**TxDOT proposes to improve FM 1387 from a 2-lane rural to a 4-lane (ultimate 6-lane) divided urban roadway including intersection improvements, shared use path, and sidewalks.**

### **Project Purpose:**

To provide improvements to increase mobility, improve connectivity and to meet safety design standards.

### **Project Need:**

The proposed project is needed to reduce traffic congestion, improve connectivity, enhance safety of vehicles and pedestrians, and to address current design standards.

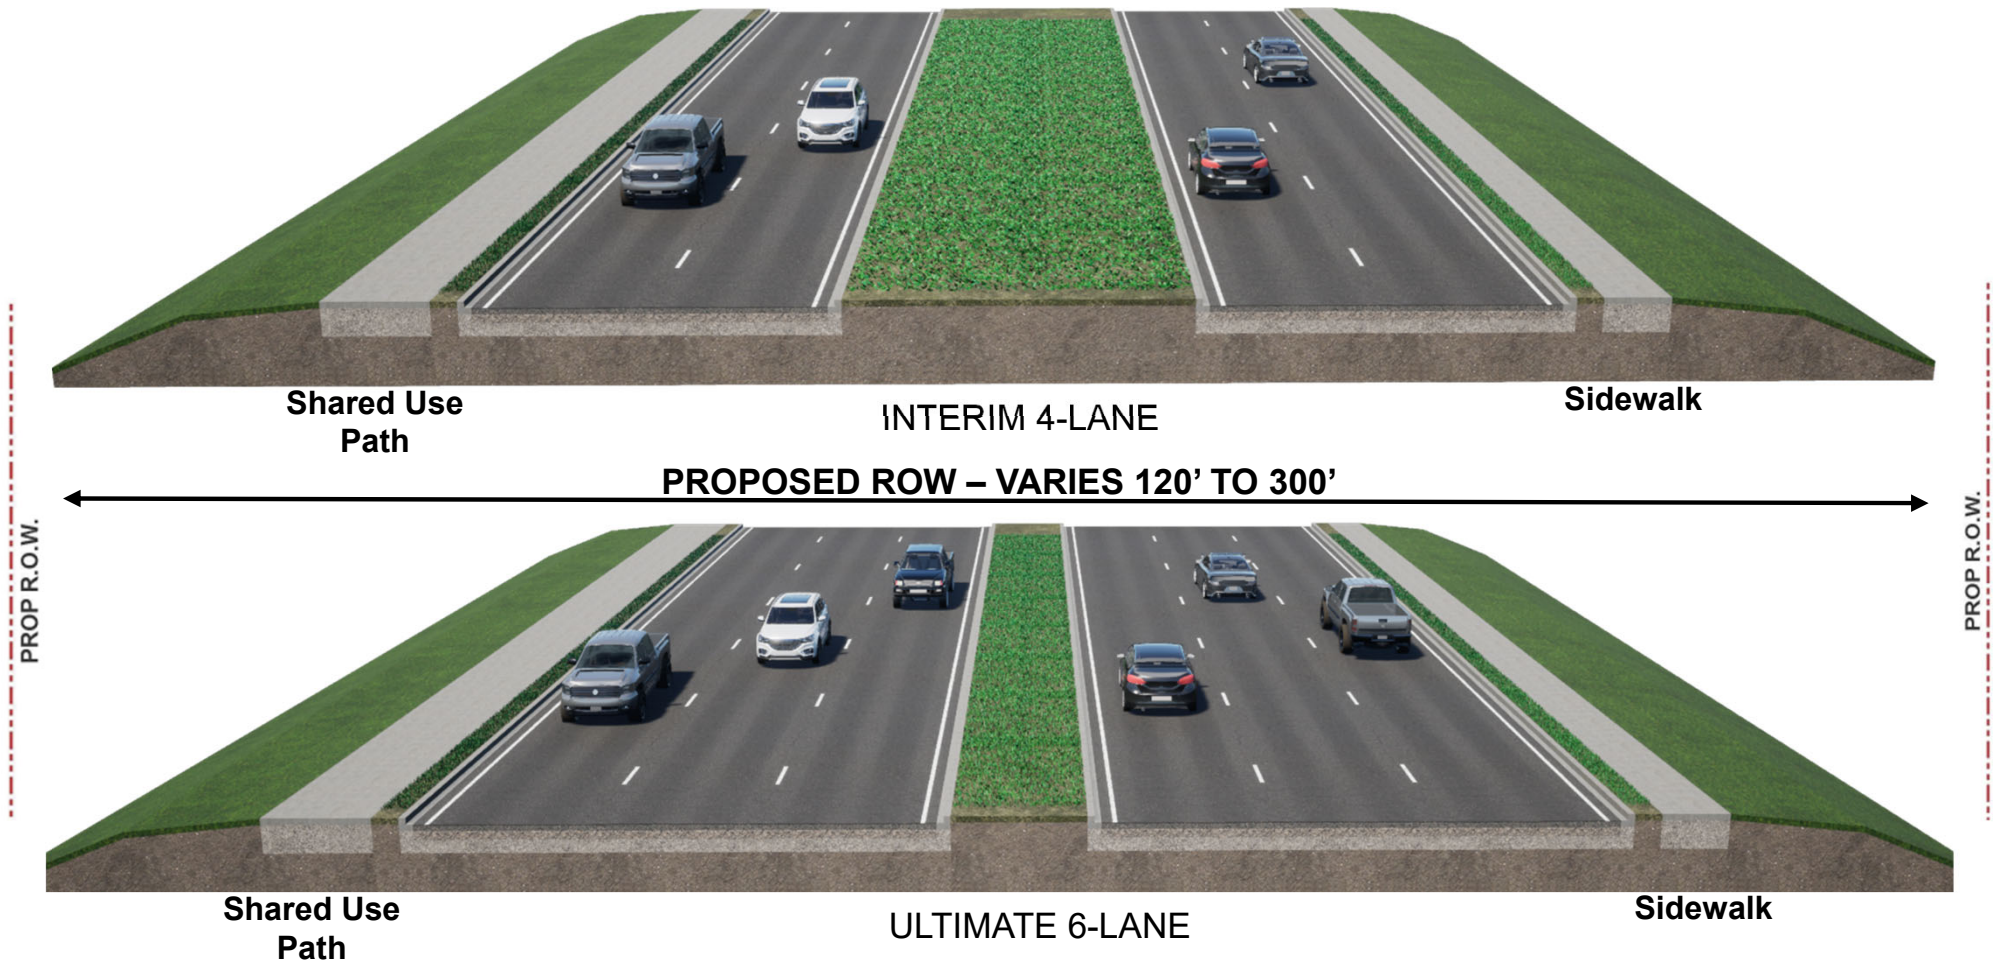

- Mainly consists of two undivided 12-foot-wide rural lanes with 2-foot shoulders
- Four major roads intersect FM 1387 including:
  - North Midlothian Parkway
  - Longbranch Road
  - Walnut Grove Road
  - FM 664

# Proposed Typical Section

- Expansion of the current roadway to an urban interim four-lane (ultimate six-lane) roadway
- Lane widths vary from 11-foot to 12-foot-wide lanes depending on ROW restrictions
- Proposed 10-foot shared use path, 5-foot sidewalk and a variable width raised median
- Turn lanes, where applicable, at side streets and intersections

### Proposed Right of Way (ROW)

- Approximately 58 acres of proposed ROW would be acquired from properties along both the north and south sides of the project and potentially displace 10 residences west of Walnut Grove Road.
- All ROW acquisition would be completed in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended.

**Anticipated Ready to Let Date**  
**Summer 2027**

**Estimated Construction Cost\***  
**Approximately \$102 Million**

*\* Project is partially funded for construction and cannot let until full funding is identified; however, right of way acquisition can proceed even if the project is not funded for construction.*
