The proposed project would realign US 380 from CR 560 to CR 699 (Hunt County Line), on new location a distance of approximately 7.6 miles. The existing US 380 roadway would remain. The proposed new location realignment facility would be constructed as a six-lane divided roadway (three lanes in each

direction separated by a median). The proposed project would also include continuous, two to three lane one-way frontage roads with bicycle and pedestrian shared-use paths on both sides of the roadway. The proposed project would be constructed within a proposed ROW of approximately 270- to 542 feet wide.

The proposed project would, subject to final design considerations, require additional ROW and potentially displace three residences and five non-residential structures. Relocation assistance is available for displaced persons and businesses. Information about the TxDOT Relocation Assistance Program and services and benefits for those displaced and other affected property owners, as well as information about the tentative schedule for ROW acquisition and construction, can be obtained from the TxDOT Dallas District office by calling (214) 320-6675 or on the project website. The proposed project would involve construction in a wetland, and an action in a floodplain.

The draft EA, any maps and drawings showing the project location and design, tentative construction schedules and other information regarding the proposed project are on file and available for inspection Monday through Friday between the hours of 8 a.m. and 5 p.m. at the TxDOT Dallas District Office, 4777 E. Hwy 80, Mesquite, TX 75150 and at Farmersville City Hall, located at 205 S. Main Street, Farmersville, TX 75442. Project materials are also available online at www.keepitmovingdallas.com/US380Farmersville. These materials will also be available in hard copy form for review at the in-person option.
