**District(s):** Dallas

**County(ies):** Collin

**Roadway Name:** State Highway (SH) 5

**Limits From:** South of Farm-to-Market (FM) 1378/Country Club Road

**Limits To:** South of Melissa Road

**Project Description:** The Texas Department of Transportation (TxDOT) proposes improvements to State Highway (SH) 5 from south of FM 1378 (Country Club Road) to south of Melissa Road. The project is located in unincorporated Collin County, Texas and the City of McKinney, and extends for approximately 9.7 miles.

The project consists of the reconstruction and widening of SH 5 within the project limits. From Country Club Road to Spur 399, the existing 2-lane rural roadway will be reconstructed to a 4-lane divided urban roadway with raised curbed and a variable-width median. From Spur 399 to Industrial Boulevard (FM 546), the existing 4-lane divided rural roadway with depressed median will be reconstructed to a 6-lane divided urban roadway with a 17-foot curbed median. From Industrial Boulevard (FM 546) to south of N Tennessee St, the existing 4-lane divided with curbed median and 4-lane divided with a continuous left turn lane urban segment will be reconstructed to a 4-lane divided urban roadway with 17-foot curbed median. From south of N Tennessee St to SH 121 (Sam Rayburn Highway), the existing 2-lane rural roadway will be reconstructed to a 4-lane divided urban roadway with curbed, 42-foot median. A wider median width from Power House Street to SH 121 is proposed to accommodate an ultimate 6-lane divided roadway.

Side streets within the project limits would be reconstructed to tie into the improved SH 5 generally within the existing right-of-way (ROW), but in cases where the side streets do not meet design standards additional ROW may be required.

Adjacent and buffered sidewalks are proposed along the sides of the roadways in each segment to accommodate pedestrians. A 12' wide shared-use-path (SUP) is provided along the SB direction from S. Tennessee St to N. Tennessee St. A 14-foot outside shared used lane is provided along SH 5 in both directions outside of the limits of the 12' SUP.

The proposed improvements would occur within existing ROW and new ROW. Approximately 43 acres of proposed ROW would be required.

District personnel should complete this form with all appropriate documentation attached. ENV-HIST staff review is contingent on provision of an active CSJ (or equivalent if the project is not a construction project) against which environmental work can be charged. District-provided responses should reflect known data about the project and identify any limitations that hindered provision of the requested information. ENV-HIST staff will review the PCR form and attached information per established Documentation Standards. This review will result in:

- ENV-HIST environmental clearance of the project; OR
• ENV-HIST identification of additional technical studies required for clearance; OR
• ENV-HIST rejection of the PCR for failure to meet specific Documentation Standards and instructions on how to redress the rejection.

This form specifies minimally required information needed to properly facilitate ENV-HIST's review process. Please submit all relevant documentation with this PCR at one time.

NOTE: \* If this project information changes over the course of design OR if the funding source changes, then HIST requires re-coordination and a revised PCR in ECOS.
