned with the level of growth that seems to be happening for the sake of growth. We moved to McKinney in 2015, because it had been ranked the #1 city. The writers confirmed that the optimum size for a happy city/town was 75-150K. We don't understand why McKinney or other surrounding cities want to become 400K+ cities which will make them as miserable as LA, the area we moved from where it's giant parking lot that offers no distinction between cities.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, Yellow	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not opposed to the by-pass with any of the current proposed alignments.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380.ay in Prosper due to possible 'cut through' traffic to connect with proposed by-pass versus expanding the current alignment of 380	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Request consideration of the impact of the proposed by-pass on First Street, Prosper Trail and Frontier Parkway	Comment noted. Alignment options are still being evaluated.
2448	Mark Hitchcock	5/18/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.

				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Traffic	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: N/A's connectors to the ew connector roads	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Complete the outer loop. Take the thru traffic off of 380. An extra 4 miles at 70 MPH will not matter to those thru drivers. They will do it to save time.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
2461	Mark Sedwick	4/26/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No, not regardless. It makes no sense to build a bypass to take the thru traffic off of 380 to dump it back onto 380 long before the overpass built at Preston. There will be a huge backup created at that drop off point. The outer loop is designed to do exactly what is intended. Connect highways so that thru traffic continues uninterrupted. Alternatively, complete 380 as an actual highway.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Head on collisions	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: TX-78, Monte Carlo Blvd	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Freeway with limited access	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: There are too many cars on it.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Its a secret, I don't want anyone else to know.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Send the all the people who moved here back to where ever they came from.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: What does this even mean? If you mean seizing private land without consent, no, I do not support that, if you compensate land owners for their land AND have their approval, yes. Please, the most direct route possible with roundabouts. These are awesome, please use them. No lights or electricity.	Comment noted. Alignment options and roadway configurations are still being evaluated. All right-of-way acquisitions would be performed according to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearly resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Speeds are too fast and too many accidents occur at intersections. It needs work - but can't be done in its current borders	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I take side roads, like Ridge, Stonebridge or Lake Forest to Virginia - then over to 75 or Custer	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: A whole new highway needs to be built. Too much (good) development is happening in McKinney and an expanded freeway-style 380 will destroy retail and residential property that make McKinney unique.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No - it can't be expanded in its current form. Common sense says it needs to be re-routed along the proposed blue or yellow paths.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too busy, too noisy.	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Yellow	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It's too busy Too fast Too many accidents at Tremont and 380	Comment noted.
			Q: If US 380 is congested what alternative routes do you take? A: Any major road off 380 Ridge, Lake Forest, Custer, Hardin, Preston, etc.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Northern bypass route. Would love to see something from Denton to Princeton, but not on 380.	Comment noted.
2472	5/16/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: 75 N exiting onto 380 is still extremely congested, even with the improvements that have been made. An Over/Under at this intersection would alleviate this congestion.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Over/Under at the 75/380 intersection. Widen 380 from McKinney to Denton.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes; however, I do not support another toll road. The 3 we have is sufficient	Tolling is not being considered as an option for funding.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
2473	5/11/2018	Electronic Survey	Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: There are many semi's and some of them drive as though they were in a car.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I don't.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I imagine a lot of the excessive semi's will reduce over time as the development builds out since that what help increase to begin with. Have semi's drive at a speed that takes their loads into account.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: The solution that is actually needed would be to connect the Dallas North Tollway with the 75 freeway on a separate freeway north of the 380. Otherwise leave it alone. Putting access in what are actual neighborhood streets like Stonebridge Ranch and Ridge would not only cost a lot of money without fixing the real problem but would help decrease revenue to the county by driving down property values. It would also unnecessarily inconvenience anyone trying to get through the area while under construction.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It has way too much traffic for its current design. There are lots of huge trucks, and too many lights.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: white avenue or hardin blvd	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: a freeway would alleviate congestion	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: support the building of a freeway as long as it stays on top of the current 380 and doesn't deviate into the subdivisions.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.

TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.</p>

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
2478	Martha Sisseck	4/26/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: Custer to Stacy to 121, Custer to Virginia to 75, Custer to 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Similar to 121 with feeder roads and overpasses, IMMEDIATE NEEDS is medians in the areas that have grown like Princeton and reduced speeds in business and highly residential areas east of 75; ultimately a bypass freeway</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes, prefer bypass solution</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Yellow</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Traffic driving too fast. Numerous accidents at the entrance to Tucker Hill; There are too many large trucks traveling above the speed limit making it almost impossible for them to slow for traffic light at TUCKER Hill</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: There are no other options. There are no alternative routes for me to get to my development</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; and sound barriers. Also, if any bypass option is chosen, I must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill; Renot trucks to a bypass or limit trucks to the left lane</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No; Not sure a freeway is the answer. Perhaps more east/west four lane streets like you see in Plano such as Legacy</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: None, I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?  A: Commuter, Runner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A:</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A:</p>	<p>Comment noted.</p> <p>Comment noted. Will a wall be placed on the berm to reduce noise please note: the lake bounce the sound all over the neighborhood.</p>	<p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>The location of Princeton Lake was taken into consideration when alignments were developed.</p> <p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p> <p>A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Comment noted.</p>

2496	Mary M. Stevenson	4/26/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: I have known (as a professional driver before retirement) that the way the city was growing that Hwy 380 would need fixing soon - that never happened. Even the McKinney 2040 study didn't take this into account. They said the that this was the State's responsibility to upgrade but we the homeowners and businesses have to deal with the fix when it is mandatory that it be implemented.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: I go south or north on any avail road away from traffic, backroads. (everybody else is doing the same)</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Suggest that we have a toll (?) express lanes underground like Dallas did with 635. I was skeptical of it before I saw it built and now I love it and it doesn't affect the nearby buildings and I think it helps with keeping the noise pollution down.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes, underground along with maybe a supplemental express subway to/from Denton.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too many lights, too much construction, not enough lanes, people drive about 20 under the speed limit. The problem for me is with Denton through McKinney.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Just sit and wait. There's really not alternate route for where I come from and where I'm going. It would be a waste of time to go out of the way.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: I would suggest overpasses or redirecting some of the traffic off of the highway, and take out some of the lights. I also think the speed limit needs to increase.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Heavy traffic</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia Parkway</p>	<p>Comment noted.</p>

		Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway		Comment noted.
Mary Remington	2500	Dear Mr. Endres,  I wanted to take a moment to provide a formal written and mailed correspondence in response to the request for public comments related to the proposed expansion of US-380 through McKinney. I attended the public meeting last week, and I completed the online survey, but I wanted to be sure my comments were made on record and not just part of an online poll.  I believe, as do most of my neighbors, that a conversion of US-380 into a limited access freeway is unfeasible for the community, our homes, our neighborhood amenities and our neighboring businesses and other communities like Stonebridge Ranch (directly across 380). Such an expansion to of 380 would limit our access to our own community, limiting our ingress/egress to and from our neighborhood, reducing times for first responders and access to nearby hospitals and support services.  I/we also believe that the blue/red/yellow proposed routes bypassing 380 to the North and dumping into 380 on the near East or West side of our neighborhood would be catastrophic to our home values, quality of life (noise and air pollution) and not aid in traffic plight. Our community and city provided feedback in late 2016 showing that the 380 connection should not occur closer to Custer road, even if on the McKinney side, and not the shared side with Prosper. This reroute would negatively impact significantly fewer homes and businesses.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.	
Mary Remington	5/10/2018	Letter  The city, county and TxDOT should focus on continuing to improve arterial traffic on N/S and E/W arterials, and expand the Collin County loop just a few miles north of 380. By providing the community and businesses with simple, non-highway methods for navigating town to get to 75, 121, 380 or the tollway and not opening up another freeway and inviting more through traffic. We can also improve the bypass and county loops, connecting to 377 and the tollway to 75 to reduce the impact of intra-county commercial traffic along 380 (construction vehicles, gravel/dirt haulers, cement trucks, etc. that currently plague 380).  Our community has spoken, but we want to be sure we are being heard.  Thank you for taking the time to review my comments. If you would like to discuss any of these options with me, please do not hesitate to contact me directly.  Sincerely, Mary Remington [REDACTED]	Comment noted.	
Mary Salmon	5/15/2018	Electronic Survey  Q: What solutions would you suggest in the US 380 Corridor? A: The existing highway needs to be expanded and overpasses added with entrance/exit ramps. It needs to be a true freeway.  Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.	Comment noted.
Mary Salmon	2501	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.	Comment noted.

				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Speed	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen and offer local lanes	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident, Retiree	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes! It has been congested for many years. A: Any I can find.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Underground freeway or toll road that pays off the road and then provides maintenance. Provide for disabled, elderly and/or poor or biz commuters by providing rail or subway. Provide for bicycles so that they can get across the road and not impede traffic. Trade Days traffic and noise is unacceptable. Neighborhoods along 380 will need noise barrier fencing.	Comment and suggestion noted. Tolling is not being considered as an option for funding. Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project. Any proposed improvements would include consideration of bicycle and pedestrian accommodations. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with Federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.
				Q: Do you support the building of a freeway regardless of alignment? A: Don't like the idea of bypasses through McKinney and Princeton. We will have an older loop. That will be the bypass needed. People don't want their homes/farms ripped up and more than necessary and agree. We need to maintain the "unique by nature" aesthetic as much as possible. That's why underground is my idea to provide the needed expansion and keep it out of direct sight with minimal adjustment for families and biz.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
2502	Mary Smith	5/16/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Underground freeway or toll road that pays off the road and then provides maintenance. 2512	Matt Baker	5/16/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?            A: Go forward with the most northerly route you can. If you build a bigger road, the traffic noise will get even worse than it is and will ruin our property values and lifestyles. Go north where the housing is not yet dense</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: Absolutely not. I oppose and will protest the enlarging of the existing roadway into a freeway.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A: The Blue Alignment, None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A: Blue, None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?            A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A:</p>	<p>Comment noted. Alignment options still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>No answer provided.</p>
			NA	<p>Very concerned citizen/Homeowner            As a homeowner on the northside of McKinney, with 1/2 mile or less to 380, I am very concerned about the potential impact of a enlarged or rerouted 380 "Freeway". The correct noise of 380 is already effecting our lives and a change to 380 would only make it worse! 380 can be busy, but only during peak commuting times... will fight/protest any change that will have an adverse impact on our lives and property values. I think another option should be considered which moves the "re-configured road" even further north and west. The Blue plan is the closest to an option, but still not acceptable.</p> <p>Q: What is your interest in this study?            A: Commuter, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?            A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?            A: Yes, too many lights.</p> <p>Q: If US 380 is congested, what alternative routes do you take?            A: Yes, south on Custer to 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?            A: It will need to be a freeway soon or we will have major traffic problems as population grows noth.</p> <p>Q: Do you support the building of a freeway regardless of alignment?            A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?            A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?            A: Green, Pink, Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?            A: Blue</p> <p>Q: What is your interest in this study? 	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2521	Matt Lear	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Not with current alignments.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion seems to be increasing by the day	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: On occasion, I'll utilize Rock Hill Road, but the condition of the road is awful.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I believe the highway should be 8 lanes from US 75 to DNT.	Comment noted. Alignment options still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: Not regardless of alignment. A freeway certainly needed, but there has to be a common sense approach to the routing. I live less than a mile South of the existing highway and wouldn't want it any closer to my neighborhood.	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
2522	Matt Morgan	5/15/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Truck traffic	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Collin outer loop	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: Use the blue or yellow plans to move the highway bypass further north.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Only if the blue or yellow routes are used. I do not want the expansion of 380. I feel that having a bypass that moves north of the current 380 is a better solution.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Speeding, distracted driving, large trucks are a big concern when driving down 380	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia or try to weave around the side roads	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Cost wise, especially with so much new development coming to the roadway right now.	Comment noted. Alignment options are still being evaluated.
2565	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: I support it if it is not expanding the width of 380(north or south)	Comment noted.
Megan Ball			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It's very dangerous and the traffic flow is horrible. The middle lane being open is what I believe causes so many fatalities. I worry about driving on 380 when it's not congested because I feel during the less busy times that's when the severe accidents occur bc people end up on the other side of the road.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I typically just wait on 380	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I think we need an additional lane, buy out the trashy businesses and homes that lead up to Princeton and put an additional lane on each side. I also think the middle lane needs a concrete median that controls where traffic is able to turn. Hopefully that would eliminate the problem of ending up on the other side of the highway	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting bids in August 2018, and construction is anticipated to begin during the fall of 2018.
2566	5/8/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes but do it as quickly as possible bc there's only one feasible way into Princeton. Taking backroads is going to be a huge headache if construction takes forever which I feel like is how construction goes in DFW	Comment noted.
Megan Beasley			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes it is VERY congested. In the mornings and evenings the traffic easily adds 20-30 minutes to my commute. Up to over an hour if there is a car accident or construction.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: If I can't get to the freeway quick enough I will take 423.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: More lanes, better lighting on stop lights, and more entrances and exits for Paloma Creek South.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: If that's what is necessary, yes.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: I'll take a North/south road to get a bit south. No then cut back to 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand 380, fire the previous planners in McKinney that allowed businesses to build right on the road. If a double decker hwy is possible I believe that is a good option. Move forward the building of the outer loop.	Comment noted. Alignment options are still being evaluated.
2590	Melissa Cody	5/22/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It has a speed limit of an interstate with lights. Dangerous!! Plus sit and wait for light to make a left hand turn and traffic goes flying by you while you wait. Dangerous as you can literally feel the traffic go flying past you while you waitZ dangerous. Our 16 year old is not allowed to drive 380 due to excessive speeds, congestion, lack of visibility and left hand turn situation.	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turn it into an Interstate. That is how people drive it and to reduce the speed limit would do no good as people would still speed rap the large construction trucks	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
2591	Melissa George	5/15/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I never have an issue with 380. The only time I may use a different route is Harden to White Ave when going downtown McKinney.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2601	Melissa Sanders	5/17/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: There are a lot of accidents and they are often fatal. All the 18 wheelers use it and the speed limit is high, yet kids use it to drive to school and McKinney residents use it to get to the Northern part of McKinney and Central Expressway.	Comment noted.
				Q: If US 380 is congested what alternative routes do you take? A: Virginia Parkway to 75. Sometimes I'll use Lake Forest or Hardin to cut over.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Slow it down through McKinney and give trucks an alternate route.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I like the idea of a freeway because it will include access roads as an option. But I'm not sure it will be good for Stonebridge and Tucker Hill. But at least you won't be displacing property owners.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Way too many stoplights, especially between Custer/75	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eastbound - Wilmeth to 75; or 380 to Hardin to (Virginia or White) Westbound - 75 to Wilmeth	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: congested, to many signals, dangerous with people pulling out in front not yielding right of way	Comment noted. Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: None, there's not an alternative	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Limited access and build a new highway from Rockwall to McKinney while staying north of Farmersville allowing the area to prosper	Comment noted.
2616	Michael	5/10/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No concerns at this time	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado Pkwy	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2617	michael	5/13/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.

2620	Michael Alcorn	5/17/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes - too much traffic. 380 is our only route in and out of our neighborhood. There are several wrecks every week. We do NOT need more 380 lanes! The increase in thru traffic is getting ridiculous. There needs to be different route for this thru traffic, not expanded lanes for more traffic. 380 is the only way we can get out of our neighborhood onto a street and currently there are about 2-3 wrecks per week in front of our neighborhood (Tremont and US 380). The thru traffic always has the 'pedal to the metal' with no regard for safety, run red lights, and etc. to get thru West McKinney. We don't need this nor do we want this traffic. There must be a better option to relieve the growing traffic other than expanding lanes.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: We do not have any alternative routes. Expanding 380 would be devastating.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill; Route East/West thru traffic via a northern and/or southern loop. Look at Denton - 350 thru town is routed via Loop 288, not thru the middle of town.</p> <p>Q: Do you support the building of a different or new freeway but I do NOT support expanding lanes on 380.</p> <p>A: NO! I support the building of a different or new freeway but I do NOT support expanding lanes on 380.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue, None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue, None</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: I think widening the road, putting in lanes or building an Express way over 380 would help with the flow and accidents.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Lake Forest or Custer to 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: I think widening the road, putting in lanes or building an Express way over 380 (example, Downtown Austin)</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No, I do not want to lose the unique nature of our Timberidge subdivision.</p> <p>Q: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	<p>Any future improvements will be designed to enhance safety. Suggestion for more traffic lights and safety concern at Tremont and US 380 has been noted.</p> <p>Comment noted.</p> <p>Comment noted. Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Do you have any concerns with the existing US 380? A: None as existing	Comment noted.
2622 Michael and Lisa Cusick	5/13/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Never feel 380 is too congested, even during rush hour.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses at key intersections. No other changes	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No! It is, and will not be necessary if the remaining primary and secondary roadway infrastructure is completed in Frisco, Prosper and McKinney, and the outer loop is constructed.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: I live in Robinson Ridge (near Lake Forest and Wilmette). If I need to go East, I have no alternatives north of 380. South of 380, I'll use Virginia or Eldorado. Heading West, I'll often take Lake Forest all the way to 121 to avoid the congestion on 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Ftk 380 on 380. Build out Wilmette and Bloomdale to 4-lane roads so there are options north of 380.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes, but only on 380. When I moved to McKinney 10 years ago, I assumed 380 would one day be a freeway. I've been stunned that they've allowed business and residential construction so close to what was obviously going to have to be a freeway.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Computer, Business Owner, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A: Eldorado Stacy Rd / Main Street Sam Rayburn/121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Make it a tollway from Greenville to Denton with access roads. This would reduce traffic going through Dallas, promote growth, and speed up the flow of commuting. If that is too far, recommend considering Tollway on 380 from Hwy 75 in McKinney to I-35 in Denton.	Tolling is not being considered as an option for funding.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many traffic lights	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No concerns with the existing US 380	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: Today, I do not find the congestion level of US 380 to be a hindrance where an alternate route is necessary.	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.. With the growth of the population along US 380 in the coming years, I can see a dire need to bypass US 380 altogether, running a route north.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: I do not support the building of a freeway regardless of alignment.. No, I do not support a freeway along the current US 380 roadway. I do support a freeway reroute north of the current US 380 roadway.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.

				Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congested traffic especially at peak hours and speeding vehicles.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Unfortunately, no very good alternatives - Virginia Pkwy and Eldorado are poor alternatives.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: North of existing 380.	Comment noted.
2642	Michael Longley	5/9/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: very crowded at 380 and 75	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Outside loop north of 380	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: maybe	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
2643	Michael Malakoff	5/15/2018	Electronic Survey		

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Building a home in Princeton and will move in this summer.	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: To assist with my 380 commute and others, 18 wheelers should only be allowed in center lane unless turning at a particular intersection on 3 lane wide and left lane on 2 lane wide. This would free up more travel lanes	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't. It's 380 or 380.	Comment noted.
2644	Michael Marshall	5/8/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: All route needs to be a straight corridor from one end to the other. From Farmersville to Denton.	Comment noted. Alignment options are still being evaluated.
				Q: Do you support the building of a freeway regardless of alignment? A: No, and I don't support any idea of toll.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No, other than there's not enough law enforcement of the speed limits.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: For me, 380 is a connection route between the Tollway and 75. Frankly, I'd like to see more \$\$ invested on the North & South routes than the East & West throughfares.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Widen existing roadway. Better timing of lights. Increased law enforcement presence to reduce reckless speeding. Minimize the amount of commercial development which attracts traffic, traffic that in turn affects neighborhoods with its noise and need for additional lanes.	Enforcement of traffic laws is the responsibility of local police departments. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: No, All additional building that takes place should be done in a way that does not impact existing neighborhoods. That means the State better buy the open space now before additional neighborhoods come into being and the land gets even more expensive.	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.

			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It's very congested. Turning left out of Community is very difficult as traffic in the right lane backs up heading towards 75.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Community to Wilmeth, community to Virginia or White	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: More parallel routes to take the traffic or turn it into a freeway.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Will depend on alignment as some of the proposed routes don't seem like they would do much to alleviate congestion due to business traffic.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Yellow	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion at US 75 intersection; otherwise flows well	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Will avoid the US 75 intersection via Wilmeth Road to Hardin Blvd	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Simple widening of 380 along existing route	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, I Do Not Support Building a Freeway	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. Safety. Becoming very dangerous. Silly drivers speeding and cutting corners	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Go further north where there is land. A high school is going to be built on prosper trail/Mckinney spur proposed site is too dangerous as there is driving on this road. Make a big loop going north while there's land. The prosper trail/Mckinney spur is good during school sessions. Every here there are a lot of new teen drivers and they are not too experienced.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: It will be needed. Yes; Yes unfortunately. But why are you allowing so much being built on 380? Why not diversify the area. It doesn't have to become so ugly.	Comment noted. Zoning and building permits are the responsibility of local governments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

2672	Michelle Davis	5/14/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Don't take out beautiful green spaces to accommodate another Texas highway. If there is a beautiful park, enhance it. Portland parks are so beautiful and compromise a good part of their city. It allows a much needed break from TX highways where families can spend time in nature. The last thing TX needs is more concrete. We need more space to live and find space in our busy highway driving lives to appreciate nature outdoors. You'll have happier residents.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: 75</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A:</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Medians are becoming dangerous. Heavy traffic. 			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The numerous stop lights creates a "beat the light" situations. The speed is high considering the number of lights and vehicles turning. Q: If US 380 is congested, what alternative routes do you take? A: Usually we just wait it out. If there is an accident that we know about, we will consider Virginia with Coit and Custer.	Any future improvements will be designed to enhance safety. Suggestion for fewer traffic lights has been noted.
2681	Michelle Lovland	5/18/2018 Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: The 'I-21 design seems to work well except at the major highway interchanges (at DNT is pretty bad). There is a lot of local traffic that travel 380 - if you could keep this traffic on the frontage roads and treat 380 as through traffic, things would flow more smoothly. Q: Do you support the building of a freeway regardless of alignment? A: No. There are a couple of alignments that don't seem like they would help reduce traffic on 380 because they seem more like a detour rather than a quicker path. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: I feel like current 380 is accident prone because there are a lot of trucks moving quickly and there are also a lot of stoplights that could be a problem for speeding vehicles and distracted drivers Q: If US 380 is congested, what alternative routes do you take? A: I have no good alternative route. Unless using Virginia is an option, but that is adding a couple miles each direction	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I can't speak to that because I am sure there are many factors I am unaware of Q: Do you support the building of a freeway regardless of alignment? A: I would hope that residents don't have their properties infringed upon, or their property values decreased with whatever solution is agreed upon	Any future improvement projects would include an assessment of the potential impact on the human and natural environments.
2682	Michelle McDaniel	5/17/2018 Electronic Survey	Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
2687	5/10/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No exit lanes to get off the highway safely and equally as dangerous to leave a neighborhood straight onto the highway.	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.
			Q: If US 380 is congested, what alternative routes do you take? A: It is always congested. Eldorado Hwy is an option.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widening the highway to allow for an exit lane on either side OR possibly a HOV type route (think hwy 35 in Austin where the lower part of the highway exits into downtown and the upper bridge route bypasses everything).	Comment noted.
2688	5/14/2018	Electronic Survey	Q: If US 380 is constructed as a freeway regardless of alignment? A: No, 380 can keep the same footprint. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2689	5/10/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
2694	Miguel A Avalos	5/15/2018 Electronic Survey	Q: Do you have any concerns with the existing US 380? A: with the growing rate of mckinney, congestion is becoming unbearable not only during peak hours but throughout the whole day. Not to mention the upcoming opening of Costco and Cinemark, which will definitely flood US380 Q: If US 380 is congested, what alternative routes do you take? A: Virginia/Louisiana if i need to go west/east of 75, which is a lot of people's alternative causing congestion. Q: What solutions would you suggest in the US 380 Corridor? A: 1. ramp for quick access to hwy 75 or a double decker ( free flow above, going through stoplights below on current street 2. sync stop lights. 3. increase green light on 380 for faster flow. Q: Do you support the building of a freeway regardless of alignment? A: yes!	Comment noted. Comment noted.
2695	Miguel Pereira	5/14/2018 Electronic Survey	Q: What is your interest in this study? A: Property Owner, Nearby resident, use the recreational area affected frequently Q: How often do you drive on the existing US 380? A: Monthly Q: Do you have any concerns with the existing US 380? A: No Q: If US 380 is congested, what alternative routes do you take? A: Q: What solutions would you suggest in the US 380 Corridor? A: Q: Do you support the building of a freeway regardless of alignment? A: No	No answer provided. Comment noted. Comment noted. Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident Q: How often do you drive on the existing US 380? A: Daily Q: Do you have any concerns with the existing US 380? A: Yes, None so far.	Comment noted. Comment noted. Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
Mike Beebe	5/15/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor? A: Depress 380, 6 or 8 lanes with 6 access lanes directly above at ground level. This will leave about the width of the median in the middle open for ventilation and light. If there is a bypass, have it go alongside custer on the mckinney side. No visual or sound impact on tucker hill.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: only according to the solutions I mentioned above. Then, yes.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: Blue</p>	Comment and suggested roadway configuration noted.
Mike Bell	4/26/2018	Comment Form	<p>1. All options need 2 sound barrier wall beside US 380 and the new proposed by-pass.</p> <p>2. prefer in this order: 1 green 2 pink 3 red</p> <p>3. Where is the option to expand FM 1461 and run it straight thru to Preston providing a northern east/west route? No need then for southern down turn before Custer Rd.</p> <p>4. With Custer Rd Expansion - need an overpass similar to Preston Rd before traffic gets worst. Also need sound barriers along Custer Rd with its 50 mph speed limited.</p> <p>Q: What is your interest in this study? A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380? A: Monthly</p> <p>Q: Do you have any concerns with the existing US 380? A: Yes. Hazardous - many accidents. Folw through McKinney is bad as is going to Denton.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: If going to Denton or Princeton have to slog through it.</p>	<p>A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.</p> <p>Comment noted.</p> <p>Comment noted. Alignment options and roadway configurations are still being evaluated.</p> <p>Comment noted. See response to item 1 above regarding noise barriers.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.</p> <p>Comment noted.</p>
Mike Bolick	5/14/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor? A: Widening and bypass around McKinney</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Something needs to be done, but a poor choice in alignment would not have my support since it could make matters even worse. I would prefer the blue alignment to start west of custer to bypass that heavy stretch.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A: None</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

2706	Mike Giles	5/4/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: There are businesses that depend on 380 business; the traffic is untenable. Altern 1 - Excluding the financial cost, the light portions of 380 (from US 75 east &amp; west) should be vertically stacked (See Wichita Falls vertical addition of their highway). Most of 380 can be done with regular roadway expansion since the room is available; the rest should be done vertically. Altern 2 - if 1 is too expensive, then retain the current 380 as business 380 and do a 380 loop coexisting with the outer loop. None of the current work-around proposals are acceptable. They all wipe out homes and home values for current citizens. As a stop-gap, Wilmette and Bloomingdale should be completed through to the Denton County line and east for several miles. This will take the immediate pressure off the current 380.</p> <p>Q: Do you support the building of a freeway, but I would never give the government unlimited decision-making power. Governments have botched things too many times.</p> <p>A: I support building a freeway, but I would never give the government unlimited decision-making power. Governments have botched things too many times.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	Comment noted. Alignment options are still being evaluated.

				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: It is getting more congested, but still manageable now. With the new growth being built it is going to be very difficult.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Yellow Route	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. Freeways tend to cut areas and isolate communities.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.

				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Stop lights are often out of sync, causing stopping at each intersection. Commercial trucks are often in all lanes causing congestion and slow downs. Frequent red light runners at 380 and Lake Forest.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Sync lights. Have lights green longer for traffic on 380 and shorter for traffic crossing 380. Overunder passes at 380 and Custer; 380 and Coit; 380 and 75. Improve traffic controls between Community Ave and US 75 (Entrances and exits from the shopping centers in this area, on both sides of 380, are very difficult).	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No. I support improving the existing footprint of 380 without a bypass. Also, I feel completing the Outer Loop and connecting Hwy 121 North of 380 with Hwy 121-South of 380, via Hwy 5, would help reduce traffic flow on 380.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, it is a highway designed like a road. It's trying to balance high rates of speed with no ramps to get on and a ton of traffic lights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I take the back roads primarily by my house. I am very concerned with there is an accident on the 380 and all of the congestion goes onto roads not designed for that kind of volume	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turn it into a Highway. Section it off for select on/off ramp areas, create over passes, and add a barrier in the middle to prevent head on crashes.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes. I think the 380 should have been a freeway from the start	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Not usually an issue for me	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: None needed	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No. Alignment and effects are extremely important	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Some concerns	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widen where possible with more turn lanes. Expedite the outer loop. 6 lane roads implemented on Bloomdale, Wilmette to help alleviate congestion.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
Mike Santimaw	5/13/2018	Electronic Survey	Living at Princeton Lakes I have 2 concerns! 1. Lake 1 Berm - contains the water for the lake - sound control	Comment noted. Any proposed improvements in this area would take the lake and berm into consideration, and impacts to the lake would be minimized to the extent practicable. TxDOT would coordinate with the U.S. Army Corps of Engineers regarding any lake-improvement

2728	Mike Thompson	5/1/2018	Comment Form	2. Noise from the expanded highway and extra traffic We will need some type of noise barrier add to the project;	A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet Federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.
				3. Set back for gates we are in the process of adding gates to the neighborhood	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congestion	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: i don't	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Bypass to the north, but not near Walnut Grove. The yellow option is not acceptable.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: My concern is that 380 can get very congested. I also has too many stop lights.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: It depends on where I am going. If I am going into downtown McKinney I may take Virginia. If I am going somewhere towards hwy 75 then I take the tollway. If I am going to Denton, then there is not a good alternative and I get stuck in traffic.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand it. Treat it more like a highway with faster speeds and less stop lights.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

2748	Moni G	5/14/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A:</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A:</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: It's a very dangerous highway. But because of poor planning going back decades and still happening at this very moment (new construction that would be destroyed because of ROW needed for widening) it's not feasible. There are too many businesses and residences that would be destroyed with changing it to a freeway.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: To head east take an alternate route north on Custer to Wilmeth/Bloomdale which can take me all the way to Interstate 75. For west I already avoid the construction head south on Custer to west on Virginia/Rockhill Road. This takes me to DNT. I rarely have to west of DNT.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed roadway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: NO</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: No</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: 121, Main Street</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A:</p>	<p>No answer provided.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p>

			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Traffic is terrible. Takes to long to get through. Accidents seem to be more frequent. High speed road without center median is scary.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia, but I'll eventually have to get on 380. It can't always be avoided.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Add Center median, widen road, add service roads to decrease lights on a high speed road	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018. In addition, TxDOT is currently developing a project to widen US 380 from Airport Road in McKinney to 4th Street in Princeton from 4 lanes to 6 lanes.
2754	Monika Arris	5/14/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Business Owner, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Speeding trucks running lights, drivers texting, multiple accidents, unlitmed lights.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Stonebridge, Ridge, Lake Forest, Custer, Hardin, Preston	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Move the 'bypass' to Laud Howell Pkwy and connect with 1461 to the Dallas North Toll Road and reduce the speed on 380 to cause the trucks and through traffic to go to "bypass. This would allow business to survive and businesses to flourish. Complete North South roads to connect with Laud Howell Pkwy 2.5 miles to North and go through least occupied area for homes to cover growth in NW area. : Go North on 75 to Laud Howell Pkwy, west to Custer or Independence	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: NO, not at all!!!!!!	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue, None	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too much congestion, a lot of big trucks that have issues starting quickly at stop lights which delays traffic.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Neighborhood streets	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.

			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: I would like the bypass that is blue or yellow to be pushed west to follow the line that is the original plan for stonebridge rd, rather than cut so close to Tucker Hill. I am very concerned about any options that take out the front of Tucker Hill neighborhood or cut through the neighborhood.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.

	5/3/2018	Electronic Survey	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
N/A	Comment Form		Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many accidents near HWY 75	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: More stop lights	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NO. You have ruined a quite easy drive and turned it into a nightmare. I moved outside of the city for a reason, less traffic. You have spoiled my peaceful existence added crime, constant sirens, road races and road rage.	Comment noted.
2777	Nancy Price	5/15/2018 Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response	
		Survey	Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.	
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.	
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.	
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.	
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.	
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.	
			Q: Do you have any concerns with the existing US 380? A: I am concerned about the frequent accidents.	Any future improvements will be designed to enhance safety.	
			Q: If US 380 is congested, what alternative routes do you take? A: Custer to I-21 Roads in Prosper / avoid 380 when ever possible	Comment noted.	
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.	
2787	Nat Velez	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No, I believe that we need to consider the impact to property owners and residents of Prosper as people will utilize our side streets to avoid or bypass. Additionally, bypass options that diminish the quality of our home environments is not acceptable. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Which alignment(s) do you prefer in McKinney? A:	Comment noted.	
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.	
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.	
			Q: What is your interest in this study? A: Nearby resident	Comment noted.	
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.	
			Q: Do you have any concerns with the existing US 380? A: Leave Erwin park alone!!!!!!	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.	
			Q: What solutions would you suggest in the US 380 Corridor? A:	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.	
2788	Natalia Perez	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2791	Nataly Ruan	5/19/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Interchanges at tollway and 75 need improvements	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build out roads north and south to be like Main St in Frisco, 4-6 lanes for Virginia, 123, and frontier. Extend 123/Wilmeth and Frontier to go over to 75.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2792	Nate Kuhns	5/8/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: I support the idea of connecting 75, future tollway and 35 North of current developments around Laud Howell. I do not support a bypass around current 380 as it would hurt local business and put an unneeded highway through and next to current landowners property.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: My concern is with the speed at which vehicles travel down this highway. It is congested at times, but what highway isn't. 380 is just as big as the DNT and other freeways in the area.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I rarely take alternate route because 380 is congested. If I do take an alternate route I typically take Custer or the DNT (travel to Plano area).	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make improvements to 380 and build routes north of 380 to reach other areas. DNT and Custer can be made larger to accommodate this. Also, if a bypass is needed it seems natural that the bypass run further west of Tucker Hill - Stonebridge closer to Custer road.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I do not support any of the alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed highway, and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of Stonebridge and not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. Congestion at Preston and the DNT intersections.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Rock Hill to DNT once	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Once construction at Preston and DNT are complete, it should relieve traffic. Cloverleaf overpass systems at major cross-roads relieve traffic and require no lights.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Not built to handle the growth on current traffic	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Turn into a true highway like it should be	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Only on the alignment of the current 380	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

## Comment Response Matrix

				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed highway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
2815	Nicholas Parra	5/17/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Safety and congestion	Any future improvements will be designed to enhance safety.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway SRT 121	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Convenient but not close proximity to current/future residential developments	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support on placement conditions	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not really. Just wondering why the city continues to allow businesses to build right up to the road when there's a possibility of road expansion.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I don't typically take alternate routes.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Build a freeway where the existing highway is or at least limit the number of stop lights on the highway.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes. Just not close to my house.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Commuter	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: With the addition of new housing developments along 380 between DNT and FM 385 there has been an increase in traffic. In addition there have been half a dozen new stoplights installed between 1385 and HWY 75. 380 can and should be turned into a major highway with a service rd.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Fishtrap Rd.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Less lights. Turn it into a full highway east/west with a service rd.	Comment and suggestion for less traffic signals and roadway configuration noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Hell yes. It's the only way we can survive 30 years from now.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: High speeds, distracted drivers, hurried drivers w/ stop lights	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia pkwy	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Freeway where it is now m	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Please do not touch Erwin Park!	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: People running red lights and people pulling onto 380 in front of oncoming traffic going 55-60mph.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest to 121 or other side roads.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: May be something similar to 635, where people can bypass the streetlights to get to one end to the other. While the outer lanes are aligned with the streetlights.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Considering I live here, any alignment that effects my neighborhood visually and economically is not ideal. No one wants a highway in their backyard, especially in a housing development considered relatively new. I bet no one would have bought a house here had they known a highway would be run behind their home.	Comment noted. Alignment options are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, traffic and how fast people are going! Nobody drives the speed limit of 60 mph. These people are driving around 75-80 mph on a daily basis.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: go the opposite direction and will take rural road to Lucas and then to Plano.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I would vote for the freeway plan. That would cost money, but the major factor is this frees up the congestion and would be considered the safer alternative.	Comment noted.
2837	Nina Nisbet	5/3/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes, yes, I would!	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Not specified	Comment noted.
			Q: How often do you drive on the existing US 380? A:	No answer provided.
			Q: Do you have any concerns with the existing US 380? A: Yes, I think it is too high speed for amount of separation of passing traffic	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: N/A, At the moment not a heavy user of 380	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
2840	None provided	5/14/2018  Paper Survey	Q: Do you support the building of a freeway regardless of alignment? A: I am sure it will be greatly needed	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
2841	None provided	NA  Comment Form	I favor the Blue or Yellow plan. The red plan will knock our house down. We have lived there one year.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
2842	None provided	NA	Comment Form	Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge, not on, or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Traffic is horrible, will continue to see more accidents. What makes it so bad is that it's not just a rush hour issue it's for significant portions of the day every day. Also it does begin to start easing up until you get to Ridge and then it's bad all the way to Princeton.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Have no choice but to take 380 as all other routes have you go through a bunch of lights and stop signs.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: There needs to be a bypass that would allow semi-trucks to stay on the outskirts of McKinney, perhaps go through Weston and back in 380 west of Custer.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No needs to be beneficial for truckers, people out of town, and locals.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink	Comment noted.
			Q: What is your interest in this study?  A: Business Owner, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380?  A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380?  A: Of course.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take?  A: From Hwy 380 turn on CR 337, then CR 407 through Monte Carlo Blvd. continue on CR 461 and FM 1377 to CR 496, then CR 361 and onto CR 559 at the bridge on Hwy 380. This route bypasses Hwy 380 east of FM 1827 all the way to the bridge at Lake Lavon.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor?  A: I would suggest another option, a better option. I am a resident and business owner in the City of Princeton. Unfortunately, any of the five alignment proposals will either get my homeestead and acreage or my business. I live on County Rd 458. My business is on Hwy 380. I have owned my business since 1987. My father purchased the property in the 1960's, and set up a father and sons' business. I inherited it from him, and started my business. I have considered it a means to help with my retirement. With the massive amount of ROW needed for the project, it would consume the acre of land and displace my business. For a small business owner like myself that would be financially devastating. In addition, if the freeway does comes down main street (Hwy 380) through town not only will it take the whole acre lot I work from and shut me down, but it will take businesses all the way up and down 380. Many businesses would be forced to closer or be displaced. Also, the business property lots on Hwy 380 through Princeton are not very deep. Behind them are homeowners and apartment complexes. If business properties are taken up by the large amount of ROW, it will affect and possibly displace those residents as well. And for businesses to reestablish on Hwy 380, they would have to buy the residential properties and those properties would have to be rezoned for commercial use. Just that would be a significant impact for our community in and of itself not to mention the economic impact. Plus just the construction would create a living nightmare.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.  TxDOT makes every effort to minimize impacts during construction of its projects. Comment about impacts along US 380 in Princeton noted.
2865	5/18/2018 None provided	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment?  A: NO, not reconstructing Hwy 380 or loops. I do support an alternate route as stated above.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton?  A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville?  A: None	Comment noted.
			Q: What is your interest in this study?  A:	No answer provided.
			Q: How often do you drive on the existing US 380?  A: Weekly	Comment noted.

			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion at 75%. avoid 380 as much as possible. I'd like to use it more.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia and Redbud	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Freeway	Comment noted.
2875	None provided	5/15/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: While I support the building of a freeway I worry about freeway noise at my property.  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment  Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red  Q: Which alignment(s) do you prefer in Princeton? A:  Q: Which alignment(s) do you prefer in Farmersville? A:	Comment noted. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.

Comment noted.  Comment noted.  Comment noted.  Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.	
			Q: Do you have any concerns with the existing US 380? A: Speeding and texting and driving causes most of the accidents on 380	Comment noted.	
			Q: If US 380 is congested, what alternative routes do you take? A: None. Sit through it.	Comment noted.	
			Q: What solutions would you suggest in the US 380 Corridor? A: Lower speed limits	Comment noted.	
2905	None provided	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No  Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.  Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Pink, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion. Many accidents. New businesses going up, concerns for same traffic issues as Walmart/Custer/Lowe's area in Prosper/McKinney where I witness an accident about 75% of the time. I am in that areas.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Depends. I'll take Cott/Preston/Stonebridge/Ridge/Lake Forest/Custer to Virginia. Occasionally I will take Preston or Custer to 1461 if I would rather take a more scenic route.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Prefer to widen the lanes and not add more business to the smaller roads (like 1461/Custer)	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Not regardless of alignment.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

2912	None provided	5/10/2018	Electronic Survey	<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Bloomdale/Wilmeth to 75 - mostly because it's beautiful country, Hardin or Lake Forest to Virginia to 75, Prosper Trail to Preston</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Focus efforts on fixing 380 ON 380, since most of 380 is already commercial. Commercial and retail belong on a freeway...homes do not.</p> <p>Especially when those homes are seized to force a freeway that none of the residents want. Focus on efforts to expedite the OUTER LOOP which would not affect existing homes. Make Wilmethe and Bloomdale 4 lane roads, fine, but neither should be considered for a freeway, thereby destroying many, many homes in the process.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Absolutely not. Freeway alignment along 380 and the Outer Loop are acceptable. Freeway alignment through existing homes, neighborhoods, and private farm and ranch land are NOT acceptable.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green</p>	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p>	No answer provided.
				<p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p>	No answer provided.
				<p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	Comment noted.
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Custer intersection needs improvement for turning traffic. Get rid of Lowe's and Walmart entrances so close to intersection. They are dangerous. Only allow Custer access.</p>	Comment noted.
				<p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: None, but the Iaud Howell outer loop would get the semis off the road</p>	Comment noted.
				<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Widen and fix in place. Tell cities to lower their housing density plans.</p>	Comment noted.
				<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No</p>	Comment noted.
				<p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment, I Do Not Support Building a Freeway</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink, I Do Not Support Building a Freeway</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink, I Do Not Support Building a Freeway</p>	Comment noted.
				<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink, I Do Not Support Building a Freeway</p>	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Very congested	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: If a freeway will be built it should be relocated towards Prosper, before the intersection of Custer and 380. This area should not be dealing with a freeway problem. There's more space in Prosper than in this area in McKinney. Neighbors in this area will oppose it. Freeway needs to be relocated before Custer.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Only where it meets the '75. It's too congested. The rest of the time this road moves fine and not congested. Unlike the 121 which is bumper to bumper every morning and evening	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: It's hasn't been congested except for where it meets the '75.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Connect the 380 to the '75 but leave the rest of it as is	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: There are new developments along the 380. That would be a major impact to home owners. Also some of them are. Re houses. That's not very good planning	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too many traffic lights and business turn ins and outs given the average speed. Dangerous possibilities. A: For longer distances there is not a good alternative.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A:	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make it a highway without lights etc on the main freeway	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No. Anyone who has lived in the McKinney area should realize that Erwin park is a treasure. My guess is the opposition to losing all or part of the park would be met with quite a bit of criticism.	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Business Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Slow moving traffic. Too Many lights that keep traffic from flowing. It's a heavily commuted road and very easy to have accidents with the number of stop lights and people trying to beat them.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
3062	None provided	5/15/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Overpasses need to be constructed to allow better flow. 380 and 75 is heavily congested. An overpass there would be great. Or a better solution to allow flow of traffic Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Red Alignment Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
			Q: Which alignment(s) do you prefer in Princeton? A:	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	Comment noted.

			Q: Do you have any concerns with the existing US 380? A:	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: limited transition lanes turning onto streets or businesses forcing vehicles to rear end each other	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Hardin, lake forest, cluster... Back of Lowes and Home depot by the 75	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green/Pink, I Do Not Support Building a Freeway	Comment noted.
3071	None provided	5/16/2018  Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: Not to run anything behind Erwin Farms. We moved there because there was no freeway or tollway for noise reasons. I lived somewhere where a toll road was installed in same fashion then we had road noise all the time. NOT WHY we moved here	Any future improvement projects would include assessment of the potential impact on the human and natural environments, including the potential for noise impacts. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.
3072	None provided	5/18/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.

3079	None provided	5/15/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A: Expand the lanes. No rerouting through Erwin Park!</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No. Not if it is going to interfere with the "unique by nature" of McKinney. It has already become excessively lost due to expansions of roads and development of buildings and businesses.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p>	<p>The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. The proposed blue alignment option is adjacent to the southern property line but does not cross into the park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.</p> <p>Comment noted.</p>

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Do you have any concerns with the existing US 380? A: It feels dangerous. Distracted drivers and all of those stoplights don't mix well. I completely avoid it during peak times and weekends.	Any future improvements will be designed to enhance safety. Stoplight coordination Comment noted.
3110	None provided	5/17/2018 Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: I drive through McKinney. But going from McKinney to Denton or McKinney to Farmersville we have no choice except to take it.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I'd love a toll road like 121 (Sam Rayburn) that gave us the ability to quickly and easily reach Denton from McKinney.	Tolling is not being considered as an option for funding.
			Q: Do you support the building of a freeway regardless of alignment? A: Something has to be done.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: It really is only congested at 380 and 75 and 380 and DNT	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Flyovers at 380/75 and 380/DNT	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment, None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red, None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Not really	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: It isn't congested	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Go north with wider roads, makes no sense to destroy current development along 380 in McKinney.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.

			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Do you have any concerns with the existing US 380?	Comment noted.
			A: No	
			Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
			A: Virginia pkwy	
			Q: What solutions would you suggest in the US 380 Corridor?	Comment noted. Tolling is not being considered for this project.
			A: I am ok with change. Just don't need another tollway just to get around	
			Q: Do you support the building of a freeway regardless of alignment?	No answer provided.
			A:	
			Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
			A: The Green/Pink Alignment	
			Q: Which alignment(s) do you prefer in McKinney?	No answer provided.
			A:	
			Q: Which alignment(s) do you prefer in Princeton?	No answer provided.
			A:	
			Q: Which alignment(s) do you prefer in Farmersville?	No answer provided.
			A:	
			Q: What is your interest in this study?	Comment noted.
			A: Commuter. Nearby resident	
			Q: How often do you drive on the existing US 380?	Comment noted.
			A: Daily	
			Q: Do you have any concerns with the existing US 380?	No answer provided.
			A:	
			Q: If US 380 is congested, what alternative routes do you take?	No answer provided.
			A:	
			Q: What solutions would you suggest in the US 380 Corridor?	No answer provided.
			A:	
			Q: Do you support the building of a freeway regardless of alignment?	No answer provided.
			A:	
			Q: If US 380 is constructed as a freeway, which alignment do you prefer?	No answer provided.
			A:	
			Q: Which alignment(s) do you prefer in McKinney?	No answer provided.
			A:	
			Q: Which alignment(s) do you prefer in Farmersville?	No answer provided.
			A:	
			Q: What is your interest in this study?	Comment noted.
			A: Property Owner, Nearby resident	
			Q: How often do you drive on the existing US 380?	Comment noted.
			A: Daily	
			Q: Do you have any concerns with the existing US 380?	Comment noted. Comment noted.
			A: It is too congested, and not enough lanes. Also, the 18 wheelers should be made to go around McKinney, instead of down the congested sections.	
			Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
			A: I take Wilmett, or White depending on where I am going.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Even with recently added lanes US 380 is one of the most congested roads that I've ever seen. When all of the new neighborhoods and businesses currently under construction are completed it will be a nightmare. There are more traffic lights on U.S. 380 now between U.S. 75 and Denton, TX than I have ever seen on a multi-lane U.S. "through" highway.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: White Ave. when travelling East and Virginia St. when travelling East or West	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: An additional multi-lane controlled access mostly elevated highway through many congested areas.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: It would seem to be necessary. It should also incorporate an elevated public transportation system. Good examples are used at Walt Disney World.	Comment noted. Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Not at this point. The only congestion I encounter is at the intersection of 380 with 75.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: The only congestion I encounter is at the intersection of 380 and 75.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I prefer the Blue route but I would connect it back to 380 a bit more to the West, either at Cluster road or after.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: NOOOOO!!!! That is a firm NO for me.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, I Do Not Support Building a Freeway	Comment noted.

				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
		Paper Survey		Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green Plan	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
3185	Olivia Patrick			The blue plan and the red plan would both not work. These plans put too many neighborhoods in the sound zone of the bypass. The traffic from 380 is already loud enough. The traffic noise would be to loud for the people sorrounded by the bypass.	A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. The study would be conducted in accordance with federal regulations and TxDOT's Guidelines for Analysis and Abatement of Roadway Traffic Noise. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability. The results of the traffic noise study and the locations and characteristics of any proposed noise barriers would be shared with the community before preparing the final design.
			4/26/2018 Comment Form	I believe that the green plan would be the best option because there is going to need a freeway in the future, why not just make 380 a freeway. Increasing the speed limit and making 380 would be the best option. Dont make a bypass or another freeway, just turn 380 into a freeway. It would save time and money, fixing the problem faster. Don't we want the problem fixed fast and for cheap? That is why the green plan would be the best.	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Safety	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: FM 246 & any dirt road CR 307 to Allen	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Elevated road & more north-south roads - service road badly needed between New Hope FM 1827 & Bridgewater Road	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
	Ophelia "Illegible"	5/15/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue, No good solution	Comment noted.

3194	Paige Scott	5/8/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Over crowded, slow</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: I have none.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: To widen 380</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: I'm not sure.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p>	<p>Comment noted.</p>
				<p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes, that middle turn lane is not safe</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: I am limited- don't have any other routes unless I go up 75 and take 121 to 78 then come back down which probably adds 50 miles to my drive home. I could possibly take 8, but that has been under construction for years and is a night mare.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: widening takes forever and causes congestion- we live thru the last construction to widen 380 towards Greenville, but it has been successful. A new road, a loop, with fewer stop lights would be good- but if they start building commercial businesses on a loop, then we defeat the purpose of the loop</p>	<p>Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p>

3195	Paige Segovia	5/22/2018	Electronic Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: maybe. No one wants to loose their home or land to a freeway, we still need to preserve people property and farm/pasture land. Could a freeway be built and accomplish that goal. I travel from 380 and 36 every day to 75 and Arapaho in Richardson. Most people out where we live have to drive to a job to be able to support ourselves. There are few jobs close to us and those that are available pay minimum wage. ALSO NO TOLL ROADS... PLEASE. The amount of tax money we pay to our county and on a gallon of gas should be paying for the roads, no more toll roads.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Red</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue</p>	<p>Any future improvement projects would include assessment of the potential impact on the human and natural environments. Tolling is not being considered as an option for funding.</p> <p>Comment noted.</p>
3196	Paige Smith	5/8/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Safety, slow because of numerous lights particularly on West side of 75.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: 121</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Widen and/or add options to avoid the stop lights for those headed a longer distance on 380.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No. Re-routing too far off current path destroys businesses and city planning already based on 380. I would like to avoid moving too far north and losing peace/quiet of the few remaining pieces of rural(ish) land in Northern Collin County.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Yes, it's a very dangerous highway.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: There are no good alternative routes.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: It should be a freeway.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes.</p>	<p>Comment noted. Alignment options are still being evaluated.</p> <p>Comment noted.</p>

			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Please do not select yellow plan as it decreases my home value is Farmersville. I have a petition from Farmersville voters that also asks NOT to have 380 go south of current position that I will send to TxDOT. The petition is signed by residents of Farmersville and Business owners on RT 380 who do not want it (380) to go South of current position in Farmersville. Please do not move 380 south in Farmersville. Please select the pink or green route. I have a petition of Farmersville residents & business owners that ask for 380 not to be moved south of current location	Comment noted.
3199	Pam Sardo	5/1/2018  Comment Form	Q: What is your interest in this study? A: Commuter, Nearby resident, Planning to purchase home in area this year	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: only that the traffic is bad at rush hours and there are many accidents.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: It depends on where I am going but I do not have to travel 380 for work so I usually just don't go during congested hours.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I would suggest a freeway.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I would not prefer the red alignment specifically around the airport as it has a great negative impact on my family.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Other (please specify). Survey not accepting more than 1 answer. All apply - Nearby resident; Property owner; Business owner; and, Commuter.	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Safety. Known multiple people killed and/or gravely injured on 380 in the 14 years we've lived here. Inadequate design for traffic flow past, present and definitely future. I avoid 380 and warn others to do likewise. Large trucks barreling thru at unsafe speeds, tail-gating drivers, and seen MANY drivers blow thru red lights and stops	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Anything possible. Gotten pretty good at finding creative options. HOPEFUL your plans don't take those safer alternatives off the table...	Any future improvements will be designed to enhance safety.
			Q: What solutions would you suggest in the US 380 Corridor? A: "NO MORE TOLLROADS in North Texas. Crazy ridiculous costs already ready for essential driving. And made worse knowing funds don't even stay here for future transit needs. When and IF any addl rolls, KEEP THE MONEY AT HOME for future planning! Folks will be more likely to drive on tolls IF they know funds actually doing some possible good locally... *improved traffic flow. *Lights timed to actual traffic - not "perceived" (ie: diff in summers when kids out of school, etc. Been stuck MANY times for long periods at stoplights when NOBODY coming in any other direction. espec late at night). *Improved enforcement for speeders, drunk drivers, lesters, etc. *DO NOT allow big trucks, -and if construction crews have caused MANY accidents. killed friends. And nearly killed others...	Comment and suggestions noted. Tolling is not being considered as an option for funding.
			Q: Do you support the building of a freeway regardless of alignment? A: Definitely depends on how it impacts local communities. Long-range planning and solutions NEED to be expedited to avert further damaging impacts to cities, towns, businesses and homeowners. Seen NEGATIVE impacts before of "future planning" and properties being taken by imminent domain and then land lying empty for decades	Comment noted.

3205	Pastor Charles Faultry	5/12/2018	Comment Form Provided to Court Reporter	<p>The green and pink alignment will impact the Galloway Memorial Church of God in Christ which is the first black church in the city of Farmersville. Approximately 1 1/2 to 2 years ago, the city of Farmersville including it on the historical preservation list. The church was built in 1914 and is approximately 104 years old. The majority of the members (90%) still live in Farmersville. The cost to rebuild a church at today's cost will be too much for the church to handle.</p> <p>I'm the pastor of the Galloway Memorial Church of God and Christ that's on the pathway with the -- I think it's the pink line and the green line. It will -- basically that route would eliminate and abolish our church.</p> <p>Our church was the first black church in Farmersville, Texas, built in 1914. It's been identified as a historical preservation item for the City of Farmersville -- think they did that about a year and a half ago -- and embracing that portion for us.</p> <p>That would impact that area. I know how people are concerned and TxDOT is concerned about historical preservation. For us, that would have a major impact.</p> <p>The cost to relocate would be too costly for us because to build a church in today's economic -- it's not \$120,000. They basically start at a half million to over a million.</p> <p>The congregation it's a fixed income and a few others; and that's one of the major concerns is that we have low income. That would bring up the next concern, is involvement with justice. In that stretch, you also have some environmental justice issues because there are some trailer homes, there are some minorities in those areas that would be displaced.</p> <p>And those individuals cannot afford to move to other areas as -- in the north portion of the DFW area, the housing is much higher. It would create a burden on the individuals that have paid their money to pay off their houses. they cannot get a house today in today's market at that price, especially in the north side.</p> <p>Those are the major concerns that we have. Preferably, I wish they would just go around and not deal with Farmersville because that stretch that they're doing, if you do the ride through the Farmersville area, the commercial buildings that they just built to improve the city is in that route; and it will impact the new buildings that they built, it would impact potentially Collins -- the Collins (sic) College that's going to be coming through. A lot of improvement that the City is trying to bring in, that will impact that.</p> <p>Again, that's -- those are my comments, but I just wanted to make sure that we got that down. I put them in the box, but I also wanted to make sure that it's on record. Thank you</p>	<p>Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments, including impacts to historic structures.</p> <p>Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments, including impacts to historic structures.</p> <p>Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments, including impacts to environmental justice concerns.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p>

3214	Patricia Laney	4/26/2018	Comment Form	<p>We have an immediate safety concern at the entrance to the Tucker Hill Development: 380 and Tremont Blvd intersection. There are turn lanes from the east and west on 380, but there continues to be wrecks weekly. The speed limit of 50 is not being observed by cars or the many trucks using 380. Sitting in the left turn lane (from the west), waiting long times for the left arrow is threatening as vehicles speed by, seeming inches from us. Slower speed limits would be safer, as well as a wider or protected left turn lane. - with a curb for protection.</p> <p>Q: What is your interest in this study? A: Property Owner</p> <p>Q: How often do you drive on the existing US 380? A: Daily</p> <p>Q: Do you have any concerns with the existing US 380? A: Heavy construction trucks, heavy traffic flow, accidents several times s week.</p> <p>Q: If US 380 is congested, what alternative routes do you take? A:</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed thruway, and sound barriers.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: Support building a freeway for 380 alignment only</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville? A:</p>	<p>Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p>

3218	Patrick Capel	5/15/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?  A: Too many lights, too much congestion. Often cannot get through 380/75 interchange because it is clogged both ways.</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: White Ave, Wilmette Rd</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Build bypass north of 380, possibly using Collin County Outer Loop. I thought that was the intent of the Outer Loop.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: I think the alignment needs to make sense, and disrupt as few established communities as possible. If they built before there was a road planned there, you should let them be.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: None</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Red</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue</p> <p>Q: What is your interest in this study?  A: Commuter</p> <p>Q: How often do you drive on the existing US 380?  A: Monthly</p> <p>Q: Do you have any concerns with the existing US 380?  A: Too many stops</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Sam Rayburn (121), El Dorado to 125</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: make it a freeway</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A:</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: North Route: 380 to Harden then North to Wimeth. South Route: Ridge or Custer to 121</p>	<p>Comment noted.</p> <p>Comment noted.</p> <p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>Any future improvement projects would include an assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p> <p>No answer provided.</p> <p>Comment noted.</p>
3219	Patrick Carroll	5/15/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380?  A: Too many lights, too much congestion. 			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: Not at the loss of Erwin Park	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Towards 75 there is a fair amount traffic congestion.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I'll take drive on down to White to get to 75 on Virginia.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	Tolling is not being considered as an option for funding.
			Q: Do you support the building of a freeway regardless of alignment? A:	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

Patty Brazelton	5/21/2018	Paper Survey	<p>Q: If US 380 is congested, what alternative routes do you take?  A: Custer and/or Stonebridge to Virginia for South bound trips. Any trips north - its Custer to FM roads</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Widen 380 where possible with over passes major intersections, add turn lanes, widen and extend out all East and West bound roads to take some traffic off 380. Loops and ByPasses seem only temporary fixes - they all seem to eventually turn into stop and go traffic as lights are added, ext. Battline used to be a loop - now it is a mess. I don't believe the blue, red or yellow alignments will be any different over the course of time. Concentrate on 380, stop the building of businesses until a design plan is achieved and can be executed. I believe continuing to build along 380 just adds fuel to the fire</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: They need to choose what is best for their situation</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A:</p> <p>Q: What is your interest in this study?  A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?  A: traffic is easily and frequently congested and moves slow during congestion</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: 455/white street to 289 west of Anna, TX and to Princeton when going east of Anna</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: make similar to US 75 with exits and service roads to reduce street lights and eliminate left hand turns</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment, The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney? 3235	PAUL AND PATSY DIMAURO	5/16/2018	Electronic Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Not as it is laid out now. Every alignment affects us the same. We lose almost half of our property. Feel it is unfair for all the right of way come off of north side of road. The land across the highway is no more important than ours just because it has a berm and new houses. We would not be able to sell our land or build on it with the way it is now...it is only fair that the amount of right of way be split in half...Had anyone thought of what this does to a piece of property that you planned to be your retirement....Please look at this again.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: heavy traffic@380 and I-75 intersection</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Hardin south to White then I-75 to avoid 380 &amp; I-75</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Expand 380 or make it 'freeway'</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: lights need to be synchronized</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Hardin, Ridge or Stonebridge</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: go further North off of Central</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: NO</p>	<p>Comment noted. 			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed thoroughway, and sound barriers. If any bypass option is chosen, it must be located as far west of Tucker Hill as possible, west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted: Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.

			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, Do Not Support Building a Freeway	Comment noted.
			Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of property. Our recommendation if any freeway construct occurs on the existing 380 foot print adjacent to T.H., it must impose minimal right of way and noise pollution by means of cantilevered access lanes, a depressed through way and sound barriers. If any by pass option is chosen it should be located as far west of T.H. as possible, West of future stonebridge, not on or bordering T.H.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: YES	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: FM 547 to 117B-78	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: More merging lanes and more overheads	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Is congested at 380 and 75	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: County Roads	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Better timing of lights. Building out Wilmett and Bloomdale roads East West from Custer to 75, Fix 380 by widening and overpasses.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Capacity is too low.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Eldorado	Comment noted.
3253	Paul Rancuret	5/16/2018 Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: A McKinney Bypass. But I think you should have segmented the options (alignments) a bit differently. Specifically, on the west-side of McKinney (west of US75), my preference is for the blue alignment. On the east-side of McKinney, my preference is for the red alignment. For the New Hope / Princeton area, my preference is for the yellow alignment. For the Farmersville area, my preference is for the blue alignment. Q: Do you support the building of a freeway regardless of alignment? A: The population north of 121 continues to increase, so it seems inevitable that a new 380 freeway needs to be built. But as a resident who lives near 380, and who drives 380 on a daily basis, I have a very strong opinion about the alignment. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Increased levels of truck through fare have picked up noise levels in our development and home with both day and night traffic flow	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Given density increase and current building out around existing 380 would highly recommend a faster speed more northern route for 380 through Collin County. That would keep the existing 380 corridor in place for business and local traffic while diverting a good portion of cross county traffic and trucks which are not turning off 380 in the county. Q: Do you support the building of a freeway regardless of alignment? A: Do not support adding additional "in town" options that allow turning 380 into a high speed, even wider access road, for traffic to move across the country	Comment noted. Alignment options are still being evaluated.
3254	Paul Robert Zanno	5/15/2018 Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A: Hardin, lake forest, white.	Comment noted.
3264	Paulina Maldonado	5/16/2018 Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor? A: More monitoring. Even cameras so people respect more. Q: Do you support the building of a freeway regardless of alignment? A: Not if it is going to be one of those toll ways that they build with our taxes and then sell it to private companies so we can be charge every time we use it. Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted. Enforcement of traffic laws is the responsibility of local police departments. Tolling is not being considered as an option for funding.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Blue	Comment noted.
			Q: What is your interest in this study? A:	No answer provided.
			Q: How often do you drive on the existing US 380? A:	No answer provided.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: The US 380 is a very busy route and the areas serve by this road is growing extremely fast making it a nightmare to commute. The increase in traffic lights have created a lot of traffic jams. The addition of new businesses and new shopping centers is increasing faster than we can manage.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted. Alignments options still being evaluated.
				Q: What solutions would you suggest in the US 380 Corridor? A: Enhance current road (Pink alignment) and perhaps use bridges in the more congested intersections.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: I support a freeway but my preference is the Pink alignment. We must protect the current houses and I believe the pink alignment is the option with less impact to the residents when compared to the other alignments.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
				Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, major concerns with loss of homes, deviated property values, noise and air pollution, congestion, and elimination of safe access to walking and biking paths	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway, White Ave., Hardin, S, Coit, Independence	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: No bypass. Reduce speed limits and light compliance and provide better monitoring and segregation of truck traffic to righthand lanes. And if a bypass is the only option, Tucker Hill's position is NO to all current alignments due to reasons listed previously. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: NO. We purchased this home at this location with 380 at its current distance from our house. - no real effort has been made to enforce speed and light compliance - try that FIRST. Your unfortunate lack of planning now puts our home, our health, and our peace and quiet at jeopardy. Could TxDot and McKinney make it any harder to access walking and bike paths - the answer is no, in fact this proposal makes it worse.	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

				Q: What is your interest in this study? A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Congested	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Need more roads	Comment noted.
3268	Peggy Hughes	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: I am fine with the 3 proposals. I am not ok with any new proposal that would include Custer	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: If it is congested, I agree but any major construction on 380 would create exponential congestion for years to come during construction!	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Taylor-Burke to T5 Service Road to Wilmet across to the other side of town /Hwy5	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Loop around McKinney to reduce through traffic of large vehicles.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Not on 380! Only as a loop around McKinney	Comment noted. Alignment options are still being evaluated.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A:	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A: I would build US 380 as a highway, not a bypass or at least follow the same alignment as of today. With the outer loop still going in and the fact that we would have to transition more land I don't understand why you wouldn't use the existing alignment.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No I do not support the bypass alignment options that are outside of the current 380 route.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: need more lanes	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 720 and 423	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: bridge from south poloma to eldorado	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Red	Comment noted.

			Q: Do you have any concerns with the existing US 380? A: Many lights and lots of traffic.	Comment noted.
3292 Phyllis Fisher	5/17/2018	Electronic Survey	Q: If US 380 is congested, what alternative routes do you take? A: Bloomdale Road which turns into Prosper Trail...when driving from Lake Forest, McKinney to Prosper	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Hwy and side roads. No toll	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes. Residences are continually being built...and the roads never keep up. Would be nice to have roads completed before thousands of people move in to neighborhoods.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer or Lake Forest to access 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Add lanes to current US 380. Construct a roadway from N Ridge RD that connects to where CR-161 and Wilmette Rd meet.	Comment noted.
3293 Pierre Alfred	5/6/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No. Especially if it uproots families from their current homes.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Computer, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It is too small for the amount of traffic it has. It is too congested especially morning hours and afternoon.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Make it wider, more lanes	Comment noted.

			Q: Do you have any concerns with the existing US 380? A: Speed limit is too high	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Build a major road or highway to the north of 380 since there are more development to the north.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? My suggestion would be to Q: If US 380 is congested, what alternative routes do you take? A: Fishtrap Rd	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: 1. Develop Fishtrap road west of the tollroad to 4 or 6 lanes and have it connect straight thru to Hwy 377. 2. Widen 380 to 6 lanes. 3. Connect Rockhill Pkwy from Tollway to 423.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes! Toll If Free!	Comment noted. Tolling is not being considered for this project.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A:	No answer provided.
			Q: Which alignment(s) do you prefer in McKinney? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Princeton? A:	No answer provided.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Large number of heavy construction vehicles. High traffic volume in close proximity to homes, school routes. Speeding. 380/75 junction is always severely congested. Concerned over how we will access all new businesses under construction in that area.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Custer road to 121 westbound	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Build a loop to divert traffic north from current 380 from west of Custer road to east after 75	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton ? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: What is your interest in this study? A: Computer, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, how will my commute be affected during construction if this project gets approved?	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: take the country road	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Provide affordable mass transit (buses & bus stops in major inner city roads) Install safe turning lanes, perhaps by adding median barriers or raised medians. "Building a freeway, in my opinion will only cause increase in privat vehicles to ownership, that would lead to more traffic congestion & even more noise & air pollution & maybe come with some vehicle ownership regulation?"	Northern extensions of existing and future rail corridors are being evaluated by others; however, transit options are not included in the proposed project. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
R Campbell	5/14/2018	Paper Survey		Tucker Hill's (our) position is <b>NO</b> to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; depressed access lanes; depressed sound barriers." Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; WEST OF future Strobridge Drive, located on or between Tuck -> Hill
3301				Comment Form
R Leigh	5/12/2018	Electronic Survey		Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.

			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too much traffic and too few safe access points	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: South to Eldorado or Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Expand 380 while access is still available	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No, both issues must be looked at in unison	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Biker	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: I appreciate the improvements. McKinney to Denton is much better than the past. But it will be very congested with the population growth.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia - Rock Hill, or SRT to 35 E north.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: I support a new route north of 380. That's where the population growth needs a road.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: No. This survey won't let me pick it, but my first choice is the purple dotted line, the outer loop. My second choice is the pink or green.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area US 380 would still experience a failing level of service for congestion and delay.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
3306	R. Thompson	5/15/2018	Electronic Survey	<p>Q: Do you have any concerns with the existing US 380? A: 380 is a very dangerous and also congested road</p> <p>Q: If US 380 is congested, what alternative routes do you take? A: I don't</p> <p>Q: What solutions would you suggest in the US 380 Corridor? A: Other roads elevating traffic for Blue Ridge, Nellysia areas.</p> <p>Q: Do you support the building of a freeway regardless of alignment? A: No</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer? ## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: NO	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: 121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Learn from 635 development and have an underground toll road for the ones trying to bypass mckinney traffic. People going to access mckinney business will still use 380. Plus the different routes will create even more congestion whenever it merges into 380.	Comment noted. Tolling is not being considered for this project.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Traffic	No answer provided.
			Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A:	No answer provided.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion, Light Timing, throughput, lack of buildout of tertiary parkways nearby.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Lake Forest to I21, Hardin to White, Bloomdale (dirt road) to bloomdale on 75.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Widening the footprint of the existing 380, More turn lanes, better light timing, finishing out Wilmette to 75 (as a regular neighborhood roadway, as well as finishing out 123 as a regular roadway, NO BYPASS.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NO. KEEP 380 ON 380.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: leave 380 as is, it is such a death trap, so many car accidents, speeders	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: cluster, independence	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: we need it, it has to be done	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton ? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue, Yellow	Comment noted.

			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Do not want it anywhere near Whitley Place, Custer, First Street or Prosper Trail.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Frontier	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: NOT by Whitley Place	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Accidents daily because of speed and people failing to stop at red lights	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Fix the entire problem, slow people down and add more lights and create a freeway further north that goes from 75 to 35 for the trucks	Comment noted. Alignment options are still being evaluated. Suggestion for more traffic lights noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Not if it disturbs Our neighborhood	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.

3319	Ralph Doty	5/12/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Consideration of the impact of the proposed by pass on First Street, Prosper Trail and Frontier Parkway in Prosper due to possible "cut through" traffic to connect with proposed by pass versus expanding the current alignment of 380</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Not opposed to the by-pass with any of the current proposed alignments.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment, The Yellow Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: None</p>	<p>Comment noted.</p>
3320	Ralph Thompson	5/13/2018	Electronic Survey	<p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too much traffic for the current roadway</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Hwy 121 / Toll Road</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Build a freeway or tolled highway similar to Hwy 121 Toll Road</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: YES!</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Blue Alignment, The Red Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Blue, Red</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Congestion at 75/380. Ability to make an unprotected left turn into businesses and shopping centers.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Wilmeth, White st.</p>	<p>Comment noted. Tolling is not being considered for this project.</p> <p>Comment noted.</p>
3321	Randall hickman	5/8/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Elevated roadway for those that want to simply travel east or west. Bypass utilizing laud Howell pkwy or outer loop.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No-alignment matters to me due to impact on my property and other people's properties. I think most people will utilize an alternative route that makes sense for them whether a specific one is built or not.</p>	<p>Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>Comment noted. Alignment options are still being evaluated.</p>

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: With current growth in the area I don't believe it will adequately handle traffic in the near future. I also don't believe adding another lane is workable considering the proximity of current existing structures. Also I believe it would be best to route traffic onto a limited access bypass around the McKinney area to avoid the inevitable gridlock. There are enough signal lights that anticipated increases in traffic will create backups from signal to signal, an event that occurs frequently during current rush hour traffic. I also see a potential for needing even more signalizations on 380 through McKinney further exacerbating the problem.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia or Eldorado.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Developing and building a freeway style bypass around the city of McKinney as soon as possible. As the community builds further north it will only be more difficult to obtain the right of way for that bypass. Having driven a commercial truck for a living, I can wholeheartedly sympathize with the drivers as they work their way through town. It will only get worse for them as time passes.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Absolutely	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: I can be tough to get on during peak times unless you are at a traffic light.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Another east west road to the north to reduce traffic on existing 380	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Always accidents, or people speeding	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Traffic cameras	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: For the amount of traffic that goes through there something needs to be done.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Nearby resident, Runner/Biker	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Not really	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: WHatever Waze tells me	The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
			Q: What solutions would you suggest in the US 380 Corridor? A: NOT rerouting through Erwin Park	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
3335	5/14/2018	5/18/2018 Electronic Survey

			Q: How often do you drive on the Existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes...traffic, accidents, too much construction	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: cluster to main st or 380 to prinston to rockhill	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Not opposed to the by-pass with any of the current proposed alignments. -Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380. Request consideration of the impact of the proposed by pass on First Street, Prosper Trail and Frontier Parkway in Prosper due to possible "cut through" traffic to connect with proposed by pass versus expanding the current alignment of 380	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Opposed to any change in proposed alignments that brings the By-Pass west of Custer Road as it reconnects to 380.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink, Blue, Red	Comment noted.

			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too dangerous, too congested	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Rd possible	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Freeway with overpasses to decrease amount of red lights	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes, it seems there are fatal accidents here regularly.	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Rd.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: No	No answer provided.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes, the traffic noise and congestion. Also, it takes more time to get from our neighborhood west to US 75 from 11:00 am to 7:00 pm.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Sometimes I'll take Hwy 5 north to Wilmett road to go westward. I'll also take various side streets south towards White Ave. or Virginia.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I think with the projected increase in Collin County, it would make sense to have a loop to bypass 380.	Comment noted.
3348	Rebecca Tuterow	4/26/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: It depends on how it impacts the quality of life in my neighborhood. If it happens, I would like a privacy/sound barrier wall along a freeway.	Comment noted. A traffic noise analysis would be conducted during the environmental study stage of project development, after a preferred alignment has been identified and a schematic has been prepared. Based on the findings, noise abatement barriers would be proposed for locations that meet federal and TxDOT criteria in terms of noise reduction, cost and constructability.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Yellow Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: No. It is sometimes congested, but not horribly.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
3349	Rebecca Zottneck	5/10/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion and danger!! People are temble at stopping at the lights - esp at Preston /380. I hope the overpass there helps!	Any future improvements will be designed to enhance safety.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Parkway	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: The option of elevated bypass of busy intersections (like Preston overpass will be) I also think a freeway should be strongly considered.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a falling level of service for congestion and delay.
3350	Rebekah Cooksey	4/27/2018 Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink, Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink, Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, it is getting too crowded in McKinney and Princeton.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Freeway, alternate loops around McKinney	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: I support the Blue line proposal	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Just the amount of congestion at the big intersections (DNT, Preston, 75).	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: I usually only use it to get through McKinney, so I will take Virginia or White. But occasionally, I will go to Denton or Princeton, and in those cases, I tough it out and take 380 regardless.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: An overpass at the problem areas would be nice or a diversion of traffic.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay. Future alignment options are still being evaluated. Future improvements will be designed with consideration to the impact of human and natural environment. The location of Erwin Park was taken into consideration when draft alignments were developed. None of the proposed alignments directly impact Erwin Park. TxDOT attempts to avoid and/or minimize impacts to parks as much as practicable.
3352	Reed Fritz	5/14/2018	Electronic Survey	Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Need to be modernize. Today is a rural with an urban mix. Need to be standardized.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Inside Stonbridge, via Virginia.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Expand the 380. Like 121. Having an external loop will have an impact on rural neighborhood. It is better to have an expanded planed 380.	Comment noted. Alignment options are still being evaluated.
			Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: Green	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
				Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: it could use some barriers and other safety related improvements. Could also increase the speed limit.	Any future improvements will be designed to enhance safety. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
				Q: If US 380 is congested, what alternative routes do you take? A: Take Virginia	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: Turning it into a freeway	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Honestly, I think there are too many lights on it. I was on it yesterday around noon, and it doesn't seem to flow well. I know many are opposed to a freeway, but I think with the expected growth it needs to be converted to a freeway.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: It depends on where I am going. Normally, I would say Virginia, but it is currently under construction as well. I don't get on 75 often.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A: I know being a Stonebridge Ranch resident, that I am concerned about the impact on our community. Even though I support a freeway, it needs to be done smart to have the least impact on surrounding neighborhoods.	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				Q: Do you support the building of a freeway regardless of alignment? A: I support a freeway if it is done smart. Whether people like it or not McKinney is growing, and we need to plan for that expected growth. If it stays as is that isn't a feasible solution. 380 is known for having many wrecks. I hear several people who avoid driving on it, because it can become a traffic nightmare.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380? A: Yes! Many...affecting residential areas with homes and families with children	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take? A: Custer South or Hwy 75 North South.	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment? A: Yes...depending on the alignment	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
				Q: What is your interest in this study? A: Property Owner	Comment noted.

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Do you have any concerns with the existing US 380?	
				A: Yes...safely! My daughter was hit by a driving running a red light while she was turning behind a first car on a 15-20 second protected green arrow at 60 miles per hour in Tucker Hill Subdivision. There are nearly two wrecks at this intersection per week/month. Fatality is in the future. My 18 year old had blood on her brain and had a sever concussion. Very dangerous strip of road.	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
				A: Yes and traffic travels at a very high speed Roth residential neighborhoods. Also a high School is being place off of clif which will bring younger drivers on an already dangerous road!	Comment noted.
	Rene' Mullins	4/27/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor?	Comment noted.
				A: Service Ramps coming out of subdivisions and flashing protected lights in residential area with speed decreasing i. Those pocketed areas.	Comment noted.
				Q: Do you support the building of a freeway regardless of alignment?	Comment noted.
				A: No unless it is done with safety first and cosmetics in the residential areas second.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
				A: The Blue Alignment	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	Comment noted.
				A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	Comment noted.
				A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	Comment noted.
				A: Blue	Comment noted.
				Q: What is your interest in this study?	Comment noted.
				A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380?	Comment noted.
				A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380?	No answer provided.
				A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take?	No answer provided.
				A:	No answer provided.
				Q: What solutions would you suggest in the US 380 Corridor?	No answer provided.
				Q: Do you support the building of a freeway regardless of alignment?	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
				A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; depressed throughway; and sound barriers. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible; west of future Stonebridge, not on or bordering Tucker Hill.	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
				A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?	Comment noted.
				A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?	Comment noted.
				A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?	Comment noted.
				A: None, I Do Not Support Building a Freeway	Comment noted.
				Q: What is your interest in this study?	No answer provided.
				A: Property Owner, Nearby resident	No answer provided.
				Q: How often do you drive on the existing US 380?	No answer provided.
				A: Weekly	No answer provided.
				Q: Do you have any concerns with the existing US 380?	No answer provided.
				A:	No answer provided.

				Q: What is your interest in this study?	Comment noted.
				A: Property Owner	
				Q: How often do you drive on the existing US 380?	Comment noted.
				A: Weekly	
				Q: Do you have any concerns with the existing US 380?	Comment noted.
				A: Traffic congestion is obviously a concern; I tend to avoid using 380 whenever possible, especially during 'rush hours'. It is terrible at the 380-75 interchange.	
				Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
				A: Generally I will try to go down to Eldorado Parkway, or across Prosper Trail and First Street/Fishtrap Road till I am at least somewhere west of the DNT. I generally try to use the side streets around my house to get around locally.	

## Comment Response Matrix

3371	Rex Evans	5/17/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?  A: I would prefer seeing overpasses and underpasses installed, with entry and exit ramps for US 75, with the bulk of the effort directed towards getting right of ways further north to create a by pass or a new highway, to take some of the pressure off of 380. Of the alignments shown, I would prefer the non-by-pass options (Pink or Green).</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Yes, with reservations; I realize that the congestion will just get worse over time, so understand that something will have to be done. I agree with some of the residents that it may just be too late to do anything very meaningful to 380 itself, which is why I think that looking at the proposed outer loop region may be more practical.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink, Blue</p> <p>Q: What is your interest in this study?  A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Safety/increasingly more congestion and accidents occurring</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Placing a highway further North of 380. Didn't want a highway impeding on current neighbors.</p> <p>Q: Do you support the building of a freeway regardless of alignment?  A: Not on existing corridor</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Blue Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Princeton?  A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?  A: Blue</p> <p>Q: What is your interest in this study?  A: Commuter, Property Owner</p> <p>Q: How often do you drive on the existing US 380?  A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?  A: Congestion and lack of barriers - not safe</p> <p>Q: If US 380 is congested, what alternative routes do you take?  A: Fish Trap needs</p> <p>Q: What solutions would you suggest in the US 380 Corridor?  A: Needs a thoroughfare freeway without traffic lights from Hwy 75 to Hwy 35</p>	<p>Comment noted.</p> <p>Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.</p> <p>Comment noted.</p>
3372	Reynolds	5/17/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor? Electronic Survey	5/11/2018		RICHARD CLAYTON LANDEL	Q: How often do you drive on the existing US 380?	A: Daily
				Q: Do you have any concerns with the existing US 380?	A: Excessive speeding and most dangerous truck traffic creating numerous accidents. Very unsafe.
				Q: If US 380 is congested, what alternative routes do you take?	A: Several arterial roads thru nearby neighborhoods.
				Q: What solutions would you suggest in the US 380 Corridor?	A: I oppose the 5 suggested alignments as presented to date by TXDOT, due to potential loss of existing new homes and devaluation of our neighborhood as a whole as well as adverse environmental and health implications. If any bypass option is chosen, it must be located far west of Tucker Hill community as possible, west of future Stonebridge extension not on or boarding Tucker Hill. If any freeway construction occurs on the existing 380 footpath adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of canilevered access lanes, a depressed throughway and adequately sound barriers.
				Q: Do you support the building of a freeway regardless of alignment?	A: No
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?	A: None, I Do Not Support Building a Freeway
				Q: Which alignment(s) do you prefer in McKinney?	A: None
				Q: Which alignment(s) do you prefer in Princeton?	A: None
				Q: Which alignment(s) do you prefer in Farmersville?	A: None
				Q: What is your interest in this study?	A: Property Owner

3393	Richard Hagen	5/11/2018	Paper Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Build Freeway loop as follows - outer loop - Start north of Denton going east past Prosper and Celina to north of McKinney/south of Melissa, north of New Hope &amp; Princeton &amp; down to 380 at either side of Lake Lavona. See other side for markup. This layout would avoid the high cost of tearing up McKinney.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: I Do Not Support Building a Freeway as shown</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: None</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Blue</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Not at present.</p>	<p>Comment and alignment suggestion noted.</p> <p>Comment noted.</p>
3394	Richard Jackson	4/28/2018	Electronic Survey	<p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Appropriate traffic light timing. Limited lane usage by large commercial trucks. A four lane widening is possible; a limited access highway is ludicrous.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: NO, not if it is 380. East/west traffic need to be relieved the same way north/south traffic is successfully handled - with more east/west corridors. Think of how many options there are to quickly move north/south in McKinney/Prosper/Frisco area - Hwy 5, Hardin, Lake Forest, Ridge, Custer, Catt, Hillcrest, Preston. For east/west we do need a highway - a NEW highway - further north, that can go all the way through McKinney, Prosper and Frisco to the northern loop in Denton. It would be minimum impact on current residents/businesses and is necessary for future growth further north.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: I Do Not Support Building a Freeway</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Truck traffic is excessive and the trucks clog up the left passing lanes.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Lake Forest, Ridge, Virginia, Eldorado</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Setup on 380 like 75.</p>	<p>Comment and suggestion for improved signal timing and restrictions on truck traffic noted.</p> <p>Comment noted.</p>

3395	Richard K Schaeff	5/15/2018	Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No, freeway near residential areas will cause a decline in resident property values and perhaps some loss of fringe housing. Also, those that located north of 380 did so to get away from the traffic and congestion. The city should have addressed this earlier so builders could take the plans into consideration as well as new residents.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p>	<p>Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p>
				<p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A:</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p> <p>Q: What is your interest in this study?</p> <p>A: Property Owner, Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Speed needs to be lowered, improve safety, traffic signal at Gray Branch</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Take Ridge, Lake Forest or Hardin to Virginia or Eldorado.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: Develop all arteries north of 380 between Custer and 75 as the city had previously planned. Also develop Laud Howell and the Outer Loop where the massive growth is predicted. Leave 380 as it is with safety enhancements.</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: NO!!! I do not support making 380 a limited-access highway or any alignment that encroaches on Tucker Hill. Notwithstanding our recommendation, if any freeway construction occurs on existing 380 adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, depressed thoroughway, sound barriers and a new entrance to Tucker Hill off the future Stonebridge Drive. Also, if any bypass option is chosen, it must be located as far west of Tucker Hill as possible, west of future Stonebridge, not on or bordering Tucker Hill.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: None, I Do Not Support Building a Freeway</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p>	<p>Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.</p> <p>Comment noted.</p>
	Richard Karch	5/13/2018	Electronic Survey	<p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A:</p>	<p>Comment noted.</p>
3396				<p>We, as a neighborhood development, have been expected to digest and respond to what I consider an attack on our way of life, our properties and the reason we chose to live in McKinney Texas.</p> <p>All proposed by pass routes and US 380 expansions encroach on our development. There is not one other community, in this plan, that faces such a threat.</p> <p>Two years ago, by pass was discussed that was the result of studies that determined the "best route" for future growth in Collin County and how we discover that the data used was somehow faulty. Now, it seems, new data has been accumulated and has produced different and more aggressive routes and they ALL target Tucker Hill.</p> <p>So, what makes you think this current analysis is going to stand the test of time?</p> <p>I personally feel (because I have studied and discussed) if you want to address the explosive growth that is expected in Collin County then you need to expand and improve the road system in that precise location. Most of the developments south of US 380 are nearly complete. There are intersections that are under retail development at this time which will understandably require modifications to traffic flow on US 380 (other efficiency/safety enhancements would be welcome to this highway). Please keep in mind that once the construction is largely complete along US 380 the traffic will diminish with the absence of trucks and similar work vehicles.</p> <p>My neighbors and vehemently oppose your current plans. We all know this is, as all projects are, a cost driven decision. I get it. But totally ignore the personality, motto and life style of McKinney Texas is reprehensible and irresponsible. Rethink your solution and factor in the intangible aspect that has built McKinney Texas into the attractive and most desirable city it is today. We have a chance to do the right thing. See an example to other communities on how to preserve valuable qualities and still deal with growth I'm sorry this problem was not addressed sooner. It's a shame.</p>	<p>Comment noted.</p>

			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Violent and reckless truck traffic at very excessive speeds with limited to no police patrolling or protection. Majority of non truck traffic constantly at speeds well above posted limits as well.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: rural back roads	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Leave as is with lower enforced speed limits. Exclude thru trucks by diverting to north with a possible new alignment devoted as a "trucking route" running from 75, well north of 380 to the tolway.	Any future improvements will be designed to enhance safety. Enforcement of traffic laws is the responsibility of local police departments.
			Q: Do you support the building of a freeway regardless of alignment? A: I do not	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes. Most drivers do not adhere to speed limits from 75 to the tolway going in both directions. Very dangerous with little if any policing and numerous violent accidents.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy south of 380	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Construction of bypass north of existing 380 road	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: None	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Do you have any concerns with the existing US 380? A: YES, EXCESSIVE SPEEDING, ACCIDENTS AND MINIMAL POLICE PATROL, VERY DANGEROUS	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: VIRGINIA RD, ELDARADO	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: REDUCE SPEED LIMITS WITH DRASIC RADAR ENFORCEMENT, ADDED POLICE PATROL (FINES WOULD CERTAINLY OFFSET ADDITIONAL COSTS)	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
			Q: Do you support the building of a freeway regardless of alignment? A: ONLY IF ALIGNMENT IS MOVED NORTH OF CURRENT 380 ROUTE, TO RECONFIGURE CURRENT 380 WOULD BE MOST HARMFUL TO NUMEROUS RESIDENTS AND BUSINESSES CREATING SIGNIFICANT FINANCIAL IMPACT ON BOTH	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Yellow	Comment noted.
		Comment Form	I do not support any of proposed alignments due to potential loss of homes and devaluation of our Tucker Hill neighborhood as a whole as well as adverse environmental and health implications. If any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes, a depressed throughway and sound barriers. Also if any bypass option is chosen, it must be located as far west of Tucker Hill as possible, west of future Stonebridge, not on or boarding Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
		NA	Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: go south to 121 and take that up to the Cotton Mill and cut over to Airport Dr., then north to 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Northern bypass	Comment noted. Alignment options are still being evaluated.
	5/14/2018	Richard Pedrett-Alien  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, it's already too congested	Comment noted.

Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
3401	5/10/2018	Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue, Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident, Parent	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: It's slow due to all the lights that have been added over the last decade. But I think when the current over pass construction near preston/hoyley is done it will greatly help. Maybe just add more overpasses along other parts of 380.	Comment noted. Traffic analysis indicates that providing overpasses, also known as grade separated intersections, along the existing US 380 would still experience a failing level of service for congestion and delay.
			Q: If US 380 is congested, what alternative routes do you take? A: None. All other routes r just as congested.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Add more overpasses at major intersection to avoid all the lights.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Not really	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Too much traffic	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Make 380 freeway with feeder roads	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Business Owner, Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, it is a dangerous road with drivers believing it's a 6 lane superhighway between 75 and the Dallas North Tollway, driving at speeds in excess of 75 mph only to come upon stoplights. The elevation at Preston Road makes sense and should likely be done on the entire path from 75.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: There is not really an alternative if you trying to get from 75 to Denton. 121 heads too far south.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Removing stoplights with elevation would help a lot. With the anticipated growth, extra lanes may very well be needed as well. An additional loop from the DNT to HWY 35, north of Denton, would be useful as well.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: While I believe the Blue alignment shown on the following page is the most logical on the map, it may not be in terms of disturbing nature or existing homes/businesses. The least harmful would make the most sense.	Comment noted. Alignment options are still being evaluated. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes, the intersection at 75 needs to be improved immediately. Northbound 75 exiting to 380 backs up onto 75!	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Wilmeth to 5 to CR 274	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Double the exit lane from northbound 75 to 380, widen the access road on the east side of 75 from the exit to 380. Change the signal timing to increase the time for those exiting 75 to 380. Provide an underpass for 380 under 75..	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Property Owner	Comment noted.

			Q: How often do you drive on the existing US 380?	Comment noted.
			A: Daily	
			Q: Do you have any concerns with the existing US 380?	Any future improvements will be designed to enhance safety. Suggestion for more traffic lights has been noted.
			A: 380 is dangerous in many areas! We see about an accident a month in front of our neighborhood, sometimes fatal. The speed limits are not followed either and patrol should be strengthened.	
			Q: If US 380 is congested, what alternative routes do you take?	Comment noted.
			A: Existing roads south of 380 & 121.	
			Q: What solutions would you suggest in the US 380 Corridor?	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; not on or bordering Tucker Hill.	
			Q: Do you support the building of a freeway regardless of alignment?	Comment noted.
			A: No. I can accept a longer commute due to increased traffic.	
			Q: If US 380 is constructed as a freeway, which alignment do you prefer?	Comment noted.
			A: I Do Not Support Building a Freeway	
			Q: Which alignment(s) do you prefer in McKinney?	Comment noted.
			A: I Do Not Support Building a Freeway	
			Q: Which alignment(s) do you prefer in Princeton?	Comment noted.
			A: I Do Not Support Building a Freeway	
			Q: Which alignment(s) do you prefer in Farmersville?	Comment noted.
			A: I Do Not Support Building a Freeway

3418	5/14/2018	Survey	<p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: No. Building a freeway can be very invasive to property owners. To me, the best choice is to improve what is current rather than create a whole new "highway" where one already exists.</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	Comment noted. Alignment options are still being evaluated.
3417	5/16/2018	Electronic Survey	<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Green, Pink, Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink, Blue</p> <p>Q: What is your interest in this study?</p> <p>A: Commuter, Property Owner</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Weekly</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: Too many lights near 75 and not timed to ease flow of traffic</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: Virginia</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: More overpass like the new one going in at Preston</p> <p>Q: Do you support the building of a freeway regardless of alignment?</p> <p>A: Yes</p> <p>Q: If US 380 is constructed as a freeway, which alignment do you prefer?</p> <p>A: The Green/Pink Alignment</p>	<p>Comment noted.</p>
Rick Seitz			<p>Q: Which alignment(s) do you prefer in McKinney?</p> <p>A: Green, Pink</p> <p>Q: Which alignment(s) do you prefer in Princeton?</p> <p>A: Blue</p> <p>Q: Which alignment(s) do you prefer in Farmersville?</p> <p>A: Green, Pink</p> <p>Q: What is your interest in this study?</p> <p>A: Nearby resident</p> <p>Q: How often do you drive on the existing US 380?</p> <p>A: Daily</p> <p>Q: Do you have any concerns with the existing US 380?</p> <p>A: The current speed limit is too fast between Custer and Hardin. School buses and new high school drivers travel 380 to at least 4 schools off of 380. In addition, there is a hospital at 380 and Lake Forest. There have been several accidents related to trucks or cars speeding through this area. There are also several retail outlets, restaurants, and a movie theater being built along this stretch of 380 so if the speed limit is not reduced, the potential for accidents will only increase. The bypass needs to go north of 380 before it gets to Custer when going east in order to improve the flow of traffic through Collin County.</p> <p>Q: If US 380 is congested, what alternative routes do you take?</p> <p>A: US 380 normally only gets congested when you get to Hardin, going east as you approach the shopping and restaurants in that area. As the new retail, restaurants, and movie theater that are currently being built open, that congestion will start sooner. If you are going to that retail or restaurants, there is not another good choice. If you going to downtown McKinney, then Virginia is an option.</p> <p>Q: What solutions would you suggest in the US 380 Corridor?</p> <p>A: There needs to be a US 380 bypass that goes North of the current US 380 before Custer and 5. It would also allow the growing north McKinney area. This would alleviate the congestion along the current 380 between Custer and 5. Virginia is an option.</p>	<p>Comment noted.</p>

## Comment Response Matrix

	Commenter Name	Date Received	Source	Comment Topic	Response
				Q: Do you support the building of a freeway regardless of alignment?  A: No. I don't believe any of the options I saw on Drive380.com will resolve the safety issues along US 380 in the north McKinney area. The options that add lanes to the current 380 route have the potential to make the safety issues worse given the growth of residential and retail between Custer and Harden.  Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: None	Comment noted. Any future improvements will be designed to enhance safety.
				Q: Which alignment(s) do you prefer in McKinney?  A: None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?  A: Blue	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?  A: Blue	Comment noted.
				Q: What is your interest in this study?  A: Property Owner	Comment noted.
				Q: How often do you drive on the existing US 380?  A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380?  A:	No answer provided.
				Q: If US 380 is congested, what alternative routes do you take?  A: city streets	Comment noted.
3419	Rick Tremaine	5/7/2018	Electronic Survey	Q: What solutions would you suggest in the US 380 Corridor?  A: – Completing the planned Outer Loop between I-35 and US 75 would create a much needed northern thoroughfare. The time to reach the planned Outer Loop from US 380 and I-35 would take minutes, contributing to lessened traffic congestion. – A portion of the Outer Loop east of US 75 has already been completed, so we hope you'll collaborate with our neighboring cities to finish the work already planned.	Comment noted. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
				Q: Do you support the building of a freeway regardless of alignment?  A: No	Comment noted.
				Q: If US 380 is constructed as a freeway, which alignment do you prefer?  A: The Green/Pink Alignment, The Blue Alignment, None	Comment noted.
				Q: Which alignment(s) do you prefer in McKinney?  A: Green, Pink, None	Comment noted.
				Q: Which alignment(s) do you prefer in Princeton?  A: Green, Pink, None	Comment noted.
				Q: Which alignment(s) do you prefer in Farmersville?  A: Green, Pink, None	Comment noted.
				Q: What is your interest in this study?  A: Nearby resident	Comment noted.
				Q: How often do you drive on the existing US 380?  A: Daily	Comment noted.
				Q: Do you have any concerns with the existing US 380?  A: The speed limit is too high. Not enough signal lights,	Comment noted.
				Q: If US 380 is congested, what alternative routes do you take?  A: None other available	Comment noted.
				Q: What solutions would you suggest in the US 380 Corridor?  A: By pass should begin West of Custer and extended to followway	Comment noted.
3420	Rickie and Laura Glenn	4/28/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment?  A: No	Comment noted.

			Q: Do you have any concerns with the existing US 380? A: Yes	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: New hope	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: A bridge to by pass Walmart and 882 to by pass the lights if they are travelling through town only. And widening 380 with service roads.	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: I support widening 380. I don't think we need that many roads through such a small area as Princeton. Not right off of 380. That's why widening 380 will be a better plan. Or go through New Hope that would take all the people in the north east part of Collin off of 380. They are building a lot of houses on FM 75 and they could take the same route from Hwy 5 in McKinney. Through Princeton a bridge could be built to by pass from at least Walmart's or even Monte Carlo. Also 982 is the back way that a lot of people use to get to Allen and east Plano. If there was more a a freeway thru there a lot of people would use it to get to east Collin County or to hunt county.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.

		Comment Form	(We need Hwy 380 widened, and with service roads. That would keep traffic moving and avoid being run over or rear ended by people not having attention on the road because it's constantly stop and go, especially in the evening. With concentrating on 380, the rest of the county roads can be left alone, and this don't affect the entire county. It will solve the entire problem with traffic. They are building a lot of new businesses, and having the service roads will allow thru traffic to keep moving.	Comment noted.
3423	R.J. Muraski	NA	Mr. Endres,  In addition to the comments that were provided on behalf of North Texas Municipal Water District by Saunders, Walsh and Beard (17 May) to the 380 feasibility study, we have additional comments on existing key water and wastewater lines that may be impacted. The least impact to the NTMWD is the option of only widening of the existing alignment of US 380. We have pipelines along US 380 but are insignificant cost wise to relocate compared to relocation costs of pipelines, lift stations and other facilities required by the other alignment options. Major impacts areas for the NTMWD are the McKinney Landfill, Airport Drive & East Trinity Corridor, US 75 and Bloomdale. The McKinney lift Station, wastewater interceptors & force mains, and water transmission pipelines. We can provide maps of these facilities and pipeline if you would like. Thank you for the opportunity to comment on the different alignments. Respectfully,	Comment noted.
		Email	Q: What is your interest in this study? A: Nearby resident	Comment noted.

			Q: Do you have any concerns with the existing US 380? A: Traffic congestion and accidents due to people driving well below the posted speed limit, combined with an abundance of traffic lights, and <u>critising in the passing lane.</u>	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Hwy-121	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Convert 380 into a limited-access freeway with a speed limit of at least 75 mph between Greenville and Decatur.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes,	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: What is your interest in this study? A: Commuter, Nearby resident, Daughter commute to UNT from Frisco	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No concrete barriers from Hwy 423 in Frisco and I-35 in Denton. Need for dedicated turning lanes.	Comment noted. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
			Q: If US 380 is congested, what alternative routes do you take? A: None.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Expand the corridor and correct the turning lanes and center barrier needs.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Yes.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Lack of enforcement of speeding and traffic light violations.	Comment noted. Enforcement of traffic laws is the responsibility of local police departments.
			Q: If US 380 is congested, what alternative routes do you take? A: CR 466 and FM 1377 and connecting roads	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: TX 78 upgrades would help especially from HWY 121 South to Garland. Monroe Carlo extension around Princeton is okay except for school area NW of town. Roadways around the new Collin County CC will have to be improved and would help if these improvements tied into TX 78 at both ends looping around the new school. Limited traffic access medians need to be considered in Princeton and Farmersville. Businesses hate them but they definitely have helped everywhere I've experienced them.	Comment noted. Alignment options are still being evaluated. TxDOT plans to construct a safety improvement project to add a raised median on US 380 from FM 1827 to CR 985; this project will be letting for bids in August 2018, and construction is anticipated to begin during the fall of 2018.
			Q: Do you support the building of a freeway regardless of alignment? A: A freeway would be great but can it be afforded and how long would it take?	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: How often do you drive on the existing US 380? A: Weekly, Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Yes, heavy commercial vehicles, general roadworks and unfinished right of ways	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I always attempt to avoid 380. Using various streets such as Coit and Custer, as well as Preston.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Not sure I have the answer, however if a "By pass" sorts could allow larger trucks to have such a dominant role, it would allow more "general" population traffic....	Comment noted.
3436	Robert Benson	5/14/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Red Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Red	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A:	No answer provided.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily, Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Other than the complete lack of foresight and planning? No.; Congestion, congestion, congestion. Why not timed lights?	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Country roads north and east/west	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Go back in time and plan, barring that make the current 380 a 12/1 SRT type road; Timed lights, especially during commute times—once you get in a group you go the entire way as long as you maintain the proper speed (barring emergency vehicles).	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: NO	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue, None	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue, None	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: no	Comment noted.

			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: yes	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Wilmette Road	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: build loop around McKinney without removing homeowners	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: no	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment, The Yellow Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Traffic gets bad during certain times of days affecting my desire to use it or shop at the adjacent businesses.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: widen it or look at creating an alternate loop further out now for future growth	Comment noted. Alignment options are still being evaluated.
			Q: Do you support the building of a freeway regardless of alignment? A: yes, 100%	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment, The Yellow Alignment	Comment noted.

## Comment Response Matrix

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in McKinney? A: Red  Q: Which alignment(s) do you prefer in Princeton? A: Blue, Yellow	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Commuter, Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: No	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: City streets, Virginia Pkwy, etc.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Overpasses at intersections.	Comment noted.
3443	5/15/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The current configuration is not designed for the planned density. As with all other nearby Texas communities, McKinney City and Collin County put no restrictions on development and plan 100% build out at whatever maximum density developers can squeeze in and still sell.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I suggest accelerating building the proposed "Outer Loop" from Denton through North McKinney and leaving everything else basically as per earlier long term development plans. Under no circumstances would I support the build of a bypass starting at Ridge Road or McKinney Ranch road. If a bypass must be built not originating in Prosper, it should start at Custer.	Comment noted. Alignment options are still being evaluated. Initial traffic analysis taking into account future population projections indicates that even with the construction of the Collin County Outer Loop and other planned roadway improvements within the study area, US 380 would still experience a failing level of service for congestion and delay.
			Q: What solutions would you suggest in the US 380 Corridor? A: I suggest limiting all development density to live within the constraints of the current US380 design. Further, for safety, I suggest limiting egress and ingress to US380 at only traffic light controlled intersections.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No. It will contribute to dividing the community. Send the traffic way, way north.	Comment noted. Alignment options are still being evaluated.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: None, I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: None, I Do Not Support Building a Freeway	Comment noted.
3444	5/16/2018	Electronic Survey		

Commenter Name	Date Received	Source	Comment Topic	Response
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Congestion. Lack of barriers between east west traffic in many sections.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Parallel local roads.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: A bypass around McKinney that ends at Custer road or even further west, away from the elementary schools on Ridge and Stonebridge. Exits off the bypass could allow access to local roads along the way and it could begin east of McKinney somewhere.	Comment noted. Alignment options are still being evaluated.
3445	Robert Gredig	5/18/2018 Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.

			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Blue Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Blue	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Blue	Comment noted.
			Q: What is your interest in this study? A: Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Nope	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I focus on timing my trips. I either leave earlier or later.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Leave 380 as it is, don't build on a city that is "Unique by Nature".	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: Nope, just a waste of money.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: I Do Not Support Building a Freeway	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Safety of traffic patterns, number of construction trucks, lack of speed enforcement	Any future improvements will be designed to enhance safety. Suggestion for lower speed limit noted.
			Q: If US 380 is congested, what alternative routes do you take? A: Virginia Pkwy	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: The bypasses proposed are as shortsighted as McKinney was 10 years ago. A bypass that starts around Custer road will help for about one year. When land in Prosper is developed the traffic problem will just be pushed west. Any bypass should connect to main artery roads, like Hwy 289 or NDT. The bypass idea is not a long term solution. Making 380 a more managed highway will be the best overall solution until the outer loop is completed.	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: yes, but only along the existing highway.	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.

			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Commuter, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Weekly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Not terribly, but I know many people who won't drive on it at all	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: I don't really ever have to fall over to another road.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A:	No answer provided.
3456	5/12/2018	Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: Not necessarily, not at the expense of destroying people's homes and property	Any future improvement projects would include assessment of the potential impact on the human and natural environments.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: The Green/Pink Alignment	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Princeton? A: Green, Pink	Comment noted.
			Q: Which alignment(s) do you prefer in Farmersville? A: Green, Pink	Comment noted.
			Q: What is your interest in this study? A: Property Owner, Nearby resident	Comment noted.
			Q: How often do you drive on the existing US 380? A: Monthly	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: Aside from all the road construction, it's fine.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: None. I sit in the congestion until it resolves.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Nothing	Comment noted.
			Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.

			Q: What is your interest in this study? A: Property Owner	Comment noted.
			Q: How often do you drive on the existing US 380? A: Daily	Comment noted.
			Q: Do you have any concerns with the existing US 380? A: The speed limit needs to be lowered and trucks need to use only certain lanes.	Comment noted.
			Q: If US 380 is congested, what alternative routes do you take? A: We have no other way out of Tucker Hill except 380.	Comment noted.
			Q: What solutions would you suggest in the US 380 Corridor? A: Tucker Hill's position is NO to all alignments due to potential loss of homes and devaluation of our neighborhood as a whole and adverse environmental and health implications. Notwithstanding our recommendation, if any freeway construction occurs on the existing 380 footprint adjacent to Tucker Hill, it must impose minimal right-of-way and noise pollution by means of cantilevered access lanes; a depressed Stonebridge; not on or bordering Tucker Hill.	Comment noted. Any future improvement projects would include assessment of the potential impact on the human and natural environments.
3458	Robin	5/11/2018  Electronic Survey	Q: Do you support the building of a freeway regardless of alignment? A: No	Comment noted.
			Q: If US 380 is constructed as a freeway, which alignment do you prefer? A: I Do Not Support Building a Freeway	Comment noted.
			Q: Which alignment(s) do you prefer in McKinney? A: I Do Not Support Building a Freeway	Comment noted.
