Feasibility Study

Previous Public Involvement

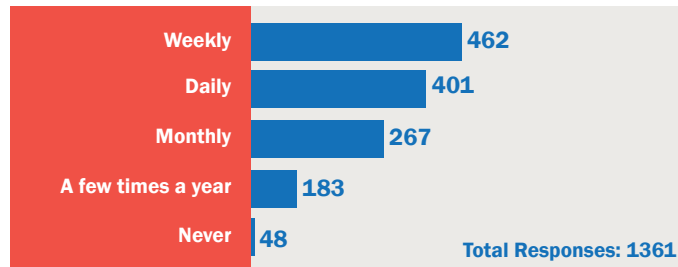

The Texas Department of Transportation held a series of three public meetings to introduce the I-345 Feasibility Study in December 2019. The meetings also served to solicit feedback from stakeholders regarding their use of I-345, travel habits, priorities and suggested improvements. The following information is an overview of what we learned and have taken into consideration when developing alternatives.

SURVEY FROM DECEMBER 2019

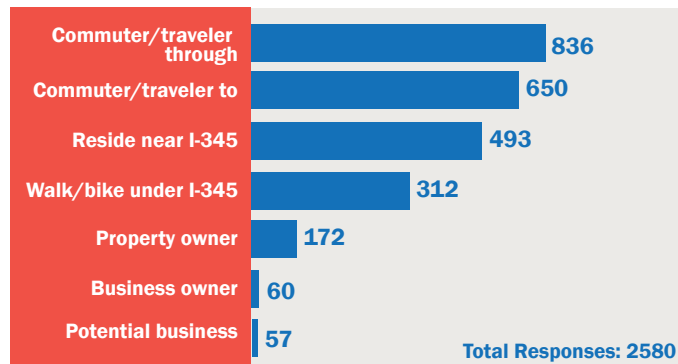

Why are you using I-345?

How often do you use I-345?

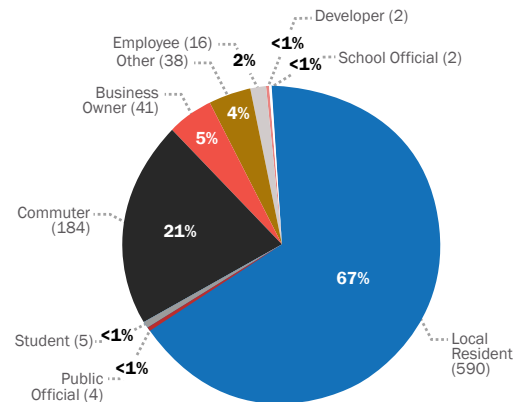

What best describes your interest in I-345?

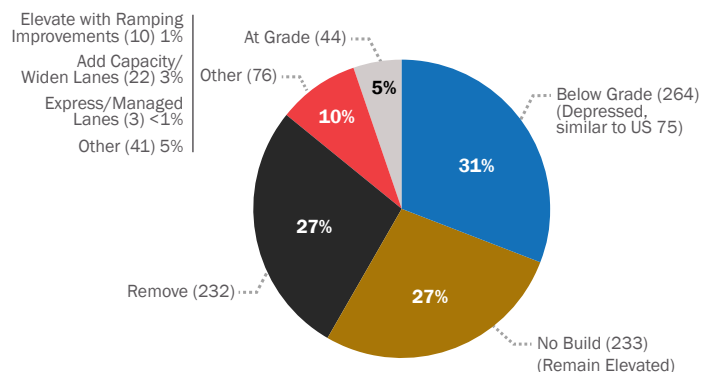

Not all questions were responded to by survey participants.

I am interested because I am a...

Total Responses: 882

Preferred Alternatives

Total Responses: 849

Key Takeaway

There was a pretty even three-way split for public preference on alternatives to evaluate in the feasibility study. More than 70% of respondents suggested further analysis of the alternatives presented in the 2016 CityMap Study. TxDOT values this feedback and further developed those alternatives to be presented as part of these materials.

PUBLIC MEETING ATTENDANCE

DECEMBER	
2	206 people in attendance at St. Philip's School and Community Center
DECEMBER	
3	178 people in attendance at CityPlace Conference Center
DECEMBER	
5	302 people in attendance at the Sheraton Hotel

STAKEHOLDER OUTREACH

The study team has held one-on-one listening sessions with various stakeholder groups that included elected officials, neighborhood groups, civic associations, and other agencies. Ongoing coordination with these stakeholders will continue through the end of the study.
