**TXDOT DALLAS DISTRICT STANDARDS
FOR WOODLANDS MITIGATION**

Texas Department of Transportation Dallas District Standards for Woodlands Mitigation

In accordance with the Memorandum of Understanding between TxDOT and the Texas Parks and Wildlife Department (TPWD), mitigation should be provided when TxDOT construction activities remove significant amounts of riparian woodlands or other natural plant communities. The following information shall be used to develop mitigation plans for loss of woody vegetation. Ordinarily, mitigation plans shall replace lost vegetation on an acre-per-acre basis (i.e., one acre replanted for each acre removed), not on a plant-per-plant basis. The exact species composition given in the table below may be adjusted due to commercial availability or site specifics; however, the total number of plants shall remain at 30 large trees and 60 small trees/shrubs per acre (90 plants per acre). Only those plants listed below shall be used, unless approved by Dallas Advance Project Development (and TPWD).

Species	Spacing	Quantity	Remarks
Large Trees			
Bur Oak (<i>Quercus macrocarpa</i>)	30-35 ft. o.c.	10 per acre	
Chinkapin Oak (<i>Quercus muehlenbergii</i>)	30-35 ft. o.c.	5 per acre	
Shumard Red Oak (<i>Quercus shumardii</i>)	30-35 ft. o.c.	5 per acre	Check branching structure to avoid Pin Oak hybrids.
Pecan (<i>Carya illinoensis</i>)	30-35 ft. o.c.	10 per acre	Use native variety if available. Plant B&B trees from Jan.15 to Mar.15, containerized from Sep.15 to Apr.15.
Small Trees/Shrubs			
Possumhaw Holly (<i>Illex decidua</i>)	15-20 ft. o.c.	12 per acre	Specify female plants (3:1).
Mexican Plum (<i>Prunus mexicana</i>)	15-20 ft. o.c.	12 per acre	
Common Persimmon (<i>Diospyros virginiana</i>)	15-20 ft. o.c.	12 per acre	Specify female plants (3:1).
Carolina Buckthorn (<i>Rhamnus caroliniana</i>)	15-20 ft. o.c.	12 per acre	
Flameleaf Sumac (<i>Rhus lanceolata</i> or <i>Rhus copallina</i>)	15-20 ft. o.c.	12 per acre	Specify female plants (3:1).

Large trees shall be 1½” to 2” caliper at planting; small trees and shrubs shall be 6’ to 8’ in height at planting. Standard TxDOT planting details shall be used. A maintenance period lasting at least one full growing season shall be specified for all mitigation plantings. Maintenance shall include: supplemental watering of all plants; maintaining an 8” layer of mulch on all plantings; replacement of all dead plants at the end of the maintenance period. Whenever possible, planting should be scheduled during the fall of the year to improve the survival rate. Additional information is available through Dallas District landscape architect.

Land Use Plan and Map Adopted by City Council on August 9, 2004

See Land Use Chapter of the Comprehensive Plan for Land Use Descriptions.

*The Section of Shiloh Road Between Parker Road and 14th Street is Subject to the Design and Development Phasing Plan Defined in Resolution Number 98-2-23(R).

A Comprehensive Plan shall not constitute zoning regulations or establish zoning district boundaries.

FUTURE LAND USE PLAN

The Future Land Use Plan serves as a guide for future development and represents policy and generalized land uses proposed for the City of McKinney. This Future Land Use Plan is composed of Land Use Modules. The Modules are groupings of several different land use categories combined with recommended percentages, working to achieve a holistic goal for a specific area of the community. THIS IS NOT A ZONING MAP.
