

SPUR 399 EXTENSION CONNECTIONS

Segment D + Spur 399 Purple Alternative

Segment C + Spur 399 Orange Alternative

TxDOT is required to evaluate if the US 380 Coit Road to FM 1827 Project could function on its own as an individual project. Therefore roll plots show the schematic design for only the Coit Road to FM 1827 Project. However, several areas would look different should the Spur 399 Extension Project be constructed and connected to the Coit Road to FM 1827 Project. These connecting projects would improve mobility and connectivity in the DFW region now and in the future.

- ✓ *More land would be needed including for interchanges*
- ✓ *Additional impacts would occur including displacements*
